

# THE CAMPUS SCOOP

AN INSIGHT OF MONTHLY HAPPENINGS

## VICE CHANCELLOR OF THE YEAR 2018-19

DIT University's Vice Chancellor, Dr K. K. Raina, became a full-time professor of material science in 1999. Professor Raina's Research achievements are known through his innovative practices and creative thinking approach. He has published over 200 research papers in peer review International/national journals and about 50 Invited lectures delivered in International conferences. He did his post-doctorate research work from the Manchester University(UK). He is PhD examiner of several prestigious universities and institutes in India and is currently a member of Governing Council of selected universities and an expert peer team member of NAAC.

Like every year, The Pestle Weed School, Dehradun, on 5th September this year, organised the 2nd felicitation ceremony with great pomp and splendour, where Dr K. K. Raina received "Vice Chancellor of the Year" award by Human Rights Protection Centre and State Law Commission, due to his well known contributions to the teaching and research, which had brought him recognition nationally and internationally through various other awards and fellowships.

## GUEST LECTURE BY MANISH CHALANA ON URBAN DESIGNING

Faculty of Architecture and Design (FoAD), DIT University, Dehradun organized a guest lecture by Dr. Prof. Manish Chalana, University of Washington, Seattle on September 13th, 2019.

Prof. Manish is an Associate Professor in Urban Design and Planning in College of Built Environment in the University of Washington. He spoke on and about the topic "Exploring Intersectionality: Past, Present and Future in Design and Planning Principles". His talk was extremely insightful and refreshing and he actively engaged students and faculty. He also interacted with B. Arch final year Urban Design students who presented their studio work and discussed issues and conflicts in the Urban context of Dehradun. This event helped the students view their work through a different perspective while enabling them to have a broader view of the things.

# ETHICAL HACKING WORKSHOP

Ethical Hacking sometimes called Penetration Testing is an act of intruding into system or networks to find out threats and vulnerabilities in those systems which a malicious attacker may find and exploit, causing loss of data, financial loss, or other major damages. The purpose of ethical hacking is to improve the security of the network or systems by fixing the vulnerabilities found during testing. To give a brief idea about improving the security and defending the systems from attacks by malicious users the Department of Computer Application organised a

organized a “One day workshop on Cyber Security and Ethical Hacking” on 27th August 2019 in association with APTRON solutions PVT. LTD. , Noida .

Around 150 participants from BCA/B.Tech (CSE) from DIT University, Dehradun participated in this workshop. The interactive lecture session was delivered by Mr. Surinder Singh Khattri, Certified Ethical Hacker and a Faculty member at APTRON, Noida. He introduced the concept of Google Hacking to students and explained the baseline understanding of common cyber security threats, vulnerabilities and risks. The session was followed by a live demonstration of an online attack on system through vulnerabilities in a server to which the system was connected to. The workshop was successful with the support of student co-ordinators and Faculty members of Computer Application Department.

## SEMINAR ON INTELLECTUAL PROPERTY RIGHTS

A half day Seminar on ‘Intellectual Property Rights’ was organized on 14th September, 2019 by the Faculty of Management Studies (FMS) at Seminar Hall, Workshop Building, DIT University .

The Seminar was inaugurated by Dr. K.K.Raina, Vice Chancellor, DIT University; Prof. V.P.Singh (Dean Academics), Dr. Manoj Bhatnagar (Dean Faculty Welfare), and Dr. Hemraj Verma (HoD MBA). At 10 a.m. Dr.K.K.Raina presented the inaugural address and emphasized on working on socially relevant projects and innovation for better living of the society .

The Technical Session started at 11.45 a.m. by Mr. Dhruv Narayan Taimini, a Senior Consultant at Sanshadow Consultants PVT. LTD.

After a brief High Tea Break, he explained the rationale and aim of the seminar and relevance of securing intellectual property rights in current scenario. Many Faculty members, Researchers and Students were present in the seminar. The students were actively joined and involved in the question answer session. The main objective of this seminar was to create awareness about Intellectual Property Rights and Patents and how it can be used .

Some of the topics discussed were the meaning and types of Intellectual Property Rights; patents, copyrights and their importance, and the basics on how to proceed with a patent application. Afterwards he discussed the idea about the antecedents of IPR, narrated various issues of it and later on focussed on the emerging issues on IPR. He also discussed various points to overcome these problems. The session was concluded by the vote of thanks given to the guest by Ms. Silky Kaushik, Assistant Professor (FMS) DIT University .

## TRUST

Catch, me dad!”, the little 5 year old Lily screamed. Her father , James, was her idol. The little girl jumped off the bed” trusting her father. Spreading his arms James caught hold of her and swung her in the air. She enjoyed that little play time with her father. Though James was a billionaire, but her father was the only thing she ever wanted. Her mother died at the time of her birth, but James loved Emilia so much that he never married again. As time went by, Lily grew old, she made many friends, but her dream was to become like her father, ‘The leading business tycoon of the United States’. With the guidance and care, under her father Lily began to do wonders. A time came when she was frequently falling sick. Her father called up a doctor, he took some tests. Reports came, everything was fine except Lily’s health. The doctor advised some more tests. The real reason now came in front of James. Lily had a hole in her heart, which grew day by day. James was shattered. He burst into tears. He decided not to tell anything to Lily. Few weeks later Lily was admitted into the best hospital of the town. James realised that their lives began to end the day he became silent about the things that mattered. He was sitting nearby Lily in the ICU. He sobbed, held Lily’s hand and told her everything about her condition. She cried. The most serious issue was that they were not able to find a donor. She asked James to promise her that he would never leave him, and so he did. She trusted him. A week later, they found an anonymous donor. Lily was operated 4 days later. She was as healthy as a horse. But there was a slight discomfort when she saw everyone in that room except her father. She demanded to see her father. No one uttered a word. She opened and read the letter her father wrote for her. She realised that now she did actually inherited everything of her father, his courage, his loyalty, his truthfulness, and his heart. She was in pain which was beyond compare. No amount of love could counter that pain. It took some time, but she got over it. She married her love and gave birth to the most beautiful child on earth. She named him ‘James’. She told her story to her friends during a gathering. At the end of the story, she was the only person with a smile on her face. Listening to this every heart in the room melted. Later on, Lily became the first woman to become a leading tycoon of the United States

A trust broken  
A promise kept  
A daughter shined  
But a father slept
