SDG-7

The biggest challenge in modern society is to achieve 'Net Zero Emission' and to stop global warming due to Green House Gas (GHG) Emissions. The tremendous exploitation of non-renewable resources like fossil fuels is causing irrecoverable harm to nature by emitting all sorts of air pollutants and GHGs. The result is continuous increase of global average temperature, ice sheet melting, abrupt climatic consequences. One stop solution is to switch to alternative clean and green energy sources like Solar, Wind, Water etc. but not very easy with various economic, geologic and infrastructure reasons. However, society must continuously thrive to alternative energy resources through its technological advancement. UN SDG 7 promotes 'Affordable and Clean Energy' ensuring access to affordable, reliable, sustainable and modern energy. DIT University is in line with SDG 7 in making buildings with efficient energy rating appliances, using solar power at maximum usage, minimizing energy wastage and promoting new developments in green energy through research and collaboration activities.

DIT University Event Report

Outreach activities on energy efficiency and clean energy

DIT University is dedicated to promoting the importance of energy efficiency and clean energy within the local community. We actively provide programs and educational initiatives to raise awareness and enhance knowledge on these critical topics. Some recent examples of our community engagement efforts include:

1. A one-day Seminar on Awareness Program on Electric Vehicles on Feb 12, 2022 in collaboration with Gautam International School, Vasant Vihar, Dehradun.
2. A one-day Seminar on Awareness Program on Electric Vehicles on March 12, 2022, in collaboration with The Doon Global School, Suddhowala, Dehradun.

These initiatives reflect our commitment to knowledge dissemination and community engagement on energy efficiency and clean energy practices. We continuously strive to create a more sustainable and environmentally responsible local community.
