

**T**he advancement of the society in this age is only possible with mutual cooperation, collaboration, extending help to each section of the society and sharing of resources. The efficiency of achieving the SDGs become more while working in collaboration than an individual. This is true whether it is applicable for a person or an organization or a country. Wastage of resources must be zero and at the same time abundant resources must be generously shared with those not having access. This mutual cooperation is the fundamental principle of sustainability with involvement and participation of all. UN SDG17 aims to revitalize the global partnership for sustainable development. In line with UN SDG principle DIT University firmly believes in collaboration be it in research or resource sharing or implementation of its work culture not only inclusive but exclusive of University premises. The supportive and flexible work culture of DIT University essentially lies on the proposition of trust-integrity, employee engagement-opportunities, respect-fairness.

## **University Policies for Start Ups on Technology, Innovation and Sustainability**

DIT University actively provides assistance and support for start-ups that foster and promote a low-carbon economy and technology. Our commitment to sustainability extends to nurturing and empowering entrepreneurial ventures that align with clean and environmentally responsible practices. Some of the ways in which we support such start-ups include:

- Technology Business Incubator (TBI)
- Expert Guidance
- Access to Networks
- Funding Support
- Innovation and Research

Our university actively fosters and supports start-ups that are dedicated to building a low-carbon economy and advancing clean technology. We believe that these entrepreneurial endeavors play a crucial role in addressing environmental challenges and creating a more sustainable future.
