

**SDG-7**

**T**he biggest challenge in modern society is to achieve 'Net Zero Emission' and to stop global warming due to Green House Gas (GHG) Emissions. The tremendous exploitation of non-renewable resources like fossil fuels is causing irrecoverable harm to nature by emitting all sorts of air pollutants and GHGs. The result is continuous increase of global average temperature, ice sheet melting, abrupt climatic consequences. One stop solution is to switch to alternative clean and green energy sources like Solar, Wind, Water etc. but not very easy with various economic, geologic and infrastructure reasons. However, society must continuously thrive to alternative energy resources through its technological advancement. UN SDG 7 promotes 'Affordable and Clean Energy' ensuring access to affordable, reliable, sustainable and modern energy. DIT University is in line with SDG 7 in making buildings with efficient energy rating appliances, using solar power at maximum usage, minimizing energy wastage and promoting new developments in green energy through research and collaboration activities.

## **University policy on divesting investments from carbon-intensive energy industries especially coal and oil**

Unison Education Foundation, under which DIT University operates, does not have a formal policy on divesting investments from carbon-intensive energy industries, especially coal and oil. Nevertheless, as an educational society, Unison Education Foundation does not invest in carbon-intensive energy industries.

The Unison Group, in partnership with Wellington College UK, will establish a group of premium international schools in different parts of the country. The first school is being established in Pune.

Wellington College Pune will follow the ethos of Wellington College UK, and will also blend Indian traditions and customs to offer a truly global experience. The school would be co-educational, offering day and boarding options to children of age 2-18. The school will follow English National Curriculum designed using the International Baccalaureate framework culminating in the IB Diploma, for which Wellington College is amongst the leading academic schools globally.
