

Course Structure and Syllabus

With effect from 2013

All Programmes

DIT University

Mussoorie Diversion Road,

Dehradun, Uttarakhand – 248009

Index

S No.	Particulars	Page Nos.
1	B.Arch	1-79
2	B.Pharm	80-141
3	B.Tech in Civil Engineering	142-216
4	B.Tech in Computer Science & Engineering	217-283
5	B.Tech in Computer Science & Engineering - Cloud Based Applications	284-353
6	B.Tech in Electronics & Communication Engineering	354-429
7	B.Tech in Electrical Engineering	430-501
8	B.Tech in Information Technology	502-569
9	B.Tech in Mechanical Engineering	570-638
10	B.Tech in Petroleum Engineering	639-703
11	Syllabus-Open Electives of B.Tech VIII Semester	704-726
12	M.Pharm	727-742
13	M.Tech in Computer Science & Engineering	743-772
14	M.Tech in Digital Communication	773-796
15	M.Tech in Energy Engineering	797-819
16	M.Tech in Information Security and Management	820-844
17	M.Tech in Power Electronics & Drives	845-869
18	M.Tech in Wireless Mobile & Communication	870-894
19	MBA	895-944
20	MCA LE	945-999
21	Ph.D. in English	1000-1005
22	Ph.D. in Mechanical Engineering	1006-1012
23	Ph.D. in Pharmacy	1013-1019
24	Ph.D. in Physics	1020-1026

FIFTH	IX	27	54.5
	X	27.5	
		TOTAL	263

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Professional Communication – I	Course Code: HUT101		
Credit: 1	L 0	T 0	P 2
Year: 1st	Semester: I		

UNIT – I

Communication

1. Communication: Definition and Process of Communication.
2. Types of Communication: Formal & Informal Communication, Verbal & Non-Verbal Communication.
3. Barriers to Communication: Intrapersonal and Interpersonal Barriers. Semantic Barriers, Physical Barriers, Psychological Barriers, and Organizational Barriers.

UNIT – II

Listening and Speaking Skills

1. Importance and Objective of Listening Skills, Process of Listening, Listening and Hearing, Types of Listening, and Methods for Improving Listening Skills.
2. Listening Comprehension: Identifying General and Specific Information.
3. Listening for Note taking and drawing Inferences.
4. Importance of Speaking Skills, Types of Speaking, Methods for Improving Speaking Skills
5. Introduction to Phonetic Transcription: Familiarization with British and American Usage

UNIT – III

Reading Skills:

1. Importance of Reading Skills, Types of Reading Skills, Methods of Improving Reading Skills.
2. Vocabulary Building: Antonyms, Synonyms, Homophones, Homonyms, and One-Word Substitution, Etymology and roots.

UNIT – IV

Writing Skills

1. Importance of Writing Skills, Types of Writing Skills, and Methods for Improving Writing Skills.
2. Sentence and Paragraph Construction. Writing Expository, Argumentative, and Deductive Order etc Paragraphs.
3. Précis Writing
4. Basic Letter Writing: Format and Style of Formal Letters.

UNIT – V

One Act Play

Practice of LRSW through the study of the one act play, *THE REFUND* by **Fritz Karinthy**.

Text Books:

1. Gupta, Ruby. Basic Technical Communication, Cambridge University Press, New Delhi.2012.

Reference Books:

1. Rizvi, Ashraf. Effective Technical Communication, McGraw Hill, New Delhi. 2005
2. Raman, Meenakshi and Sangeeta Sharma,. Technical Communication: Principles and Practice, 2nd Edition. New Delhi: Oxford University Press. 2011
3. Tyagi, Kavita& Padma Misra. Basic Technical Communication, PHI, New Delhi. 2011
4. Lewis, Norman. Word Power Made Easy, W.R Goyal Pub. & Distributors.1995
5. Ford A, Ruther. Basic Communication Skills; Pearson Education, New Delhi.2013
6. Aslam, Mohammad. Introduction of English Phonetics and Phonology Cambridge.2003
7. Kameswari, Y. Successful Career Soft Skills and Business English, BS Publications, Hyderabad. 2010
8. English Pronouncing Dictionary, Cambridge.2012
9. The Oxford Guide to Writing and Speaking. OUP, Delhi.2011

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Design-I	Course Code: ARS101		
Credit: 6	L 6	T 0	P 0
Year: 1st	Semester: I		

UNIT-I

Introduction to primary elements

A general survey of the changes in habitat in history. Architects' act, COA, IIA, NASA

UNIT-II

Introduction II

Art, Architecture & Architectural Design, Preliminary geometric interpretation from nature & surroundings

UNIT-III

Forms & Geometry

Transformations, Collisions, Articulation

UNIT-IV

Form & Space

Opening, Enclosures & Quality of Space, Organization of Form & Space, Types of Organization with emphasis on spatial relationship, Form of circulation space, path space relationship.

UNIT-V

Proportion & Scale

Material & Structural, Visual Scale & Human Scale

UNIT-VI

Ordering Principles

Geometrical, Structural, Dimensional, Material, Spatial through observation of surroundings as well as simple exercises in 2D and 3D.

Exercises in order and transformations of form and space.

Reference Books:

1. Charles Wallschlaeger & Synthia Busic Snyder, *Basic Visual Concepts & Principles for artists, architects & designers*, McGraw hill, USA, 1992
2. Paul Zelanski & Mary Pat Fisher, *Design principles & Problems*, 2nd Ed, Thomson & Wadsworth, USA, 1996
3. Ching, F.D.K., "Design Drawing", Van Nostrand Reinhold

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Construction and Materials – I	Course Code: ARS102		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I		

MATERIALS

UNIT I

Construction material from earth and industrial waste.

- a) Blocking material
- b) Binding material
- c) Layering material

Supplemented with case studies of availability, strength, characteristics, appearance, usage, pricing and measuring units.

UNIT II

Classification, availability, characteristics and uses of natural Stone as a building material in elementary stone masonry

UNIT III

Types, properties and uses of cement

CONSTRUCTION

UNIT IV

- Vertical section of building explaining all the **building terminologies** with standard dimensions and specification.
- **Brick work** coarse work in substructure and super structure with details in English and Flemish bonds, walling joints and special bonds like Rat trap bond, Garden bond or decorative bonds.

UNIT V

Basic introduction about **substructure- Foundation** its need, basic design criteria in load bearing structure. Laying of Horizontal DPC (Using different material like Asphalt, Bitumen, Synthetic)

UNIT VI

- Stone work – Elementary stone masonry and types of joints and finishing.
- Arches in brick work.

Reference Books:

1. W. B Mckay, Building Construction
2. Harold B. Olin, Construction Principles Materials & Method
3. R.Chudley, Construction Technology

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Soft Skills – I	Course Code: CUS150		
Credit: 1	L 0	T 0	P 2
Year: 1st	Semester: I		

Soft Skills Development Program

...Shape-up your soft skills, your power to success

Soft skills are essential to successful employment. This program cover enhancement of the emotional, mental and physical state of individuals. It covers different issues such as increasing and sustaining accurate attitudes, sustaining self-hope and setting of the right kind of goals, developing winning relationships and building a healthy self-image. Lesson plans and practical exercises address issues of responsibility, adaptability and teamwork. This program is a perfect blend of complete behavioral and Verbal skills which makes one job ready and transforms them into industry ready resources keeping in mind the future challenges and need of the industry.

Performance Focus

First, this program helps learners identify and sharpen their unique skills. Second, the program facilitates the learners to learn, practice, develop and apply these key skills to their maximum benefit to excel in their profession and better their personal life.

Basic Outline of the Course

1. Get the Basics Right

a) Pre-Assessment

What does an employer expect from us?

What is our expectation from an employer?

b) Who Am I? (Psychometric approach)

Recognizing Self

What after B. Tech/ B. Arch/ B, Pharma

What options do I have

Mastering own destiny

2. Goal Setting

What is a Goal

Importance of goal setting

Setting professional and personal goals

Importance of SMART-er Goals

Concept of GITA

Personal action plan

3. Time Management

Why time management

Dimensions of time

Time Matrix and 80: 20 Principal

Time Wasters and how to deal with these

Planning and organizing

Things to do

4. SWOT Analysis

What is SWOT Analysis

Importance of SWOT analysis

How you use SWOT for your growth

5. Confidence Building / Self-Motivation

Importance of Self Confidence & Self-Motivation

Positive attitude and its magical impact

How to be self-confident

How to remain self-motivated

Creating positive environment

6. Positive Attitude

What is positive Attitude?

Why is it important?

How can attitude become a deciding factor for your success or failure?

7. Perception

What is perception?

Factors influencing perception

How to improve perception

Its application in organization

8. Reading Skill

What is effective reading skill

How to develop an effective reading skill

Pronunciation

Voice modulation, word stress

Sounds letter relationship

Word recognition skill

How does it help you become an effective speaker

9. Body Language

What is body language

How important is your body language for your success

How to develop a positive & impressive body language

Key aspects of proper body language

Handshake, Eye Contact

Smile and your facial expression

Sitting / Standing postures

Body Postures

Body Gestures

Head position and head movement

11. Group Discussion

What is GD and what is debate

Why GD

Roles played in a GD

Mock GD

12. Personal Grooming

What is grooming?

How crucial is it for you to make a statement?

How to groom self for the right occasion?

Do's and don'ts

13. Decision Making Ability

What is decision making ability

How critical is it for your success in life

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

What is Smart Decision

Decision Making Process

6 thinking hats

Self Discipline and Self Control

Personal check

14. Team Building and Team Management

What is a Team?

What is the difference between Team and Group?

The characteristics of team

Factors to be considered to build an effective team

How to build a Team

Understanding the team dynamics

Addressing issues amicably, Prevention of conflicts

15. Leadership Skill

Who is a Leader?

Characteristics of a true Leader

Leader's Role; Leading self and others

16. Post Assessment

Quiz on Time management

Quiz on Body language

Quiz on memory skill and thinking Skill

Case study on Decision making ability

Exercise on team building and leadership

Extempore and group discussion test

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Structures – I	Course Code: ART101		
Credit: 2	L 2	T 0	P 0
Year: 1st	Semester: I		

UNIT I

Simple Stresses & Strain

Introduction, types, elasticity, elastic theorem, limit, hook's law, modulus of elasticity, poisson's ratio, linear strain, shear stress

UNIT II

Concept of Load

Introduction, static load, dynamic load or impact load, fluctuating load, stresses created by these loads

UNIT III

Properties of Sections

C.G., M.I., section modulus, radius of gyration, theorem of perpendicular & parallel axis, M.I. for composite sections

UNIT IV

System of Forces

Types, law of parallelogram, law of triangular of forces resolution, resultant, equilibrium condition, moments, couples

UNIT V

Shear Force & B.M.

Introduction to different beams (cantilever, simple supported, fixed, continuous) concept, of shear force & bending moment, sagging & hogging moments, B.M. & shear force diagrams for determinate beams under simple loads, moment of resistance, point of contraflexure, interrelation between B.M. & S.F. diagram

UNIT VI

Theory of Columns

Introduction, Euler's load, derivation of Euler's formulae, buckling, short & long columns, slenderness ratio, Rankin's formulae, effects of eccentric loading

UNIT VII

Stresses in Beams

Introduction to beam, theory of simple bending, neutral axis, bending & shear stress in symmetrical sections, bending & shear stress distribution & its diagram.

Reference Books:

1. Strength of Materials by J.P. Den Hartog
2. Engineering Mechanics for Structures by Louis L. Bucciarelli

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Art and Graphics – I	Course Code: ARS104		
Credit: 2	L 0	T 0	P 4
Year: 1st	Semester: I		

UNIT I: Philosophy of Art

Relevance of art of life: Art and artist, Art and society, Art and religion, Art and mysticism.

Art in architecture: psychological and emotional aspect of aesthetics

UNIT II: Theory of Design (Introduction to Graphic Composition)

- Early Christian, Byzantine , Roman, Gothic Art
- Renaissance – Giotto, Leonardo da Vinci, Michael Angelo.
- Baroque – Rembrandt.
- Realism – Rodin,, Ingres.
- Impressionism – Manet, Renoir, Gauguin, Van Gogh.
- Fauvism – Matisse.
- Cubism – Picasso, Henry Moore, Duchamp.
- Expressionism – Paul Klee, Chagall.
- Surrealism – Dali.

UNIT III: Art and Graphic Skills

- Free hand drawing – drawing people, furniture, fabric and transport from imitation, observation and recapitulation.
- Rendering techniques – for textures of materials and finishes ; using equipments like transfers, airbrush, rendering architectural drawings
- Still life drawing – from observation.
- Drawing from nature-shrubs, trees, grass, plats, flowers, rocks, water.

Reference Books:

1. H. Gardner, Art Through Ages
2. R.W. Gill, Rendering With Pen & Ink
3. K. Kingsley, Free Hand Sketching in Architectural Environment

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Drawing – I	Course Code: ARS103		
Credit: 3	L 0	T 0	P 6
Year: 1st	Semester: I		

UNIT I

Drawing Tools and Accessories

Introduction to the subject and drawing equipment. Setting of drawing equipment.

UNIT II

Lettering & Scale

- Free hand and mechanical lettering.
- Types and uses of scales, Scales used by an architect, Reducing and enlarging scales

UNIT III

Basic Technical Drawing

- Types of line, Drafting and quality of lines with pencil and ink pen
- Division of lines and angles.
- Drawing polygons, Inscribing and circumscribing circles in polygons. Internal & External tangents, Metric Drawing

UNIT IV

Orthographic Projections

- Definition, Planes of Projections, Types of angle projections :- First angle projections & Third angle projection,
- Projection of regular rectilinear and circular solids (prisms, pyramids, cones, cylinders, spheres etc.) in different positions,
- Surface Development of solids, interpenetration of solids

Reference Books:

1. Engineering Drawing and Design by David A. Madsen
2. Architectural Drawing Course by Zell, Mo
3. Ching, F.D.K., "Design Drawing", Van Nostrand Reinhold

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Workshop / Model Making	Course Code: ARP101		
Credit: 1	L 0	T 0	P 2
Year: 1st	Semester: I		

UNIT I: Workshop

- Making different bonds & wall junctions in brick masonry
- Introduction to carpentry tools, Making carpentry joints

UNIT II: Model Making

Making three dimension models of different architectural forms using various materials

UNIT III: Photography

Creative composition in photography and its role in documentation and creative design process

Reference Book:

1. S.K. Yadav, Workshop Practice

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Design–II	Course Code: ARS201		
Credit: 6	L 6	T 0	P 0
Year: 1st	Semester: II		

UNIT I

Graphical representation : Graphical representation of building components- structural & spatial.

UNIT II

Measured drawing : Measured drawing of building unit or units representing the structural & spatial components.

UNIT III

Anthropometrics Studies : Graphical analysis of human dimensions & functions with respect to the measured drawing exercises

UNIT IV

Building design : Design of a habitable unit conforming to human dimensions is to space relationship & space is to space relationship.

UNIT V

Testifying : The design principles through academic exercise.

Reference Books:

1. Mike W. Lin, Drawing & Designing With Confidence
2. DeChiara & Callender, Time Saver Standards for Building Type
3. The Measure of Man and Woman: Human Factors in Design by Alvin R. Tilley and Henry Dreyfuss Associates

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Construction and Materials – II	Course Code: ARS202		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: II		

MATERIALS

UNIT I

Cement & Lime: Basic definitions, types, classification, properties and uses of various types of cement & limes

UNIT II

Sand: sources of sand, classification of sand, bulking of sand, test for sand, properties of sand and substitute of sand.

UNIT III

Mortar: Classification of mortar, various types of mortar (lime, surkhi, cement and gauged) uses of mortar, properties of good mortar, preparation of mortar, selection of mortar

UNIT IV

Timber : Softwood and Hardwood - Secondary Timber - Physical properties and their uses/ applications in buildings (framing, shutters, Panelling, flooring, roof finishing and furniture) - Defects, Conversion, Seasoning, Decay and preservation of timber - Fire retardant treatment, anti-termite treatment.

Industrial Timber - plywood, block board, particle board, fibre boards. MDF boards, veneers, laminates etc and other current products/development.

CONSTRUCTION

UNIT V

TIMBER:

- Elementary carpentry, Tools, Common joints,
- Types of Doors-Ledged, Braced Batten Door, Panelled, Flush, Carved, Sliding doors, Sliding and folding doors, Mosquito Proof Shutters.
- Types of windows, ventilators and their details.
- Mouldings, margins etc in wood and substitute materials.
- Wooden Partitions and panelling

Reference Books:

1. W. B Mckay, Building Construction
2. Building Construction Illustrated by Francis D. K. Ching
3. Fundamentals of Building Construction: Materials and Methods by Edward Allen & Joseph Iano

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Structures – II	Course Code: ART201		
Credit: 2	L 2	T 0	P 0
Year: 1st	Semester: II		

UNIT I

Properties & Behavior of Structural Materials: Concept of homogenous & heterogeneous materials in response of direct & bending force

UNIT II

Direct & Bending Stress: Introduction, stress distribution for eccentrically loaded section- rectangular, solid circular, hollow circular

UNIT III

Slope & Deflection of Beams: Slope deflection method, moment distribution method, conjugate beam method, Macaulay's method for simple supported & cantilever beams, slope & deflection of fixed & continuous beams

UNIT IV

Analysis of Indeterminate Structure: Introduction, continuous, fixed, cantilever beams, free end moments, analysis, reaction at supports, effects of sinking, advantages & disadvantages of continuous, fixed & cantilever beams

UNIT V

Analysis of Determinate Structure: Introduction, perfect frame, deficient frame, redundant structure, reaction at supports, analysis of simple supported & cantilevered trusses (method of joints, method of section)

Reference Books:

1. Building Structures Illustrated by Francis D. K. Ching
2. Strength of Materials by J.P. Den Hartog
3. Engineering Mechanics for Structures by Louis L. Bucciarelli

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Drawing – II	Course Code: ARS203		
Credit: 3	L 0	T 0	P 6
Year: 1st	Semester: II		

UNIT – 1

Section of Solids: Sections of regular rectilinear and circular solids (prisms, pyramids, cones, cylinders, spheres etc.) in varying conditions of sectional plane and true shape of sections

UNIT – 2

View: Isometric, axonometric and pictorial view

UNIT – 3

Perspective Drawing: Purpose and use. Differences with metric projections.

UNIT – 4

Anatomy of A Perspective: cone of vision, station point, picture plane, eye level, horizon line, ground line, vanishing point, etc.

UNIT – 5

Types of Perspective: One point, two point, three point perspectives

UNIT – 6

Perspective Drafting: Perspective of - simple and complex box blocks, simple curved surface, simple household furniture items & simple & medium sized buildings- isolated or in-group

UNIT – 7

Shortcut Methods:

Introduction to short cut methods in perspective drawing. Free hand perspective

Reference Books:

1. M.G. Shah & K.M. Kale, Perspective Principles
2. Shankar Mulik, Perspective & Sciography
3. Architectural Sketching and Rendering: Techniques for Designers and Artists by Stephen Kliment

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Arts and Graphics – II	Course Code: ARS204		
Credit: 2	L 0	T 0	P 4
Year: 1st	Semester: II		

UNIT – I

PHILOSOPHY OF ART

- Outline History of Indian Art from earliest times to the renaissance of Indian Art in late 19th century.
- Contemporary arts in India and the works of Abhinendra Nath Tagore, Nand Lal Bose, Jamini Roy, Amrita Sher Gill, M.F. Hussain, Satish Gujral and S.H.Raza
- Western Art From prehistoric To Medieval art (stone age, Beginning of Art, Art Of-Egypt, Greece, Etruscan, Roman, Early Christian , Byzantine & Gothic Art)
- Works of masters of Modern Architecture Renaissance – Giotto, Leonardo da Vinci, Michael Angelo

UNIT – II

RENDERING

- Rendering in different media.
- Rendering of students own works (design project) interior and exterior perspectives.
- Enlargement and Rendering in Ink the India Decorative motifs..

Reference Books:

1. H. Gardner, Art Through Ages
2. R.W. Gill, Rendering With Pen & Ink
3. K. Kingsley, Free Hand Sketching in Architectural Environment
4. Architectural Sketching and Rendering: Techniques for Designers and Artists by Stephen Kliment

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Surveying and Leveling	Course Code: ARP201		
Credit: 1	L 0	T 0	P 2
Year: 1st	Semester: II		

UNIT -I

Surveying

- Role of surveying in Architecture, Types of survey.
- Introduction to various techniques – Chain and Plain Table Survey, Travers Survey.
- Contouring – Contour Maps, characteristics, use and interpretation.

UNIT –II

Leveling

General principles and application of application of Levelling in Surveying

Reference Books:

1. Kevin Lynch, Site Planning

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Computer Application – I	Course Code: ARP202		
Credit: 1	L 0	T 0	P 2
Year: 1st	Semester: II		

UNIT – 1

BASICS

Computer Basics, Introduction to Internet

UNIT – 2

MS OFFICE

Working on Word, Excel & PowerPoint

UNIT – 3

PHOTO EDITING & DTP SOFTWARES

Photo Shop, Photo Editor, Coral Draw, PageMaker

UNIT – 4

INTRODUCING AUTOCAD

creating floor patterns, drawing simple objects like door, window, stairs etc

Reference Books:

1. Autocad 2014 by Ellen Finkelstein.
2. Microsoft Office Professional 2013 Plain & Simple by Murray, Katherine

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Professional Communication – II	Course Code: HUT202		
Credit: 1	L 0	T 0	P 2
Year: 1st	Semester: II		

UNIT I

PROFESSIONAL COMMUNICATION

1. Importance and Features of Business Communication, Flow and Channels of Communication in an Organization.
2. Introduction to Technical Communication, Types and History of Technical Communication.
3. Difference between General and Technical Communication, Importance of Technical Communication.
4. Characteristic of Technical Communication, and Elements of Style.
5. Process of Preparing a Technical Document.
6. Elements and Features of Scientific Articles.
7. Communication, E- mail, E- tools and Encyclopedia.

UNIT II

BUSINESS CORRESPONDENCE

1. Business Correspondence – Principles, Features, Types, Format and Layout of Business Letter.
2. Inter Office Correspondence – Letters of Enquiry, Quotation, Order, Sales, and Complaint.
3. Intra Office Correspondence: Notice, Agenda, Minutes, and Memorandum.
4. Job Application Letter.

UNIT III

TECHNICAL PROPOSAL and TECHNICAL REPORT

1. Technical Proposal - Introduction, Purpose, Features, Types, Format, Importance, and Writing Technical Proposals and Plagiarism.
2. Technical Report - Features, Types, Style, Format, Relevance, and Writing Technical Reports.

UNIT IV

CORPORATE COMMUNICATION SKILLS

1. Dimensions and importance of EQ
2. Interpersonal communication skills - Life Position, and Transactional Analysis
3. Johari Window: Role of Feedback and Disclosure in Communication; Accepting Criticism
4. Cross Cultural Communication
5. Attitude
6. Perception
7. Personality Attributes and Communication: Self Esteem, Self-Monitoring, Impression Management, and Locus of Control.
8. Conflict and Negotiation

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

UNIT V

PROJECT

REPORT WRITING/ PROPOSAL WRITING

The students will write a Report **OR** a Proposal consisting of 10-15 pages.

REPORT WRITING

1. For B.Tech. students-

Technical Report describing new machinery, a report on the sudden break down in production unit, and market survey report for formulating new market strategy.

2. For B.Pharm. students

Technical Report based on the site inspection of a drug manufacturing unit, Survey Report on Health Awareness and Self-Medication.

3. For B.Arch. students

Technical Reports based on a Site Inspection for Geographical and Geological aspects of a particular location, A Report on the Architectural Survey of a Monument. Architectural

PROPOSAL WRITING

1. For B.Tech. students

Technical Proposal to organize a Technical Training Program, To develop new range of a product and to start a new venture.

2. For B.Pharma. students

Technical proposal to establish a new laboratory, To create new drug-composition and to visit to a Super Specialty Hospital.

3. For B.Arch. students

Technical Proposal for an Archeological Site visit , To Construct New Buildings.

Report Writing and Proposal Writing carries 30 marks equivalent to three class tests.

Reference Books:

1. Gupta, Ruby. Advanced Technical Communication, Cambridge University Press, New Delhi, 2011

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Design – III	Course Code: AA3S10		
Credit: 9	L 9	T 0	P 0
Year: 2nd	Semester: III		

UNIT I

ARCHITECTURE AS A DESIGN RESPONSE TO THE PHYSICAL ATTRIBUTES OF A SITE

Location, access, topography, surroundings and site elements such as trees, rock, views etc. – Design programs for small **residential buildings**, and similar proto types can be explored – Study of the architectural style of an eminent architect & the generation of design proposals using the same - Ex. Weekend cottage on a Beach /Hill/Farm/Forest etc or a Workspace (Office/Studio/clinic) cum residence

UNIT II

ABSTRACTING NATURAL FORMS TO GENERATE DESIGN FOR A SMALL STRUCTURE

The Design approach of copying or abstracting patterns and **forms existing in nature** can be encouraged - Ex.Milk parlor / snack kiosk / Garden pavilion / Entrance portal with a security booth / Bus stop with toilet and petty shop etc.

Reference Books:

1. Bousmaha Baiche & Nicholas Walliman, Newfert Architect's Data
2. DeChiara & Callender, Time Saver Standards for Building Type
3. House Design by BERKUS
4. Houses: Designing The Public Private Houses by BARBER

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Construction and Materials – III	Course Code: AA3S20		
Credit: 6	L 6	T 0	P 0
Year: 2nd	Semester: III		

MATERIALS

UNIT I

Surface Finishing; Types of plastering, types of jointing and pointing. Cladding with natural and artificial stones, their composition, sizes, colours, properties, defects and their fixing details

Paints: characteristic of an ideal paint, types of paints, defects in painting, painting on different surfaces.

Varnishing: characteristics of an ideal, varnish types of varnishes, process of varnishing.

Distemper: properties of distempers, process of distempers. Wall finishes: wall paper, whitewashing and colour washing for walls.

UNIT II

Glass and Fiber Glass

Glass: - Classification of glass, types of glass, physical properties and uses of glass, special varieties of glass and Architectural glass.

UNIT III

ROOF COVERINGS: Clay Tiles (Country, Allahabad, Mangalore tiles etc.).

Concrete Tiles, Asbestos Cement sheets (Plain & Corrugated),

Aluminium Sheets (Plain & Corrugated).

Galvanised Iron Sheets (Plain & Corrugated), Stone, Slating, Shingles, Thatch. Any contemporary roofing material.

CONSTRUCTION

UNIT IV

ROOFING SYSTEMS IN TIMBER

UNIT V

Temporary Timbering

Timbering to shallow trenches Raking, Flying Needle shoring.

Formwork

Centring and shuttering in different material used in building industry (conventional and contemporary).

UNIT VI

Vertical Transportation

Brief introduction to stairs, lifts, escalators & conveyor belts

Reference Books:

1. W. B Mckay, Building Construction
2. Building Construction Illustrated by F.D.K. Ching
3. R.Chudley, Construction Technology
4. Building Construction by Verghese

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Structures-III	Course Code: AA3010		
Credit: 2.5	L 2	T 1	P 0
Year: 2nd	Semester: III		

UNIT -I

Plain Cement Concrete

Introduction to cement, types of cement, aggregates, ingredients of plain cement concrete, grades of concrete, water cement ratio, properties of P.C.C, concrete mix

UNIT –II

Reinforced Cement Concrete

Introduction & properties of concrete and test, reinforcing steels. requirements of governing & detailing, IS code 456-2000

UNIT-III

Design Method

Working and Limit State Design of reinforced concrete sections for bending and shear; Bond strength and development length; Serviceability; Limit states of deflection and cracking

UNIT-IV

Design of Beams

Theory & Design Of Single & Doubly Reinforced Beams, L& T Beams (Simple Supported, cantilever & Continuous), Concept Of Over Reinforced & Under Reinforced Sections and balance section

UNIT –V

Design of Slab Lintel, Sunshade

Classification, Load Estimation, Design Of One Way slab, Two Way slab, Flat slab, Continuous Slab and cantilever slab.

The application of all of the above designing methods should be studied by designing a small module of area not less than 25 sq.m (e.g. 3x4, 4x4 etc.)

Text books:

1. Design of Reinforced Concrete, 8th Edition; by McCormac, Jack C.
2. Reinforced Concrete Design (7th Edition); by George F. Limbrunner and Abi O. Aghayere
3. Design of Concrete Structures by Nilson, Arthur H

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: History of Architecture – I	Course Code: AA3020		
Credit: 2.5	L 2	T 1	P 0
Year: 2nd	Semester: III		

INDIAN CONTEXT

UNIT I

- **Indus Valley civilization:** Particularly in reference to the town planning principles exemplified with examples from Mohenjodaro and Harappa
- **The Aryan civilization:** With its emphasis on the Vedic town plan, its motifs and patterns
- **Buddhist Architecture:** In specific reference to the lats, eddicts, stupas, viharas and chaityas. Both in rock-cut or otherwise

UNIT II

- **Hindu Architecture-Indo Aryan:** With special attention to the evolution of the temple form, the shikhara in north India. Reference also to be made to the three schools of Architecture-the Gujrat, the Khajuraho, and the Orrisan styles
- **Hindu Architecture-Dravidian:** Particularly in reference to the evolution of the vimana and the contributions of the Chalukyas, the Pallavas, the Pandyas and Cholas as well as the contributions of the Nayaks to the temple cities.

UNIT III

Jain Architecture: With specific reference to the temple cities of Palitana and Cemar

Reference Books:

1. Sir Banister Fletcher, A History of Architecture
2. Percy Brown, Indian Architecture (Buddhist & Hindu Period)
3. Percy Brown, Indian Architecture (Islamic Period)
4. Islamic Architecture: Form, Function & Meaning by Hillenbra

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Graphics	Course Code: AA3S30		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: III		

UNIT I

Graphical Representation of Following in Floor Plans, Section and Elevation of a Building

Beams, columns, arches & slab, lintels
Balcony and other projections
Mezzanine floor & loft
Stairs, balustrade, railing, ramps
Door, window, ventilator
Rivets, welding, bolting
Steel structural members
Complex structures- dome, waffle slab, shell, tensile
membrane structures etc

UNIT II

Shades & Sciography

Values in shades & shadows
Shades & shadows of objects & building elements cast on irregular surfaces
Rendering in different mediums
Shortcut methods for constructing shadows
Shades & shadows in perspective views for exterior & interior
Shades & shadows cast by point source of light in interiors.

UNIT III

Presentation Techniques

Presentation drawings of small buildings through plans, elevations, site plan etc. Using various rendering techniques and media and incorporating graphical representation of structural elements

Reference Books:

1. R.W. Gill, "Rendering with Pen & Ink"
2. Architectural Graphics by Francis D. K. Ching

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Climatology	Course Code: AA3030		
Credit: 2.5	L	T	P
Year: 2 nd	2	1	0
	Semester: III		

UNIT I

INTRODUCTION

Global Climate Factors, Elements Of Climate, Site Climate

UNIT II

COMFORT CONDITIONS

Thermal Comfort Factors, Thermal Comfort Indices, Effect Temperature & Its Use.

UNIT III

PRINCIPLES OF THERMAL DESIGN

Thermal Quantities, Heat Exchange Of Buildings, Periodic Heat Flow

UNIT IV

MEANS OF THERMAL CONTROL

Structural Controls, Ventilation & Air Movements

UNIT V

DAY LIGHTING

Principles & Prediction Techniques

UNIT VI

DESIGN APPLICATION

Shelter For Composite Climates, Shelter For Warm Humid Climates, Shelter For Hot Dry Climates, Shelter For Tropical Upland Climates

Reference Books:

1. O.H. Koenigsberger, Manual of Tropical Housing & Building
2. M. Evans, Housing, Climate & Comfort
3. Donald Watson & Kenneth Labs, Climatic Design
4. Building for a Changing Climate by Peter S. SMI

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Computer Application – II	Course Code: AA3110		
Credit: 1.5	L 0	T 0	P 3
Year: 2nd	Semester: III		

UNIT I

AUTOCAD 2D

- drawing plan, elevation, section etc
- using all the 2D commands

UNIT II

3 D DRAFTING ANATOMY OF A PERSPECTIVE

introduction to 3D commands of AutoCAD and concept of ucs, viewport etc

Reference Books:

1. Autocad 2014 by Ellen Finkelstein.

Course Title: Value Added Programme	Course Code: AA3310		
Credit: 2	L 0	T 0	P 4
Year: 2nd	Semester: III		

There will be a workshop on Google Sketchup

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Design – IV	Course Code: AA4S10		
Credit: 9	L 9	T 0	P 0
Year: 2nd	Semester: IV		

UNIT I

Bio-climatic design approach to the planning and design of buildings having an agglomeration of simple spaces with particular emphasis on the design of the building envelope i.e articulation of openings, choice of materials for roof & walls of different orientations etc. – Integration of passive, active & hybrid solar technologies with the design proposals are encouraged – Ex. Youth hostel /Nursing home / old age home / charity homes etc.

UNIT II

Exploration of light quality in spaces for study and interaction – Study of the intensity & quality of natural light under various circumstances and its transformation in interiors due to location, size and material of glazed openings – Use of high openings, clear-storey's, dormer windows, light wells, courtyards and other contraptions to bring light into the interior of buildings –To analyze how spaces such as corridors, lobbies, courtyards etc. can be designed to foster interaction – Ex. Nursery & Primary school / Library / Students center / Cafeteria.

Reference Books:

1. BousmahaBaiche& Nicholas Walliman, Newfert Architect's Data
2. DeChiara&Callender, Time Saver Standards for Building Type
3. O.H. Koenigsberger, Manual of Tropical Housing & Building
4. M. Evans, Housing, Climate & Comfort
5. Donald Watson & Kenneth Labs, Climatic Design
6. Building for a Changing Climate by Peter S. SMI

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Construction and Material – IV	Course Code: AA4S20		
Credit: 6	L 6	T 0	P 0
Year: 2nd	Semester: IV		

MATERIALS

UNIT I

Concrete: Ingredients - suitability requirements for aggregates, grading of aggregates - role of water in concrete - reinforcement - admixtures - properties of concrete. Manufacture of concrete and concreting – mix proportioning - batching, mixing, transporting, placing, compaction, curing formwork - quality control -

outline of tests for concrete -

Concreting: effect of form work in terms of finishing of concreting, mixing, transporting and placing, consolidating and curing of concrete. various types of cement concrete., the properties and uses.

UNIT II

Special Concrete and Concreting Methods

Lightweight, high-density, fibre reinforced, polymer concrete - outline of manufacture, properties and uses of the above - ready mixed concrete - guniting - cold weather and underwater concreting – current developments in concrete products and methods of concreting.

CONCRETE CONSTRUCTION

UNIT III

Introduction to RCC framed structures concrete in foundation:

Footing Foundations – types and construction details.

Shallow Foundations: All types and details with special reference to Rafts – situations where adopted, raft with basement, water proofing of basements below ground water table.

Deep Foundations : Pile foundations – situations where adopted, types of piles, methods of construction, pile capacity from pile loading tests, under reamed piles.

Concrete slabs: one-way two way continuous & cantilever.

Concrete beams: singly reinforced, doubly reinforced, cantilever & continuous beams. Concrete columns, floors, walls, partitions, lintels, arches, sunshades.

UNIT IV

RCC Staircases: Types according to profile – straight flight, doglegged, quarter turn half turn, bifurcated, spiral & Helical. Structural system for the above types sloped slab, cranked slab, cantilevered slab, continuous slab & folded plate, foundation for RCC stair case. Vertical transportation.

UNIT V

DIFFERENT TYPES OF JOINTS IN CONCRETE

Reference Books:

1. Building Construction Illustrated by Francis D. K. Ching
2. Exercises in Building Construction by Edward Allen
3. Soil Mechanics & Foundations by Budhu, Muni
4. Soils & Foundations by Cheng Liu & Jack Evett

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Structures – IV	Course Code: AA4010		
Credit: 2.5	L 2	T 1	P 0
Year: 2nd	Semester: IV		

UNIT – 1

DESIGN OF R.C.C. COLUMN

Design of rectangular column.
Design of circular column.
Design of square column

UNIT – 2

DESIGN OF STAIRS

Effective Span, Load Distribution On Stairs, Design (Simple Problems) of dog legged, tread-riser, type stair

UNIT – 3

SHEAR WALL

Introduction & design procedure of shear wall

UNIT – 4

PRESTRESSED CONCRETE

Introduction, different method of pre-stressed concrete, losses of pre-stressed concrete, advantages and disadvantages

UNIT – 5

DESIGN OF LOAD BEARING STRUCTURE

Design of brick wall foundation and isolated footing for brick column
Design of brick masonry wall
Design of brick masonry column
Design of openings in brick wall (e.g. arch etc.)
Design of roofing structure in brick masonry (e.g. vault, dome etc.)

The application of all of the above designing methods should be studied by designing a small module of area not less than 100 sq.m (e.g. 3x4, 4x4 etc.) with objectivity of learning to design basement.

Reference Books:

- Design of Reinforced Concrete, 8th Edition by McCormac, Jack C.
- Reinforced Concrete Design (7th Edition) by George F. Limbrunner and Abi O. Aghayere
- Design of Concrete Structures by Nilson, Arthur H

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: History of Architecture – II	Course Code: AA4020		
Credit: 2.5	L 2	T 1	P 0
Year: 2nd	Semester: IV		

PRIMITIVE BEGINNING

UNIT I

- Introduction to history and architecture with special emphasis on Stone Age to Neolithic settlement in Europe and around with examples from Carnac and Stonehenge
- **Birth of Civilization:** In reference to the Asia-minor region with nascent cities like Jericho, Catalhoyuk and Hattasusetc

ISLAMIC CONTEXT

UNIT II

- Introduction and understanding of Islam's philosophy and its interpretation in building type e.g. mosque, tomb, Fort and their elements like domes, minarets, arch, Squinchetc
- **Sultanate Style-** With reference to the slave, khalji, tughlaq, sayyid, lodhis and shershansuri regimes who ruled from Delhi) and their architecture
- **Provincial Style-** Development of colloquial styles in various provinces of India like Punjab, jaunpur, Gujarat, Bengal, Bijapur, Bihar and Deccan

UNIT III

- **Mughal Architecture-** The architecture of the Timurids in India- Babur, Hamayun, Akhbar, Jahangir and Shahjahan.
- **Later Mughal-** The Oudh architecture in Lucknow and its surroundings briefly outlining the Lucknow city

UNIT IV

Colonial- The British architecture of the colonial days in India the capitol at delhi and the residency at Lucknow emphasizing on their planning criteria and architectural features

Reference Books:

1. Sir Banister Fletcher, A History of Architecture
2. Percy Brown, Indian Architecture (Buddhist & Hindu Period)
3. Percy Brown, Indian Architecture (Islamic Period)
4. Islamic Architecture: Form, Function & Meaning by Hillenbra

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Environmental Services	Course Code: AA4030		
Credit: 2.5	L 2	T 1	P 0
Year: 2nd	Semester: IV		

UNIT I

WATER SUPPLY

1. Need to protect water supply and requirements of water supply to different types of buildings.
2. Sources of water supply. Quantity and quality of water and treatment of plants.
3. Conveyance of distribution of water overhead tank underground tanks pipe appurtenances.
4. Hot and cold water supply system in a low rise and high rise buildings. Distribution system in campus. Pipes their sizes. Jointing and different fittings

UNIT II

SANITARY ENGINEERING

1. Purpose and principles of sanitation. Collection and conveyance of waste water.
2. Quantity and quality of refuse. Design and construction of sewer's and sewer appurtenances.
3. Roof and surface water drainage.
4. Sanitary appliances. Traps their variety. Pipes and joints. Sanitary pipes works below and above ground level. Drainage in non-municipal area.
5. Rain waters storage and water harvesting principles and methods

UNIT III

SYSTEM OF PLUMBING AND PLUMBING BYE-LAWS

1. The water supply and sanitary system individual and group of buildings.
2. Indian standards for designing the toilet, kitchen.
3. Plumbing by-laws

Reference Books:

1. Plumbing, Electricity, Acoustics by Norbert M. Lechner
2. Water Distribution System Handbook by Mays, Larry
3. Plumbing: Cold Water Supplies, Drainage and Sanitation by F. Hall
4. The Sanitation of Water Supplies by Murray P. Horwood

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Documentation	Course Code: AA4S30		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: IV		

UNIT I

PURPOSE OF DOCUMENTATION

To record existing structure, to aim at conservation of structures etc.

UNIT II

SELECTION OF THE PROJECT

Heritage Documentation, Monograph of an architect, Contemporary project etc.

UNIT III

RESEARCH

Historical research related to styles & contemporary works, influence of culture & technology, context, its role etc.

UNIT IV

GEODETIC SURVEY

Topographic maps, road maps, site maps etc., Architectural survey, survey methodology, physical measure drawings, photographic survey, digital architectural photogrammetry (2D-3D digital drawings) etc.

UNIT V

FINAL PRESENTATION

Document of a small architectural example or a part of the structure, where the content will cover various issues mentioned above.

Reference Books:

1. Previous documentations done by the students for NASA trophy
2. The little book of documentation by Anita Cheria-Edwin
3. Building the architecture documentation by Safari books online.

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Computer Application–III	Course Code: AA4110		
Credit: 1.5	L	T	P
	0	0	3
Year: 2nd	Semester: IV		

UNIT I

AUTOCAD 3D

- Drawing 3D views
- Using all the 3D commands

Reference Books:

1. Autocad 2013 by Ellen Finkelstein.
2. Mastering Autodesk Revit Architecture 2013 by Phil Read, James Vandezande & Eddy Krygiel.

Course Title: Educational Tour	Course Code: AA4410		
Credit: 1	L	T	P
	0	0	2
Year: 2nd	Semester: IV		

An Educational Tour will be conducted and a measure drawing exercise will be done by the students.

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Design – V	Course Code: AA5S10		
Credit: 9	L 9	T 0	P 0
Year: 3rd	Semester: V		

UNIT I

Evolution of structural systems

- **TRABEATED-:** Brick and stone, columns and beams.
- **ARCUATED-:** Corbelled, Radiating Arch, Vault and Dome, Squinch and Pendentives.
- **VECTOR STRUCTURE-:** trusses and space frames, slabs, one way and two way, coffers.
- **FORM STRUCTURE-:** Folded slabs, shells, Hyperbola-paraboloid.
- **TENSILE-:** Tents, Cables, and Pneumatic vis-à-vis materials and plan shapes.

Suggested studio exercises

- Making of models of various structural forms with appropriate and innovative materials.
- Making a scale model of important historical buildings incorporating one of the structural forms.
e.g. Trabeated-: Parthenon, Arcuated-: Santa Sophia, Parthenon, Vector Active-: Pompidou Center, Form Active-: Sydney Opera House, Tensile-: any of the famous bridges or stadiums.

Reference Books (Current Edition):

- Bousmaha Baiche & Nicholas Walliman, Newfert Architect's Data
- DeChiara & Callender, Time Saver Standards for Building Type
- Pneumatic structures : A Handbook of Inflatable Architecture; by Thomas Herzog
- Tensile Structures (v. 1 & 2); by Frei Otto
- Building Construction Illustrated; by Ching, Francis D. K.
- Form and Forces: Designing Efficient, Expressive Structures by Allen, Edward and Zalewski, Waclaw
- Long Span Roof Structures; by Committee on Sp Structures of Committee on Metals

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Construction and Materials – V	Course Code: AA5S20		
Credit: 6	L 6	T 0	P 0
Year: 3rd	Semester: V		

MATERIALS

UNIT I

Ferrous Metals

Brief study on manufacture, properties and uses of cast iron, wrought iron, pig iron and steel. Market forms of steel - structural steel, stainless steel, steel alloys - properties and uses - current developments.

UNIT II

Aluminium and Aluminium Alloys - brief study on manufacture, properties and uses - Aluminium products -extrusions, foils, castings, sheets, etc.-tin and lead, properties and uses - current developments. Use of nonferrous metals e.g. copper & copper based alloys (brass & bronze), tin, cadmium, chromium, zinc, lead, nickel etc., in architectural construction

UNIT III

Gypsum products: Introduction – Gypsum Board, Suspended Ceiling (Boards & Tiles), Gypsum Plaster, Mineral fibre tiles, Components and Accessories, Jointing and Finishing

CONSTRUCTION

UNIT IV

Steel Trusses Frames, Gates and Steel Components

Structural Steel Sections - types of connections in steel - steel in foundations, columns and beams – and different structural members.

Steel trusses – saw tooth roof truss with north light glazing, simple trusses in steel

Space frames:- single, double & triple layered tubular space, frames with globe connections,

Gates: collapsible gate, entrance gate.

Steel components: Steel doors, (hinged, sliding), steel windows (casement window & sliding window), Steel stairs (dog legged, spiral stair) steel hand rails and balustrade grill designs for windows

UNIT V

Pressed Steel Door Frames.

Metal stud Partitions, single layer and double layer.

UNIT VI

Metal False Ceiling: Different types of ceiling options available in Market.

Use of steel as external cladding material.

Reference Books:

1. Building Construction Illustrated by Francis D. K. Ching
2. Exercises in Building Construction by Edward Allen
3. Gypsum Construction Handbook with Product and Construction Standard; by United States Gypsum Company
4. Design of Building Trusses (Parker/Ambrose Series of Simplified Design Guides); by James Ambrose

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Structures-V	Course Code: AA5010		
Credit: 2.5	L 2	T 1	P 0
Year: 3rd	Semester: V		

UNIT-I

Basics of Soil Mechanics: Soil formation and resulting soil deposits, nomenclature of different soil types, basic physical properties and their inter-relationships, Indian Standard System of Classification.

UNIT-II

Bearing Capacity of Soil: Safe bearing capacity, bearing capacity failure.

UNIT-III

Test on Soil: Soil exploration methods, standard penetration test, dynamic cone penetration test, concept of bore log for soil description, ground water tab

UNIT-IV

Retaining Walls: Use, types and tentative proportioning of retaining walls.

The application of all of the above designing methods should be studied by designing a small module of area not less than 100 sq.m (e.g. 9x8, 6x10 etc.) with objectivity of learning to design basement.

Reference Books:

- Design of Reinforced Concrete, 8th Edition; by McCormac, Jack C.
- Reinforced Concrete Design (7th Edition); by George F. Limbrunner and Abi O. Aghayere
- Design of Concrete Structures; by Nilson, Arthur H

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Contemporary Architecture	Course Code: AA5020		
Credit: 2.5	L 2	T 1	P 0
Year: 3rd	Semester: V		

UNIT I: Brief introduction of Theory of Design in 20th Century. Emphasis should be on Post Independence Period in Indian Context

UNIT II: Overview of World Architecture since 1970 with the study of Late Modernism, Post Modernism & Deconstructivism

UNIT III: Theories governing contemporary architecture through case studies, evolving architectural trends and their impact on urban built environment

UNIT IV: Emerging Building Typologies with emphasis on Residential Developments, Offices, Skyscrapers, Institutional & Public Buildings

UNIT V: Study of evolving building materials and technologies with an approach towards contemporary challenges e.g. Disaster Mitigation, Energy Crisis, Socio- Economic Settlements

Text Books:

1. William J.R. Curtis, Modern Architecture Since 1900
2. Kiel Moe, Integrated Design in Contemporary Architecture
3. The World of Contemporary Architecture by CERVER

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: History of Architecture – III	Course Code: AA5030		
Credit: 1.5	L 1	T 1	P 0
Year: 3rd	Semester: V		

UNIT I

- Introduction to history and architecture with special emphasis on Stone Age to Neolithic settlement in Europe and around with examples from Carnac and Stonehenge
- **Birth of Civilization:** In reference to the Asia-minor region with nascent cities like Jericho, Catalhoyuk and Hattasus etc.
- Egyptian
- Mesopotamian

UNIT II

- Greek Architecture
- Roman Architecture
- Early Christian Architecture
- Byzantine Architecture

UNIT III

- Romanesque Architecture
- Gothic Architecture
- Renaissance Architecture
- Baroque Architecture

Reference Books:

1. Sir Banister Fletcher, A History of Architecture
2. S. Lloyd & H.W. Muller, History of World Architecture
3. A Global History of Architecture by Francis D. K. Ching, Vikrmaditya Prakash

Course Structure & Syllabus of BARCH Applicable for 2013-2018 Batch

Course Title: Building Bye Laws and Code of Practice	Course Code: AA5S30						
Credit: 2	<table style="margin: auto;"><tr><td style="padding: 0 10px;">L</td><td style="padding: 0 10px;">T</td><td style="padding: 0 10px;">P</td></tr><tr><td style="text-align: center;">2</td><td style="text-align: center;">0</td><td style="text-align: center;">0</td></tr></table>	L	T	P	2	0	0
L	T	P					
2	0	0					
Year: 3rd	Semester: V						

UNIT-I: Familiarizing with Building Bye-laws through Local Developments Authority Guidelines, applicable to Residential and Non Residential building

(Bye laws of MDDA and study the relevant extract from Delhi Building Bye Laws).

UNIT-II: Safety measures mentioned in Building Bye laws like fire protection, seismic considerations and other provisions of National Building Code.

UNIT-III: To make the students familiarize about the various code of conduct for specially able & various services like water supply & sanitation, electrical, mechanical etc.

UNIT-IV: Preparation of complete Local Development Authority drawing for a small two storied building that may have been designed in any of the previous semester. The drawings to also incorporate all the details for getting the plans approved from concerned authorities

Reference Books:

1. National Building Code
2. Mechanical & Plumbing Codes
3. Master plan of any area as specified by the teacher

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Working Drawing	Course Code: AA5S40		
Credit: 5	L 5	T 0	P 0
Year: 3rd	Semester: V		

Preparation of complete Local Development Authority drawing for a small two storied building that may have been designed in any of the previous semester. The drawings to also incorporate electrical and plumbing details complete with schedule and all specifications. The Working Drawing and details to include:

- Site plan
- Foundation layout with details of foundations.
- All floor plans.
- All elevations.
- Sections
- Doors and Windows schedule and details
- Electrical Layout in at least one of the two Floors
- Plumbing Layout in at least one of the two Floors
- Details of toilet and Kitchen etc. complete with all fixtures and their specifications.
- Flooring pattern
- Staircases Details
- Details of Grills, Parapet of railings
- Typical wall section showing foundation, DPC, skirting, sill, lintel, slab and terracing details.

Reference Books:

1. Civil Engineering Building Practice by Suraj Singh
2. Building construction drafting and design by John Molnar, P.E

Course Structure & Syllabus of BARCH Applicable for 2013-2018 Batch

Course Title: Value Added Programme	Course Code: AA5310		
Credit: 2	L 0	T 0	P 4
Year: 3rd	Semester: V		

There will be a workshop on AutoDesk Revit

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Design – VI	Course Code: AA6S10		
Credit: 9	L 9	T 0	P 0
Year: 3rd	Semester: VI		

UNIT – 1

VILLAGE SURVEY & RURAL HOUSING

Study of the physical, socio economic and cultural aspects of a selected **village** by conducting various surveys to understand the settlement pattern, housing stock and amenities that are existing or required – To understand the linkages between Occupation, Social structure and Religious beliefs and its physical manifestation in the form of the settlement – Identification of a suitable Design intervention that would improve the quality of life – Ex. Design of housing prototypes for a particular community / occupation using rural building materials & cost effective technology. Design exercise may include the design of any facility required such as Primary health centre / Community hall / Farm training centre etc

UNIT – 2

HOUSING – The various types of housing projects in a typical urban scenario can be taken with suitable design parameters that get established after conducting a rigorous study. Analysis of existing design trends & user preferences need to be ascertained. Awareness about special building byelaws applicable for Group housing schemes is essential. In addition to design issues such as security, accessibility, identity, social interaction, comfort, economy etc that would be investigated, the application of Fractals in design can also be explored. Ex. Housing for the poor / Slum dwellers, Multi-storeyed apartments for Govt. / corporate employees, Multi-storeyed condominiums for the rich etc.

Reference Books:

1. Ching, F.D.K., “A Visual Dictionary of Architecture”, John Wiley & Sons
2. Norberg-Schulz, C., “Principles of Modern Architecture”, Andreas Papadakis
3. New rural housing design theory [Paperback] by Ning Yu Luo Zhong Zhao Zhang Hui Fang
4. Housing Design: A Manual by Bernard Leupen and Harald Mooij
5. The Housing Design Handbook: A Guide to Good Practice by Levitt, David

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Construction and Materials – VI	Course Code: AA6S20		
Credit: 6	L 6	T 0	P 0
Year: 3rd	Semester: VI		

MATERIALS

UNIT – 1

Floor Finishing: Brick flooring, Cement Concrete, Different types of Stones (natural and artificial) used in floor finishing, Terrazzo, Ceramic & Vitrified Tiles, Wooden (natural and artificial). Rubber, cork

UNIT – 2

Thermoplastics and thermosetting plastics –properties and architectural uses of plastics – structural plastics –Reinforced plastics and Decorative laminates-plastic coatings, Adhesives and sealants – Modifiers and Plasticizers

Ex: Thermoplastics – Polythene, Polyvinyl chloride, polyvinyl acetate, Poly-propylene, Polymethyl metha Crylate, Polystyrene, Acrylo-nitrile butadiene styrene, Nylon, Polycarbonate. Thermosetting Plastics-Polyesters resin, Polyurethane, Synthetic resin, Rubber

UNIT – 3

Adhesives and sealants – Introduction, Natural Adhesives – Animal, Cassin, Bituminous, Thermoplastic Adhesives – Polyvinyl Acetate, Modifiers and Plasticizers. sealants used for aluminium work, epoxy etc.

UNIT – 4

Ceramics : Terracotta, Faience, Fireclay, Stoneware, Earthen ware, Vitreous China, Porcelain. Jointing and Finishing.

CONSTRUCTION

UNIT – 5

Fabrications of plastics (PVC and UPVC). Primary plastic building products for walls, roof and partitions. Secondary building products for rooms, windows, roof lights, domes, gutters and handrails etc.

UNIT – 6

Construction Using Non-Ferrous Metals (Aluminium)

Aluminium partitions, false ceiling, handrails,

Different types of Structural and curtain walling along with its fitting and fixtures.

Aluminium roofing - north light glazing bar, Aluminium roofing sheets. Use of other

Use of Aluminium and other non ferrous metals in cladding, panelling, and in kitchen fittings.

Aluminium doors - open able, sliding, pivoted.

Aluminium windows - open able, sliding, fixed, pivoted.

Aluminium ventilators - top hung ,bottom hung, pivoted, louvered, fixed.

Reference Books:

1. Goyal, M.M., “Handbook of Building Construction”, Thomson Press (I) Ltd
2. Deplazes, A. (Editor), “Constructing Architecture: Materials, Processes, Structures: A Handbook”, Birkhäuser
3. Ching, F.D.K., “Building Construction Illustrated”, Wiley

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Structures – VI	Course Code: AA6010		
Credit: 2	L 2	T 0	P 0
Year: 3 rd	Semester: VI		

UNIT – 1

Foundation

Introduction to foundation, Purpose of foundation, Types of foundation, Rafts – situations where adopted, raft with basement, water proofing of basements below ground water table Pile foundations – situations where adopted, types of piles, methods of construction, pile capacity from pile loading tests, under reamed piles.

UNIT – 2

Design of R.C.C. Foundation

Raft and pile foundation

UNIT – 3

Footing

Introduction and guidelines for depth for footing, dimensioning of footings on basis of given values of bearing capacity, allowable pressure and soil borelog, codal provisions, use of plate load test data, effect of variation of ground water table.

UNIT – 4

Design of R.C.C. Footing

Design of isolated footing
Design of combined footing

The application of all of the above designing methods should be studied by designing a small module of area not less than 100 sq.m (e.g. 6x10, 12x7 etc.) whose planning should include the projected slab, slab supported on columns etc.

Reference Books:

1. Ghulati, S.K. and Datta, M., “Geotechnical Engineering”, Tata McGraw Hill.
2. Varghese, P.C., “Foundation Engineering”, Prentice-Hall of India.
3. Ranjan, G. and Rao, A.S.R., “Basic and Applied Soil Mechanics”, New Age International (P) Ltd.
4. Murthy, V.N.S., “Soil Mechanics and Foundation Engineering”, CBS

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Landscape Architecture	Course Code: AA6S30		
Credit: 3	L 3	T 0	P 0
Year: 3rd	Semester: VI		

UNIT – 1

Introduction

Meaning of landscape & its relevance to architecture. Theory of landscape Architecture

UNIT – 2

Landscape Graphics

- Graphic techniques : Drawing trees with different textures. Foliage patterns, tone, contrast and balance, rock and water.
- Conventional symbols in landscape presentations
- Conceptual drawings of indoor & outdoor landscapes

UNIT – 3

Plant Identification

Names and uses of Trees, Shrubs, Water Plants, Ground Cover and Creepers

UNIT – 4

Construction Techniques

Technical Terms, Tools and materials for Hardscape & Softscape, Details of pavements, retaining walls, grass laying, wooden decks, Terrace Gardens and outdoor furniture

UNIT – 5

Urban Landscaping

Landscape conservation, Landscape estimation & management, Regulations & Legal aspects.

Small landscape design proposal incorporating the basics covered above, services & circulation for public & private place like Junctions, River front & Terrace Gardens etc

Reference Books :

1. J. Appleton, The Experience of Landscape
2. Marc, Keane, Japanese Garden Design
3. Ian, McHarg, Design With Nature
4. Basic Landscape Architecture by Waterman

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Specification and Estimation	Course Code: AA6020		
Credit: 1.5	L 1	T 1	P 0
Year: 3rd	Semester: VI		

UNIT – 1

Specification

- Definition, Importance and scope of the subject. Correct form of writing specifications, avoiding ambiguity and conflicting statements. Form and sequence of clauses, study and uses of standard specification viz; drafted by C.P.W.D. etc.
- Writing detailed specifications for various building constructions works e.g. earthwork for foundations, concreting the trenches for foundations, superstructure in cement mortar, R.B. work, plastering and painting, lime punning, flooring, whitewashing, distempering and painting. Snowcem wash, stone masonry, mud phuska, terracing and others.

UNIT – 2

Estimating

- Estimates-types of estimates-approximate and detailed methods of estimating – plinth area method, carpet/floor area method cubic content method, approximate quantity method and number system, detail estimates procedure of estimating, taking out quantities schedule of rates.
- Exercise in estimating (with different methods) of small buildings, estimating exercises for interior schemes, plumbing work and electrical installations etc.

UNIT – 3

Rate analysis

- Principles of analysis of rates, rates of labour and materials, exercises in rate analysis of different building works, e.g. earthwork for foundations, flooring, timber work etc.
- Introduction to P.W.D. accounts procedure, measurement book, daily labour, muster roll, stores, stock, and issue of material from stock, indent form, imprest account, cash book, mode of payment.

Reference Books:

1. B.N. Dutta, “Estimating and Costing in Civil Engineering”, 24th Ed., UBS Publishers Distributors Ltd.
2. S.C. Rangwala, Estimating, Costing & Valuation
3. Rodney D. Stewart; Cost Estimating; 2nd Edition

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Interior and Retail Design	Course Code: AA6S40		
Credit: 3	L 3	T 0	P 0
Year: 3rd	Semester: VI		

UNIT-I

THEORY

- Principles of Interior Design and their application.
- Elements of Interior Design – Space, Light and Illumination, Color, Texture, Furniture (movables & built-in), Fittings and Fixtures.
- Understanding the works of Great Masters.
- Modern trends and contemporary attitudes to Interior Design e.g. Modular units, Modern materials

UNIT-II

STUDIO

- Furniture design exercises.
- Design of a small interior space e.g. Mall, Entrance Hall, Conference Room, Executive's office, Residential- Library/toilet/kitchen/rooms etc.

Reference Books:

1. Lorraine Farrelly, Materials & Interior Design
2. Drew Plunkett, Construction & Detailing for Interior Design
3. Basic Interior & Retail Design by Lynne Meshe
4. Basic Interior Architecture by Brooker

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Building Services	Course Code: AA6030						
Credit: 1.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">1</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	1	1	0
L	T	P					
1	1	0					
Year: 3 rd	Semester: VI						

UNIT I

ILLUMINATION AND ELECTRICAL SERVICES

Electrical systems – Basic of electricity – single/Three phase supply – protective devices in electrical installation – Earthing for safety – Types of earthing – ISI Specifications. Electrical installations in buildings, Types of wires, Wiring systems and their choice – planning electrical wiring for building – Main and distribution boards. Principles of illumination – Visual tasks – Factors affecting visual tasks – Modern theory of light and colour, Luminous flux – Candle – solid angle illumination – utilization factor – Depreciation factor, Principles of welding

UNIT II

LIGHTING DESIGN

Classification of **lighting** – Artificial light sources – Spectral energy distribution – Luminous efficiency – Colour temperature – Colour rendering. Lighting for different places and minimum level of illumination required.

UNIT III

HVAC

Behaviour of heat propagation, thermal insulating materials and their co-efficient of thermal conductivity.

General methods of thermal insulation: Thermal insulation of roofs, exposed walls. **Ventilation:** Definition and necessity, system of ventilation. Principles of air conditioning Air cooling, Different systems of ducting and distribution, Essentials of air-conditioning system

UNIT IV

Lift Services

Types of Lifts- working of lifts with details of lift section describing various parts of lifts Definitions regarding lifts such as average travel, lift carrying capacity, rated load, rated speed, RTT etc. Installation requirements and the information to be provided by the architect for the installation. Grouping of lifts and design standards of a lift lobby. Function and working of Escalators

Reference Books:

1. Handbook for Building Engineers in Metric systems, NBC
2. Fred Hall & Roger Greeno, Building Services Handbook
3. The Elevator Family by Evans, Douglas
4. Elevator Design, Construction and Maintenance - 1905 by Merchant Books
5. Lighting Design Basics by Benya, James R., Karlen, Mark and Spangler, Christina
6. Interior Lighting for Designers by Gordon, Gary

Course Structure & Syllabus of BARCH Applicable for 2013-2018 Batch

Course Title: Practical Training	Course Code: AA7510		
Credit: 20	L 0	T 0	P 40
Year: 4th	Semester: VII		

The candidate is required to go on practical training for 16 working weeks in the office/ organization of Architecture. Each student shall be issued an authority letter by the head of the institutions for practical training with the specified organization. The candidate shall report immediately in the given performa duly signed by the head of the organization to the institute about the joining of training. Each candidate shall be provided a log book containing. The performa one for each weeks work (16 Nos.)

1. The trainee is to fill up the work log book weekly during the training period and get it verified by the head of Training office. The work shall be of drawings, specifications report writing, model making and supervising the work at site of construction along with knowhow of the systems of billing and payments etc of records maintenance in Architect office.
2. Every candidate on completion of 16 weeks training shall prepare a complete training report on assignments to which he/ she was associated during the training; supported by the drawing prints/ photographs and other relevant documents.
3. On completion of the training every student shall get a certificate issued by the head of the organization in the performa given by the institution without which the training shall not be recognized. Head of the office is also required to send a report; about the trainee's work, conduct skill etc; the points relevance to Architecture student; in a sealed cover to the Institute.
4. The report shall be submitted to the institute's training incharge before the commencement of the classes of IVth yr. IIndsem or (VIII sem) on the date specified by the institution.
5. The training Report, log book & certificate along with confidential report shall be examined by the Internal jury of the Institute faculty and award the sessional marks.
6. There shall be viva examination conducted by one internal and one external examiner on the report of the candidate to award the examination marks (out of 400) assigned to it. The external and the internal examiners shall be approved by the university.

Course Title: Training Report Presentation	Course Code: AA7520		
Credit: 7	L 0	T 0	P 14
Year: 4th	Semester: VII		

The training report will be evaluated during the practical/ viva exam.

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Design – VIII	Course Code: AA8S10		
Credit: 9	L 9	T 0	P 0
Year: 4th	Semester: VIII		

UNIT I

Office buildings – Office spaces require special care in design & detailing. Students get exposed to the various services, structural systems and vertical access systems such as elevators, escalators etc of multi-storeyed buildings. Knowledge about various types of cores, fire fighting systems and special building rules applicable to multi-storeyed buildings are implied. Scholars will be required to do the Interior design scheme in detail. Ex. Multi-storeyed office buildings that do not exceed G+6 floors.

UNIT II

Commercial buildings – Commercial spaces like Malls, Hotels etc.

Acoustical study should also be there with reference to different buildings- multiplexes, auditorium, conference room etc. The teacher will introduce acoustical terminology, concepts and defects as well as the latest acoustical materials available

Reference Books:

1. Ching, F.D.K., “A Visual Dictionary of Architecture”, John Wiley & Sons
2. Norberg-Schulz, C., “Principles of Modern Architecture”, Andreas Papadakis
3. The Office Building of the Future; Pickard Chilton
4. Office Space Planning: Designs for Tomorrow's Workplace (Professional Architecture); Marmot, Alexi and Eley, Joanna
5. Shopping Malls; YealXie
6. Van Chris Uffelen; Malls and Department Stores

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Construction and Materials – VIII	Course Code: AA8S20		
Credit: 6	L 6	T 0	P 0
Year: 4 th	Semester: VIII		

MATERIALS

UNIT I

Materials with special reference to interiors

Floor Coverings, Ceiling Finishes, Window Dressings, Fabrics / Upholstery, Hardware

UNIT II

Damp Proofing and Water Proofing

Damp proofing: Hot applied and cold applied – Emulsified asphalt, Bentonite clay. Butyl rubber, silicones Vinyl's, Epoxy resins and metallic water proofing materials, their properties and uses.

Water proofing: water proofing membranes such as rag, asbestos, glass felt, plastic and synthetic rubber- vinyl, butyl rubber, polyvinyl chloride – prefabricated membranes sheet lead, asphalt their properties and uses.

Application: application of the above in basement floor, swimming pool, and terraces

CONSTRUCTION

UNIT III

Pre - Fabrication

Pre- fabrication: Introduction to pre- fabrication technology, column and beam system /panel system / box system, advantages of pre- fabrication. Pre- fabrication techniques and various building components – foundation, walls, floors, roofs, doors, windows,

Ferro cement products: sanitary and service core unit, trusses and rafters, water tanks. Design: Design considerations for pre fabrications

UNIT IV

Modern Formwork techniques in steel. Lift slab construction and slip form formwork and formwork of special profiles.

D.P.C- Vertical and horizontal (basement, sunken floors, roof slab etc)

UNIT V

Special structures- Definition –single, double and multilayered grids- two way and three way space grids connectors, Grid domes-various forms-Geodesic domes.

Shell, Folded Plates and Tensile Structures – Shell types, Classification as per BIS- Relative merits and applicability, Folded plates- types-comparison with shell- applicability, suspended cable structures- types of cable network systems- shapes of cable suspended systems, examples of tensile membrane structures- types of pneumatic structures.

UNIT VI

Modular Coordination

Aims, basis, planning, dimensioning,

Assembly of components, tolerances, modules, reference system, grids, positioning of functional elements – slabs, walls, staircases; Standardization in buildings' design and their components

Reference Books:

1. Deplazes, A. (Editor), "Constructing Architecture: Materials, Processes, Structures: A Handbook", Birkhäuser
2. Ching, F.D.K., "Building Construction Illustrated", Wiley
3. Prefabrications by Gary Robins
4. Concrete Folded Plate Roofs by Wilby

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Structures – VIII	Course Code: AA8010		
Credit: 2.5	L 2	T 1	P 0
Year: 4th	Semester: VIII		

UNIT-I

Properties of Structural Materials

Steel, masonry and B.I.S. specifications, design loads as per B.I.S. codes.

UNIT-II

Riveted and Welded Connections:

Simple connections and connections subjected to moments (simple cases only)

UNIT-III

Members Subjected to Axial Compression

Steel struts and columns including built-up columns.

UNIT-IV

Beams

Steel beams and built-up sections.

UNIT-V

Introduction to Steel Trusses & Industrial Buildings

Case Study

UNIT – VI

Bases and Footings

Types, design of slabs and gusseted bases.

UNIT – VII

Masonry

Walls, columns and footings.

The application of all of the above designing methods should be studied by designing a small module of area not less than 100 sq.m (e.g. 6x10, 12x7 etc.).

Reference Books:

1. Design of Steel Structures by ABU- SABA
2. Design of Steel Structures by Edwin H. Gaylord, Charles N. Gaylord and James E. Stallmeyer
3. Duggal, S.K., “Design of Steel Structures”, 2nd Ed., Tata McGraw Hill
4. Dayaratnam, P., “Brick and Reinforced Brick Structures”, Oxford & IBH Publishing Co.
5. Arya, A.S., “Masonry and Timber Structures Including Earthquake Resistant Design”, Nem Chand Bros.
6. Arya, A.S. and Ajmani, J.L., “Design of Steel Structures”, Nem Chand Bros.
7. Chandra, R., “Design of Steel Structures”, Standard Book House.

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Building Economics	Course Code: AA8020		
Credit: 1.5	L 1	T 1	P 0
Year: 4th	Semester: VIII		

UNIT I

Elementary Concepts of Economics: Utility, Demand and Supply, Wants, Cost, Value, Price, Micro & macro Economics

UNIT II

Meaning & Scope of Building Economics : Issues Importance of Building Economics

UNIT III

Project Costing : Initial Costing, Elements of Cost Components, Furniture Costing, Different Types of Costs and their impact on Building Projects, Non Monetary cost.

UNIT IV

Benefits of Buildings : Monetary and Non Monetary benefits of buildings

UNIT V

Economic Performance of Building : Types of Economic Performance, Accounting for Risks & Uncertainty , Techniques of Performance , Analysis , Cost Benefit Analysis, Rate of Return Analysis etc

UNIT VI

Feasibility Analysis : Concept and Types of Feasibility, Feasibility Analysis

Reference Books:

1. Thorbjoern Mann, Building Economics for Architects

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Journalism	Course Code: AA8030		
Credit: 1.5	L 1	T 1	P 0
Year: 4th	Semester: VIII		

UNIT-I

INTRODUCTION : Basic understanding of the subject and related theories

UNIT-II

JOURNALISM : Analysis of recent historical and contemporary examples of written and journalistic criticism of architecture, including selected writings by Indian and overseas critics; discursive techniques, analysis of major critical themes, thematic categories in architectural writing over the past three centuries.

UNIT-III

ANALYSIS OF WORKS : Works of Indian and international writers and critics will be presented and discussed. Seminars on Indian architectural writers, journalists and critics

Reference Books:

1. Architecture and the Journalism of Ideas by Bender Thomas.
2. Architectural Criticism and Journalism : Global Perspectives by Mohammad Al Asad and Majd Musa

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Town Planning	Course Code: AA8S30		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

UNIT-I

Introduction:

Definitions of **town planning**, levels of planning and steps for preparation of a town plan, survey techniques in planning, concepts, functions, components and preparation of a development plan. Planning concepts related to garden city, geddesian triad, neighbourhood planning, radburn layout, satellite towns and ribbon development.

UNIT-II

Ancient Planning Systems:

Indus valley civilization - Mohenjodaro, Harappa, Extracts from Chanakya's Arthashastra, Manasara's Vastushastra, planning thought behind Fatehpur Sikhri, Shahjahanabad, Jaipur and Delhi

UNIT-III

Town Planning Terminology:

Land use, Concept of F.A.R. and Density, Zoning and Subdivision Regulations, Master Plan

UNIT-IV

The Planning Process:

Town planning surveys, Preparation of MASTER PLAN for old and new towns

UNIT-V

Transport Planning:

Traffic and urban environment. Traffic design Elements. Traffic control devices, road intersections

UNIT – VI

Development Laws:

Need of urban development laws, study of evolution of urban development laws in India, development authority, land acquisition act, land acquisition process, land ceiling act etc.

Reference Books:

1. Arthur B. Gallion and Simon Eisner, *The Urban Pattern – City planning and Design*
2. Rame Gowda, *Urban and Regional planning*
3. John Ratcliffe, *An Introduction to Town and Country Planning*

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Sustainable Buildings	Course Code: AA8210		
Credit: 2	L 1	T 0	P 2
Year: 4th	Semester: VIII		

UNIT – 1

Introduction

- Definition & concept of sustainability
- Need of sustainable buildings
- Features of sustainable buildings

UNIT – 2

SOLAR ENERGY & BUILDING

Solar geometry and built form – Various techniques of shading to reduce heat gain in tropical climate – Various methods of Maximising exposure to solar radiation in cold & temperate climate. Heating & cooling loads – Energy estimates - Energy conservation – Efficient day lighting – Solar Water heating system. Exercises on heating and cooling load calculations in buildings

UNIT – 3

PASSIVE COOLING CONCEPTS

General principles – Evaporative cooling, Nocturnal radiation cooling, Passive Desiccant cooling, induced ventilation, earth sheltering, Berming, Wind Towers, earth – Air tunnels, Curved Roofs & Air Vents, Insulation, Vary Thermal wall etc. Case studies on buildings designed with passive cooling techniques.

UNIT – 4

OVERALL DESIGN CONCEPTS

Land form & orientation – Vegetation & Pattern – Water Bodies – Open Space & Built form - **Plan form & Elements** – Roof form – Fenestration pattern & Configuration – Building envelope & finishes

UNIT – 5

INTELLIGENT BUILDING

- Definition & Concept Of Intelligent Building
- Services in Intelligent buildings- lighting, hvac, plumbing, security, access control, CCTV & alarm systems, audio- visual & entertainment system etc.

Reference Books:

1. MiliMajunder, Teri – *Energy – Efficient Bldg in India* – Thomson Press , New Delhi
2. J.K Nayak & Others , *Energy Systems Energy Group*, - Isa Annal Of Passive Solar Architecture
3. George Basid & Others – *Energy Performance of Bldg*– CRC Press, Florida
4. New Direction in Sustainable Design by PARR
5. [Sustainable Construction: Green Building Design and Delivery](#); by Kibert, Charles J.
6. [Sustainable Building Systems & Construction for Designers](#); by [Lisa M. Tucker](#)

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Environmental Studies	Course Code: AA8040		
Credit: 1.5	L 1	T 1	P 0
Year: 4th	Semester: VIII		

UNIT I

Introduction

Definition, Scope and importance, Need for awareness

UNIT II

Natural Resources

Renewable and Non Renewable Resources

UNIT III

Eco System

Concept, Structure & Function of an Eco System, Flow of Energy, Food Chains, Types of Eco Systems

UNIT IV

Environmental Pollution

Definition, Causes, Effects, Types of Pollution, Control Measures to check different pollution

UNIT V

Social Issues & Environment

Unsustainable to sustainable development, Urban problems related to energy, Wasteland Reclamation, Environmental Protection Act

UNIT VI

Environmental Impact Assessment

Introduction, Need and importance of EIA study, Process

Reference Books:

1. Agarwal, K.C. 2001 Environmental Biology, Nidi Publ. Ltd. Bikaner
2. Down to Earth, Centre for Science and Environment
3. Cunningham, W.P. Cooper, T.H. Gorhani, E & Hepworth, M.T.2001, Environmental Encyclopedia, Jaico Publ. House, Mumbai, 1196p

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Design – IX	Course Code: AA9S10		
Credit: 9	L 9	T 0	P 0
Year: 5th	Semester: IX		

Designing for sustainability – Sustainable architecture and planning has become vital factor in the design of all buildings because the building activity is considered as one of the major pollutants of the natural environment. Study of the various techniques of Energy-efficient design and recycling technologies for water & wastes is mandatory as these have to be incorporated in the design proposals. Awareness about LEEDS rating and best practices is expected.

UNIT I

Institutional buildings – These are buildings with complex spatial organizations, multifunctional spaces, large spans and variable circulation patterns. Environmental issues are emphasized and the Design studio aims to inculcate the techniques of designing for sustainability. Students are expected to do the landscape layout in detail to develop appreciation of a holistic environmental design. Ex. College / single specialty Hospital / theatre etc.

UNIT II

Urban intervention Projects:

- Design of buildings/ building complexes in specific urban context such as heritage zones, near existing and within built environments.
- Redevelopment, rehabilitation and urban improvement projects.
- Development Projects such as Universities, District Centers and City Centers etc.

Reference Books:

1. Ching, F.D.K., “A Visual Dictionary of Architecture”, John Wiley & Sons
2. Norberg-Schulz, C., “Principles of Modern Architecture”, Andreas Papadakis
3. University Planning and Architecture: The Search for Perfection by Coulson, Jonathan, Roberts, Paul and Taylor, Isabelle

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Advanced Construction	Course Code: AA9S20		
Credit: 4	L 4	T 0	P 0
Year: 5th	Semester: IX		

MATERIALS

UNIT – 1

CONSTRUCTION EQUIPMENTS

Electric hand tools, Vibrators, Power Floats, Pumps, Rollers. Earth Moving & Excavation: Dozers, Scrapers, Graders, Shovels, Skimmers, Backactor, Dragline, Trenchers. Transportation : Lorries, Trucks, Dumpers, Elevators, Conveyors, Hoist, Cranes (mobile, static, tower). Concrete Mixers, Pumps etc.

UNIT – 2

DEFECTS AND REMEDIES

The study of various defects in buildings and their remedies, Defects caused by dampness, applied forces and changes in size

UNIT – 3

Fire Protection

Causes and spread of fire, Fire detection equipments, Fire extinguishers and other fire fighting equipments, Methods of firefighting. Combustibility of materials and fire resistance. Means of escape, fire doors, water curtains etc. Code of Safety prescribed in National Building Code

UNIT – 4

Special Details

- Construction details associated with the services of the buildings (e.g. drainage, water supply, septic tank, fire fighting etc.)
- Construction details associated with the context of site and application (e.g.drainage system in mountains, industrial construction, geographical challenges like floods and drought etc.)

The examples mentioned are not mandatory but explanatory.

Reference Books:

1. Goyal, M.M., “Handbook of Building Construction”, Thomson Press (I) Ltd
2. Deplazes, A. (Editor), “Constructing Architecture: Materials, Processes, Structures: A Handbook”, Birkhäuser
3. Ching, F.D.K., “Building Construction Illustrated”, Wiley

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Professional Practice – I	Course Code: AA9010		
Credit: 2.5	L 2	T 1	P 0
Year: 5th	Semester: IX		

UNIT – 1

Role of Professional Bodies: The Indian Institute of Architects, its working constitution and byelaws, categories of memberships, election procedures; The Uttar Pradesh Architects Association

UNIT – 2

Architects' Act 1972: Detail study of the act, Council of Architecture; Procedures of membership

UNIT – 3

Scale of Charges: Conditions of engagement of an architect – Duties; Responsibilities and liabilities of a professional architect; Scale of charges, mode of payment etc.

UNIT – 4

Code of Professional Conduct: Clauses governing conduct of professional architect.

UNIT – 5

Architectural Competition: Types of competitions; need and procedure for conducting competitions.

UNIT – 6

Tender and Contract

Type of building contracts, their demands, Preparation of tender documents, method of inviting tenders, opening of tenders, preparation of comparative statement, recommendation and award of projects, preparation of contract documents, general conditions of contract, interim certified, defect liability period, retention amount and virtual completion

Reference Books:

1. R H. Namavati, Professional practice
2. Hand book on Professional Practice by I. I. A,

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Research Skills and Project Introduction	Course Code: AA9020		
Credit: 2.5	L 2	T 1	P 0
Year: 5th	Semester: IX		

UNIT – 1

Analysis: Content analysis, secondary data analysis. Understanding the relative advantages & disadvantages and application of various methods mentioned above & choosing a method appropriate for a research to achieve its objective.

UNIT – 2

Data Documentation & Analysis: Understanding the nature of data collected and methods of analysis suited for that data (graphical/ numerical/ descriptive). Converting data into numerical form

UNIT – 3

Introduction To The Statistics: Introduction to the simple statistical methods of analyzing numerical data- frequencies/ percentages/ mean/median/mode. Inferring from the data & interpreting the meaning of those inferences

UNIT – 4

Presentation & Reporting: Presentation of the data: Techniques of presenting the numerical data-graphical (pie charts, Bar charts, line graphs etc.) – tabulations, verbal qualitative data, architectural drawings/maps.

UNIT – 5

Reporting the Research: Different sections of a research report, technical writing & language (tense, voice etc.), Formatting of a report

Reference Books:

1. Research Methodology : Methods and techniques by C.R.Kothari.
2. Architectural Research Methods by Linda Groat, David Wang.

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Construction and Resource Management	Course Code: AA9030		
Credit: 2.5	L 2	T 1	P 0
Year: 5th	Semester: IX		

UNIT I

- Need for construction management, its aims and objectives and available management tools.
- Role of architect in construction management

UNIT II

- Management techniques and tools for one off projects
- Management techniques and tools for repetitive projects.
- Site clearance, safety precaution, noise and pollution control.

UNIT III

- Challenges of managing people in construction; organization and management theory; HRM theory;
- strategic HRM approaches;

UNIT IV

Operational HRM approaches; employee relations; employee empowerment; diversity and work/life balance; employee welfare; strategic human resource development; employment legislation

Reference Books:

1. Construction Planning and Management; by P.S.Gehlot.
2. Project : Appraisal, Analysis. Financing, Implementation and review; by Prassana, Chandra.
3. Construction Project Management: A Complete Introduction; by Alison Dykstra
4. Project Management For Dummies; by Portny, Stanley E.
5. Construction Management; by Daniel W. Halpin
6. Resource Management for Construction: An Integrated Approach (Building & Surveying Series); by M.R. Canter

Course Structure & Syllabus of BARCH Applicable for 2013-2018 Batch

Course Title: Seminars	Course Code: AA9210		
Credit: 3.5	L 1	T 0	P 5
Year: 5th	Semester: IX		

There will be seminars on some contemporary and other important topics as decided by the teacher. All the discussion will be in studio classes. After the completion of study students will prepare a report which the internal and external viva will be organized. Some of the topics for seminars may be as following-

- Services in a Hotel
- Study of housing
- Sustainable Design
- Contemporary Construction Technology

Topics mentioned above are only suggestive not mandatory.

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Visual Arts and Communication (<i>Elective</i>)	Course Code: AA9610		
Credit: 1	L	T	P
	0	0	2
Year: 5th	Semester: IX		

UNIT – 1

Theory of Visual Communication

- Introduction & meaning of visual communication
- Visual communication theories
- Psychology of visual language
- Elements of visual design

UNIT – 2

Virtual Environment

- Introduction
- Architectural implications

UNIT – 3

Application

- Discussion & analysis of various types of communications
- Media including visual identities
- Study & application of drawing & other communication skills for architects
- Digital arts & presentations

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Waste Management (<i>Elective</i>)	Course Code: AA9620		
Credit: 1	L 0	T 0	P 2
Year: 5th	Semester: IX		

UNIT I

Introduction to environment, ecosystem, food chain, energy flow etc

UNIT II

Municipal Solid Waste

Definition, source and types of solid waste, composition, determinants of solid waste, methods of sampling and characterization

UNIT III

Collection and Transfer

Collection of waste, collection services, collection system, equipments, time and frequency of collection, factors affecting collection, collection routes, preparation of master schedule

Transfer and transport operation need, transfer stations, types, transport means and methods, location of transport stations, selection of location, operation and maintenance

UNIT IV

Processing Techniques and Recovery of Energy

UNIT V

Disposal of Solid Waste

Refuse Disposal, various methods, incinerations, features of incinerator, site selection and plant layout of incinerator, sanitary landfill method, advantages and disadvantages of sanitary landfill

Reference Books:

1. George Tchobanoglous et al "Integrated Solid Waste Management" McGraw- Hill, 1993
2. Tchobanoglous Thiesen Ellasen; Solid Waste Engineering Principles and Mngement, McGraw-Hill 1997
3. Blide A.D. &Sundaresan, B.B, "Solid Waste Management in Developing Countries" INSDOC, 1993

Course Title: Value Added Programme	Course Code: AA9310		
Credit: 2	L 0	T 0	P 4
Year: 5th	Semester: IX		

There will be a workshop on 3DS MAX

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Architectural Thesis	Course Code: AA0S10		
Credit: 21	L 21	T 0	P 0
Year: 5th	Semester: X		

Each student is required to conduct an intensive study and present a design thesis on any of the design topics. The students should submit synopsis for at least three different, design or research oriented topics, to the respective Institution, of which one will be approved to carry on the research and design. Each student shall be attached with a faculty member who will guide his work. The arrangement for the assessment of the progress through the semester for all the students and a 'Programme schedule' will be declared separately for each session by the respective Institution.

The work of student should result into a 'Design Proposal' based on the complete and detailed study of site including its selection, topography, climate, spatial requirements of the project, special functional and physical needs of the project, and standard data, construction and services and all other factors that the involved with a particular thesis topic.

At least two of the following items, for complete design or an approved part thereof, should be covered in full detail and included in the design and presentation, along with the final design proposal-

- Structural calculations and design.
- Detailed estimate and specification.
- Working drawing and construction details.
- Proposal for Mechanical services to cover 'Air-conditioning & Mechanical conveying system,
- Proposal for Electrical Services & Illumination.
- Proposal for Water supply and waster disposal services.
- Proposal for Acoustical design & specification.
- Proposal for Interior design-including furniture, fitting and finishes.
- Landscape design proposals in detail.

The design proposal should be prepared and presented with the help of charts, drawings, perspective views, models and other audio-visual aids. A thesis report must also be prepared and submitted in one soft copy (on CD) and three hard copies (one to be returned to the student) type written and bound together with prints and photographs of all the drawing & models. The thesis report should explain the objectives, scope, case studies, literate study-research & data, design concept/ approach, design proposals, construction programming & financing etc. The original drawings, models and one copy of thesis report will be returned the students in due course of time as decided by the respective Institution.

Thesis Jury:

The final assessment of the thesis will be made through a panel of external jury consisting of two External Experts, Guide, Thesis Coordinator & HOD/ Principal/ Director as chairperson.

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Professional Practice-II	Course Code: AA0010		
Credit: 2.5	L	T	P
	2	1	0
Year: 5th	Semester: X		

UNIT – 1

Valuation: Valuation of immovable properties, elements of valuation and factors affecting valuation; Techniques of valuation of landed and building property; Value classification and types of valuation.

UNIT – 2

Easement: Introduction to various easements processes, and precautions to protect easement rights.

UNIT – 3

Arbitration: Arbitration, Arbitrator, Umpire, Nature of arbitration, Appointment, Conduct, Powers and duties of arbitrators and umpires; Procedure of arbitration and preparation of awards

UNIT – 4

Office organization & Administration: Professional organization, setting of practice, salaried appointments, public sector, private sector jobs, procedure of operation in government organization.

Reference Books:

1. R H..Namavati, Professional practice
2. Hand book on Professional Practice by I. I. A,

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Disaster Management (<i>Elective – A</i>)	Course Code: AA0610		
Credit: 2	L	T	P
	1	0	2
Year: 5th	Semester: X		

UNIT I

- Introduction to disaster & types of disaster
- Disaster profile in India

UNIT II

- Causes & effects of natural hazards on buildings
- Buildings in earthquake & flood zone areas- conventional construction techniques

UNIT III

- Earthquake resistant construction- advanced techniques

UNIT IV

- Responsibilities of an architect in disaster mitigation
- Role of disaster management team
- Agencies involved in disaster management in India

Reference Books:

1. F.C.Cony et.al – *Issue and problems in the prevention of disaster and housing* – A review of experiences from recent disasters – Appropriate reconstruction and training information centre, 1978.
2. S.Ramani, *Disaster management – Advanced course on modern trends in housing* – SERC, Vol 2, Chennai, 1980

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Urban Design (<i>Elective – A</i>)	Course Code: AA0620		
Credit: 2	L	T	P
	1	0	2
Year: 5th	Semester: X		

UNIT I

Introduction :Role of Architects, Urban Designers & Planners

UNIT II

Understanding the Evolution, basic concepts & Theories of UD - Place & Space, Positive & Normative theory, Idea of growing whole, Overriding rule, 7 detailed rules of growth etc. Patterns & Ingredients of the city

UNIT III

Reading Cities- Morphological Dimension, Perceptual Dimension, Social Dimensions, Visual Dimensions, Functional Dimensions, and Temporal Dimensions

Reference Books:

1. *Image of the city* - Kevin Lynch
2. *Architecture of town and cities* - Paul D. Speriregon, The MIT press
3. *Architecture and the urban experience* - Raymond J Curran. Van Nostrand Reinhold Company
4. *Urban design – Ornament and decoration* , Cliff Moughtin, Bath Press
5. *The urban pattern* - Arthur B Gallion, CBS publishers

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Earthquake Resistance Structures (<i>Elective – A</i>)	Course Code: AA0630		
Credit: 2	L	T	P
	1	0	2
Year: 5th	Semester: X		

UNIT I

An Introduction to Building Safety from Natural Hazards- Earthquake, Fire Safety in Buildings, Cyclone Effects, Landslide, Flood etc

UNIT II

Elementary Seismology- Earthquake occurrence in the world, plate tectonics, faults, earthquake hazard maps of India, Causes of Earthquake, Seismic Waves, epicenter, seismology instruments

UNIT III

Site Planning, Building Norms, Architectural Design Concepts for Earthquake Resistance

UNIT III

Performance of Ground & Buildings in Past Earthquakes- Behaviour of various types of buildings, behaviours of non structural elements like services, fixtures, mountings, Case studies of Earthquake resistant buildings

Reference Books:

1. Improving Earthquake & Cyclone Resistance of Structures; by Shekhar Chandra Dutta & Parth Sarthi Mukhopadhyay

Course Structure & Syllabus of BARCH Applicable for 2013-2018 Batch

Course Title: Alternate Construction Technology (<i>Elective – B</i>)	Course Code: AA0640		
Credit: 2	L 1	T 0	P 2
Year: 5th	Semester: X		

- Cost Efficient Technology.
- Sustainable Vernacular Technology
- Organic Material Construction Technology (Bamboo, Grass, Wood.etc)
- Regional Innovations in Construction Technology (World Specific Regions)

Reference Books:

- Vernacular Architecture : An Illustrated handbook by R.W.Brunskill.
- Gautam Bhatia, Lauri Baker, life work, writings, New Delhi, India, Penguin Books, ISBN 0-14-015460-4

Course Structure & Syllabus of BARCH

Applicable for 2013-2018 Batch

Course Title: Advanced Building Services (<i>Elective – B</i>)	Course Code: AA0650		
Credit: 2	L	T	P
	1	0	2
Year: 5th	Semester: X		

Integration of various building services in architectural design of multi storey building. The services may include- HVAC, sanitary services, garbage disposal, lighting design, vertical transport system, electrical installation etc.

UNIT I

Water Supply and Plumbing Services in High Rise Buildings

UNIT II

Sanitation & Waste Disposal System in High Rise Buildings

UNIT III

Mechanical and Communication System in High Rise Buildings (elevator, escalators etc)

UNIT IV

Case Study

Reference Books:

- Sanitation, Drainage and Water Supply by Mitchell
- Heating Hot Water Supply by Hall

Course Structure & Syllabus of BARCH Applicable for 2013-2018 Batch

Course Title: Advanced Structures (<i>Elective – B</i>)	Course Code: AA0660		
Credit: 2	L 1	T 0	P 2
Year: 5th	Semester: X		

Exploration of issues related to structural design from supporting to roofing systems through the design of ongoing studio project to provide practical insight and interaction between architectural design and appropriate structures

Total Credits			202

Course Structure & Syllabus of B.Pharm. Applicable for 2013-2017 Batch

Course Title: Pharmaceutics – I	Course Code: PHT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT-I

History of Pharmacy: Origin & developments of pharmacy, scope of pharmacy and roles and responsibilities. A review of development of Pharmaceutical Education and drugs, Pharmaceutical Industry in India, Pioneers who have contributed to the development of Pharmacy in India and Pharmaceutical legislations and ethics- a brief review. Introduction to pharmacopoeias I.P., B.P., U.S.P. & International Pharmacopoeia.

UNIT-II

Dispensing Pharmacy:

- (i) Prescriptions –Reading and understanding of prescription; Latin terms commonly used, Modern methods of prescribing.
- (ii) Incompatibilities in Prescriptions –Study of various types of incompatibilities –physical, chemical and therapeutic.
- (iii) Posology—Dose and Dosage of drugs, Factors influencing dose, calculation of doses for infants, adults and elderly patients; Enlarging and reducing recipes percentage solution, allegation, alcohol dilution, proof spirit, suppository bases calculation.

UNIT-III

Pharmaceutical Additives: Coloring, flavouring and sweetening agents, co-solvents, preservatives, surfactant, antioxidants.

UNIT-IV

Basic concept of dosage form and novel drug delivery system its classification, Introduction of different dosage form, its preparation and examples (solutions, aromatic waters, mixtures, spirits, syrups, elixirs, powders, lotions, liniments, pastes, mucilage, glycerin, paints, mouth washes, and inhalations)

UNIT-V

TABLETS-Definition, types of tablets, advantages and disadvantages of tablets, tablets excipients, technique of granulation, single punching tablet machines, and introduction of tablet coating.

Recommended Books:

1. The science and Practice of Pharmacy by Remingtons
2. Introduction to Pharmaceutical Dosage Forms by H. C. Ansel
3. Cooper and Gunn's Dispensing for Pharmaceutical Students by S.J.Carter
4. Textbook of Professional Pharmacy by N.K. Jain and S.N. Sharma
5. Indian Pharmacopoeia, British Pharmacopoeia, United State Pharmacopoeia (Current Editions)
6. Pharmaceutical Dosage forms: Tablets, 3rd edition (Larry L. Augsburger, Stephess. V. Hoag)
7. Pharmaceutical Dosage forms: tablets (3rd volume) Herbert A.Sieberman, Leon Achman, Joseph B. Schwartx

All practicals relevant to theory

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmaceutical Analysis – I	Course Code: PHT102		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT-I

Concepts of Analysis Significance of Pharmaceutical analysis, Molarity, Molality, normality, equivalent weight, precision and accuracy, Fundamentals of volumetric analysis, primary and secondary standards, Errors, Indicators, Theory of indicators, ideal requirements of indicators

UNIT-II

Acid Base Titration: Acid-base concepts, role of solvent, Law of mass action, **common-ion** effect, ionic product of water, pH, hydrolysis of salts, neutralization curves, acid-base indicators

UNIT-III

Oxidation Reduction Titrations Oxidation and reduction, redox reactions, Theory of redox titrations, redox indicators, oxidation reduction curves, iodimetry and iodometry, titrations involving potassium iodate & potassium dichromate, Iodine, Potassium permanganate and copper sulphate

UNIT-IV

A) Precipitation Titrations Precipitation reactions, solubility products; Argentometric titrations Mohr's method, Volhard's method and Fajan's methods.

B) Gravimetry: Precipitation techniques, Digestion, washing of the precipitate, filtration, crucibles, Ignition, Estimation barium sulphate & aluminium oxide.

UNIT-V

Complexometric Titrations-Introduction, metal ion indicators, preparation & standardization of EDTA, Estimation of Calcium carbonate, calcium gluconate & magnesium sulphate using standard EDTA

Pharmaceutical Analysis-1 Lab (PHP-152)

1. Study the analytical balance and calibrate the weights provided in the weight box
2. Calibration of glass apparatus like beaker, volumetric flask, pipette, etc.
3. Preparation and standardize 0.1 N HCl and 0.1 N NaOH .
4. Analysis of mixture of Sodium bicarbonate and Sodium carbonate.
5. Preparation and standardisation of 0.1N potassium permanganate, 0.1N $\text{Na}_2\text{S}_2\text{O}_3$, 0.1N Silver nitrate, 0.5 MEDTA, and 0.05 N iodine solution.
6. Assay of Boric acid, hydrogen peroxide, potassium permanganate, Iodine and copper sulphate as per IP.
7. Assay of CaCO_3 , MgSO_4 and Calcium gluconate as per IP

Recommended Books:

1. Beckett. AH. and Stanlake, J.B. **Practical Pharmaceutical Chemistry**, Athilone Press, London.
2. Barner, J.D., Thomas, M.J.K., Mendham J. and Denney, R.C., Vogel's **Textbook of Quantitative Inorganic Analysis including Elementary Instrumental Analysis**. The ELBS and Longman London.
3. Gary, D.C. **Analytical Chemistry**. John Wiley and Sons, New York.
4. Alexeyev, V., **Quantitative Analysis** . Mir Publishers, Moscow

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmaceutical Chemistry-I (Inorganic Chemistry)	Course Code: PHT103		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT -I

Sources of impurities & their control, limit test general principles and procedures of limit test for Iron, Arsenic, Lead, Heavy metals, Chloride & Sulphate. Water (Purified water, Portable water, water for injection and, sterile water for injection, Water validation and testing)

UNIT -II

Monograph – Systemic studies of Monographs, IP, BP, USP, EU, and General notices Types of monographs

UNIT- III

Definition, classification, general methods of preparation, physical and chemical properties, Test for purity, Assay procedure medicinal uses for the following classes of compounds (individual mentioned drugs only).

UNIT -IV

Gastrointestinal Agents:

(a) Antacids-Classification, combined antacid preparation, uses (Aluminum hydroxide, Milk of magnesia)

(b) Protective and adsorbents (Aluminium sulphate)

(c) Cathartics -Definition, classification, Saline cathartics -Disodium hydrogen phosphate)

Topical agents – (a) Antimicrobial agents-Sulphur (b) Astringents-Alum, zinc sulphate

UNIT -V

(a) Electrolytes: Physiological ions, Acid-base balance & combination therapy. ORS therapy, Electrolytes used in replacement therapy

(b) OTC drugs: Stannous Fluoride, sodium bicarbonate, sodium chloride ophthalmic, simethicone, Methylcellulose

(c) Dental products: Anticaries agents, dentrifices, and desensitising agents

Pharmaceutical Chemistry-I (Inorganic Chemistry) Lab [PHP153]

List of Experiments

1. Perform the limit test for chloride in the given sample (for e.g. Ammonium Carbonate, calcium gluconate etc.)
2. Perform the limit test for sulphate in the given sample (for e.g. Ammonium Chloride, etc)
3. Perform the limit test for iron in the given sample (for e.g. calcium carbonate)
4. Perform the limit test for heavy metal in the given sample (for e.g. Calcium carbonate)
5. Perform the limit test for arsenic in the given sample (for e.g. Barium Sulphate)
6. Preparation of Boric acid from borax and perform the limit test and identification test.
7. Preparation of potash alum by using potassium sulphate and aluminium sulphate and perform the limit test and identification test.
8. Prepare calcium Carbonate by using calcium chloride and sodium carbonate and perform the limit test and identification test.
9. Prepare heavy magnesium carbonate by using sodium carbonate and magnesium sulphate and Perform the limit test and identification test.
10. Prepare zinc sulphate by using zinc and sulphuric acid and perform the limit test and Identification test.
11. Preparation of some inorganic therapeutic compounds and it's identification and assay as per IP

Recommended Books:

1. Block, J.H. Roche, E, Soine, T and Wilson, C., Inorganic, Medicinal & Pharma. Chemistry, Lea & Febiger.
2. Discher, C.A., et.al Modern Inorganic Pharmaceutical Chemistry, Waveland press.
3. IP, BP, USP, EU (Current edition)
4. Atherden L.M., Bentley and Drivers' Text Book of Pharmaceutical Chemistry, Oxford University Press, London
5. Remington Pharmaceutical Sciences, Mack Publishing Co., Pennsylvania

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmacology-I (Anatomy, Physiology & Basic Pharmacology)	Course Code: PHT104
Credit: 3	L T P 3 0 0
Year: 1 st	Semester: I

UNIT – I

General Pharmacology: Routes of administration, Pharmacokinetics: Absorption, distribution, metabolism (synthetic & nonsynthetic reaction) & Excretion, Bioavailability, Plasma protein binding

UNIT – II

Cell & Tissues; Cell and its components and their functions. Detailed structure of cell membrane & physiology of transport process.

Tissues of the human body: Types: epithelial, connective, muscular and nervous tissues.

UNIT – III

Skeleton & Joints: Structure, composition and functions of skeleton. Classification of joints, types of movements at joints.

Muscle: Anatomy & physiology of skeletal & smooth muscle, Physiology of muscle contraction, Action Potential.

UNIT – IV

Blood: Composition and functions of blood and its elements, erythropoiesis, blood groups and their significance. Mechanism of coagulation

Lymphatic System: Composition and function of lymph, functions of lymph node, spleen.

Urinary system: Structure and function of kidney and nephron, physiology of urine formation, micturition reflex

UNIT – V

Heart: Anatomy and function of heart, heart sound, Heart rate, cardiac output, maintenance of blood pressure, Cardiac cycle, Action Potential, ECG

Pharmacology -I (Anatomy-Physiology & Basic Pharmacology) Lab PHP 154

List of Experiments

1. Study of Human Skeleton.
2. Study of different systems of Human body by the charts & models.
3. Microscope study of different tissues.
4. Estimation of Hemoglobin, and determination of clotting time & Bleeding time, RBC, WBC (Total), DLC & ESR.
5. Recording of body temperature, pulse rate and blood pressure, Electrocardiogram- PQRST waves and their significance.
6. Determination of vital capacity & lung capacity.

Reference Book:

1. Tortora GJ, & Anagnodokos NP, **Principles of Anatomy & Physiology**, Harper & Rave Publishers, New Delhi.
2. Ross & Wilson, **Anatomy & Physiology in Health & Illness**, Churchill Livingstone.
3. Chatterjee C.C. **Human Physiology**, Medical Allied Agency, Calcutta.
4. Guyton AC, Hall JE., **Text book of Medical Physiology**, WB Saunders Company.
5. Keele, C.A., Niel, E and Joels N, Samson Wright's **Applied Physiology**, Oxford University Press

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Applied Mathematics	Course Code: MAT121		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT-I

Algebra: Equations reducible to quadratics, simultaneous equations (linear and quadratic), Determinants, properties of solution of simultaneous equations by Cramer's rule.

UNIT-II

Matrices, definition of special kinds of matrices, arithmetic operations on matrices, inverse of a matrix, solution of simultaneous equations by matrices, pharmaceutical applications of determinants and matrices. Mensuration and its pharmaceutical applications

UNIT-III

Condensation of the data collected; various forms of distribution tables.

Historical representation of frequency distribution in histograms and frequency polygons. Measures of central tendency.

Measures of dispersion-range, mean deviation and standard deviation, coefficient of variation.

UNIT-IV

Graphical representation of data, use of log log graph, semi log graph etc.

UNIT-V

Trigonometry: Measurement of angle, T-ratio, addition, subtraction and transformation formulae, T-ratio of multiple, submultiples, allied and certain angles, application of logarithms in pharmaceutical computations.

Recommended Books:

1. A textbook of Mathematics for XI-XII Students, NCERT Publication Vol. I-IV..
2. Loney, S.L, The elements of coordinate geometry AITBS Publishers.
3. Gupta S.P., Statistical Methods Sultan Chand and Co., New Delhi
4. Narayan Shanti, Integral calculus, Sultan Chand & Co.
5. Prasad Gorakh, Text book on differential calculus, Pothishala Pvt. Ltd., Allahabad.
6. Prasad Gorakh, Text book on integral calculus, Pothishala Pvt. Ltd., Allahabad.
7. Narayan Shanti, Differential calculus, Shyamlal Charitable Trust, New Delhi.
8. Vishal Mehta, Remedial Mathematics for Pharmacy, Kamini Publication, Kanpur
9. Loney, S.L, Plane Trigonometry AITBS Publishers

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Applied Biology	Course Code: PHT122		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT-I

Plant cell: Cell organelles, cell cycle, cell division (mitosis and meiosis), Plant tissue and tissue system.

UNIT-II

Study of morphological and histological characters of crude drugs:

Ergastic cell inclusions, anatomical structures of bark, fruits, flowers, seeds and monocot and dicot stems, leaves and roots.

UNIT-III

Nomenclature and Methods of plant classification: Artificial system, Phylogenetic system, Natural system and Modern system

UNIT-IV

Plant taxonomy:

Study of medicinally important families: Apocynaceae, Solanaceae, Rutaceae, Umbeliferae, Leguminosae, Rubiaceae, Liliaceae, Gramineae, Labiateae, Cruciferae, Papaveraceae, Compositae.

UNIT-V

Factors affecting plant cultivation and their growth:

(i) Exogenous (ii) Edaphic factors (iii) Mineral supplements

(iv) Nutrients (v) Growth regulators and inhibitors

Recommended Books:

1. Dutta A.C. **Botany for Degree students** Oxford University Press, New Delhi
2. Marshall & Williams **Text Book of Zoology** CBS Publishers & Distributors, Delhi.
3. Weiz, Paul B **Laboratory Manual in Science of Biology** Mc Graw-Hill Book Company.
4. Fahn **Plant Anatomy** Aditya Books Private Limited, New Delhi.

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Physical Pharmaceutics – I (Pharmaceutics-II)	Course Code: PHT201		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT – I

Solubility And Distribution Phenomenon: solute – solvent interactions, solubility of gases in liquids, solubility of liquids in liquids, solubility of solids in liquids, factors affecting solubility. solubilization mechanism and techniques.

UNIT – II

Buffers equations and buffer capacity in general buffers in pharmaceutical systems, preparation, stability, buffered isotonic solutions measurements of tonicity, calculations and methods of adjusting isotonicity, sublimation, eutectic mixtures, liquid crystals, glassy state, solids crystalline, amorphous and polymorphism

UNIT – III

Solutions: Ideal and real solutions, distribution law, solutions of gases in liquids, Osmosis and Reverse Osmosis, partition coefficient, Debye Huckel theory, Dielectric Constant, Solute Solvent Interaction.

UNIT – IV

Chemical Kinetics: Zero, first and second order reactions, complex reactions, theories of reaction kinetics, characteristics of homogeneous and heterogeneous catalysis, acid base and enzyme catalysis.

UNIT – V

Micromeritics And Powder Rheology: Average particle size, Particle size distribution, number and weight distribution, particle number; methods for determining particle size – optical microscopy, sieving, sedimentation, particle volume measurement, shape, specific surface; methods for determining surface area-air permeability, adsorption; derived properties of powders- porosity, packing arrangement, densities, bulkiness and flow properties, pore size

All Practicals relevant to theory.

Recommended Books:

1. Physical Pharmacy by Alfred Martin.
2. Bentley's Textbook of Pharmaceutics by E.A. Rawlins.
3. Remington's Pharmaceutical Sciences.
4. Physical Pharmaceutics by E. Shotton

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmaceutical Organic Chemistry–I (Pharmachemistry-II)	Course Code: PHT202		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT-I

Atomic Structure, atomic orbital, molecular orbital, hybridization, sigma and Pi bond, covalent, electrovalent and co-ordinate bond, inductive effect, resonance, Classification and Nomenclature of organic compounds.

UNIT-II

Methods of preparation, reactions with special reference to mechanism of the following classes of compounds: chlorofluorocarbons and ozone layer. **Alkenes, and dienes**, Diels Alder reaction.

UNIT-III

Methods of preparation, reactions and pharmaceutical applications with special reference to mechanism of the following classes of compounds: Alkyl Halides & Aryl halides, SN1 and SN2 reactions & Nucleophilic aromatic substitution, Elimination reactions. Alcohols & Phenols, Fries rearrangement, Williamson's reaction.

UNIT - IV

Aromatic Compounds, aromatic nature, structure of benzene, resonance, Aromatic electrophilic substitution reactions- mechanisms of nitration, halogenation, sulphonation, Friedal-Crafts reaction.

Activating and deactivating substituents, orientation and reactivity.

Arenes. Amines (aliphatic & aromatic), Hofmanns, Beckmanns, Smith reactions. Diazotisation and Diazonium salts. Diazocoupling reactions and Pharmaceutical applications. Basicity of amines, Effect of substituents on basicity

UNIT-V

Aldehydes and ketones (aliphatic & aromatic), Nucleophilic additions in aldehydes and ketones, mechanisms with examples, aldol condensation reaction, crossed aldol condensation reaction, benzoin's, perkins, knoevenagels and reformatsky reaction, Wolf-Kishner reduction, Clemensen reduction

Carboxylic acids & their derivatives, di & tricarboxylic acids, hydroxy acids. Organometallic Compounds- Grignard reagent, organo-lithium compounds, their preparation & synthetic and pharmaceutical applications

List of Experiments (PHP252)

1. Identification of elements and functional groups in given organic compounds.
2. Purification of solvents like Toluene Chloroform, Acetone and preparation of absolute Alcohol.
3. Synthesis of compounds involving benzylation and acetylation.(any3)
4. Synthesis of Picric acid, Aniline, Acetanilide, Aspirin, Hippuric acid, p- Bromo acetanilide, Iodoform and Oxalic acid.

Recommended Books:

1. Finar, I.L., Organic Chemistry, Vol. I & II, ELBS/Longman.
2. Vogel A.I., Textbook of Practical Organic Chemistry, ELBS/Longman.
3. Morrison, R.T., and Boyd R.N., Organic Chemistry, Prentice Hall of India Pvt. Ltd, New Delhi.
4. Mann, F.G. & Saunders, B.C., Practical Organic Chemistry, ELBS/ Longman
5. Hendrikson, Organic Chemistry.
6. Godly, E.W. Naming organic compounds

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmacology – II (Anatomy, Physiology and Basic Pharmacology-II)	Course Code: PHT203						
Credit: 3	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1 st	Semester: II						

UNIT -I

Central Nervous System: Anatomy & Functions of different parts of brain and spinal cord. Nerve Histology, Cranial nerves and their functions. reflex action, electroencephalogram

UNIT -II

Autonomic Nervous System: Anatomy, Physiology and functions of the autonomic nervous system. Mechanism of neurohumoral transmission in ANS.

UNIT -III

Respiratory System: Anatomy & functions of respiratory organs, Mechanism and regulation of respiration, Oxygen and Carbon Dioxide Transport in the Blood

Gastro-intestinal tract: Structure, functions, secretion and their role in the digestion and absorption including liver, gall bladder etc.

UNIT -IV

Endocrine System: Basic anatomy and physiology of Pituitary, Thyroid, Parathyroid, Adrenal, Pancreas, their hormones and functions

UNIT -V

Pharmacodynamic: Principles of drug action, Mechanisms of drug action, Receptors, combined effect of drugs, factors modifying drug action

Recommended Books:

1. Tortora GJ, & Derrickson BH, **Principles of Anatomy & Physiology**, John Wiley & Sons, Inc. Current Edition
2. Ross & Wilson, **Anatomy & Physiology in Health & Illness**, Churchill Livingstone. Current Edition
3. Chatterjee C.C. **Human Physiology**, Medical Allied Agency, Current Edition
4. Guyton AC, Hall JE., **Text book of Medical Physiology**, WB Saunders Company. Current Edition
5. Keele, C.A., Niel, E and Joels N, Samson Wright's **Applied Physiology**, Oxford University Press. Current Edition
6. Goodman & Gilman, **The Pharmacological basis of Therapeutics**, McGraw Hill Pub Co., Current Edition
7. Turley, **Understanding pharmacology**, 3ed, ed, Pearson educations, Current Edition
8. Tripathi, K.D. **Essentials of Medical Pharmacology**, Jay Pee Publishers, New Delhi. Current Edition
9. Satoskar & Bhandarkar; **Pharmacology & Pharmacotherapeutics.**, Popular Prakashan Pvt. Ltd. Bombay. Current Edition

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmacognosy – I	Course Code: PHT204		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT-I

Introduction: Historical development, modern concept and scope of Pharmacognosy. Significance of Pharmacognosy in various systems of medicine viz; Ayurveda, Unani, Homeopathic, Siddha and Allopathic systems practiced in India

UNIT-II

Sources & classification of herbal drugs: Based on alphabetical, morphological, pharmacological, chemical, chemo taxonomical and taxonomical methods, organized and unorganized drugs. Sources of crude drugs viz; Herbs, Animals, inorganic matter, plant tissue culture and marine sources

UNIT-III

a. Methodology of cultivation (GCPM : Good cultivation practices for medicinal plants) of crude drugs in detail, collection, processing & storage of crude drugs.

b. Plant Hormones, their applications, Pest and classification of pesticides. Pest management and natural pesticides

UNIT-IV

Systematic monograph: (Ayurvedic terminology) Ayurvedic pharmacopoeia, Indian herbal Pharmacopoeia, US Herbal Pharmacopoeia, Ayurvedic formulary of India.

UNIT-V

Systematic Pharmacognostic study of the unorganized crude drugs:

Carbohydrates and derived products: Acacia, Tragacanth, Isapgol, Pectin, Guar gum, Gum, Starch, Sodium Alginate, Chitin, Agar

List of Experiments (PHP253)

1. Microscope and Microscopic preparation: Section cutting, Staining, mounting and surface preparation.
2. Microscopical identification techniques for: Basic tissues of barks, stems, root, leaf, flowers, fruits, seeds of monocots and dicots. Trichomes, stomata, calcium oxalate crystals, starch, phloem fibers.
3. Chemical identification: General chemical tests for alkaloids, glycosides, tannins, resins and proteins.

Recommended Books:

1. Kokate, C.K. Practical Pharmacognosy, Vallabh Prakashan, Delhi.
2. Wallis T.E. Analytical Microscopy, J&A Churchill Ltd, London.
3. Clarke ECG, Isolation & Identification of drugs. The Pharmaceutical Press, London.
4. Trease, G.E. & Evans, W.C. "Pharmacognosy" Bailliere Tindall East Bourne, U.K.
5. Tyler V.E. etal, Pharmacognosy, Lea & Febiger Phjadelphia.
6. Wallis T.E. Text book of Pharmacognosy" J&A Churchill Ltd. London.
7. Kokate, C.K. etal, Pharmacognosy" Nirali Prakashan, Pune.
8. Atal & Kapur, Cultivation & Utilization of Medicinal Plants, RRL, Jammu.
9. Stahl. E, Thin Layer Chromatography. A laboratory handbook, Springer Verlog, Berlin.
10. Henry TA. The Plant Alkaloids, McGraw Hill, New York.

Course Structure & Syllabus of B.Pharm. Applicable for 2013-2017 Batch

Course Title: Cambridge English	Course Code: HMT102		
Credit: 3	L 3	T 0	P 1
Year: 1st	Semester: II		

Course Title: Computer Fundamental Programming and Application	Course Code: CSP256		
Credit: 2	L 0	T 0	P 4
Year: 1st	Semester: II		

UNIT – I

Learning the Internet – What is Internet?– Scope of Internet – Surfing the Net – Creating Icon of ISP on Desktop – Connecting to the Internet – Sending, Receiving, Replying, Closing Emails using Outlook Express -Browsing the WWW – Opening an Email account – Email with Attachment – Sending, Viewing– Internet Relay Chat – Instant Messenger – Downloading from the Internet – Online shopping – Steps for Online Shopping – Wireless Internet Computer Virus – Antivirus Software –General Virus Types – Practice Safe Computing to Avoid Virus Attack – Disconnecting from the Internet – Other Internet Connection Services – List of Popular Websites – Conclusion – Demonstration of sites of pharmaceutical interest such as <http://www.fda.gov>, <http://www.phyarmpro.com>, <http://www.pharmacy.org> etc

UNIT – II

Application Software

Word processing techniques, file manipulations and formatting, printing setups, mail-merge. Table handling. Mathematical equations, graphs, picture handling and drawings.

About spreadsheet programs, workbooks/worksheets, Formatting of sheets, Formulae and functions, graphs. Import and export of files/ data.

Presentation Packages, slide designing, graphs. Import and export facilities.

UNIT – III

Computer applications in pharmaceutical (Machine Design, Pharmaceutical Manufacturing Plant Designs) and clinical studies.

Recommended Books:

1. Sinha, R.K., **Computer Fundamentals**, BPB Publications.
2. Raja Raman, V, **Computer Programming in 'C'**, PHI Publication.
3. Hunt N and Shelley J. **Computers and Common Sense**, Prentice Hall of India.
4. G.N.Rao, **Biostatistics & com**

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Physical Pharmaceutics – II (Pharmaceutics-III)	Course Code: NA3010		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: III		

UNIT -I

RHEOLOGY: Newtonian systems-Newton's Law, kinematics viscosity, effect of temperature; non- Newtonian systems- plastic ,pseudo plastic, dilatant; thixotropy- thixotropy in formulation; determination of viscosity-choice of viscometer, capillary, falling sphere, cup & bob, plate & cone viscometers, application of rheology in pharmacy

UNIT -II

SURFACE AND INTERFACIAL PHENOMENON : Liquid interface, surface and interfacial tensions, surface free energy, measurement of surface and interfacial tensions (capillary rise method, drop number method, drop weight method, Wilhelm plate method), spreading coefficient, adsorption at liquid interfaces, surface active agents, HLB classification, detergency, adsorption at solid interfaces, solid gas and solid- liquid interfaces, complex films, electrical properties of interface

UNIT-III

COLLOIDAL DISPERSIONS: Definition, types, properties of colloids-optical, kinetics, electrical; protective colloids, applications of colloids in pharmacy

UNIT -IV

SUSPENSIONS: Interfacial properties of suspended particles, settling in suspensions- theory of Sedimentation, effect of Brownian movement, sedimentation of flocculated particles, sedimentation Parameters; wetting of particles, controlled flocculation, flocculation in structured vehicles, rheological considerations, stability.

EMULSIONS: Types, theories of emulsification, physical stability, preservation, rheological properties, pharmaceutical applications of emulsions, micro and multiple emulsions.

UNIT-V

STABILITY: Decomposition of medicinal agents- Influence of light, temperature and medium, half life, shelf life; stabilization of medicinal agents, accelerated stability and stress testing, ICH guidelines.

Recommended Books:

1. Physical Pharmacy by Alfred Martin.
2. Bentley's Textbook of Pharmaceutics by E.A. Rawlins.
3. Remington's Pharmaceutical Sciences.
4. Physical Pharmaceutics by E. Shotton

Course Structure & Syllabus of B.Pharm. Applicable for 2013-2017 Batch

List of Experiments (NA3110)

1. Surface Tension:
 - (a) Determination of surface tension of given liquid
 - (b) Determination of critical micelle concentration of a surfactant by stalagmometer.
2. Determination of HLB of Glyceryl Monostearate
3. Determination of Specific Surface area of charcoal by adsorption method.
4. Viscosity:
 - (a) Determination of viscosity of given liquid
 - (b) Determination of composition of binary mixture by viscosity method.
5. Phase Rule
 - (a) Determination of Critical solution temperature of Phenol water system
 - (b) Determination of plate point of three-component system
6. Distribution co-efficient:
 - (a) Determination of partition coefficient of iodine between carbon tetrachloride and water
 - (b) Determination of partition coefficient of benzoic acid between water and benzene
7. Determination of particle size distribution of any material by
 - (a) (i) Sieve analysis (ii) Microscopy (iii) Optical Microcopy
 - (b) Determination of particle size by sedimentation method using and Andreason pipette.
8. Viscosity determination of Newtonian and Non-Newtonian liquids by one point and multipoint viscometers.
9. Determination of HLB value of surfactant by saponification method.
10. Determination of HLB value by modified Griffin acacia emulsion method.
11. Design, conduction and reporting of accelerated testing in studying chemical stabilization against hydrolytic decomposition of drugs.

Any other new experiment that can be included from time to time in support of the theoretical aspects of the course.

Recommended Books:

1. Martin: Physical Pharmacy, K.M.B. Varghese Co. Bombay.
2. A.T. Florence and D. Attwood W: Physiochemical principles of Pharmacy.
3. Shotton and Ridgeway: Physical Pharmaceutics.
4. Remingtons Pharmaceutical Sciences, Mark Publishing Co.
5. H.S. Beans, A.H. Beckett and J.E. Carless: Advances in Pharmaceutical Sciences, Vol. 1 to 4

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmaceutical Organic Chemistry – II (Pharmaceutical Chemistry – III)	Course Code: NA3020
Credit: 3	L 3 T 0 P 0
Year: 2nd	Semester: III

UNIT – 1

Methods Of Preparation With Mechanism, Properties And Mechanism Of name Reaction Associated With: -

- (I) Active Methylene Compounds (Acetoacetic Ester And Malonic Ester) & their synthetic importance.
- (II) α , β -Unsaturated Carbonyl Compounds.
- (III) Polynuclear Hydrocarbons – Napthalene, Anthracene & Phenanthrene.

UNIT – 2

Nomenclature, Chemistry, preparation, properties and examples of 6-membered heterocycles with one hetero atom (Pyridine, Pyran), 6-membered heterocycles with two hetero atoms (Pyrimidine, Piperazine) Benz fused heterocycles (Quinoline, Isoquinoline, Indole)

UNIT – 3

Stereochemistry: -Isomerism, Chirality, nomenclature, optical activity, Racemic modification, stereoisomerism, specification, Configuration, Bayer strain theory, ring strain, conformational analysis of cyclohexane and butane and its pharmaceutical applications

UNIT – 4

Heterocyclic Compounds: Nomenclature, Chemistry, preparation, properties and examples of medicinal compounds containing- 5-membered heterocycles with one hetero atom (Pyrrole, Furan and Thiophene), 5-membered heterocycles with two hetero atom (Imidazole, Thiazole, Oxazole, Pyrazole) and its pharmaceutical applications

UNIT – 5

Polymers and biopolymer-Classification, Synthesis, reactions, crystallinity, polymer degradation mechanism, copolymerization and their pharmaceutical applications in Pharmacy.

List of Experiments (NA3121)

Identification of organic compound with derivatisation. Synthesis of organic compounds involving Oxidation, Reduction, Rearrangement, Substitution, Condensation, Diazotization reactions. **polymers identification and characterization and synthesis of semi-synthetic polymer.**

Recommended Books:

1. E.L. Eliel Stereochemistry of carbon compounds, Tata McGra Hill Publishing Company New Delhi
2. Jerry March, Advance organic Chemistry 4th ed.. A Wiley-Interscience Publication,
3. I.L. Finar's Organic chemistry,
4. Mann P G & Saunders B C, Practical Organic Chemistry, ELBS/Longman, London.
5. Furniss B A, Hannaford A J, Smith P W G and Tatehell A R, Vogel's Textbook of Practical Organic Chemistry, The ELBS/ Longman, London.
6. Polymer Science, V.R.Gowarikar, N.V.Vishwanathan, Jayadev Sreedhar, New Age International, New Delhi

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmacognosy – II (Pharmacognosy & Phytochemistry)	Course Code: NA3030		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: III		

UNIT-I

Quality control of crude drugs: Adulteration types and causes, Evaluation of drugs by organoleptic, microscopic, physical, chemical and biological methods.

UNIT-II

Trade & commerce in herbal drugs: Indian and International trade in aromatic and Medicinal plants. Plants based industries and research institutes. Regulation pertaining to trade drugs.

UNIT-III

WHO guideline for standardization of crude drugs: Extractive values, ash values, chromatographic techniques (TLC, HPTLC and HPLC) for determination of chromatographic markers, spectroscopic techniques and assay methods. Determination of heavy metals in herbal preparation and alcohol contents in Aristas and bhasams.

UNIT-IV

Alkaloids: Systematic study of source, cultivation, collection, processing, commercial varieties, chemical constituents, substitute's adulterants, uses, diagnostic macroscopic & microscopic features & specific chemical tests of following alkaloid containing drugs.

(a) Pyridine- piperidine : Tobacco, Areca & Lobelia.

(b) Tropane : Belladonna, Hyoscyamus, Datura, Coca & Withania.

(c) Quinoline & Isoquinoline: Cinchona, Ipecac & Opium.

(d) Indole: Ergot, Rauwolfia, Catharanthus & Nux-vomica.

(e) Imidazole: Pilocarpus.

(f) Steroidal: Veratrum & Kurchi.

(g) Alkaloidal amine: Ephedra & Colchicum.

(h) Glycoalkaloid: Solanum.

(i) Purines: Coffee & Tea

(j) Quinazoline: Vasaka

UNIT-V

Glycosides: Study of the biological sources, cultivation, collection, Commercial varieties, chemical constituents, substitutes, adulterants, uses, diagnostic macroscopic and microscopic features and specific chemical tests of following groups of drugs containing glycoside:

(i) Saponins: Liquorice, Ginseng, Dioscorea.

(ii) Cardioactive sterols: Digitals, Squill, Stropanthus & Thevetia.

(iii) Anthraquinone glycosides: Aloe, Senna, Rhubarb & Cascara.

List of Experiments (NA3130)

1. Identification of crude drugs listed above.
2. Macroscopic and Microscopic study of some drugs mentioned in theory.
3. Chemical evaluation of powdered drugs.
4. Chromatographic studies of some main Phytochemical constituents.
5. Standardization parameters for crude herbal drugs.
6. Microscopical studies of basic tissues, bark, stem (Dicot, monocot), Root (Dicot, Monocot), seed, leaf, fruits, trichomes, stomata, calcium oxalate crystals, starch, phloem fibres.

Recommended Books:

1. T.E.Wallis: "Text Book of Pharmacognosy", 5th edition, CBS Publishers & Distributors Pvt. Ltd., 2005.
2. W.C.Evans: "Trease and Evans Pharmacognosy", 15th edition, Saunders, Elsevier, 2007.
3. C.K. Kokate, A. P. Purohit & S. B. Gokhale: "Pharmacognosy", 41st edition, Nirali Prakashan, 2008.
4. J. S. Quadry: "Shah & Qadery Pharmacognosy", 14th edition, B. S. Saha Prakashan, 2009.
5. Ashutosh Kar: "Pharmacognosy and Pharmacobiotechnology", 2nd edition, New Age International, 2007

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmacology – III (Pathophysiology & Pharmacology-I)	Course Code: NA3040		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: III		

UNIT-I

Cell pathology: Causes of Cell injury, pathogenesis, and morphology of cell injury, adaptations, cellular aging and cell death (necrosis, apoptosis).

UNIT-II

Pathology of Inflammation and wound healing: Vascular and cellular events of acute inflammation, chemical mediators of inflammation, pathogenesis of chronic inflammation, brief outline of the process of repair and wound healing.

UNIT-III

Pathology of CVS Diseases: Hypertension, Atherosclerosis, angina, myocardial infarction, congestive heart failure and cardiac arrhythmias.

UNIT-IV

Pathology of Joint Disorder: Rheumatoid arthritis, Osteoporosis, Osteoarthritis, Gout.

GIT disorder: Peptic ulcer, Ulcerative colitis, Amoebiasis, Typhoid, Hepatitis, Cirrhosis

UNIT-V

Pharmacology: Adverse drug reactions and Drug interactions (Pharmacokinetic and pharmacodynamic), Drug dependence and tolerance, Clinical Trials (Types and Phases)

Recommended Books:

1. Textbook of Pathology Harsh Mohan Anshan Pub. Current Edition
2. Robbins Basic Pathology Vinay Kumar, M.D., Abul K. Abbas, Jon C. Aster Elsevier Health Sciences, Current Edition
3. Pathophysiology: The Biologic Basis for Disease in Adults And Children, Kathryn L. McCance, Sue E. Huether Elsevier Mosby, Current Edition
4. Pathology illustrated Peter S. Macfarlane, Robin Reid, Robin Callander, Alasdair D.T. Govan Churchill Livingstone, Current Edition
5. Pathology- Alan Stevens (MRCPath.), Alan Stevens, James Steven Lowe Mosby, Current Edition
6. Goodman & Gilman, The Pharmacological basis of Therapeutics, McGraw Hill Pub Co., Current Edition
7. Turley, Understandig pharmacology, 3ed, ed, Pearson educations, Current Edition
8. Tripathi, K.D. Essentials of Medical Pharmacology, Jay Pee Publishers, New Delhi. Current Edition
9. Satoskar & Bhandarkar; Pharmacology & Pharmacotheropeutics., Popular Prakashan Pvt. Ltd. Bombay. Current Edition

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Manufacturing Operation – I (Pharmaceutics–IV)	Course Code: NA3050		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: III		

UNIT -I

Stoichiometry : Unit processes material ,concepts and role of QbD in equipment selection of and energy balances, molecular units, mole fraction, gas laws, mole volume, primary and secondary quantities, equilibrium state, rate process, steady and unsteady states, dimensionless equations, dimensionless formulae, dimensionless groups. Mechanism of Fluid flow, Significance of Reynolds Number, Distribution of Velocities across the Tube, Mass Transfer, Solid / Fluid Mass Transfer, Application in Unit Operation.

UNIT –II

Size Reduction: Objectives, Factors Affecting, Energy Requirements, Mechanisms, Methods of Size Reductions. Equipments used- Principle, material of construction, Applications, advantages and disadvantages of cutter mill, hammer mill, roller mill, ball mill, fluid energy mill.

Size Separation: Standards for Powders, Pharmacopoeal classification , Sieves, Materials used for sieves, Sieving Methods, Fluid Classification Methods, Sedimentation and Elutriation, Equipments used: Principle, material of construction , Applications advantages and disadvantages of cyclone, separator, sedimentation tank .

UNIT-III

Mixing Definition and objectives:- Type of Mixtures, Liquid Mixing, powder Mixing, Semisolids, mixing equipment: Principle, material of construction, Applications advantages and disadvantages of shaker mixer, propeller mixer, turbine mixer ,paddle mixer, planetary mixer, double cone mixer, V mixer, sigma mixer and colloid mill, ultrasonic mixer

UNIT-IV

Drying: Drying Mechanism of drying, Rate of drying & time of drying calculations, Principle , material of construction, applications advantages and disadvantages of tray , fluidized bed , Rotary Drum , Vacuum ,Spray and Freeze dryer

UNIT –V

Filtration:- Factors Affecting, Rate of Filtration, Properties of the filter medium and filter cake, Mechanism of Filtration, Filter Media and aids, Principle, material of construction Applications advantages and disadvantages of Industrial Filters, Filter Leaf, Filter Press, Rotary Filter.

Centrifugation:- principle, factor affecting , Principle, material of construction , Applications, advantages and disadvantages of perforated basket centrifuge , tubular bowl centrifuge conical disc centrifuge, ultra centrifuge.

Course Structure & Syllabus of B.Pharm. Applicable for 2013-2017 Batch

List of Experiments (NA3140)

1. Study the Effect of different filter media on rate of filtration
2. Study the Effect of viscosity of filtrate on rate of filtration
3. Study the Effect of pressure on rate of filtration
4. Study the Effect of thickness of cake on rate of filtration
5. Study the Effect of filter aids on rate of filtration.
6. Study principle of centrifugation for Liquid –Liquid separation and stability of emulsions.
7. Study principle of centrifugation for Solid – liquid separation and stability of suspension.
8. Experiments to illustrate principles of size reduction using Ball Mill. Effect of size of balls, number of balls and time on the efficiency of ball mill.
9. Experiments to illustrate mixing efficiency Solid-Solid mixing.
10. Particle size analysis by sieving and microscopy.
11. To Determine the Effect of Surface Area for Rate of Drying
12. Experiments using Reynolds no venture and orifice meter

Recommended Books:

1. Badger W.L. and Banchero J.T. Introduction to Chemical Engineering; McGraw Hill International Book Co., London.
2. Perry R.H. & Chilton C.H. Chemical Engineers Handbook, McGraw Kogakusha Ltd.
3. McCabe W.L. and Smith J.C. Unit Operation of Chemical Engineering, McGraw Hill International Book Co., London.
4. Sambhamurthy, Pharmaceutical Engineering, New Age Publishers.
5. Gavhane, K.A. Unit Operation-I, Nirali Prakashan.
6. Cooper and Gunn's Tutorial Pharmacy, CBS Publishers, New Delhi

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmaceutical Microbiology	Course Code: NA4010		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: IV		

UNIT -I

Microscopy - Structure of Bacterial Cell, Classification of Bacteria, Fungi, Virus. Electron Microscope, Stains - types of staining techniques and chemical Tests, Culture media and their classification, measurement of microbial growth, Isolation of Virus

UNIT -II

Disinfection, factors influencing disinfectants, dynamics of disinfection, Phenol Coefficient Tests, Sterilisation Methods, Validation of Sterilisation Methods and Equipments

UNIT-III

Immunology - Antigens, Different types of Antibodies, B Cell, T cell, Haptens and their properties, Hypersensitivity, Auto Immune Diseases, Immuno deficient Disorders, Applications of Antigen Antibody Reactions, Complementary System, MHC, APC, AIDS, Application of MonoClonal Antibodies

UNIT-IV

GLP in Microbiology Laboratory, Sterility Testing as per IP, Preservative Efficacy as per IP.

UNIT -V

Vaccines and Sera :- Classification, Production, Assay, Storage of important Bacterial and viral vaccines like DPT Vaccine and antitoxin, Mumps, Polio, Rubella, Influenza, Typhoid, Polysaccharide vaccines

List of Experiments (NA4110)

1. Various staining methods
2. Experiments designed to prepare various types of culture media sub-culturing of common aerobic and anaerobic bacteria, fungus and yeast
3. Various methods of isolation and identification of microbes
4. Sterilization techniques and their validation, validation of sterilization techniques
5. Evaluation of antiseptics and disinfectants
6. Testing the sterility of pharmaceutical products as per I.P. requirements
7. Microbial assay of antibiotics and vitamin
8. Experiments on Preservative efficacy
9. Microbiological testing of non-sterile products.
10. Isolation of DNA, Gel Electrophoresis of Proteins

Text books:

1. Stanier R.Y., Ingraham, J.L., Wheelis M.L. & Painter P.R. General Microbiology, Macmillan Press Ltd.
2. Tortora, Microbiology An Introduction, Pearson education
3. Glazer, "Microbial Biotechnology" Cambridge Univ. Press
4. Pelczar & Reid, Microbiology, Tata Mc Graw Hill, Delhi.
5. Ananthanarayan R & Paniker CKJ, Textbook of Microbiology, Orient Longman.
6. Gunasekaran P, Lab Manual of Microbiology, New Age Publishers.
7. Latest edition of USP, BP, IP

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmaceutical Analysis – II	Course Code: NA4020		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: IV		

Theoretical considerations and application in drug analysis and quality control by the following analytical techniques (assays included in the Current edition of Indian Pharmacopeia, British Pharmacopoeia).

UNIT –I

- A. Non-aqueous titration**
- B. Diazotisation titrations**
- C. Complexometric Titrations**

UNIT –II

Karl-Fischer titration, Oxygen flask combustion, Kjeldahl method of nitrogen estimation.

UNIT-III

Principle, Instrumentation and Applications of: Potentiometry, Conductometry, An Introduction of principle instrumentation of Polarography & Amperometry. Electrophoresis (paper, gel and capillary).

UNIT-IV

Theory, Instrumentation and Applications of: Atomic absorption spectroscopy, Flame Photometry.

UNIT-V

Pharmacopoeial Standards: Chemical methods

List of Experiments (NA4120)

- 1. Non-aqueous titrations:** Preparation and standardization of perchloric acid.
- 2.** Analysis of pharmacopoeial drugs and dosage forms (five each).
- 3.** Practical based on paper, column and thin-layer chromatography and gel electrophoresis.
- 4.** Practical involving diazotization, Karl-Fischer methods.
- 5.** Determination of Sodium, Potassium and Calcium ion by Flame Photometry

Recommended Books:

1. Beckett, A H and Stenlake, J.B, Practical Pharmaceutical Chemistry, Vol I and II, The Athlone Press of the University of London.
2. IP, BP
3. Mendham J. Denny RC Barnes, J.D. Thomas M.J.K. "Vogel's Text Book of Quantitative Chemical Analysis" Pearson Education Asia.
4. Connors KA, A text book of Pharmaceutical Analysis, Wiley Intescience, New York

Course Structure & Syllabus of B.Pharm. Applicable for 2013-2017 Batch

Course Title: Bulk Drug Production (Pharmaceutical Chemistry-IV)	Course Code: NA4030		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: IV		

UNIT – 1

Introduction to bulk drugs ,Equipments and techniques Involved in bulk drug synthesis and production

UNIT – 2

Basic concept involved in Quality by Design and it's significance in bulk drugs production

UNIT – 3

Basic instruments used for bulk drug synthesis with construction, working, SOP, and it's validation

UNIT – 4

Bulk drug production of API 'S (Any five) and their monographic analysis

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmacology – IV (Pathophysiology & Pharmacology-II)	Course Code: NA4040		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: IV		

UNIT – 1

Pathology of Immune Disorder: Hypersensitivity, AIDS, Autoimmune disease

Respiratory Problem: Asthma, Bronchitis, Emphysema, Pneumonia, Tuberculosis

UNIT – 2

Endocrine Disease: Diabetes mellitus, Diabetic ketoacidosis and Thyroid disorders.

Kidney Disorder: Acute and chronic renal failure, Renal stones

UNIT – 3

Pathology of Nervous System Disorder: Trigeminal neuralgia, Myasthenia Gravis, Epilepsy, Parkinsonism, Schizophrenia, Alzheimer's Disease

UNIT – 4

Pathology of Neoplasia: Neoplastic proliferation, neoplasm – classification, spread of carcinoma, types of carcinoma, carcinogenesis.

Blood and Circulatory Disorder: Anemia, Leukaemia, Thrombosis, Embolism

UNIT – 5

Pharmacology- Autacoids:

Histamine and antihistaminics, Serotonin (5-HT), receptors and their antagonists, Migraine and its treatment

Recommended Books:

1. Textbook of Pathology; Harsh Mohan; Anshan Pub.
2. Robbins Basic Pathology; Vinay Kumar, M.D., Abul K. Abbas, Jon C. Aster; Elsevier Health Sciences
3. Pathophysiology: The Biologic Basis for Disease in Adults And Children; Kathryn L. McCance, Sue E. Huether; Elsevier Mosby,
4. Pathology Illustrated; Peter S. Macfarlane, Robin Reid, Robin Callander, Alasdair D.T. Govan Churchill Livingstone,
5. Pathology; Alan Stevens (MRCPath.), Alan Stevens, James Steven Lowe Mosby,
6. Goodman & Gilman, The Pharmacological basis of Therapeutics, McGraw Hill Pub Co.,
7. Turley, Understanding Pharmacology; 3rd ed, Pearson Educations
8. Tripathi, K.D.; Essentials of Medical Pharmacology; Jay Pee Publishers, New Delhi.
9. Satoskar & Bhandarkar; Pharmacology & Pharmacotherapeutics; Popular Prakashan Pvt. Ltd. Bombay

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Manufacturing Operation – II (Pharmaceutics-V)	Course Code: NA4050		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: IV		

UNIT-I

Evaporation: Basic concepts of phase equilibrium, Factors affecting evaporation, principle, materials of construction, Applications, advantages and disadvantages of Climbing and falling film, evaporators , Evaporating pan , Vacuum evaporators, Horizontal and Vertical evaporators.

UNIT-II

Distillation: Raoult's law, Phase diagrams, Simple, Steam, & Flash distillation, Principle of McCabe Thiele's method of calculation of number of theoretical plates, Equipment for rectification, Azeotropic, Extractive & molecular distillation .

UNIT-III

Crystallization: Characteristics of Crystals- purity, size, shape, geometry, habit, forms and factors affecting them. Miers super-saturation theory & caking of crystals and its prevention Classification of crystallizers, Principle, Materials of construction, applications, advantages and disadvantages of Swenson Walker, Agitated batch, Vacuum, Tank and Krystal Crystallizer

UNIT-IV

Humidity, Ventilation And Air Conditioning Systems (Hvac): Basic concepts & definitions, Wet bulb & Dry bulb thermometer, adiabatic saturation temperature, Psychometric charts & Measurement of humidity, Application of humidity measurement in pharmacy, Equipment and area validation for dehumidification operations. Principles, Materials of constructions and Applications of Refrigeration and Air-conditioning.

UNIT-V

Machinery used for the packaging of dosage form, and its selection criteria for Conveying of Solids Belt conveyors, chain conveyors, screw conveyors and pneumatic conveyors.

List of Experiments (NA4150)

1. Study the Effect Surface area on rate of evaporation
2. Study the Effect of viscosity on rate of evaporation
3. Study the Effect of conc. on rate of evaporation
4. Separate turpentine oil from water turpentine oil mixture by steam distillation process
5. Study the crystallization behavior of potassium nitrate
6. Study the crystallization behavior of copper sulphate
7. Study principle of centrifugation for Solid – liquid separation and stability of suspension.
8. Determine the humidity and relative humidity of the ambient environment using psychrometer
9. Determine the humidity of the air by dew point method
10. Determine water vapour permeability
11. Determine equilibrium moisture content of starch and bentonite at different humidities and at room temperature
12. Study of validation protocol for HVAC

Recommended Books:

1. Badger W.L. and Banchero J.T. Introduction to Chemical Engineering McGraw Hill International Book Co., London.
2. Perry R.H. & Chilton C.H. Chemical Engineers Handbook, McGraw Kogakusha Ltd.
3. McCabe W.L. and Smith J.C. Unit Operation of Chemical Engineering McGraw Hill International Book Co., London.
4. Sambhamurthy, Pharmaceutical Engineering, New Age Publishers.
5. Validation in pharma industry by PP Sharma current edition
6. Cooper and Gunn's Tutorial Pharmacy, CBS Publishers, New Delhi

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Environmental Studies	Course Code: NB4060		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: IV		

UNIT-I

Introduction of environmental science, Environmental education and Awareness, Global Environmental problems, (Global warming, ozone depletion and acid rain) Environmental priorities in India, General idea about Environmental laws, Environmental ethics, Environmental ethics Global imperatives.

UNIT-II

Sources, types, effects and control of: Water pollution, Air Pollution, Noise Pollution, Land pollution, Marine pollution, Thermal Pollution and Radioactive pollution.

UNIT-III

Natural Resources: concept of resources, types of resources, water resources, land resources, biological resources, Energy resources, mineral resources, human resources, conservation of natural resources, environmental impact of degradation of resources.

UNIT-IV

Sources and generation of solid waste, their characteristics, chemical composition and classification, Different method of disposal and management of solid waste (Hospital Waste and Hazardous waste) recycling of waste material, Waste minimization technologies, Hazardous Waste Management and Handling Rule, 1989, resource Management, Disasters Management and Risk analysis.

UNIT-V

Definition , Principles and scope of ecology, Human ecology and Human settlement, evolution, origin of life and speciation, ecosystem: Structure and functions, Abiotic and biotic components, energy flows, food chains, Food, web, Ecological pyramids, types and diversity, Ecological succession, population, community ecology ad Parasitism, Preypredator relationships

Recommended Books:

1. Manoharachary C., Jyaranama Reddy P. Principles of Environmental Studies, Pharma Book Syndicate, Hyderabad.
2. Trivedy R.K., Handbook of Environmental Laws, Acts, Guidelines, Compliances Standards Vol. I &II. Pharma Book Syndicate, Hyderabad
3. Relevant Acts & Rules published by Govt. of India with latest amendments.
4. Reddy, M.Anji , ‘ Text Book of Environmental Sciences & Technology’.
5. National Formulary of India, Latest edition

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmaceutical Technology – I (Pharmaceutics-VI)	Course Code: NA5010		
Credit: 3	L 3	T 0	P 0
Year: 3rd	Semester: V		

UNIT-I

A: Product development stages.

B: Preformulation studies: Goal of preformulation studies and implementation of preformulation study objectives to develop a suitable dosage forms. Complexation and its Role in solubility enhancement.

UNIT-II

Tablets:

(A) Tablet: definition, types and advantages and disadvantages

(B) Granulation technology on large- scale by various techniques, physics of tablets making, machinery and tooling , various methods of manufacturing of tablets and their advantages over each other , evaluation of tablets (including tablet defects their causes and remedies) as per IP specifications.

(C) Coating of Tablets: Sugar and film coating, film forming materials, formulation of coating solution, principle of coating process and equipments for coating process, variables for coating evaluation of coated tablet. (Including film defects their causes and remedies) Selection Criteria for Punches, Validation of Punches. Problems in Tablets formulations due to Punches

UNIT-III

Capsules: Introduction to capsules as a dosage form, hard and soft gelatin capsules, formulation and evaluation, machinery, packaging, storage and stability testing

UNIT-IV

Liquid Dosage Forms: Introduction, formulation, manufacturing, evaluation and packaging of clear liquids, suspensions, and emulsions

UNIT-V

Semisolid Dosage Forms and suppositories

A: Types, mechanisms of drug penetration, factors influencing penetration, formulation, manufacturing , evaluation and packaging of semisolids.

B: Suppositories: Ideal requirements for bases, manufacturing procedure, evaluation and packaging

List of Experiments

1. Preformulation studies of API. (As per pharmacopoeial requirements)
2. Preparation, evaluation and packing of liquid orals like clear solutions
3. Formulation and evaluation of tablets using various binding agents
4. Formulation and evaluation of tablets using various disintegrating agents
5. Formulation and evaluation of tablets using various binding agents
6. Formulation and evaluation of tablets dispersible tablets
7. Formulation and evaluation of tablets by wet granulation method
8. Formulation and evaluation of tablets by direct compression
9. Formulation and evaluation of tablets by slugging method
10. Formulation and evaluation of capsule dosage form by hand filling method
11. Formulation and evaluation of capsule dosage form by machine fill method
12. Preparation, evaluation and packing of suspensions .
13. Preparation, evaluation and packing of emulsions.
14. Preparation, evaluation and packing of suppositories
15. Preparation, evaluation and packing semisolids like ointments gels etc

Recommended Books:

1. Remington: The Science and Practice of Pharmacy Pharmaceutical Sciences Vol. I & II Lippincott William Wilkins
2. R.E. Avis, Pharmaceutical Dosage Forms: Parenteral Medication, Vol-I, Marcel Dekker-Inc, New York & Basel.
3. H.C. Ansel, Introduction to Pharmaceutical Dosage Forms, Lippincott William Wilkins
4. Herbert A. Liebermann & Leon Lachman, Theory & Practice of Industrial Pharmacy,
5. Augsburger Larry L. "Pharmaceutical Doasage Forms: tablets " 3rd edition Informa healthcare
6. IP (Latest edition)
7. BP (Latest edition)

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Medicinal Chemistry – I (Pharmaceutical Chemistry-V)	Course Code: NA5020		
Credit: 3	L 3	T 0	P 0
Year: 3rd	Semester: V		

Mode of action, uses, SAR of the following classes of drugs included in latest edition of pharmacopoeia (synthetic procedures and assay of individually mentioned drugs only)

UNIT-I

Basic Principles of Medicinal Chemistry: Drug-receptor interaction, Concepts of prodrug.

Drugs acting on the Central Nervous System:

General Anaesthetics- Thiopental, Ketamine Local Anaesthetics- Lignocaine, Benzocaine. Sedatives and Hypnotics- Phenobarbitone

UNIT-II

Anticonvulsants- Phenytoin, Carbamazepine, Ethosuximide, Valproic Acid

Antiparkinsonism drugs- Levodopa.

CNS Stimulants- Caffeine, Amphetamine.

UNIT-III

Psychopharmacological Agents:

Antianxiety drugs- Diazepam, Alprazolam. Antidepressants – Imipramine, Amitriptyline Fluoxetine.

Antipsychotic- Chlorpromazine, Haloperidol.

UNIT-IV

Anti-cancer drugs

Alkylating Agents- Thiotepa, Chlorambucil, Antimetabolites- Methotrexate, 5-FU

UNIT-V

Introduction, Classification, Mode of action, uses, structure-activity relationship of the following classes of drug (Synthetic procedures of individually mentioned drugs only).

Thyroid and Antithyroids – Levothyroxine, Propylthiouracil

Hypoglycaemics - Chlorpropamide, Metformin, Tolbutamide, Glibenclamide

List of Experiments (NA5120)

1. Synthesis of atleast five drugs from the course content involving two or more steps. Ex :- Benzocaine, Phenytoin, Barbituric acid, Nikethamide, Benzocaine etc
2. Monographic analysis of the drugs and marketed formulation as per IP.
3. Microwave assisted synthesis of API (Any 2)
4. Synthesis of drugs for specific site targeting.

Recommended Books:

1. Delgado J N and Remers W A R, Eds., Wilson And Giswold's Text book of Organic Medicinal and Pharmaceutical Chemistry, J. Lippincott Co., Philadelphia.
2. Foye W C, Principles of Medicinal Chemistry, Lea & Febiger, Philadelphia.
3. Wolff ME, Ed. Burger's Medicinal Chemistry, John Wiley & Sons, New York.
4. Singh Harkrishan and Kapoor, V.K., Organic Pharmaceutical Chemistry, Vallabh Prakashan, Delhi.
5. Patrick G L. Medicinal Chemistry, Oxford University Press NY
6. Vardanayan R. Synthesis of Essential Drugs, Academic press an imprint of Elsevier
7. Pharmacopoeia of India, Ministry of Health, Govt. of India.

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmacognosy – III	Course Code: NA5030		
Credit: 3	L 3	T 0	P 0
Year: 3rd	Semester: V		

UNIT – 1

Extraction, isolation and separation techniques of active principles: From crudes herbal drugs.

UNIT – 2

Introduction, classification, different chromatography methods and their applications in evaluation of herbal drugs.

UNIT – 3

Systematic Pharmacognostic Study of the following drugs containing volatile oils:

ral methods of isolation and characterization of Mentha, Coriander, Cinnamon, Cassia, Lemon peel, Orange peel, Lemon grass, Citronella, Caraway, Dill, Spearmint, Clove, Fennel, Nutmeg, Eucalyptus, Chenopodium, Cardamom, Valerian, Musk, Palamarosa, Gaultheria, Sandalwood

UNIT – 4

Systematic Pharmacognostic Study of the following:

Fixed oil, Fats and Waxes - Bees wax, castor oil, Cocoa butter, Cod liver oil, Hydnocarpus Oil, Kokum butter, Lard, Linseed oil, Shark liver oil and wool fat.

Pharmaceutical aid from natural sources: Talc, Asbestos, Bentonite, Kaolin and Prepared Chalk.

UNIT – 5

Pharmacopoeial studies: Herbal Pharmacopoeia and Compendia; Indian Pharmacopoeia, Ayurvedic Pharmacopoeia of India, Chinese herbal Pharmacopoeia & United States Pharmacopoeia for Herbal monographs.

List of Experiments (NA5130)

1. Extraction, isolation and separation techniques for active constituents.
2. Macroscopic and Microscopic study of some drugs in theory.
3. Evaluation parameters for fats, lipids and oils.
4. Study of pharmaceutical aids.
5. Monograph study for some selected drugs mentioned in the theory.

Recommended Books:

1. N.Kalia: "A text Book of Industrial Pharmacognosy", 1st edition, CBS Publishers.
2. W.C.Evans: "Trease and Evans Pharmacognosy", 15th edition, Saunders, Elsevier, 2007.
3. Phillipa.Grubb: "Plants for Chemicals, Pharmaceuticals and Biotechnology",
4. C.K.kokate: "A Text Book of Industrial Pharmacognosy",
5. Wallis: "A Text Book of Industrial Pharmacognosy",
6. Quadry and Shah: "A Text Book of Industrial Pharmacognosy",

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmacology – V	Course Code: NA5040		
Credit: 3	L 3	T 0	P 0
Year: 3rd	Semester: V		

UNIT – 1

Dose response curve, potency and efficacy, Therapeutic Index: LD50, ED50, Bioassay: principles, types and methods

UNIT – 2

Pharmacology of ANS: Parasympathomimetic (Cholinergic) drugs, Parasympatholytic (anti Cholinergic) drugs, Drug acting on autonomic ganglia (Stimulants and blocking agents), Sympathomimetic (Adrenergic) drugs Sympatholytic (Anti-adrenergic) drugs

UNIT – 3

CNS: Alcohols & disulfiram, Sedative hypnotics, Anti anxiety agents, antipsychotics, antidepressants. Antiepileptic drugs, Antiparkinsonism drugs

UNIT – 4

General anesthetics and Local anesthetics
Skeletal muscle Relaxants Peripherally and centrally acting muscle Relaxants

UNIT – 5

Heavy metals and heavy metal antagonists. General principles of treatment of poisoning with particular reference to barbiturates, opioids, organophosphorous and atropine poisoning.

List of Experiments (NA5140)

Use of computer simulated CDs or Video cassettes for pharmacology practical where possible.

1. Preparation of different solutions for experiments.
2. Drug dilutions, use of molar and w/v solutions in experimental pharmacology.
3. Common laboratory animals and anesthetics used in screening of pharmacological action.
4. Instruments used in experimental pharmacology.
5. Standard techniques in pharmacology experiments.
6. Study of different routes of administration of drugs.
7. Practical related to DRC using software
8. Bioassay using software (Graphical method)

Recommended Books:

1. Goodman & Gilman, The Pharmacological basis of Therapeutics, McGraw Hill Pub Co., Current Edition
2. Turley, Understanding pharmacology, 3ed, ed, Pearson educations, Current Edition
3. Tripathi, K.D. Essentials of Medical Pharmacology, Jay Pee Publishers, New Delhi. Current Edition
4. Satoskar & Bhandarkar; Pharmacology & Pharmacotherapeutics., Popular Prakashan Pvt. Ltd. Bombay. Current Edition
5. Frieddman, Fundamentals of clinical trails, 3rd, ed., Springer Intl, Current Edition
6. Bothara Sunil, Essentials of Experimental pharmacology, vol. 1. PharmaMed Press, Current Edition
7. Ghosh, MN; Fundamentals of Experimental Pharmacology, Scientific Book Agency, Calcutta. Current Edition
7. Grover J.K., Experiments in Pharmacy & Pharmacology, CBS Publishers, New Delhi., Current Edition
8. Kulkarni S.K., Hand Book of Experimental Pharmacology, Vallabh Prakashan, Delhi., Current Edition
9. Turner, Screening Methods in pharmacology, Elsevier, Current Edition

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Biochemistry (Pharmaceutical Chemistry – III)	Course Code: NA5050		
Credit: 3	L 3	T 0	P 0
Year: 3rd	Semester: V		

UNIT – 1

Enzymes - Enzyme Kinetics, Enzyme Inhibition, Clinically diagnostic applications of Isoenzymes, Role of Coenzymes in Different Biological Reactions, Enzyme Immobilisation and applications of enzyme engineering. Study on Pathological Interpretation of Enzymes in Disease Processes

UNIT – 2

Glycolysis, Gluconeogenesis, Glycogenolysis, Pentose Phosphate Pathway, Citric Acid Cycle and their regulation, Significance of Citric Acid Cycle, Effect of disease process on carbohydrate metabolism

UNIT – 3

Respiratory Chain, Oxidative Phosphorylation

Molecular Action of Hormones (Especially Epinephrine, Insulin, Glucagon), Biological Hormones of Medicinal Importance, Role of Secondary Messengers in cell, Introduction to Signal Transduction, Receptor Down-Regulation and Up-Regulation.

UNIT – 4

Metabolism of Fatty acids and their Regulation,

Metabolic Study of Following :- Nucleotides , Amino Acids

A Brief Study of Essential Fatty acids, Ketone Bodies and Problems associated with it.

UNIT – 5

Dna Replication, Transcription and Translation in Eukaryotes and Prokaryotes, Genetic Code

List of Experiments (NA5150)

1. Preparation of standard buffers (citrate, phosphate and carbonate) and measurement of pH.
2. Titration curve for amino acids
3. Separation of amino acids by chromatography
4. Separation of lipids by TLC.
5. Quantitative estimation of amino acids
6. Determination of glucose by means of the enzyme glucose oxidase.
7. Enzymatic hydrolysis of glycogen by α & β amylase
8. Effects of temperature on the activity of alpha amylase
9. Estimation of cholesterol in Blood.
10. Estimation of Glucose in blood & urine
11. Estimation of Urea in blood
12. Estimation of ketone bodies in blood
13. Qualitative analysis of inorganic as well as organic constituents of Urine
14. Interpretation and comparison of biochemical data /pathological report(any 5)

Recommended Books:

1. Lehninger Principles of Biochemistry, Macmillan Higher Education, 2008
2. Harper's Illustrated Biochemistry, McGraw Hill Professional, 2009
3. Lubert Stryer, Jeremy M. Berg, John L. Tymoczko, Biochemistry W.H.Freeman & Co Ltd
4. Benjamin Lewin Genes Jones & Bartlett Learning
5. Boyer, modern experimental biochemistry, Pearson education
6. Plummer, David J., An Introduction to Practical Biochemistry, Mc Graw Hill, New Delhi.

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmaceutical Technology – II (Pharmaceutics-VII)	Course Code: NA6010		
Credit: 3	L 3	T 0	P 0
Year: 3rd	Semester: VI		

UNIT – 1

A. Introduction to parenteral dosage form, Aqueous & non aqueous vehicles and their selection.

B. Requirements for manufacturing: source of contamination, premise, aseptic handling, flow of material between aseptic and non aseptic area, concept of clean room, class100 and 1000 rooms, aseptic handling and requirements

UNIT – 2

General method of preparations of LVPs, SVPs and Ophthalmic Formulations. Formulation of sterile powders for injection, sterile emulsion, sterile suspensions, and lyophilized powders for injection.

Quality control of parenteral product: Pyrogen testing (BET and LAL), leak test, particulate test with specification, sterility test IP

UNIT – 3

Sustained and controlled release

A: Approaches to Sustained and controlled release dosage forms. In-vitro methods of evaluation.

B: Micro-encapsulation: Types of microcapsule, importance of micro-encapsulation in pharmacy, micro-encapsulation techniques, evaluation of micro capsules.

UNIT – 4

Cosmetics Cosmetology and cosmetic Preparations: Formulation of cold cream, vanishing cream, cleansing cream, all purpose cream, sunscreen lotion, antiperspirants, deodorant. Shampoos, Conditioner, Shaving and after shaving products, Dentifrice Lipstick, Nail lacquer.

UNIT – 5

Aerosols: Pharmaceutical Aerosols: Definition, Propellants and their selection, general formulation and evaluation, manufacturing (lab and large scale) and packaging methods, pharmaceutical applications.

List of Experiments (NA6110)

1. Sterility testing of the parenteral formulation and validation of sterilization methods
2. Formulation evaluation and packaging of parenteral formulation of water soluble and water insoluble APIs
3. Sealing of ampoules by pull seal method and evaluation of the sealing
4. Sealing of ampoules by tip seal method and evaluation of the sealing
5. Sterilization and washing of ampoules and vials
6. Sealing of vials and evaluation of sealing
7. Microencapsulation by different methods
8. Preparation and evaluation of cold cream, vanishing cream, cleansing lotion and creams. Moisturizing creams, Skin tonics, Hair creams, Hair Conditioners, Shampoos, Shaving creams and sticks. Tooth powder, Tooth pastes, After shave lotion, Lipsticks.

Recommended Books:

1. Remington's Pharmaceutical Sciences, Vol. I & Vol. - II, Mack Publishing Co., U.S.A.
2. Dinda, SC, Advances in pharmaceutical Technology, PharmaMed Press, Hyderabad.
3. Lachman L., Lieberman H.A, Kanig J.L, Theory and Practice of Industrial Pharmacy, Lea & Febiger, Philadelphia, USA
4. H.C. Ansel, Introduction to Pharmaceutical Dosage Forms, Lea & Febiger, Philadelphia, U.S.A.
5. Harrys Cosmetology
6. Thomssen E.G. Modern Cosmetics, Universal Publishing Corporation.
7. Drugs and Cosmetics Act and Rules
8. Poucher "Cosmetics". Pharmamed press, Hyderabad

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Medicinal Chemistry–II (Pharmaceutical Chemistry-VII)	Course Code: NA6020		
Credit: 3	L 3	T 0	P 0
Year: 3rd	Semester: VI		

Mode of action, uses, SAR of the following classes of drugs included in latest edition of pharmacopoeia (Synthetic procedures and assay of individually mentioned drugs only)

UNIT – 1

Basic concept of drug design, Introduction to Analogues based drug design, Structure based drug design, and Introduction to QSAR & Computer aided drug design.

UNIT – 2

Cardiovascular Drugs –

Antiarrhythmic drugs- Propranolol, Procainamide

Antianginal drugs- Isosorbide mononitrate

Antihypertensive drugs- Enalapril, Methyldopa, Nifedipine. **Antihyperlipidemics-** Clofibrate

UNIT – 3

Drugs acting at Synaptic and neuro-effector junction sites:

Cholinergic, Anticholinergic & Anticholinesterases- Neostigmine, Physostigmine, Pilocarpine, Atropine.

Adrenergic Drugs- Ephedrine, Salbutamol, Adrenaline

UNIT – 4

Analgesics and Antipyretics - Diclofenac, Aceclofenac Paracetamol, Celecoxib,

OPOIDS Analgesic- Pethidine, Methadone

Antispasmodic and Antiulcer drugs- Dicyclomine, Ranitidine

UNIT – 5

Diuretics – Acetazolamide, Chlorthiazide; Furosemide .

Anti-platelet drugs- Aspirin , Immuno suppressants - (Azathioprine).

List of Experiments (NA6120)

1. Synthesis of at least 5 selected drugs from the course content involving 2 or more steps.
2. Monographic analysis of the Medicinal compounds and marketed formulation as per IP.
3. Microwave assisted synthesis of Medicinal compounds (Any 2)

Recommended Books:

1. Delgado J N and Remers W A R, Eds., Wilson And Giswold's Text book of Organic Medicinal Pharmaceutical Chemistry, J. Lippincott Co., Philadelphia.
2. Foye W C, Principles of Medicinal Chemistry, Lea & Febiger, Philadelphia.
3. Wolff ME, Ed. Burger's Medicinal Chemistry, John Wiley & Sons, New York.
4. Harkrishan and Kapoor, V.K., Organic Pharmaceutical Chemistry, Vallabh Prakashan, Delhi.
5. Patrick G L. Medicinal Chemistry, Oxford University Press NY
6. Vardanayan R. Synthesis of Essential Drugs, Academic press an imprint of Elsevier
7. IP

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Plant Biotechnology (Pharmacognosy-IV)	Course Code: NA6030		
Credit: 3	L 3	T 0	P 0
Year: 3rd	Semester: VI		

UNIT -I

Plant tissue culture: Introduction, Types, different methods and techniques in PTC and culture media. Industrial Applications of plant tissue culture in production of pharmaceutically important secondary metabolites.

UNIT –II

Biogenetic pathways for primary and secondary plant metabolites of Pharmaceutical importance: Carbohydrates, lipids, alkaloids, glycosides, steroids, terpenes and terpenoids.

Bioreactors: Importance, its design, control of different parameters, Types and their Importance in production of secondary plants metabolites.

UNIT-III

Immobilization of enzymes: Methods, advantages and disadvantages. Multistep immobilized enzyme system. Application and future of enzyme engineering

UNIT-IV

Gene cloning: Recombination DNA techniques, Gene Cloning and their applications. Transformation, conjugation, transduction, protoplast fusion

UNIT –V

Fundamentals of genetic engineering: basic techniques like agarose-gel electrophoresis, Southern blotting and Northern blotting. Pharmaceutical drugs from r-DNA Technology like Insulin, urokinase, Alteplase, Humatrope.

Recommended Books:

1. W.C.Evans: "Trease and Evans Pharmacognosy", 15th edition, Saunders, Elsevier, 2007.
2. T A Brown", Gene Cloning and DNA Anlysis" 6th Edition, Blackwell Publishers
3. Phillipa.Grubb: "Plants for Chemicals, Pharmaceuticals and Biotechnology",
4. C.K.kokate: "A Text Book of Industrial Pharmacognosy",
5. Wallis: "A Text Book of Industrial Pharmacognosy",
6. Quadry and Shah: "A Text Book of Industrial Pharmacognosy",
7. Roberta Smith "Plant Tissue Culture-Techniques and Experiments" Academic Publishers

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmacology – VI	Course Code: NA6040		
Credit: 3	L 3	T 0	P 0
Year: 3rd	Semester: VI		

UNIT –I

Pharmacology of CVS: Cardiac glycosides, Antihypertensive drugs, Antianginal drugs, Antiarrhythmics, Antihyperlipidemics

Unit –II

Drug acting on urinary system: Diuretics and antidiuretic hormones

Drugs Acting on Respiratory System: Anti-asthmatic drugs, Anti-tussives & Expectorants, Respiratory Stimulants

UNIT-III

Opioid analgesic and antagonist, endogenous opioids, Non steroidal anti-inflammatory drugs & Anti-gout Drugs

UNIT-IV

Autocoids: Prostaglandins, Thromboxane, Leukotrienes, Angiotensin and Bradykinin

Immunomodulatory drugs: Immunosuppressant and immunostimulant drugs,

UNIT-V

Drugs acting on GIT: Antacids and Antiulcer drugs, Laxatives and antidiarrhoeal Agents, Emetics and antiemetics

List of Experiments (NA6130)

1. Relevant simulated experiments based on theory syllabus using software.
2. Screening models for evaluation of analgesic, anti-inflammatory, antiulcer, and CNS disorders using software. (Any three for each category)
3. Practical project on drug information profile of new drugs on theory syllabus

Recommended Books (Current Edition):

1. Goodman & Gilman, The Pharmacological basis of Therapeutics, McGraw Hill Pub Co.,
2. Turley, Understandig pharmacology, 3rd ed, Pearson educations,
3. Tripathi, K.D. Essentials of Medical Pharmacology, Jay Pee Publishers, New Delhi.
4. Satoskar & Bhandarkar; Pharmacology & Pharmacotherapeutics., Popular Prakashan Pvt. Ltd. Bombay.
5. Frieddman, Fundamentals of clinical trails, 3rd ed., Springer Intl,
6. Bothara Sunil, Essentials of Experimental pharmacology, vol. 1. PharmaMed Press,
7. Ghosh, MN; Fundamentals of Experimental Pharmacology, Scientific Book Agency, Calcutta.
7. Grover J.K., Experiments in Pharmacy & Pharmacology, CBS Publishers, New Delhi.,
8. Kulkarni S.K., Hand Book of Experimental Pharmacology, Vallabh Prakashan, Delhi.,
9. Turner, Screening Methods in pharmacology, Elsevier,

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Biostatistics	Course Code: JA6050		
Credit: 3	L 3	T 0	P 0
Year: 3rd	Semester: VI		

UNIT -I

Linear Regression and Correlation: Introduction of linear and non linear regression ,Analysis of Standard Curves in

Drug Analysis: Application of Linear Regression and Drug stability studies

UNIT -II

Analysis of Variance: One- Way Analysis of Variance Planned Versus a Posteriori (Unplanned) Comparisons in ANOVA, **Another Example of One-way Analysis of Variance:** Unequal Sample Sixes and the Fixed and Random Models, Two-Way Analysis of Variance (Randomized Blocks), Statistical Models, Analysis of Covariance, ANOVA for pooling regression lines as related to stability data.

UNIT-III

Nonparametric Methods: Data Characteristics and an Introduction to Nonparametric Procedures, Sign Test, Wilcoxon Signed Rank Test, Wilcoxon Rank Sum Test (Test for Differences Between Two Independent Groups), Kruskal Wallis Test (One- Way ANOVA),

UNIT-IV

Factorial Designs : Definitions Two Simple Hypothetical Experiments to Illustrate the Advantages of Factorial Designs, Performing Factorial Experiments: Recommendations and Notation, A Worked Example of a Factorial Experiment, Fractional Factorial Designs

UNIT -V

Experimental Design in Clinical Trials: Introduction, Some Principles of Experimental Design and Analysis, Parallel Deign, Crossover Designs and Bioavailability / Bioequivalence Studies, Repeated Measures (Split- Plot) Designs, Multicentric Studies and Interim Analyses

Recommended Books:

1. Bolton, S and Bon, C, Pharmaceuticals Statistics- Practical & Clinical Applications, Marcel & Dekker, New York.
2. Fisher, R.A., Statistical Methods for Research Works, Oliver & Boyd, Edinburgh.
3. Chow, Statistical Design and Analysis of Stability Studies, Marcel Dekker, New York.

Course Structure & Syllabus of B.Pharm. Applicable for 2013-2017 Batch

Course Title: Pharmaceutics-VIII (Biopharmaceutics & Pharmacokinetics)	Course Code: NA7010
Credit: 3	L 3 T 0 P 0
Year: 4 th	Semester: VII

UNIT-I

Applied integration and differentiation in Biopharmaceutics

UNIT-II

Introduction To Biopharmaceutics And Pharmacokinetics, Biopharmaceutical Classification System

A:Absorption: Various Mechanisms and Factors Influencing Absorption of Drug.

B:Distribution: Mechanism, Barriers To Drug Distribution, Factors Influencing Distribution Of Drug Through Body. Concept Of Volume Of Distribution

C:Protein Binding: Types Of Protein Binding, Tissue Binding Of Drug, Factors Influencing Protein Binding, Significance Of Protein Binding, Kinetics Of Protein Binding.

Pharmacokinetics:

A: Significance Of Plasma Drug Concentration Measurement.

B:Concept Of Compartment Models And Non-Compartment Model And Applications

UNIT-III

Compartment modeling: Basic concept of developing a model,

A:One compartment open model: IV bolus, IV infusion, extra vascular administration, urinary excretion model and calculation of various pharmacokinetic parameters

B.Multicompartment models: preliminary information of two compartment models,

UNIT-IV

Bioavailability and Bioequivalence: Definition, types, factor affecting bioavailability, methods of improving bioavailability, measurement of bioavailability, bioavailability and bioequivalence studies

UNIT-V

(A) Dosage regimens

(B) Dosage adjustment in patients with and without renal and hepatic failure.

List of Experiments (NA7110)

1. Experiments designed for the estimation of various pharmacokinetic parameters with given data.
2. In vitro evaluation of different dosage forms for drug release.
3. Absorption studies - in vitro.
4. Bioavailability and Bioequivalence studies
5. Permeability studies
6. Protein binding
7. Statistical treatment of pharmaceutical data.

Recommended Books:

1. Notari, R.E, Biopharmaceutics and Pharmacokinetics - An introduction Marcel Dekker Inc. N.Y.
2. Rowland M, and Tozer T.N. Clinical Pharmacokinetics, Lea and Febiger, N.Y.
3. Wagner J.G. Fundamentals of Clinical Pharmacokinetics, Drugs Intelligence Publishers, Hamilton.
4. Gibaldi, Milo' Biopharmaceutics & Clinical pharmacokinetics.
5. John. G.Wagner," Pharmacokinetics for the Pharmaceutical Scientist'.

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmacopoeial Standards	Course Code: NA7020		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VII		

UNIT-I

Test Methods - Biological Methods (Abnormal Toxicities, Effectiveness Of Antimicrobial Preservatives, Bacterial Endotoxins, Peptide Mapping)

UNIT-II

Test Methods - Physical & Physiochemical Methods (Differential Scanning Calorimetry, Isoelectric Focussing)

UNIT-III

Containers Types , General Require Ments, Tests On Containers, General Monographs On Dosage Forms

UNIT-IV

General Monographs of Parenterals, (General Requirement, Dip Concentrates, Intramammary Infusionveterinary Aerosols)

UNIT-V

Illustrative Studies of 2 Monographs Each For API (Paracetamol, Dexamethasone), Excipients (Lactose, Starch) And Dosage Forms (Amoxicillin Dry Syrup)

Text Books:

1. Indian Pharmacopoeia (all editions).

Course Structure & Syllabus of B.Pharm. Applicable for 2013-2017 Batch

Course Title: Pharmacognosy – V (Industrial Pharmacognosy)	Course Code: NA7030		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VII		

UNIT-I

Industrial production of Phyto-pharmaceuticals : (Isolation and estimation of phyto-pharmaceuticals)

Acorus calamus: Asarone

Aloe barbadensis : Aloin & Aloesin

Adhatoda vasica: Vasicine

Andrographis paniculata: Andrographolides

Berberis aristata : Berberine

Curcuma longa: Curcumin

Garcinia cambogia: L- Hydroxy citric acid

Glycyrrhiza glabra: Glycyrrhizic acid & its other derivatives

Gymnema sylvestre: Gymnemic acid

Phyllanthus amarus: Phyllanthin

Picrorhiza kurroa : Kutkin

Tribulus terrestris: Total saponins

Withania somnifera: Withanolides

Zingiber officinale: Gingerol

Commiphora mukul: Guggulsterone

Trigonella foenum: Saponins.

UNIT-II

Nutraceuticals and antioxidants: Plants against free radicals and as antioxidants. Herbs as Health foods and concept of nutraceuticals.

UNIT-III

Marine Pharmacognosy:

- a) Definition, present status, classification of important bioactive agents.
- b) General methods of isolation and purification.
- c) Study of important bioactive agents including chemistry & uses

UNIT-IV

High throughput Screening and importance of heavy metals and Lead molecules.

Role of Biological and HPTLC Markers in Plant drug analysis.

Stability and Toxicity Studies of Phyto-medicines.

UNIT-V

Herbal regulatory parameters for industrial production:

Ayurvedic formulary of India, Ayurvedic pharmacopoeia of India, GMP, ICH guidelines.

List of Experiments (NA7130)

1. Extraction, isolation and identification techniques for phyto-constituents.
2. Chromatographic studies for single phyto-constituents.

Recommended Books:

1. Quality Control of Herbal Drugs by Pullok K. Mukherjee, 1st edition, Business Horizons Pharmaceutical Publisher, New Delhi, 2002
2. Indian Herbal Pharmacopoeia, vol. 1 & 2, RRL, IDMA, 1998, 2000 (Current Edition)
3. PDR for Herbal Medicines, 2nd edition, medicinal economic company, New Jersey,
4. Wallis: "A Text Book of Industrial Pharmacognosy",
5. Quadry and Shah: "A Text Book of Industrial Pharmacognosy"
6. 7 IP

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmacology – VII (Pathophysiology & Pharmacology)	Course Code: NA7040		
Credit: 3	L	T	P
	3	0	0
Year: 4th	Semester: VII		

UNIT-I

Pharmacology of endocrine system (Thyroid & antithyroid drug,s, Insulin & antidiabetics, Corticosteroids, Sex hormones, oxytocin and tocolytics

UNIT-II

Chemotherapy-principles, Sulfonamide, cotrimoxazole Pencillins, cephalosporins, chloramphenicol, erythromycin, fluoroquinolones and miscellaneous antibiotics.

UNIT-III

- a) Chemotherapy of malaria, tuberculosis, leprosy, viral diseases and drug therapy of HIV /AIDS.
- (b) Chemotherapy of malignancy
- (c) Anthelmintics and Anti-amoebics

UNIT-IV

Pediatrics & Geriatrics and Pregnancy (Physiological changes, mechanism, Drugs usage and contra-indication in these conditions)

UNIT – V

Drugs Acting on Haemopoietic System: Vit. K & anticoagulants, Fibrinolytics & antiplatelet drugs
Therapeutic drug monitoring, drug utilization evaluation(DUE) and review (DRU)

List of Experiments (NA7140)

1. Bioassay of agonist and antagonist by various methods using software
2. Determination of PA2 value using software.
3. Screening models for evaluation of anticancer, diuretic & antidiabetic activity using software. (Any three for each category)
4. Practical project on drug information profile of new drugs (one for each category) on theory syllabus
5. Therapeutic drug monitoring of digoxin, gentamycin etc.
6. Community service for creating awareness about preventive measures to be taken on the disease like AIDs, Cancer and Diabetes (Minimum 6 weeks) and reporting

Recommended Books:

1. Goodman & Gilman, The Pharmacological basis of Therapeutics, Pergamon Press. Editors:- J.G. Hardman, Le Limbird, PB Molinoss, RW Ruddon & AG Gil, Pergamon Press.
2. Katzung, B.G. Basic & Clinical Pharmacology, Prentice Hall, International.
3. Laurene, DR & Bennet PN; Clinical Pharmacology, Churchill Livingstone.
4. Rang MP, Dale MM, Riter JM, Pharmacology Churchill Livingstone.
5. Tripathi, K.D. Essentials of Medical Pharmacology, Jay Pee Publishers, New Delhi.
6. Satoskar & Bhandarkar: Pharmacology & Pharmacotherapeutics, Popular Prakashan Pvt. Ltd., Bombay.
7. Oxford Handbook of Clinical Pharmacy Philip Wiffen, Marc Mitchell, Melanie Snelling - 2012 - Preview - More editions
8. Churchill's Pocketbook of Clinical Pharmacy- edited by Nick D Barber, Alan Willson
9. Handbook of Institutional Pharmacy Practice edited by Thomas R. Brown-4th edition,
10. Naplex Secrets Study Guide: Naplex Test Review for the North American Pharmacist Licensure Examination, Naplex Exam Secrets, Mometrix Media Llc, 01-Aug-2010.
11. The Johns Hopkins consumer guide to drugs Simeon Margolis Medletter Associates.

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmaceutical Management	Course Code: NA7050		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VII		

UNIT – 1

Concept of Management : Administrative Management (Planning, Organizing Staffing Directing, and Controlling, Operative Management (Personnel, Materials, Production, Financial, Marketing, Time / space, Margin / Morale) Principles of Management (Coordination, Communication, Motivation, Decision making, leadership, Innovation Creativity, Delegation of Authority / Responsibility. Record Keeping).

UNIT – 2

Production Management: A brief exposure of the different aspects of Production Management– Visible and Invisible inputs, Methodology of Activities Performance Evaluation Technique Process, Maintenance Management.

UNIT – 3

Pharmaceutical Marketing: Functions, buying, selling, transportation, storage financed feedback information, channels of distribution, wholesale, retail, department store, multiple shop and mail order business.

UNIT – 4

Grievance Management: Grievance and Grievance Handling procedure, Causes of grievances, Need for grievance procedure, Grievance redressal machinery

UNIT – 5

Materials Management: A brief exposure of basic principles of management major areas, scope, purchase, stores, inventory control and evaluation of materials management.

Recommended Books:

1. Chary S.N, Production and Operative Management / Tata Mc Graw Hill.
2. Datta A.K., Material Management / PHI.
3. Chadwick Leslie, The essence of management accounting / PHI.
4. Koontz H, Weihrich H, Essentials of Management, Tata Mc Graw Hill.

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Cosmetology (Elective-I)	Course Code: NA7610		
Credit: 2	L 2	T 0	P 0
Year: 4th	Semester: VII		

Structure and functions of skin and hair. Formulation considerations, preparation, packaging and evaluation of the following categories of cosmetics-

UNIT – 1

Fundamental of cosmetic science

Face Preparation: Face powder, Compact powder, Talcum powder, Face packs and Masks.

UNIT – 2

Skin Preparation: Skin creams, Anti-wrinkle preparations,, Protective creams and gels, Vanishing creams, Cold creams, Cleansing creams, all purpose creams,, Anti-perspirant./ deodorant, Moisturising creams,, Sun-screen, Suntan, and anti-sun burn preparation.

UNIT – 3

Shaving Preparation: Lather shaving stick, Lather shaving creams, Shaving foams, Shaving gels, Pre-and After shave lotions.

Shampoo and Bath preparations: Clear liquid shampoos. Aerosol shampoos, dry shampoos, Acid-balanced shampoos, Egg shampoos, Anti-dandruff Shampoos, Bath oils, Foam baths.

UNIT – 4

Hair Preparations: Hair tonics, Hair conditioners, Hair lotions, Hair sprays, Hair dressings, Hair setting lotions and creams, Hair dyes, Bleaches, Hair waiving, Hair straightners and Hair strengtheners.

Dentifrice: Tooth powders, Tooth pastes, Denture cleansers.

Foot Preparation: Foot powders, Foot sprays, Foot creams, Corn preparations and Athlete's foot preparation.

Manicure Preparation: Nail polish, Nail lacquers and Nail bleaches.

UNIT – 5

Herbal Cosmetics: Cosmetics containing Aloe, Babul, Brahmi, Chandan, Cucumber, Haldi, Jatamansi, Khus, Mehandi, Neem, Reetha, Shikakai, Tulsi, Arnica, Bhringraj and Volatile oils

Cosmetic for babies.

Colored make-up preparations: Lipsticks, Rouge, Mascara, Eye make-up, Eye-liner, Eyebrow pencils..

Recommended Books:

1. M. S. Balsam & Edward Sagarin (Eds.), Cosmetic Science and Technology, Vol. 1-3, Krieger Publishing Company, Florida.
2. Mac Chesney, J. C., Packaging of Cosmetic an Toiletries, Newness- Butterworth, London.
3. E.G., Thomssen, Modern Cosmetics, Universal Publishing Corporation, Bombay.
4. Jellinek, J.S. Formulation and Functions of Cosmetics, John Willey & Sons, New York.
5. R. K . Nema, K. S. Rathode, B.K. Dubey, Text Book of Cosmetics, CBS- Publishers & distributors, New Delhi.
6. Sunil Nanda, Arun Nanda & R.K. Khar, Cosmetic Technology, Birla publications Pvt. Ltd., Delhi.
7. B. M. Mithal and R.N. Saha, A handbook of cosmetics, Vallabh Prakashan, Delhi.
8. P.P. Sharma, Cosmetics- Formulation, Manufacturing & Quality control, Vandana Publications Pvt. Ltd, Delhi.
9. Hildo Butler (Ed.), Poucher's Perfumes, Cosmetics & Soaps, Kluwer Academic Publishers, The Netherland.
- 10.S.C. Bhata, Perfumes, soaps, Detergents and Cosmetics Vol. 1 & 2, CBS Publishers and Distributors, New Delhi.
11. Drug and Cosmetics Act & Rules.

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmaceutical Entrepreneurship (Elective-I)	Course Code: NA7620						
Credit: 2	<table style="width: 100%; border: none;"> <tr> <td style="width: 33%; text-align: center;">L</td> <td style="width: 33%; text-align: center;">T</td> <td style="width: 33%; text-align: center;">P</td> </tr> <tr> <td style="text-align: center;">2</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	2	0	0
L	T	P					
2	0	0					
Year: 4 th	Semester: VII						

UNIT – 1

Entrepreneurship- history & concept, importance

Entrepreneur- Leadership Attributes, Innovations, Influences, Personality Traits and Characteristics. Types of Entrepreneurs. Business etiquettes, Business language and Communication.

UNIT – 2

Entrepreneurship in the pharmaceutical industry- needs, problems and issues Importance of communication, decision making and problem solving skills. Business strategies, competition, marketing opportunities, supply chain management keeping in mind return on investments. Case studies -3 to 5

UNIT – 3

Identification of market for product and services, SWOT analysis Formulation of strategies, market leaders and success stories of their leading brands. Regulatory aspects- Drugs and Cosmetics Act and rules relevant to licensing requirements for retail, wholesale, (schedules H, G, L1, M, Miii, P, P1, U, V, X, Y); DPCO - price control and price fixation, Factory Act, Central and State Excise Act Including Vat, Environmental Protection Act covering air, water, solid waste disposal record keeping, income tax and sales tax, (include only relevant to working), quality system and its relevance.

UNIT – 4

Technology Transfer considerations Funding of projects- Financial, Bootstrapping, External Financing Project Management, Financial Management – understanding of balance sheet and profit and loss accounts, imports and exports. (need based for understanding for practical application). Case studies – 3

UNIT – 5

Importance of HR recourses- team building and management Concept of social entrepreneurship & sustainable entrepreneurship (Growth oriented). Case studies-3

Recommended Books:

1. Welsh, J.A. & Jerry, F.W., 'Entrepreneur's Master Planning Guide, How to launch a successful business', Prentice Hall, Englewood cliff.
2. Srivastava U.K., 'Project Planning, Financing, Implementation and Evaluation, IIM, Ahmedabad.
3. Rao, T.V. & Pareek U, 'Developing Entrepreneurships: A Handbook'. Learning Systems, New Delhi.
4. Handbook of Entrepreneurship Research: An Interdisciplinary Survey and Introduction
5. Duening, Thomas N., Hisrich, Robert D., Lechter, Michael A., Technology Entrepreneurship, Academic Press, 2009.
6. Lundström, Anders und Stevenson, Lois (2005), Entrepreneurship Policy: Theory and Practice, Springer.
7. Deakins, D.; Freel, M. (2009). Entrepreneurship and Small Firms, 5th Edition. McGraw Hill.
8. Pharmaceutical Industry: Innovation & Developments (Business Issues, Competition and Entrepreneurship) by David A. Mancuso, Isobel M. Grenada Publisher: Nova Science Publishers Inc (3 Aug 2011)
9. The Business of Healthcare Innovation [Hardcover] Lawton Robert Burns, Cambridge University Press; 2nd edition
10. Bootstrapping Your Business: Start And Grow a Successful Company With Almost No Money by Greg Gianforte, Marcus Gibson, Publisher Adams Media 2005
11. Drugs and Cosmetics Act and Rules, and DPCO, Govt. of India.
12. Factory Act, Shop and Establishment Act.
13. Environmental Protection Act.

Course Structure & Syllabus of B.Pharm. Applicable for 2013-2017 Batch

Course Title: GMP, Quality Assurance & Validation (Elective-I)	Course Code: NA7630		
Credit: 2	L 2	T 0	P 0
Year: 4th	Semester: VII		

UNIT – 1

No GMP- GMP- cGMP with reference to Indian scenario

Drugs & cosmetics rules with reference to G,H,M,P,P1, T,U,X

Requirements of GMP, CGMP, GLP, USFDA, WHO guidelines. & ICH Guidelines, ISO9000 and current updates.

UNIT – 2

Documentation- Protocols, Forms and maintenance of records in Pharmaceutical industry.

Preparation of documents for new drug approval and export registration (schedule L1 & Y)

UNIT – 3

Basic concept of quality assurance, Quality assurance systems. Self Inspections, investigations of market complaints, out of specifications (OoS), Out of Trends

UNIT – 4

Facility design- Concepts in validation, validation master plan, validation of product, process, equipment, machinery, systems. Cleaning, Building management systems

UNIT – 5

In process quality control tests, IPQA problems in pharmaceutical industries.

Sources and control of quality variation- raw materials, containers, closures, personnel, environment etc.

Pharmacopoeia standards for dosage form and acceptance criteria, Sampling plan,

Sampling and operating characteristics curves –IPC Controls from raw materials to finished products and packaging materials

Recommended Books:

1. Willing, Tuckerman and Hitchings, Good Manufacturing Practices for Pharmaceuticals.
2. OPPI, Quality Assurance.
3. Loftus and Nash, Pharmaceutical Process Validation.
4. Florey, Analytical Profile of Drugs (All volumes).
5. Indian Pharmacopoeia.
6. United States Pharmacopoeia.
7. British Pharmacopoeia.
8. Garfield, Quality Assurance Principles for Analytical Laboratories.
9. Manohar A. Potdar, C.GMP for Pharmaceuticals.
10. Sharma P.P. How to practice GMP's , Vandana Publication, New Delhi
11. Sharma P.P. Validation in pharmaceutical industry , Vandana Publication, New Delhi
12. TRS guidelines
13. ICH guidelines
14. Drugs and Cosmetic Act

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Drug Design (Elective-I)	Course Code: NA7640		
Credit: 2	L 2	T 0	P 0
Year: 4th	Semester: VII		

UNIT – 1

Introduction to Drug Design, Lead Discovery, Interactions (Forces) involved in drug receptor complex, Physiochemical properties in relation to biological action, Stereochemical aspects in drug design, Bioisosterism

UNIT – 2

Drug metabolism-Phase I & Phase II Metabolic Reactions, Prodrugs & Soft drug concepts

UNIT – 3

- a. Analogous based drug design concept with suitable examples
- b. Structure Based drug design concept with examples

UNIT – 4

Combinatorial chemistry-Introduction, Parallel and Split & Mixed synthesis.

UNIT – 5

Introduction, parameters, Quantitative models- Hansch method & Software's in QSAR

Recommended Books:

1. E.J, Ariens: Drug Design, Academic Press, New York (1975).
2. S.H. Salkovisky, A.A. Sinkula and S.C. Valvani, Physical Chemical Properties of Drugs, Marcel Dekker Inc. New York.
3. M.E. Wolff, Burger's Medical Chemistry, John Willey and Sons, New York.
4. R.F, Doerge, Wilson and Gisvold's Text Book of Organic Medicinal and Pharmaceutical Chemistry, J. Lippincott Co, Philadelphia.
5. Olson, Edward C "Computer Assisted Drug Design (American Chemical Society).
6. Burger A "A guide to chemical basis of Drug Design "John Wiley & Sons".
7. Thomas J.Perun "Computer aided Drug Design methods Applications".

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Clinical Pharmacy (Elective-I)	Course Code: NA7650		
Credit: 2	L 2	T 0	P 0
Year: 4th	Semester: VII		

UNIT – 1

Introduction To Clinical Pharmacy -Definition, development and scope

Patient Data Analysis -The patient's case history, its structure and use in evaluation of drug therapy, Communication skills including patient medication history interview, patient counseling.

UNIT – 2

Daily Activities Of Clinical Pharmacists -Drug therapy monitoring (Medication chart view, clinical review, TDM pharmacist interventions. Drug utilization evaluation (DUE) and review (DRU). Quality assurance of clinical Pharmacy services, Prescription auditing and medication errors and monitoring

UNIT – 3

Clinical Pharmacokinetics -Physiological determinants of drug clearance and volumes of distribution. Renal and non-renal clearance. Estimation and determinants of bioavailability. Calculation of loading and maintenance doses. Dose adjustment in renal failure, hepatic dysfunction, geriatric and paediatric patients.

UNIT – 4

Pharmacoepidemiology, Pharmacoeconomics & Pharmacovigilence.

Clinical trials: Introduction, types, Phases, essential features, experimental design, essential clinical trial documents, Informed consent document, audit of clinical trial, clinical trial team, patient recruitment, duties of Principle Investigator, Institutional ethical committee(IEC)

UNIT – 5

Research Design And Conduct Of Clinical Trials- Research support including planning and execution of clinical trials. Guidelines for good clinical research practice and declaration of Helsinki & Ethical requirements. Research design and study of any three drugs under Phase IV clinical trials.

Recommended Books :

1. Basic skills in interpreting laboratory data- Scott LT, American Society of Health System Pharmacists, Inc., USA.
2. Practice Standards and Definitions- The Society of Hospital Pharmacists of Australia, 1997.
3. Clinical Pharmacokinetics-Rowland and Tozer, Williams and Wilkins Publication.
4. Biopharmaceutics and Applied Pharmacokinetics-Leon Shargel, Prentice Hall Publication.
5. Relevant review articles from recent medical and pharmaceutical literature.
6. Parthasarathi G, Nyfort-Hansen K, Nahata M.C., A Text book of Clinical Pharmacy Practice –Essential Concepts and Skills, Orient Longman.
7. Davison's Principles and Practice of Medicine, ELBS/Churchill Livingstone.
8. Herfindal E.T. and Hirashman J.L., Clinical Pharmacy and Therapeutics Williams and Wilkins
9. John G.Wagner, "Pharmacokinetics for the Pharmaceutical Scientist".

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Phytoformulation (Elective-I)	Course Code: NA7660		
Credit: 2	L 2	T 0	P 0
Year: 4th	Semester: VII		

UNIT – 1

Study of traditional formulations as per Ayurvedic Formulary of India and few dosage forms (modern) in the market

UNIT – 2

Shelf life study, protocols to study stabilization of herbal based products.

Approaches for both physical. Physico-chemical and chemical parameters of assessment at different stages, interpretation of data and its limitations.

UNIT – 3

A) Herbal Cosmetics: Raw materials of herbal origin used in cosmetics: Oil, Waxes, Gums, Hydro-perfumes, protective agents, bleaching Agents, preservatives, Anti oxidation agents.

B) Formulation aspects incorporating herbal extracts in various preparations: Deodorants, Anti-perspirants, Hair care preparations, skin care preparations, dental care preparations.

UNIT – 4

Design of Ayurvedic dosage form and their evaluation: Solid, liquid and semi solid dosages forms. (Any four Ayurvedic formulation for each type).

UNIT – 5

Research: Needs, areas and current on going research. Application of pharmacy concepts, analytical methods and clinical evaluation techniques in herbals.

Recommended Books:

1. Quality Control of Herbal Drugs by Pullok K. Mukharjee, 1st Edition, Business Horizons Pharmaceutical Publisher, New Delhi, 2002.
2. Indian Herbal Pharmacopoeia, vol. 1 & 2, RRL, IDMA, 1998, 2000 (Current Edition)
3. Standardization of Botanicals by V.Rajpal, Vol.1, Eastern Publisher, New Delhi
4. PDR for Herbal Medicines, 2nd edition, medicinal economic company, New Jersey, 2000.
5. Poucher: "A Text Book of Cosmetics",
6. Herbal Drug Industry by R.D. Choudhary, 1st edition, Eastern Publisher, New Delhi
7. Trease and Evans Pharmacognosy by W C Evans, 15th Edition W.B Saunders E

Course Structure & Syllabus of B.Pharm. Applicable for 2013-2017 Batch

Course Title: Industrial Manufacturing Pharmacy (Pharmaceutics-IX)	Course Code: NA8010		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

UNIT-I

Pilot Plant, Scale up Techniques: Introduction, Objectives of the Pilot Plant, Importance of the Pilot Plant, Pilot plant design for tablets, Pilot plant scale-up techniques for capsules, Pilot plant scale-up techniques for Parenterals

UNIT-II

Technology Transfer involved in different dosage forms: importance of technology transfer, Technology Transfer Process, Reasons & factors influencing technology transfer, drivers and barriers, steps involved in technology transfer and to identify policy approaches for barriers.

UNIT-III

Elements Of Validation, Validation Master Plan, Reasons for validation, Pharmaceutical Process Validation, Equipment Validation and Product Validation, Regulatory Basis for Process Validation.

UNIT-IV

Requirements for the manufacturing of Solid, Liquid and Semisolid Dosage Form as per FDA & USFDA.

UNIT-V

Automation and control In pharmaceutical Industries: Advantages, General Automatic Control System, Automatic Controller, Computer Integrated Systems, Control Process Measurement, Automation in Solid & Liquid Dosage Manufacturing.

Reference Books:

1. Textbook of Industrial Pharmacy. Hiremath Shobha Rani - 2008 - 448 pages
2. Remington: The Science And Practice Of Pharmacy. David B. Troy, Joseph Price Remington, Paul Beringer - 2006 - 2393 pages
3. Challenges and trends in industrial pharmacy: 50 years of ... Tom Sam, Beta Communicaties (Den Haag), Industrial Pharmacy Section -2006 - 66 pages
4. The Theory and practice of industrial pharmacy. Leon Lachman, Herbert A.Lieberman, Joseph L. Kanig - 1986 - 902 pages
5. Automation of pharmaceutical operations: Supplement David J. Fraade- 1985 – Page - 103

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmaceutical Jurisprudence (Pharmaceutics-X)	Course Code: NA8020		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

Current Acts & Rules with Amendments relevant to Drugs and Pharmaceuticals are required for following :

UNIT-I

- Pharmaceutical Legislations – A brief review
- Drugs and Pharmaceutical Industry – A brief review.
- Pharmaceutical Education – A brief review
- Pharmaceutical Ethics – A brief review
- Pharmacy Act

UNIT-II

An Elaborative Study of current Rules and Amendments for Following :-

- Drugs and Cosmetics Act and rules - Manufacturing , distribution and marketing , approval of manufacturing and quality control chemist, Schedules (M, Y, L1, P)
- Drugs Price Control Order

UNIT-III

A Study of following Acts with Special Reference to current Provisions for following.

- Medicinal & Toilet preparations (Excise duties Act)- relevant to drug and pharmaceuticals
- Poisons Act
- Medical termination of Pregnancy Act & Rules

UNIT-IV

A Study of following Acts with Special Reference to current Provisions for following.

- Narcotic Drugs & Psychotropic Substances Act & Rules.
- Drugs and Magic remedies (Objectionable Advertisements) Act
- Patents Act, Trade mark and copyrights acts.- main provisions

UNIT-V

- U.S Food and Federal D&C Act – CFR -21, CGMP; EuGMP ,WHO, Orange book
- Introduction to ICH Guidelines, Legal requirement as per D &C rules and rules of importing countries for parenterals
- Good HouseKeeping Practices and GLP

Recommended Books:

- Mittal B.M, Textbook of Forensic Pharmacy, National Book Centre, Dr. Sundari Mohan Avenue, Calcutta.
- Relevant Acts & Rules Published by the Govt. of India.
- Jain N.K, A Textbook of Forensic Pharmacy, Vallabh Prakashan, New Delhi.
- Singh, Harkishan “History of Pharmacy in India – Vol. I, II & III” VallabhPrakashan.

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Instrumental Analysis (Pharmaceutical Analysis-III)	Course Code: NA8030		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

Study of Theory, Instrumentation, Applications and Interpretation of Data of following:

UNIT-I

UV-Visible Spectrophotometry-Theory, Instrumentation and Applications of Ultraviolet and Visible Spectrophotometry

UNIT-II

Infrared Absorption-Spectroscopy Basic principles, Instrumentation and Applications of Infrared Absorption Spectroscopy, FTIR and its interpretation.

UNIT-III

Nuclear Magnetic Spectroscopy-An introduction to the theory of ¹H-NMR, ¹³C-NMR and Solid NMR chemical shift, spin-spin coupling, shielding & deshielding Applications of NMR spectroscopy and its interpretation

UNIT-IV

Mass Spectrometry - LCMS, GCMS Introduction to mass spectra, instrumentation, applications and its interpretation, Types of peak in mass spectra, fragmentation pattern of some simple compounds. Interpretation of any Four API

UNIT-V

Chromatographic Techniques-Basic principles, Instrumentation and Applications of Gas Chromatography (GC) High Performance Liquid Chromatography (HPLC), UPLC

Study of Standardisation of Lab Chemicals

List of Experiments (NA8110)

1. Pharmacopoeial Analysis of any 3 API and dosage forms by UV and HPLC method
2. Interpretation of spectra data (Mass NMR, IR, GC, LCMS) of any 3 API and synthetic polymer

Reference Books:

1. Pharmacopoeia of India, Ministry of Health, Govt. of India.
2. Beckett, A H and Stenlake, J.B, Practical Pharmaceutical Chemistry, Vol I and II, The Athlone Press of the University of London.
3. Willard H.H. and Merrit L. Jr and Dean J.A., Instrumental methods of Analysis Van Nostrand Reinhold, New York.
4. Silverstein RM & Webster FX, Spectrometric Identification of Organic Compounds, John Wiley & Sons.
5. Skoog V, Principles of Instrumental Analysis, Holler-Neimen.

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Medicinal Chemistry – II (Pharmaceutical Chemistry-VII)	Course Code: NA8040		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

Mode of action, uses, SAR of the following classes of drugs included in latest edition of Pharmacopoeia (Synthetic Procedures and Assay of individually mentioned drugs only)

UNIT-I

Steroids and related drugs: Special emphasis on Nomenclature of steroids

- (A) Androgens and Anabolic steroids – Testosterone
- (B) Estrogens and Progestogens – Progesterone, Estradiol
- (C) Adrenocorticoids – Prednisolone
- (D) Oral Contraceptives

UNIT-II

Introduction, Classification, Mode of action, uses, structure-activity relationship of the following classes of drug Synthetic procedures of individually mentioned drugs only). **Antibiotics-** Penicillin, Aminoglycosides , Tetracyclines, Cephalosporins, Chloramphenicol.

UNIT-III

Introduction, Classification, Mode of action, uses, structure-activity relationship of the following classes of drug Synthetic procedures of individually mentioned drugs only).

Antimycobacterial Agents: PAS,, Isoniazid, Dapsone Antibacterials – Sulphamethoxazole, Sulphadiazine, Sulphacetamide. Vitamins: Structure, Storage, Uses and their biochemical role in health promotion

UNIT-IV

Introduction, Classification, Mode of action, uses, structure-activity relationship of the following classes of drug Synthetic procedures of individually mentioned drugs only).

Antimalarials: Chloroquine, Primaquine

Antiamoebics: Metronidazole, Tinidazole Anthelmintics- Mebendazole

UNIT-V

Introduction, Classification, Mode of action, uses, structure-activity relationship of the following classes of drug (Synthetic procedures of individually mentioned drugs only).

Anti- HIV agents-Zidovudine

Antivirals – Amantadine, Acyclovir, Prostaglandins – Misoprostol, Carboprost.

Text Books:

1. Delgado J N and Remers W A R, Eds., Wilson And Giswold's Text book of Organic Medicinal Pharmaceutical Chemistry, J. Lippincott Co., Philadelphia.
2. Foye W C, Principles of Medicinal Chemistry, Lea & Febiger, Philadelphia.
3. Wolff ME, Ed. Burger's Medicinal Chemistry, John Wiley & Sons, New York.
4. Harkrishan and Kapoor, V.K., Organic Pharmaceutical Chemistry, Vallabh Prakashan, Delhi.
5. Patrick G L. Medicinal Chemistry, Oxford University Press NY
6. Vardanayan R. Synthesis of Essential Drugs, Academic press an imprint of Elsevier
7. Pharmacopoeia of India, Ministry of Health, Govt. of India.
8. Razdan B.K. Medicinal Chemistry, CBS Publication, New Delhi
9. Application of soil survey in Irrigation Water Management, Publication no. 21, WALMI, Aurangabad (Maharashtra).

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Industrial Psychology	Course Code: NA8050		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

UNIT-I

INTRODUCTION TO INDUSTRIAL PSYCHOLOGY

1. Definitions, History & Scope of Industrial Psychology.
2. Major influences on Industrial Psychology-
3. Classical Approaches (Scientific Management)
4. Neo-Classical Approaches (Hawthorne Experiments)

UNIT-II

INDIVIDUAL BEHAVIOR AT WORKPLACE

1. Emotional Quotient
2. Job Satisfaction–Job related attitude: Job Satisfaction; Satisfaction with regards to pay and supervision,
3. Measuring Job Satisfaction: Job Descriptive Index, Minnesota Satisfaction Questionnaire.
4. Relationship of Job Satisfaction with Productivity, Absenteeism and Attrition.
5. Motivation-Meaning and Concept of Motivation,
6. Theories of Motivation; Need Theories (Maslow McClelland and Herzberg). Cognitive Theories (Goal Setting Theory, Self-Efficacy Theory).

UNIT-III

WORK ENVIRONMENT

1. Organizational Culture- Meaning and Types, Influence of Organizational Culture on Employees.
2. Leadership- Nature, Style and Approaches to Leadership
3. Group dynamics
4. Change Management

UNIT-IV

PERFORMANCE MANAGEMENT

1. Job Analysis and Learning,
2. Training and Development- Objectives and Needs, Training Process
3. Methods of Training, Tools and Aids, Evaluation of Training Programs.
4. Methods of Performance Appraisal

UNIT-V

STRESS AND CONFLICT MANAGEMENT

1. Stress Management- Meaning, Causes, Types,
2. Work and Mental Health; Fatigue. Boredom, Accidents and Safety,
3. Everyday Stress and its management-Refuting Irrational Ideas, Rational Emotive Behavioral Therapy, Goal Setting and Time Management, Facing Worry and Anxiety.
4. Conflict–Definition, Traditional Vs. Modern view of conflict,
5. Types of Conflict – Intra personnel, Interpersonal, Organizational, Constructive and Destructive Conflict, Conflict Management

Text Book:

1. Miner J.B. (1992) Industrial/Organizational Psychology. N Y: McGraw Hill.

Reference Books:

1. Blum & Naylor (1982) Industrial Psychology. Its Theoretical & Social Foundations CBS Publication.
2. Aamodt, M.G. (2007) Industrial/Organizational Psychology: An Applied Approach (5th edition) Wadsworth/ Thompson: Belmont, C.A.
3. Aswathappa K. (2008). Human Resource Management (fifth edition) New Delhi: Tata McGraw Hill.
4. Robbins, S.P. & Sanghi, S. (2009). Organizational behavior (11th ed.). New Delhi: Pearson Education.
5. Schultz, D. and Schultz, S. E. (2006). *Psychology and work today*. 8th ed. N.D.: Pearson Education

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Novel Drug Delivery Systems (<i>Elective</i>)	Course Code: NA8910		
Credit: 4	L 3	T 0	P 0
Year: 4th	Semester: VIII		

UNIT-I

Theory of controlled release drug delivery systems. Release and diffusion of drugs from C.D.D.S., General methods of design and evaluation of C.D.D.S.

UNIT-II

Carriers for drug delivery systems, Prodrugs, Physical, chemical and biomedical engineering approach to achieve controlled drug delivery.

UNIT-III

Transdermal drug delivery systems: Theory, formulation and evaluation, iontophoresis. Implants and inserts: Types, design and evaluation methods, Osmotic pumps.

UNIT-IV

Targeted Drug delivery systems: Concept of drug targeting, importance in therapeutics, methods in drug targeting, drug immobilization techniques, nanoparticles, liposomes, niosomes, pharmacosomes and resealed-erythrocytes.

UNIT-V

Advances in drug delivery systems:- An Introduction to buccal, nose to brain, ocular, pulmonary colonic delivery, transmucosal and stemceuticals, Trans soft palatal drug delivery and trans ungual drug delivery, Gastroretentive drug delivery system

Recommended Books:

1. Julian, Drug Delivery Systems.
2. Robinson and Vincent, Controlled Drug Delivery.
3. Robinson, Sustained and Controlled Drug Delivery Systems.
4. Noxon, Microencapsulation.
5. Chien, Novel Drug Delivery Systems.
6. Deasy, Microencapsulation and Related Processes.
7. Gutcho, Microencapsulation and Related Processes.
8. Lisbeth, Illum & Davis, Polymers in Controlled Drug Delivery.
9. Ghosh, Premamoy "Polymer Science & Technology".

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmaceutical Marketing (<i>Elective</i>)	Course Code: NA8920		
Credit: 4	L 3	T 0	P 0
Year: 4th	Semester: VIII		

UNIT-I

Principles of marketing management, Introduction to pharmaceutical marketing, Identification of the marketing, Market behaviour, Prescribing habits of physician, Patient motivation, Market analysis.

UNIT-II

Market Research: Measuring & Forecasting Market Demand - Major concept in demand measurement, Estimating current demand Geo-demo- graphic analysis. Estimating industry sales. Market share and future demand. Market segmentation & Market targeting.

Drug development and the marketing research interface, Diversification and specialization, Marketing generic drugs..

UNIT-III

Economic and competitive aspects of pharmaceutical industry- Advertising, Detailing, Retail competition, International marketing.

UNIT-IV

Distribution channels in pharmaceutical marketing – Manufacturer, Wholesaler, Retailer, Hospital & Government agencies, Selection of stockists and distributors

UNIT-V

Controls: Internal control and external control.

Recommended Books:

1. Smith, Mickey C, "Principles of pharmaceutical marketing", CBS Publishers & Distributors.
2. Kotler, Philip "Marketing Management". Pearson Education Asia.

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Pharmaceutical Packaging (<i>Elective</i>)	Course Code: NA8930		
Credit: 4	L 3	T 0	P 0
Year: 4th	Semester: VIII		

UNIT-I

Concepts in pharmaceutical packaging. Package systems, package design research, package design for international transit

UNIT-II

Packaging materials with special reference to polymers, metals, glass and plastics, control of packaging materials and their specifications, Blister and strip packaging materials, their testing and specifications including microbiology

UNIT-III

Testing of containers & closures, Pharmacopoeial tests and specifications, Defects in packages. Stability of package and packaging material Ancillary materials used in packaging, their design and specifications

UNIT-IV

Sterilization of packaging materials, post-sterilization testing Packaging of Parenterals, Ophthalmics, aerosols and testing Corrugated fiber board materials, Printing requirements, label and leaflets preparation, Legal requirement as per D & C rules and rules of importing countries, testing of packaging materials and their transit worthiness

UNIT-V

Mechanization of packaging operation, use of bar codes and controls on-inline packing, testing of finished packs as per ICH guidelines , packaging materials and product mix-up, their investigations and corrective & punitive action (CAPA)

Recommended Books:

1. Ross, Packaging of Pharmaceuticals.
2. Joseph D.O. Brien, Medical Device Packaging Handbook.
3. Griffin, Drug and cosmetic Packaging.
4. Barail, Packaging Engineering.
5. Harburn, Quality-Control of Packaging Materials in Pharmaceutical Industry.
6. Kac Chensney, Packaging of Cosmetics and Toiletries.
7. USP
8. BIS specifications

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Computer Aided Drug Design (CADD) [Elective]	Course Code: NA8640		
Credit: 4	L 3	T 0	P 0
Year: 4th	Semester: VIII		

UNIT-I

Computer Assisted Drug Design (Cadd) And Chemometrics :- Explanation of some basic terms , Pharmacophore, Lock-Key principle and induced fit theory , Molecular Recognition and Molecular Docking ,Solvent modeling - the role of water The dynamic aspect of modeling ,Origin and current status ,Multivariate Data , Definitions Organization and classification of data ,Preprocessing ,Distances between objects , Latent variables , Linear Methods ,Projection of multivariate data ,Principal component analysis (PCA), Multiple linear regression (MLR) and principle component regression, Partial least squares method (PLS)

UNIT-II

2d-Quantitative Structure-Activity Relationships (2d-Qsar) Definition ,QSAR methodology Basic concepts of QSAR 1 Molecular descriptors , Electronic parameters , Polar interactions, Steric paramters, Topological paramters ,Quantum-chemical descriptors ,Biological parameters, 2D-QSAR in drug design , Validation of QSAR models ,Conclusions

UNIT-III

3d-Qsar; Comparative Molecular Field Analysis (Comfa) And - Similarity Analysis (Comsia) 3-QSAR 11/1 Assumptions in 3D-QSAR, CoMFA methodology Steps of a CoMFA analysis ,Pharmacophore hypothesis and alignment , Superposition of all molecules , Box, Grid size and 3D field calculations , Derivation of the CoMFA model , CoMFA coefficient maps Validation of results An example: CBG and TBG binding affinities of steroids , CoMFA application in drug design, overview

UNIT-IV

CADD: METHODS and STRATEGIES Lead discovery ,Irrational drug design and combinatorial chemistry, Computer Assisted Drug Design, Fundamentals and Application ,Virtual screening Structure-based ligand design: Pharmacophore generation ,Structure-based ligand design , Determination of a pharmacophore ,The active analog approach (AAA) ,Ensemble distance geometry

UNIT-V

PROTEIN MODELING The Protein Data Bank, Relationship between sequence and 3D structure of a protein Alignment of protein sequenc, Needleman-Wunsch alignment method,Multiple sequence alignments, Homology modeling of proteins ,Construction of the core ,Construction of loops and turns Construction of the Side chains ,Refinement of the homology model ,Prediction of protein structures by threading, Comparison of various strategies in homology modeling ,Protein folding

Recommended Books:

1. E.J, Ariens: Drug Design, Academic Press, New York (1975).
2. S.H. Salkovisky, A.A. Sinkula and S.C. Valvani, Physical Chemical Properties of Drugs, Marcel Dekker Inc. New York.
3. M.E. Wolff, Burger's Medical Chemistry, John Willey and Sons, New York.
4. R.F, Doerge, Wilson and Gisvold's Text Book of Organic Medicinal and Pharmaceutical Chemistry, J. Lippincott Co, Philadelphia.
5. Olson, Edward C "Computer Assisted Drug Design (American Chemical Society).
6. Burger A "A guide to chemical basis of Drug Design "John Wiley & Sons".
7. Thomas J.Perun "Computer aided Drug Design methods Applications".

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Advanced Clinical Pharmacy (<i>Elective</i>)	Course Code: NA8950		
Credit: 4	L 3	T 0	P 0
Year: 4th	Semester: VIII		

UNIT-I

Introduction to stem cell biology & its implication in modern medicine. Recombinant DNA technology with reference to insulin.

UNIT-II

Basic pathology of bacterial and viral infections, Sensitivity screening for common pathogenic micro-organisms, its significance, Superbugs, resistance in disease states and selection of appropriate anti-microbial regimens.

UNIT-III

Rational prescribing and prescription monitoring. Therapeutic and toxic potential of OTC products. Drug information services.

UNIT-IV

Concept of gene therapy, Antisense therapy, basic concepts, mechanism of antisense therapy, examples of antisense therapy for treatment of different disease

UNIT-V

Case study and its interpretation of any 5 most common diseases (Cancer, Diabetes, Hypertension, Peptic Ulcer and Asthma) and their treatment and prevention.

Recommended Books:

1. Pathologic basis of diseases- Robins SL, W.B. Saunders publication.
2. Pathology and therapeutics for pharmacists: a basis for clinical Pharmacy Practice.
3. Green and Harris, Chapman and Hall Publication.
4. Clinical Pharmacy and therapeutics- Eric Herfindal, Williams and Wilkins Publication.
5. Applied Therapeutics: the clinical use of drugs. Lloyd Young and Kota-Kimble MA.
6. Avery's drug treatment, Adis international Limited.
7. Relevant review articles from recent medical and pharmaceutical literature.
8. Hospital Pharmacy – Hassan WE. Lee and Febiger publication.
9. Textbook of hospital pharmacy – Allweed MC and Blackwell.
10. Avery's Drug Treatment, Adis international limited.
11. Evidence based medicine: How to practice and teach EBM. Sharon E Straus, 3rd Ed. Churchill Livingston.
12. Basic skills in interpreting laboratory data – Scott LT, American Society of Health System Pharmacists, Inc., USA.
13. Practice Standards and Definitions. The Society of Hospital Pharmacists of Australia.
14. Clinical Pharmacokinetics – Rowland and Tozer, Williams and Wilkins Publicaiton.
15. Biopharmaceutics and Applied Pharmacokinetics – Leon Shargel, Prentice Hall publication.
16. Relevant review articles from recent medical and pharmaceutical literature.

Course Structure & Syllabus of B.Pharm.

Applicable for 2013-2017 Batch

Course Title: Industrial Pharmacognosy (<i>Elective</i>)	Course Code: NA8960		
Credit: 4	L 3	T 0	P 0
Year: 4th	Semester: VIII		

UNIT-I

World wide Trade :

- Herbal crude drugs and extracts
- Herbal medicinal formulations
- Herbal nutraceuticals
- Herbal cosmetics and formulations.

UNIT-II

Quality assurance in Herbal Drug Industry. Concept of TQM., GMP, GLP and HACCP in Traditional System of Medicine.

UNIT-III

Herbal based industries: Types, scope and applications. Study of infrastructure for different types of industries involved in making standardized extracts and various dosage forms including traditional Ayurvedic dosage forms and modern dosage forms.

UNIT-IV

Design of Ayurvedic dosage forms Quality Assurance and Quality Control parameters for evaluation: solid, liquid and semi solid dosages forms. (Any two Ayurvedic formulations) for each type.

UNIT-V

Patents:

- Indian and International' patent laws, proposed amendments as applicable to herbal/natural products and processes; important points to be kept in mind while drafting and filing a patent.
- Plant breeders rights

Recommended Books:

- Quality Control of Herbal Drugs by Pullok K. Mukharjee, 1st Edition, Business Horizon Pharmaceutical Publisher, New Delhi, 2002.
- Indian Herbal Pharmacopoeia, vol. 1 & 2, RRL, IDMA, 1998, 2000 (Current Edition)
- Standardization of Botanicals by V.Rajpal, Vol.1, Eastern Publisher, New Delhi
- PDR for Herbal Medicines, 2nd edition, medicinal economic company, New Jersey, 2000.
- Poucher: "A Text Book of Cosmetics".
- Herbal Drug Industry by R.D. Choudhary, 1st edition, Eastern Publisher, New Delhi
- Trease and Evans Pharmacognosy by W C Evans, 15th Edition W.B Saunders E

	Elective-I	3	1	0	3.5
CA7110	Project Phase - II	0	0	4	2
CA7510	Industrial Training and Presentation	0	0	8	4
	Total				23.5

List of Elective-I for VII Semester

CA7610	Pre-stressed Concrete
CA7620	Ground Water Engineering
CA7630	Environmental Risk Assessment and Disaster Management

Year: 4th

Semester: VIII

Course Code	Course Title	L	T	P	Credit
	Open Elective	3	0	0	3
	Elective-II	3	1	0	3.5
	Elective-III	3	1	0	3.5
	Elective-IV	3	1	0	3.5
	Elective-V	3	1	0	3.5
CA8110	Project Phase - III	0	0	8	4
	Total				21

List of Elective-II, III, IV Courses for VIII Semester

CA8610	Hydraulic Structures
CA8620	Hydro Power Engineering
CA8630	River Engineering
CA8640	Water & Land Management
CA8650	Air & Water Pollution
CA8660	Environmental Management & Sustainable Development
CA8670	Seismology & Earthquake Engineering
CA8680	Advanced Structural Design
CA8690	Finite Element Analysis
CA8600	Traffic Engineering & Management
CA86A0	Advanced Highway Engineering
JA4610	Numerical Techniques

**Course Structure & Syllabus of
B.Tech – Civil Engineering
Applicable for 2013-2017 Batch
List of Open Electives (To be conducted in VIII Semester)**

Sl. No.	Branch	Subject Code	Name of Elective subjects
1	Physics	OA8710 OA8720	1. Nano Scale Science and Technology 2. Photonics Technology
2	EE	EA8710 EA8720	1. Non-Conventional Energy Resources 2. Instrumentation and Process control
3	ME	LA8710 LA8720	1. Entrepreneurship development 2. Quality Management
4	Civil	CA8710 CA8720	1. Environment and Ecology 2. GIS
5	CSE	DA8710 DA8720	1. Business Intelligence 2. Artificial Intelligence
6	IT	IA8710 IA8720	1. Multi-Media Technology 2. IT In Business
7	ECE	FA8710	1. Consumer Electronics
8	Humanities	HA8710 HA8720	1. Industrial Psychology 2. Human Values and Ethics
9	MBA	GA8710 GA8730 GA8740	1. Organizational Behavior 2. Digital Marketing 3. Financial Modeling with Spread sheet

Summary of the Credits

Year	Semester	Credit	Year Credit
First Year	I	24	45
	II	21	
Second Year	III	25	51
	IV	26	
Third Year	V	23.5	44.5
	VI	21	
Fourth Year	VII	23.5	44.5
	VIII	21	
Total			185

**Course Structure & Syllabus of
B.Tech – Civil Engineering
Applicable for 2013-2017 Batch**

Course Title: Engineering Maths-I	Course Code: MAT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT I: Matrices

8L

Elementary row and column transformation, rank of matrix, linear dependence, consistency of linear system of equations, Eigen values and Eigen vectors, Cayley-Hamilton theorem.

UNIT II: Differential Calculus

8L

Functions, Limits, Continuity, Differentiability, Leibnitz theorem, Partial differentiation, Euler's theorem, Expansion of functions of several variables, Extrema of functions of several variables, Lagrange's method of multipliers.

UNIT III: Infinite Series

6L

Introduction, sequences, series, convergence, series of positive terms, comparison test, Integral test, D'Alembert's Ratio test, Raabe's test, Cauchy's root test, Alternating series: Leibnitz rule, power series.

UNIT IV: Multiple Integrals

8L

Beta and Gamma functions, Double and Triple integrals, change of order of integration, change of variables, Dirichlet integral and its applications.

UNIT V: Vector Calculus

8L

Point functions, Gradient, Divergence and curl of a vector and their physical interpretation, line integral, surface integral, volume integral, Green's Theorem, Stoke's theorem, Gauss Divergence theorem.

2. E. Kreyszig : Advanced Engineering Mathematics, Wiley publication.
3. R. K. Jain & S. R. K. Iyenger: Advanced Engineering Mathematics, Narosa publication.
4. G. Prasad: Differential & Integral calculus, Pothishala publication, Allahabad.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Professional Communication	Course Code: HMT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

OBJECTIVES:

- 1) To strengthen the Professional Communication skills of upcoming professionals.
- 2) To make them aware about the new forms and trends of business and technical writings.
- 3) To develop the students' interpersonal skills in order to ensure his / her optimum performance as an employee.
- 4) To prepare students for facing the challenges of their professional lives in an increasingly globalized world.

Unit –I Professional Communication

8 Hours

1. Professional Communication: Interpretation, Process, Forms, Barriers and Overcoming Barriers.
2. Types of Communication-Verbal, Non-Verbal, Oral, Written, Formal, Informal.
3. Communication Levels (Intra personal, Interpersonal, Group, Public communication) and Communication Flow (Downward, Upward, Lateral and Diagonal flow).
4. Technical Writing-Meaning, Types and process of preparing a technical document. Acronyms, Jargons.
5. Understanding and Practice of Paragraph writing-Principles of paragraph writing (unity, coherence and logical development of the ideas)
6. Communication: Impact of internet on communication, communicating through computers.

Unit-II Business Communication

10 Hours

1. Business communication – Meaning, Type and Format.
2. Intra-office communication – Types (Face to Face communication, Telephonic conversation, Letters, Memorandum, E-mails, Notice, Memo, Agenda, Minutes.), advantages and disadvantages. various types of intra-office communication
3. Inter-office communication –Face to Face communication, Telephonic Communication-mails, Letters (Sales, Credit, Enquiry, Quotation, Order, Complaint and Adjustment Letter), advantages and disadvantages of various types of inter-office communication.
4. Job-Application Letter and Resume.

Unit-III Technical Proposal and Report

A. Technical Proposal –Types, Format, Preparation of Proposal.

5 Hours

- **For B.Tech students-**
Technical Proposal to organize a Technical Training Program, to develop new range of products, establish new laboratory, or start a new venture.
- **For B.Pharma students-**
Technical proposal to establish a new laboratory, to create new drug-composition, or to visit a super specialty Hospital.
- **For B.Arch students-**
Technical proposal for an archeological site visit, or to construct new buildings.
- **For MCA students-**
Technical proposal to develop new software, or, to organize an induction program for the new entrants.
- **For MBA students-**

Proposal for establishment of a new department, for a new administrative system, or for new HR policies. **B.**

Technical Report –Types, Format, Preparation of Report.

5 Hours

- **For B.Tech students-**
Technical Report describing new machinery, a report on the sudden break-down in production unit, Annual Financial Report and market survey report for formulating new market strategy.
- **For B.Pharma students-**

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Technical Report based on the site-inspection of a drug manufacturing unit, Survey report on health awareness and self-medication.

- **For B.Arch students-**

Technical Reports based on a Site Inspection for geographical and geological aspects of a particular location. A report on the archeological survey of a monument.

- **For MCA students-**

Technical Report based on function of new technology (software or hardware), Technical Reports on Client's need for a Payroll management system/ Hospital management system.

- **For MBA students-**

Preparation of Annual Report of the organization, preparation of departmental reports and report based on the study of a successful organization.

Unit-IV Soft-Skills

8 Hours

1. Non-Verbal Communication -Kinesics, Oculistics, Vocalics, Proxemics, Chronemics.
2. Interpersonal Skills, Social-Skills
3. Personality-Meaning and Types, Attitude
4. Self-Management, Emotional Quotient, Time management, and Stress-Management.
5. Image-building / Impression –Management.
6. Leadership and Team-Building and Conflict.

Language-Lab

12 Labs

1. Stress, Intonation and Rhythm.
2. Overcoming Mother-Tongue Influence.
3. JAM session, Debate, Extempore.
4. Role-play, Information Exchange / Gap Activity.
5. Presentation Skills.
6. Group-Discussion Skills.
7. Preparing for interview.

Text Books:

12. Essentials of Business Communication, Rajendra Pal and J. S Kothari- Sultan Chand

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Computer Fundamental & C Programming	Course Code: CST101		
Credit: 2	L 2	T 0	P 0
Year: 1 st	Semester: I		

UNIT: 1

5L

Introduction to the Digital Computer (brief description about its components), Characteristics of computer system, Introduction to operating systems(DOS, Linux, Windows), function and types of operating system, Number Systems and conversion methods (Binary, hex, octal), Concept of flow chart, Write & execute the first C programme, C Data Types & Operators.

UNIT 2:

4L

Conditional Program Execution: Applying if-else and nested if-else statements, switch-case statements, restrictions on switch values, use of break & default with switch.

Program Loops & Iteration: Uses of loops (while, do-while and for), use of continue statement.

Function: function prototypes, call by value and call by reference function, recursion.

UNIT 3:

4L

Arrays: Insertion and deletion in single dimensional array, linear searching, sorting (bubble sort), Strings.

Structures: Purpose and uses of structures, declaring structures, array of structures

TEXT BOOKS:

1. Yashwant Kanetkar, "Let us C", BPB Publications, 2nd Edition, 2001.
2. Herbert Schildt, "C: The complete reference", OsbourneMcgraw Hill, 4th Edition, 2002.
3. P.K. Sinha "Computer Fundamentals" B.P.B Publication

REFERENCE BOOKS:

1. Raja Raman, "Computer Programming in C", Prentice Hall of India, 1995.
2. Kernighan & Ritchie, "C Programming Language", The (Ansi C Version), PHI, 2nd Edition.
3. Byron Gottfreid "Schaum's Outline of Programming with C"

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

List of Programs in ‘C’ Lab (CSP151)

Lab 1	(a) WAP to perform simple arithmetic operations using different data types. (b) WAP to show swap of two no's without using third variable.
Lab 2	(a) WAP to find the roots of a quadratic equation. (b) WAP to check the number is odd or even and find the sum of all odd and all even separately.
Lab 3	(a) WAP to find out whether the given number is prime or not. Find sum of all prime upto N. (b) WAP to reverse a given number and check the palindrome status.
Lab 4	WAP to print corresponding days of a week using switch case.
Lab 5	WAP to find and generate the Armstrong number.
Lab 6	WAP to print pattern triangle like Floyd's, Pascal, pyramid triangle.
Lab 7	(a) WAP to interchange two values using call by value and call by reference. (b) WAP to print factorial of a number using recursion & without using recursion.
Lab 8	WAP to print Fibonacci series. (a) Without using function (b) using function (c) using recursion
Lab 9	(a) WAP to print an array and find greatest/smallest element of an array. (b) WAP to perform linear searching in an array.
Lab 10	(a) WAP to insert/ delete element from an array. (b) WAP to sort the array's element using Bubble sort.
Lab 11	WAP to perform the following string functions. a. Strlen b. strcmp c. strcpy d. strcat e. strlenr f. strupr
Lab 12	Declare a suitable structure of a college and print the name and DOB of the student have scored more than sixty percent marks in end semester exam.
Lab 13	Declare a suitable structure for an organization and print all the names of employees having salary more than Rs.1000.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Introduction to Electrical Engineering	Course Code: EET101
Credit: 3	L T P 3 0 0
Year: 1st	Semester: I

UNIT I – D.C. NETWORK THEORY

Review of basic circuit theory concepts, Mesh and Nodal analysis, Superposition theorem, Thevenin's theorem, Norton's theorem, Maximum power transfer theorem, Star–delta transformation, Magnetic Circuits.

UNIT II – A.C. CIRCUITS & MEASURING INSTRUMENTS

Single Phase A.C.: Phasor representation of voltage and current, A.C. circuit behavior of resistance, inductance, capacitance & their combination in series and parallel, Power triangle, Power factor, Concept of series & parallel resonance.

Three Phase A.C.: Star – delta connections, Relation between line and phase quantities, three phase power and its measurement, What is 3 phase 4 wire and 3 phase 5 wire system?

Measuring Instruments: Construction and principle of voltage and current measuring instruments.

UNIT III – TRANSFORMERS

Principle of operation, Types of construction, Phasor diagram, Equivalent circuit, Efficiency and voltage regulation of single phase transformer, O.C. and S.C. tests.

UNIT IV – D.C. & SYNCHRONOUS MACHINES

D.C. Machines: Construction and working principle of d.c. generator and d.c. motor, Types of d.c. machines, E.M.F. equation, Torque equation, Magnetization and load characteristics, Losses and efficiency, Need of starter in d.c. motors.

Synchronous Machines: Construction and Principle of operation of Alternator and Synchronous Motor.

UNIT V – INDUCTION MOTORS

Three Phase Induction Motors: Principle of operation of 3- ϕ induction motor, Types of 3- ϕ induction motor, Need of starters in 3- ϕ induction motors, Slip – torque characteristics,

Single Phase Induction Motor: Principle of operation of single phase induction motor, Methods of starting of single phase induction motor.

Reference Books

1. V. Del Toro. "Principles of electrical Engineering, "Prentice hall International.
2. W.H. Hayt & J.E. Kemmerly," Engineering circuit Analysis, "McGraw Hill.
3. I. J. Nagrath, "Basic Electrical Engineering," Tata Mc. Graw Hill.
4. A. E. Fitzgerald, D.E., Higginbotham and A Gabel, "Basic Electrical Engineering" McGraw Hill.
5. H. Cotton, "Advanced Electrical Technology" Wheeler Publishing.

Basic Electrical Engineering Lab (EEP-151)

(Any Ten)

1. Verification of Network Theorems.
2. Study of diode characteristics. Study of phenomenon of resonance in RLC series circuit.
3. Measurement of power in a three phase circuit by two wattmeter method.
4. Measurement of efficiency of a single phase transformer by load test.
5. Determination of parameters and losses in a single phase transformer by OC and SC test.
6. Study of characteristic of DC Motor.
7. Study of characteristic of AC Motor.
8. DC generator characteristics.
9. 10. Speed control of dc shunt motor.
10. Study running and reversing of a three phase induction motor.
11. Study of a single phase energy meter.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Introduction to Electronics & Communication	Course Code: ECT101						
Credit: 3	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1st	Semester: I						

UNIT 1: Fundamental of Semiconductors

10 Lectures

Energy bands in semiconductors, intrinsic and extrinsic semiconductors, Fermi Level in Intrinsic and Extrinsic semiconductor, Carrier transport in semiconductors: diffusion current, drift current, mobility, Hall Effect and resistivity. Generation and recombination of carriers.

UNIT 2: Application of Low Power and High Power Diodes

10 Lectures

Diode circuits: Construction, Junction diode characteristics, Half and full wave rectifiers - Expression for efficiency and ripple factor - Bridge rectifier – π Filter circuits, Clipper, Clamper and multipliers using diodes, Zener Diode Characteristics - Regulated power supply using Zener diode.

UNIT 3: Transistor fundamentals

8 Lectures

Transistor circuits: Characteristics of a transistor in CB, CE and CC modes - Relatively merits - Biasing of Transistors - Load Line and operating point concept (both AC and DC). Construction and working of JFET and MOSFET.

UNIT 4: Digital fundamentals and Introduction to Signals

8 Lectures

Basic logic gates: AND, OR, and NOT – implementation of all gates using Universal gates, Number Systems conversions, Boolean algebra, K-map (upto 4 variables). Source of Information, Types of Signals.

UNIT 5: Basics of Communications & Instrumentation

9 Lectures

Communication Systems, Communication Channels, Need of modulation, Types of modulations (Wave shapes and final expression only), Study of Piezoelectric, PMMC, LVDT and Strain Gauge transducers and their classifications and display device (7 segment) only.

Reference Learning:

Unit 1. Electronics Devices and Circuits, Millman and Halkias, Tata McGraw Hill, 4th ed.

Unit 2 & 3. Electronic Devices and Circuit Theory, Robert L. Boylestad, Prentice Hall Higher Edu. 2000.

Unit 4. Digital Design, Morris Mano, PHI

Unit 4. Modern Digital & Analog Communications, B. P. Lathi, OUP

Unit 5. Electronic Communication Systems, John Kennedy, Tata McGraw Hill, 4th ed.

Unit 5. Electronic Instrumentation - H. S. Kalsi

**Course Structure & Syllabus of
B.Tech – Civil Engineering
Applicable for 2013-2017 Batch
ECP-151 ELECTRONICS ENGINEERING LAB.**

1. To identify and Study of the various component and Devices of electronics with their specification (CRO, Function Generator, Multimeter, Power Supply, resistor, capacitor, inductor, ICs, LED, potentiometer etc.)
2. To study the V-I characteristics of PN diode and Zener diode.
3. To find the efficiency of Rectifiers and ripple factor of capacitive and non-capacitive half wave and full wave rectifier.
4. To Study and Verify clipper and clamper with biased circuits.
5. To find the characteristics of CB and CE amplifiers.
6. Determine the characteristics of FET.
7. To find out the power energy of various periodic and non-periodic signals.
8. To verify the logic gates using diodes.
9. Study and observations of AM & FM Waveforms.
10. Study of various transducers (Strain Gauge).

**Course Structure & Syllabus of
B.Tech – Civil Engineering
Applicable for 2013-2017 Batch**

Course Title: Workshop Practice	Course Code: MEP152		
Credit: 2	L 1	T 0	P 2
Year: 1st	Semester: I		

List of Experiments

1. Carpentry: To make a T-Lap joint with soft wood.
2. Arc Welding: To make a Lap joint with mild steel flat by arc welding process.
3. Gas Welding: To make a Lap joint of M.S. sheet with gas welding process.
4. Fitting: To make a plug and socket joint with M.S.flat.
5. Machine Shop: To turn a M.S. rod on lathe to prepare a turning specimen.
6. Sheet Metal: To make a square tray with G.I. sheet.
7. Study of Foundry and Forging tools and equipments.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Chemistry and Environment	Course Code: TCY101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT – I

Introduction to Environment and Chemistry

Chemical Evolution, Genesis of Environment, Components of Environment, Layers of atmosphere, Chemical composition and reactions of troposphere, Chemistry of Ozone Layer depletion.

UNIT – II

Water Chemistry

Water quality parameters (Physical, Chemical and Biological), CPCB and WHO standards for water, Measurement of parameters of water quality, Analytical tools for analysis of water quality, alkalinity, hardness and its determination (EDTA method only). Water softening processes – Lime – Soda process, Ion exchange method, boiler feed water, boiler problems-scale, sludge, priming and foaming, caustic embitterment and corrosion, their causes and prevention, Numerical problems on alkalinity and hardness.

UNIT – III

Environmental Pollution

Air Pollution: Types of pollutants, source, effects, sink and control of primary pollutants – CO, NO_x, HC, SO_x and particulates, Photochemical smog, Acid rain and Global warming – Process, National and International efforts to combat it.

Water Pollution: Water quality parameters – (BOD & COD), Classification of pollutants and their sources, waste water treatment – domestic and industrial, Ganga pollution and control.

Soil Pollution: Composition of soil, classification and effects of soil pollutants such as agro-chemicals (pesticides and fertilizer related problems), fly ash and their control.

Integrated Solid Waste Management: Classification of waste, Treatment & Disposal methods (Composting, sanitary land filling, incineration, recycling and reuse).

UNIT – IV

Energy Resources

Conventional Energy Sources – Coal and Petroleum, Refining, Fractional Distillation, Reforming, Cracking, Alkylation, Isomerisation, Hydro treating, Sulphur Recovery, Aromatization, Octane number, Cetane number, Aviation fuel, LPG, CNG, PNG, Energy Crises, Non-conventional Energy Sources – Hydro, Wind, Solar, Nuclear, Geo thermal and Biomass based.

UNIT – V

Eco-friendly Materials

Introduction to ecofriendly products and ECOMARK, Ecofriendly domestic appliances, Green Chemistry and Green Building, Organic foods, Biofuel, Biogas, Lignin, Bioplastics, Light weight plastic composites, Fuel cell, Organic Fuel Cells, hydrogen as a fuel and New lighting technologies: Organic Photo-voltaic, OLED and Organic Transistor.

Text Books:

1. Chemistry in Engineering & Technology (Vol I & II) (Latest ed.) By J.C. Kuriacose & J. Rajaraman, Tata McGraw-Hill Co, New Delhi.
2. Engineering Chemistry by O.G. Palanna, Tata McGraw-Hill Co, New Delhi.

Reference Books:

1. Atkins' Physical Chemistry by Peter W. Atkins and Julio de Paula, Oxford University Press.
2. Principles of Physical Chemistry (Latest ed.) By Puri, Sharma & Pathania.
3. Organic chemistry, Morrison and Boyd, Pearson Prentice Hall, 2011
4. Environmental chemistry, S.E. Manahan, 9th edition, CRC Press.
5. Textbook of polymer science by F.W. Billmeyer, Wiley India.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Physics	Course Code: PYT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT-I

(8) L

Interference:

Introduction, Coherent Sources, Analytical treatment of interference, Young's double slit experiment and its analysis, Conditions of Interference, Fresnel's Biprism, fringes with white light, Determination of wavelength of monochromatic light by using Fresnel's Biprism method, Displacement of Fringes, Interference in plane parallel thin film (reflected and transmitted light) and wedge shaped film(reflected light only), Newton's Rings, Determination of wavelength of monochromatic light and determination of refractive index of a liquid by using Newton's ring method.

UNIT-II

(8) L

Diffraction:

Introduction, Difference between Interference and diffraction, resultant of superposition of n simple harmonic coherent vibrations, Fraunhofer diffraction due to single slit: resultant intensity, conditions of maxima, minima, angular and linear width of central maximum, Double slit diffraction: resultant intensity, missing order, N-slit diffraction : resultant intensity, conditions of maxima and minima, missing orders, angular width of principal maxima, Diffraction grating: formation of spectra and missing order spectra in spectrum, dispersive power of grating, Resolving power, Rayleigh Criterion of resolution, Resolving power of plane transmission diffraction grating.

UNIT-III

(8) L

Polarization:

Polarised and unpolarised light and its pictorial representation, plane of polarisation and plane of vibration, Phenomenon of Double Refraction, positive and negative double refracting crystals, properties of ordinary and extra-ordinary Rays, Nicol Prism and its application as a polariser and analyser, Mathematical analysis of superposition of two linearly polarised light vectors, retardation plates – half wave plate and quarter wave plate, Production and detection of Plane, Circularly and Elliptically Polarized Light.

UNIT-IV

(10) L

Laser : Spontaneous emission, stimulate demission and stimulated absorption, Einstein's A and B Coefficients and relation between them, Principle of Laser Action, Construction and Working of He-Ne, Semiconductor Laser.

Introduction to Fibre Optics: Fundamental ideas about optical fiber, Types of fibers, Acceptance angle and cone, Numerical aperture.

Magnetic Properties of Materials: Basic Concept of Para-, Dia and Ferro-Magnetism, Phenomenon of Hysterisis

Magnetic Circuits: Introduction, magnetomotive force, magnetic field intensity, permeability of free space, reluctance, law governing magnetic circuits.

Superconductivity: Temperature dependence of resistivity in superconducting material, effect of magnetic field (Meissner effect), Type I and Type II superconductors.

UNIT V

(10) L

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Wave Mechanics:

Wave Particle Duality, de Broglie Concept of Matter Waves, Davisson and Germer experiment, Concept of wave packet, group and phase velocity, Heisenberg Uncertainty Principle and its applications viz. nonexistence of electron in nucleus, radius and energy of Bohr's first orbit, Schrödinger time independent and time dependent wave equation, Physical interpretation of wave function, Application of Schrodinger wave equation : Particle in a one dimensional box (eigen function and eigen values).

Science and Technology of Nanomaterial:

Introduction to Nanomaterial, Basic principle of nano science & technology, creation and use of Bulky Balls, structure, properties and use of Carbon nanotubes, applications of nanotechnology.

Reference & Text Books:

- | | | |
|---|---|------------------------------------|
| 1. Concepts of Modern Physics | - | Arthur Beiser (Mc-Graw Hill) |
| 2. Introduction to Special theory of Relativity | - | Robert Resnick - Wiely |
| 3. Fundamentals of Optics | - | Jenkins and White |
| 4. Optics | - | AjoyGhatak (TMH) |
| 5. Optics | - | Brijlal and Subrahmanyam |
| 6. Lasers: Fundamentals and applications | - | K. Thyagarajan, AjoyGhatak |
| 7. University Physics | - | Sears and Zeemansky |
| 8. Principles of Physics | - | Halliday, Resnick&Jearl Walker |
| 9. An Introduction to Quantum Mechanics | - | David. J. Griffith |
| 10. Introduction to Fiber optics | - | AjoyGhatak& K. Thyagarajan (TMH) |
| 11. Optical Fiber Communications | - | Keiser G. |
| 12. Nanomaterials- Synthesis, Properties and Applications | - | Edelstein A. A. and Cammaratta R.C |
| 13. Nanotechnology | - | T. Pradeep (Tata McGraw-Hill) |

PHYSICS LAB (PYP151)

List of Experiments

(At least six)

1. To determine the wavelength of monochromatic light by Newton's ring.
2. To determine the wavelength of monochromatic light with the help of Fresnel's biprism.
3. To determine the focal length of two lenses by nodal slide and locate the position of cardinal points.
4. To determine the specific rotation of cane sugar solution using bi quartz polarimeter.
5. To determine the wavelength of spectral lines using plane transmission grating.
6. To determine the specific resistance of the material of given wire using Carey Foster's bridge.
7. To determine the variation of magnetic field along the axis of a current carrying coil and then to estimate the radius of the coil.
8. To verify Stefan's Law by electrical method.
9. To calibrate the given ammeter using potentiometer.
10. To calibrate the give voltmeter using potentiometer.
11. To determine energy band gap of a given semiconductor material by p-n junction method.
12. To determine the viscosity of water by Poisseuille's method.

Note: Additional experiments may be added based on contents of syllabus.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Essentials of Mechanical Engineering	Course Code: MET101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT – I

9L

Introduction to Engineering: Difference between Science and Technology, history of wheel, introduction to prime movers, transmission system, belt, pulleys, gear system and nomenclature, braking system, Mechanism, lever mechanism, Working principle of power generation system, hydel power plant, thermal power plant and its main components.

Coplanar Force system: Resolution of force in two mutually perpendicular direction Free Body Diagram, Moment, Varignon's theorem, static equilibrium, Lami's Theorem, type of joints/Support, Type of load: point load, uniformly constant and varying loads, beam and its type.

UNIT – 2

7L

Engineering material and their properties: Details of hook's law, Proportional limit, Yield point, Yield Stress, Engineering strain, Engineering stress, True stress and Strain, Plasticity, Elasticity, Allowable Strength, Hardness, Ductility, toughness, Fatigue, creep, strain energy, Impact Strength, Young modulus of Elasticity, Bulk Modulus, Poission Ration and its relation in between.

Stress and strain: Normal stress and strain, principle of Superposition, Deformation in stepped and composite bar.

UNIT – 3

7L

Thermodynamics: Macroscopic & microscopic study point of view, System, Surrounding and Universe, Phase, Property, State, Path, Process, Cyclic and non-cyclic processes, Quasi static process, Reversible and irreversible processes , Thermodynamic equilibrium, Concept of continuum, Energy and its forms, Enthalpy, Zeroth law, Different temperature scales and theory of temperature and Pressure measurement.

UNIT – 4

8L

Laws of thermodynamics: Thermodynamic definition of work, Thermodynamic processes, Calculation of work in various processes and sign convention, Non-flow work and flow work, Joules' experiment, First law of thermodynamics, Internal energy and enthalpy, First law of thermodynamics applied to open systems, Steady flow energy equation and its applications, First law analysis for closed system (non flow processes), Limitations of first law of thermodynamics, PMM-I.

Statement of Second law of thermodynamics: Kelvin Planck's statement and Clausius statement and their equivalence.

UNIT – 5

9L

Power generation: Air standard cycle, IC Engine, Carnot cycle, Otto cycle, Diesel cycle, Important components of I.C.Engine, two stroke and four stroke engine, S.I. and C.I. engines, efficiency of Otto and diesel cycle

Basics of Heat Transfer: Concepts of the mechanisms of heat flows: conduction, convection and Radiation heat transfer application in engineering.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Reference Books:

1. Basu,A.R; A Text book of Engineering Mechanics(Applied Mechanics);2003 Edition; Dhanpat Rai & co.(p) Ltd, Delhi.
2. Chandramouli, P.N; Engineering Mechanics; Second Printing; PHI Learning Private Limited, Delhi; 2013.
3. Rajput, R. K; Material Science; S. K. Kataria & Sons, New Delhi.
4. Dubey, N. H; Engineering Mechanics, Statics and Dynamics; First reprint; McGraw Hill Education (India) Private Limited, New Delhi, 2013.
5. Ratan, S.S; Theory of machines; Second Edition; Tata McGraw Hill Publishing Company Limited, New Delhi.
6. Nag.P.K.; Engineering Thermodynamics; 3rd Edition; Tata McGraw Hill Publishing Company Limited, New Delhi.

8. Kumar.D.S; Basic of Mechanical Engineering; S. K. Kataria & Sons, New Delhi.

Essentials of Mechanical Engineering (MEP-151)

List of Experiments

1. Tensile test
2. Impact test
3. Hardness test
4. Pulley experiment
5. Experiment on conduction heat transfer
6. Demonstration of Impulse and reaction turbine
7. Study of 4s and 2S engine petrol Engine
8. Study of 4s and 2S engine Diesel Engine
9. Study of refrigerator and air conditioning

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Professional Communication	Course Code: HMT101						
Credit: 3	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1st	Semester: II						

OBJECTIVES:

1. To strengthen the Professional Communication skills of upcoming professionals.
2. To make them aware about the new forms and trends of business and technical writings.
3. To develop the students' interpersonal skills in order to ensure his / her optimum performance as an employee.
4. To prepare students for facing the challenges of their professional lives in an increasingly globalized world.

Unit –I Professional Communication

8 Hours

1. Professional Communication: Interpretation, Process, Forms, Barriers and Overcoming Barriers.
2. Types of Communication-Verbal, Non-Verbal, Oral, Written, Formal, Informal.
3. Communication Levels (Intra personal, Interpersonal, Group, Public communication) and Communication Flow (Downward, Upward, Lateral and Diagonal flow).
4. Technical Writing-Meaning, Types and process of preparing a technical document. Acronyms, Jargons.
5. Understanding and Practice of Paragraph writing-Principles of paragraph writing (unity, coherence and logical development of the ideas)
6. Communication: Impact of internet on communication, communicating through computers.

Unit-II Business Communication

10 Hours

1. Business communication – Meaning, Type and Format.
2. Intra-office communication – Types (Face to Face communication, Telephonic conversation, Letters, Memorandum, E-mails, Notice, Memo, Agenda, Minutes.), advantages and disadvantages. various types of intra-office communication
3. Inter-office communication –Face to Face communication, Telephonic Communication-mails, Letters (Sales, Credit, Enquiry, Quotation, Order, Complaint and Adjustment Letter), advantages and disadvantages of various types of inter-office communication.
4. Job-Application Letter and Resume.

Unit-III Technical Proposal and Report

A. Technical Proposal –Types, Format, Preparation of Proposal.

5 Hours

- **For B.Tech students-**
Technical Proposal to organize a Technical Training Program, to develop new range of products, establish new laboratory, or start a new venture.
- **For B.Pharma students-**
Technical proposal to establish a new laboratory, to create new drug-composition, or to visit a super specialty Hospital.
- **For B.Arch students-**
Technical proposal for an archeological site visit, or to construct new buildings.
- **For MCA students-**
Technical proposal to develop new software, or, to organize an induction program for the new entrants.
- **For MBA students-**
Proposal for establishment of a new department, for a new administrative system, or for new HR policies.

B. Technical Report –Types, Format, Preparation of Report.

5 Hours

- **For B.Tech students-**
Technical Report describing new machinery, a report on the sudden break-down in production unit, Annual Financial Report and market survey report for formulating new market strategy.
- **For B.Pharma students-**

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Technical Report based on the site-inspection of a drug manufacturing unit, Survey report on health awareness and self-medication.

- **For B.Arch students-**

Technical Reports based on a Site Inspection for geographical and geological aspects of a particular location. A report on the archeological survey of a monument.

- **For MCA students-**

Technical Report based on function of new technology (software or hardware), Technical Reports on Client's need for a Payroll management system/ Hospital management system.

- **For MBA students-**

Preparation of Annual Report of the organization, preparation of departmental reports and report based on the study of a successful organization.

Unit-IV Soft-Skills

8 Hours

1. Non-Verbal Communication -Kinesics, Oculistics, Vocalics, Proxemics, Chronemics.
2. Interpersonal Skills, Social-Skills
3. Personality-Meaning and Types, Attitude
4. Self-Management, Emotional Quotient, Time management, and Stress-Management.
5. Image-building / Impression –Management.
6. Leadership and Team-Building and Conflict.

Language-Lab

12 Labs

1. Stress, Intonation and Rhythm.
2. Overcoming Mother-Tongue Influence.
3. JAM session, Debate, Extempore.
4. Role-play, Information Exchange / Gap Activity.
5. Presentation Skills.
6. Group-Discussion Skills.
7. Preparing for interview.

**Course Structure & Syllabus of
B.Tech – Civil Engineering
Applicable for 2013-2017 Batch**

Course Title: Engineering Maths – II	Course Code: MAT201		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT I: Differential Equations

8L

Linear differential equations, Exact differential equations; Linear differential Equations of nth order with constant coefficients: complementary functions and particular integrals, Euler- Cauchy Homogeneous Linear differential equations, Simultaneous linear differential equations, Solutions of second order differential equations by changing the dependent and independent variables, Method of variation of parameters.

UNIT II: Laplace Transform

8L

Laplace Transform: Existence theorem, Laplace Transform of derivatives and integrals, Laplace Transform of Periodic functions and Unit Step function, Convolution theorem, Applications of Laplace Transform to solve linear and simultaneous differential equations.

UNIT III: Integral Transform

6L

Fourier Integral, Fourier Transform, Fourier Sine and Cosine Transforms and applications to simple Heat Transfer Equations, Z- Transform and its applications to solve difference equations.

UNIT IV: Fourier series

8L

Periodic functions, Fourier series of Periodic functions, Euler's formulae, Functions having arbitrary period, Change of intervals, Even and Odd functions, Half range sine and cosine series.

UNIT V: Partial differential equations and its Applications

8L

Introduction to partial differential equations, linear partial differential equations with constant coefficients of second order and their classification, Method of Separation of Variables for solving Partial Differential Equations, One-Dimensional Wave Equation, One Dimensional Heat Equation.

4. M. D. Raisinghania: Ordinary & Partial Differential Equations, S. Chand.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Computer Programming in C++	Course Code: CST201		
Credit: 2	L 2	T 0	P 0
Year: 1 st	Semester: II		

UNIT – I

4L

Introduction: Introducing Object-Oriented Approach related to other paradigms (functional, data decomposition), Characteristics of Object-Oriented Languages.

Basic terms and ideas: Abstraction, Encapsulation, Information hiding, Inheritance, Polymorphism.

UNIT – II

4L

Classes and Objects: Abstract data types, Object & classes, attributes, methods, C++ class declaration, State identity and behavior of an object, Constructors and destructors, instantiation of objects, Default parameter value, Copy Constructor, Static Class Data, Constant and Classes.

UNIT – III

5L

Inheritance and Polymorphism: Inheritance, Types of Inheritance, Class hierarchy, derivation – public, private & protected, Agrégation, composition vs classification hiérarchies, Polymorphism, Type of Polymorphism – Compile time and runtime, Method polymorphism, Polymorphism by parameter, Operator overloading, Parametric polymorphism, Generic function – template function, function name overloading, Overriding inheritance methods

TEXT BOOKS:

1. E Balagurusamy “Object Oriented Programming with C++” T.M.H 2nd Edition
2. R. Lafore, “Object Oriented Programming using C++”, BPB Publications, 2004.

REFERENCE BOOKS:

1. Schildt Herbert, “C++ Programming”, 2nd Edition, Wiley DreamTech.
2. YashwantKanethkar, “Object Oriented Programming using C++”, BPB, 2004

**Course Structure & Syllabus of
B.Tech – Civil Engineering
Applicable for 2013-2017 Batch
List of Programs in ‘C++’ Lab (CSP-251)**

Lab 1	(a) WAP to print first 10 prime numbers. (b) WAP to demonstrate nested loops. (c) WAP to print reverse of a given number. (d) WAP to read two numbers from keyboard and display the larger one.
Lab 2	(a) Create a class called Employee that includes three pieces of information as instance Variables – a first name (type String), a last name (type String) and a monthly salary (Double) (b) Create a constructor in above class to initialize the three instance variables. Provide a get method for each instance variable. (c) WAP to demonstrate destructors.
Lab 3	(a) Program to implement different types of inheritances like Multiple, Multilevel and hybrid. (b) Write a program in C++ demonstrating the public, protected and private parameters. (c) Write a program in C++ to demonstrate destructor in inheritance. (d) WAP to demonstrate encapsulation property of OOPs.
Lab 4	(a) Write a program that uses a class where the member functions are defined inside a class. (b) WAP that uses a class where member functions are defined outside a class. (c) WAP that uses a class where member functions are defined inside a class. (d) WAP to demonstrate the use of Static Data members.
Lab 5	(a) WAP to demonstrate the use of Dynamic Constructor. (b) WAP to demonstrate the use of function Template. (c) Illustrate and implement the C++ program to initiate the base constructor from derived class constructor.
Lab 6	(a) Write a C++ program to find the largest and smallest element of an array. (b) Create a class Matrix. Implement all possible matrix operations for Matrix type objects by overloading them.
Lab 7	(a) Create 2 classes OM and DB which store the value of distance. DM store distances in meters and cm and DB in feet and inches. Write a program that can read values for the class objects and add 1 object OM with another object of DB. (b) Define a class to represent bank account. Include the following members: Data members 1. Name of depositor. 2. Account number. 3. Type of account. 4. Balance amount in the account. Member functions 1. To assign initial values. 2. To deposit an amount. 3. To withdraw an amount after checking the balance. 4. To display name and balance. Write a main program to test the program.
Lab 8	(a) WAP to demonstrate static class data. (b) WAP to demonstrate the use of Public, Private and protected classes.
Lab 9	(a) WAP to illustrate the concept of call by reference. (b) WAP to illustrate the concept of unary operator overloading. (c) WAP to illustrate the concept of binary operator overloading.
Lab 10	(a) WAP to demonstrate the use of function overloading. (b) WAP using multiple inheritance for collecting employee details.
Lab 11	(a) WAP using function template to find maximum of two Data. (b) WAP to calculate factorial of given number using copy constructor.
Lab 12	(a) WAP to sort five float and integer numbers using template function (use bubble sort). (b) Demonstrate the use of different types of polymorphism.
Lab 13	(a) Write a function to read a matrix of size $M \times N$ from keyboard. (b) WAP to implement aggregation concept.

**Course Structure & Syllabus of
B.Tech – Civil Engineering
Applicable for 2013-2017 Batch**

Course Title: Engineering Graphics	Course Code: CGP151		
Credit: 2	L 1	T 0	P 2
Year: 1st	Semester: II		

UNIT-I

3L

Introduction: Sheet Layout, Types of Sheet, Size of Sheets, Title blocks, Type of lines, Lettering, Dimensioning, Scale (Full, Reduced, Large) Geometrical Constructions

UNIT-II

4L

Projection: Methods of Projection, Planes of Projection, Projection of points, Projection of straight lines, Projection of auxiliary planes, Projection of planes.

UNIT-III

4L

Projection of solids, Sections of solids

UNIT-IV

2L

Development of surfaces

UNIT-V

2L

Isometric Projections

Reference Book:

- 1) Bhatt N. D. & Panchal V. M, "Engineering Drawing", Charotar Publisher, 2007.
- 2) Dhanjay A Jolhe, "Engineering Drawing" Tata-Mc-Garw hill, 2008.
- 3) Gill.P.S "Engineering graphics" S. K. Kataria & Sons, 2009
- 4) John K.C, "Engineering graphics" ,2nd edition, PHI Learning Pvt. Ltd., 2010 .

List of Experiments

1. Introduction to AutoCAD Commands, Explaining need of AUTO CAD over Manual drafting, Simple Drawings.
2. Sheet on Lettering and Geometric construction.
3. Orthographic Projections, Basic problem based on Projection of points.
4. Sheet on Projection of Lines.
5. Sheet on Projection of Planes.
6. Sheet on Projection of Auxiliary Planes.
7. Sheet on Projection of Solids.
8. Development of Surfaces.
9. Sheet on Isometric Projections from orthogonal views.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Fluid Mechanics	Course Code: CA3210		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: III		

UNIT-I

Fluid Properties and Hydrostatics: Introduction to Fluid Mechanics, Definition of Fluid, Solid and Fluid Continuum. Definition, Units and dimensions of Mass density, Specific weight, Specific Volume, Relative density, Viscosity, Capillarity & Surface Tension. Newton's law of viscosity, Equation for capillarity, Definition of Pressure, Hydrostatic pressure equation, Absolute and Gauge pressures. Measurement of Pressure; Simple and Differential Manometer, Problems,. Force exerted by a liquid on an inclined flat surface, Buoyancy.

UNIT-II

Kinematics and Dynamics of Fluid Flow: Introduction, Classification of flow, Three dimensional continuity equation (Cartesian coordinates), General Continuity equation, Stream function, Velocity potential, Stream line, Equipotential line, (Two dimensional only). Concept of inertia force and forces causing motion. Derivation of Euler's equation & Bernoulli's equation with assumptions and limitations, problems on application of Bernoulli's equation.

UNIT-III

Flow through Pipes: Introduction, Reynolds's number and its significance, Laminar and Turbulent Flow, Major and minor losses in pipe flow. Equation for head loss due to friction (Darcy's), Equation for head loss due to sudden expansion. Pipes in series, pipes in parallel and equivalent pipes, Water Hammer in pipes, Equations for pressure rise due to gradual and sudden closure of valves.

UNIT-IV

Dimensional Analysis and Model Studies: Introduction to Dimensional analysis, Units and dimensions, Dimensional Homogeneity. Raleigh's and Buckingham's methods of analysis, Model studies, similitude, dimensional parameters, Types of models, Froude's models: Reynold's models.

UNIT-V

Flow Measurements: Introduction, Equation for discharge over triangular notch, Rectangular notch, Trapezoidal notch and Broad Crested Weir, Equations for discharge through horizontal and inclined venturimeter, Problems. Measurement of velocity using pitot tube and pitot static tube, Classification of orifices, Hydraulic coefficients of an orifice, Problems on Vertical Orifice.

List of Experiments

1. Verification of Bernoulli's Theorem
2. Metacentric Height
3. Calibration of V- Notch
4. Calibration of Rectangular Notch
5. Calibration of Trapezoidal Notch
6. Calibration of Venturimeter
7. Calibration of Orificemeter
8. Losses in Pipes

Text Books:

1. Bansal, R. K., "Fluid Mechanics and Hydraulic Machine", Lakshmi Publications, New Delhi.
2. Subramanya. K., "Fluid Fluid Mechanics", Tata McGraw Hill, New Delhi.
3. Rajput, R.K., "A Textbook of Fluid Mechanics and Hydraulic Machines", S. Chand Publications, 4th Edition.

Reference Books:

1. Modi, P. N., Seth, S.M., "Hydraulics and Fluid Mechanics", Standard Book House, New Delhi, 2004.
2. Jain, A.K., "Fluid Mechanics: Including Hydraulic Machines", Khanna Publishers, New Delhi, 2010.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Building Material & Construction	Course Code: CA3220		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: III		

UNIT-I

Introduction to Building Materials: Types of building stones, uses, deterioration and preservation, dressing stones classification, tests on bricks, types of tiles and their uses varieties of timber, defects in timber, tests for good timber, seasoning of timber, plywood, wooden boards, veneers.

UNIT-II

Lime, Concrete and other Building Materials: Types of limes and their Uses, chemical composition of Portland cement, types of cements and their uses, lime and cement mortar Ingredients, importance of mix proportioning, desirable properties of ingredients Cement Concrete, ingredients, mix proportions, uses, Reinforcing steel, structural steel, cast iron ,plain carbon steel, glasses, electrical-thermal & sound insulating materials, plastics & rubber .

UNIT-III

Foundations and Masonry: Bearing capacity of soil, classification of foundations, different types of foundations, definition of terms, bonds in brickwork rubble and ashlar masonry, masonry arch.

UNIT-IV

Flooring and Roofing, Stairs Doors and Windows: Different types of floors RCC and Tiled roofs, wooden and steel trusses types of stairs, requirements of stairs, types of doors, types of windows, ventilators.

UNIT-V

Plastering and Painting: Purposes and methods of plastering, Purpose of painting, method of painting on old and new surfaces. Lintels, Chajja, Balcony Formwork scaffolding shoring underpinning Cost effective construction: pre fabrication techniques, pre-cast building elements, hollow concrete blocks, stabilized mud blocks.

List of Experiments

A. Tests on Cement

1. Normal Consistency of cement.
2. Initial & final setting time of cement
3. Compressive strength of cement
4. Soundness of cement.
5. Tensile strength

B. Tests on Fine Aggregate

1. Sieve analysis of sand
2. Specific Gravity of fine Aggregate
3. Bulking of sand

C. Tests on Bricks

1. Water absorption.
2. Dimension Tolerances
3. Compressive strength

Text Books:

1. Kumar, S., "Building Construction", Standard Publishers Distributors, New Delhi, 16th Edition, 2006.

3. Rajput, R. K., "Engineering Material", S. Chand Publication, 2008.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Basic Surveying	Course Code: CA3230						
Credit: 4.5	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	1	2
L	T	P					
3	1	2					
Year: 2nd	Semester: III						

UNIT-I

Introduction: Importance of surveying to engineers. Types and classification of survey. Concept of scale, Symbols & colours, Principles of surveying. Concept of field and office work. Horizontal and vertical control. Units of measurement. Definition of maps and understanding topographical maps of Survey of India.

UNIT-II

Horizontal Control: Operation and use of metric chain and tape. Sources of errors and corrections. Use of ranging rods, cross staff, arrows, pegs etc. Use of prismatic compass and - Surveyor's compass - Bearings - Whole circle and Reduced Bearing -Traversing - Local attraction - Magnetic dip and declination. Plane table survey and accessories- Radiation, intersection and traversing.

UNIT-III

Vertical Control: Definitions of terms used in levelling, different types of levels, adjustments, bench marks. Booking and reducing the levels- rise and fall method and plane of collimation method. Profile levelling- longitudinal and cross sectioning – Plotting. Contouring- definition and characteristics of contours. Uses of contours. Methods of contouring-direct and indirect.

UNIT-IV

Theodolite Survey: Definition – types, principle and fundamental axes. Temporary adjustments. Measurements of horizontal and vertical angles. Method of repetition and Reiteration. Finding out height and elevation of object by single and double plane method. Curves: Simple curve-Elements of simple curves. Designation of a curve. Setting out simple curve Tabulation and setting out of compound curve, reverse curve, transition curve, combined curve and vertical curves.

UNIT-V

Areas and Volumes: General methods for determining areas. Areas from offsets to a base line, area by double meridian distances, coordinates, map measurements and planimeter. Measurement of volume by prismoidal and trapezoidal formula, volume from spot levels and volume from contour plans.

List of Experiments

1. Study of different types of maps, their scales, latitude, longitude, colours and symbols.
2. Setting out polygons using prismatic compass& Location of details using compass traversing.
3. Method of radiation and intersection by plane tabling.
4. Two point and three point problem.
5. Finding elevations using dumpy level with change point and using plane of collimation method.
6. Plotting of contours by block levelling.
7. Finding horizontal angle by method of repetition, method of reiteration and measurement of vertical angles.
8. Finding out height and elevation of an object by single plane method.
9. Longitudinal and cross sectioning and plotting using AutoCAD.
10. Setting out simple curves by offsets from long chord & chord produced method.
11. Setting out simple curves by Rankine's deflection angle method.

2. De, A., "Plane surveying", S. Chand and Company Ltd., 2000.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Solid Mechanics	Course Code: CA3010		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: III		

UNIT-I

Simple Stresses and Strains: Introduction, Properties of Materials, Stress, Strain, Hooke's law, Poisson's Ratio, Stress – Strain diagram for structural steel and nonferrous metals, Principles of superposition, Total elongation of tapering bars of circular and rectangular cross sections. Elongation due to self – weight, Composite section, volumetric strains-expression, Elastic constants, relationship among elastic constants, Thermal stresses.

UNIT-II

Compound Stresses: Introduction, Stress components on inclined planes, General two dimensional stress system, Principal planes and stresses, Mohr's Circle of stresses. Thin cylinders subjected to pressure change in length, diameter and volume.

UNIT-III

Bending Moment and Shear Force in Beams: Introduction, Types of beams, loadings and supports, Shear force and Bending moment, Sign conventions, Relationship between loading, shear force and bending moment, Shear force and bending moment equations, SFD and BMD with salient values for cantilever beams, simply supported beams and overhanging beams for Point loads, UDL, Triangular loads and Couple.

UNIT-IV

Bending and Shear Stress in Beams: Introduction – Bending stress in beam, Assumptions in simple bending theory, Derivation of Bernoulli's equation for simple bending, Section modulus, Flexural rigidity, Expression for horizontal shear stress in beam, Shear stress distribution for rectangular, 'I' and 'T' sections. Combined Direct and Bending stresses Behaviour of Prismatic beams under Torsion.

UNIT-V

Deflection of Prismatic Beams & Elastic Stability of Columns: Definitions of slope, deflection, Elastic curve derivation of differential equation for flexure, Slope and deflection using Macaulay's method for simply supported, cantilever and overhanging beams subjected to point loads, UDL and Couple. Elastic stability of columns- Introduction – Short and long columns, Euler's theory on columns, Effective length slenderness ratio, radius of gyration, buckling load, Assumptions, derivations of Euler's Buckling load for different end conditions, Limitations of Euler's theory, Rankine's formula and problems.

3. Basavarajaiah, B. S., Mahadevappa, P., "Strength of Materials", Orient Blackswan, New Delhi, 2010.
4. Pytel, A., Singer, F. L., "Strength of Materials", Harper Collins Publications, 1990.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Environmental Engineering-I	Course Code: CA3020		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: III		

UNIT -I

Need for public water supply and role of engineers

Quantity of water, Different water demands, design period and population forecast-Arithmetic mean, Geometric mean and incremental increase method. Sources of water - Classification, adequacy and quality aspects.

UNIT -II

Quality of water

Physical, chemical and bacteriological analysis of water. Standards of Water quality desired for domestic water supplies – BIS and WHO Standards - Water borne diseases. Distribution of water- Different distribution systems, layouts and Reservoirs.

UNIT- III

Treatment of water

Objectives. Conventional treatment plant layout. Different treatment units (location and its function) - Screening, Aeration, Sedimentation, Filtration and Disinfection. Concept of flow through treatment units. Design of circular sedimentation tanks and Rapid Sand Filter. Miscellaneous treatment methods, swimming pool water treatment.

UNIT -IV

Storage and distribution of water: Methods of distribution, pressure and gravity distribution systems, concept of service and balancing reservoirs, capacity of distribution reservoirs; general design guidelines for distribution system, Hardy - Cross method, Newton - Raphson method and equivalent pipe method of pipe network analysis; rural water supply distribution system

UNIT -V

Water supply to buildings

Street connection, internal storage (sumps and overhead tanks)-Capacity calculations. Supply systems within the building (overhead tanks and Hydro pneumatic systems). Pipe sizes and recommended velocities and pressures. Pipe fittings and pipe joints. Valves and taps. Hot water supply, Rainwater harvesting, Fire safety and firefighting installation in buildings.

Text Books:

1. Garg, S. K., "Water Supply Engineering", Khanna Publishers (RS), New Delhi, 2010.
2. Punmia, B. C., Jain, A. K., "Environmental Engineering-I", Laxmi Publication (P) Ltd., New Delhi, 2005.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Mathematics – III	Course Code: JA3010		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: III		

UNIT – 1

10L

Functions of a complex variable:

Analytic functions, Cauchy – Riemann equations, Harmonic functions, Line integral in the complex plane, Cauchy’s integral theorem, Cauchy’s integral formula for derivatives of analytic function.

UNIT – 2

8L

Power series, Taylor’s series Laurent’s series Residue, Poles, Zeros, singularities, Residue Theorem, Evaluation of real integrals of the type

$$\int_0^{2\pi} f(\cos\theta, \sin\theta)d\theta \text{ \& \ } \int_{-\infty}^{\infty} f(x)dx$$

UNIT – 3

8L

Statistical Techniques.

Moments, Moment generating function, skewness, kurtosis, Curve fitting, Method of least square, Fitting of straight lines, Polynomials, Exponential curves etc., Correlation and Regression, Binomial, Poisson & Normal Distribution.

UNIT – 4

8L

Integral Transform.

Fourier integral, Fourier complex transform. Fourier sine and cosine transform, Hankel transform and its application.

UNIT – 5

8L

Series solution of ODE of 2nd order with variable coefficient with special emphasis to differential equation of Legendre and Bessel, Legendre Polynomial, Bessel functions and their properties.

**Course Structure & Syllabus of
B.Tech – Civil Engineering
Applicable for 2013-2017 Batch**

Course Title: Building Planning & Drawing	Course Code: CA3110		
Credit: 1	L 0	T 0	P 2
Year: 2nd	Semester: III		

List of Experiments

1. Symbols used in Civil Engineering drawing, Masonry Bonds
2. To develop and draw detailed drawings like plan, elevation and sectional details of the residential buildings for the given line diagram,
3. Drawings of Doors & Windows.
4. Drawings of Stair Cases.
5. Drawings of Trusses.
6. Comprehensive Drawing of Residential building (Layout, plan, elevation & sectional elevation)
7. Preparation of lay out plan/Maps and building drawing using computer

Text Books:

1. Building Drawing; by Shah, Kale & P atki
2. Civil Engineering Drawing; by B.P. Verma

Reference Books:

1. National Building Code

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Hydraulics & Hydraulic Machines	Course Code: CA4210		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: IV		

UNIT – I

Open Channel Flow: Definition of open channel, Geometric properties, Uniform flows in open channels: Chezy and Manning's equation, Most Economical sections: Rectangle, Trapezoidal and Circular Channels, Specific Energy, Specific energy curve, condition for minimum specific energy and maximum discharge, Critical flow in Rectangular channels, Problems. Gradually Varied Flow, Hydraulic Jump in a rectangular channels.

UNIT – II

Impact of Jet on Vanes: Introduction to impulse momentum equation and its applications, Force exerted by a jet on a fixed target, Derivations, Force exerted by a jet on a moving target, derivations, Force exerted by a jet on a series of a curved vanes, concept of velocity triangles, equation for work done and efficiency.

UNIT – III

Centrifugal and Reciprocating Pumps: Definition of pumps and classification, Principle of working, priming and methods, Specific speed, Work done and efficiencies of centrifugal and reciprocating pumps, Minimum starting speed, Cavitations in centrifugal pumps, multistage pumps.

UNIT – IV

Hydraulic Turbines: Introduction, types and classifications, Pelton wheel, equation for work done and efficiency, Specific speed, Kaplan turbine – Theory, equation for work done and efficiency, Design parameters. Francis Turbine

UNIT – V

Hydropower Plants: Introduction, types of Hydropower stations, Selection of Site for hydro power plant, definitions of general terms, layout of hydropower installations, components of hydropower plant, forebay and intake arrangements, head race or intake conduits, Surge tanks, draft tube and tail race, calculation of power potential, hydro power development in the country.

List of Experiments

1. To determine the Manning's Co-efficient of roughness for a given Channel bed
2. To study the characteristics of hydraulic jump
3. Experiments on Pelton Wheel Turbine
4. Experiments on Francis Turbine
5. Experiments on Centrifugal Pump
6. Experiments on Reciprocating Pump
7. Experiment on Impact of Jet

Text Books:

1. Bansal, R.K., "A Text Book of Fluid Mechanics and Hydraulic Machines", Firewall Media, New Delhi, 2005.
2. Rajput, R.K., "A Text Book of Fluid Machines & Hydraulic Machines" S. Chand & Co., New Delhi, Reprint 2006.

Reference Books:

1. Modi, P.N., Seth, S.M., "Hydraulics and Fluid Mechanics Including Hydraulics Machines", Standard Book House, New Delhi, 14th Edition, 2002.
2. Sahasrabudhe, S. R., "Irrigation Engineering and Hydraulic Structures", Katson publishing house, 10th Edition, 2012.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Advanced Surveying	Course Code: CA4220		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: IV		

UNIT-I

Triangulation: Necessity of Control Surveying, Principle of Triangulation, Classification of Triangulation Systems, Station Marks, Towers and Signals, Satellite station, Intersected and Resected points, Reconnaissance, Inter-visibility of stations, Angular Measurement, Base line measurement and its extension.

UNIT-II

Project surveys: General requirements and specifications for engineering project surveys, reconnaissance, preliminary and locations surveys for highway, earthen bund and canals. Layout of culverts, canals, and buildings- both load bearing wall structure and column structures by centerline method. Modern trends- EDM, electronic Theodolites and Electronic Total Station

UNIT-III

Photogrammetry and remote sensing: Remote sensing: Definition and concepts. Concept of signatures. Multi-spectral concept. Remote sensing systems. Remote sensors and platforms. Data products generation and analysis. Application of remote sensing in agriculture, forestry, land cover/ use mapping, water resources, wet land management, coastal zone management and marine fisheries.

UNIT - IV

Global Positioning System: Global Positioning System- NAVSTAR GPS system. Advantages of GPS. Components of GPS- Space, control and user segments. Principles of position fixing with GPS. Relative and differential positioning. Factors affecting GPS observations, GPS applications.

UNIT-V

Geographic Information systems: Components of GIS-Hardware, software and expertise. Benefits and applications of IS. Geographic data- data input, processing –data structures- rasters and vectors, database management-layer concepts, spatial manipulation and analysis and graphical output and visualization.

List of Experiments

1. Marking of building by centre line method for load bearing wall residential building.
2. Marking of building by centre line method for columns for small commercial complex.
3. Exposure to the use of Total Station.
4. Measurement and data logging of distances, horizontal angles and vertical angles using Total Station.
5. Study of aerial photographs in 3D using stereoscope.
6. Use of satellite images for land use mapping.
7. Collection of field data using GPS.
8. Creation of data base (spatial & non spatial) using GIS Software.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Concrete Technology	Course Code: CA4230		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: IV		

UNIT -I

Concrete Ingredients and Microstructure

Cement – Chemical composition, hydration of cement, types of cement, manufacture of OPC with flow charts. Tests on cement – field testing, fineness, normal consistency, setting time, soundness, and compressive strength (detailed procedures covered in laboratory). Quality of mixing water. Fine aggregate – grading of aggregates, sieve analysis, specific gravity, bulking, moisture content, deleterious materials. Coarse aggregate – importance of size, shape and texture, grading of aggregates, sieve analysis, specific gravity, flakiness and elongation index, crushing, impact and abrasion tests (detailed procedures to be covered in laboratory), Structure of aggregate phase, structure of hydrated cement paste, structure - property relationship in hydrated cement paste, transition zone in concrete, influence of transition zone on properties of concrete.

UNIT -II

Fresh Concrete

Workability – definition, factors affecting workability, measurement of workability by slump, compaction factor, Vee-Bee, flow tests. Segregation and bleeding, process of manufacture of concrete – batching. Mixing, transporting, placing, compaction, curing of concrete. Chemical admixtures – plasticizers, accelerator, retarders and air entraining agents. Mineral admixtures – fly ash, blast furnace slag, metakaolin, Silica fume, rice husk ash.

UNIT -III

Hardened Concrete

Factors affecting strength, w/c ratio, gel/space ratio, maturity concept, effect of aggregate properties, compressive strength, tensile strength, bond strength, modulus of rupture, modulus of elasticity, Poisson's ratio, relationship between these parameters. Accelerated curing, aggregate- cement bond strength. Shrinkage – plastic shrinkage and drying shrinkage, factors affecting shrinkage. Creep – measurement of creep, factors affecting creep, effect of creep. Durability – definition, significance, permeability, sulphate attack, chloride attack, carbonation, freezing and thawing. Factors contributing to cracks in concrete – plastic shrinkage, settlement cracks, construction joints. Thermal expansion, transition zone, structural design deficiencies. Tests on hardened concrete – compressive strength, split tensile strength, flexural strength, non-destructive testing of concrete.

UNIT -IV

Concrete Mix design

Concept of mix design, variables in proportioning, exposure conditions, procedure of mix design as per IS 10262-1982, numerical examples of mix design.

UNIT -V

Special Concretes

Constituents, Properties and applications of lightweight concrete, high performance concrete (HSC, SCC), high density concrete, fibre reinforced concrete, Ferro-cement.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

List of Experiments

I. Tests on Coarse Aggregate

1. Crushing value of aggregate
2. Impact value of aggregate
3. Water absorption of aggregate
4. Sieve Analysis of Aggregate
5. Specific gravity & bulk density
6. Grading of aggregates.

II. Tests on Fresh Concrete

1. Workability Tests – Slump Test & Compaction Factor Test
2. Flow Test

III. Tests on Hardened Concrete

1. Compressive Strength Test
2. Flexural Strength Test
3. Split Tensile Strength Test
4. Non Destructive Testing of Concrete

IV. Mix Design

1. Concrete mixed design as per Indian Standard recommendation guidelines.

Text Books:

1. Shetty, M. S., “Concrete Technology”, S. Chand & Co. Ltd, New Delhi, 6th Edition, 2005.
2. Mehta, P. K, Monteiro, P. J. M., “Concrete: Microstructure, Properties, and Materials”, McGraw Hill Professional, 2013.
3. Gambhir, M. L., “Concrete Technology”, Tata McGraw Hill, New Delhi, 5th Edition, 2013.
4. Neville, A. M., Brooks, J. J., “Concrete Technology”, Prentice Hall, 2nd Edition, 2010.

Reference Books:

1. Neville, A. M., “Properties of concrete”, ELBS Publications, London.
2. IS: 10262: “Recommended Guidelines for Concretes Mix design”, BIS Publication.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Geology	Course Code: CA4240		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: IV		

UNIT-I

Physical Geology

Geology and its importance in civil engineering projects. Internal structure of the earth and its composition. Epigene and Hypogene geological agents: Weathering of rocks, Kinds of weathering, Formation of soil and its classification, Soil profile, Soil erosion and its conservation. Geological hazards such as landslides and earthquakes, causes, effects and remedial measures. Concept of plate tectonics and seafloor spreading.

UNIT-II

Applied Mineralogy

Definition of mineral, Physical and chemical properties in minerals, Classification of minerals based on chemistry such as rock forming Minerals, Economic ore minerals and industrial minerals. Study of Common Rock forming minerals: Silicate Structure, Quartz and its varieties, Feldspars group, Mica Group, Amphibole Group, and Pyroxene Group, Olivine Group. Some other group of Chlorite, Oxide and Carbonates.

UNIT-III

Petrology

Igneous rocks: Mode of occurrence, Classification, Texture and Structure. Sedimentary rock: Mode of occurrence, textures and structures. Metamorphic rocks- Metamorphism, Agents of metamorphism, Types of metamorphism, Textures and Structure Common Igneous rocks of India: Granite, Granite Porphyry, Basalt, Diorite, Syenite, Dolerite, Gabbro. Common Sedimentary rocks of India: Sandstone, Limestone, Conglomerate and Shale. Quartzite, Common Metamorphic Rocks of India: Mica Schist, Marble, Gneisses and Slate.

UNIT-IV

Structural Geology

Definition, out crops, Dip and Strike, Compass clinometer. Description of folds, Faults, Joints and Unconformities with their Types. Recognition of folds and faults in the field, and its Consideration in Civil Engineering projects.

UNIT-V

Engineering and Ground water Geology

Engineering Geology: Geological site investigation surface and subsurface explorations by Geological and Geo-Physical investigations. Selection of Geological site for construction of Dams and Reservoirs, Tunnels, Bridge Sites, and Highways. Introduction to different Building Materials. Ground water Geology: Hydrological cycle, water bearing properties of rocks and soils. Aquifers and its types.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

List of Experiments

1. Identification of minerals in hand specimen:

- i. Descriptive Study and identification of Rock forming Minerals in Hand Specimen: Quartz and its varieties, Feldspar and its varieties, Mica and its varieties, Alumino-silicate mineral and its varieties (Silicate Group), Calcite, Dolomite (Carbonate Group) etc.
- ii. Descriptive Study and identification of Economic Minerals in hand specimen: Hematite, Magnetite, Chromite, Bauxite, Pyrite, Chalcopyrite, Galena.
- iii. Descriptive Study and identification of Industrial Mineral: Asbestos, Corundum, Gypsum, Kaolin.
- iv. Descriptive Study and identification of Minerals in Thin Section (Microscope).

2. Identification of minerals in hand specimen:

- i. Descriptive Study and identification of different Rock group (Igneous, Sedimentary, and Metamorphic) in Hand Specimen.

3. Study on Maps:

- i. Study and Interpretation of Contour.
- ii. Topographic and Geological maps
- iii. Solving Dip and Strike problems
- iv. Borehole problems.

Text Book:

1. Singh, P., “Engineering Geology”, S. K. Kataria & Sons, New Delhi, 2009.
2. Sathiyana Swamy, B.S, “Engineering Geology”, Dhanpat Rai & Co., New Delhi.

Reference Books:

2. Varghese, P. C., “Engineering geology for Civil Engineers”, PHI Learning Pvt. Ltd., 2012.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Structural Analysis - I	Course Code: CA4010		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: IV		

UNIT – I

Introduction and Analysis of Plane Trusses

Structural forms, Conditions of equilibrium, Degree of freedom, Linear and Nonlinear analysis, Static and Kinematic indeterminacies of structural systems, Types of trusses, Assumptions in analysis, Analysis of determinate trusses by method of joints and method of sections.

UNIT – II

Deflection of Beams

Deflection of determinate beams by Moment area and Conjugate beam methods, Strain energy due to axial force, BM and SF, Principle of virtual work and Castigliano's theorems, Maxwell's Reciprocal Theorem and Betti's Theorem, Unit load and its application to deflection of determinate beams and trusses.

UNIT – III

Arches and Cable Structures

Three hinged and two hinged parabolic arches with supports at same and different levels, Determination of normal thrust, radial shear and bending moment, Analysis of cables under point loads and UDL, Length of cables for supports at same and at different levels, Stiffening Girders, Stiffening trusses for suspension cables

UNIT – IV

Influence Lines and Moving loads

Concept of influence lines, ILD for reactions, SF and BM for determinate beams, Muller Bresleau Principle, ILD for axial forces in determinate trusses, BM, SF and axial forces in determinate systems using ILD, Maximum BM and SF in determinate beams using rolling loads concepts, ILD for arches

UNIT – V

Analysis of Indeterminate Beams

Propped cantilevers and fixed beams using method of consistent deformations Forces due to rotation and settlement of supports.

Text Books:

1. Reddy, C. S., "Basic Structural Analysis", Tata McGraw Hill, New Delhi, 2011.
2. Jain, A. K., "Elementary Structural Analysis", Nem Chand Publishers, Roorkee, 1990.
3. Ramamrutham, S., Narayan, R., "Theory of Structure", DhanpatRai & Co. Ltd.

3. Jain, O.P., Jain, B.K., "Theory & Analysis of Structures", Vol. I & II, Nem Chand.
4. Wang, C. K., "Intermediate Structural Analysis", McGraw-Hill, 1st Edition, 2010.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Hydrology	Course Code: CA4020		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: IV		

UNIT -I

Precipitation: Introduction, hydrologic cycle. Definition of Precipitation, forms and types of precipitation. Measurement of rainfall using Non recording (Simson) and Recording (Syphon) Rain Gauges .Computation of average rainfall over a Catchment area. Checking the consistency of rain fall data by double mass curve methods, computation of missing rainfall by different methods

UNIT –II

Runoff: Introduction, catchment area, component of runoff factor affecting runoff, rainfall – runoff relationship. Runoff hydrograph: components separation of base flow by different methods, ϕ -index and W-index, unit hydrograph theory , assumption, limitations and advantages, derivation of unit hydrograph from simple storm Hydrographs, S curve and its uses.

UNIT-III

Water Losses: Introduction, types of losses. infiltration - definition factor affecting infiltration indices, measurement of infiltration, Evaporation- definition, factor affecting evaporation, methods of measurement, methods of reducing evaporation. Potential evaporation measurement estimation of consumptive use under Indian conditions.

UNIT –IV

Flood and Flood Routing: Introduction, Various methods of flood discharge-Rational method, Empirical method, Unit hydrograph method, Gumbel’s method, Introduction to flood routing, Basic equations, Hydrologic storage routing, Attenuation, Hydrologic channel routing- Muskingum equation, Flood control.

UNIT-V

Ground Water hydrology: Basic concept of ground water , definition, occurrence and distribution, safe yield and specific yield of aquifers, flow of water in saturated and unsaturated soils , Darcy laws – transmissibility of aquifers Problems an confined and unconfined aquifer.

Text books:

1. Reddy, P. J. R., “A Text Book of Hydrology”, Lakshmi publication, New Delhi, 2005.
2. Patra, K. C., “Hydrology and Water Resources Engineering”, Alpha Science International, 2nd Edition, 2008.
3. Subramanya, K., “Engineering Hydrology”, Tata Mcgraw Hill, New Delhi, 4th Edition, 2013.

References books:

1. Sharma, R.K., Sharma, T. “A Textbook of Hydrology and Water Resources Engineering”, Dhanpat Rai, New Delhi, 1987.
2. Raghunath, H. M., “Hydrology”, New Age international (P) Ltd., New Delhi, 2nd Edition, 2006.

Course Title: Industrial Tour	Course Code: CA4410		
Credit: 1	L 0	T 0	P 2
Year: 2nd	Semester: IV		

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Transportation Engineering – I	Course Code: CA5210		
Credit: 4.5	L 3	T 1	P 2
Year: 3rd	Semester: V		

UNIT-I

Highway Development and Planning: Importance of transportation, Different modes of transportation and their characteristics, Classification of roads, Different road patterns, Jaykar committee recommendations and implementation, Twenty year road development plans in India, Introduction to recent developments in road network in India, Highway planning and alignment,

UNIT-II

Geometric Design: Highway Cross sectional elements, Sight distances, Super elevation, Camber, Extra widening on curves, Design of horizontal and vertical alignments.

UNIT-III

Highway Materials and Properties: Classification of subgrade soil, CBR and plate load tests on soil, Properties and requirements of road aggregates and bitumen, Cutbacks and bituminous emulsions, Introduction to new materials in pavements.

UNIT-IV

Pavement Design and Maintenance: Various factors of pavement design, Concept of ESWL, Design of flexible pavement by IRC method, Stresses in rigid pavement, Design of rigid pavement thickness by IRC method. Various types of failures, Pavement Evaluation, remedial measures and maintenance practices.

UNIT-V

Traffic Engineering: Introduction to Traffic Engineering, Traffic Characteristics, Road user and vehicular characteristics, Traffic Studies, Traffic operations, Traffic control devices.

List of Experiments

A. Test of Bitumen

- 1 Specific gravity test of bitumen
- 2 Ductility test of bitumen
- 3 Flash point and fire point test of bitumen
- 4 Penetration test of bitumen
- 5 Softening test of bitumen
- 6 Viscosity test of bitumen
- 7 Bitumen Content
- 8 Stripping Test on aggregate

B. Test of Aggregate

- 1 Abrasion test of aggregate
- 2 Shape test (flakiness, elongation and angularity number) of aggregate
- 3 Impact value test of aggregate
- 4 Specific gravity test of aggregate
- 5 Crushing strength of aggregate

C. Test of Tar

- 1 Viscosity of tar

D. Test of Bituminous Mix

- 1 Marshall Test for stability and flow value

E. Field Tests

- 1 Benkelman Beam Test (Demonstration)

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Text Books:

1. Khanna, S. K., Justo, C. E. J., Veeraraghavan, A., ‘Highway Engineering’, Nem Chand and Bros., Roorkee, 9th Edition, 2011.
2. Kadiyali, L. R., Lal, N. B., ‘Principles and Practices of Highway Engineering’, Khanna Publishers, New Delhi, 4th Edition, 2005.
3. Kadiyali, L. R., ‘Traffic Engineering and Transportation Planning’, Khanna Publishers, New Delhi, 6th Edition, 1997.

Reference Books:

1. Sharma, S. K., Sharma, R. C., “Principles and Design of Highway Engineering”, S. Chand & Company.
2. Khanna, S. K., Justo, C. E. J., “Highway Material Testing Laboratory Manual”, Nem Chand and Bros., Roorkee.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Environmental Engineering – II	Course Code: CA5220		
Credit: 4.5	L 3	T 1	P 2
Year: 3rd	Semester: V		

UNIT-I

Introduction: Introduction, Basic Definitions, Need for waste water collection, Conveyance, Treatment and disposal, Types of sewerage systems, Quantity of sewage, Dry weather flow and factors affecting dry weather flow, Flow variations and their effects on design of sewerage system, Computation of design flow, Estimation of storm flow by Rational method, Time of concentration and return period.

UNIT-II

Design of Sewers: Hydraulic formulae for velocity, Effects of flow variation on velocity, Self-cleansing and Non scoring velocities, Hydraulic design of circular sewers, Types of sewer materials (Concrete, PVC, CI and stoneware) used, Advantages and disadvantages of materials, Suitability of sewer material for different locations, Laying and jointing of sewers, Testing of sewers, Ventilation and cleaning of sewers, Street inlets, Catch basins, Manhole and drop manhole.

UNIT-III

Wastewater Characterization: Analysis of sewage, Physical, chemical and biological characteristics with emphasis on BOD and COD, Concept of aerobic and anaerobic activity, Sampling, Effluent standards.

UNIT-IV

Treatment of Sewage: Flow diagram of municipal sewage treatment plant, Primary treatment, Screening, Grit chamber, Skimming tank, Primary sedimentation tank, Design approaches.

UNIT-V

Secondary Treatment: Theory and operation of trickling filter and types of trickling filters, Design of single stage trickling filter, Activated sludge process and its modifications, Design aspects of activated sludge process, Sludge digestion, Sludge drying beds, Other methods of sludge disposal on site treatment method.

List of Experiments

1. Determination of turbidity, color and conductivity
2. Determination of pH, alkalinity and acidity
3. Determination of hardness and chlorides
4. Determination of residual chlorine and chlorine demand
5. Determination of dissolved oxygen
6. Measurement of air pollutants with high volume sampler
7. Measurement of sound level with sound level meter

Text Book:

1. Garg, S. K., "Environmental Engineering: Sewage Disposal and Air Pollution Engineering", Khanna Publishers, New Delhi, 26th Edition (Paperback), Vol. II, 2010.
2. Punamia, B. C., Jain, A. K., "Waste Water Engineering", Firewall Media, New Delhi, 1998.

Reference Books:

1. Manual on Sewage and Sewerage Treatment, CPHEEO, Ministry of Urban Development, New Delhi.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Soil Mechanics	Course Code: CA5230		
Credit: 4.5	L 3	T 1	P 2
Year: 3rd	Semester: V		

UNIT -I

Introduction: Definition of void ratio, Porosity, percentage air voids, Air Content, Degree of saturation, moisture content, specific Gravity, Bulk density. Dry density, saturated density, Submerged density and their inter relationships.

Properties of Soils: Index property of soil –particle size Distribution, Relative Density, consistency limits and indices, in situ density, laboratory method of determination of index properties of soil: moisture content, specific gravity, particle size distribution (Sieve analysis and hydrometer analysis only), in situ density by Core cutter & sand replacement methods, relative density, liquid limit- Casagrande and Cone penetration method, Plastic limit and Shrinkage limit determination.

UNIT –II

Classification of soils: purpose of soil classification, basis of soil classification, particle size classification-MIT classification and IS classification, plasticity chart and its importance, field identification of soil.

Clay mineralogy and Soil Structure: single grained, honey combed, flocculent and dispersed structure, Electric diffuse a double layer, Adsorb water, Base Exchange capacity, Isomorphous substitution. Common Clay mineral in soil and their structure- Kaolonite, Illite and montmorillonite. Thixotropy of clay, Soil water system, Effective stress concept total pressure and effective stress, quick sand phenomenon, capillary phenomenon.

UNIT-III

Flow of Water Through Soils: Darcy’s law- assumptions and validity, coefficient of permeability and its determination (laboratory and field) factor affecting permeability, permeability of stratified soil, seepage velocity, superficial velocity and coefficient of percolation.

Compaction of Soils: Principle of compaction, standard and modified proctor’s tests, factor affecting compaction, effect of compaction on soil properties, field compaction control, proctor needle, compacting equipments.

UNIT-IV

Consolidation of Soils: Definition, Mass spring Analogy, Terzaghi’s one dimensional consolidation theory assumption and limitation, normally consolidated, under consolidated and over consolidated soils pre consolidation pressure and its determination by Casagrande’s method. Consolidation characteristics of soil, laboratory one dimensional consolidation test, Determination of consolidation characteristic Proportioning of soil compression index and coefficient of consolidation, determination of coefficient of consolidation by square root of time fitting method, logarithmic time fitting method.

UNIT –V

Shear Strength of Soils: Concept of shear strength, Mohr-coulomb theory, conventional and modified failure envelope, total and effective shear strength parameters, concept of pore Pressure, factor affecting shear strength of soils, sensitivity, Measurement of shear strength- direct shear test, Unconfined compression test, Triaxial compression test and Vane shear test, shear tests and under different drainage condition.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

List of Experiments

1. Sieve Analysis
2. Hydrometer Analysis
3. Liquid, Plastic & Shrinkage Limit Test
4. Proctor Compaction Test
5. Triaxial Compression Test
6. Specific Gravity Determination of Coarse and Fine Grained Soils
7. In Situ Density-Core Cutter & Sand Replacement Test
8. Permeability Test
9. Direct Shear Test
10. California Bearing Ratio Test
11. Static Cone Penetration Test
12. Standard/Dynamic Cone Penetration Test

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Design of Reinforced Concrete Elements	Course Code: CA5010		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: V		

UNIT -I

Introduction to Working Stress Design: Introduction to working stress method, elastic behavior of rectangular section, under, balanced and over reinforced section. Deflection and cracking in beams and slabs using IS code provisions. Design of singly reinforced beams

UNIT –II

Introduction to Limit State Design:-Philosophy and principle of limit state design along with the assumptions, partial safety factors, characteristic load and strength. Introduction to stress block parameters, concept of balanced, under reinforced and over reinforced sections, limit state of collapse in flexure of rectangle and flanged sections with examples. Limit state of collapse in shear and torsional strength of sections with examples

UNIT-III

Limit state design of beams:-Design principles and procedures for critical sections for bending moment and shear forces. Flexural and shear design example of singly and doubly reinforced simply supported and cantilever beams using the codal provision. Detailing of longitudinal and shear reinforcement, anchorage of bars, check for development length. Reinforcement requirements, slenderness limits for beams for lateral stability. Flexural and shear design of simply supported T and L beams. Design of rectangular section for torsion.

UNIT-IV

Limit State Design of Slabs : Introduction to one way and two way slabs, design of one way cantilever, simply supported and continuous slab and design of two way slabs.

UNIT –V

Limit State Design of Columns and Footings: General design aspects of compression members. Design of short axially loaded columns with reinforcement detailing. Design of uniaxial and biaxial bending columns using SP- 16 charts and design of slender column. Design and detailing of isolated rectangular footing for axial load and uniaxial moment and design of pedestal.

Text books:

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Structural Analysis – II	Course Code: CA5020		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: V		

UNIT –I

Slope Deflection Method:

Introduction, Sign convention, Development of slope-deflection equation, Analysis of continuous beams, Analysis of orthogonal rigid plane including sway frames with kinematics indeterminacy.

UNIT –II

Moment Distribution Method:

Introduction, Definition of terms, Development of method, Analysis of continuous beams, Analysis of orthogonal rigid plane including sway frames with kinematics indeterminacy.

UNIT-III

Matrix Method of Analysis (Flexibility Method):

Introduction, Axes and coordinates, Flexibility matrix, Analysis of continuous beams and plane trusses using system approach. Analysis of orthogonal rigid frames using system approach.

UNIT-IV

Matrix Method of Analysis (Stiffness Method):

Introduction, Stiffness matrix, Analysis of continuous beams and plane trusses using system approach, Analysis of orthogonal rigid frames using system approach.

UNIT-V

Plastic Method of Analysis:

Introduction and basic concept of plastic analysis, Shape factors of simple sections, Equilibrium and mechanism methods, Collapse loads for simple and continuous beams

Text books:

1. Negi, L., Jehangir, R., “Structural Analysis”, Tata McGraw Hill Publication Co. Ltd., 1st Edition, 2004.
2. Gupta, R., Pandit, G. S., Gupta, S. P., “Theory of Structures”, Tata McGraw Hill Publication Company Ltd., 1st Edition, Vol. II, 2013.
3. Wang, C. K., “Intermediate Structural Analysis”, McGraw-Hill, New Delhi, 1983.

Reference Books:

1. Sterling, J., Kinney, “Intermediate Structural Analysis “Oxford of IBH Publishing Company.
2. Norris, C. H., Wilbur, J. B., “Elementary Structural Analysis,” McGraw Hill International Book Edition, 4th Sub- Edition, 1990.
3. Jain, A. K., “Advanced Structural Analysis”, Nem Chand Bros, Roorkee, India.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Economics	Course Code: GC5010		
Credit: 2	L 2	T 0	P 0
Year: 3rd	Semester: V		

UNIT-I

Time value of money: Simple and compound interest, Time value equivalence, Compound interest factors, Cash flow diagrams, Calculation, Calculation of time –value equivalences. Present worth comparisons, Comparisons of assets with equal, unequal and infinite lives, comparison of deferred investments, Future worth comparison, payback period comparison.

UNIT-II

Use and situations for equivalent annual worth comparison, Comparison of assets of equal and unequal life. Rate of return, internal rate of return, comparison of IRR with other methods, IRR misconceptions.

UNIT-III

Analysis of public Projects: Benefit/ Cost analysis, quantification of project, cost and benefits, benefit/ cost applications, Cost –effectiveness analysis.

UNIT-IV

Depreciation, computing depreciation charges, after tax economic comparison, Break-even analysis; linear and non-linear models. Product and Process Costing, Standard Costing, cost estimation, Relevant Cost for decision making, Cost control and Cost reduction techniques.

Course Title: Aptitude Building - I	Course Code: CA5310		
Credit: 1	L 0	T 0	P 2
Year: 3rd	Semester: V		

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Design of Reinforced Concrete Structures	Course Code: CA6010		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: VI		

UNIT-I

Design of Stair Cases:

General specifications, Types of stair cases, Loads on stair cases, Effective span of stairs, Design of dog legged stair case, Design of open well stair case

UNIT-II

Retaining Walls:

General specifications, Forces acting on retaining walls, Stability consideration, Wall proportioning, Design of cantilever type retaining walls, Design of counterfort type retaining walls.

UNIT-III

Water Tanks

Types of water tanks, Design of circular water tanks resting on ground with rigid base, Design of circular water tanks resting on ground with flexible base, Design of overhead water tank (Intz type tank).

UNIT-IV

Design of Continuous Beams

Introduction to continuous beams, Design of continuous RC beams, Moment redistribution

UNIT-V

Multi-storey Building Frames

Introduction to multi-storey building frames, Analysis of multi-storey frames, Method of substitute frames

Text Book:

1. Pillai, S. U., Menon, D., "Reinforced Concrete Design", Tata McGraw Hill Publications, New Delhi, 2nd Edition, 2003.
2. Raju, N. K., "Advanced Reinforced Concrete Design", CBS Publishers, New Delhi, 2nd Edition, 2013.

Reference Books:

1. Sinha, S. N., "Reinforced Concrete Design", Tata McGraw Hill Publications, New Delhi, 2nd Edition, 2007.

3. SP 16: "Design Aid for RC to IS: 456-1978", BIS, New Delhi.
4. SP 34: "Handbook on Concrete Reinforcement and Detailing", BIS, New Delhi.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Design of Steel Elements	Course Code: CA6020		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: VI		

UNIT-I

Introduction & Connections:

Introduction, Types & properties of structural steel rolled sections, Grades of steel, Codal Provisions, Concept in the design of connections, Codal Provisions, Simple and moment resistant riveted, welded and bolted connections.

UNIT-II

Tension Members:

Introduction, Codal provisions, Analysis and design of tension members with different cross sections subjected to axial tension, Lug angle

UNIT-III

Compression Members:

Codal provisions, Slenderness ratio, Analysis and design of simple compression members (angles and I-Sections), Built up compression members, Lacing and battening.

UNIT-IV

Flexural Members:

Concept in the design of flexural member, Codal provisions, Analysis and design of laterally restrained and unrestrained beams, Built up beams, Web buckling and web crippling.

UNIT-V

Plate Girder:

Design of plate girders including stiffeners, splices and curtailment of flange plates.

Text Book:

1. Subramanian, N., "Design of Steel structures: Theory and Practice", Oxford University Press, New Delhi, 3rd Edition, 2011.
2. Duggal, S. K., "Design of Steel structure", Tata McGraw Hill, New Delhi, 3rd Edition, 2009.
3. Negi, L. S., "Design of Steel structures", Tata McGraw Hill, New Delhi, 2nd Edition, 1997.

Reference Books:

1. Gaylord, E. H., Gaylord, C. N., Stallmeyer, J. E., "Design of Steel structures", Tata McGraw Hill, New Delhi, 3rd Edition, 1991.
2. IS 800: 2007, "General Construction In Steel- Code of Practice", BIS, New Delhi.
3. SP 6: (Part-1, 2, 3, 4, 5, 6 and 7), "Structural Engineering Hand Book", BIS, New Delhi.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Foundation Engineering	Course Code: CA6030		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: VI		

UNIT-I

Introduction & Soil Exploration:

Role of civil engineers in the selection, design and construction of foundation of civil engineering structures, Brief review of soil mechanics principles used in foundation engineering, Methods of soil exploration, Boring, Sampling, Penetration tests, Correlations between penetration resistance and soil design parameters

UNIT-II

Earth Pressures and Retaining Walls:

Earth pressure at rest, Active and passive earth pressure, Rankine's and Coulomb's earth pressure theories, Earth pressure due to surcharge, Retaining walls, Stability analysis of retaining walls, Proportioning and design of retaining walls.

UNIT-III

Slopes:

Mode of failure- Mechanism, Stability analysis of infinite slopes, Swedish slip circle method, Taylor's stability number and stability curves, methods of slices, Bishop's simplified method.

UNIT-IV

Foundations:

Types of Foundations, Mechanism of load transfer in shallow and deep foundations, Shallow foundations, Terzaghi's bearing capacity theory, Computation of bearing capacity in soil, Effect of various factors, Use of field test data in design of shallow foundations, Stress below the foundations, Settlement of footings and rafts, proportioning of footings and rafts, Sheet piling and bracing of foundation excavation

UNIT-V

Pile, Well and Machine Foundations:

Types and methods of construction, estimation of pile capacity, Capacity and settlement of group of piles, Proportioning of piles, Methods of construction of well foundation, Tilt and Shift, Remedial measures, Bearing capacity, Settlement and lateral stability of well foundation. Expansive and collapsible soil, Introduction to soil dynamics. Machine foundations

Text Books:

1. Punmia, B. C., Jain, A. K., Jain, A. K., "Soil Mechanics and Foundations", Laxmi publication Co. New Delhi, 16th edition, 2005.
2. Ranjan, G., Rao, A. S. R., "Basic and Applied Soil Mechanics", New Age International (P) Ltd., New Delhi, 2nd Edition, 2005.

Reference Books:

2. Singh, A., Chowdhary, G. R., "Soil engineering in theory and practice", CBS Publishers, New Delhi.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Transportation Engineering - II	Course Code: CA6040		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: VI		

UNIT-I

Introduction and Components:

Features and role of railways in transportation, Suitability of different gauges, Typical cross sections, Components of permanent way- Rails, Sleepers, Ballast, and Fixtures- functions, types requirements and failures, Coning of wheels, Tractive resistances.

UNIT-II

Geometric Design of Railway Tracks:

Geometric design of tracks- speed calculations, Gradients- ruling, momentum, pusher and minimum gradient, Super elevation, Cant Deficiency, Negative super elevation, Component of turn outs, points and crossings.

UNIT-III

Railway Station and Yards:

Station yards, Signalling and Interlocking, Level crossings.

UNIT-IV

Airport Characteristics:

Features and role of Airways in transportation, Air transportation planning, Site selection, Airport components and layout, Wind rose diagram, Basic runway length, and corrected runway length, Salient features of runway design.

UNIT-V

Geometric Design and Air Traffic Control:

Determination of turning radius of taxiway, Exit taxiway- design factors and elements, Airport markings and lightings, Air traffic control, Instrument landing systems

Text Book:

1. Saxena, S. C., Arora, S. P., "A Text Book of Railway Engineering", DhanpatRai Publications Pvt. Ltd., New Delhi, 6th Edition, 2001.
2. Khanna, S. K., Arora, M. G., and Jain, S. S., "Airport Planning and Design", Nem Chand and Bros., Roorkee, 6th Edition, 2008.

Reference Books:

1. Horonjeff, R. M., Mckelvey, F. X., Sproule, W. J., and Young, S., "Planning and Design of Airports", Mc-Graw Hill Publications, New Delhi, 5th Edition, 2010.
2. Chandra, S., and Agrawal, M. M., "Railway Engineering", Oxford University Press, 2007.
3. Chandra, S., and Kumar, V., "Airport Engineering",

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Principles of Management	Course Code: HA5010		
Credit: 2	L 2	T 0	P 0
Year: 3 rd	Semester: VI		

UNIT – I

5L

Overview of Management: Definition of management, need for management, role of managers, Management as science and art, evolution of management thought, contribution of Taylor and Fayol, Types of business organizations, Levels of management

UNIT – II

9L

Planning: Definition of planning, steps involved in planning, types of planning, objectives, process of managing by objectives, Strategy, types of strategies, Policy, types of policies, Decision making, types of decision making process.

UNIT – III

10L

Organizing: Nature, purpose and structure of organization, formal and informal organization, Departmentation, its importance, basis of departmentation, Line and staff authority, Centralization and decentralization, Authority and responsibility, delegation of authority
Selection and recruitment, orientation, appraisal, HRD.

UNIT – IV

8L

Directing: Creativity and innovation, Motivation, hierarchy of needs, motivation theories, Leadership – definition, elements, styles, leadership theories
Organization culture, elements and types of culture, managing cultural diversity.

UNIT – V

8L

Controlling: System and process of controlling, requirements of effective control, Types of control, cost control, purchase control, maintenance control, quality control, planning operations
Globalization and liberalization.

Reference Books:

Year: 3rd	Semester: VI						

Comprehensive training on any one of this software like

1. STAAD. Pro
2. Microsoft Project
3. Revit Architecture
4. MX Road
5. ERDAS (Image processing) / ILWIS (Open source)
6. ARC GIS / QUANTAM GIS

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Bridge Engineering	Course Code: CA7010		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

UNIT -I

Introduction:

Definition, Components of bridge, Historical Developments, Site Selection for bridges, classification of bridges, Survey and data collection for a bridge site selection, Hydraulic design, Design Discharge, Linear waterway, Economical span.

UNIT –II

Specifications of Road Bridges:

Indian road Congress Bridge code, carriageway, clearance, forces on bridge, review of IRC loadings, applications of loads on bridge such as dead load, impact load, live load etc.

UNIT-III

R.C.C. Slab Culvert:

RCC Slab culvert, dead load BM and SF, BM and SF for IRC class AA tracked vehicle, BM and SF for IRC class AA wheeled vehicle, BM and SF for IRC Class A loading, structural design of slab culvert.

UNIT-IV

T-Beam Bridge:

Proportioning of components, analysis of slab using IRC class AA tracked vehicle, structural design of slab, analysis of cross girder for dead load and IRC class AA tracked vehicle, structural design of cross girder, analysis of main girder using COURBON'S method, calculation of dead load and SF, calculation of live load BM and SF using IRC class AA tracked vehicle, structural design of main girder.

UNIT –V

Substructure, Foundations, Bearings, Joints and Appurtenances:

Definition of pier and abutment, design and drawing of pier and abutments, scour at abutments and pier, types of foundations, pile, well and pneumatic caissons, importance of bridge bearings, sketches of different types of bearings.

Text books:

1. Raju, N. K., "Design of bridges", Oxford and IBH publishing Co., New Delhi.
2. Victor, J., "Essentials of bridge engineering", Oxford and IBH publishing Co., New Delhi, 3rd Edition, 1980.

References books:

1. Bindra, S. P., "Principles and practice of bridge Engineering", Dhanpat Rai and Sons, New Delhi, 7th Edition, 1992.
2. "IRC 6-1966 Standard Specifications and code of practice for Road Bridges Section II loads and stresses", The Indian Road Congress, New Delhi.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Estimation & Costing	Course Code: CA7020		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

UNIT –I

Introduction & Estimation of Buildings:

Importance of estimation in Civil Engineering, Different types of Estimates, methods in Estimation, Study of various drawings with estimates, Concept of measurement, units of measurement. Methods of taking out quantities and cost by Centre line method and long wall and short wall method. Preparing of detailed estimates and abstract for the building, flat and sloped roof. Estimate of repair works and demolition of Civil Engineering structures.

Unit –II

Estimation of R.C.C. Structures:

Estimates of components RCC works in beams, column footings and roof slabs, Estimation of septic tank, manhole and RCC slab culverts. Estimation of industrial building with steel truss, Estimation of framed structures.

UNIT-III

Specifications and Rate Analysis:

Definition of specifications, objectives of writing specification, essentials of specification of various items of working in buildings. Importance working out quantities and rates for the following standard items of works-earth works in different types of soils, cement concrete of different mixes, Brick masonry, Stone masonry, Plastering, Painting and steel works, wooden works for doors, windows and ventilator.

UNIT-IV

Estimation of Earth Work and Road Projects:

Methods for computation of Earthwork-cross sections-mid sections formula, trapezoidal and average end area or mean sectional formula, proportional formula for different terrains. Estimation of Road Works -WBM, Bituminous mixes and cement concrete roads.

UNIT-V

Contracts and Tender:

Types of contract, essential of contracts agreement and document- legal aspects, penal provisions on breach of contract. Tender- E.M.D, Security deposit, Tender form, Tender notification procedures, Administrative Approval, Technical approval/sanction, Nominal muster roll, Measurement book- procedure for recording and checking measurements, Stores and records maintaining.

Text books:

- 1 Chakraborti, M., “Estimating, Costing, Specification and Valuation in Civil Engineering”, Published by author, Calcutta.
- 2 Dutta, B. N., “Estimating and Specification” UBS publishers and distributors, New Delhi, 2002.

Reference Books:

1. Basin, P. L., “Quality surveying”, S. Chand and Co., New Delhi.
2. Rangawala, S. C., “Estimating and Specification”, Charotar publishing House, Anand.
3. Nanavati, J., “Professional Practice for Civil engineers”.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Water Resources Engineering	Course Code: CA7030		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

UNIT -I

Principles of water Management:- Introduction, definition, necessity of irrigation, physical properties of soils, soils classification, Indian soils, soil water relationship. Frequency of irrigation. Water requirement of crop. Duty, delta and Base period. Quality of water for irrigation. Irrigation efficiencies.

UNIT –II

Method of irrigation: Introduction. Surface irrigation methods: furrow irrigation method. Subsurface irrigation: Drip or trickle method. Overhead irrigation- types of sprinklers. Bandhara irrigation: site selection, section of Bhandhara, advantage and disadvantages.

UNIT-III

Irrigation channels: introduction, classification, component of canal system. Design of channels on alluvial soils Kennedy and Lacey theory, Lined channels.

UNIT-IV

Reservoirs: Introduction. types of reservoir, selection of site for reservoir, investigation of reservoir and dam site, Definition of general term. Reservoir capacity from mass curve. Life of reservoir and its computation. Water losses from reservoir. Principles of reservoir operation.

UNIT –V

Head Works and Canal Structures: Layout, components, canal regulators: function and types of regulators. Canal drops component and types of canal drop. Hydraulic design for a notch type of drop. Cross drainage works: classification, hydraulic design principles for an aqueduct.

Text books:

- 1 Modi. P. N., “Irrigation water resources and water power engineering”, Standard Book House, New Delhi.
- 2 Garg, S. K., “Irrigation engineering and hydraulic structures”, Khanna Publishers, New Delhi, 23rd Edition, 2009.

References Books:

- 1 Sharma, R. K., “Text Book of Irrigation Engineering and Hydraulic Structures”, Oxford and IBH Publishing Co., New Delhi, 1984.
- 2 SahasraBudhe, Irrigation Engineering and Hydraulic Structures”, Dhanpat Rai Publication Ltd., New Delhi.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Construction Management	Course Code: CA7040		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VII		

UNIT-I

Network Techniques:

Introduction to network techniques, Use of Computer aided CPM and PERT for planning, Scheduling and control of construction works, Bar charts, Error in networks, Types of nodes and node numbering systems.

UNIT-II

Construction Planning:

Planning for construction and site facilities using networks, Preparation of construction schedules for jobs, materials, equipment, labour and budgets using CPM.

UNIT-III

Construction Equipment and Methods:

Equipment for earthworks, Concrete construction, Aggregate production, Concrete production, Handling and placement, Mixers, Vibrators and temperature control.

UNIT-IV

Control on Construction:

Construction quality control and inspection, Significance of variability and estimation of risk, Construction cost control, crashing of networks. Resource planning and scheduling

UNIT-V

Safety in Construction: Introduction, Evolution of safety, Cause of accident, injury. Principle of safety, safety act and regulations, roles of safety personnel, safety management system.

Text Book:

1. Shrivastav, U. K., "Construction Planning Management", Galgotia Publications.
2. Peurifoy, R. L., "Construction Planning, Equipment and Methods", McGraw Hill Publication, New Delhi, 7th Edition, 2013.
3. Jha, K. N., "Construction Project Management: Theory and Practice", Pearson Publication, New Delhi, 2012.

Reference Books:

1. Ahuja, H. N., "Construction Performance Control by Networks", John Wiley & Sons, 1976.
2. Satyanarayna, B., Saxena, S. C., "Construction, Planning and Equipment", Standard Publishers, 3rd Edition, 1985.
3. Moder, J. J., Phillips, C. R., "Project Management with CPM and PERT", Van Nostrand Reinhold Co., 2nd Edition, 1970.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Pre-stressed Concrete (<i>Elective – I</i>)	Course Code: CA7610		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

UNIT-I

Materials, Basic Principles of Pre-Stressing, Prestressing Systems: Basic concepts of prestressing, High strength concrete and steel, Stress-strain characteristics and properties, Various prestressing systems, Pre-tensioning and Post-tensioning systems with anchorages, Advantages and limitations of prestressed concrete.

UNIT-II

Analysis of Sections for Flexure: Basic assumptions, Analysis of stresses in concrete due to pre-stress and loads for different types of cross section, Pressure line or thrust line, Cable profile, Concept of load balancing, Cracking moment.

UNIT-III

Losses of Pre-Stress & Deflections: Nature of losses in pre-stress, various losses encountered in pre-tensioning and post tensioning methods, Deflection, Factors influencing deflection, Elastic deflection under transfer loads and due to different cable profile. Deflections limits as per IS-1343. Effects of creep on deflection crack widths.

UNIT-IV

Flexural and Shear Strength of Prestressed Concrete Sections: Types of flexural failure, IS code recommendations for flexure, Ultimate flexural strength of section. Shear and principal stresses, Ultimate shear resistance of prestressed concrete members, Shear reinforcement.

UNIT-V

Transfer of Prestress in Pre tensioned Members and Anchorage Zone Stresses in Post Tensioned Members: Transmission of pre-stress in pre-tensioned members, Transmission length, Bond stresses, Codal provisions for bond and transmission length, Anchorage stress in post-tensioned member. Bearing stress and bursting tensile force, IS code provisions.

Text Books:

1. Raju, N. K., "Pre-stressed concrete", Tata McGraw Hill, New Delhi, 1st Edition, 2012.
2. Ramamrutham, S., "Pre-stressed Concrete", DhanpatRai Publishing Company (P) Ltd., New Delhi, 2003.
3. Lin, T. Y., Burns, N. H., "Design of pre-stressed Concrete Structures", John Wiley and Sons. New York, 3rd Edition, 1981.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Ground Water Engineering (Elective – I)	Course Code: CA7620		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

UNIT-I

Introduction:

Groundwater occurrence and its role in hydrologic cycle, various usage of ground water Groundwater bearing formations, Attributes of an aquifer, Aquifer classification, Flow and storage characteristics of various types of aquifers, Recharge Processes, Storage release mechanism. Indian Scenario.

UNIT-II

Ground Water Flow in Cartesian Coordinates:

Differential Equations governing groundwater flow in Cartesian coordinates, Dupuit-Forchheimer assumptions, Analytical solutions, Numerical solutions, Regional groundwater planning, Stream-aquifer interflows,

UNIT-III

Ground Water Flow in Polar Coordinates:

Differential Equations governing groundwater flow in Polar coordinates, Well hydraulics, Analytical solutions for confined, leaky confined and unconfined aquifers, Image well theory, Time-variant pumping rates, Well interference, Analysis of pumping test data.

UNIT-IV

Wells and Ground Water Recharge:

Construction of wells, Various drilling techniques, Estimation of recharge, Flow in unsaturated zone, Experimental methods, Artificial recharge, Induced recharge, Roof water harvesting

UNIT-V

Contamination of Ground Water:

Contamination of ground water, Quality parameters and standards, River bank infiltration, Sea water intrusion

Text Book:

1. Todd, D. K., "Ground Water Hydrology", John Wiley & Sons, 1980.
2. Raghunath, H. M., "Ground Water", New Age International, 2007.

Reference Books:

1. Walton, W.C., "Ground Resource Evaluation", McGraw Hill, New Delhi, 1970.
2. Bear, J., "Hydraulics of Ground Water", McGraw-Hill International Book Co., 1979.
3. Bouwer, H., "Ground Water Hydrology", McGraw-Hill.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Environmental Risk Assessment and Disaster Management (Elective – I)	Course Code: CA7630		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

UNIT-I

Environmental attributes and assessment:

Introduction and Scope utility of the Environmental Impact Assessment process, expanded and narrowed scope of Environmental Impact Assessment, impacts of development activities, planning and management of impact studies. Environmental attributes and environmental indices and indicators, environmental assessment, methods and techniques, matrices, network and checklist methods, prediction techniques for quality of environmental attributes

UNIT-II

Environmental Impact and Risk Assessment:

Impact evaluation, assessment of impact on air, water, soil and ground water, noise, biological environment. Assessment of impact on socio-economic environment, evaluation methods, mitigation measures. Health risk assessment, Hazard identification, toxicology and dose response characterization, exposure characterization, risk characterization, uncertainty in estimates. Risk evaluation, risk acceptance, basic principles of health risk management.

UNIT-III

Understanding Disasters:

Meaning, nature, characteristics and types of Disasters, Causes and effects, Disaster: A Global View, Disaster Profile of India, The Disaster Management cycle.

Geological and Mountain Area Disasters: Earthquakes, Volcanic eruption, Landslides, Snow Avalanches. Wind and Water Related Natural Disaster: Floods and Flash Floods, Droughts Cyclones, Tsunamis. Man Made Disasters: Understanding Man Made Disasters: Fires and Forest Fires, Nuclear, Biological and Chemical disaster, Road Accidents.

UNIT-IV

Disaster Management:

Disaster Management: Prevention, Preparedness and Mitigation. Roles and responsibilities of different agencies and Government. Technologies for Disaster Management. Disaster Mitigation Strategies.

Text Books:

1. Jain, R. K., "Environmental Impact Assessment", John Wiley, 1978.
2. Paustenbach, D. A., "Risk Assessment: A text Book of Case Studies", John Wiley; 1992.
3. Edward, B., "Natural Hazards", Cambridge University Press, U.K., 2005.
4. Sharma, R.K. & Sharma, G., "Natural Disaster", APH Publishing Corporation, New Delhi, 2005.

Reference Books:

1. Kenneth, W., Werner, F. C., Davis W. T., "Air Pollution: Its Origin and Control", 3rd Edition, Prentice Hall.
2. Mishra, P. C., "Fundamentals of Air and Water Pollution", South Asia Books, 1990.
3. Masters, G., "Introduction to Environmental Engineering and Science", Prentice Hall of India, 2004.

**Course Structure & Syllabus of
B.Tech – Civil Engineering
Applicable for 2013-2017 Batch**

Course Title: Project Phase - II	Course Code: CA7110		
Credit: 2	L 0	T 0	P 4
Year: 4th	Semester: VII		

Major Project work allotted in the VI Semester will continue through VII Semester and will be completed in VIII Semester.

Course Title: Industrial Training and Presentation	Course Code: CA7510		
Credit: 4	L 0	T 0	P 8
Year: 4th	Semester: VII		

During Summer Vacation after VI th semester students are compulsorily required to attend Industrial Training of 6-8 weeks which will be evaluated in VII Semester under Industrial Training Presentation (CA7510).

**Course Structure & Syllabus of
B.Tech – Civil Engineering
Applicable for 2013-2017 Batch**

Course Title: Project Phase - III	Course Code: CA8110		
Credit: 4	L 0	T 0	P 8
Year: 4th	Semester: VIII		

Course Title: Hydraulic Structures	Course Code: CA8610		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

UNIT-I

Introduction:

Hydraulic structures for water resources projects.

UNIT-II

Embankment and Gravity Dams:

Embankment Dam: Types, design considerations, seepage analysis and control, stability analysis, construction techniques.

Gravity Dam: Forces acting on failure of a gravity dam, stress analysis, elementary profile, design of gravity dam, other functional features of a gravity dam

UNIT-III

Spillways:

Types and their design, spillway gates, Cavitations, Aerators and energy dissipation (terminal structures)

UNIT-IV

Channel Transitions:

Design principles for subcritical and supercritical flows.

UNIT-V

Hydropower plant:

Terms relating to hydropower, basic design aspects of different unit of hydropower plant

Reference Books:

1. Singh, B., "Fundamentals of Irrigation Engineering", Nem Chand & Bros, 9th Edition, 1997.
2. Asawa, G. L., "Irrigation Engineering", New Age International, 2nd Edition, 1996.
3. RangaRaju, K. G., "Flow through open Channels", Tata McGraw-Hill, 2003.
4. Subramanya, K., "Flow in Open Channels", Tata McGraw-Hill, 2nd Edition, 2000.
5. Chow, V. T., "Open Channel Hydraulics", McGraw-Hill, 1959.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Hydro Power Engineering	Course Code: CA8620		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

UNIT-I

Introduction:

Prospects of hydropower, Sources of energy, Hydropower potential, Distribution and development, Basin wise development of hydropower, Constraints in hydropower development.

UNIT-II

Stream Flow Data and Hydropower Potential:

Flow and load duration curves, Estimation of flow duration curve on un gauged site, Primary and secondary power, Storage and pondage, Load factor, Capacity factor, Utilization factor, Diversity factor.

UNIT-III

Types of Hydropower Plants:

Base and peak load hydropower plants, Run-of- river plants, Valley dam plants, Diversion canal plants, High head diversion plants, Pumped-storage power plants.

UNIT-IV

Intake Structures and Conveyance System:

Functions of intake structures, Its locations and types, Trash rack dimensions, Design, Spacing of bars, Methods of cleaning, Design of transition, Power canal-location site, Surges in canals, Penstocks types, Design and layout, Economical diameter of penstock, Hydraulic losses, Branches, Airvent, Forebay,

UNIT-V

Small Hydro Power Plant Development:

Benefits and potential of small hydropower plants, Components of small hydropower plants, Trench weir, Desilting tank and turbines

Text Book:

1. Varsney, R. S., "Hydro Power Structures", Nem Chand & Bros, 5th Edition, 2010.
2. Warnick, C.C., "Hydropower Engineering", Prentice Hall, 1984.

Reference Books:

1. Barrow, H. K., "Water Power Engineering", Tata McGraw-Hill.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: River Engineering	Course Code: CA8630		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VIII		

UNIT-I

Elements of River Geomorphology:

Origin and properties of sediments, river problems, control of vegetation and river morphology. Stable channel and their geometry, flow around river bends, braided river and meandering river

UNIT-II

Soil Erosion and Sediments Yield:

Types of erosion, mechanism of soil erosion, sediment delivery ratio, and process based modeling of soil erosion.

UNIT-III

Hydraulics of Streams:

Incipient motion, modes of sediment transport, bed-forms, resistance to flow in alluvial rivers, bed load transport, suspended load transport, Hydraulics geometry of gravel Bed Rivers, armouring, bed forms and resistance to flow in gravel Bed Rivers.

UNIT-IV

Bed Level Variations in Streams:

Degradation, local scour, Aggradations, Reservoir sedimentation, mathematical modeling for river bed variations

UNIT-V

Rivers and Environment:

Environmental effects of hydraulic structures, Structures, River Pollution, River action Plans, Stream restoration

Reference Books:

1. Garde, R. J., "River Morphology", New Age International, 2006.
2. Julin, P. Y., "Erosion and Sedimentation", Cambridge University Press, 1998.
3. Jansen, P. P. H., "Principles of River Engineering", VSSD Publications, 1994.
4. Rosgen, D., "Applied River Morphology", Wildland Hydrology books, Pagosa Springs, 1996.
5. Graf, W. H., Altinakar, M. S., "Fluvial Hydraulics: Flow and Transport Processes in Channels of Simple Geometry", John Wiley, 1999.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Water & Land Management	Course Code: CA8640		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

UNIT-I

Problems of irrigation systems in India & Soil, Water Plant Relationship

Problems of irrigation systems in India, Soil and Land Irrigability, classification, Basic concepts of diagnostic analysis. Evapotranspiration, crop coefficient, effective rainfall, crop water demand and availability, irrigation efficiencies.

UNIT-II

Irrigation scheduling & Micro level Planning:

Irrigation scheduling, Stressed irrigation, drought and water management policy during drought. Micro level Planning for any canal/tube well system, Evaluation of chak planning and design.

UNIT-III

Water application methods & Operation and maintenance of irrigation system:

Water application methods, Border irrigation, basin irrigation, furrow irrigation, sprinkler and drip irrigation. Operation and maintenance of irrigation system, rotational water distribution systems- arabandi. Evaluation of irrigation project's performance and improvement.

UNIT-IV

Evaluation and status of land development:

Evaluation and status of land development in irrigated commands, Norms of land leveling, methods of land leveling. Plane method or centroid method, contour adjustment method.

UNIT-V

Water Management for Irrigation:

Irrigation behaviour and decision making, Attitudes and their influence on irrigation management, night irrigation, participatory irrigation management, irrigation organizations.

Text Books:

1. Michael, A. M., "Irrigation: Theory and Practice", Vikas Publishing House Pvt Ltd, New Delhi, 2008.
2. Allen, R. G., Pereira, L. S., Raes, D., Smith, M., "FAO Irrigation and Drainage Paper: Crop Evapotranspiration (guidelines for computing crop water requirements)", No. 56, Rome, Italy.
3. FAO Irrigation and Drainage Paper no. 24 & 58, Rome, Italy.
4. Asawa, G. L., "Irrigation and Water Resources Engineering", New Age International, New Delhi, 2006.
5. Mazumdar, S. K., "Irrigation Engineering", Tata McGraw Hill Publication, New Delhi.

Reference Books:

1. Diagnostic Analysis of Minor irrigation scheme, Publication no. 11, WALMI, Aurangabad (Maharashtra).
2. Application of soil survey in Irrigation Water Management, Publication no. 21, WALMI, Aurangabad (Maharashtra).

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Air and Water Pollution	Course Code: CA8650		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VIII		

UNIT-I

Introduction:

Introduction and scope, Dispersion and interaction of pollutants, Air quality, Mass balance approaches, Box model approaches, Air quality dispersion-modeling approaches, Water quality, Mass balance approaches, Aquatic ecosystem modeling approaches, Air and water chemistry.

UNIT-II

Measurement of Air & Water Quality:

Different measurement methods, Monitoring and modeling of indoor and ambient air quality, Emission inventory, Key meteorological data, Pollution of surface and ground water resources and control mechanisms, Baseline monitoring of surface waters, Ground water quality, Mitigation measures.

UNIT-III

Impact of Air and Water Pollution:

Impact of air and water pollution on ecosystems, Mitigation measures, Carrying capacity of air and watersheds.

UNIT-IV

Quality Standards and Regulations:

Air and water pollution versus health risk and global climate change, Air and water quality standards, National and international regulations and legislations.

UNIT-V

Quality Management and Reclamation:

Air quality management, Reclamation of water bodies, Technology and policy options for controlling air and water pollution, Decision method for evaluation of alternatives.

Text Book:

1. Mishra, P. C., "Fundamentals of Air and Water Pollution", APH Publishing Corporation, 2008.
2. Kenneth, W., Warner, F. C. and Davis W. T., "Air Pollution, Its Origin and Control", Prentice Hall, 3rd Edition, 1997.

Reference Books:

1. Davis, M. L. and Cornwell, D. A., "Introduction to Environmental Engineering", McGraw-Hill, 5th Edition, 2012.
2. Chin, D. A., "Water Quality Engineering in Natural Systems: Fate and Transport Processes in the Water Environment, John Wiley, 2nd Edition, 2012.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Environmental Management & Sustainable Development	Course Code: CA8660
Credit: 3.5	L T P 3 1 0
Year: 4th	Semester: VIII

UNIT-I

Introduction:

Introduction and scope, Inter-linkages of energy-environment and economy from engineering infrastructure perspective.

UNIT-II

Ecology & Environmental Resources:

Concepts of ecology, Systems approach and sustainability engineering, Interaction between energy and environmental resources, Environmental quality standards and indices (Indian and International)

UNIT-III

Environmental Monitoring and Management:

Environmental monitoring, Analysis, Statistics and data interpretation, Environmental management system.

UNIT-IV

Environmental Impact Assessment:

Environmental impact assessment, Life cycle assessment and risk analysis of scientific and technological developments, Environmental audit.

UNIT-V

Sustainable Development:

Sustainable development within the context of global economy, Technology and climate change.

Text Book:

1. Mishra, P. C., "Fundamentals of Air and Water Pollution", APH Publishing Corporation, 2008.
2. Kenneth, W., Warner, F. C. and Davis W. T., "Air Pollution, Its Origin and Control", Prentice Hall, 3rd Edition, 1997.
3. Baker, S., "Sustainable Development", Routledge Publication, New York, 2008.

Reference Books:

1. Davis, M. L. and Cornwell, D. A., "Introduction to Environmental Engineering", McGraw-Hill, 5th Edition, 2012.
2. Chin, D. A., "Water Quality Engineering in Natural Systems: Fate and Transport Processes in the Water Environment, John Wiley, 2nd Edition, 2012.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Seismology & Earthquake Engineering	Course Code: CA8670		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

UNIT-I

Introduction:

Earthquake occurrences – Global Seismic Belt; Indian Seismic Zoning map, their engineering implications: Damage survey, seismic intensity, isoseismic maps, More commonly used earthquake parameters like epicenter, epicentral distance, origin time, focus, magnitude, frequency; Elementary information on seismic wave propagation. Demonstration of seismographs to explain earthquake recording

UNIT-II

Single Degree of Vibration Freedom System:

Introduction to vibration problems, Un-damped and Damped free vibration with viscous damping, Forced vibrations, Steady state, Vibration Isolation, Vibration Measuring Instruments, (Demonstration for determination of damping, frequency etc.), Response of un-damped systems to time dependent force functions (Pulse/impulses), Duhamel's Integral, Response to ground motion, Response spectra.

UNIT-III

Two Degree of Freedom System:

Determination of natural frequency and mode shapes, Steady state forced vibrations.

UNIT-IV

Multiple Degree of Freedom System:

Rayleigh's Method - Determination of fundamental frequency of simple systems, free vibrations of undamped systems – Determination of frequency and mode shapes by Holzer method, Stodola Method, Evaluation of earthquake forces in multi-storeyed buildings using response spectra

UNIT-V

Earthquake Effects:

Ground failures, Local site effects, Effects on ground and structure, Land-slides, Cracks & collapse of structures, Types of failure of earth fill. Treatment of Damaged Fill

Text Books:

1. Chopra, A. K., "Dynamic of structures", Prentice Hall, 4th Edition, 2011.
2. Paz, M., Leigh, W., "Structural Dynamics: Theory and Computation", Springer, 5th edition, 2006.

Reference Books:

1. Krishna, J., Chandrasekran, A. R. and Chandra, B. "Elements of Earthquake Engineering", South Asia Publisher, New Delhi, 2nd Edition.
2. Okamoto, S., "Introduction to Earthquake Engineering", University of Tokyo Press, Tokyo.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Advanced Structural Design	Course Code: CA8680		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

UNIT-I

Elastic analysis of R.C. beams and frames. Analysis and design of flat slabs; equivalent frame method, direct design method, deflection calculations.

UNIT-II

Analysis and design of deep beams. Design of grid floors and cylindrical shells.

UNIT-III

Analysis and Design of shear walls

UNIT-IV

Design of industrial buildings, bracing, gantry girders and stepped columns.

UNIT-V

Microwave towers, Chimney and transmission towers. Plastic design principle, High rise building

Text Books:

1. Jain, A. K., "Reinforced Concrete- Limit State Design", 6th Ed., Nem Chand & Bros, 2006.
2. Varghese, P. C., "Advanced Reinforced Concrete Design", Prentice Hall, 2001.
3. Pillai, S. D., Menon, D., "Reinforced Concrete Design", Tata McGraw- Hill, 2003.

Reference Books:

1. Agarwal, P., Shrinkhande, M., "Earthquake Resistance Design of Structures", Prentice- Hall of India, 2006.
2. Raju, N., K. "Advance Reinforced Concrete Design", CBS Publishers, 1986.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Finite Element Analysis	Course Code: CA8690		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VIII		

UNIT-I

Introduction: Basic concepts, Background review, Theory of elasticity, matrix displacement formulation, energy concepts, equilibrium and energy methods of analyzing structure, Rayleigh- Ritz method, Galerkin's method, simple application in structural analysis

UNIT-II

Fundamentals of Finite element Method: Displacement function and natural coordinate's construction of displacement function for 2D truss and beam element, application for FEM for the analysis of truss, continuous beam and simple frame problems.

UNIT-III

Analysis of 2D continuum Problems: Element and shape function, Triangular, rectangular and quadrilateral element, different type of element, their characteristics and suitability for application, polynomial shape function, Lagrange's and Hermitian polynomial, compatibility and convergence requirements of shape functions.

UNIT-IV

Theory of Isoperametric Element: Isoparametric, sub-parametric and super-parametric elements, characteristics of isoparametric quadrilateral elements.

UNIT-V

Introduction to plate bending problems and techniques: Introduction to plate bending problems and techniques for nonlinear analysis, Structure of computer program for FEM analysis, description of different modules, pre and post processing.

Text Book:

1. Krishnamoorthy, C. S., "Finite Elements Analysis-Theory and Programming", Tata McGraw Hill Co. Limited, New Delhi.
2. Abel, J. F., Desai, C. S., "Introduction to the Finite element Method", Affiliated East West Press Pvt. Ltd., New Delhi.

Reference Books:

1. Bathe, K. J., "Finite Elements Procedure", PHI Pvt. Ltd, New Delhi.
2. Zienkeiwicz, O. C., "The Finite Element Method", Tata McGraw Hill Co. Limited, New Delhi.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Traffic Engineering & Management	Course Code: CA8600		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

UNIT-I

Fundamentals of traffic flow:

Characteristics of traffic engineering elements- vehicle, driver, road; Fundamentals of traffic flow- speed, density, flow and their relationship. Uninterrupted traffic flow- data collection, different models related to traffic flow; Interrupted traffic flow- shock wave, flow at signalized and un-signalized intersections; Delay and queue analysis.

UNIT-II

Traffic facilities:

Intersections – signalized and un-signalized. Interchanges – types, warrant. Parking – different types, Road signs, Road markings, Bus terminals.

UNIT-III

Transportation planning process:

Goals, objectives; Transportation needs; Generation, evaluation of alternatives and their implementation.

UNIT-IV

Travel demand analysis:

Introduction, nature and analysis of travel demand, Data collection, Four stage transportation models, Trip generation, trip distribution, modal split and traffic assignment.

UNIT-V

Public Transport System:

Para-transit, transit and rapid transit systems Route development – properties and development of route; Bus stop location, Schedule development – properties, schedule determination of single route transit system. Multi modal transport system.

Text Books:

1. Flaherty, C. A. O., “Transport Planning and Traffic Engineering”, Butterworth-Heinemann.
2. Chakroborty, P., Das, A., “Principle of Transportation Engineering”, Prentice Hall of India Pvt. Ltd.
3. Vuchic, V. R., “Urban Transit Systems and Technology”, Wiley, 1st Edition, 2007.

Reference Books:

1. May, D. A., “Traffic Flow Fundamentals”, Prentice Hall, 1st Edition, 1990.
2. Slin, M., guest, P. and Matthews, P., “Traffic Engineering Design: Principles and Practice”, 2nd Ed., Butterworth-Heinemann.
3. Garder, N.J. and Hoel, L.A., “Traffic Engineering”, Brooks/Cole, Pacific Grove, 3rd Ed.
4. Highway Capacity Manual, 2000.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Advanced Highway Engineering	Course Code: CA86A0		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VIII		

UNIT-I

Introduction:

National Road Development Program, Bombay Plan, Lucknow Plan, IRC Vision- 2021 and Rural Road Vision-225, Comparison and significance, financial analysis of highway projects, Vehicle Operating Cost.

UNIT-II

Road Materials:

Tests on soil (plate load, CBR and Triaxial), strength of pavement materials, importance and functions of each layer of pavement and subgrade, Alternate forms of aggregates, theory of specifications of fillers, additives, emulsions, cutbacks and modifies binder, Mix designs- Marshall, Hubbard Field and Hveem Method, Requirement of a mix. Stabilized Roads: Aggregate mixtures, Proportioning, types of stabilizations, advantages and limitation, special problems related to drainage, control of seepage and capillary rise

UNIT-III

Design of Flexible Pavements:

Design of Flexible Pavements: Design factors, empirical, semiempirical and analytical design methods, California bearing ratio, Triaxial, Mcleod and Burmister method, advantages and limitations, IRC method of design.

UNIT-IV

Design of Rigid Pavements:

Design of Rigid Pavements: Design factors, load and temperature stresses, load transfer devices, design of Dowel and Tie bars, Joint requirement and working, IRC methods of design of SFRC pavements, construction techniques and specifications, quality control tests, continuously reinforced concrete pavements.

UNIT-IV

Pavement Evaluation Techniques and Maintenance:

Benkelman beam deflection method, flexible and rigid overlays. Routine and periodic maintenance, special repairs, maintenance management system, case study of failure of flexible and rigid pavements.

Reference Books:

1. Yodar, E. J., "Principle of Pavement Design", Wiley, 2nd Edition.
2. Statinary Off., H. M., "Bituminous Material in Road Construction", Road Research Laboratory, 1962.
3. Kerbs, R. D., and Walker, R. D., "Highway Materials", McGraw-Hill, 1971.
4. Khanna, S. K., Justo, C. E. G., "Highway Engineering", Nem Chand and Bros, 2001.
5. Huang, Y.H., "Pavement Analysis and Design" Prentice Hall.
6. Wright, P. H., Dixon, K. K., "Highway Engineering", John Wiley, 2004.
7. Kadiyali, L.R. and Lal, N. B., "Principles and Practices of Highway Engineering", Khanna Publishers, 2006.
8. ASTM Standards Handbooks.

Course Structure & Syllabus of B.Tech – Civil Engineering Applicable for 2013-2017 Batch

Course Title: Numerical Techniques	Course Code: JA4610		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

Unit I:

Introduction to numerical computing; Approximations and Errors in numerical computations; Truncation and Round off errors; Propagation of errors; Root finding: Bisection method; Regula-falsi method; Iteration method; Newton Raphson method; Rate of convergence of above methods.

Unit II:

Matrix algebra; Solution of simultaneous linear algebraic equations: Gauss elimination; Gauss Jordan method; LU Decomposition method; Jacobi method; Gauss Seidel method.

Unit III:

Interpolation and Extrapolation: Finite differences; Difference table; Newton's forward and backward interpolation formula; Divided differences and Newton's divided difference formula; Numerical differentiation; Numerical integration: Trapezoidal; Simpson's rules and Weddle's formula.

Unit IV:

Numerical solution of O.D.E.: Taylor series method; Euler's method; Modified Euler's method; Forth order RungeKutta methods; Multistep methods: Milne's method; Adams Bash forth method.

Text Books:

1. **Introductory Methods of Numerical Analysis**, S.S. Sastry, PHI learning Pvt. Ltd, 4th edition, 2005.
2. **Numerical Methods for Scientific and Engineering computation**, M.K Jain, S.R.K Iyengar and R.K Jain, New age International Publishers, 4th Edition, 2003.

Reference Books:

1. **Numerical Methods in Engineering and Science**, B. S. Grewal, Khanna Publishers, New Delhi, India, (9th Edition), 2010.
2. **Applied Numerical Analysis**, Curtis F. Gerald and Patrick O. Wheatley, Pearson Education Lt, 7th Edition, 2009.

Elective – I		Elective – II	
DA7610	Grid Computing	IA8640	Ethical Hacking
DA7620	Mobile Computing	IA8620	Storage Networks
DA7630	LAMP Technologies	IA5010	Multimedia Technologies

Note: * The student shall undergo 'Industrial Training' during Summer Vacations and shall prepare the Report and Make a Presentation during this semester.

Year: 4th

Semester: VIII

Course Code	Course Title	L	T	P	Credit
DA8010	Business Intelligence	3	1	0	3.5
DA8020	Soft Computing	3	1	0	3.5
DA8030	Cloud Technologies	3	0	0	3
	Elective-III	3	0	0	3
	Open Elective	3	0	0	3
DA8110	Seminar	0	0	2	1
DA8120	Project Phase -III	0	0	8	4
	Total				21

List of Elective Subjects for VIII Semester

Elective – III	
DA8610	Digital Image Processing
DA8620	Advanced Computer Networks
DA8630	Computer Vision

List of Open Electives (To be conducted in VIII Semester)

Sl. No.	Branch	Subject Code	Name of Elective subjects
---------	--------	--------------	---------------------------

**Course Structure & Syllabus of
B.Tech – Computer Science & Engineering
Applicable for 2013-2017 Batch**

1	Physics	OA8710 OA8720	1. Nano Scale Science and Technology 2. Photonics Technology
2	EE	EA8710 EA8720	1. Non-Conventional Energy Resources 2. Instrumentation and Process control
3	ME	LA8710 LA8720	1. Entrepreneurship development 2. Quality Management
4	Civil	CA8710 CA8720	1. Environment and Ecology 2. GIS
5	CSE	DA8710 DA8720	1. Business Intelligence 2. Artificial Intelligence
6	IT	IA8710 IA8720	1. Multi-Media Technology 2. IT In Business
7	ECE	FA8710	1. Consumer Electronics
8	Humanities	HA8710 HA8720	1. Industrial Psychology 2. Human Values and Ethics
9	MBA	GA8710 GA8730 GA8740	1. Organizational Behavior 2. Digital Marketing 3. Financial Modeling with Spread sheet

Summary of the Credits

Year	Semester	Credit	Year Credit
First Year	I	21	45
	II	24	
Second Year	III	23.5	48
	IV	24.5	
Third Year	V	22.5	46
	VI	23.5	
Fourth Year	VII	22.5	43.5
	VIII	21	
Total			182.5

**Course Structure & Syllabus of
B.Tech – Computer Science & Engineering
Applicable for 2013-2017 Batch
Detailed Syllabus**

Course Title: Engineering Maths-I	Course Code: MAT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT I: Matrices

8L

Elementary row and column transformation, rank of matrix, linear dependence, consistency of linear system of equations, Eigen values and Eigen vectors, Cayley-Hamilton theorem.

UNIT II: Differential Calculus

8L

Functions, Limits, Continuity, Differentiability, Leibnitz theorem, Partial differentiation, Euler's theorem, Expansion of functions of several variables, Extrema of functions of several variables, Lagrange's method of multipliers.

UNIT III: Infinite Series

6L

Introduction, sequences, series, convergence, series of positive terms, comparison test, Integral test, D'Alembert's Ratio test, Raabe's test, Cauchy's root test, Alternating series: Leibnitz rule, power series.

UNIT IV: Multiple Integrals

8L

Beta and Gamma functions, Double and Triple integrals, change of order of integration, change of variables, Dirichlet integral and its applications.

UNIT V: Vector Calculus

8L

Point functions, Gradient, Divergence and curl of a vector and their physical interpretation, line integral, surface integral, volume integral, Green's Theorem, Stoke's theorem, Gauss Divergence theorem.

1. B. S. Grewal: Higher Engineering Mathematics, Khanna publication.
2. E. Kreyszig : Advanced Engineering Mathematics, Wiley publication.
3. R. K. Jain & S. R. K. Iyenger: Advanced Engineering Mathematics, Narosa publication.
4. G. Prasad: Differential & Integral calculus, Pothishala publication, Allahabad.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Physics	Course Code: PYT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT-I

(8) L

Interference:

Introduction, Coherent Sources, Analytical treatment of interference, Young's double slit experiment and its analysis, Conditions of Interference, Fresnel's Biprism, fringes with white light, Determination of wavelength of monochromatic light by using Fresnel's Biprism method, Displacement of Fringes, Interference in plane parallel thin film (reflected and transmitted light) and wedge shaped film(reflected light only), Newton's Rings, Determination of wavelength of monochromatic light and determination of refractive index of a liquid by using Newton's ring method.

UNIT-II

(8) L

Diffraction:

Introduction, Difference between Interference and diffraction, resultant of superposition of n simple harmonic coherent vibrations, Fraunhofer diffraction due to single slit: resultant intensity, conditions of maxima, minima, angular and linear width of central maximum, Double slit diffraction: resultant intensity, missing order, N-slit diffraction : resultant intensity, conditions of maxima and minima, missing orders, angular width of principal maxima, Diffraction grating: formation of spectra and missing order spectra in spectrum, dispersive power of grating, Resolving power, Rayleigh Criterion of resolution, Resolving power of plane transmission diffraction grating.

UNIT-III

(8) L

Polarization:

Polarised and unpolarised light and its pictorial representation, plane of polarisation and plane of vibration, Phenomenon of Double Refraction, positive and negative double refracting crystals, properties of ordinary and extra-ordinary Rays, Nicol Prism and its application as a polariser and analyser, Mathematical analysis of superposition of two linearly polarised light vectors, retardation plates – half wave plate and quarter wave plate, Production and detection of Plane, Circularly and Elliptically Polarized Light.

UNIT-IV

(10) L

Laser : Spontaneous emission, stimulate demission and stimulated absorption, Einstein's A and B Coefficients and relation between them, Principle of Laser Action, Construction and Working of He-Ne, Semiconductor Laser.

Introduction to Fibre Optics: Fundamental ideas about optical fiber, Types of fibers, Acceptance angle and cone, Numerical aperture.

Magnetic Properties of Materials: Basic Concept of Para-, Dia and Ferro-Magnetism, Phenomenon of Hysterisis

Magnetic Circuits: Introduction, magnetomotive force, magnetic field intensity, permeability of free space, reluctance, law governing magnetic circuits.

Superconductivity: Temperature dependence of resistivity in superconducting material, effect of magnetic field (Meissner effect), Type I and Type II superconductors.

UNIT V

(10) L

Wave Mechanics :

Wave Particle Duality, de Broglie Concept of Matter Waves, Davisson and Germer experiment, Concept of wave packet, group and phase velocity, Heisenberg Uncertainty Principle and its applications viz. non existence of electron in nucleus, radius and energy of Bohr's first orbit, Schrödinger time independent and time dependent wave equation, Physical interpretation of wave function, Application of Schrodinger wave equation : Particle in a one dimensional box (eigen function and eigen values).

Science and Technology of Nanomaterial :

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Introduction to Nanomaterial, Basic principle of nano science & technology, creation and use of Bulky Balls, structure, properties and use of Carbon nanotubes, applications of nanotechnology.

Reference & Text Books:

|---|---|------------------------------------|
| 1. Concepts of Modern Physics | - | Arthur Beiser (Mc-Graw Hill) |
| 2. Introduction to Special theory of Relativity | - | Robert Resnick - Wiely |
| 3. Fundamentals of Optics | - | Jenkins and White |
| 4. Optics | - | AjoyGhatak (TMH) |
| 5. Optics | - | Brijlal and Subrahmanyam |
| 6. Lasers: Fundamentals and applications | - | K. Thyagarajan, AjoyGhatak |
| 7. University Physics | - | Sears and Zeemansky |
| 8. Principles of Physics | - | Halliday, Resnick&Jearl Walker |
| 9. An Introduction to Quantum Mechanics | - | David. J. Griffith |
| 10. Introduction to Fiber optics | - | AjoyGhatak& K. Thyagarajan (TMH) |
| 11. Optical Fiber Communications | - | Keiser G. |
| 12. Nanomaterials- Synthesis, Properties and Applications | - | Edelstein A. A. and Cammaratta R.C |
| 13. Nanotechnology | - | T. Pradeep (Tata McGraw-Hill) |

PHYSICS LAB (PYP151)

List of Experiments

(At least six)

1. To determine the wavelength of monochromatic light by Newton's ring.
2. To determine the wavelength of monochromatic light with the help of Fresnel's biprism.
3. To determine the focal length of two lenses by nodal slide and locate the position of cardinal points.
4. To determine the specific rotation of cane sugar solution using bi quartz polarimeter.
5. To determine the wavelength of spectral lines using plane transmission grating.
6. To determine the specific resistance of the material of given wire using Carey Foster's bridge.
7. To determine the variation of magnetic field along the axis of a current carrying coil and then to estimate the radius of the coil.
8. To verify Stefan's Law by electrical method.
9. To calibrate the given ammeter using potentiometer.
10. To calibrate the give voltmeter using potentiometer.
11. To determine energy band gap of a given semiconductor material by p-n junction method.
12. To determine the viscosity of water by Poisseuille's method.

Note: Additional experiments may be added based on contents of syllabus.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Essentials of Mechanical Engineering	Course Code: MET101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT – I

9L

Introduction to Engineering: Difference between Science and Technology, history of wheel, introduction to prime movers, transmission system, belt, pulleys, gear system and nomenclature, braking system, Mechanism, lever mechanism, Working principle of power generation system, hydel power plant, thermal power plant and its main components.

Coplanar Force system: Resolution of force in two mutually perpendicular direction Free Body Diagram, Moment, Varignon's theorem, static equilibrium, Lami's Theorem, type of joints/Support, Type of load: point load, uniformly constant and varying loads, beam and its type.

UNIT – 2

7L

Engineering material and their properties: Details of hook's law, Proportional limit, Yield point, Yield Stress, Engineering strain, Engineering stress, True stress and Strain, Plasticity, Elasticity, Allowable Strength, Hardness, Ductility, toughness, Fatigue, creep, strain energy, Impact Strength, Young modulus of Elasticity, Bulk Modulus, Poission Ration and its relation in between.

Stress and strain: Normal stress and strain, principle of Superposition, Deformation in stepped and composite bar.

UNIT – 3

7L

Thermodynamics: Macroscopic & microscopic study point of view, System, Surrounding and Universe, Phase, Property, State, Path, Process, Cyclic and non-cyclic processes, Quasi static process, Reversible and irreversible processes , Thermodynamic equilibrium, Concept of continuum, Energy and its forms, Enthalpy, Zeroth law, Different temperature scales and theory of temperature and Pressure measurement.

UNIT – 4

8L

Laws of thermodynamics: Thermodynamic definition of work, Thermodynamic processes, Calculation of work in various processes and sign convention, Non-flow work and flow work, Joules' experiment, First law of thermodynamics, Internal energy and enthalpy, First law of thermodynamics applied to open systems, Steady flow energy equation and its applications, First law analysis for closed system (non flow processes), Limitations of first law of thermodynamics, PMM-I.

Statement of Second law of thermodynamics: Kelvin Planck's statement and Clausius statement and their equivalence.

UNIT – 5

9L

Power generation: Air standard cycle, IC Engine, Carnot cycle, Otto cycle, Diesel cycle, Important components of I.C.Engine, two stroke and four stoke engine, S.I. and C.I. engines, efficiency of Otto and diesel cycle

Basics of Heat Transfer: Concepts of the mechanisms of heat flows: conduction, convection and Radiation heat transfer application in engineering.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Reference Books:

1. Basu,A.R; A Text book of Engineering Mechanics(Applied Mechanics);2003 Edition; Dhanpat Rai & co.(p) Ltd, Delhi.
2. Chandramouli, P.N; Engineering Mechanics; Second Printing; PHI Learning Private Limited, Delhi; 2013.
3. Rajput, R. K; Material Science; S. K. Kataria & Sons, New Delhi.
4. Dubey, N. H; Engineering Mechanics, Statics and Dynamics; First reprint; McGraw Hill Education (India) Private Limited, New Delhi, 2013.
5. Ratan, S.S; Theory of machines; Second Edition; Tata McGraw Hill Publishing Company Limited, New Delhi.

8. Kumar.D.S; Basic of Mechanical Engineering; S. K. Kataria & Sons, New Delhi.

Essentials of Mechanical Engineering (MEP-151)

List of Experiments

1. Tensile test
2. Impact test
3. Hardness test
4. Pulley experiment
5. Experiment on conduction heat transfer
6. Demonstration of Impulse and reaction turbine
7. Study of 4s and 2S engine petrol Engine
8. Study of 4s and 2S engine Diesel Engine
9. Study of refrigerator and air conditioning

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Professional Communication	Course Code: HMT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

OBJECTIVES:

- 1) To strengthen the Professional Communication skills of upcoming professionals.
- 2) To make them aware about the new forms and trends of business and technical writings.
- 3) To develop the students' interpersonal skills in order to ensure his / her optimum performance as an employee.
- 4) To prepare students for facing the challenges of their professional lives in an increasingly globalized world.

Unit –I Professional Communication

8 Hours

1. Professional Communication: Interpretation, Process, Forms, Barriers and Overcoming Barriers.
2. Types of Communication-Verbal, Non-Verbal, Oral, Written, Formal, Informal.
3. Communication Levels (Intra personal, Interpersonal, Group, Public communication) and Communication Flow (Downward, Upward, Lateral and Diagonal flow).
4. Technical Writing-Meaning, Types and process of preparing a technical document. Acronyms, Jargons.
5. Understanding and Practice of Paragraph writing-Principles of paragraph writing (unity, coherence and logical development of the ideas)
6. Communication: Impact of internet on communication, communicating through computers.

Unit-II Business Communication

10 Hours

1. Business communication – Meaning, Type and Format.
2. Intra-office communication – Types (Face to Face communication, Telephonic conversation, Letters, Memorandum, E-mails, Notice, Memo, Agenda, Minutes.), advantages and disadvantages. various types of intra-office communication
3. Inter-office communication –Face to Face communication, Telephonic Communication-mails, Letters (Sales, Credit, Enquiry, Quotation, Order, Complaint and Adjustment Letter), advantages and disadvantages of various types of inter-office communication.
4. Job-Application Letter and Resume.

Unit-III Technical Proposal and Report

A. Technical Proposal –Types, Format, Preparation of Proposal .

5 Hours

- **For B.Tech students-**
Technical Proposal to organize a Technical Training Program, to develop new range of products, establish new laboratory, or start a new venture.
- **For B.Pharma students-**
Technical proposal to establish a new laboratory, to create new drug-composition, or to visit a super specialty Hospital.
- **For B.Arch students-**
Technical proposal for an archeological site visit, or to construct new buildings.
- **For MCA students-**
Technical proposal to develop new software, or, to organize an induction program for the new entrants.
- **For MBA students-**
Proposal for establishment of a new department, for a new administrative system, or for new HR policies.

B. Technical Report –Types, Format, Preparation of Report.

5 Hours

- **For B.Tech students-**

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Technical Report describing new machinery, a report on the sudden break-down in production unit, Annual Financial Report and market survey report for formulating new market strategy.

- **For B.Pharma students-**

Technical Report based on the site-inspection of a drug manufacturing unit, Survey report on health awareness and self-medication.

- **For B.Arch students-**

Technical Reports based on a Site Inspection for geographical and geological aspects of a particular location. A report on the archeological survey of a monument.

- **For MCA students-**

Technical Report based on function of new technology (software or hardware), Technical Reports on Client's need for a Payroll management system/ Hospital management system.

- **For MBA students-**

Preparation of Annual Report of the organization, preparation of departmental reports and report based on the study of a successful organization.

Unit-IV Soft-Skills

8 Hours

1. Non-Verbal Communication -Kinesics, Oculistics, Vocalics, Proxemics, Chronemics.
2. Interpersonal Skills, Social-Skills
3. Personality-Meaning and Types, Attitude
4. Self-Management, Emotional Quotient, Time management, and Stress-Management.
5. Image-building / Impression –Management.
6. Leadership and Team-Building and Conflict.

Language-Lab

12 Labs

1. Stress, Intonation and Rhythm.
2. Overcoming Mother-Tongue Influence.
3. JAM session, Debate, Extempore.
4. Role-play, Information Exchange / Gap Activity.
5. Presentation Skills.
6. Group-Discussion Skills.
7. Preparing for interview.

Text Books:

12. Essentials of Business Communication, Rajendra Pal and J. S Kothari- Sultan Chand

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Computer Fundamental& C Programming	Course Code: CST101						
Credit: 2	<table style="margin: auto;"><tr><td style="padding: 0 10px;">L</td><td style="padding: 0 10px;">T</td><td style="padding: 0 10px;">P</td></tr><tr><td style="text-align: center;">2</td><td style="text-align: center;">0</td><td style="text-align: center;">0</td></tr></table>	L	T	P	2	0	0
L	T	P					
2	0	0					
Year: 1 st	Semester: I						

UNIT: 1

5L

Introduction to the Digital Computer (brief description about its components), Characteristics of computer system, Introduction to operating systems(DOS, Linux, Windows), function and types of operating system, Number Systems and conversion methods (Binary, hex, octal), Concept of flow chart, Write & execute the first C programme, C Data Types & Operators.

UNIT 2:

4L

Conditional Program Execution: Applying if-else and nested if-else statements, switch-case statements, restrictions on switch values, use of break & default with switch.

Program Loops & Iteration: Uses of loops (while, do-while and for), use of continue statement.

Function: function prototypes, call by value and call by reference function, recursion.

UNIT 3:

4L

Arrays: Insertion and deletion in single dimensional array, linear searching, sorting (bubble sort), Strings.

Structures: Purpose and uses of structures, declaring structures, array of structures

TEXT BOOKS:

1. Yashwant Kanetkar, "Let us C", BPB Publications, 2nd Edition, 2001.
2. Herbert Schildt, "C: The complete reference", OsbourneMcgraw Hill, 4th Edition, 2002.
3. P.K. Sinha "Computer Fundamentals" B.P.B Publication

REFERENCE BOOKS:

1. Raja Raman, "Computer Programming in C", Prentice Hall of India, 1995.
2. Kernighan & Ritchie, "C Programming Language", The (Ansi C Version), PHI, 2nd Edition.
3. Byron Gottfreid "Schaum's Outline of Programming with C"

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

List of Programs in ‘C’ Lab (CSP-151)

Lab 1	(a) WAP to perform simple arithmetic operations using different data types. (b) WAP to show swap of two no's without using third variable.
Lab 2	(a) WAP to find the roots of a quadratic equation. (b) WAP to check the number is odd or even and find the sum of all odd and all even separately.
Lab 3	(a) WAP to find out whether the given number is prime or not. Find sum of all prime upto N. (b) WAP to reverse a given number and check the palindrome status.
Lab 4	WAP to print corresponding days of a week using switch case.
Lab 5	WAP to find and generate the Armstrong number.
Lab 6	WAP to print pattern triangle like Floyd's, Pascal, pyramid triangle.
Lab 7	(a) WAP to interchange two values using call by value and call by reference. (b) WAP to print factorial of a number using recursion & without using recursion.
Lab 8	WAP to print Fibonacci series. (a) Without using function (b) using function (c) using recursion
Lab 9	(a) WAP to print an array and find greatest/smallest element of an array. (b) WAP to perform linear searching in an array.
Lab 10	(a) WAP to insert/ delete element from an array. (b) WAP to sort the array's element using Bubble sort.
Lab 11	WAP to perform the following string functions. a. Strlen b. strcmp c. strcpy d. strcat e. strlenr f. strupr
Lab 12	Declare a suitable structure of a college and print the name and DOB of the student have scored more than sixty percent marks in end semester exam.
Lab 13	Declare a suitable structure for an organization and print all the names of employees having salary more than Rs.1000.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Graphics	Course Code: CGE151		
Credit: 2	L 1	T 0	P 2
Year: 1st	Semester: I		

UNIT-I

3L

Introduction: Sheet Layout, Types of Sheet, Size of Sheets, Title blocks, Type of lines, Lettering, Dimensioning, Scale (Full, Reduced, Large) Geometrical Constructions

UNIT-II

4L

Projection: Methods of Projection, Planes of Projection, Projection of points, Projection of straight lines, Projection of auxiliary planes, Projection of planes.

UNIT-III

4L

Projection of solids, Sections of solids

UNIT-IV

2L

Development of surfaces

UNIT-V

2L

Isometric Projections

Reference Book:

- 1) Bhatt N. D. & Panchal V. M, "Engineering Drawing", Charotar Publisher, 2007.
- 2) Dhanjay A Jolhe, "Engineering Drawing" Tata-Mc-Garw hill, 2008.
- 3) Gill.P.S "Engineering graphics" S. K. Kataria & Sons, 2009
- 4) John K.C, "Engineering graphics" ,2nd edition, PHI Learning Pvt. Ltd., 2010 .

List of Experiments

1. Introduction to AutoCAD Commands, Explaining need of AUTO CAD over Manual drafting, Simple Drawings.
2. Sheet on Lettering and Geometric construction.
3. Orthographic Projections, Basic problem based on Projection of points.
4. Sheet on Projection of Lines.
5. Sheet on Projection of Planes.
6. Sheet on Projection of Auxiliary Planes.
7. Sheet on Projection of Solids.
8. Development of Surfaces.
9. Sheet on Isometric Projections from orthogonal views.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Maths – II	Course Code: MAT201		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT I: Differential Equations

8L

Linear differential equations, Exact differential equations; Linear differential Equations of nth order with constant coefficients: complementary functions and particular integrals, Euler- Cauchy Homogeneous Linear differential equations, Simultaneous linear differential equations, Solutions of second order differential equations by changing the dependent and independent variables, Method of variation of parameters.

UNIT II: Laplace Transform

8L

Laplace Transform: Existence theorem, Laplace Transform of derivatives and integrals, Laplace Transform of Periodic functions and Unit Step function, Convolution theorem, Applications of Laplace Transform to solve linear and simultaneous differential equations.

UNIT III: Integral Transform

6L

Fourier Integral, Fourier Transform, Fourier Sine and Cosine Transforms and applications to simple Heat Transfer Equations, Z- Transform and its applications to solve difference equations.

UNIT IV: Fourier series

8L

Periodic functions, Fourier series of Periodic functions, Euler's formulae, Functions having arbitrary period, Change of intervals, Even and Odd functions, Half range sine and cosine series.

UNIT V: Partial differential equations and its Applications

8L

Introduction to partial differential equations, linear partial differential equations with constant coefficients of second order and their classification, Method of Separation of Variables for solving Partial Differential Equations, One-Dimensional Wave Equation, One Dimensional Heat Equation.

4. M. D. Raisinghania: Ordinary & Partial Differential Equations, S. Chand.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Computer Programming in C++	Course Code: CST201		
Credit: 2	L 2	T 0	P 0
Year: 1st	Semester: II		

UNIT – I

4L

Introduction: Introducing Object-Oriented Approach related to other paradigms (functional, data decomposition), Characteristics of Object-Oriented Languages.

Basic terms and ideas: Abstraction, Encapsulation, Information hiding, Inheritance, Polymorphism.

UNIT – II

4L

Classes and Objects: Abstract data types, Object & classes, attributes, methods, C++ class declaration, State identity and behavior of an object, Constructors and destructors, instantiation of objects, Default parameter value, Copy Constructor, Static Class Data, Constant and Classes.

UNIT – III

5L

Inheritance and Polymorphism: Inheritance, Types of Inheritance, Class hierarchy, derivation – public, private & protected, Agrégation, composition vs classification hiérarchies, Polymorphism, Type of Polymorphism – Compile time and runtime, Method polymorphism, Polymorphism by parameter, Operator overloading, Parametric polymorphism, Generic function – template function, function name overloading, Overriding inheritance methods

TEXT BOOKS:

2. YashwantKanethkar, “Object Oriented Programming using C++”, BPB, 2004

**Course Structure & Syllabus of
B.Tech – Computer Science & Engineering
Applicable for 2013-2017 Batch
List of Programs in ‘C++’ Lab(CSP-251)**

Lab 1	(a) WAP to print first 10 prime numbers. (b) WAP to demonstrate nested loops. (c) WAP to print reverse of a given number. (d) WAP to read two numbers from keyboard and display the larger one.
Lab 2	(a) Create a class called Employee that includes three pieces of information as instance Variables – a first name (type String), a last name (type String) and a monthly salary (Double) (b) Create a constructor in above class to initialize the three instance variables. Provide a get method for each instance variable. (c) WAP to demonstrate destructors.
Lab 3	(a) Program to implement different types of inheritances like Multiple, Multilevel and hybrid. (b) Write a program in C++ demonstrating the public, protected and private parameters. (c) Write a program in C++ to demonstrate destructor in inheritance. (d) WAP to demonstrate encapsulation property of OOPs.
Lab 4	(a) Write a program that uses a class where the member functions are defined inside a class. (b) WAP that uses a class where member functions are defined outside a class. (c) WAP that uses a class where member functions are defined inside a class. (d) WAP to demonstrate the use of Static Data members.
Lab 5	(a) WAP to demonstrate the use of Dynamic Constructor. (b) WAP to demonstrate the use of function Template. (c) Illustrate and implement the C++ program to initiate the base constructor from derived class constructor.
Lab 6	(a) Write a C++ program to find the largest and smallest element of an array. (b) Create a class Matrix. Implement all possible matrix operations for Matrix type objects by overloading them.
Lab 7	(a) Create 2 classes OM and DB which store the value of distance. DM store distances in meters and cm and DB in feet and inches. Write a program that can read values for the class objects and add 1 object OM with another object of DB. (b) Define a class to represent bank account. Include the following members: Data members 1. Name of depositor. 2. Account number. 3. Type of account. 4. Balance amount in the account. Member functions 1. To assign initial values. 2. To deposit an amount. 3. To withdraw an amount after checking the balance. 4. To display name and balance. Write a main program to test the program.
Lab 8	(a) WAP to demonstrate static class data. (b) WAP to demonstrate the use of Public, Private and protected classes.
Lab 9	(a) WAP to illustrate the concept of call by reference. (b) WAP to illustrate the concept of unary operator overloading. (c) WAP to illustrate the concept of binary operator overloading.
Lab 10	(a) WAP to demonstrate the use of function overloading. (b) WAP using multiple inheritance for collecting employee details.
Lab 11	(a) WAP using function template to find maximum of two Data. (b) WAP to calculate factorial of given number using copy constructor.
Lab 12	(a) WAP to sort five float and integer numbers using template function (use bubble sort). (b) Demonstrate the use of different types of polymorphism.
Lab 13	(a) Write a function to read a matrix of size M × N from keyboard. (b) WAP to implement aggregation concept.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Chemistry and Environment	Course Code: CYT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT – I

Introduction to Environment and Chemistry

Chemical Evolution, Genesis of Environment, Components of Environment, Layers of atmosphere, Chemical composition and reactions of troposphere, Chemistry of Ozone Layer depletion.

UNIT – II

Water Chemistry

Water quality parameters (Physical, Chemical and Biological), CPCB and WHO standards for water, Measurement of parameters of water quality, Analytical tools for analysis of water quality, alkalinity, hardness and its determination (EDTA method only). Water softening processes – Lime – Soda process, Ion exchange method, boiler feed water, boiler problems-scale, sludge, priming and foaming, caustic embitterment and corrosion, their causes and prevention, Numerical problems on alkalinity and hardness.

UNIT – III

Environmental Pollution

Air Pollution: Types of pollutants, source, effects, sink and control of primary pollutants – CO, NO_x, HC, SO_x and particulates, Photochemical smog, Acid rain and Global warming – Process, National and International efforts to combat it.

Water Pollution: Water quality parameters – (BOD & COD), Classification of pollutants and their sources, waste water treatment – domestic and industrial, Ganga pollution and control.

Soil Pollution: Composition of soil, classification and effects of soil pollutants such as agro-chemicals (pesticides and fertilizer related problems), fly ash and their control.

Integrated Solid Waste Management: Classification of waste, Treatment & Disposal methods (Composting, sanitary land filling, incineration, recycling and reuse).

UNIT – IV

Energy Resources

Conventional Energy Sources – Coal and Petroleum, Refining, Fractional Distillation, Reforming, Cracking, Alkylation, Isomerisation, Hydro treating, Sulphur Recovery, Aromatization, Octane number, Cetane number, Aviation fuel, LPG, CNG, PNG, Energy Crises, Non-conventional Energy Sources – Hydro, Wind, Solar, Nuclear, Geo thermal and Biomass based.

UNIT – V

Eco-friendly Materials

Introduction to ecofriendly products and ECOMARK, Ecofriendly domestic appliances, Green Chemistry and Green Building, Organic foods, Biofuel, Biogas, Lignin, Bioplastics, Light weight plastic composites, Fuel cell, Organic Fuel Cells, hydrogen as a fuel and New lighting technologies: Organic Photo-voltaic, OLED and Organic Transistor.

Text Books:

1. Chemistry in Engineering & Technology (Vol I & II) (Latest ed.) By J.C. Kuriacose & J. Rajaraman, Tata McGraw-Hill Co, New Delhi.
2. Engineering Chemistry by O.G. Palanna, Tata McGraw-Hill Co, New Delhi.

Reference Books:

1. Atkins' Physical Chemistry by Peter W. Atkins and Julio de Paula, Oxford University Press.
2. Principles of Physical Chemistry (Latest ed.) By Puri, Sharma & Pathania.
3. Organic chemistry, Morrison and Boyd, Pearson Prentice Hall, 2011
4. Environmental chemistry, S.E. Manahan, 9th edition, CRC Press.
5. Textbook of polymer science by F.W. Billmeyer, Wiley India.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Introduction to Electrical Engineering	Course Code: EET101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I / II		

UNIT I – D.C. NETWORK THEORY

Review of basic circuit theory concepts, Mesh and Nodal analysis, Superposition theorem, Thevenin's theorem, Norton's theorem, Maximum power transfer theorem, Star–delta transformation, Magnetic Circuits.

UNIT II – A.C. CIRCUITS & MEASURING INSTRUMENTS

Single Phase A.C.: Phasor representation of voltage and current, A.C. circuit behavior of resistance, inductance, capacitance & their combination in series and parallel, Power triangle, Power factor, Concept of series & parallel resonance.

Three Phase A.C.: Star – delta connections, Relation between line and phase quantities, three phase power and its measurement, What is 3 phase 4 wire and 3 phase 5 wire system?

Measuring Instruments: Construction and principle of voltage and current measuring instruments.

UNIT III – TRANSFORMERS

Principle of operation, Types of construction, Phasor diagram, Equivalent circuit, Efficiency and voltage regulation of single phase transformer, O.C. and S.C. tests.

UNIT IV – D.C. & SYNCHRONOUS MACHINES

D.C. Machines: Construction and working principle of d.c. generator and d.c. motor, Types of d.c. machines, E.M.F. equation, Torque equation, Magnetization and load characteristics, Losses and efficiency, Need of starter in d.c. motors.

Synchronous Machines: Construction and Principle of operation of Alternator and Synchronous Motor.

UNIT V – INDUCTION MOTORS

Three Phase Induction Motors: Principle of operation of 3- ϕ induction motor, Types of 3- ϕ induction motor, Need of starters in 3- ϕ induction motors, Slip – torque characteristics,

Single Phase Induction Motor: Principle of operation of single phase induction motor, Methods of starting of single phase induction motor.

Reference Books

1. V. Del Toro. “ Principles of electrical Engineering, “Prentice hall International.
2. W.H. Hayt& J.E. Kemmerly,” Engineering circuit Analysis, “McGraw Hill.
3. I. J. Nagrath, “Basic Electrical Engineering,” Tata Mc. Graw Hill.
4. A. E. Fitzgerald, D.E., Higginbotham and A Gabel, “Basic Electrical Engineering” McGraw Hill.
5. H. Cotton, “Advanced Electrical Technology” Wheeler Publishing.

Basic Electrical Engineering Lab (EEP-151)

(Any Ten)

1. Verification of Network Theorems.
2. Study of diode characteristics. Study of phenomenon of resonance in RLC series circuit.
3. Measurement of power in a three phase circuit by two wattmeter method.
4. Measurement of efficiency of a single phase transformer by load test.
5. Determination of parameters and losses in a single phase transformer by OC and SC test.
6. Study of characteristic of DC Motor.
7. Study of characteristic of AC Motor.
8. DC generator characteristics.
9. 10. Speed control of dc shunt motor.
10. Study running and reversing of a three phase induction motor.
11. Study of a single phase energy meter.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Introduction to Electronics & Communication	Course Code: ECT101						
Credit: 3	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1st	Semester: II						

UNIT 1: Fundamental of Semiconductors

10 Lectures

Energy bands in semiconductors, intrinsic and extrinsic semiconductors, Fermi Level in Intrinsic and Extrinsic semiconductor, Carrier transport in semiconductors: diffusion current, drift current, mobility, Hall Effect and resistivity. Generation and recombination of carriers.

UNIT 2: Application of Low Power and High Power Diodes

10 Lectures

Diode circuits: Construction, Junction diode characteristics, Half and full wave rectifiers - Expression for efficiency and ripple factor - Bridge rectifier – π Filter circuits, Clipper, Clamper and multipliers using diodes, Zener Diode Characteristics - Regulated power supply using Zener diode.

UNIT 3: Transistor fundamentals

8 Lectures

Transistor circuits: Characteristics of a transistor in CB, CE and CC modes - Relatively merits - Biasing of Transistors - Load Line and operating point concept (both AC and DC). Construction and working of JFET and MOSFET.

UNIT 4: Digital fundamentals and Introduction to Signals

8 Lectures

Basic logic gates: AND, OR, and NOT – implementation of all gates using Universal gates, Number Systems conversions, Boolean algebra, K-map (upto 4 variables). Source of Information, Types of Signals.

UNIT 5: Basics of Communications & Instrumentation

9 Lectures

Communication Systems, Communication Channels, Need of modulation, Types of modulations (Wave shapes and final expression only), Study of Piezoelectric, PMMC, LVDT and Strain Gauge transducers and their classifications and display device (7 segment) only.

Reference Learning:

Unit 1. Electronics Devices and Circuits, Millman and Halkias, Tata McGraw Hill, 4th ed.

Unit 2 & 3. Electronic Devices and Circuit Theory, Robert L. Boylestad, Prentice Hall Higher Edu., 2000.

Unit 4. Digital Design, Morris Mano, PHI

Unit 4. Modern Digital & Analog Communications, B. P. Lathi, OUP

Unit 5. Electronic Communication Systems, John Kennedy, Tata McGraw Hill, 4th ed.

Unit 5. Electronic Instrumentation - H. S. Kalsi

ECP-151 ELECTRONICS ENGINEERING LAB.

1. To identify and Study of the various component and Devices of electronics with their specification (CRO, Function Generator, Multimeter, Power Supply, resistor, capacitor, inductor, ICs, LED, potentiometer etc.)
2. To study the V-I characteristics of PN diode and Zener diode.
3. To find the efficiency of Rectifiers and ripple factor of capacitive and non-capacitive half wave and full wave rectifier.
4. To Study and Verify clipper and clamper with biased circuits.
5. To find the characteristics of CB and CE amplifiers.
6. Determine the characteristics of FET.
7. To find out the power energy of various periodic and non periodic signals.
8. To verify the logic gates using diodes.
9. Study and observations of AM & FM Waveforms.
10. Study of various transducers (Strain Gauge).

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Workshop Practice	Course Code: MEP152		
Credit: 2	L 1	T 0	P 2
Year: 1st	Semester: II		

List of Experiments

1. Carpentry: To make a T-Lap joint with soft wood.
2. Arc Welding: To make a Lap joint with mild steel flat by arc welding process.
3. Gas Welding: To make a Lap joint of M.S. sheet with gas welding process.
4. Fitting: To make a plug and socket joint with M.S.flat.
5. Machine Shop: To turn a M.S. rod on lathe to prepare a turning specimen.
6. Sheet Metal: To make a square tray with G.I. sheet.
7. Study of Foundry and Forging tools and equipments.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Data Structures	Course Code: DA3220		
Credit: 4	L 3	T 0	P 2
Year: 2nd	Semester: III		

UNIT 1

(8L)

Introduction: Concept of data structure, Types of data structures, Character String in C, Recursion, Structure, Pointer, Dynamic Allocation, Algorithms, Algorithm analysis, Complexity of algorithms and Time space trade-off.

Arrays: Introduction, Single and multi-Dimensional Arrays, address calculation, application of arrays, Operations defined: traversal, insertion and deletion.

Stacks: Stacks, Array representation of stack, Applications of stacks, Conversion of Infix to Prefix and Postfix Expressions, Evaluation of postfix expression using stack.

UNIT 2

(8L)

Queue: Queue, Array representation and implementation of queues, Circular queues, Operations on Queue: Create Add, Delete, and Full and Empty, De-Queue, Priority queues, Applications of Queues.

Linked Lists: Concept of linked list, Representation and implementation of singly linked list, Circular linked list, doubly linked list, Operations on Linked lists, Concepts of header linked lists, applications of linked lists.

UNIT 3

(8L)

Trees: Basic terminologies of trees, Binary tree, Complete Binary tree, Extended Binary tree, Representation of Binary tree, Binary tree traversal, Operations on Binary tree.

Binary Search Tree: Binary Search Tree (BST), Insertion and Deletion in BST, Complexity of Search Algorithm, Path Length, AVL Trees, B-trees.

UNIT 4

(6L)

Graphs: Terminology & Representations, Graphs & Multi-graphs, Directed Graphs, Representations of Graphs, Traversal, Connected Component and Spanning Trees, Minimum Cost Spanning Trees.

UNIT 5

(10L)

Searching & Hashing: linear search, binary search, Hash Table, Hash Functions, Collision Resolution Strategies, Hash Table Implementation.

Sorting: Bubble sort, Insertion sort, Selection sort, Quick sort, Merge sort, Heap Sort.

File Handling: Introduction to file handling, Data and Information, File concepts, File organization, files and streams, working with files.

Text Books:

1. "Data Structures" Schaum's Outline Series, Lipschutz, TMH.
2. Data Structures using C by A. M. Tenenbaum, Langsam, Moshe J. Augentem, PHI Pub.

Reference Books:

1. "Fundamentals of Data Structures", Horowitz and Sahani, Galgotia Publication.
2. Data Structures and Program Design in C By Robert Kruse, PHI.
3. Data Structure and the Standard Template library – Willam J. Collins, 2003, T.M.H.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Data Structure Lab

List of Experiments

1. Write a program which accept information about five student and display same information according to ascending order of their name.
2. Write a program to implement stack.
3. Write a program to convert infix expression into postfix expression.
4. Write a program to check balanced parentheses for a given infix expression
5. Write a program to evaluate postfix expression.
6. Write a program to implement queue.
7. Write a program to implement circular queue.
8. Write a program to implement link list with insert, delete, search, view, and delete function
9. Write a program to implement ordered link list
10. Write a program to implement Joseph problem
11. Write a program to add two polynomials
12. Write a program to create doubly link list
13. Write a recursive program to find factorial and to print Fibonacci series
14. Write a program for Hanoi Tower problem
15. Write a program to implement tree with insert, delete and search function
16. Write a program for inorder, postorder and preorder traversal of tree
17. Write a program for binary search and sequential search
18. Write a program for bubble sort and sequential search
19. Write a program for insertion sort and quicksort
20. Write a program for shortest path diagram

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Computer Based Numerical and Statistical Techniques	Course Code: DA3220
Credit: 4	L T P 3 0 2
Year: 2nd	Semester: III

UNIT 1

(7L)

Introduction: Numbers and their accuracy, Computer Arithmetic, Errors and their Computation, General error formula, Error in a series approximation.

Solution of Algebraic and Transcendental Equation: Bisection Method, Iteration method, Method of false position, Secant method, Newton-Raphson method, Rate of convergence of Iterative, Newton Raphson methods.

UNIT 2

(12L)

Interpolation: Finite Differences, Difference tables Polynomial Interpolation: Newton's forward and backward formula Central Difference Formulae: Gauss forward and backward formula, Stirling's, Bessel's, Everett's formula. Interpolation with unequal intervals: Lagrange's Interpolation, Newton Divided difference Formula.

Statistical Computation: Frequency chart, Curve fitting by method of least squares, fitting of straight lines, polynomials, exponential curves, Regression Analysis, Linear and Nonlinear Regression, Multiple regression.

UNIT 3

(8L)

Numerical Integration and Differentiation: Introduction, Numerical differentiation Numerical Integration: Trapezoidal rule, Simpson's 1/3 and 3/8 rule, Boole's rule.

Solution of differential Equations: Picards Method, Eulers Method, Taylors Method, Runge-Kutta Methods, Automatic Error Monitoring and Stability of solution.

SUGGESTED BOOKS:

1. Yang, "Applied Numerical Methods using MATLAB", Wiley India
2. Pradip Niyogi, "Numerical Analysis and Algorithms", TMH, 1st Edition.
3. Gerald & Whealey, "Applied Numerical Analysis", AW
4. Grewal B S, "Numerical methods in Engineering and Science", Khanna Publishers, Delhi.
5. Numerical Method Principles, analysis and algorithms, Srimamta Pal (Oxford Higher ed)
6. Rajaraman V, "Computer Oriented Numerical Methods", PHI, 3rd edition.

CBNST Lab

List of Experiments

Write Programs in 'C++' Language:

1. To deduce error involved in polynomial equation.
2. To Find out the root of the Algebraic and Transcendental equations using numerical methods.
3. To implement Newton's Forward and Backward Interpolation formula.
4. To implement Gauss Forward, Bessel's, Sterling's and Evertt's Interpolation formula.
5. To implement Newton's Divided Difference and Lagrange's Interpolation formula.
6. To implement Numerical Differentiations.
7. To implement Numerical Integration using Trapezoidal, Simpson 1/3 and Simpson 3/8 rule.
8. To implement Least Square Method for curve fitting.
9. To draw frequency chart like histogram, frequency curve and pie-chart etc.
10. To estimate regression equation from sampled data and evaluate values of standard deviation, t-statistics, regression coefficient, value of R2 for at least two independent variables.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Programming with Java	Course Code: DA3230		
Credit: 4	L 3	T 0	P 2
Year: 2 nd	Semester: III		

UNIT 1 (6L)

Object Modeling: Objects and classes, links and association, generalization and inheritance, aggregation, abstract class, multiple inheritance, meta data, candidate keys, constraints.

UNIT 2 (6L)

Dynamic Modeling: Events and states, operations, nested state diagrams and concurrency, advanced dynamic modeling concepts, a sample dynamic model.

UNIT 3 (8L)

Functional Modeling: Data flow diagram, specifying operations, constraints, a sample functional model. OMT (object modeling techniques) methodologies, examples and case studies to demonstrate methodologies, comparisons of methodologies, SA/SD, JSD.

UNIT 4 (10L)

Java Programming: Introduction, Operator, Data types, Variables, Methods & Classes, Multithread Programming, I/O, Java Applet.

Java Library: String Handling, Input/Output exploring Java.io, Networking, Applets classes, Event Handling, Introduction to AWT, Working with window, Graphics, AWT Controls, LayoutManager and Menus, Images, Additional packages.

UNIT 5 (10L)

Software Development using Java: Java Beans, Java Swing, Java Servlets, Migrating from C++ to java, Application of java, Dynamic Billboard Applet, Image Menu: An image based menu, Lavatron Applets, Scrabblets, JDBC, Brief functioning of upper layer E-mail and their applications.

Text Books:

1. James Rumbaughetal, “Object Oriented Modeling and Design”, PHI.
2. Herbert Schieldt, “The Complete Reference: Java”, TMH.
3. E. Balagurusamy, “Programming in JAVA”, TMH.

Reference Books:

1. Booch Grady, “Object Oriented Analysis & Design with application 3/e”, Pearson Education, New Delhi.
2. Bjarne Stroustrup, “C++ Programming Language”, Addison Wesley.
3. E. Balagurusamy, “Object Oriented Programming with C++”, TMH.

Programming with Java Lab

To become familiar with classes that represents entities that can interact with the user.

1. To successfully write simple programs that involve if statements and loops.
2. To gain practice in the use of Boolean operators like && and ||.
3. To construct a class that represents a simple ATM (automatic teller machine).
4. Write a new program called Options.java that will request that the user enter an integer and then will display the message .positive, negative, or zero. if the value that was entered was greater than zero, less than zero, or equal to zero, respectively.
5. Write a Java program that displays the number of characters, lines and words in a text file.
6. Write a Java program for event handling.
7. Write a Java program for multithreading
8. Write a Java program that allows the user to draw lines, rectangles and ovals.
9. Write program for Java Applets.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Discrete Mathematics	Course Code: DA3010						
Credit: 3.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 2nd	Semester: III						

UNIT 1

(10L)

Permutations, Combinations, selection with & without replacement, Sets and multisets, permutation and combination of multisets, enumeration of permutation and combination of sets & multisets, placing distinguishable (indistinguishable) objects into distinguishable (indistinguishable) boxes. Inclusion-Exclusion principle, Discrete probability; The rules of sum & products, generation of permutation and combination.

UNIT 2

(8L)

Relations and functions-properties of binary relation, equivalence relation, partial order relation, chains and antichains, Pigeon hole principle, Lattices and Boolean algebra; Algebraic structures: binary operation, group, ring, field; Mathematical Logic: Basic connectives, rules of inference, normal forms, proof of validity, predicate logic.

UNIT 3

(7L)

Basic concepts of graph theory: vertices, edges, degree, paths, circuits, cycles, complete graphs and trees. Multi-graphs, weighted graphs and directed graphs. Adjacency matrix of a graph. Connected and disconnected graphs. K-connected and K-edge connected graphs.

UNIT 4

(7L)

Shortest path in weighted graphs, Eulerian path and circuits, Hamiltonian path and circuits, Planner graphs, chromatic number, edge colouring of graphs. Tree and cut sets: Tree, spanning tree and cut set, minimum spanning tree.

UNIT 5

(8L)

Generating function and recurrence relations, Linear recurrence relation with constant coefficients and their solution, Homogeneous solution, particular solution and total solution, Solution by the method of generating functions.

Text Books:

1. Liu C.L., Elements of Discrete Mathematics, McGraw Hill Int. edn.

Year: 2 nd	Semester: III						

UNIT 1

(12L)

Register Transfer and Micro operation: Register Transfer Language, Bus and Memory Transfers, Bus Architecture, Arithmetic, Logic, Shift Microoperation, Design of ALU, Design of Fast adder.

Computer Arithmetic: Introduction, addition and subtraction algorithms, Booth Multiplication Algorithms, floating point arithmetic operation, IEEE format for floating point numbers.

Processor Organization: General register organization, Stack organization, Addressing modes, Instruction format, Data transfer & manipulations, Program Control.

UNIT 2

(15L)

Control Design: Single and multiple bus architecture, Execution of a Complete Instruction, sequencing of control signals, Hardwired control, Micro programmed Control, microinstruction format.

Input-Output Organization: I/O Interface, Modes of transfer, Interrupts & Interrupt handling, Direct Memory Access, Input-Output processor, Serial Communication.

UNIT 3

(13L)

Memory Organization: Memory Hierarchy, Main Memory (RAM and ROM Chips), organization of Cache Memory, Virtual Memory, Memory management hardware.

Parallel Processing: Flynn's classification, Pipelining- Arithmetic Pipelining, Vector Processing, Array Processor.

Multiprocessor: Characteristic of Multiprocessor, Interconnection Structure, Interprocessor Arbitration.

Text Books:

1. Computer System Architecture, M. Mano, Pearson, 3rd Edition.
2. Computer Organization, John P.Hayes, McGraw Hill, 3rd Edition.

Reference Books:

1. Computer Organization, Vravice, Zaky&Hamacher (TMH Publication)
2. Structured Computer Organization, Tannenbaum(PHI)

Year: 2 nd	Semester: III						

UNIT-1: INTRODUCTION

8 L

Number Systems, Basic & Universal Logic gates, Boolean algebra, Direct Conversion of various base, Negative number representations, Floating point number representation, BCD & EXCESS-3 arithmetic, Error detecting and correcting codes: Hamming code, parity code, Review and Limitation of K-Map, Quine-Mcclusky Method (Tabular Method).

UNIT-2: COMBINATIONAL LOGIC CIRCUITS

8 L

Characterization of digital circuits: Combinational & Sequential Logic circuit, Design procedure: Adders, Subtractors, Parallel Adder, IC-74LS83 and its applications, Multiplier, Decoder, Encoder, Priority Encoder, Multiplexers, Demultiplexers and their applications, Magnitude Comparators, Code Converters, Parity checker and generator, BCD Adder.

UNIT-3: SEQUENTIAL LOGIC CIRCUITS

6 L

Latch, Flip-Flops and their conversions, Analysis and Synthesis of Sequential Circuits, Excitation Table & Diagram, Counters: Synchronous & Asynchronous, Shift Registers and their applications, Finite State Machine: Mealy and Moore Models.

UNIT-4: MEMORIES

8 L

Memory Characteristics and operations, Sequential, Random Access-MOS & C-MOS Static and Dynamic Memory elements, Memory organization: One dimensional and Multidimensional Arrangement, Read Only Memory, ROM as a Decoder, Memory Bank, Address Decoding of Memory (Internal & External), PAL, PLA.

UNIT-5: LOGIC FAMILIES, HAZARDS & FAULT DETECTIONS

10 L

Logic Families: Diode, BJT & MOS as a switching element, concept of transfer characteristics, ECL, TTL, I²L, Tri-state, PMOS, NMOS and CMOS logic families- Power Consumption, Gate delay and Figure of merit (SPP), Package density, Comparison of standard logic families, pass transistor Logic, Open Collector and Totem pole output stage for TTL. Static and Dynamic Hazards, Gate Delay, Generation of Spikes, Analysis & illustration of Hazard in Combinational Circuits, fault Detection Techniques: Path Sensitization, Boolean Difference Method, K- Map Method.

Text Books:

1. Digital Design, M. Morris Mano and M. D. Ciletti, 4th Edition, Pearson

Reference Books:

1. Digital Systems: Principles and Design, Raj Kamal, Pearson
2. Maini, Digital Electronics: Principles and Integrated Circuits, Wiley India.
3. Switching Theory and Finite Automata, Kohavi, TMH Publications.

Digital System Design Lab

1. Implementation of All Logic Gates using Universal gates (NAND & NOR both).
2. Bread-board implementation (Parallel adder, One bit Multiplier, One bit Magnitude comparator, parity checker)
3. Bread-board implementation of any one code converter (i.e. Gray Code, BCD Code, Excess-3, Hex. etc.).
4. Design of shift registers (SISO, SIPO, PIPO, and PISO), up and down counters.
5. Design of Mod-6 types of Asynchronous Counters.
6. Transfer characteristics of TTL and CMOS inverters.
7. Realization of Decoder, Multiplexer, encoder and De-multiplexers using IC 74138.
8. To design & Implement PAL.
9. To design & implement PLA.
10. Clock circuit realization using 555, CMOS inverter.

*Any two (Value Added)

Course Title: Theory of Computation	Course Code: DA4010						
Credit: 3.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 2 nd	Semester: IV						

UNIT 1

(7L)

Mathematical preliminaries, alphabets, strings, languages, states, transition, transition graph, generalized transition graph, Deterministic Finite Automata, Non-Deterministic Finite Automata, Non-Deterministic Finite Automata with ϵ transitions, minimization of DFA.

UNIT 2

(8L)

Conversions and Equivalence: Equivalence between NFA with and without ϵ transitions. NFA to DFA conversion; Equivalence between two DFA's, Limitations of FSM; Application of finite automata, Finite Automata with output- Moore & Melay machine and its conversion.

UNIT 3

(10L)

Regular Languages: Regular sets; Regular expressions, Arden's theorem, Construction of finite Automata for a given regular expression, Pumping lemma for regular sets. Closure properties of regular sets. Grammar Formalism: right linear and left linear grammars; Equivalence between regular linear grammar and FA, Context free grammar; Derivation trees, sentential forms. Ambiguity in context free grammars; Normal forms: Chomsky normal form and Greibach normal form; Pumping Lemma for Context Free Languages, Closure property of CFL.

UNIT 4

(7L)

Push Down Automata: Push down automata, definition; Acceptance of CFL, Acceptance by final state and acceptance by empty state and its equivalence; Equivalence of CFL and PDA; Introduction to DCFL and DPDA.

UNIT 5

(8L)

Turing Machine: Turing Machine, definition, model, Design of TM, Computable functions Church's hypothesis, Types of Turing machines: Universal Turing Machine, Halting problem, Properties of recursive and recursively enumerable languages, unsolvable decision problem, undecidability of Post correspondence problem, Church turing Thesis.

Text Books:

1. "Introduction to Automata Theory Language and Computation", Hopcroft H.E. and Ullman J. D., Pearson Education.
2. "Introduction to Languages and the Theory of Computation", J. C. Martin, 3rd edition, Tata McGraw-Hill.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Operating Systems	Course Code: DA4020						
Credit: 3.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 2 nd	Semester: IV						

UNIT 1

(7L)

Introduction: Operating system and function, Evolution of operating system, Batch, Interactive, Time Sharing and Real Time System, System protection.

Operating System Structure: System Components, System structure, Operating System Services.

UNIT 2

(10L)

Concurrent Processes: Process concept, Principle of Concurrency, Producer Consumer Problem, Critical Section problem, Semaphores, Classical problems in Concurrency, Inter Process Communication, Process Generation, Process Scheduling.

CPU Scheduling: Scheduling Concept, Performance Criteria Scheduling Algorithm, Evolution, Multiprocessor Scheduling.

Deadlock: System Model, Deadlock Characterization, Prevention, Avoidance and Detection, Recovery from deadlock combined approach.

UNIT 3

(8L)

Memory Management: Base machine, Resident monitor, Multiprogramming with fixed partition, Multiprogramming with variable partition, Multiple base register, Paging, Segmentation, Virtual memory concept, Demand paging, Performance, Paged replaced algorithm, Allocation of frames, Thrashing, Cache memory, Organization, Impact on performance.

UNIT 4

(6L)

File System: Different types of files and their access methods, directory structures, various allocation methods, disk scheduling and management and its associated algorithms, Introduction to distributed file system.

UNIT 5

(9L)

I/O Management and Disk Scheduling: I/O Devices, Organization of I/O functions, Operating System Design issues, I/O Buffering, Disk Scheduling (FCFS, SCAN, C-SCAN, SSTF), Disk Caches.

Case Studies: LINUX / UNIX Operating System and Windows based operating system.

Text Books:

1. Silberschatz, Galvin and Gagne, “Operating Systems Concepts”, Wiley.
2. D M Dhamdhare, “Operating Systems : A Concept based Approach”, 2nd Edition.

Reference Books:

1. Sibsankar Halder and Alex A Aravind, “Operating Systems”, Pearson Education.
2. Harvey M Dietel, “An Introduction to Operating System”, Pearson Education

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Computer Networks	Course Code: DA4210		
Credit: 4	L	T	P
	3	0	2
Year: 2nd	Semester: IV		

UNIT 1

(8L)

Introduction: Motivation, OSI model, Signals and media, Bits over signals, Synchronous communication, Modulation and modems, Bandwidth, Throughput, and noise, Time division and Frequency division multiplexing, Standards, Switching methods, ISDN.

UNIT 2

(8L)

Packet Transmission: Multiplexing, Frames, Error correction techniques, LAN/WAN/MAN, Topology, CSMA/CD, LAN protocol, Elementary Data link protocol- Sliding window protocols, Token passing rings, FDDI, IEEE 802.3, 802.5.

UNIT 3

(8L)

Routing Algorithms: Distance-Vector, Link-State, Shortest path computation, Dijkstra's algorithm, Congestion control, WAN technologies including frame relay, X.25, ATM.

UNIT 4

(8L)

Internetworking: Motivation, Concept, Goals, TCP/IP model, IP addressing with sub netting, Address binding with ARP, IP Datagram, Encapsulation IP fragmentation and reassembly, ICMP, IGMP, TCP.

UNIT 5

(8L)

Network Services: Electronic mail, File transfer, Access and management, Virtual terminals, Remote procedure call.

Text Books:

1. Forouzan, B.A., Data communication and Networking, McGraw Hill (2006) 4th edition.
2. Tanenbaum, A.S., Computer Networks, Prentice Hall (2003) 4th edition.

Reference Books:

1. Comer, D.E., Internetworking with TCP/IP Vol. 1 Principles, Portals and Architecture, Prentice Hall of India (2005) 5th edition.
2. Stallings, W., Computer Networking with Internet Protocols and Tech., Prentice Hall of India (2007).

Computer Networks Lab

1. To study Communication Guiding system.
2. To study various types of connectors.
3. To study of different type of LAN equipments.
4. Implementation of Data Link Layer framing method such as character stuffing and bit stuffing.
5. LAN installations and their Configurations.
6. To implement various types of error correcting techniques.
7. To implement various types of framing methods.
8. To implement various types of DLL protocols.
9. To study & configure various types of router & Bridges.
10. To implement various types of routing algorithm.
11. To study of Tool Command Language(TCL).
12. Study and Installation of Standard Network Simulator, N.S-2.
13. Implementation of LZW compression algorithm.
14. Study & Simulation of Routing Protocols using Standard Network Simulator.
15. Study & implementations of VoIP Concepts.
16. Implementation & Comparisons of various types of Cryptographic algorithms.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Web Technology	Course Code: DA4220						
Credit: 4	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	0	2
L	T	P					
3	0	2					
Year: 2nd	Semester: IV						

UNIT 1

(8L)

Web Essentials: Clients, Servers, and Communication. The Internet-Basic Internet Protocols -The World Wide Web-HTTP request message-response message-Web Clients Web Servers-Case Study. Markup Languages: XHTML. An Introduction to HTML History-Versions-Basic XHTML Syntax and Semantics-Some Fundamental HTML Elements-Relative URLs-Lists-tables-Frames-Forms-XML Creating HTML Documents Case Study.

UNIT 2

(8L)

Style Sheets: CSS-Introduction to Cascading Style Sheets-Features-Core Syntax-Style Sheets and HTML Style Rle Cascading and Inheritance-Text Properties-Box Model Normal Flow Box Layout-Beyond the Normal Flow-Other Properties-Case Study. Client- Side Programming: The JavaScript Language-History and Versions Introduction JavaScript in Perspective-Syntax-Variables and Data Types-Statements-Operators-Literals-Functions-Objects-Arrays-Built-in Objects-JavaScript Debuggers.

UNIT 3

(8L)

Host Objects: Browsers and the DOM-Introduction to the Document Object Model DOM History and Levels-Intrinsic Event Handling-Modifying Element Style-The Document Tree-DOM Event Handling-Accommodating Noncompliant Browsers Properties of window-Case Study.

UNIT 4

(8L)

Representing Web Data: XML-Documents and Vocabularies-Versions and Declaration-Namespaces JavaScript and XML: Ajax-DOM based XML processing Event-oriented Parsing: SAX-Transforming XML Documents-Selecting XML Data: XPATH-Template based Transformations: XSLT-Displaying XML Documents in Browsers-Case Study- Related Technologies.

UNIT 5

(8L)

Web Services: Introduction to Web Services, Web Service Architecture, CORBA, Web 2.0, Web 3.0, Semantic Web, Interactive and social web, UDDI, WSDL- Representing Data Types, SOAP Related Technologies, Web based Information Systems.

TEXT BOOK

1. Jeffrey C.Jackson, "Web Technologies: A Computer Science Perspective", Pearson Education, 2006.57

REFERENCES

1. Robert. W. Sebesta, "Programming the World Wide Web", Fourth Edition, Pearson Education, 2007.
2. Deitel, Goldberg, "Internet & World Wide Web: How to Program", Third Edition, Pearson Education, 2006.
3. Marty Hall and Larry Brown, "Core Web Programming" 2nd Edition, Volume I and II, Pearson Education, 2001.
4. Bates, "Developing Web Applications", Wiley, 2006.

Web Technology Lab

1. Create a simple HTML page for the home page of any shopping website using list, frame table, div.
2. Use CSS in the page developed in practical 1 to change its font, background, images etc.
3. Write a program in java script to warn user if he enters numerical input greater than 4 digits.
4. Write a program in Java script to validate email address.
5. Write a java servlet program to demonstrate session management.
6. Creation of a XML document of 20 students of any university. Add their roll numbers, marks obtained in 5 subjects, total and percentage and save this XML document at the server.
7. Write a program that takes students' roll number as an input and returns the student's marks, total and percentage by taking the students' information from the XML document.
8. Design a website using existing web services (Google map, weather forecast, market information etc.) using AJAX.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Database Management System	Course Code: DA4230						
Credit: 4	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	0	2
L	T	P					
3	0	2					
Year: 2 nd	Semester: IV						

UNIT 1

(8L)

Introduction: Data base System Applications, data base System VS file System, Data Abstraction, Instances and Schemas, data Models: the ER Model, Relational Model & Other Models , Database Languages, data base Users and Administrator, data base System Structure, Storage Manager, the Query Processor, Two/Three tier architecture.

UNIT 2

(8L)

E-R model: Basic concepts, Design Issues, Mapping Constraints, Attributes and Entity sets, Relationships and Relationship sets, Keys, Entity-Relationship Diagram, Weak Entity Sets, Extended E-R features

UNIT 3

(8L)

Relational Model & SQL: Structure of relational Databases, Relational Algebra, Relational Calculus, Extended Relational Algebra; SQL: Form of Basic SQL Query, Nested Queries, Aggregative Operators, NULL values, Logical operators, Outer Joins, Complex Integrity Constraints in SQL.

UNIT 4

(8L)

Database Design: Schema refinement, Different anomalies in designing a Database, Decompositions , Problem related to decomposition, Functional Dependency, Normalization using functional dependencies, 1NF, 2NF, 3NF & BCNF , Lossless join decomposition, Dependency preserving Decomposition , Schema refinement in Data base Design, Multi valued Dependencies, 4NF, 5NF.

UNIT 5

(8L)

Transaction Management: Transaction-concepts, states, ACID property, schedule, serializability of schedules, concurrency control techniques - locking, timestamp, deadlock handling, recovery-log based recovery, shadow paging.

Text Books:

1. Data Base Management Systems, Raghurama Krishnan, Johannes Gehrke, TATA McGrawHill, 3rdEdition.
2. Data base System Concepts, Silberschatz, Korth, McGraw Hill, 5thedition.

Reference Books:

1. Data base Systems design, Implementation, and Management, Peter Rob & Carlos Coronel 7thEdition.
2. Fundamentals of Database Systems, ElmasriNavate, Pearson Education.
3. Introduction to Database Systems, C.J.Date, Pearson Education.

DBMS Lab

1. Database Schema for a Arizona Boat

SAILORS (**SID: INTEGER**, *SNAME: STRING*, *RATING: INTEGER*, *AGE: REAL*)

BOATS (**BID: INTEGER**, *BNAME: STRING*, *COLOR: STRING*)

RESERVES (**SID: INTEGER**, **BID: INTEGER**, **DAY: DATE**)

And insert the 10 values into the corresponding tables.

For the above schema, perform the following—

- 1) Find the names and ages of all the sailors.
- 2) Find all sailors with a rating above 7.
- 3) Find the names of sailors who have reserved boat number 103.
- 4) Find the sids of sailors who have reserved a red boat.
- 5) Find the names of sailors who have reserved a red boat.
- 6) Find the colors of boats reserved by Lubber.
- 7) Find the names of sailors who have reserved at least one boat.
- 8) Compute increments for the ratings of persons who have sailed two different boats on the same day.
- 9) Find the ages of sailors whose name begins and ends with B and has atleast three characters.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

- 10) Find the names of sailors who have reserved a red boat or a green boat.
- 11) Find the names of sailors who have reserved both a red boat and a green boat.
- 12) Find the sids of all sailors who have reserved red boats but not green boats.
- 13) Find all sids of sailors who have a rating of 10 or reserved boat 104.
- 14) Find the names of sailors who have reserved boat 103.
- 15) Find the names of sailors who have reserved a red boat.
- 16) Find the names of sailors who have not reserved a red boat.
- 17) Find the names of sailors who have reserved boat number 103
- 18) Find sailors whose rating is better than some sailor called Horatio.
- 19) Find the sailors with the highest rating.
- 20) Find the names of sailors who have reserved both a red and green boat.
- 21) Find the names of sailors who have reserved all boats.
- 22) Find the average age of all sailors.
- 23) Find the average age of sailors with a rating of 10.
- 24) Find the name and age of the oldest sailor.
- 25) Count the number of sailors.
- 26) Count the number of different sailor names.
- 27) Find the names of sailors who are older than the oldest sailor with a rating of 10.
- 28) Find the age of the youngest sailor for each rating level.
- 29) Find the age of the youngest sailor who is eligible to vote(i.e., at least 18 years old) for each rating level with at least two such sailors.
- 30) For each red boat, find the number of reservations for this boat.
- 31) Find the average age of sailors for each rating level that has atleast two sailors.
- 32) Find the average age of sailors who are of voting age. For each rating level that has at least two sailors.
- 33) Find those ratings for which the average age of sailors is the minimum overall ratings.

2. Database Schema for a customer-sale scenario

Customer(**Cust id : integer**, cust_name: string)

Item(**item id: integer**, item_name: string, price: integer)

Sale(**bill no: integer**, bill_date: date, **cust_id: integer**, **item_id: integer**, qty_sold: integer)

For the above schema, perform the following—

- 1) Create the tables with the appropriate integrity constraints
- 2) Insert around 10 records in each of the tables
- 3) List all the bills for the current date with the customer names and item numbers
- 4) List the total Bill details with the quantity sold, price of the item and the final amount
- 5) List the details of the customer who have bought a product which has a price>200
- 6) Give a count of how many products have been bought by each customer
- 7) Give a list of products bought by a customer having cust_id as 5
- 8) List the item details which are sold as of today
- 9) Create a view which lists out the bill_no, bill_date, cust_id, item_id, price, qty_sold, amount
- 10) Create a view which lists the daily sales date wise for the last one week

3. Database Schema for a Student Library scenario

Student(**Stud no : integer**, Stud_name: string)

Membership(**Mem no: integer**, **Stud no: integer**)

Book(**book no: integer**, book_name:string, author: string)

Iss_rec(**iss no:integer**, iss_date: date, **Mem no: integer**, **book no: integer**)

For the above schema, perform the following—

- 1) Create the tables with the appropriate integrity constraints
- 2) Insert around 10 records in each of the tables
- 3) List all the student names with their membership numbers
- 4) List all the issues for the current date with student and Book names
- 5) List the details of students who borrowed book whose author is CJDATE
- 6) Give a count of how many books have been bought by each student
- 7) Give a list of books taken by student with stud_no as 5
- 8) List the book details which are issued as of today
- 9) Create a view which lists out the iss_no, iss_date, stud_name, book name
- 10) Create a view which lists the daily issues-date wise for the last one week

4. Database Schema for an Employee-pay scenario

employee(**emp id : integer**, emp_name: string)

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

department(**dept_id: integer**, dept_name:string)

paydetails(**emp_id : integer,dept_id: integer**, basic: integer, deductions: integer, additions: integer, DOJ: date)

payroll(**emp_id : integer**, pay_date: date)

For the above schema, perform the following—

- 1) Create the tables with the appropriate integrity constraints
- 2) Insert around 10 records in each of the tables
- 3) List the employee details department wise
- 4) List all the employee names who joined after particular date
- 5) List the details of employees whose basic salary is between 10,000 and 20,000
- 6) Give a count of how many employees are working in each department
- 7) Give a names of the employees whose netsalary>10,000
- 8) List the details for an employee_id=5
- 9) Create a view which lists out the emp_name, department, basic, dedeuctions, netsalary
- 10) Create a view which lists the emp_name and his netsalary

5. Database Schema for a Video Library scenario

Customer(cust_no: integer,cust_name: string)

Membership(**Mem_no: integer, cust_no: integer**)

Cassette(**cass_no:integer**, cass_name:string, Language: String)

Iss_rec(**iss_no: integer, iss_date: date, mem_no: integer, cass_no: integer**)

For the above schema, perform the following—

- 1) Create the tables with the appropriate integrity constraints
- 2) Insert around 10 records in each of the tables
- 3) List all the customer names with their membership numbers
- 4) List all the issues for the current date with the customer names and cassette names
- 5) List the details of the customer who has borrowed the cassette whose title is “ The Legend”
- 6) Give a count of how many cassettes have been borrowed by each customer
- 7) Give a list of book which has been taken by the student with mem_no as 5
- 8) List the cassettes issues for today
- 9) Create a view which lists outs the iss_no, iss_date, cust_name, cass_name
- 10) Create a view which lists issues-date wise for the last one week

6. Database Schema for a student-Lab scenario

Student(**stud_no: integer**, stud_name: string, **class: string**)

Class(**class: string,descrip: string**)

Lab(**mach_no: integer**, Lab_no: integer, description: String)

Allotment(**Stud_no: Integer, mach_no: integer, dayof week: string**)

For the above schema, perform the following—

- 1) Create the tables with the appropriate integrity constraints
- 2) Insert around 10 records in each of the tables
- 3) List all the machine allotments with the student names, lab and machine numbers
- 4) List the total number of lab allotments day wise
- 5) Give a count of how many machines have been allocated to the ‘CSIT’ class
- 6) Give a machine allotment details of the stud_no 5 with his personal and class details
- 7) Count for how many machines have been allocated in **Lab_no 1** for the day of the week as “Monday”
- 8) How many students class wise have allocated machines in the labs
- 9) Create a view which lists out the stud_no, stud_name, mach_no, lab_no, dayofweek
- 10) Create a view which lists the machine allotment details for “Thursday”.

7. Database Schema for an Employee-Detail

employee(**emp_id,emp_name, dateofbirth, designation, department, salary, gender**)

For the above schema, perform the following—

- 1) Create the tables with the appropriate integrity constraints
- 2) Insert around 10 records in each of the tables
- 3) List the employee whose salary between 15000 to 35000.
- 4) List the employee whose name is starting with J & T
- 5) List the min, max, avg salaries of employee.
- 6) Display the number of employees working in each department and their department name (Using group by).
- 7) Who are the Male programmers earning below the average salary of female programmers (Using group by).
- 8) Who is the youngest programmer born in 1965(Using Nested query).

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Linux Administration & Shell Programming	Course Code: DA4240
Credit: 3.5	L T P 2 1 2
Year: 2 nd	Semester: IV

UNIT 1

(9L)

Linux introduction and file system: Basic Features, Advantages, Installing requirement, Basic Architecture of Unix/Linux system, Kernel, Shell. Linux File system-Boot block, super block, Inode table, data blocks, How Linux access files, storage files, Linux standard directories. Commands for files and directories cd, ls, cp, md, rm, mkdir, rmdir, pwd, file, more, less, creating and viewing files using cat, file comparisons – cmp&comm, View files, disk related commands, checking disk free spaces. LINUX vs. UNIX operating system.

UNIT 2

(9L)

UNIX system organization (the kernel and the shell), Unix File System, Basic file attributes. Essential Linux commands Understanding shells, Processes in Linux-process fundamentals, connecting processes with pipes, tee, Redirecting input output, manual help, Background processing, managing multiple processes, changing process priority with nice, scheduling of processes at command, batch commands, kill, ps, who, sleep, Handling editors (vi/ed editors).

UNIT 3

(9L)

Unix Shell programming: Types of Shells, Shell Meta characters, Shell variables, Shell scripts, Shell commands, the environment, Integer arithmetic and string Manipulation, Special command line characters, Decision making and Loop control, controlling terminal input, trapping signals, arrays.

Processes in Unix/Linux, Filters using regular expressions: grep and sed, UNIX system administration.

SUGGESTED BOOKS:

1. Sumitabh Das, “Unix Concepts and applications”, TMH, 2003
2. Mike Joy, Stephen Jarvis, Michael Luck, “Introducing Unix and Linux”, Palgrave Macmillan.
3. O'Reilly Media “Linux System Administration”

Linux Administration and Shell Programming Lab

1. Handling general purpose utilities- cal, date, echo, script, mailx, passwd, who, uname, tty, sty, cat, cp,rm, mv, more, file, wc, od, cmp, comm, diff, lp, banner, dos2unix, and unix2dos, gzip and gunzip, zip and unzip.
2. Use the cat command to create a file containing the following data. Call it mutable use tabs to separate the fields 1425 ravi 15.65, 4320 ramu 26.27, 6830 sita 36.15, 1450 raju 21.86.
3. Write a shell script to compute the sum of number passed to it as argument on command line and display the result.
4. Use Vi editor to create a file called myfile.txt which contain some text. Correct typing errors during creation, Save the file & Logout of the file.
5. Implementation of various loop construct statements in unix.
6. Write a shell program to find out factorial of the given number.
7. Write shell script to perform integer arithmetic operations.
8. Write a shell script to find out whether the given number is prime number or not.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Principles of Management	Course Code: HA5010		
Credit: 2	L	T	P
	2	0	0
Year: 3rd	Semester: V		

UNIT – I

5L

Overview of management: Definition of management, need for management, role of managers, Management as science and art, evolution of management thought, contribution of Taylor and Fayol, Types of business organizations, Levels of management

UNIT – II

9L

Planning: Definition of planning, steps involved in planning, types of planning, objectives, process of managing by objectives, Strategy, types of strategies, Policy, types of policies, Decision making, types of decision making process.

UNIT – III

10L

Organizing: Nature, purpose and structure of organization, formal and informal organization, Departmentation, its importance, basis of departmentation, Line and staff authority, Centralization and decentralization, Authority and responsibility, delegation of authority
Selection and recruitment, orientation, appraisal, HRD.

UNIT – IV

8L

Directing: Creativity and innovation, Motivation, hierarchy of needs, motivation theories, Leadership – definition, elements, styles, leadership theories
Organization culture, elements and types of culture, managing cultural diversity.

UNIT – V

8L

Controlling: System and process of controlling, requirements of effective control, Types of control, cost control, purchase control, maintenance control, quality control, planning operations
Globalization and liberalization.

3. P. C. Tripathy and P. N. Reddy, " Principles and Practices of Management”, Tata McGraw Hill, 1999
4. Joseph L. Massie, “Essentials of Management” , Prentice Hall of India, 2003.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Probability & Random Variable	Course Code: JA5010						
Credit: 3.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 3 rd	Semester: V						

UNIT 1:

Theory of Probability & Concept of Random Variable

Axioms of probability: set theory, probability space, conditional, probability. Introduction, distribution and density functions, specific random variables, conditional distributions.

UNIT 2 :

Multiple Random Variables

Bi-variate distributions, one function of two random variables, two functions of two random variables, joint moments, joint characteristic functions, conditional distributions Multiple random variables, sequences of random variables

UNIT 3:

Concept of Stochastic Processes & Random Walks and Other Applications

Definition, systems with stochastic inputs, power spectrum, discrete-time processes. Random walks, Poisson points and shot noise, cyclo-stationary Processes, band-limited processes and sampling theory, deterministic signals in noise.

UNIT 4:

Spectral Representation and Estimation & Mean Square Estimation

Factorization and innovations, finite-order systems and state variables, spectral representation of random processes, ergodicity, spectrum estimation. Prediction, filtering and prediction, Kalman filters. Entropy: Basic concepts, random variables and stochastic processes, MEM.

UNIT 5:

Markov Chain & Queuing Theory

Introduction, higher transition probabilities and the Chapman-Kolmogorov equation, classification of states, stationary distributions and limiting probabilities, transient states and absorption probabilities, branching processes. Markov processes.

Characteristics of Queuing Theory, Queuing Models, Birth & Death Process, Little's Theorem.

Text Books:

1. Probability, Random Variables and Stochastic Processes/A. Papoulis & S. U. Pillai / 4th ed./TMH

Reference Books:

1. Probability, Random Variables & Random Signal Principles/Peyton Z. Peebles, Jr. / TMH
2. Probability & Queuing Theory, R. H. Chitale, Technical Publication Pune

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Algorithms: Analysis and Design	Course Code: DA5210
Credit: 4	L T P 3 0 2
Year: 3 rd	Semester: V

UNIT 1

(7L)

Introduction: Algorithms, Performance Analysis-Space complexity, Time complexity, Asymptotic Notation- Big oh notation, Omega notation, Theta notation and Little oh notation, Probabilistic analysis.

UNIT 2

(8L)

Divide and conquer: General method, applications-Binary search, Quick sort, Merge sort, Strassen's matrix multiplication.

Greedy method: General method, applications-Job sequencing with deadlines, knapsack problem, Minimum cost spanning trees, Single source shortest path problem.

UNIT 3

(8L)

Transform and conquer, Presorting, Balanced Search trees, AVL Trees, Warshall's and Floyd's Algorithm, Optimal Binary Search trees, Greedy Techniques, Prim's Algorithm, Kruskal's Algorithm Dijkstra's Algorithm, Huffman trees.

UNIT 4

(10L)

Backtracking: N-Queen's Problem, Hamiltonian Circuit problem, Subset-Sum problem, Branch and bound, Assignment problem, Knapsack problem, Traveling salesman problem.

UNIT 5

(7L)

NP-Hard and NP-Complete problems: Basic concepts, non deterministic algorithms, NP - Hard and NP-Complete classes, Cook's theorem.

Text Books:

1. Fundamentals of Computer Algorithms, Ellis Horowitz, SatrajSahni andRajasekharam, Galgotia Publications Pvt. Ltd.
2. AnanyLevitin, "Introduction to the Design and Analysis of Algorithm", Pearson Education Asia,2003 3.
3. Algorithm Design: Foundations, Analysis and Internet Examples, M.T.Goodrich and R.Tomassia, Johnwiley and sons.

Reference Books:

1. T.H. Cormen, C.E. Leiserson, R.L. Rivest and C. Stein, "Introduction to Algorithms", PHI Pvt. Ltd., 20012.
2. Introduction to Design and Analysis of Algorithms A strategic approach, R.C.T.Lee, S.S.Tseng, R.C.Chang and T.Tsai, McGraw Hill.
3. Design and Analysis of algorithms, Aho, Ullman and Hopcroft,Pearson education.
4. Algorithms – Richard Johnson baugh and Marcus Schaefer, Pearson Education.

Algorithm Analysis & Design Lab

Implementation of following algorithmic problems into c-program:-

1. Selection Problem: Minimum/ Maximum, Kth smallest element.
2. Divide & Conquer problems: Binary Search, Merge Sort, Quick Sort, Strassen's Matrix Multiplication.
3. Traversal of Binary Trees: Pre-Order, Post-Order and In-Order.
4. Traversal of Graph: Breadth-First (Using Queue), Depth-First (Using Stack).
5. Greedy Method: (Fractional) Knapsack Problem, Job Sequencing, Minimal Spanning Tree (Using Prim's and Kruskal's method).
6. Dynamic Programming: (0/1) Knapsack Problem, Travelling Salesman Problem, Matrix Chain Multiplication.
7. Backtracking: N-Queen Problem, Hamiltonian Cycle, Graph Coloring.
8. Shortest Path Problem: Dijkstra's Algorithm, Floyd-Warshall's Algorithm.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Advanced Java Programming	Course Code: DA5220
Credit: 4	L T P 3 0 2
Year: 3rd	Semester: V

UNIT 1

(8L)

J2SE: Concepts and Prerequisites: Data Types, Arrays, Dynamic Arrays, Type Casting, Classes and Objects, Inheritance, Interfaces, Exception Handling, Multi-Threading.

J2EE Architecture: J2EE as a framework, Client Server Traditional model, Comparison amongst 2-tier, 3-tier and N-tier architectures.

UNIT 2

(8L)

JDBC: Introduction, JDBC Architecture, Types of JDBC Drivers, The Connectivity Model, The java.sql package, Navigating the Result Set object's contents, Manipulating records of a Result Set object through User Interface, The JDBC Exception classes, Database Connectivity, Data Manipulation (using Prepared Statements, Joins, Transactions, Stored Procedures), Data navigation.

UNIT 3

(8L)

Java Beans: The software component assembly model- The java beans development kit- developing beans – notable beans – using info bus - Glasgow developments - Application Builder tool- JAR files-Introspection-Bound Properties-Persistence-customizers - java beans API.

EJB: EJB architecture- EJB requirements – design and implementation – EJB session beans- EJB entity beans- EJB Clients – deployment tips, tricks and traps for building distributed and other systems – implementation and future directions of EJB-Variable in perl- perl control structures and operators – functions and scope.

UNIT 4

(8L)

Java Servlet: Servlet overview, Brief origin and advantages over CGI, Writing small Servlet Programs, Deployment Descriptor, Servlet Life Cycle, Sharing Information, Initializing a Servlet, Writing Service Methods, Filtering Requests and Responses, Invoking Other Web Resources, Accessing the Web Context, Maintaining Client State, Finalizing a Servlet, Session: Definition, Different ways to track sessions

UNIT 5

(8L)

JSP: Introduction to JSP, JSP processing, JSP Application Design, Tomcat Server, Implicit JSP objects, Conditional Processing, Declaring variables and methods, Error Handling and Debugging, Sharing data between JSP pages- Sharing Session and Application Data. Accessing a database from a JSP page, Application-specific Database Action, Developing Java Beans in a JSP page, introduction to Struts framework.

Text Books:

1. J. McGovern, R. Adatia, Y. Fain, 2003, J2EE 1.4 Bible, Wiley-dream tech India Pvt. Ltd, New Delhi.
2. H. Schildt, 2002, Java 2 Complete Reference, 5th Edition, Tata McGraw-Hill, New Delhi.

Reference Books:

1. K. Moss, 1999, Java Servlets, Second edition, Tata McGraw Hill, New Delhi.
2. D. R. Callaway, 1999, Inside Servlets, Addison Wesley, Boston.
3. Joseph O'Neil, 1998, Java Beans from the Ground Up, Tata McGraw Hill, New Delhi.
4. Tom Valesky, Enterprise JavaBeans, Addison Wesley.
5. Cay S Horstmann & Gary Cornell, Core Java Vol II Advanced Features, Addison Wesley

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Advanced Java Programming Lab

1. Write a program in Java to demonstrate the use of multithreading and exception handling.
2. Creation of a JavaBean which gives the converted value of Temperature (in degree Celsius) into equivalent Fahrenheit
3. Creation of a simple Bean with a label – which is a “count” of number of clicks. Then create a BeanInfo class such that only the “count” is visible in the Property Window.
4. Creation of two Beans a) Keypad b) Display pad. After that integrate the two beans to make it work as a calculator.
5. Write a servlet program to take two input from a HTML page and print its result on the web page.
6. Development of dynamic website using JSP of an online Departmental Store. Create database with User Information and Item information. The Item catalog should be dynamically loaded from the database. The website should be user friendly and should have the following pages:
 - i. Home page
 - ii. Registration and user login
 - iii. User profile page
 - iv. Items catalog
 - v. Shopping cart
 - vi. Payment by credit card
 - vii. Order confirmation
7. Implementation of currency converter program using JSP Struts Framework.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Artificial Intelligence	Course Code: DA5010						
Credit: 3.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 3 rd	Semester: V						

UNIT 1

(8L)

Introduction: History of AI, Intelligent agents – Structure of agents and its functions, Problem spaces and search - Heuristic Search techniques – Best-first search, Problem reduction -Constraint satisfaction - Means Ends Analysis.

UNIT 2

(8L)

Knowledge Representation: Approaches and issues in knowledge representation, Knowledge Based Agent, Propositional Logic, Predicate logic – Unification – Resolution, Weak slot – filler structure, Strong slot - filler structure.

UNIT 3

(8L)

Reasoning under uncertainty: Logics of non-monotonic reasoning, Implementation, Basic probability notation, Bayes rule, Certainty factors and rule based systems, Bayesian networks, Dempster - Shafer Theory, Fuzzy Logic.

UNIT 4

(8L)

Planning and Learning: Planning with state space search, conditional planning, continuous planning, Multi-Agent planning. Forms of learning - inductive learning – Reinforcement Learning - learning decision trees - Neural Net learning and Genetic learning

UNIT 5

(8L)

Advanced Topics: Game Playing: Minimax search procedure - Adding alpha-beta cutoffs.

Expert System: Representation - Expert System shells - Knowledge Acquisition. CASE STUDY- Dendral, Mycin.

Swarm Intelligent Systems – Ant Colony System, Development, Application and Working of Ant Colony System.

Text Books:

1. Elaine Rich, Kevin Knight and Shivashankar B. Nair, “Artificial Intelligence”, Tata McGraw-Hill, 3rd edition, 2009. (UNITs I, II, III & V)
2. Stuart J. Russell and Peter Norvig, "Artificial Intelligence: A Modern Approach", Pearson Education Asia, 2nd edition, 2003. (UNIT IV)
3. N. P. Padhy, “Artificial Intelligence and Intelligent System”, Oxford University Press, 2nd edition, 2005. (Unit V)

Reference Books:

1. Rajendra Akerkar, “Introduction to Artificial Intelligence”, Prentice-Hall of India, 2005.
2. Patrick Henry Winston, “Artificial Intelligence”, Pearson Education Inc., 3rd edition, 2001.
3. Eugene Charniak and Drew Mc Dermott, “Introduction to Artificial Intelligence”, Addison-Wesley, ISE Reprint, 1998.
4. Nils J. Nilsson, “Artificial Intelligence - A New Synthesis", Harcourt Asia Pvt. Ltd., Morgan Kaufmann, 1988.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Microprocessor	Course Code: FA52A0		
Credit: 4.5	L 3	T 1	P 2
Year: 3 rd	Semester: V		

Unit 1

Introduction To Microprocessor : 8085 Evolution Of Microprocessor, Register Structure, ALU, Bus Organization, Timing And Control, instruction set.

Architecture of 16-bit Microprocessors: Architecture of 8086; (Bus Interface Unit, Execution unit) Register Organization, Bus operation, Memory segmentation.

Unit 2

Assembly Language Programming: Addressing Modes and instruction set of 8086, Arithmetic and Logic instructions, Program Control Instructions (jumps, conditional jumps, subroutine call) Loop and string instructions , Assembler Directives.

Unit 3

CPU MODULE: Signal Description of pins of 8086 and 8088, Clock generator, Address and Data bus Demultiplexing, Buffering Memory Organization, Read and Write cycle Timings, Interrupt Structures, Minimum Mode, Maximum Mode Operation.

Unit 4

Peripheral Interfacing: Programmed I/O, Interrupt Driven, I/O, DMA, Parallel I/O, (8255-PPI, Parallel port), 8253/8254 programmable Timer/Counter Interfacing with ADC.

Unit 5

Peripheral Interfacing (Contd.): 8259 Programmable Interrupt controller, 8237 DMA controller, Concept of Advanced 32 bit Microprocessors: Pentium Processor.

Text Book:

1. Ray, A.K. & Burchandi, K.M., “Advanced Microprocessors and Peripherals: Architecture, Programming and Interfacing”, Tata McGraw Hill.
2. Hall D.V. , “Microprocessors Interfacing” ,2nd edition, Tata McGraw Hill

Reference Books

1. Gaonkar, Ramesh S., “Microprocessor Architecture, Programming, and Applications with the 8085”, Pen Ram International Publishing , 5th edition
2. B.P. Singh & Renu Singh, “Microprocessors and Microcontrollers”, New Age International.
3. Liu and Gibson G.A. , “Microcomputer Systems: The 8086/8088 Family”, Prentice Hall (India), 2nd edition
4. Brey, Barry B. , “INTEL microprocessors”, Prentice Hall (India), 4th edition
5. Ram B., “Advanced Microprocessor & Interfacing” , Tata McGraw Hill
6. Renu Singh & B.P. Singh, “Microprocessors and Interfacing & Applications”, New Age International.

**Course Structure & Syllabus of
B.Tech – Computer Science & Engineering
Applicable for 2013-2017 Batch**

Course Title: Engineering Economics	Course Code: GC5010		
Credit: 2	L 2	T 0	P 0
Year: 3rd	Semester: VI		

UNIT-I

Time value of money: Simple and compound interest, Time value equivalence, Compound interest factors, Cash flow diagrams, Calculation, Calculation of time –value equivalences. Present worth comparisons, Comparisons of assets with equal, unequal and infinite lives, comparison of deferred investments, Future worth comparison, payback period comparison.

UNIT-II

Use and situations for equivalent annual worth comparison, Comparison of assets of equal and unequal life. Rate of return, Internal rate of return, comparison of IIR with other methods, IRR misconceptions.

UNIT-III

Analysis of public Projects: Benefit/ Cost analysis, quantification of project, cost and benefits, benefit/ cost applications, Cost –effectiveness analysis.

UNIT-IV

Depreciation, computing depreciation charges, after tax economic comparison, Break-even analysis; linear and non-linear models. Product and Process Costing, Standard Costing, cost estimation, Relevant Cost for decision making, Cost control and Cost reduction techniques.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Computer Graphics	Course Code: DA6210		
Credit: 4	L 3	T 0	P 2
Year: 3 rd	Semester: VI		

UNIT 1

(7L)

Introduction to computer graphics and primitives algorithms: Points, planes, pixels and frames buffers, lines, circles and ellipse drawing algorithms, display devices, primitive devices, applications of computer graphics.

UNIT 2

(7L)

Two-Dimensional Transformation: Introduction to transformation matrix, **Types of transformations in 2-D:** Identity Transformation, Scaling, Reflection, Shear Transformation, Rotation, Translation, Rotation about an arbitrary point, Combined Transformation, Homogeneous coordinates, 2-D transformation using homogeneous coordinates.

UNIT 3

(9L)

Three-Dimensional Transformation: Objects in homogeneous coordinates, **3-D Transformation:** Scaling, Translation, Rotation, Shear Transformations, Reflection, world coordinates and viewing coordinates, Projection, parallel Projection, Perspective projection. **Hidden Lines and Surfaces:** Back face removal algorithms, Hidden lines methods.

UNIT 4

(9L)

Viewing and Solid Area Scan-Conversion: Introduction to viewing and clipping, viewing transformation in 2-D, Point Clipping, Line Clipping, Introduction to polygon Clipping, Viewing and clipping in 3-D, Three Dimensional Viewing Transformations, Text Clipping, generalize Clipping, Multiple windowing.

Introduction to Solid Area Scan: Conversion, Inside-Outside Test, Winding Number Method and Coherence Property, Polygon Filling, Seed Fill Algorithms, Scan Line Algorithm, priority Algorithm, Scan Conversion of Characters, Aliasing, Anti-aliasing, Halfoning, Threshold and Dithering.

UNIT 5

(8L)

Introduction to curves: Curves Continuity, Conic Curves, Piecewise Curve Design, Spline curve representation, Bezier Curves, Fractals and its Applications.

Object rendering: Introduction to Object Rendering, Shading, Ray Tracing, Illuminational model, Colour Models.

Text Books:

1. Computer Graphics, R.K. Maurya, John Willey.
2. Procedural Elements of Computer Graphics, David F. Rogers, Tata McGraw Hill.

Reference Books:

1. Computer Graphics, Donald hearn and M.Pauline Beaker, Prentice Hall of India.
2. Computer Graphics, Steven Harrington, McGraw Hill.

Computer Graphics Lab

1. Write a program for 2D line drawing using DDA and Bresenham's algorithms.
2. Write a program for circle generation using midpoint method.
3. Write a program for polygon filling as raster graphics display.
4. Write a program for line clipping.
5. Write a program for polygon clipping.
6. Write a program for displaying 3D objects as 2D display using perspective transformation.
7. Write a program for rotation of a 3D objects about arbitrary axis.
8. Write a program for hidden surface removal from a 3D objects.
9. Write a program for curve generation using B-spline and Bezier curves.
10. Write a program for curve generation using interpolation methods.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Dot Net Technologies	Course Code: DA6220
Credit: 4	L T P 3 0 2
Year: 3rd	Semester: VI

UNIT 1 **(8L)**

Introduction to C#: C# Language Fundamentals: An Anatomy of a basic class, Creating objects: Constructor basic, the composition of an application, Default Assignment and variable scope, member initialization syntax, Basic input and output with the console class, Understanding value types and reference types, the master node: System. Objects, The system Data type (And C# aliases), Converting between value type and reference type: Boxing and Unboxing, Defining program constraints, Iterations constructs, control flow constructs, The complete set operator, Defining Custom class methods, Understanding static methods, Method parameter modifiers, Array manipulation, String manipulation, Enumerations, Defining structures, Defining custom namespaces.

UNIT 2 **(8L)**

Object Oriented Aspects Of C#: Formal definition of the class, Definition the “Default public interface” of a type, Recapping the pillars of OOP, The first pillar: Encapsulation services, Pseudo Encapsulation: Creating read only field, The second pillar: Inheritance supports keeping family secrets: The “Protected” keyword, The Nested type definitions, The third pillar: Polymorphic support casting between types, Generating class definitions using Visual Studio.Net. Exceptions and Objects Life Time Ode to errors, Bugs and exceptions, the role of .NET exceptions handling, the system. Exception base class throwing a generic exception catching exception, CLR system level exception(System. system exception), Custom application level exception (System. application exception), Handling multiple exception, The finally block The last chance exception, dynamically identify application and system level exception, Debugging system exception using VS.Net, Understanding Object life time, The CIT of new, The basic of garbage collection, Finalizing a type, Finalization process, building and Ad hoc destruction method, garbage collection optimization, The system .GC type.

UNIT 3 **(8L)**

The CLR And The .Net Framework: The building Block of the .NET platform (CLR,CTS,CLS), the role of the .NET base class libraries, , additional .NET Aware programming Languages, Understanding .Net Assemblies, Problems with classic COM Binaries, The role of the common intermediate language, The role of .NET type metadata, The role of the assembly manifest, Compiling CIL to platform specific instruction. Building a simple file test assembly, Cross Language Inheritance. Building the multi file assembly, Using the multi file assembly, Understanding private assemblies, robing for private assemblies (The Basics), Private assemblies and XML Configuration files, Probing for private assemblies (The details),Understanding Shared assembly, Understanding Shared Names, Building a shared assembly, Understanding delay Signing, Installing/Removing shared assemblies, Using a Shared assembly.

UNIT 4 **(8L)**

Application Development On .Net: Using the visual studio.Net IDE, key aspects of the VS.Net IDE, Documenting source code via XML, Building Windows Applications, Event Driven Programming, Delegate, Event and its association, Synchronous and asynchronous operation with delegate, User Defined events and delegates,ADO.NET Architecture,.NET Framework Data Providers, Data set, Data reader, data adapter, Accessing Data with ADO.NET.

UNIT 5 **(8L)**

Web Based Application Development On .Net: Introduction to web form, Need of Web Application, Static and Dynamic Page, Working of IIS and Browser, Differences between ASP and ASP.NET, understanding post back, understanding page life cycle, State management, Server control form validation, Master pages, ASP.NET web security, server control form validation, Programming Web Applications with Web Forms, Web service, Programming Web Services.

Text Books:

1. E. Balagurusamy, "Programming in C#", Tata McGraw-Hill, 2004. (Unit I, II)
2. J. Liberty, "Programming C#", 2nd ed., O'Reilly, 2002. (Unit III, IV, V)

Reference Books:

1. Herbert Schildt, "The Complete Reference: C#", Tata McGraw-Hill, 2004.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

2. Robinson et al, "Professional C#", 2nd ed., Wrox Press, 2002.
3. Andrew Troelsen, "C# and the .NET Platform", A! Press, 2003.
4. S. ThamaraiSelvi, R. Murugesan, "A Textbook on C#", Pearson Education, 2003.

Dot Net Technologies Lab

1. Write a Program in C# and display its Metadata, CIL and Manifest information using ildasm.exe tool.
2. Write a program in c# for create a object of class and constructor and destructor also.
3. Write a program for preprocessors(#if #else #elif #endif #define #undef #warning #error and #line)
4. Write a program for custom constructor and static constructor.
5. Write a program in c# pass reference type by value and reference type by reference.
6. Write a program in c# for create jagged array.
7. Write a program for string manipulation.
8. Write a program in C# Language to create Custom Namespaces.
9. Write a Program in C# Language to demonstrate read only property and Write only property.
10. To write a program in C# Language to demonstrate Hybrid Inheritance.
11. Write a program in C# Language to demonstrate the usage of Delegates.
12. To write a program in C# Language to demonstrate Interfaces inheritance.
13. To write a program in C# Language to demonstrate multi file assembly.
14. To write a program in C# Language to demonstrate private assembly.
15. To write a program in C# Language to demonstrate the public assembly.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Compiler Design	Course Code: DA6230						
Credit: 4	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	0	2
L	T	P					
3	0	2					
Year: 3 rd	Semester: VI						

UNIT 1

(8L)

Introduction: Review of Languages & Grammar, Compiler and Interpreter- Basic Concepts. Phases and Passes, Design Issues using Finite State Machines, Scanner Generator- LEX. Formal Grammar and their application to Syntax Analysis, Ambiguous Grammar, The Syntactic specification of Languages: CFG, Derivation and Parse Trees, Capabilities of CFG, BNF Notation.

UNIT 2

(10L)

Basic Parsing Techniques: Parsing-Top Down and Bottom-Up Strategies: General Consideration. Top Down Parsing: Brute-Force Method, Recursive Descent, & Predictive Parsing. Bottom-Up Parsing: Shift Reduce Parsing, Operator Precedence Parsing. LR Grammars-LR(0), SLR(1), Canonical LR(1) & LALR(1) Parser, Comparison of parsing methods.

UNIT 3

(8L)

Semantic Analysis: Basic Concepts, Syntax Directed Definitions-Inherited & Synthesized Attributes, Evaluation Orders of SDDs. Syntax directed Translation Schemes, Intermediate Codes, Postfix notation, Parse Trees and Syntax Trees, Directed Acyclic Graphs, Three address Codes: Quadruple & Triples, Translation of Assignment Statements, Boolean expressions, Control Statements, Postfix Translation, Translation with a Top Down Parser, Array References in Arithmetic expressions, Procedure Calls, Declarations and Case statements Translations.

UNIT 4

(6L)

Symbol Tables: Organization of Non-Block Structured Language (Unordered /Ordered/ Tree/ Hash) and Block Structured Language (Stack Tables & Stack Implementation), Runtime Storage Management: Static Allocation, Dynamic Allocation- Activation Records and their usage, Recursive Procedure. Heap Allocation-Storage Registers and Release Strategies.

UNIT 5

(8L)

Error detection and Recovery: Code Optimization- Basic Blocks and Optimization, Loop Optimization, Flow Graph Analysis, Machine Dependent Optimization.

Error Handling: Detection, Reporting, Recovery and Maintenance, Compiler-Compiler—YACC, Code Generation, Concept of Compiler Design for Object-Oriented Language.

SUGGESTED BOOKS:

1. Alfred V. Aho, Ravi Sethi, Jeffrey D. Ullman, “Compilers-Principles, Techniques & Tools”, Pearson Education
2. Robin Hunter, “ Essence of Compilers”, Pearson Education
3. Steven S. Muchnick, Advanced Compiler Design & Implementation, Morgan Kaufmann Publishers

Compiler Design Lab

1. Familiarization with LEX & development of the Scanner for the language
 - Simulation of a Finite State Automata to recognize the tokens of various control statements
 - Simulation of a Finite State Automata to distinguish among Integers, Real Numbers, & Number with Exponents
 - Program in LEX tool to recognize the token & to return found for a C like language
2. Familiarization with YACC & development of a Parser
 - Parsing of arithmetic and algebraic expression and equation
 - Use of YACC tool to parse statements of C like language
3. Incorporation of action routines for generation of a specific intermediate code
4. Simulation of a desk-calculator
5. Generation of target machine code from intermediate code

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Software Engineering	Course Code: DA6010		
Credit: 3	L	T	P
	3	0	0
Year: 3rd	Semester: VI		

UNIT 1 (8L)

Introduction to Software Engineering, Software Characteristics, Software Crisis, Software Engineering Processes, Software Development Life Cycle (SDLC) Models: Water Fall Model, Prototype Model, Spiral Model, Evolutionary Development Models, Iterative Enhancement Models.

UNIT 2 (8L)

Software Requirement Analysis and Specifications: Requirement Engineering Process: Elicitation, Analysis, Documentation, Review and Management of User Needs, Data Flow Diagrams, Data Dictionaries, Entity-Relationship diagrams, Software Requirement and Specifications, Functional and non-Functional requirements, Software Prototyping, Feasibility Study, Information Modeling, Decision Tables, SRS Document, IEEE Standards for SRS, Software Quality Assurance (SQA), SEI-CMM Model.

UNIT 3 (8L)

Design: Basic Concept of Software Design, Architectural Design, Low Level Design: Modularization, Design Structure Charts, Pseudo Codes, Flow Charts, Coupling and Cohesion Measures, Design Strategies: Function Oriented Design, Object Oriented Design, Top-Down and Bottom-Up Design. Software Measurement and Metrics: Various Size Oriented Measures: Halstead's Software Science, Function Point (FP) Based Measures, Cyclomatic Complexity Measures: Control Flow Graphs.

UNIT 4 (7L)

Software Reliability: Failure and Faults, Reliability Models: Basic Model, Logarithmic Poisson Model, Calendar time Component, Reliability Allocation. **Coding:** Top-Down and Bottom –Up programming, structured programming, Compliance with Design and Coding Standards.

UNIT 5 (9L)

Testing: Objectives, Testing Tools & Standards. Unit Testing, Integration Testing, Acceptance Testing, Regression Testing, Top-Down and Bottom-Up Testing Strategies: Test Drivers and Test Stubs, Path Testing, Structural Testing (White Box Testing), Functional Testing (Black Box Testing),

Maintenance: Corrective and Perfective Maintenance, Maintenance Process, Maintenance Models, Maintenance Cost, Software Re-Engineering, Reverse Engineering. Constructive Cost Models (COCOMO).

Software Quality Management: Software Quality Factors, Quality Assurance, Quality Standards, Software Maintenance.

Text Books:

1. R. S. Pressman, "Software Engineering – A practitioner's approach", 3rd ed., McGraw Hill Int. Ed., 1992.
2. K.K. Aggarwal & Yogesh Singh, "Software Engineering", New Age International, 2001
3. Pankaj Jalote, Software Engineering, Wiley India

Reference Books:

1. Rajib Mall, Fundamentals of Software Engineering, PHI Publication, 3rd Edition.
2. Ian Sommerville, Software Engineering, Addison Wesley, 8th Edition.
3. James Peter, W Pedrycz, "Software Engineering", John Wiley & Sons.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Data Warehousing and Mining	Course Code: DA6020						
Credit: 3.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 3 rd	Semester: VI						

UNIT 1 **(12L)**

Overview, Motivation (for Data Mining), Data Mining-Definition & Functionalities

Data Warehousing: Overview, Definition, Delivery Process, Difference between Database System and Data Warehouse, Multi Dimensional Data Model, Data Cubes, Stars, Snow Flakes, Fact Constellations, Concept hierarchy, Process Architecture, 3 Tier Architecture, Data Marting, ROLAP, MOLAP, HOLAP.

UNIT 2 **(7L)**

Data Pre-Processing: Data Cleaning: Missing Values, Noisy Data,(Binning, Clustering, Regression, Inconsistent Data, Data Integration and Transformation.

Data Reduction: Data Cube Aggregation, Dimensionality reduction, Data Compression, Numerosity Reduction, Clustering, Discretization and Concept hierarchy generation.

UNIT 3 **(7L)**

Concept Description: Definition, Data Generalization, Analytical Characterization, Analysis of attribute relevance, Mining Class comparisons, Statistical measures in large Databases. Measuring Central Tendency, Measuring Dispersion of Data, Apriori Algorithm, Mining Multilevel Association rules from Transaction Databases

UNIT 4 **(6L)**

Classification: What is Classification, Issues regarding Classification, Decision tree, Bayesian Classification, Classification by Back propagation.

UNIT 5 **(8L)**

Cluster Analysis: Data types in cluster analysis, Partitioning methods. Hierarchical Clustering- CURE and Chameleon, Density Based Methods-DBSCAN, OPTICS, Grid Based Methods- STING, CLIQUE, Outlier Analysis.

SUGGESTED BOOKS:

1. Jiawei Han, Micheline Kamber, "Data Mining Concepts & Techniques" Elsevier
2. M.H. Dunham,"Data Mining: Introductory and Advanced Topics" Pearson Education
3. Mallach, "Data Warehousing System", McGraw –Hill

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Distributed Computing	Course Code: DA7010		
Credit: 3	L 3	T 0	P 0
Year: 4 th	Semester: VII		

UNIT 1 **(8L)**

Fundamentals of Distributed Computing: Introduction to distributed computing Systems, Resource sharing and the Web Challenges.

System Models: Architectural models, Fundamental Models

Theoretical Foundation for Distributed Computing System: Limitation of Distributed system, absence of global clock, shared memory, Logical clocks, Lamport's & vectors logical clocks, Causal ordering of messages, global state, termination detection.

UNIT 2 **(8L)**

Distributed Mutual Exclusion: Classification of distributed mutual exclusion, requirement of mutual exclusion theorem, Token based and non token based algorithms, performance metric for distributed mutual exclusion algorithms.

Distributed Deadlock Detection: system model, resource Vs communication deadlocks deadlock prevention, avoidance, detection & resolution, centralized dead lock detection, distributed dead lock detection, path pushing algorithms, edge chasing algorithms.

UNIT 3 **(8L)**

Distributed Objects and Remote Invocation: Communication between distributed objects, Remote procedure call, Events and notifications, Java RMI case study.

Distributed File Systems: File service architecture, Sun Network File System, The Andrew File System, Recent advances.

UNIT 4 **(8L)**

Transactions and Concurrency Control: Flat and nested distributed transactions, Locks, Optimistic Concurrency control, Timestamp ordering, Comparison of methods for concurrency control.

Distributed Transactions: Concurrency control in distributed transactions, Distributed deadlocks, Transaction recovery. Replication: System model and group communication, Fault - tolerant services, highly available services, Atomic Commit protocols.

UNIT 5 **(8L)**

Introduction to Grid Computing: Basics of grid Computing, Benefits of grid computing, Grid terms and concepts, Grid user roles, Standards for grid environments, Grid security requirements.

Introduction to Parallel Processing: Basic Concepts: Introduction to parallel processing, parallel processing terminology, Parallel & Distributed Programming: Parallel Programming environments

SUGGESTED BOOKS:

1. Tannenbaum, A, Van Steen. Distributed Systems, Principles and Paradigm, Prentice Hall India, 2002
2. Tannenbaum, A. Distributed Operating Systems, Pearson Education. 2006
3. Attiya, Welch, "Distributed Computing", Wiley India, 2006
4. Singhal and Shivaratri, "Advanced Concepts in Operating Systems", McGraw Hill, 1994
5. Coulouris, Dollimore, Kindberg, "Distributed System: Concepts and Design", Pearson Ed.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Advanced Computer Architecture	Course Code: DA7020						
Credit: 3.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 4 th	Semester: VII						

UNIT 1

(6L)

Introduction: Parallel Computing, Parallel Computer Model, Program and Network Properties, Parallel (Architectural Classification Schemes, Flynn's & Feng's Classification, Performance Metrics and Measures, Speedup Performance Laws: Multiprocessor System and Interconnection Networks; IEEE POSIX Threads: Creating and Exiting Threads, Simultaneous Execution of Threads, Thread Synchronization using Semaphore and Mutex, Canceling the Threads.

UNIT 2

(9L)

Pipelining and Memory Hierarchy: Basic and Intermediate Concepts, Instruction Set Principle; ILP: Basics, Exploiting ILP, Limits on ILP; Linear and Nonlinear Pipeline Processors; Super Scalar and Super Pipeline Design; Memory Hierarchy Design: Advanced Optimization of Cache Performance, Memory Technology and Optimization, Cache Coherence and Synchronization Mechanisms.

UNIT 3

(8L)

Thread and Process Level Parallel Architecture: Introduction to MIMD Architecture, Multithreaded Architectures, Distributed Memory MIMD Architectures, Shared Memory MIMD Architecture, Clustering, Instruction Level Data Parallel Architecture, SIMD Architecture, Fine Grained and Coarse Grained SIMD Architecture, Associative and Neural Architecture, Data Parallel Pipelined and Systolic Architectures, Vector Architectures.

UNIT 4

(8L)

Parallel Computing model: Sequential model, need of alternative model, parallel computational models such as PRAM, LMCC, Hypercube, Cube Connected Cycle, Butterfly, Perfect Shuffle Computers, Tree model, Pyramid model, Fully Connected model, PRAM-CREW, EREW Models.

UNIT 5

(9L)

Parallel Algorithms: PRAM Algorithms: Parallel Reduction, Prefix Sums, Preorder Tree Traversal, Merging two Sorted lists; Matrix Multiplication: Row Column Oriented Algorithms, Block Oriented Algorithms; Parallel Quicksort, Hyper Quicksort; Solving Linear Systems: Gaussian Elimination, Jacobi Algorithm; Parallel Algorithm Design Strategies.

SUGGESTED BOOKS:

1. Kai Hwang, "Advance Computer Architecture", TMH
2. Matthew, "Beginning Linux Programming", SPD/WROX
3. Hennessy and Patterson, "Computer Architecture: A Quantitative Approach", Elsevier
4. Dezso and Sima, "Advanced Computer Architecture", Pearson
5. Quinn, "Parallel Computing: Theory & Practice", TMH
6. Quinn, "Parallel Programming in C with MPI and Open MP", TMH

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Cryptography and Network Security	Course Code: DA7210
Credit: 4	L T P 3 0 2
Year: 4 th	Semester: VII

UNIT 1 (8L)

Introduction to security attacks, services and mechanism, introduction to cryptography.

Conventional Encryption: Conventional encryption model, classical encryption techniques-substitution ciphers and transposition ciphers, cryptanalysis, steganography, stream and block ciphers.

Modern Block Ciphers: Block ciphers principals, Shannon’s theory of confusion and diffusion, feistel structure, data encryption standard(DES), strength of DES, differential and linear crypt analysis of DES, block cipher modes of operations, triple DES, confidentiality using conventional encryption, traffic confidentiality, key distribution,

UNIT 2 (8L)

Introduction to prime and relative prime numbers, finite field of the form GF(p), modular arithmetic, Fermat’s and Euler’s theorem, primality testing, Euclid’s Algorithm, Chinese Remainder theorem, Principals of public key crypto systems, RSA algorithm, security of RSA, key management, Diffie-Hellman key exchange algorithm, introductory idea of Elliptic curve cryptography, Elgamal encryption.

UNIT 3 (8L)

Message Authentication and Hash Function: Authentication requirements, authentication functions, message authentication code, hash functions, birthday attacks, security of hash functions and MACS, MD5 message digest algorithm, Secure hash algorithm(SHA). Digital Signatures: Digital Signatures, authentication protocols, digital signature standards (DSS), proof of digital signature algorithm.

UNIT 4 (8L)

Authentication Applications: Kerberos and X.509, directory authentication service, electronic mail security-pretty good privacy (PGP), S/MIME.

UNIT 5 (8L)

IP Security: Architecture, Authentication header, Encapsulating security payloads, combining security associations, key management.

Web Security: Secure socket layer and transport layer security, secure electronic transaction (SET).

System Security: Intruders, Viruses and related threads, firewall design principals, trusted systems.

SUGGESTED BOOKS:

1. William Stallings, “Cryptography and Network Security: Principals and Practice”, Prentice Hall, New Jersey.
2. Johannes A. Buchmann, “Introduction to Cryptography”, Springer-Verlag.
3. Bruce Schneier, “Applied Cryptography”.

Cryptography and Network Security Lab

1. Footprinting using footprinting tools (Open Source & Free)(ex-nslookup, ARIN, Whois, Google Earth etc..).
2. Scanning for vulnerabilities using (Angry IP, HPing2, IPScanner, Global Network Inventory Scanner, Net Tools Suite Pack.).
3. NetBIOS Enumeration Using NetView Tool, Nbtstat Enumeration Tool (Open Source).
4. Steganography using tools: Tool: Merge Streams, Image Hide, Stealth Files, Blindside, STools, Steghide, Steganos, Pretty Good Envelop, Stegdetect,.
5. Steganalysis - Stego Watch- Stego Detection Tool, StegSpy.
6. How to Detect Trojans by using – Netstat, fPort, TCPView, CurrPorts Tool, Process Viewer.
7. Lan Scanner using look@LAN, Wireshark.
8. Understanding DoS Attack Tools- Jolt2, Bubonic.c, Land and LaTierra, Targa, Nemesy Blast, Panther2, Crazy Pinger, Some Trouble, UDP Flood, FSMAX.
9. Implementation of RSA in C using Linux.
10. Implementation of DES in C using Linux.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Grid Computing (<i>Elective-I</i>)	Course Code: DA7610		
Credit: 3	L	T	P
	3	0	0
Year: 4 th	Semester: VII		

UNIT 1

(6L)

Definition of Grid; Basic Building Blocks; Issues in Management of Grid Models; Evolution of Grid Models, Anatomy and Physiology of Grid-Review of Web Services-OGSA-WSRF.

UNIT 2

(7L)

Fundamental system components of Grid Computing; Requirements concerning abstractions, behaviors, resources, connectivity, and protocols; Open grid service architectures.

UNIT 3

(13L)

Introduction to Grid computing environment: Overview of GCE; Programming models; Middleware for building grid computing environments; Language support (MPI-G, MPI-G2) for grid computing; Meta models for grid programming; Security.

UNIT 4

(6L)

Data Management in Grid Computing; Categories and Origins of Structured Data; Data Management Challenges; Architectural Approaches Collective Data Management Services Federation; Services-Grid Portals-First-Generation Grid Portals-Second-Generation Grid Portals.

UNIT 5

(8L)

Monitoring and evaluation: Monitoring; Scheduling; Performance tuning; Debugging and performance diagnostic issues.

SUGGESTED BOOKS

Text Books:

1. Maozhen Li, Mark Baker, The Grid Core Technologies, John Wiley & Sons, 2005.
2. Joshy Joseph & Craig Fellenstein, "Grid Computing", Pearson Education 2004.

Reference Books:

1. Ian Foster & Carl Kesselman, The Grid 2 – Blueprint for a New Computing Infrastructure, Morgan Kaufman, 2004.
2. Fran Berman, Geoffrey Fox, Anthony J.G. Hey, "Grid Computing: Making the Global Infrastructure a reality", John Wiley and sons, 2004

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Mobile Computing (<i>Elective-I</i>)	Course Code: DA7620						
Credit: 3	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 4 th	Semester: VII						

UNIT 1 (8L)

Introduction: Introduction to mobile computing. Convergence of Internet, digital communication and computer networks. Sharing of wireless channels: FDMA, TDMA, CDMA. MAC layer issues in wireless communication.

UNIT 2 (8L)

Mobility Management: Impacts of mobility and portability in computational model and algorithms for mobile environment. Disconnected operation, handling handoffs. Analysis of algorithms and termination detection. Types of Mobility. Mobility in cellular based wireless network: channel allocation, interferences, handoffs and location management. IP mobility: Mobile IP and IDMP

UNIT 3 (8L)

Wireless LAN: Infrared vs. Radio transmission, Infrastructure and Ad hoc Networks, IEEE 802.11: System architecture, Protocol architecture, Physical layer, Medium access control layer, MAC management, Future development; HIPERLAN: Protocol architecture, Physical layer, Channel access control. Sub layer, Medium access control Sub layer, Information bases and Networking; Bluetooth: User scenarios, Physical layer, MAC layer, Networking. Security, Link management. Personal Area Network: Bluetooth and ZigBee. Network layer issues ad hoc and sensor networks

UNIT 4 (8L)

Data Models: Data delivery models: push and pull. Data dissemination in wireless channels. Broadcast disks. Effects of caching, Indexing in Air, Mobile Databases and transaction

UNIT 5 (8L)

Distributed Mobile Environment: Distributed file system for mobile environment, Mobile Middleware: Service discovery, adaptation, mobile agents.

Text Books:

1. Jochen Schiller, "Mobile Communications", PHI/Pearson Education, Second Edition.
2. William Stallings, "Wireless Communications and Networks", PHI/Pearson Education

Reference Books:

1. T. Rappaport, "Wireless Communication: Principles and Practice", Pearson Education.
2. Reza B'Far (Ed), "Mobile Computing Principles", Cambridge University Press

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: LAMP Technologies (Elective-I)	Course Code: DA7630						
Credit: 3	<table style="width: 100%; border: none;"> <tr> <td style="width: 33%; text-align: center;">L</td> <td style="width: 33%; text-align: center;">T</td> <td style="width: 33%; text-align: center;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 4 th	Semester: VII						

UNIT 1

(8L)

Introduction to Lamp, Linux operating system, Apache web server, Mysql database server, PHP scripting, purpose of using Lamp, Lamp versus other solutions; installing linux, choosing the correct linux, hardware requirements, installing fedora, pre-installation, type of installation, hard disk partitioning, boot loader selection, network configuration, firewall configuration, package selection, package installation, bootable disk creation, post installation setup.

UNIT 2

(8L)

Booting linux, initialization scripts, rc scripts, run level scripts, login process, exploring linux shell, understanding bash, understanding linux filesystem: /bin, /boot, /dev, /etc, /home, /lib, /lost+found, /mnt, /opt, /proc, /root, /sbin, /tmp, /usr, /var; managing users and groups, /etc/passwd, /etc/group, linux passwords, user administration, group administration, modifying users or groups, managing services, creating disk quotas, starting and stopping system services, controlling access to services, managing software, source tarballs, source code vs binary packages, RPM and RPM source packages, performing system backup and recovery, critical data, backup media, backing up your system, system restoration.

UNIT 3

(8L)

Using TCP/IP, internet protocol, transmission control protocol, user datagram protocol, ports, addressing, configure address, static IP, DHCP, network cards, hubs, switches, routers, routing switches, bridges, repeaters, kernel as a firewall, using firewall to increase security, using DNS, DNS operation, /etc/resolv.conf file, /etc/hosts file; disabling unwanted services, utilizing *chkconfig*, utilizing *ntsysu*, purpose of a service, staying up-to-date, using *up2date*, APT package management, yum package management, controlling root access, creating firewall rules, monitoring iptables log, using network monitoring tools: Nmap, Snort, Ping, Traceroute; understanding email, email protocols, email transport agents, installing MTA, opening firewall ports for email server, monitoring logs, managing virtual domains.

UNIT 4

(8L)

Apache web server, apache 1.3 vs apache 2.0, new features of apache 2.0, module enhancements, apache 1.3 features, apache 1.3 modules, installing apache web server, removing apache web server RPMs, apache installation methods, apache directories, apache programs, understanding *httpd.conf* file, apache virtual host, enabling directory listings, password protecting web directories, configuring *cgi-bin* directories, using *.htaccess* file for configuration; understanding mysql, flat file vs relational databases, advantages and limitations of mysql, mysql versions, installing mysql, common configuration directives, mysql server and client, editing configuration files, enhancing security, mysql administration, performance and replication. purpose of PHP, PHP versions, installing PHP, configuration options and extensions, compiling and installing PHP, apache configuration to handle PHP, PHP INI file.

UNIT 5

(8L)

Purpose of PHP, PHP versions, installing PHP, configuration options and extensions, compiling and installing PHP, apache configuration to handle PHP, PHP INI file; setting up apache virtual host, preparing mysql database, testing apache, PHP and mysql, scripting database connection, scripting data insertion, scripting data extraction and formatting.

SUGGESTED BOOKS:

1. James Lee, Brent Ware, *Open Source Development with LAMP*, Addison-Wesley Professional.
2. Jason Gerner, Elizabeth Naramore, *Professional LAMP*, John Wiley & Sons.
3. Eric Rosebrock, *Setting Up LAMP*, Sybex Publishers.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Ethical Hacking (<i>Elective-II</i>)	Course Code: IA8640						
Credit: 3	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 4 th	Semester: VII						

UNIT 1 **(8L)**

Ethical hacking, Foot Printing- information gathering methodology, Hacking Tools, Scanning- Definition, Types of Scanning, Objectives of Scanning, Scanning Methodology, Counter measures; Enumeration- NetBios Null Sessions, Hacking tools - Enumerating User Accounts, Active Directory Enumeration and Countermeasures; System Hacking- Administrator password guessing, Password Cracking Algorithm, Automated Password Cracking, Types of Password Attacks, Hacking tools;

UNIT 2 **(8L)**

Trojans and Backdoors- Overt and Covert Channels, Indications of a Trojan Attack, Reverse Engineering Trojans, Backdoor Countermeasures; Sniffers- Working of Sniffer, Passive Sniffing, Active Sniffing, Hacking tools, Sniffing Countermeasures; Denial of Service- Goal of DoS, Impact and Modes of Attack, DoS Attack Classification, Countermeasures for Reflected DoS, Tools for Detecting DDoS Attacks.

UNIT 3 **(8L)**

Session Hijacking- Spoofing vs Hijacking, Steps in Session Hijacking, Types of Session Hijacking, Hacking Tools, Protection against Session Hijacking, IP Security; Hacking Web Servers- Popular Web Servers and Common Security Threats, Apache Vulnerability, Attack against IIS Console, Hacking Tools, Countermeasures, Increasing Web Server Security; Web Application Vulnerabilities- Web Application Hacking, Anatomy of an Attack, Web Application Threats, Carnivore, Google Hacking, Countermeasures.

UNIT 4 **(8L)**

Web Based Password Cracking Techniques- Authentication mechanisms, Password Guessing, Cookies, Password Crackers Available, Hacking Tools, Countermeasures; SQL Injection- Attacking SQL Servers, SQL Server Resolution Service (SSRS), OsqL-L Probing, SQL Server Talks, Preventive Measures; Hacking Wireless Networks – Rouge Access Points, Scanning Tools, Sniffing Tools, Securing Wireless Networks.

UNIT 5 **(8L)**

Linux Hacking – Linux Vulnerabilities, Scanning Tools, Scanning Tools, Linux Security Tools, Advanced Intrusion Detection System, Linux Security Auditing Tool; Evading Firewalls, Intrusion Detection Systems, Intrusion Detection Tools, Penetration Testing – Penetration Test vs Vulnerability Test, Reliance on Checklists and Templates, Phases of Penetration Testing, Risk Analysis, Active Reconnaissance.

SUGGESTED BOOKS:

1. Manish Kumar ; The Secret of Hacking ;Third Edition ; Publisher Leo Impact Security Services.
2. AnkitFadia ; An Unofficial Guide To Ethical Hacking 2nd Edition ; Macmillan India;2006
3. Eric Cole; Hackers Beware: The Ultimate Guide To Network Security; Publisher Sams
4. NiteshDhanjani, Billy Rios, Brett Brett; Hacking: The Next Generation, Publisher Shroff/o'reilly (2009)
5. Shon Harris, Allen Harper, Chris Eagle, Jonathan Ness; Gray Hat Hacking: The Ethical Hacker's Handbook, Publisher: Mcgraw-hill/osborne Media (Dec 2007)

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Storage Networks (<i>Elective-II</i>)	Course Code: IA8620		
Credit: 3	L 3	T 0	P 0
Year: 4 th	Semester: VII		

UNIT 1

(8L)

Introduction to Information Storage and Management: Information Storage, Evolution of Storage Technology and Architecture, Data Center Infrastructure, Key Challenges in Managing Information, Information Lifecycle, Components of a Storage System environment, Disk Drive Performance, Fundamental Laws Governing Disk Performance, Logical Components of the Host, Application Requirements and Disk Performance.

Data Protection: introduction of RAID, Implementation of RAID, RAID Array Components, RAID Levels, RAID Comparison, RAID Impact on Disk Performance, Hot Spares. Intelligent Storage System, Components of an Intelligent Storage System, Intelligent Storage Array

UNIT 2

(9L)

Storage Networking Technologies and Virtualization: Direct-Attached Storage and Introduction to SCSI, Types of DAS, DAS Benefits and Limitations, Disk Drive Interfaces, Introduction to Parallel SCSI, SCSI Command Model. Storage Area Networks: Fibre Channel: Overview, The SAN and Its Evolution, Components of SAN, FC Connectivity, Fibre Channel Ports, Fibre Channel Architecture, Zoning, Fibre Channel Login Types, FC Topologies.

Network-Attached Storage: General-Purpose Servers vs. NAS Devices, Benefits of NAS, NAS File I/O, Components of NAS, NAS Implementations, NAS File-Sharing Protocols, NAS I/O Operations, Factors Affecting NAS Performance and Availability. IP SAN: iSCSI, FCIP.

UNIT 3

(8L)

Storage Virtualization & Introduction to Business Continuity: Forms of Virtualization, SNIA Storage Virtualization Taxonomy, Storage Virtualization Configurations, Storage Virtualization Challenges, Types of Storage Virtualization. Information Availability, BC Terminology, BC Planning Lifecycle, Failure Analysis, Business Impact Analysis, BC Technology Solutions.

Backup and Recovery: Backup Purpose, Backup Considerations, Backup Granularity, Recovery Considerations, Backup Methods, Backup Process, Backup and Restore Operations, Backup Topologies, Backup in NAS Environments, Backup Technologies.

UNIT 4

(8L)

Local Replication: Source and Target, Uses of Local Replicas, Data Consistency, Local Replication Technologies, Restore and Restart Considerations, Creating Multiple Replicas, Management Interface.

Remote Replication: Modes of Remote Replication, Remote Replication Technologies, Network Infrastructure, Concepts in Practice: EMC SRDF, EMC SAN Copy, and EMC Mirror View.

UNIT 5

(7L)

Storage Security and Management: Securing the Storage Infrastructure, Storage Security Framework, Risk Triad, Storage Security Domains, Security Implementations in Storage Networking.

Managing the Storage Infrastructure: Monitoring the Storage Infrastructure, Storage Management Activities, Storage Infrastructure Management Challenges, Developing an Ideal Solution

SUGGESTED BOOKS:

1. Storage Networks Explained -Ulf Troppen, Rainer Erkens, Wolfgang Müller (Wiley India Edition)
2. Information Storage and Management -G. Somasudaram – EMC Education Services (Wiley India Edition)

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Multimedia Technologies (<i>Elective-II</i>)	Course Code: IA5010						
Credit: 3	<table style="margin: auto; border: none;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 4 th	Semester: VII						

UNIT 1 (8L)

Introduction: Introduction to Multimedia, Multimedia Information, Multimedia Objects, Multimedia in business and work, Stages of Multimedia Projects, presentation tools, tools for object generations, video, sound, image capturing, authoring tools, card and page based authoring tools.

UNIT 2 (8L)

Multimedia Building Blocks: Text, Sound MIDI, Digital Audio, audio file formats, MIDI under windows environment Audio & Video Capture.

UNIT 3 (8L)

Data Compression: Introduction to data compression, Compression ratio, loss less & lossy compression, Huffman Coding, Shannon Fano Algorithm, Huffman Algorithms, Adaptive Coding, Arithmetic Coding, Finite Context Modelling, Dictionary based Compression, Sliding Window Compression, LZ77, LZ78, LZW compression.

UNIT 4 (8L)

Image, Audio and Video Compression: Digital Audio concepts, Sampling Variables, Loss less compression of sound, loss compression & silence compression, lossy graphic compression, image file format animations Images standards, JPEG Compression, ZigZag Coding, Multimedia Database. Content based retrieval for text and images, Video Compression, MPEG standards, MHEG Standard Video Streaming on net.

UNIT 5 (8L)

Advanced forms of interaction in Multimedia: Video Conferencing, Elements of (immersive/non-immersive) Virtual Reality, Augmented Reality, Telepresence, Mobile technologies

Multimedia Security: Overview- Multimedia Systems, Secured Multimedia, Digital Rights Management Systems and Technical trends, Multimedia Encryption and Digital Watermarking, Security Attacks and Multimedia Authentication

SUGGESTED BOOKS:

1. Tay Vaughan “Multimedia, Making IT Work” Osborne McGraw Hill.
2. Buford “Multimedia Systems” Addison Wesley.
3. Mark Nelson “Data Compression Book” BPB.
4. Sleireitz “Multimedia System” Addison Wesley.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Business Intelligence	Course Code: DA8010		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

UNIT I: (8 L)

Introduction to Business Intelligence:

Introduction to OLTP and OLAP, BI Definitions & Concepts, Business Applications of BI, BI Framework, Role of Data Warehousing in BI, BI Infrastructure Components – BI Process, BI Technology, BI Roles & Responsibilities

UNIT -II: (8 L)

Basics of Data Integration (**Extraction Transformation Loading**):

Concepts of data integration need and advantages of using data integration, introduction to common data integration approaches, introduction to ETL using SSIS, Introduction to data quality, data profiling concepts and application

UNIT-III: (8 L)

Introduction to Multi-Dimensional Data Modeling,

Introduction to data and dimension modeling, multidimensional data model, ER Modeling vs. multi-dimensional modeling, concepts of dimensions, facts, cubes, attribute, hierarchies,

UNIT –IV: (8 L)

Star and snowflake schema, introduction to business metrics and KPIs, creating cubes using SSAS

Unit V: (8 L)

Basics of Enterprise Reporting:

Introduction to enterprise reporting, concepts of dashboards, balanced scorecards, introduction to SSRS Architecture, enterprise reporting using SSRS

Courseware & Reference Books:

The courseware including PowerPoint and notes are available for the Elective. In addition, following reference books can also be used:

1. Business Intelligence by David Loshin
2. Business intelligence for the enterprise by Mike Biere
3. Business intelligence roadmap by Larissa Terpeluk Moss, ShakuAtre
4. Successful Business Intelligence: Secrets to making Killer BI Applications by CindiHowson
5. Delivering business intelligence with Microsoft SQL server 2008 by Brain, Larson
6. Foundations of SQL Server 2005 Business Intelligence by Lynn Langit
7. Information dashboard design by Stephen Few

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Soft Computing	Course Code: DA8020						
Credit: 3.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 4 th	Semester: VIII						

UNIT 1

(8L)

Introduction of Soft Computing: Introduction to soft computing techniques, Basic concepts of fuzzy logic, Artificial neural networks, Genetic algorithm and probabilistic reasoning, application areas of soft computing techniques. **Artificial Neural Networks:** Basic concepts - Single layer perception - Multilayer Perception - Supervised and Unsupervised learning – Backpropagation networks - Kohonen's self organizing networks - Hopfield network.

UNIT 2

(8L)

Fuzzy Systems: Fuzzy sets, Fuzzy Relations and Fuzzy reasoning, Fuzzy functions - Decomposition – Fuzzy automata and languages - Fuzzy control methods - Fuzzy decision making.

UNIT 3

(8L)

Neuro - Fuzzy Modeling: Adaptive networks based Fuzzy interface systems - Classification and Regression Trees – Data clustering algorithms - Rule based structure identification - Neuro-Fuzzy controls – Simulated annealing – Evolutionary computation.

UNIT 4

(8L)

Genetic Algorithms: Survival of the Fittest - Fitness Computations - Cross over - Mutation - Reproduction – Rank method - Rank space method.

UNIT 5

(8L)

Application of Soft Computing: Optimization of traveling salesman problem using Genetic Algorithm, Genetic algorithm based Internet Search Techniques, Soft computing based hybrid fuzzy controller, Introduction to MATLAB Environment for Soft computing Techniques.

Text Books:

1. Sivanandam, Deepa, “ Principles of Soft Computing”, Wiley
2. Jang J.S.R, Sun C.T. and Mizutani E, "Neuro-Fuzzy and Soft computing", Prentice Hall
3. Timothy J. Ross, "Fuzzy Logic with Engineering Applications", McGraw Hill
4. Laurene Fausett, "Fundamentals of Neural Networks", Prentice Hall
5. D.E. Goldberg, "Genetic Algorithms: Search, Optimization and Machine Learning", Addison Wesley
6. Wang, “Fuzzy Logic”, Springer

Reference Books:

1. Hongxing Li, C.L. Philip Chen and Han Pang Huang, Fuzzy Neural Intelligent Systems, Prentice-Hall (1997).
2. Haykin Simon, Neural Networks and Learning Machines, Imperial College Press (2007).
3. Goldberg, David E. Genetic; Algorithms in Search, Optimization and Machine Learning, Pearson Education, 2007.
4. Rosen, Kenneth H. Discrete Mathematics and its Applications, Tata Mcgraw-Hill (2003)

Course Title: Cloud Technologies	Course Code: DA8030						
Credit: 3	<table style="margin: auto;"><tr><td style="padding: 0 10px;">L</td><td style="padding: 0 10px;">T</td><td style="padding: 0 10px;">P</td></tr><tr><td style="text-align: center;">3</td><td style="text-align: center;">0</td><td style="text-align: center;">0</td></tr></table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 4 th	Semester: VIII						

UNIT I

Fundamentals of Cloud Computing: What it is & what it is not?, The old IT infrastructure versus the cloud, www, Internet, Cloud and cloud computing, Motivation for Cloud Computing, A comparison of IT infrastructure options, Historical developments: Client-Server computing, Peer to Peer Computing, Distributed Computing, Cluster & Grid Computing, Principals of parallel and distributed computing- Eras of computing, parallel vs. Distributed computing, Elements of parallel of computing, Elements of Distributed of computing, Technologies of distributed computing: Service oriented computing and architecture.

UNIT II

Introduction to High performance computing, Technical foundations of Cloud Computing, Goals of Cloud Computing, Resource Sharing at various levels, Cloud Architecture, NIST USA Cloud Computing Model: Essential Characteristics, Delivery Models, IaaS, PaaS, SaaS, Deployment Models, Public, private, Hybrid & Community, Pricing Model of Cloud Computing, Advantages & Disadvantages of Cloud Computing, Open challenges: Cloud definition, cloud interoperability and standards, scalability and fault tolerance, Security, trust and privacy, Organizational aspects.

UNIT III

Companies in Cloud Computing, Cloud computing Engines- GAE, EC2, Microsoft Azure, Virtualization: Characteristics of virtualized environment, taxonomy of virtualization techniques, Virtualization and cloud computing, pros and cons of virtualization, Technology examples, Flex Tenancy architecture, Pros & Cons of Cloud service development, Cloud application development, Cloud computing applications, Cloud Computing for everyone, Computing for Community & corporate.

UNIT IV

Security: Securing the cloud-The security boundary, Security service boundary, security mapping, Data security-Brokered cloud storage access, storage location and tenancy, encryption, Auditing and compliance, Establishing identity and presence, Network security, Host security, compromise response, High-throughput computing: Task programming.

UNIT V

Advanced topics in cloud computing: energy efficiency in clouds, market based management of clouds- market oriented cloud computing; A reference model of MOCC technologies and initiatives supporting MOCC, Federated clouds / InterClouds, Third party cloud services- Meta CDN; SpotCloud, Using the mobile cloud.

Text Book:

1. R. Buyya, C. Vecchiola, S. T. Selvi, Matering Cloud Computing, Ed. Third reprint 2013, McGraw Hill Education (India) Pvt. Ltd.
2. B. Sosinsky, Cloud computing Bible, Ed. Reprint 2014, Willy India Pvt. Ltd.

Reference Book:

1. M. Miller, Cloud Computing, Ed. 9th 2014, Pearson education in South Asia.

L	T	P					
3	0	0					
Year: 4 th	Semester: VIII						

UNIT 1

(8L)

Introduction and Fundamentals: Motivation and Perspective, Applications, Components of Image Processing System, Element of Visual Perception, A Simple Image Model, Sampling and Quantization.

Image Enhancement in Spatial Domain: Introduction; Basic Gray Level Functions – Piecewise-Linear Transformation Functions: Contrast Stretching; Histogram Specification; Histogram Equalization; Local Enhancement; Enhancement using Arithmetic/Logic Operations – Image Subtraction, Image Averaging; Basics of Spatial Filtering; Smoothing - Mean filter, Ordered Statistic Filter; Sharpening – The Laplacian.

UNIT 2

(8L)

Image Enhancement in Frequency Domain: Fourier Transform and the Frequency Domain, Basis of Filtering in Frequency Domain, Filters – Low-pass, High-pass; Correspondence Between Filtering in Spatial and Frequency Domain; Smoothing Frequency Domain Filters – Gaussian Lowpass Filters; Sharpening Frequency Domain Filters – Gaussian Highpass Filters; Homomorphic Filtering.

Image Restoration: A Model of Restoration Process, Noise Models, Restoration in the presence of Noise only- Spatial Filtering – Mean Filters: Arithmetic Mean filter, Geometric Mean Filter, Order Statistic Filters – Median Filter, Max and Min filters; Periodic Noise Reduction by Frequency Domain Filtering – Bandpass Filters; Minimum Mean-square Error Restoration.

UNIT 3

(8L)

Color Image Processing: Color Fundamentals, Color Models, Converting Colors to different models, Color Transformation, Smoothing and Sharpening, Color Segmentation.

Morphological Image Processing: Introduction, Logic Operations involving Binary Images, Dilation and Erosion, Opening and Closing, Morphological Algorithms – Boundary Extraction, Region Filling, Extraction of Connected Components, Convex Hull, Thinning, Thickening

UNIT 4

(8L)

Registration: Introduction, Geometric Transformation – Plane to Plane transformation, Mapping, Stereo Imaging – Algorithms to Establish Correspondence, Algorithms to Recover Depth

Segmentation: Introduction, Region Extraction, Pixel-Based Approach, Multi-level Thresholding, Local Thresholding, Region based Approach, Edge and Line Detection: Edge Detection, Edge Operators, Pattern Fitting Approach, Edge Linking and Edge Following, Edge Elements Extraction by Thresholding, Edge Detector Performance, Line Detection, Corner Detection.

UNIT 5

(8L)

Feature Extraction: Representation, Topological Attributes, Geometric Attributes.

Description: Boundary-based Description, Region-based Description, Relationship.

Object Recognition: Deterministic Methods, Clustering, Statistical Classification, Syntactic Recognition, Tree Search, Graph Matching.

SUGGESTED BOOKS:

1. Digital Image Processing 2nd Edition, Rafael C. Gonzalvez and Richard E.Woods, Pearson Education.
2. Digital Image Processing and Computer Vision, R.J. Schalkoff, John Wiley and Sons, NY.
3. Fundamentals of Digital Image Processing, A.K. Jain, Prentice Hall, Upper Saddle River, NJ.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Advanced Computer Networks (<i>Elective-III</i>)	Course Code: DA8620		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

UNIT 1 (8L)

Network Design: Design Principles, Determining Requirements, Analysing the Existing Network, Preparing the Preliminary Design, Completing the Final Design Development, Deploying the Network, Monitoring and Redesigning, Maintaining, Design Documentation, Cisco PDIOO Model, Modular Network Design, Hierarchical Network Design, The Cisco Enterprise Composite Network Model.

UNIT 2 (8L)

Router Design: Configuring a Router, Routing Protocols, **Switching Design:** Switching Types, Layer 2 and 3 Switching, Multilayer Switching, Cisco Express Forwarding, Switching Security, Multi-Protocol Label Switching (MPLS), MPLS Architecture and related protocols. **IPv4 Routing Design:** IPv4 Address Design, Private and Public Addresses, NAT, Subnet Masks, Hierarchical IP Address Design, Deploying IPv6 in Campus Networks,

UNIT 3 (8L)

Wireless LAN Design: Wireless Technology Overview, Wireless Standards, Wireless Components, Wireless Security, Wireless Security Issues, Wireless Threat Mitigation, Wireless Management, Wireless Design Considerations, IEEE 802.11, Wireless Standard, Cellular Networks, Mobile IP, Wireless Mesh Networks(WMNs), QoS Models: IntServ, DiffServ, QoS Tools, Policing and Shaping, Congestion Avoidance, Congestion Management, Link-Specific Tools, QoS Design Guidelines.

UNIT 4 (8L)

Optical Networks: Benefits of Optical Networks, Optical Network Drivers, Component Applications, Design and Planning, Restoration, Network Management, WDM System, All-Optical Network, Optical Layer Services and Interfacing.

UNIT 5 (8L)

Network Security and Management Design: Hacking: Vulnerabilities, Threats: Reconnaissance Attacks, Access Attacks, Information Disclosure Attacks, Denial of Service Attacks, Threat Defence Secure Communication, Network Security Best Practices, SAFE Campus Design.

ISO Network Management Standard: Protocols and Tools, SNMP, MIB, RMON, Cisco NetFlow, Syslog, Network Management Strategy: SLCs and SLAs, IP Service-Level Agreements, Content Networking Design.

Text Books:

1. Craig Zacker, "The Complete Reference: Upgrading and Troubleshooting Networks", Tata McGraw-Hill, 2000.

Course Structure & Syllabus of B.Tech – Computer Science & Engineering Applicable for 2013-2017 Batch

Course Title: Computer Vision (<i>Elective-III</i>)	Course Code: DA8630						
Credit: 3	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 4 th	Semester: VIII						

- UNIT 1** (8L)
Introduction: What is computer vision, The Marr paradigm and scene reconstruction, Other paradigms for image analysis. Image Formation, Image Geometry, Radiometry, Digitization.
- UNIT 2** (8L)
Binary Image Analysis and Segmentation: Properties, Digital Geometry, Segmentation.
- UNIT 3** (8L)
Image Processing for Feature Detection and Image Synthesis, Edge detection, corner detection Line and curve detection, SIFT operator, Image-based modelling and rendering, Mosaics, snakes.
- UNIT 4** (8L)
Stereo: Shape from shading, Photometric stereo, Texture, Occluding contour detection, Motion Analysis: Motion detection and optical flow Structure from motion
- UNIT 5** (8L)
Object recognition: Hough transforms and other simple object recognition methods, Shape correspondence and shape matching, Principal component analysis, Shape priors for recognition

Text Books:

1. *Computer Vision - A modern approach*, by D. Forsyth and J. Ponce, Prentice Hall
2. *Robot Vision*, by B. K. P. Horn, McGraw-Hill.

Reference Books:

1. *Introductory Techniques for 3D Computer Vision*, by E. Trucco and A. Verri, Prentice Hall

List of Open Electives (To be conducted in VIII Semester)

Sl. No.	Branch	Subject Code	Name of Elective subjects
1	Physics	OA8710 OA8720	1. Nano Scale Science and Technology 2. Photonics Technology
2	EE	EA8710 EA8720	1. Non-Conventional Energy Resources 2. Instrumentation and Process control
3	ME	LA8710 LA8720	1. Entrepreneurship development 2. Quality Management
4	Civil	CA8710 CA8720	1. Environment and Ecology 2. GIS
5	CSE	DA8710 DA8720	1. Business Intelligence 2. Artificial Intelligence
6	IT	IA8710 IA8720	1. Multi-Media Technology 2. IT In Business
7	ECE	FA8710	1. Consumer Electronics
8	Humanities	HA8710 HA8720	1. Industrial Psychology 2. Human Values and Ethics
9	MBA	GA8710 GA8730 GA8740	1. Organizational Behavior 2. Digital Marketing 3. Financial Modeling with Spread sheet

Summary of the Credits

Year	Semester	Credit	Year Credit
First Year	I	24	45
	II	21	
Second Year	III	27.5	51
	IV	23.5	
Third Year	V	22.5	47
	VI	24.5	
Fourth Year	VII	25.5	50.5
	VIII	25	
Total			193.5

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

A. Evaluation Scheme for the following Courses will be as under:

Course	Evaluation Scheme (%)				
	Attendance	Test-1	Test-2	Final Test	Total
Aptitude Building-1	10	30	30	30	100
Aptitude Building-2	10	30	30	30	100
Value Addition Training	10	30	30	30	100
Soft Skills	10	30	30	30	100

B. Evaluation Scheme for **Project** will be as under:

Course	Evaluation Scheme (%)				
	Synopsis	Presentation	Report	Viva-Voce	Total
Project Phase-I	10	15	25	50	100
Project Phase-II					
Project Phase-III					

Project Phase-I & II will be evaluated by the Committee comprising of the following:

1. Head of the Department – Chairman
2. Teacher In-charge – Member
3. One nominee appointed by Director (Academic) – Member

Project Phase-III will be evaluated by the Committee comprising of the following:

1. Head of the Department – Chairman
2. Teacher In-charge – Member
3. One nominee appointed by Director (Academic) – Member
4. One nominee appointed by Vice Chancellor – Member

C. Evaluation Scheme for **Industrial Training** will be as under:

Course	Evaluation Scheme (%)			
	Training Report	Presentation	Monitoring	Total
Industrial Training	25	50	25	100

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch Detailed Syllabus

Course Title: Engineering Maths-I	Course Code: MAT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT I: Matrices

8L

Elementary row and column transformation, rank of matrix, linear dependence, consistency of linear system of equations, Eigen values and Eigen vectors, Cayley-Hamilton theorem.

UNIT II: Differential Calculus

8L

Functions, Limits, Continuity, Differentiability, Leibnitz theorem, Partial differentiation, Euler's theorem, Expansion of functions of several variables, Extrema of functions of several variables, Lagrange's method of multipliers.

UNIT III: Infinite Series

6L

Introduction, sequences, series, convergence, series of positive terms, comparison test, Integral test, D'Alembert's Ratio test, Raabe's test, Cauchy's root test, Alternating series: Leibnitz rule, power series.

UNIT IV: Multiple Integrals

8L

Beta and Gamma functions, Double and Triple integrals, change of order of integration, change of variables, Dirichlet integral and its applications.

UNIT V: Vector Calculus

8L

Point functions, Gradient, Divergence and curl of a vector and their physical interpretation, line integral, surface integral, volume integral, Green's Theorem, Stoke's theorem, Gauss Divergence theorem.

1. B. S. Grewal: Higher Engineering Mathematics, Khanna publication.
2. E. Kreyszig : Advanced Engineering Mathematics, Wiley publication.
3. R. K. Jain & S. R. K. Iyenger: Advanced Engineering Mathematics, Narosa publication.
4. G. Prasad: Differential & Integral calculus, Pothishala publication, Allahabad.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Professional Communication	Course Code: HMT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

OBJECTIVES:

- 1) To strengthen the Professional Communication skills of upcoming professionals.
- 2) To make them aware about the new forms and trends of business and technical writings.
- 3) To develop the students' interpersonal skills in order to ensure his / her optimum performance as an employee.
- 4) To prepare students for facing the challenges of their professional lives in an increasingly globalized world.

Unit –I Professional Communication

8 Hours

1. Professional Communication: Interpretation, Process, Forms, Barriers and Overcoming Barriers.
2. Types of Communication-Verbal, Non-Verbal, Oral, Written, Formal, Informal.
3. Communication Levels (Intra personal, Interpersonal, Group, Public communication) and Communication Flow (Downward, Upward, Lateral and Diagonal flow).
4. Technical Writing-Meaning, Types and process of preparing a technical document. Acronyms, Jargons.
5. Understanding and Practice of Paragraph writing-Principles of paragraph writing (unity, coherence and logical development of the ideas)
6. Compunication: Impact of internet on communication, communicating through computers.

Unit-II Business Communication

10 Hours

1. Business communication – Meaning, Type and Format.
2. Intra-office communication – Types (Face to Face communication, Telephonic conversation, Letters, Memorandum, E-mails, Notice, Memo, Agenda, Minutes.), advantages and disadvantages. various types of intra-office communication
3. Inter-office communication –Face to Face communication, Telephonic Communication-mails, Letters (Sales, Credit, Enquiry, Quotation, Order, Complaint and Adjustment Letter), advantages and disadvantages of various types of inter-office communication.
4. Job-Application Letter and Resume.

Unit-III Technical Proposal and Report

A. Technical Proposal –Types, Format, Preparation of Proposal .

5 Hours

- **For B.Tech students-**
Technical Proposal to organize a Technical Training Program, to develop new range of products, establish new laboratory, or start a new venture.
- **For B.Pharma students-**
Technical proposal to establish a new laboratory, to create new drug-composition, or to visit a super specialty Hospital.
- **For B.Arch students-**
Technical proposal for an archeological site visit, or to construct new buildings.
- **For MCA students-**
Technical proposal to develop new software, or, to organize an induction program for the new entrants.
- **For MBA students-**
Proposal for establishment of a new department, for a new administrative system, or for new HR policies.

B. Technical Report –Types, Format, Preparation of Report.

5 Hours

- **For B.Tech students-**
Technical Report describing new machinery, a report on the sudden break-down in production unit, Annual Financial Report and market survey report for formulating new market strategy.
- **For B.Pharma students-**

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Technical Report based on the site-inspection of a drug manufacturing unit, Survey report on health awareness and self-medication.

- **For B.Arch students-**

Technical Reports based on a Site Inspection for geographical and geological aspects of a particular location. A report on the archeological survey of a monument.

- **For MCA students-**

Technical Report based on function of new technology (software or hardware), Technical Reports on Client's need for a Payroll management system/ Hospital management system.

- **For MBA students-**

Preparation of Annual Report of the organization, preparation of departmental reports and report based on the study of a successful organization.

Unit-IV Soft-Skills

8 Hours

1. Non-Verbal Communication -Kinesics, Oculistics, Vocalics, Proxemics, Chronemics.
2. Interpersonal Skills, Social-Skills
3. Personality-Meaning and Types, Attitude
4. Self-Management, Emotional Quotient, Time management, and Stress-Management.
5. Image-building / Impression –Management.
6. Leadership and Team-Building and Conflict.

Language-Lab

12 Labs

1. Stress, Intonation and Rhythm.
2. Overcoming Mother-Tongue Influence.
3. JAM session, Debate, Extempore.
4. Role-play, Information Exchange / Gap Activity.
5. Presentation Skills.
6. Group-Discussion Skills.
7. Preparing for interview.

11. Effective Business Communication- Murphy, Hildebrandt, Thomas
12. Essentials of Business Communication, Rajendra Pal and J. S Kothari- Sultan Chand

**Course Structure & Syllabus of
B.Tech – CSE (Cloud Based Applications)
Applicable for 2013-2017 Batch**

Course Title: Computer Fundamental & C Programming	Course Code: CST101		
Credit: 2	L 2	T 0	P 0
Year: 1 st	Semester: I		

UNIT: 1

5L

Introduction to the Digital Computer (brief description about its components), Characteristics of computer system, Introduction to operating systems(DOS, Linux, Windows), function and types of operating system, Number Systems and conversion methods (Binary, hex, octal), Concept of flow chart, Write & execute the first C programme, C Data Types & Operators.

UNIT 2:

4L

Conditional Program Execution: Applying if-else and nested if-else statements, switch-case statements, restrictions on switch values, use of break & default with switch.

Program Loops & Iteration: Uses of loops (while, do-while and for), use of continue statement.

Function: function prototypes, call by value and call by reference function, recursion.

UNIT 3:

4L

Arrays: Insertion and deletion insingle dimensional array, linear searching, sorting (bubble sort), Strings.

Structures: Purpose and uses of structures, declaring structures, array of structures

TEXT BOOKS:

1. YashwantKanetkar, “Let us C”, BPB Publications, 2nd Edition, 2001.
2. Herbert Schildt, “C:The complete reference”, OsbourneMcgraw Hill, 4th Edition, 2002.
3. P.K. Sinha “Computer Fundamentals” B.P.B Publication

REFERENCE BOOKS:

2. Kernighan & Ritchie, “C Programming Language”, The (Ansi C Version), PHI, 2nd Edition.
3. Byron Gottfreid “Schaum's Outline of Programming with C”

**Course Structure & Syllabus of
B.Tech – CSE (Cloud Based Applications)
Applicable for 2013-2017 Batch**

List of Programs in ‘C’ Lab (CSP-151)

Lab 1	(a) WAP to perform simple arithmetic operations using different data types. (b) WAP to show swap of two no's without using third variable.
Lab 2	(a) WAP to find the roots of a quadratic equation. (b) WAP to check the number is odd or even and find the sum of all odd and all even separately.
Lab 3	(a) WAP to find out whether the given number is prime or not. Find sum of all prime upto N. (b) WAP to reverse a given number and check the palindrome status.
Lab 4	WAP to print corresponding days of a week using switch case.
Lab 5	WAP to find and generate the Armstrong number.
Lab 6	WAP to print pattern triangle like Floyd's, Pascal, pyramid triangle.
Lab 7	(a) WAP to interchange two values using call by value and call by reference. (b) WAP to print factorial of a number using recursion & without using recursion.
Lab 8	WAP to print Fibonacci series. (a) Without using function (b) using function (c) using recursion
Lab 9	(a) WAP to print an array and find greatest/smallest element of an array. (b) WAP to perform linear searching in an array.
Lab 10	(a) WAP to insert/ delete element from an array. (b) WAP to sort the array's element using Bubble sort.
Lab 11	WAP to perform the following string functions. a. Strlen b. strcmp c. strcpy d. strcat e. strlenr f. strupr
Lab 12	Declare a suitable structure of a college and print the name and DOB of the student have scored more than sixty percent marks in end semester exam.
Lab 13	Declare a suitable structure for an organization and print all the names of employees having salary more than Rs.1000.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Introduction to Electrical Engineering	Course Code: EET101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT I – D.C. NETWORK THEORY

Review of basic circuit theory concepts, Mesh and Nodal analysis, Superposition theorem, Thevenin's theorem, Norton's theorem, Maximum power transfer theorem, Star–delta transformation, Magnetic Circuits.

UNIT II – A.C. CIRCUITS & MEASURING INSTRUMENTS

Single Phase A.C.: Phasor representation of voltage and current, A.C. circuit behavior of resistance, inductance, capacitance & their combination in series and parallel, Power triangle, Power factor, Concept of series & parallel resonance.

Three Phase A.C.: Star – delta connections, Relation between line and phase quantities, three phase power and its measurement, What is 3 phase 4 wire and 3 phase 5 wire system?

Measuring Instruments: Construction and principle of voltage and current measuring instruments.

UNIT III – TRANSFORMERS

Principle of operation, Types of construction, Phasor diagram, Equivalent circuit, Efficiency and voltage regulation of single phase transformer, O.C. and S.C. tests.

UNIT IV – D.C. & SYNCHRONOUS MACHINES

D.C. Machines: Construction and working principle of d.c. generator and d.c. motor, Types of d.c. machines, E.M.F. equation, Torque equation, Magnetization and load characteristics, Losses and efficiency, Need of starter in d.c. motors.

Synchronous Machines: Construction and Principle of operation of Alternator and Synchronous Motor.

UNIT V – INDUCTION MOTORS

Three Phase Induction Motors: Principle of operation of 3- ϕ induction motor, Types of 3- ϕ induction motor, Need of starters in 3- ϕ induction motors, Slip – torque characteristics,

Single Phase Induction Motor: Principle of operation of single phase induction motor, Methods of starting of single phase induction motor.

Reference Books

1. V. Del Toro. “ Principles of electrical Engineering, “Prentice hall International.
2. W.H. Hayt& J.E. Kemmerly,” Engineering circuit Analysis, “McGraw Hill.
3. I. J. Nagrath, “Basic Electrical Engineering,” Tata Mc. Graw Hill.
4. A. E. Fitzgerald, D.E., Higginbotham and A Grabel, “Basic Electrical Engineering” McGraw Hill.
5. H. Cotton, “Advanced Electrical Technology” Wheeler Publishing.

Basic Electrical Engineering Lab (EEP-151)

(Any Ten)

1. Verification of Network Theorems.
2. Study of diode characteristics. Study of phenomenon of resonance in RLC series circuit.
3. Measurement of power in a three phase circuit by two wattmeter method.
4. Measurement of efficiency of a single phase transformer by load test.
5. Determination of parameters and losses in a single phase transformer by OC and SC test.
6. Study of characteristic of DC Motor.
7. Study of characteristic of AC Motor.
8. DC generator characteristics.
9. 10. Speed control of dc shunt motor.
10. Study running and reversing of a three phase induction motor.
11. Study of a single phase energy meter.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Introduction to Electronics & Communication	Course Code: ECT101						
Credit: 3	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1st	Semester: I						

UNIT 1: Fundamental of Semiconductors

10 Lectures

Energy bands in semiconductors, intrinsic and extrinsic semiconductors, Fermi Level in Intrinsic and Extrinsic semiconductor, Carrier transport in semiconductors: diffusion current, drift current, mobility, Hall Effect and resistivity. Generation and recombination of carriers.

UNIT 2: Application of Low Power and High Power Diodes

10 Lectures

Diode circuits: Construction, Junction diode characteristics, Half and full wave rectifiers - Expression for efficiency and ripple factor - Bridge rectifier – π Filter circuits, Clipper, Clamper and multipliers using diodes, Zener Diode Characteristics - Regulated power supply using Zener diode.

UNIT 3: Transistor fundamentals

8 Lectures

Transistor circuits: Characteristics of a transistor in CB, CE and CC modes - Relatively merits - Biasing of Transistors - Load Line and operating point concept (both AC and DC). Construction and working of JFET and MOSFET.

UNIT 4: Digital fundamentals and Introduction to Signals

8 Lectures

Basic logic gates: AND, OR, and NOT – implementation of all gates using Universal gates, Number Systems conversions, Boolean algebra, K-map (upto 4 variables). Source of Information, Types of Signals.

UNIT 5: Basics of Communications & Instrumentation

9 Lectures

Communication Systems, Communication Channels, Need of modulation, Types of modulations (Wave shapes and final expression only), Study of Piezoelectric, PMMC, LVDT and Strain Gauge transducers and their classifications and display device (7 segment) only.

Reference Learning:

Unit 1. Electronics Devices and Circuits, Millman and Halkias, Tata McGraw Hill, 4th ed.

Unit 2 & 3. Electronic Devices and Circuit Theory, Robert L. Boylestad, Prentice Hall Higher Edu., 2000.

Unit 4. Digital Design, Morris Mano, PHI

Unit 4. Modern Digital & Analog Communications, B. P. Lathi, OUP

Unit 5. Electronic Communication Systems, John Kennedy, Tata McGraw Hill, 4th ed.

Unit 5. Electronic Instrumentation - H. S. Kalsi

ECP-151 ELECTRONICS ENGINEERING LAB.

1. To identify and Study of the various component and Devices of electronics with their specification (CRO, Function Generator, Multimeter, Power Supply, resistor, capacitor, inductor, ICs, LED, potentiometer etc.)
2. To study the V-I characteristics of PN diode and Zener diode.
3. To find the efficiency of Rectifiers and ripple factor of capacitive and non-capacitive half wave and full wave rectifier.
4. To Study and Verify clipper and clamper with biased circuits.
5. To find the characteristics of CB and CE amplifiers.
6. Determine the characteristics of FET.
7. To find out the power energy of various periodic and non periodic signals.
8. To verify the logic gates using diodes.
9. Study and observations of AM & FM Waveforms.
10. Study of various transducers (Strain Gauge).

**Course Structure & Syllabus of
B.Tech – CSE (Cloud Based Applications)
Applicable for 2013-2017 Batch**

Course Title: Workshop Practice	Course Code: MEP152		
Credit: 2	L	T	P
	1	0	2
Year: 1st	Semester: I		

List of Experiments

1. Carpentry: To make a T-Lap joint with soft wood.
2. Arc Welding: To make a Lap joint with mild steel flat by arc welding process.
3. Gas Welding: To make a Lap joint of M.S. sheet with gas welding process.
4. Fitting: To make a plug and socket joint with M.S.flat.
5. Machine Shop: To turn a M.S. rod on lathe to prepare a turning specimen.
6. Sheet Metal: To make a square tray with G.I. sheet.
7. Study of Foundry and Forging tools and equipments.

**Course Structure & Syllabus of
B.Tech – CSE (Cloud Based Applications)
Applicable for 2013-2017 Batch**

Course Title: Chemistry and Environment	Course Code: TCY101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT – I

Introduction to Environment and Chemistry

Chemical Evolution, Genesis of Environment, Components of Environment, Layers of atmosphere, Chemical composition and reactions of troposphere, Chemistry of Ozone Layer depletion.

UNIT – II

Water Chemistry

Water quality parameters (Physical, Chemical and Biological), CPCB and WHO standards for water, Measurement of parameters of water quality, Analytical tools for analysis of water quality, alkalinity, hardness and its determination (EDTA method only). Water softening processes – Lime – Soda process, Ion exchange method, boiler feed water, boiler problems-scale, sludge, priming and foaming, caustic embitterment and corrosion, their causes and prevention, Numerical problems on alkalinity and hardness.

UNIT – III

Environmental Pollution

Air Pollution: Types of pollutants, source, effects, sink and control of primary pollutants – CO, NO_x, HC, SO_x and particulates, Photochemical smog, Acid rain and Global warming – Process, National and International efforts to combat it.

Water Pollution: Water quality parameters – (BOD & COD), Classification of pollutants and their sources, waste water treatment – domestic and industrial, Ganga pollution and control.

Soil Pollution: Composition of soil, classification and effects of soil pollutants such as agro-chemicals (pesticides and fertilizer related problems), fly ash and their control.

Integrated Solid Waste Management: Classification of waste, Treatment & Disposal methods (Composting, sanitary land filling, incineration, recycling and reuse).

UNIT – IV

Energy Resources

Conventional Energy Sources – Coal and Petroleum, Refining, Fractional Distillation, Reforming, Cracking, Alkylation, Isomerisation, Hydro treating, Sulphur Recovery, Aromatization, Octane number, Cetane number, Aviation fuel, LPG, CNG, PNG, Energy Crises, Non-conventional Energy Sources – Hydro, Wind, Solar, Nuclear, Geo thermal and Biomass based.

UNIT – V

Eco-friendly Materials

Introduction to ecofriendly products and ECOMARK, Ecofriendly domestic appliances, Green Chemistry and Green Building, Organic foods, Biofuel, Biogas, Lignin, Bioplastics, Light weight plastic composites, Fuel cell, Organic Fuel Cells, hydrogen as a fuel and New lighting technologies: Organic Photo-voltaic , OLED and Organic Transistor.

Text Books:

1. Chemistry in Engineering & Technology (Vol I & II) (Latest ed.) By J.C. Kuriacose & J. Rajaraman, Tata McGraw-Hill Co, New Delhi.
2. Engineering Chemistry by O.G. Palanna, Tata McGraw-Hill Co, New Delhi.

Reference Books:

1. Atkins' Physical Chemistry by Peter W. Atkins and Julio de Paula, Oxford University Press.
2. Principles of Physical Chemistry (Latest ed.) By Puri, Sharma & Pathania.
3. Organic chemistry, Morrison and Boyd, Pearson Prentice Hall, 2011
4. Environmental chemistry, S.E. Manahan, 9th edition, CRC Press.
5. Textbook of polymer science by F.W. Billmeyer, Wiley India.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Engineering Physics	Course Code: PYT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT-I

(8) L

Interference:

Introduction, Coherent Sources, Analytical treatment of interference, Young's double slit experiment and its analysis, Conditions of Interference, Fresnel's Biprism, fringes with white light, Determination of wavelength of monochromatic light by using Fresnel's Biprism method, Displacement of Fringes, Interference in plane parallel thin film (reflected and transmitted light) and wedge shaped film(reflected light only), Newton's Rings, Determination of wavelength of monochromatic light and determination of refractive index of a liquid by using Newton's ring method.

UNIT-II

(8) L

Diffraction:

Introduction, Difference between Interference and diffraction, resultant of superposition of n simple harmonic coherent vibrations, Fraunhofer diffraction due to single slit: resultant intensity, conditions of maxima, minima, angular and linear width of central maximum, Double slit diffraction: resultant intensity, missing order, N-slit diffraction : resultant intensity, conditions of maxima and minima, missing orders, angular width of principal maxima, Diffraction grating: formation of spectra and missing order spectra in spectrum, dispersive power of grating, Resolving power, Rayleigh Criterion of resolution, Resolving power of plane transmission diffraction grating.

UNIT-III

(8) L

Polarization:

Polarised and unpolarised light and its pictorial representation, plane of polarisation and plane of vibration, Phenomenon of Double Refraction, positive and negative double refracting crystals, properties of ordinary and extra-ordinary Rays, Nicol Prism and its application as a polariser and analyser, Mathematical analysis of superposition of two linearly polarised light vectors, retardation plates – half wave plate and quarter wave plate, Production and detection of Plane, Circularly and Elliptically Polarized Light.

UNIT-IV

(10) L

Laser: Spontaneous emission, stimulate demission and stimulated absorption, Einstein's A and B Coefficients and relation between them, Principle of Laser Action, Construction and Working of He-Ne, Semiconductor Laser.

Introduction to Fibre Optics: Fundamental ideas about optical fiber, Types of fibers, Acceptance angle and cone, Numerical aperture.

Magnetic Properties of Materials: Basic Concept of Para-, Dia and Ferro-Magnetism, Phenomenon of Hysterisis

Magnetic Circuits: Introduction, magnetomotive force, magnetic field intensity, permeability of free space, reluctance, law governing magnetic circuits.

Superconductivity: Temperature dependence of resistivity in superconducting material, effect of magnetic field (Meissner effect), Type I and Type II superconductors.

UNIT V

(10) L

Wave Mechanics :

Wave Particle Duality, de Broglie Concept of Matter Waves, Davisson and Germer experiment, Concept of wave packet, group and phase velocity, Heisenberg Uncertainty Principle and its applications viz. non existence of electron in nucleus, radius and energy of Bohr's first orbit, Schrödinger time independent and time dependent wave equation, Physical interpretation of wave function, Application of Schrodinger wave equation : Particle in a one dimensional box (eigen function and eigen values).

Science and Technology of Nanomaterial :

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Introduction to Nanomaterial, Basic principle of nano science & technology, creation and use of Bulky Balls, structure, properties and use of Carbon nanotubes, applications of nanotechnology.

Reference & Text Books:

- | | | |
|---|---|------------------------------------|
| 1. Concepts of Modern Physics | - | Arthur Beiser (Mc-Graw Hill) |
| 2. Introduction to Special theory of Relativity | - | Robert Resnick - Wiely |
| 3. Fundamentals of Optics | - | Jenkins and White |
| 4. Optics | - | AjoyGhatak (TMH) |
| 5. Optics | - | Brijlal and Subrahmanyam |
| 6. Lasers: Fundamentals and applications | - | K. Thyagarajan, AjoyGhatak |
| 7. University Physics | - | Sears and Zeemansky |
| 8. Principles of Physics | - | Halliday, Resnick&Jearl Walker |
| 9. An Introduction to Quantum Mechanics | - | David. J. Griffith |
| 10. Introduction to Fiber optics | - | AjoyGhatak& K. Thyagarajan (TMH) |
| 11. Optical Fiber Communications | - | Keiser G. |
| 12. Nanomaterials- Synthesis, Properties and Applications | - | Edelstein A. A. and Cammaratta R.C |
| 13. Nanotechnology | - | T. Pradeep (Tata McGraw-Hill) |

PHYSICS LAB (PYP151) List of Experiments

(At least six)

1. To determine the wavelength of monochromatic light by Newton's ring.
2. To determine the wavelength of monochromatic light with the help of Fresnel's biprism.
3. To determine the focal length of two lenses by nodal slide and locate the position of cardinal points.
4. To determine the specific rotation of cane sugar solution using bi quartz polarimeter.
5. To determine the wavelength of spectral lines using plane transmission grating.
6. To determine the specific resistance of the material of given wire using Carey Foster's bridge.
7. To determine the variation of magnetic field along the axis of a current carrying coil and then to estimate the radius of the coil.
8. To verify Stefan's Law by electrical method.
9. To calibrate the given ammeter using potentiometer.
10. To calibrate the given voltmeter using potentiometer.
11. To determine energy band gap of a given semiconductor material by p-n junction method.
12. To determine the viscosity of water by Poiseuille's method.

Note: Additional experiments may be added based on contents of syllabus.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Essentials of Mechanical Engineering	Course Code: MET101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT – I

9L

Introduction to Engineering: Difference between Science and Technology, history of wheel, introduction to prime movers, transmission system, belt, pulleys, gear system and nomenclature, braking system, Mechanism, lever mechanism, Working principle of power generation system, hydel power plant, thermal power plant and its main components.

Coplanar Force system: Resolution of force in two mutually perpendicular direction Free Body Diagram, Moment, Varignon's theorem, static equilibrium, Lami's Theorem, type of joints/Support, Type of load: point load, uniformly constant and varying loads, beam and its type.

UNIT – 2

7L

Engineering material and their properties: Details of hook's law, Proportional limit, Yield point, Yield Stress, Engineering strain, Engineering stress, True stress and Strain, Plasticity, Elasticity, Allowable Strength, Hardness, Ductility, toughness, Fatigue, creep, strain energy, Impact Strength, Young modulus of Elasticity, Bulk Modulus, Poission Ration and its relation in between.

Stress and strain: Normal stress and strain, principle of Superposition, Deformation in stepped and composite bar.

UNIT – 3

7L

Thermodynamics: Macroscopic & microscopic study point of view, System, Surrounding and Universe, Phase, Property, State, Path, Process, Cyclic and non-cyclic processes, Quasi static process, Reversible and irreversible processes, Thermodynamic equilibrium, Concept of continuum, Energy and its forms, Enthalpy, Zeroth law, Different temperature scales and theory of temperature and Pressure measurement.

UNIT – 4

8L

Laws of thermodynamics: Thermodynamic definition of work, Thermodynamic processes, Calculation of work in various processes and sign convention, Non-flow work and flow work, Joules' experiment, First law of thermodynamics, Internal energy and enthalpy, First law of thermodynamics applied to open systems, Steady flow energy equation and its applications, First law analysis for closed system (non flow processes), Limitations of first law of thermodynamics, PMM-I.

Statement of Second law of thermodynamics: Kelvin Planck's statement and Clausius statement and their equivalence.

UNIT – 5

9L

Power generation: Air standard cycle, IC Engine, Carnot cycle, Otto cycle, Diesel cycle, Important components of I.C.Engine, two stroke and four stroke engine, S.I. and C.I. engines, efficiency of Otto and diesel cycle

Basics of Heat Transfer: Concepts of the mechanisms of heat flows: conduction, convection and Radiation heat transfer application in engineering.

Essentials of Mechanical Engineering (MEP-151)

List of Experiments

1. Tensile test
2. Impact test
3. Hardness test
4. Pulley experiment
5. Experiment on conduction heat transfer
6. Demonstration of Impulse and reaction turbine
7. Study of 4s and 2S engine petrol Engine
8. Study of 4s and 2S engine Diesel Engine
9. Study of refrigerator and air conditioning

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Professional Communication	Course Code: HMT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

OBJECTIVES:

- 5) To strengthen the Professional Communication skills of upcoming professionals.
- 6) To make them aware about the new forms and trends of business and technical writings.
- 7) To develop the students' interpersonal skills in order to ensure his / her optimum performance as an employee.
- 8) To prepare students for facing the challenges of their professional lives in an increasingly globalized world.

Unit –I Professional Communication

8 Hours

7. Professional Communication: Interpretation, Process, Forms, Barriers and Overcoming Barriers.
8. Types of Communication-Verbal, Non-Verbal, Oral, Written, Formal, Informal.
9. Communication Levels (Intra personal, Interpersonal, Group, Public communication) and Communication Flow (Downward, Upward, Lateral and Diagonal flow).
10. Technical Writing-Meaning, Types and process of preparing a technical document. Acronyms, Jargons.
11. Understanding and Practice of Paragraph writing-Principles of paragraph writing (unity, coherence and logical development of the ideas)
12. Compunication: Impact of internet on communication, communicating through computers.

Unit-II Business Communication

10 Hours

5. Business communication – Meaning, Type and Format.
6. Intra-office communication – Types (Face to Face communication, Telephonic conversation, Letters, Memorandum, E-mails, Notice, Memo, Agenda, Minutes.), advantages and disadvantages. various types of intra-office communication
7. Inter-office communication –Face to Face communication, Telephonic Communication-mails, Letters (Sales, Credit, Enquiry, Quotation, Order, Complaint and Adjustment Letter), advantages and disadvantages of various types of inter-office communication.
8. Job-Application Letter and Resume.

Unit-III Technical Proposal and Report

A. Technical Proposal –Types, Format, Preparation of Proposal .

5 Hours

- **For B.Tech students-**
Technical Proposal to organize a Technical Training Program, to develop new range of products, establish new laboratory, or start a new venture.
- **For B.Pharma students-**
Technical proposal to establish a new laboratory, to create new drug-composition, or to visit a super specialty Hospital.
- **For B.Arch students-**
Technical proposal for an archeological site visit, or to construct new buildings.
- **For MCA students-**
Technical proposal to develop new software, or, to organize an induction program for the new entrants.
- **For MBA students-**
Proposal for establishment of a new department, for a new administrative system, or for new HR policies.

B. Technical Report –Types, Format, Preparation of Report.

5 Hours

- **For B.Tech students-**
Technical Report describing new machinery, a report on the sudden break-down in production unit, Annual Financial Report and market survey report for formulating new market strategy.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

- **For B.Pharma students-**
Technical Report based on the site-inspection of a drug manufacturing unit, Survey report on health awareness and self-medication.
- **For B.Arch students-**
Technical Reports based on a Site Inspection for geographical and geological aspects of a particular location. A report on the archeological survey of a monument.
- **For MCA students-**
Technical Report based on function of new technology (software or hardware), Technical Reports on Client's need for a Payroll management system/ Hospital management system.
- **For MBA students-**
Preparation of Annual Report of the organization, preparation of departmental reports and report based on the study of a successful organization.

Unit-IV Soft-Skills

8 Hours

7. Non-Verbal Communication -Kinesics, Oculistics, Vocalics, Proxemics, Chronemics.
8. Interpersonal Skills, Social-Skills
9. Personality-Meaning and Types, Attitude
10. Self-Management, Emotional Quotient, Time management, and Stress-Management.
11. Image-building / Impression –Management.
12. Leadership and Team-Building and Conflict.

Language-Lab

12 Labs

8. Stress, Intonation and Rhythm.
9. Overcoming Mother-Tongue Influence.
10. JAM session, Debate, Extempore.
11. Role-play, Information Exchange / Gap Activity.
12. Presentation Skills.
13. Group-Discussion Skills.
14. Preparing for interview.

Text Books:

5. Ruby Gupta, Advanced Technical Communication, Cambridge University Press, 2011

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Engineering Maths – II	Course Code: MAT201		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT I: Differential Equations

8L

Linear differential equations, Exact differential equations; Linear differential Equations of nth order with constant coefficients: complementary functions and particular integrals, Euler- Cauchy Homogeneous Linear differential equations, Simultaneous linear differential equations, Solutions of second order differential equations by changing the dependent and independent variables, Method of variation of parameters.

UNIT II: Laplace Transform

8L

Laplace Transform: Existence theorem, Laplace Transform of derivatives and integrals, Laplace Transform of Periodic functions and Unit Step function, Convolution theorem, Applications of Laplace Transform to solve linear and simultaneous differential equations.

UNIT III: Integral Transform

6L

Fourier Integral, Fourier Transform, Fourier Sine and Cosine Transforms and applications to simple Heat Transfer Equations, Z- Transform and its applications to solve difference equations.

UNIT IV: Fourier series

8L

Periodic functions, Fourier series of Periodic functions, Euler's formulae, Functions having arbitrary period, Change of intervals, Even and Odd functions, Half range sine and cosine series.

UNIT V: Partial differential equations and its Applications

8L

Introduction to partial differential equations, linear partial differential equations with constant coefficients of second order and their classification, Method of Separation of Variables for solving Partial Differential Equations, One-Dimensional Wave Equation, One Dimensional Heat Equation.

Course Title: Computer Programming in C++	Course Code: CST201						
Credit: 2	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">2</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	2	0	0
L	T	P					
2	0	0					
Year: 1 st	Semester: II						

UNIT – I

4L

Introduction: Introducing Object-Oriented Approach related to other paradigms (functional, data decomposition), Characteristics of Object-Oriented Languages.

Basic terms and ideas: Abstraction, Encapsulation, Information hiding, Inheritance, Polymorphism.

UNIT – II

4L

Classes and Objects: Abstract data types, Object & classes, attributes, methods, C++ class declaration, State identity and behavior of an object, Constructors and destructors, instantiation of objects, Default parameter value, Copy Constructor, Static Class Data, Constant and Classes.

UNIT – III

5L

Inheritance and Polymorphism: Inheritance, Types of Inheritance, Class hierarchy, derivation – public, private & protected, Agrégation, composition vs classification hiérarchies, Polymorphism, Type of Polymorphism – Compile time and runtime, Method polymorphism, Polymorphism by parameter, Operator overloading, Parametric polymorphism, Generic function – template function, function name overloading, Overriding inheritance methods

2. YashwantKanethkar, “Object Oriented Programming using C++”, BPB, 2004

**Course Structure & Syllabus of
B.Tech – CSE (Cloud Based Applications)
Applicable for 2013-2017 Batch
List of Programs in ‘C++’ Lab (CSP-251)**

Lab 1	(a) WAP to print first 10 prime numbers. (b) WAP to demonstrate nested loops. (c) WAP to print reverse of a given number. (d) WAP to read two numbers from keyboard and display the larger one.
Lab 2	(a) Create a class called Employee that includes three pieces of information as instance Variables – a first name (type String), a last name (type String) and a monthly salary (Double) (b) Create a constructor in above class to initialize the three instance variables. Provide a get method for each instance variable. (c) WAP to demonstrate destructors.
Lab 3	(a) Program to implement different types of inheritances like Multiple, Multilevel and hybrid. (b) Write a program in C++ demonstrating the public, protected and private parameters. (c) Write a program in C++ to demonstrate destructor in inheritance. (d) WAP to demonstrate encapsulation property of OOPs.
Lab 4	(a) Write a program that uses a class where the member functions are defined inside a class. (b) WAP that uses a class where member functions are defined outside a class. (c) WAP that uses a class where member functions are defined inside a class. (d) WAP to demonstrate the use of Static Data members.
Lab 5	(a) WAP to demonstrate the use of Dynamic Constructor. (b) WAP to demonstrate the use of function Template. (c) Illustrate and implement the C++ program to initiate the base constructor from derived class constructor.
Lab 6	(a) Write a C++ program to find the largest and smallest element of an array. (b) Create a class Matrix. Implement all possible matrix operations for Matrix type objects by overloading them.
Lab 7	(a) Create 2 classes OM and DB which store the value of distance. DM store distances in meters and cm and DB in feet and inches. Write a program that can read values for the class objects and add 1 object OM with another object of DB. (b) Define a class to represent bank account. Include the following members: Data members 1. Name of depositor. 2. Account number. 3. Type of account. 4. Balance amount in the account. Member functions 1. To assign initial values. 2. To deposit an amount. 3. To withdraw an amount after checking the balance. 4. To display name and balance. Write a main program to test the program.
Lab 8	(a) WAP to demonstrate static class data. (b) WAP to demonstrate the use of Public, Private and protected classes.
Lab 9	(a) WAP to illustrate the concept of call by reference. (b) WAP to illustrate the concept of unary operator overloading. (c) WAP to illustrate the concept of binary operator overloading.
Lab 10	(a) WAP to demonstrate the use of function overloading. (b) WAP using multiple inheritance for collecting employee details.
Lab 11	(a) WAP using function template to find maximum of two Data. (b) WAP to calculate factorial of given number using copy constructor.
Lab 12	(a) WAP to sort five float and integer numbers using template function (use bubble sort). (b) Demonstrate the use of different types of polymorphism.
Lab 13	(a) Write a function to read a matrix of size M × N from keyboard. (b) WAP to implement aggregation concept.

**Course Structure & Syllabus of
B.Tech – CSE (Cloud Based Applications)
Applicable for 2013-2017 Batch**

Course Title: Engineering Graphics	Course Code: CGP151		
Credit: 2	L 1	T 0	P 2
Year: 1st	Semester: II		

UNIT-I

3L

Introduction: Sheet Layout, Types of Sheet, Size of Sheets, Title blocks, Type of lines, Lettering, Dimensioning, Scale (Full, Reduced, Large) Geometrical Constructions

UNIT-II

4L

Projection: Methods of Projection, Planes of Projection, Projection of points, Projection of straight lines, Projection of auxiliary planes, Projection of planes.

UNIT-III

4L

Projection of solids, Sections of solids

UNIT-IV

2L

Development of surfaces

UNIT-V

2L

Isometric Projections

Reference Book:

- 1) Bhatt N. D. & Panchal V. M, "Engineering Drawing", Charotar Publisher, 2007.
- 2) Dhanjay A Jolhe, "Engineering Drawing" Tata-Mc-Garw hill, 2008.
- 3) Gill.P.S "Engineering graphics" S. K. Kataria & Sons, 2009
- 4) John K.C, "Engineering graphics" ,2nd edition, PHI Learning Pvt. Ltd., 2010 .

List of Experiments

1. Introduction to AutoCAD Commands, Explaining need of AUTO CAD over Manual drafting, Simple Drawings.
2. Sheet on Lettering and Geometric construction.
3. Orthographic Projections, Basic problem based on Projection of points.
4. Sheet on Projection of Lines.
5. Sheet on Projection of Planes.
6. Sheet on Projection of Auxiliary Planes.
7. Sheet on Projection of Solids.
8. Development of Surfaces.
9. Sheet on Isometric Projections from orthogonal views.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Data Structures	Course Code: DA3210		
Credit: 4	L 3	T 0	P 2
Year: 2nd	Semester: III		

Unit I : Introduction: Concept of data structure, Types of data structures, Character String in C, Recursion, Structure, Pointer, Dynamic Allocation, Algorithms, Algorithm analysis, Complexity of algorithms and Time space trade-off.

Arrays: Introduction, Single and multi-Dimensional Arrays, address calculation, application of arrays, Operations defined: traversal, insertion and deletion.

Stacks: Stacks, Array representation of stack, Applications of stacks, Conversion of Infix to Prefix and Postfix Expressions, Evaluation of postfix expression using stack.

Unit II : Queue: Queue, Array representation and implementation of queues, Circular queues, Operations on Queue: Create Add, Delete, and Full and Empty, De-Queue, Priority queues, Applications of Queues.

Linked Lists: Concept of linked list, Representation and implementation of singly linked list, Circular linked list, doubly linked list, Operations on Linked lists, Concepts of header linked lists, applications of linked lists.

Unit III : Trees: Basic terminologies of trees, Binary tree, Complete Binary tree, Extended Binary tree, Representation of Binary tree, Binary tree traversal, Operations on Binary tree.

Binary Search Tree: Binary Search Tree (BST), Insertion and Deletion in BST, Complexity of Search Algorithm, Path Length, AVL Trees, B-trees.

Unit IV : Graphs: Terminology & Representations, Graphs & Multi-graphs, Directed Graphs, Representations of Graphs, Traversal, Connected Component and Spanning Trees, Minimum Cost Spanning Trees.

Unit V : Searching & Hashing: linear search, binary search, Hash Table, Hash Functions, Collision Resolution Strategies, Hash Table Implementation.

Sorting: Bubble sort, Insertion sort, Selection sort, Quick sort, Merge sort, Heap Sort.

File Handling: Introduction to file handling, Data and Information, File concepts, File organization, files and streams, working with files.

Text Book:

1. Lipschutz, "Data Structures" Schaum's Outline Series, TMH.
2. A. M. Tenenbaum, Langsam, Moshe J. Augentem, Data Structures using C PHI Pub.

Course Title: Computer Based Num. & Statistical Techniques	Course Code: DA3220		
Credit: 4	L 3	T 0	P 2
Year: 2nd	Semester: III		

Unit I : Introduction: Numbers and their accuracy, Computer Arithmetic, Errors and their Computation, General error formula, Error in a series approximation.

Solution of Algebraic and Transcendental Equation: Bisection Method, Iteration method, Method of false position, Secant method, Newton-Raphson method, Rate of convergence of Iterative, Newton Raphson methods.

Unit II : Interpolation: Finite Differences, Difference tables Polynomial Interpolation: Newton's forward and backward formula Central Difference Formulae: Gauss forward and backward formula, Stirling's, Bessel's, Everett's formula. Interpolation with unequal intervals: Langrange's Interpolation, Newton Divided difference Formula.

Unit III : Statistical Computation: Frequency chart, Curve fitting by method of least squares, fitting of straight lines, polynomials, exponential curves, Regression Analysis, Linear and Non linear Regression, Multiple regression.

Unit IV : Numerical Integration and Differentiation: Introduction, Numerical differentiation Numerical Integration: Trapezoidal rule, Simpson's 1/3 and 3/8 rule, Boole's rule.

Unit V: Solution of differential Equations: Picards Method, Eulers Method, Taylors Method, Runge-Kutta Methods, Automatic Error Monitoring and Stability of solution.

Text Book:

**Course Structure & Syllabus of
B.Tech – CSE (Cloud Based Applications)
Applicable for 2013-2017 Batch**

Course Title: Discrete Mathematics	Course Code: DA3010		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: III		

Unit I : Permutations, Combinations, selection with & without replacement, Sets and multisets, permutation and combination of multisets, enumeration of permutation and combination of sets & multisets, placing distinguishable (indistinguishable) objects into distinguishable (indistinguishable) boxes. Inclusion-Exclusion principle, Discrete probability; The rules of sum & products, generation of permutation and combination.

Unit II : Relations and functions-properties of binary relation, equivalence relation, partial order relation, chains and antichains, Pigeon hole principle, Lattices and Boolean algebra; Algebraic structures: binary operation, group, ring, field; Mathematical Logic: Basic connectives, rules of inference, normal forms, proof of validity, predicate logic.

Unit III : Basic concepts of graph theory: vertices, edges, degree, paths, circuits, cycles, complete graphs and trees. Multi-graphs, weighted graphs and directed graphs. Adjacency matrix of a graph. Connected and disconnected graphs. K-connected and K-edge connected graphs.

Unit IV : Shortest path in weighted graphs, Eulerian path and circuits, Hamiltonian path and circuits, Planner graphs, chromatic number, edge colouring of graphs. Tree and cut sets: Tree, spanning tree and cut set, minimum spanning tree.

Unit V : Generating function and recurrence relations, Linear recurrence relation with constant coefficients and their solution, Homogeneous solution, particular solution and total solution, Solution by the method of generating functions.

Course Title: Computer Organization	Course Code: DA3020		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: III		

Unit I : Register Transfer and Micro operation: Register Transfer Language, Bus and Memory Transfers, Bus Architecture, Arithmetic, Logic, Shift Microoperation, Design of ALU, Design of Fast adder.

Computer Arithmetic: Introduction, addition and subtraction algorithms, Booth Multiplication Algorithms, floating point arithmetic operation, IEEE format for floating point numbers.

Unit II : Processor Organization: General register organization, Stack organization, Addressing modes, Instruction format, Data transfer & manipulations, Program Control.

Control Design: Single and multiple bus architecture, Execution of a Complete Instruction, sequencing of control signals, Hardwired control, Micro programmed Control, microinstruction format.

Unit III : Input-Output Organization: I/O Interface, Modes of transfer, Interrupts & Interrupt handling, Direct Memory Access, Input-Output processor, Serial Communication.

Unit IV : Memory Organization: Memory Hierarchy, Main Memory (RAM and ROM Chips), organization of Cache Memory, Virtual Memory, Memory management hardware.

Unit V : Parallel Processing: Flynn's classification, Pipelining- Arithmetic Pipelining, Vector Processing, Array Processor.

Multiprocessor: Characteristic of Multiprocessor, Interconnection Structure, Interprocessor Arbitration.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Digital System Design	Course Code: FA3221		
Credit: 4.5	L	T	P
	3	1	2
Year: 2nd	Semester: III		

UNIT-1: INTRODUCTION

8 L

Number Systems, Basic & Universal Logic gates, Boolean algebra, Direct Conversion of various base, Negative number representations, Floating point number representation, BCD & EXCESS-3 arithmetic, Error detecting and correcting codes: Hamming code, parity code, Review and Limitation of K-Map, Quine-Mcclusky Method (Tabular Method).

UNIT-2: COMBINATIONAL LOGIC CIRCUITS

8 L

Characterization of digital circuits: Combinational & Sequential Logic circuit, Design procedure: Adders, Subtractors, Parallel Adder, IC-74LS83 and its applications, Multiplier, Decoder, Encoder, Priority Encoder, Multiplexers, Demultiplexers and their applications, Magnitude Comparators, Code Converters, Parity checker and generator, BCD Adder.

UNIT-3: SEQUENTIAL LOGIC CIRCUITS

6 L

Latch, Flip-Flops and their conversions, Analysis and Synthesis of Sequential Circuits, Excitation Table & Diagram, Counters: Synchronous & Asynchronous, Shift Registers and their applications, Finite State Machine: Mealy and Moore Models.

UNIT-4: MEMORIES

8 L

Memory Characteristics and operations, Sequential, Random Access-MOS & C-MOS Static and Dynamic Memory elements, Memory organization: One dimensional and Multidimensional Arrangement, Read Only Memory, ROM as a Decoder, Memory Bank, Address Decoding of Memory (Internal & External), PAL, PLA.

UNIT-5: LOGIC FAMILIES, HAZARDS & FAULT DETECTIONS

10 L

Logic Families: Diode, BJT & MOS as a switching element, concept of transfer characteristics, ECL, TTL, I²L, Tri-state, PMOS, NMOS and CMOS logic families- Power Consumption, Gate delay and Figure of merit (SPP), Package density, Comparison of standard logic families, pass transistor Logic, Open Collector and Totem pole output stage for TTL. Static and Dynamic Hazards, Gate Delay, Generation of Spikes, Analysis & illustration of Hazard in Combinational Circuits, fault Detection Techniques: Path Sensitization, Boolean Difference Method, K- Map Method.

Text Books:

1. Digital Design, M. Morris Mano and M. D. Ciletti, 4th Edition, Pearson

Reference Books:

1. Digital Systems: Principles and Design, Raj Kamal, Pearson
2. Maini, Digital Electronics: Principles and Integrated Circuits, Wiley India.
3. Switching Theory and Finite Automata, Kohavi, TMH Publications.

Digital System Design Lab

1. Implementation of All Logic Gates using Universal gates (NAND & NOR both).
2. Bread-board implementation (Parallel adder, One bit Multiplier, One bit Magnitude comparator, parity checker)
3. Bread-board implementation of any one code converter (i.e. Gray Code, BCD Code, Excess-3, Hex. etc.).
4. Design of shift registers (SISO, SIPO, PIPO, and PISO), up and down counters.
5. Design of Mod-6 types of Asynchronous Counters.
6. Transfer characteristics of TTL and CMOS inverters.
7. Realization of Decoder, Multiplexer, encoder and De-multiplexers using IC 74138.
8. To design & Implement PAL.
9. To design & implement PLA.
10. Clock circuit realization using 555, CMOS inverter.

*Any two (Value Added)

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: <u>Object Oriented Programming using Java and Eclipse</u>	Course Code: DB3210		
Credit: 4	L 3	T 0	P 2
Year: 2nd	Semester: III		

Unit 1 – 10L

Introduction to Java and Eclipse, Object-Oriented Programming, Introduction to SDLC, Introduction to UML, Java Basics (The basic building blocks of Java, variables and primitive types, Objects and Messages, String & StringBuffer, Wrapper classes, Building Classes

Unit 2 – 12L

Debugging, Inheritance and Refactoring, Interfaces, Collections, Serialization and Streams, Exceptions and Exception Handling, Utility Classes, Threads and Synchronization

Unit 3 – 10 L

Java Beans, Web Component Introduction, Java Servlets, Java Servlets API, Java Server Pages, JSP Specification and Syntax, Page Designer

Unit 4 – 6L

Debugging Web Applications, Web Archive Deployment Descriptor, Http: Session Management, Cookie API, Management of Application Data, URL Rewriting,

Unit 5- 8L

JSP Expression Language, JSP Tag Files – Custom Tags, Xdoclets Annotations, Connecting to database, Web Application Security, Java EE Packaging and deployment, Best Practices for Server side Application

Object Oriented Programming Lab using Java and Eclipse

Exercise 1 - Java programming - Defining some classes

In this exercise you define classes for four of types of objects that are sure to be implemented by the air ticket reservation system:

1. Passenger Name
2. Passenger
3. Seat
4. Ticket

You are given some additional classes that you run to test the four classes that you create in this exercise.

What you should be able to do?

At the end of this exercise, you should be able to:

- Use the Java perspective of the Eclipse-based software development platform
- Create Java projects
- Add packages to the project and create classes in the packages
- Use the Java editor and its various tools, such as code assist, to enter the code
- Use many of the Java language constructs introduced in the lectures for this course
- Import prepared classes into a Java project
- Run a class that tests the classes that have been created

Exercise 2 - Java programming - Implementing a design

In this exercise implement more of the air ticket reservation system, and code most of the passenger buys a ticket use case. At the end of this exercise all the <<has>> and most of the <<uses>> associations between the classes are complete. Indeed the full implementation of the use case is complete except that two simplifying factors are added in the next exercise:

- Only one class of seat is available.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

- Only one type of passenger is supported.

During this exercise you continue to explore the Java language and use standard classes provided by the Java platform.

What you should be able to do?

At the end of this exercise, you should be able to:

- Use many constructs of the Java language that were introduced in the lectures
- Create and manipulate instances of classes that are linked by <<uses>> and <<has>> associations
- Write classes that provide and call methods for which arguments and return values are object references and primitive types
- Implement an aggregation using the ArrayList class from the Java collections framework
- Use several classes provided by the Java platform

Exercise 3. Java programming - Improving the implementation

In this exercise you complete the implementation of one use case for an air ticket reservation system. You make the following changes to the implementation coded in previous exercises:

- Use inheritance to implement two specific types of passengers: frequent flyers and passengers who are airline employees.
- Take a different approach from inheritance to allow seats to be divided into business and economy classes.
- Refactor the code to make the resulting classes more reusable in a larger solution.

What you should be able to do...

At the end of this exercise, you should be able to:

- Refactor existing code to satisfy code design updates
- Define an inheritance hierarchy of types
- Define Java interfaces
- Define Java classes that extend existing classes
- Define Java classes that implement existing interfaces
- Define and use Java enumeration types

Exercise 4 - Writing simple Java code using the IDE

The objective of this exercise is to provide you with an understanding of Java coding and with experience in using the cheat sheet and scrapbook features in Eclipse. You first learn to use the cheat sheet feature to create a simple Java application; you also experiment with Java expressions in the Java Development Tool scrapbook.

You work with different variable types, such as int, float, and String, creating and looping through arrays, concatenating strings, as well as using the System.out.println() method to output to the console.

What you should be able to do

At the end of this exercise you should be able to:

- Create a Java project
- Import Java code
- Use the scrapbook to evaluate expressions
- Create variables
- Create and loop through arrays

Exercise 5 - Building classes

In this exercise, you add some DVDs to an Order (think of it as an electronic shopping cart). The information about each DVD, such as its title, cost, and so forth, is stored in an external file, called media properties. You can see the contents of the properties file listed at the beginning of Appendix A of this document. Naturally, you create this OnlineMediaStore using Java classes, methods, and so forth.

What you should be able to do

At the end of this exercise you should be able to:

- Create and modify Java classes
- Create instance member variables
- Create methods
- Use basic flow control syntax
- Use arrays

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: <u>Software Engineering & Design using UML</u>	Course Code: DB3220		
Credit: 4	L 3	T 0	P 2
Year: 2nd	Semester: III		

Unit 1 – 10L

Best Practices of Software Engineering, Concepts of Object Orientation, Essentials of Visual Modeling

Unit 2 – 12 L

Requirements Overview, Analysis and Design Overview, Architectural Analysis, Use-Case Analysis

Unit 3 – 8 L

Identify Design Elements, Identify Design Mechanisms

Unit 4 – 12L

Describe the Run-time Architecture, Describe Distribution, Use-Case Design, Objectstore Mechanism, Security Mechanism, UML to C++ Mapping, UML to Java Mapping, UML to Visual Basic Map, UML to Visual Basic Map

UML Lab

Exercise 1: Use Cases

1. Draw a use-case diagram using the following elements:

- There are four actors on the diagram: Prospective Buyer, E-Mail System, Loan System, and Credit Reporting System.
- There are four use cases on the diagram: Find Realtor, Maintain Personal Planner, Search for a Home, and Apply for a Loan.
- Document the following association;
 - Prospective Buyer to Find Realtor
 - Prospective Buyer to Maintain Personal Planner
 - Prospective Buyer to Search For A Home
 - Prospective Buyer to Apply For A Loan
 - Maintain Personal Planner to E-Mail System
 - Search for a Home to E-Mail System
 - Apply for a Loan to Loan System
 - Apply for a Loan to Credit Reporting System

Study the diagram that you have drawn. What does it say? What doesn't it say? Describe the functionality that a Prospective Buyer expects from the system?

2. Draw an activity diagram that reflects the following four action states:

Choose Profile, Find Buyer Profile, Log on, and Create New Profile. Starting with Choose Profile, go to Find Buyer Profile; then go from the Find Buyer Profile to Create New Profile, providing a profile does NOT exist. If a profile does exist, you can go to Log on.

Exercise 2: Sequence Diagram

You are responsible for creating a sequence and communication diagram for the use case or use cases you are modeling.

Remember, an interaction diagram should model one scenario in the use case. If you are going to model multiple scenarios, you'll need to create an interaction diagram for each scenario. Refer to the following slides if needed.

- What Is a Sequence Diagram?
- What Is a Communication Diagram?

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Draw sequence and communication diagrams using the following data:

1. The Prospective Buyer actor begins the sequence by requesting the Personal Planner Profile object (PPF) to maintain a profile.
2. The PPF requests the Personal Planner Controller object (PPC) to maintain a profile.
3. The PPC sends a message to the Buyer Record object asking it to find the planner record.
4. The PPF then displays the planner record.
5. The Prospective Buyer updates some information on the profile and asks the PPF to save the profile information.
6. The PPF takes the new information and requests that the PPC save the profile information.
7. The PPC asks the Buyer Record to update the record with the latest information that the actor has provided.
8. The PPC asks the Customer Profile object to create a new profile for the system.

Review your models and describe what the information says.

Exercise 3: Class Diagram

Document a class diagram using the following information:

- A class diagram containing the following classes: Personal Planner Profile, Personal Planner Controller, Customer Profile, and Buyer Record.
- Associations drawn using the following information:
 1. Each Personal Planner Profile object can be associated with up to one Personal Planner Controller object.
 2. Each Personal Planner Controller object must be related to one Personal Planner Profile.
 3. A Personal Planner Controller object can be associated with up to one Buyer Record and Customer Profile object.
 4. An instance of the Buyer Record class can be related to zero or one Personal Planner Controller.
 5. Zero or one Personal Planner Controller objects are associated with each Customer Profile instance.

**Course Structure & Syllabus of
B.Tech – CSE (Cloud Based Applications)
Applicable for 2013-2017 Batch**

Course Title: Theory of Computation	Course Code: DA4010		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: IV		

Unit I : Mathematical preliminaries, alphabets, strings, languages, states, transition, transition graph, generalized transition graph, Deterministic Finite Automata, Non-Deterministic Finite Automata, Non-Deterministic Finite Automata with ϵ transitions, minimization of DFA.

Unit II : Conversions and Equivalence: Equivalence between NFA with and without ϵ transitions. NFA to DFA conversion; Equivalence between two DFA's, Limitations of FSM; Application of finite automata, Finite Automata with output- Moore & Melay machine and its conversion

Unit III : Regular Languages: Regular sets; Regular expressions, Arden's theorem, Construction of finite Automata for a given regular expression, Pumping lemma for regular sets. Closure properties of regular sets. Grammar Formalism: right linear and left linear grammars; Equivalence between regular linear grammar and FA, Context free grammar; Derivation trees, sentential forms. Ambiguity in context free grammars; Normal forms: Chomsky normal form and Greibach normal form; Pumping Lemma for Context Free Languages, Closure property of CFL.

Unit IV : Push Down Automata: Push down automata, definition; Acceptance of CFL, Acceptance by final state and acceptance by empty state and its equivalence; Equivalence of CFL and PDA; Introduction to DCFL and DPDA.

Unit V : Turing Machine: Turing Machine, definition, model, Design of TM, Computable functions Church's hypothesis, Types of Turing machines: Universal Turing Machine, Halting problem, Properties of recursive and recursively enumerable languages, unsolvable decision problem, undecidability of Post correspondence problem, Church turing Thesis.

Text Book:

1. Hopcroft H.E. and Ullman J. D ,“Introduction to Automata Theory Language and Computation”,, Pearson Education.

Course Title: Operating Systems	Course Code: DA4020		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: IV		

Unit I : Introduction: Operating system and function, Evolution of operating system, Batch, Interactive, Time Sharing and Real Time System, System protection.

Operating System Structure: System Components, System structure, Operating System Services.

Unit II : Concurrent Processes: Process concept, Principle of Concurrency, Producer Consumer Problem, Critical Section problem, Semaphores, Classical problems in Concurrency, Inter Process Communication, Process Generation, Process Scheduling.

CPU Scheduling: Scheduling Concept, Performance Criteria Scheduling Algorithm, Evolution, Multiprocessor Scheduling.

Deadlock: System Model, Deadlock Characterization, Prevention, Avoidance and Detection, Recovery from deadlock combined approach.

Unit III : Memory Management: Base machine, Resident monitor, Multiprogramming with fixed partition, Multiprogramming with variable partition, Multiple base register, Paging, Segmentation, Virtual memory concept, Demand paging, Performance, Paged replaced algorithm, Allocation of frames, Thrashing, Cache memory, Organization, Impact on performance.

Unit IV : File System: Different types of files and their access methods, directory structures, various allocation methods, disk scheduling and management and its associated algorithms, Introduction to distributed file system.

Unit V : I/O Management and Disk Scheduling: I/O Devices, Organization of I/O functions, Operating System Design issues, I/O Buffering, Disk Scheduling (FCFS, SCAN, C-SCAN, SSTF), Disk Caches.

Case Studies: LINUX / UNIX Operating System and Windows based operating system.

Course Title: Linux Administration & Shell Programming	Course Code: DA4240		
Credit: 3.5	L	T	P
	2	1	2
Year: 2nd	Semester: IV		

Unit I : Linux introduction and file system: Basic Features, Advantages, Installing requirement, Basic Architecture of Unix/Linux system, Kernel, Shell. Linux File system-Boot block, super block, Inode table, data blocks, How Linux access files, storage files, Linux standard directories. Commands for files and directories *cd, ls, cp, md, rm, mkdir, rmdir, pwd, file, more, less, creating and viewing files using cat, file comparisons – cmp & comm, View files, disk related commands, checking disk free spaces. LINUX vs. UNIX operating system.*

Unit II : UNIX system organization (the kernel and the shell), Unix File System, Basic file attributes. Essential Linux commands Understanding shells, Processes in Linux-process fundamentals, connecting processes with pipes, tee, Redirecting input output, manual help, Background processing, managing multiple processes, changing process priority with nice, scheduling of processes at command, batch commands, kill, ps, who, sleep, Handling editors (vi/ed editors).

Unit III : Unix Shell programming: Types of Shells, Shell Meta characters, Shell variables, Shell scripts, Shell commands, the environment, Integer arithmetic and string Manipulation, Special command line characters, Decision making and Loop control, controlling terminal input, trapping signals, arrays.

Processes in Unix/Linux, Filters using regular expressions: grep and sed, UNIX system administration.

Course Title: <u>Web Application Development using Web 2.0</u>	Course Code: DB4210		
Credit: 4	L 3	T 0	P 2
Year: 2nd	Semester: IV		

Unit 1 – 6 L

HTML5 overview, JavaScript language, Client-side JavaScript

Unit 2 – 8 L

HTML5 Features, New HTML5 tags, HTML5 structural elements, HTML5 input element

Web Application Lab

Exercise 1. Working with JavaScript in HTML documents

At the end of the exercise, you should be able to:

- Create HTML web pages
- Use style statements in HTML documents
- Connect scripts to documents
- Write JavaScript functions
- Create interactive alert and confirm window objects
- Use JavaScript to manipulate the document object model (DOM)

Exercise 2. Working with HTML5 features

- Open the workspace and create a web project
- Import and review the starting artifacts
- Modify the input elements on the registration page
- Add JavaScript to the registration page
- Test the code with the test server
- Add finishing touches to the HTML and JavaScript code
- Retest the code with the test server

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: <u>Information Management Basics</u>	Course Code: DB4220		
Credit: 3	L 2	T 0	P 2
Year: 2 nd	Semester: IV		

Unit 1 – 8L

Relational Databases, Installation and Planning, Data Modeling, Data Modeling and Database Design, Relational Databases, Introduction to RDBMS, Understanding a Table, Relational Concepts

Unit 2 – 8L

Database Query Languages, Simple SQL Queries, Retrieving Data from Multiple Tables, Scalar Functions and Grouping, Database Query Languages, Column Functions and Grouping, Union, Using Sub-queries

Unit 3 – 14L

Relational Database Design, Views and Results during DB Design, Problem Statement, Relational Database Design, Entity Relationship Model, Data and Process Inventories, Tuple Types, From Tuple Types to Tables, Integrity Rules, Indexes, Logical Data Structures

Unit 4 – 10 L

Distributed Databases, Distributed Data, Physical Database Design, Physical Implementation, Intermediate SQL, Maintaining Data, Information Storage and Retrieval, Data Moving Data, Mapping - DB2 vs. Oracle

Information Management Lab

Exercise 1

Open a Command Line Processor (CLP) either on Windows or Linux. Your prompt should be "db2 =>". If this is not the case, you are not in the CLP.

Perform these operations:

- Create the database "DB101" with default values. This may take a few minutes to complete while DB2 creates database objects discussed in the lesson.
- Connect to the database
- Turn off "Self tuning memory" for this database. Hint: Look in the db cfg
- Show the db cfg confirming that "Self tuning memory" is now off.
- Stop the instance. You may receive an error indicating there are connections to databases. If this is the case, list which connections you have by running the command:

```
db2=> list applications
```

To force all applications (connections) off, run the command:

```
db2=> force applications all
```

Now try again to stop the instance.

- Start the instance

- List the contents of the DB2 Profile Registry. You need to do this from the Linux shell or DB2 Command Window

Exercise 2

Creating an operating system script

- Create an operating system script with these characteristics:

- Script name: myscript2

- The script should invoke myscript1.db2 created in the previous section.

- The script should be invoked with 3 parameters as follows:

myscript2 <dbname> <userID> <password>, where:

- <dbname> is the database name

- <userID> and <password> are parameters for connecting to the database

- Run myscript2 using the SAMPLE database as follows:

- Grant execute permission:

```
chmod +x myscript2
```

- Execute using the SAMPLE database:

```
db2inst1@db2rules:~> ./myscript2 sample db2inst1 password
```

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

If running on Windows, there's no need to use the chmod command; instead, add the ".bat" extension, and execute as follows:
C:\> myscript2.bat sample <userID> <password>

Exercise 3

Cataloging a *remote* DB2 Database

In this section, practice DB2 commands following the instructions provided. Cataloging a remote DB2 database implies that you have handy the following information:

- IP Address or hostname of the remote DB2 server
- Port number of the instance where the database resides
- Name of the database to connect to
- User ID / password as defined on the remote server.

Let's simulate how you would connect to a remote database treating your own server as the remote server by using LOCALHOST. Use the following information for your remote server:

IP Address or hostname _LOCALHOST

Instance Port Number _50001 _____

Database Name _SAMPLE _

User ID _db2inst1 _

Password _password____

Use the ALIAS "SAMPLE2" to point to this database.

Organization culture, elements and types of culture, managing cultural diversity.

UNIT – V **8L**

Controlling: System and process of controlling, requirements of effective control, Types of control, cost control, purchase control, maintenance control, quality control, planning operations
Globalization and liberalization.

Reference Books:

1. Charles W. L. Hill and Steven McShane, “Principles of Management”, McGraw Hill Education, Special Indian edition, 2007.
2. R. N. Gupta, “Principles of Management “, S Chand Limited, 2007.
3. P. C. Tripathy and P. N. Reddy, " Principles and Practices of Management”, Tata McGraw Hill, 1999
4. Joseph L. Massie, “Essentials of Management” , Prentice Hall of India, 2003.

**Course Structure & Syllabus of
B.Tech – CSE (Cloud Based Applications)
Applicable for 2013-2017 Batch**

Course Title: Probability & Random Variable	Course Code: JA5010		
Credit: 3.5	L 3	T 1	P 0
Year: 3 rd	Semester: V		

UNIT 1:

Theory of Probability & Concept of Random Variable

Axioms of probability: set theory, probability space, conditional, probability. Introduction, distribution and density functions, specific random variables, conditional distributions.

UNIT 2 :

Multiple Random Variables

Bi-variate distributions, one function of two random variables, two functions of two random variables, joint moments, joint characteristic functions, conditional distributions Multiple random variables, sequences of random variables

UNIT 3:

Concept of Stochastic Processes & Random Walks and Other Applications

Definition, systems with stochastic inputs, power spectrum, discrete-time processes. Random walks, Poisson points and shot noise, cyclo-stationary Processes, band-limited processes and sampling theory, deterministic signals in noise.

UNIT 4:

Spectral Representation and Estimation & Mean Square Estimation

Factorization and innovations, finite-order systems and state variables, spectral representation of random processes, ergodicity, spectrum estimation. Prediction, filtering and prediction, Kalman filters. Entropy: Basic concepts, random variables and stochastic processes, MEM.

UNIT 5:

Markov Chain & Queuing Theory

Introduction, higher transition probabilities and the Chapman-Kolmogorov equation, classification of states, stationary distributions and limiting probabilities, transient states and absorption probabilities, branching processes. Markov processes.

Characteristics of Queuing Theory, Queuing Models, Birth & Death Process, Little's Theorem.

Text Books:

1. Probability, Random Variables and Stochastic Processes/A. Papoulis & S. U. Pillai / 4th ed./TMH

Reference Books:

1. Probability, Random Variables & Random Signal Principles/Peyton Z. Peebles, Jr. / TMH
2. Probability & Queuing Theory, R. H. Chitale, Technical Publication Pune

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Algorithms: Analysis and Design	Course Code: DA5210						
Credit: 4	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	0	2
L	T	P					
3	0	2					
Year: 3 rd	Semester: V						

UNIT 1

(7L)

Introduction: Algorithms, Performance Analysis-Space complexity, Time complexity, Asymptotic Notation- Big oh notation, Omega notation, Theta notation and Little oh notation, Probabilistic analysis.

UNIT 2

(8L)

Divide and conquer: General method, applications-Binary search, Quick sort, Merge sort, Strassen's matrix multiplication.

Greedy method: General method, applications-Job sequencing with deadlines, knapsack problem, Minimum cost spanning trees, Single source shortest path problem.

UNIT 3

(8L)

Transform and conquer , Presorting , Balanced Search trees , AVL Trees , Warshall's and Floyd's Algorithm, Optimal Binary Search trees, Greedy Techniques, Prim's Algorithm, Kruskal's Algorithm Dijkstra's Algorithm, Huffman trees.

UNIT 4

(10L)

Backtracking: N-Queen's Problem, Hamiltonian Circuit problem, Subset-Sum problem, Branch and bound , Assignment problem , Knapsack problem ,Traveling salesman problem.

UNIT 5

(7L)

NP-Hard and NP-Complete problems: Basic concepts, non deterministic algorithms, NP - Hard and NP-Complete classes, Cook's theorem.

Text Books:

1. Fundamentals of Computer Algorithms, Ellis Horowitz, SatrajSahni andRajasekharam, Galgotia Publications Pvt. Ltd.
2. AnanyLevitin, "Introduction to the Design and Analysis of Algorithm", Pearson Education Asia,2003 3.
3. Algorithm Design: Foundations, Analysis and Internet Examples, M.T.Goodrich and R.Tomassia, Johnwiley and sons.

Reference Books:

1. T.H. Cormen, C.E. Leiserson, R.L. Rivest and C. Stein, "Introduction to Algorithms", PHI Pvt. Ltd., 20012.
2. Introduction to Design and Analysis of Algorithms A strategic approach, R.C.T.Lee, S.S.Tseng, R.C.Chang and T.Tsai, McGraw Hill.
3. Design and Analysis of algorithms, Aho, Ullman and Hopcroft,Pearson education.
4. Algorithms – Richard Johnson baugh and Marcus Schaefer, Pearson Education.

Algorithm Analysis & Design Lab

Implementation of following algorithmic problems into c-program:-

1. Selection Problem: Minimum/ Maximum, Kth smallest element.
2. Divide & Conquer problems: Binary Search, Merge Sort, Quick Sort, Strassen's Matrix Multiplication.
3. Traversal of Binary Trees: Pre-Order, Post-Order and In-Order.
4. Traversal of Graph: Breadth-First (Using Queue), Depth-First (Using Stack).
5. Greedy Method: (Fractional) Knapsack Problem, Job Sequencing, Minimal Spanning Tree (Using Prim's and Kruskal's method).
6. Dynamic Programming: (0/1) Knapsack Problem, Travelling Salesman Problem, Matrix Chain Multiplication.
7. Backtracking: N-Queen Problem, Hamiltonian Cycle, Graph Coloring.
8. Shortest Path Problem: Dijkstra's Algorithm, Floyd-Warshall's Algorithm.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Artificial Intelligence	Course Code: DA5010						
Credit: 3.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 3 rd	Semester: V						

UNIT 1 (8L)

Introduction: History of AI, Intelligent agents – Structure of agents and its functions, Problem spaces and search - Heuristic Search techniques – Best-first search, Problem reduction -Constraint satisfaction - Means Ends Analysis.

UNIT 2 (8L)

Knowledge Representation: Approaches and issues in knowledge representation, Knowledge Based Agent, Propositional Logic, Predicate logic – Unification – Resolution, Weak slot – filler structure, Strong slot - filler structure.

UNIT 3 (8L)

Reasoning under uncertainty: Logics of non-monotonic reasoning, Implementation, Basic probability notation, Bayes rule, Certainty factors and rule based systems, Bayesian networks, Dempster - Shafer Theory, Fuzzy Logic.

UNIT 4 (8L)

Planning and Learning: Planning with state space search, conditional planning, continuous planning, Multi-Agent planning. Forms of learning - inductive learning – Reinforcement Learning - learning decision trees - Neural Net learning and Genetic learning

UNIT 5 (8L)

Advanced Topics: Game Playing: Minimax search procedure - Adding alpha-beta cutoffs.

Expert System: Representation - Expert System shells - Knowledge Acquisition. CASE STUDY- Dendral, Mycin.

Swarm Intelligent Systems – Ant Colony System, Development, Application and Working of Ant Colony System.

Text Books:

1. Elaine Rich, Kevin Knight and Shivashankar B.Nair, “Artificial Intelligence”, Tata McGraw-Hill, 3rd edition, 2009. (UNITs I, II, III & V)
2. Stuart J. Russell and Peter Norvig, "Artificial Intelligence: A Modern Approach", Pearson Education Asia, 2nd edition, 2003. (UNIT IV)
3. N. P. Padhy, “Artificial Intelligence and Intelligent System”, Oxford University Press, 2nd edition, 2005. (Unit V)

Reference Books:

1. Rajendra Akerkar, “Introduction to Artificial Intelligence”, Prentice-Hall of India, 2005.
2. Patrick Henry Winston, “Artificial Intelligence”, Pearson Education Inc., 3rd edition, 2001.
3. Eugene Charniak and Drew Mc Dermott, “Introduction to Artificial Intelligence”, Addison-Wesley, ISE Reprint, 1998.
4. Nils J. Nilsson, “Artificial Intelligence - A New Synthesis", Harcourt Asia Pvt. Ltd., Morgan Kaufmann, 1988.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: <u>Essentials of Requirement Management</u>	Course Code: DB5210		
Credit: 4	L 3	T 0	P 2
Year: 3rd	Semester: V		

Unit 1 **12 L**
The Systematic Approach, Level of Requirements, Quality Requirements, Case Study, Models, Requirements Review

Unit 2 **14 L**
Creating Requirements and Documents, Defining Business Processes, Creating a Use-Case Model, Creating a User-Interface Sketch and a Storyboard, Analyzing and Organizing Requirements Artifacts, Collaborating on Requirements, Managing Requirements Using Integrations (this unit is based on Rational Requirement Composer)

Unit 3 **14 L**
Within a Rational DOORS database - Navigating a Rational DOORS Database, Viewing Information, Editing Information, Structure, Capturing Additional Information, Working with Microsoft Word Documents, Locating Information, Manipulating the Display, Creating Traceability, Traceability Analysis, Inserting Information in Other Formats, Rational DOORS Web Access, User Options

Essentials of Requirement Management Lab

Exercise 1 Getting Started with Rational Requirements Composer

In this exercise, the student will complete the following tasks:

- Start IBM Rational Requirements Composer
- Connect to a repository
- Open the Classics project
- Explore the Project pages
- Explore the Dashboard
- Explore the online help
- Use the Search feature

Exercise 2 Uploading Files, Creating a Document, and Creating a Requirement

In this exercise, the student will complete the following tasks:

- Create a folder
- Upload a file to the folder
- Create a document
- Create a requirement
- Edit a requirement

Exercise 3 Working with a Glossary

In this exercise, the student will complete the following tasks:

- Create a term
- Link to a glossary term from a document

Exercise 4 Creating a Business Process Diagram

In this exercise, you will complete the following tasks:

- Open a business process sketch
- Create a basic process sketch:
 - o Create lanes
 - o Add artifacts
 - o Create connectors
 - o Add data objects

Exercise 5 Linking Artifacts

In this exercise, you will complete the following tasks:

- Create a link to an existing artifact
- Explore the linking as part of the sidebar

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: <u>Fundamentals of Cloud Computing</u>	Course Code: DB5220		
Credit: 4.5	L	T	P
	3	1	2
Year: 3rd	Semester: V		

Unit 1	Overview of Cloud Computing, Concepts, Cloud service delivery models, Cloud deployment scenarios	12 L
Unit 2	Security in cloud computing, IBM cloud computing architecture, Introduction to Service Management	10 L
Unit 3	Virtualization, Cloud Management Platform, ITIL based Service Management and Service Orchestration -Cloud Computing and Service Management, Customer Project Experiences &How to implement Cloud services	12 L
Unit 4	Considerations for Building Cloud services, Cloud Performance Considerations, Cloud Resiliency, Cloud Service Metering, Accounting and Billing, Aspects of Hybrid Clouds, Disruptive Network Trends	6L

Cloud Computing Lab

1. Requesting contract forms for the IBM Smart Business Development and Test Cloud
2. Reviewing a contract for the IBM Smart Business Development and Test Cloud
3. Minor Projects –
On completion of project students will learn:
 - A. Requirements and its types
 - B. Choosing amongst various process models / methodology that suit the requirements.
 - C. Understand the different phases of DDLC including
 1. Requirements Analysis
 2. Database Design
 3. Evaluation and Selection
 4. Logical Database Design
 5. Physical Database Design
 6. Implementation

**Course Structure & Syllabus of
B.Tech – CSE (Cloud Based Applications)
Applicable for 2013-2017 Batch**

Course Title: Engineering Economics	Course Code: GC5010		
Credit: 2	L 2	T 0	P 0
Year: 3rd	Semester: VI		

UNIT-I

Time value of money: Simple and compound interest, Time value equivalence, Compound interest factors, Cash flow diagrams, Calculation, Calculation of time –value equivalences. Present worth comparisons, Comparisons of assets with equal, unequal and infinite lives, comparison of deferred investments, Future worth comparison, payback period comparison.

UNIT-II

Use and situations for equivalent annual worth comparison, Comparison of assets of equal and unequal life. Rate of return, Internal rate of return, comparison of IRR with other methods, IRR misconceptions.

UNIT-III

Analysis of public Projects: Benefit/ Cost analysis, quantification of project, cost and benefits, benefit/ cost applications, Cost –effectiveness analysis.

UNIT-IV

Depreciation, computing depreciation charges, after tax economic comparison, Break-even analysis; linear and non-linear models. Product and Process Costing, Standard Costing, cost estimation, Relevant Cost for decision making, Cost control and Cost reduction techniques.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Dot Net Technologies	Course Code: DA6220		
Credit: 4	L 3	T 0	P 2
Year: 3rd	Semester: VI		

UNIT 1

Introduction to C#: C# Language Fundamentals: An Anatomy of a basic class, Creating objects: Constructor basic, the composition of an application, Default Assignment and variable scope, member initialization syntax, Basic input and output with the console class, Understanding value types and reference types, the master node: System. Objects, The system Data type (And C# aliases), Converting between value type and reference type: Boxing and Unboxing, Defining program constraints, Iterations constructs, control flow constructs, The complete set operator, Defining Custom class methods, Understanding static methods, Method parameter modifiers, Array manipulation, String manipulation, Enumerations, Defining structures, Defining custom namespaces.

UNIT 2

Object Oriented Aspects Of C#: Formal definition of the class, Definition the “Default public interface” of a type, Recapping the pillars of OOP, The first pillar: Encapsulation services, Pseudo Encapsulation: Creating read only field, The second pillar: Inheritance supports keeping family secrets: The “Protected” keyword, The Nested type definitions, The third pillar: Polymorphic support casting between types, Generating class definitions using Visual Studio.Net. Exceptions and Objects Life Time Ode to errors, Bugs and exceptions, the role of .NET exceptions handling, the system. Exception base class throwing a generic exception catching exception, CLR system level exception(System. system exception), Custom application level exception (System. application exception), Handling multiple exception, The finally block The last chance exception, dynamically identify application and system level exception, Debugging system exception using VS.Net, Understanding Object life time, The CIT of new, The basic of garbage collection, Finalizing a type, Finalization process, building and Ad hoc destruction method, garbage collection optimization, The system .GC type.

UNIT 3

The CLR And The .Net Framework: The building Block of the .NET platform (CLR,CTS,CLS), the role of the .NET base class libraries, , additional .NET Aware programming Languages, Understanding .Net Assemblies, Problems with classic COM Binaries, The role of the common intermediate language, The role of .NET type metadata, The role of the assembly manifest, Compiling CIL to platform specific instruction. Building a simple file test assembly, Cross Language Inheritance. Building the multi file assembly, Using the multi file assembly, Understanding private assemblies, robing for private assemblies (The Basics), Private assemblies and XML Configuration files, Probing for private assemblies (The details),Understanding Shared assembly, Understanding Shared Names, Building a shared assembly, Understanding delay Signing, Installing/Removing shared assemblies, Using a Shared assembly.

UNIT 4

Application Development On .Net: Using the visual studio.Net IDE, key aspects of the VS.Net IDE, Documenting source code via XML, Building Windows Applications, Event Driven Programming, Delegate, Event and its association, Synchronous and asynchronous operation with delegate, User Defined events and delegates,ADO.NET Architecture,.NET Framework Data Providers, Data set, Data reader, data adapter, Accessing Data with ADO.NET.

UNIT 5

Web Based Application Development On .Net: Introduction to web form, Need of Web Application, Static and Dynamic Page, Working of IIS and Browser, Differences between ASP and ASP.NET, understanding post back, understanding page life cycle, State management, Server control form validation, Master pages, ASP.NET web security, server control form validation, Programming Web Applications with Web Forms, Web service, Programming Web Services.

Text Books:

1. E. Balagurusamy, "Programming in C#", Tata McGraw-Hill, 2004. (Unit I, II)
2. J. Liberty, "Programming C#", 2nd ed., O'Reilly, 2002. (Unit III, IV, V)

Reference Books:

1. Herbert Schildt, "The Complete Reference: C#", Tata McGraw-Hill, 2004.
2. Robinson et al, "Professional C#", 2nd ed., Wrox Press, 2002.
3. Andrew Troelsen, "C# and the .NET Platform", A! Press, 2003.

**Course Structure & Syllabus of
B.Tech – CSE (Cloud Based Applications)
Applicable for 2013-2017 Batch**

4. S. ThamaraiSelvi, R. Murugesan, "A Textbook on C#", Pearson Education, 2003.

Dot Net Technologies Lab

1. Write a Program in C# and display its Metadata, CIL and Manifest information using ildasm.exe tool.
2. Write a program in c# for create a object of class and constructor and destructor also.
3. Write a program for preprocessors(#if #else #elif #endif #define #undef #warning #error and #line)
4. Write a program for custom constructor and static constructor.
5. Write a program in c# pass reference type by value and reference type by reference.
6. Write a program in c# for create jagged array.
7. Write a program for string manipulation.
8. Write a program in C# Language to create Custom Namespaces.
9. Write a Program in C# Language to demonstrate read only property and Write only property.
10. To write a program in C# Language to demonstrate Hybrid Inheritance.
11. Write a program in C# Language to demonstrate the usage of Delegates.
12. To write a program in C# Language to demonstrate Interfaces inheritance.
13. To write a program in C# Language to demonstrate multi file assembly.
14. To write a program in C# Language to demonstrate private assembly.
15. To write a program in C# Language to demonstrate the public assembly.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Compiler Design	Course Code: DA6230		
Credit: 4	L 3	T 0	P 2
Year: 3rd	Semester: VI		

UNIT 1

Introduction: Review of Languages & Grammar, Compiler and Interpreter- Basic Concepts. Phases and Passes, Design Issues using Finite State Machines, Scanner Generator- LEX. Formal Grammar and their application to Syntax Analysis, Ambiguous Grammar, The Syntactic specification of Languages: CFG, Derivation and Parse Trees, Capabilities of CFG, BNF Notation.

UNIT 2

Basic Parsing Techniques: Parsing-Top Down and Bottom-Up Strategies: General Consideration. Top Down Parsing: Brute-Force Method, Recursive Descent, & Predictive Parsing. Bottom-Up Parsing: Shift Reduce Parsing, Operator Precedence Parsing. LR Grammars-LR(0), SLR(1), Canonical LR(1) & LALR(1) Parser, Comparison of parsing methods.

UNIT 3

Semantic Analysis: Basic Concepts, Syntax Directed Definitions-Inherited & Synthesized Attributes, Evaluation Orders of SDDs. Syntax directed Translation Schemes, Intermediate Codes, Postfix notation, Parse Trees and Syntax Trees, Directed Acyclic Graphs, Three address Codes: Quadruple & Triples, Translation of Assignment Statements, Boolean expressions, Control Statements, Postfix Translation, Translation with a Top Down Parser, Array References in Arithmetic expressions, Procedure Calls, Declarations and Case statements Translations.

UNIT 4

Symbol Tables: Organization of Non-Block Structured Language (Unordered /Ordered/ Tree/ Hash) and Block Structured Language (Stack Tables & Stack Implementation), Runtime Storage Management: Static Allocation, Dynamic Allocation- Activation Records and their usage, Recursive Procedure. Heap Allocation-Storage Registers and Release Strategies.

UNIT 5

Error detection and Recovery: Code Optimization- Basic Blocks and Optimization, Loop Optimization, Flow Graph Analysis, Machine Dependent Optimization.

Error Handling: Detection, Reporting, Recovery and Maintenance, Compiler-Compiler—YACC, Code Generation, Concept of Compiler Design for Object-Oriented Language.

SUGGESTED BOOKS:

1. Alfred V. Aho, Ravi Sethi, Jeffrey D. Ullman, "Compilers-Principles, Techniques & Tools", Pearson Education
2. Robin Hunter, "Essence of Compilers", Pearson Education
3. Steven S. Muchnick, Advanced Compiler Design & Implementation, Morgan Kaufmann Publishers

Compiler Design Lab

1. Familiarization with LEX & development of the Scanner for the language
 - Simulation of a Finite State Automata to recognize the tokens of various control statements
 - Simulation of a Finite State Automata to distinguish among Integers, Real Numbers, & Number with Exponents
 - Program in LEX tool to recognize the token & to return found for a C like language
2. Familiarization with YACC & development of a Parser
 - Parsing of arithmetic and algebraic expression and equation
 - Use of YACC tool to parse statements of C like language
3. Incorporation of action routines for generation of a specific intermediate code
4. Simulation of a desk-calculator
5. Generation of target machine code from intermediate code

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Data Warehousing and Mining	Course Code: DA6020						
Credit: 3.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 3rd	Semester: VI						

UNIT 1

(12L)

Overview, Motivation (for Data Mining), Data Mining-Definition & Functionalities

Data Warehousing: Overview, Definition, Delivery Process, Difference between Database System and Data Warehouse, Multi Dimensional Data Model, Data Cubes, Stars, Snow Flakes, Fact Constellations, Concept hierarchy, Process Architecture, 3 Tier Architecture, Data Marting, ROLAP, MOLAP, HOLAP.

UNIT 2

(7L)

Data Pre-Processing: Data Cleaning: Missing Values, Noisy Data,(Binning, Clustering, Regression, Inconsistent Data, Data Integration and Transformation.

Data Reduction: Data Cube Aggregation, Dimensionality reduction, Data Compression, Numerosity Reduction, Clustering, Discretization and Concept hierarchy generation.

UNIT 3

(7L)

Concept Description: Definition, Data Generalization, Analytical Characterization,

Analysis of attribute relevance, Mining Class comparisons, Statistical measures in large Databases. Measuring Central Tendency, Measuring Dispersion of Data, Apriori Algorithm, Mining Multilevel Association rules from Transaction Databases

UNIT 4

(6L)

Classification: What is Classification, Issues regarding Classification, Decision tree, Bayesian Classification, Classification by Back propagation.

UNIT 5

(8L)

Cluster Analysis: Data types in cluster analysis, Partitioning methods. Hierarchical Clustering- CURE and Chameleon, Density Based Methods-DBSCAN, OPTICS, Grid Based Methods- STING, CLIQUE, Outlier Analysis.

SUGGESTED BOOKS:

1. Jiawei Han, Micheline Kamber, "Data Mining Concepts & Techniques" Elsevier
2. M.H. Dunham,"Data Mining: Introductory and Advanced Topics" Pearson Education
3. Mallach, "Data Warehousing System", McGraw –Hill

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Enterprise Application Development using J2EE/Advance Java	Course Code: DB6210						
Credit: 4	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	0	2
L	T	P					
3	0	2					
Year: 3 rd	Semester: VI						

Unit 1 **8 L**
 J2EE Web Component Introduction, Servlet Overview, Supporting Perspectives for Developing J2EE Applications, Simple Registration Servlet , J2EE Container Services Overview, Servlet API (Part I), Library Case Study Flow, Building the Library Database, Parameter Servlet

Unit 2 **9L**
 JavaServer Pages Overview, JavaServer Pages Specifications and Syntax, Page Designer in Application Developer, Web Application Debugging, Servlet API (Part II), Web Archive Deployment Descriptor, Calling JSP Pages from a Servlet

Unit 3 **6L**
 Session State Storage Issues, Cookie API, HttpSession: Management of Application Data, URL Rewriting, Session Management, Best Practices for Session Management

Unit 4 **12L**
 JavaBeans and the Model-View-Controller Patter, Create a JavaBean, JavaServer Pages with JavaBeans, Combining Servlets, JSP Pages, and JavaBeans, JSP Expression Language, Using JSP Expression Language, JSP Custom Tags, JSP Tag Files, Servlet Filtering

Unit 5 **10L**
 Servlet Listeners, Best Practices for Server-Side Application Development, J2EE Packaging and Deployment, Installing an Application in WebSphere Application Server V6.1, Web Application Security

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Credit: 3	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="padding: 0 10px;">3</td> <td style="padding: 0 10px;">0</td> <td style="padding: 0 10px;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 3rd	Semester: VI						

Unit 1

12 L

Software Engineering Practices, Core Concepts of Software Testing, The RUP Test Discipline, Define Evaluation Mission, Test and Evaluate, Analyze Test Failures, Achieve Acceptable Mission Workflow, Reporting the Status of Testing, Verify Test Approach, Validate Build Stability, Improve Test Assets

Unit 2

10 L

Rational Quality Manager and the testing process, Creating test scripts, Executing tests and reporting test results, Designing test scripts for reuse, Reusing test content, Using test data

Unit 3

8 L

Getting Started with IBM Rational Functional Tester, Recording a Script, Playing Back a Script and Viewing Results, Extending Scripts,

Unit 4

10L

Using Test Object Maps, Managing Object Recognition, Creating Data-Driven Tests, Recording Troubleshooting, Recording Scripts to Test HTML Applications, Recording Scripts for Cross-Platform Applications

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Cloud Provisioning	Course Code: DB6230		
Credit: 3	L 2	T 0	P 2
Year: 3rd	Semester: VI		

Unit 1: Introduction of Cloud Computing, Cloud services characteristics, development and testing environment, Application development cycle environment. Cloud Services Model: Infrastructure as a service, Platform as a service, Software as a service. Cloud delivery models: Public cloud, private cloud, hybrid cloud, community cloud.

Unit 2: Types of cloud provisioning, Cloud computing architectures and dynamic provisioning mechanisms, resource provisioning techniques, parameters for resource provisioning, resource provisioning strategies, dynamic resource provisioning mechanisms in cloud.

Unit 3: Service provisioning definition and topology, objective of service provisioning, major services of service provisioning, service provisioning requirements, models, methods and techniques of service provisioning.

Unit 4: Cloud Audit, Cloud business continuity planning, retention of E-discovery, Privacy requirements, Portability and Interoperability, Cloud Sourcing, Cloud Impacts, Realities of Cloud Services, Cloud Performance Limitations, Web Security, Web Threats in the Cloud.

Text Book:

1. IBM Courseware.
2. Sosinsky, Barrie. Cloud Computing Bible. Vol. 762. John Wiley & sons, 2010.

Reference Book:

1. Furht, Borivoje, and Armando Escalante. Handbook of Cloud Computing. Vol. 3. New York: Springer, 2010.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Distributed Computing	Course Code: DA7010		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VII		

Unit I : Fundamentals of Distributed Computing: Introduction to distributed computing Systems, Resource sharing and the Web Challenges.

System Models: Architectural models, Fundamental Models

Theoretical Foundation for Distributed Computing System: Limitation of Distributed system, absence of global clock, shared memory, Logical clocks, Lamport's & vectors logical clocks, Causal ordering of messages, global state, termination detection.

Unit II : Distributed Mutual Exclusion: Classification of distributed mutual exclusion, requirement of mutual exclusion theorem, Token based and non token based algorithms, performance metric for distributed mutual exclusion algorithms.

Distributed Deadlock Detection: system model, resource Vs communication deadlocks deadlock prevention, avoidance, detection & resolution, centralized dead lock detection, distributed dead lock detection, path pushing algorithms, edge chasing algorithms.

Unit III : Distributed Objects and Remote Invocation: Communication between distributed objects, Remote procedure call, Events and notifications, Java RMI case study.

Distributed File Systems: File service architecture, Sun Network File System, The Andrew File System, Recent advances.

Unit IV : Transactions and Concurrency Control: Flat and nested distributed transactions, Locks, Optimistic Concurrency control, Timestamp ordering, Comparison of methods for concurrency control.

Distributed Transactions: Concurrency control in distributed transactions, Distributed deadlocks, Transaction recovery. Replication: System model and group communication, Fault - tolerant services, highly available services, Atomic Commit protocols.

Unit V : Introduction to Grid Computing: Basics of grid Computing, Benefits of grid computing, Grid terms and concepts,

Grid user roles, Standards for grid environments, Grid security requirements.

Introduction to Parallel Processing: Basic Concepts: Introduction to parallel processing, parallel processing terminology, Parallel & Distributed Programming: Parallel Programming environments

Text Book:

1. Tannenbaum, A, Van Steen. Distributed Systems, Principles and Paradigm , Prentice Hall India, 2002
2. Tannenbaum, A. Distributed Operating Systems, Pearson Education. 2006

Reference Book:

2. Singhal and Shivaratri, "Advanced Concepts in Operating Systems", McGraw Hill, 1994
3. Coulouris, Dollimore, Kindberg, "Distributed System: Concepts and Design", Pearson Ed.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Advanced Computer Architecture	Course Code: DA7020		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

UNIT 1

(6L)

Introduction: Parallel Computing, Parallel Computer Model, Program and Network Properties, Parallel (Architectural Classification Schemes, Flynn's & Feng's Classification, Performance Metrics and Measures, Speedup Performance Laws: Multiprocessor System and Interconnection Networks; IEEE POSIX Threads: Creating and Exiting Threads, Simultaneous Execution of Threads, Thread Synchronization using Semaphore and Mutex, Canceling the Threads.

UNIT 2

(9L)

Pipelining and Memory Hierarchy: Basic and Intermediate Concepts, Instruction Set Principle; ILP: Basics, Exploiting ILP, Limits on ILP; Linear and Nonlinear Pipeline Processors; Super Scalar and Super Pipeline Design; Memory Hierarchy Design: Advanced Optimization of Cache Performance, Memory Technology and Optimization, Cache Coherence and Synchronization Mechanisms.

UNIT 3

(8L)

Thread and Process Level Parallel Architecture: Introduction to MIMD Architecture, Multithreaded Architectures, Distributed Memory MIMD Architectures, Shared Memory MIMD Architecture, Clustering, Instruction Level Data Parallel Architecture, SIMD Architecture, Fine Grained and Coarse Grained SIMD Architecture, Associative and Neural Architecture, Data Parallel Pipelined and Systolic Architectures, Vector Architectures.

UNIT 4

(8L)

Parallel Computing model: Sequential model, need of alternative model, parallel computational models such as PRAM, LMCC, Hypercube, Cube Connected Cycle, Butterfly, Perfect Shuffle Computers, Tree model, Pyramid model, Fully Connected model, PRAM-CREW, EREW Models.

UNIT 5

(9L)

Parallel Algorithms: PRAM Algorithms: Parallel Reduction, Prefix Sums, Preorder Tree Traversal, Merging two Sorted lists; Matrix Multiplication: Row Column Oriented Algorithms, Block Oriented Algorithms; Parallel Quicksort, Hyper Quicksort; Solving Linear Systems: Gaussian Elimination, Jacobi Algorithm; Parallel Algorithm Design Strategies.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Cryptography and Network Security	Course Code: DA7210		
Credit: 4	L 3	T 0	P 2
Year: 4th	Semester: VII		

Unit I : Introduction to security attacks, services and mechanism, introduction to cryptography.

Conventional Encryption: Conventional encryption model, classical encryption techniques-substitution ciphers and transposition ciphers, cryptanalysis, steganography, stream and block ciphers.

Modern Block Ciphers: Block ciphers principals, Shannon's theory of confusion and diffusion, feistel structure, data encryption standard (DES), strength of DES, differential and linear crypt analysis of DES, block cipher modes of operations, triple DES, confidentiality using conventional encryption, traffic confidentiality, key distribution

Unit II : Introduction to prime and relative prime numbers, finite field of the form $GF(p)$, modular arithmetic, Fermat's and Euler's theorem, primality testing, Euclid's Algorithm, Chinese Remainder theorem, Principals of public key crypto systems, RSA algorithm, security of RSA, key management, Diffie-Hellman key exchange algorithm, introductory idea of Elliptic curve cryptography, Elgamal encryption.

Unit III : Message Authentication and Hash Function: Authentication requirements, authentication functions, message authentication code, hash functions, birthday attacks, security of hash functions and MACS, MD5 message digest algorithm, Secure hash algorithm(SHA). Digital Signatures: Digital Signatures, authentication protocols, digital signature standards (DSS), proof of digital signature algorithm.

Unit IV : Authentication Applications: Kerberos and X.509, directory authentication service, electronic mail security-pretty good privacy (PGP), S/MIME.

Unit V : IP Security: Architecture, Authentication header, Encapsulating security payloads, combining security associations, key management.

Web Security: Secure socket layer and transport layer security, secure electronic transaction (SET).

System Security: Intruders, Viruses and related threads, firewall design principals, trusted systems.

Text Book:

Course Title: Database Management – DB2 Workshop	Course Code: DB7210		
Credit: 4	L	T	P
	3	0	2
Year: 4th	Semester: VII		

Unit 1 **9L**
Overview of DB2 9 on Linux, UNIX and Windows, Command Line Processor (CLP) and GUI usage, The DB2 environment

Unit 2 **12 L**
Creating databases and data placement, Creating database objects, Moving data

Unit 3 **7L**
Backup and recovery, Locking and concurrency, Investigating DB2 locking

Unit 4 **12 L**
Problem determination, Application issues and performance, Application performance tools, Security

Database Management - DB2 Workshop Practical

Exercise 1.DB2 CLP usage

At the end of the exercise, students should be able to:

- Use the CLP
- Use the different GUIs
- Know the possibilities of the CLP and the GUIs

Exercise 2.Create an instance and explore the environment

At the end of the exercise, students should be able to:

- Create an instance
- Set environment variables
- Determine the type of DB2 installation from the Database Manager Configuration file
- Define the Administration Server (DAS) and a database instance through the DB2 Control Center on the remote administrative system

Exercise 3.Creating databases and data placement

At the end of the exercise, students should be able to:

- Create a database
- Create a table space
- Execute a script file to create multiple table spaces
- Access the SYSCAT views containing table space information
- List table space information
- List container information

Exercise 4.Create objects

At the end of the exercise, students should be able to:

- Create tables
- Create indexes
- Create views
- Create an alias
- Add referential integrity constraints to a table
- Add check constraints to a table
- Add triggers to a table
- Access System Catalog information about objects
- Retrieve an XML document

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: <u>Enterprise Application Project in Cloud Environment-I</u>	Course Code: DB7110		
Credit: 2	L	T	P
	0	0	4
Year: 4 th	Semester: VII		

Exercise 1 - Develop a Java Application

At the end of the lab, you should be able to:

- Import an existing Java project into Rational Application Developer from a project interchange file
- Create the Library database and populate it using an application from the imported project
- Use the basic functions of the Java editor and associated views
- Perform rename and move refactoring functions
- Organize import statements in a Java class
- Visualize the relationship between classes using a UML diagram
- Customize the Java development tool settings through the workbench properties

Exercise 2. Create a Servlet and a Servlet Filter

At the end of the lab, you should be able to:

- Create an Enterprise Application project and a Dynamic Web project
- Create a reference from an Enterprise Application to a Java project through a project JAR reference
- Access Java packages from a utility JAR through a Java JAR dependency
- Create a servlet using wizards
- Configure servlet URL mappings through the Web deployment descriptor editor
- Invoke a servlet from the Project Navigator view
- Configure a Java™ DataBase Connectivity (JDBC) data source in the integrated test environment
- Add a Java™ Naming and Directory Interface (JNDI) resource reference to the Web deployment descriptor

Exercise 3. Test a Web Application

At the end of the lab, you should be able to:

- Create a test project and test suite to hold test artifacts
- Create a JUnitTest
- Capture HTTP messages using HTTP Recording
- Configure a URL Test Suite to test Web application components
- Execute a URL Test Suite against a Web application
- Create, implement, and test a servlet filter

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Course Title: Computer Graphics	Course Code: DA6210		
Credit: 4	L 3	T 0	P 2
Year: 4th	Semester: VIII		

Unit I : Introduction to computer graphics and primitives algorithms: Points, planes, pixels and frames buffers, lines, circles and ellipse drawing algorithms, display devices, primitive devices, applications of computer graphics.

Unit II : Two-Dimensional Transformation: Introduction to transformation matrix, **Types of transformations in 2-D:** Identity Transformation, Scaling, Reflection, Shear Transformation, Rotation, Translation, Rotation about an arbitrary point, Combined Transformation, Homogeneous coordinates, 2-D transformation using homogeneous coordinates.

Unit III: Three-Dimensional Transformation: Objects in homogeneous coordinates, **3-D Transformation:** Scaling, Translation, Rotation, Shear Transformations, Reflection, world coordinates and viewing coordinates, Projection, parallel Projection, Perspective projection. **Hidden Lines and Surfaces:** Back face removal algorithms, Hidden lines methods.

Unit IV : Viewing and Solid Area Scan-Conversion: Introduction to viewing and clipping, viewing transformation in 2-D, Point Clipping, Line Clipping, Introduction to polygon Clipping, Viewing and clipping in 3-D, Three Dimensional Viewing Transformations, Text Clipping, generalize Clipping, Multiple windowing.

Introduction to Solid Area Scan: Conversion, Inside-Outside Test, Winding Number Method and Coherence Property, Polygon Filling, Seed Fill Algorithms, Scan Line Algorithm, priority Algorithm, Scan Conversion of Characters, Aliasing, Anti-aliasing, Halfoning, Threshold and Dithering.

Unit V: Introduction to curves: Curves Continuity, Conic Curves, Piecewise Curve Design, Spline curve representation, Bezier Curves, Fractals and its Applications.

Object rendering: Introduction to Object Rendering, Shading, Ray Tracing, Illuminational model, Colour Models.

Text Book:

1. R.K. Maurya, Computer Graphics, John Willey.
2. David F. Rogers, Procedural Elements of Computer Graphics, Tata McGraw Hill.

Reference Book:

B.Tech – CSE (Cloud Based Applications)
Applicable for 2013-2017 Batch**

Course Title: Business Intelligence	Course Code: DA8010		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VIII		

Unit I

Introduction to Business Intelligence,

Introduction to OLTP and OLAP, BI Definitions & Concepts, Business Applications of BI, BI Framework, Role of Data Warehousing in BI, BI Infrastructure Components – BI Process, BI Technology, BI Roles & Responsibilities

Unit II

Basics of Data Integration (Extraction Transformation Loading),

Concepts of data integration need and advantages of using data integration, introduction to common data integration approaches, introduction to ETL using SSIS, Introduction to data quality, data profiling concepts and application

Unit III

Introduction to Multi-Dimensional Data Modeling,

Introduction to data and dimension modeling, multidimensional data model, ER Modeling vs. multi dimensional modeling, concepts of dimensions, facts, cubes, attribute, hierarchies,

Unit IV

Star and snowflake schema, introduction to business metrics and KPIs, creating cubes using SSAS

Unit V

Basics of Enterprise Reporting,

Introduction to enterprise reporting, concepts of dashboards, balanced scorecards, introduction to SSRS Architecture, enterprise reporting using SSRS

Text Book:

1. David Loshin Business Intelligence.
2. Mike Biere Business intelligence for the enterprise.
3. Larissa Terpeluk Moss, Shaku Atre Business intelligence roadmap.

Course Title: <u>Entrepreneurship & Product Development</u>	Course Code: DA8020		
Credit: 3	L 3	T 0	P 0
Year: 4 th	Semester: VIII		

Unit 1: Entrepreneurship-Definition, growth of small scale industries in developing countries and their positions vis-à-vis large industries: role of small scale industries in the national economy; characteristics and types of small scale industries; demand based and resources based ancillaries and sub-control types. 5 Government Policy for small scale industry; stages in starting a small scale industry.

Unit 2: Project identification-assessment of viability, formulation, evaluation, financing, field-study and collection of information, preparation of project report, demand analysis, material balance and output methods, benefit cost analysis, discounted cash flow, internal rate of return and net present value methods.

Unit 3: Accountancy-Preparation of balance sheets and assessment of economic viability, decision making, expected costs, planning and production control, quality control, marketing, industrial relations, sales and purchases, advertisement, wages and incentive, inventory control, preparation of financial reports, accounts and stores studies.

Unit 4: Project Planning and control: The financial functions, cost of capital approach in project planning and control. Economic evaluation, risk analysis, capital expenditures, policies and practices in public enterprises. Profit planning and programming, planning cash flow, capital expenditure and operations. Control of financial flows, control and communication.

Unit 5: Laws concerning entrepreneur viz, partnership laws, business ownership, sales and income taxes and workman compensation act. 5 Role of various national and state agencies which render assistance to small scale industries.

Year: 4 th	Semester: VIII		

Lab 1 JK Enterprises Review

Lab Overview

The overall purpose of this case study is to introduce JK Enterprises and the challenges faced by a system architect in introducing SOA to an organization.

As the instructor, you could perform the role of the CEO or CIO, present the scenario to the students, and then lead the students in the question and answers session. Another approach would be to divide the students into groups and ask them to play the roles of CEO and CIO, and then discuss the questions and answers in a group.

Lab Objectives

The JK Enterprises organization hierarchy has many silos. There is no reuse across different organization, even though they are solving the same business use case.

These are the business use cases that are common across the entire organization:

- Account opening
- Credit check
- Billing
- Order fulfillment
- Shipping

To increase revenue, JK Enterprises should reduce the cost of selling by focusing on automation and reuse. One of the use cases we will try to automate and reuse is Account Opening. Ideally, this should be a fixed-cost process, and it should be able to scale to handle many account openings without additional costs.

Contrast it with billing services. Billing for corporate customers is quite different from billing individual customers.

Most of the corporate customers require integration with their billing systems. For example, JK Enterprises would need to integrate with IBM's billing system if IBM was their corporate customer. Each corporate customer would have a different billing system. Service-Oriented Integration would guide the architect while building the billing system integration.

Lab 2 Service Identification

Lab Overview

This lab focuses on the Service Identification of RUP for SOA. The lab is divided into five parts.

1. The first part walks through Domain Decomposition using a top-down, business-driven technique aimed at gaining insights into key aspects of the business of JK Enterprises. This will help with identifying candidate services.
2. The second part uses the Goal Model Analysis technique, which starts with business goals, breaks them into sub-goals, and then determines which services are needed to fulfill the sub-goals.
3. The third part demonstrates the Existing Asset Analysis technique. This bottom-up analysis examines the existing IT assets that might be reused to implement the functionality required by the planned "to be" operations. WebSphere Studio Asset Analyzer is used to locate existing services.
4. Part 4 summarizes the candidate services discovered using the previous techniques through the lab, and then explains how to document those services in the SOA Architecture Stack.
5. Lastly, part 5 demonstrates the IBM Rational Method Composer, which gives method guidance.

Rational Software Architect and Rational Requisite Pro are used throughout the lab to demonstrate how these techniques can be documented by using IBM software tools.

Course Structure & Syllabus of B.Tech – CSE (Cloud Based Applications) Applicable for 2013-2017 Batch

Lab Objectives

The purpose of this lab is to understand the process used to identify services and the tools available from IBM that support this services identification. The lab focuses on the Service Identification phase in the service lifecycle, where a set of candidate business services is determined, using the three techniques:

- A **top-down** approach, working from a combination of a CBM models and process models
- A **bottom-up** approach, using documentation and knowledge of existing IT assets
- A **meet-in-the-middle** approach that uses a combination of top-down and bottom-up to arrive at a practical solution to create a to-be model that maximizes reuse of existing IT assets

The following IBM software products and offerings will be used to document the SOA services identified for JK Enterprises:

- IBM Rational Software Architect
- IBM Rational RequisitePro
- IBM Rational Method Composer
- IBM WebSphere Studio Asset Analyzer

This lab is not meant to be a tutorial on how to use the software products listed above, but merely as a walkthrough of the steps of Services Identification and as a way to help you understand which tools aid in the Services Identification analysis. Although the tools help with the process, the process does not require these tools.

After completing this activity, you should be able to understand, at a high level, the:

- Inputs necessary for Service Identification.
- Steps used to identify a starting set of candidate business services and corresponding operations.
- Basic business process decomposition used to define a level of granularity of operations that maximizes reuse potential.
- Requirement to analyze existing IT assets as potential services.

IBM tools that will assist with this process

FA7620	Coding for Reliable Communication
FA7630	Industrial Electronics

** Evaluation of 6 weeks industrial training to be carried out during the semester.

Year: 4th

Semester: VIII

Course Code	Course Title	L	T	P	Credit
	UG Departmental Elective-2	3	1	0	3.5
	UG Departmental Elective-3	3	1	0	3.5
	UG Departmental Elective-4	3	1	2	4.5
FA8010	Spread Spectrum Systems	3	1	0	3.5
	Open Elective	3	0	0	3
FA8110	Project Phase– III	0	0	8	4
	Total				22

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

List of Elective Subjects for VIII Semester

UG Department Elective – 2	
FA8610	Low Power VLSI Design
FA8620	Selected Topics in Communication
FA8630	Optimal Control

UG Department Elective – 3	
FA86A0	PLC, SCADA & DCS
FA86B0	Radar and Navigation
FA86C0	Digital System Design using VHDL

UG Department Elective – 4	
FA86H0	CDMA, GSM Systems
FA86I0	Digital Image Processing
FA86J0	Optical Network
FA86K0	Analog VLSI Design
FA86L0	Embedded System
FA86M0	Signal Condition
FA86N0	Virtual Instrumentation
FA86O0	Bio-Medical Instrumentation

List of Open Electives (To be conducted in VIII Semester)

Sl. No.	Branch	Subject Code	Name of Elective subjects
1	Physics	OA8710 OA8720	1. Nano Scale Science and Technology 2. Photonics Technology
2	EE	EA8710 EA8720	1. Non-Conventional Energy Resources 2. Instrumentation and Process control
3	ME	LA8710 LA8720	1. Entrepreneurship development 2. Quality Management
4	Civil	CA8710 CA8720	1. Environment and Ecology 2. GIS
5	CSE	DA8710 DA8720	1. Business Intelligence 2. Artificial Intelligence
6	IT	IA8710 IA8720	1. Multi-Media Technology 2. IT In Business
7	ECE	FA8710	1. Consumer Electronics
8	Humanities	HA8710 HA8720	1. Industrial Psychology 2. Human Values and Ethics
9	MBA	GA8710 GA8730 GA8740	1. Organizational Behavior 2. Digital Marketing 3. Financial Modeling with Spread sheet

**Course Structure & Syllabus of
B.Tech – Electronics & Communication Engineering
Applicable for 2013-2017 Batch
Summary of the Credits**

Year	Semester	Credit	Year Credit
First Year	I	21	45
	II	24	
Second Year	III	25	51
	IV	26	
Third Year	V	24.5	48.5
	VI	24	
Fourth Year	VII	22	44
	VIII	22	
Total			188.5

A. Evaluation Scheme for the following Courses will be as under:

Course	Evaluation Scheme (%)				
	Attendance	Test-1	Test-2	Final Test	Total
Aptitude Building-1	10	30	30	30	100
Aptitude Building-2	10	30	30	30	100
Value Addition Training	10	30	30	30	100
Soft Skills	10	30	30	30	100

B. Evaluation Scheme for **Project** will be as under:

Course	Evaluation Scheme (%)				
	Synopsis	Presentation	Report	Viva-Voce	Total
Project Phase-I	10	15	25	50	100
Project Phase-II					
Project Phase-III					

Project Phase-I & II will be evaluated by the Committee comprising of the following:

1. Head of the Department – Chairman
2. Teacher In-charge – Member
3. One nominee appointed by Director (Academic) – Member

Project Phase-III will be evaluated by the Committee comprising of the following:

1. Head of the Department – Chairman
2. Teacher In-charge – Member
3. One nominee appointed by Director (Academic) – Member
4. One nominee appointed by Vice Chancellor – Member

C. Evaluation Scheme for **Industrial Training** will be as under:

Course	Evaluation Scheme (%)			
	Training Report	Presentation	Monitoring	Total
Industrial Training	25	50	25	100

**Course Structure & Syllabus of
B.Tech – Electronics & Communication Engineering
Applicable for 2013-2017 Batch**

Course Title: Engineering Maths-I	Course Code: MAT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT I: Matrices

8L

Elementary row and column transformation, rank of matrix, linear dependence, consistency of linear system of equations, Eigen values and Eigen vectors, Cayley-Hamilton theorem.

UNIT II: Differential Calculus

8L

Functions, Limits, Continuity, Differentiability, Leibnitz theorem, Partial differentiation, Euler's theorem, Expansion of functions of several variables, Extrema of functions of several variables, Lagrange's method of multipliers.

UNIT III: Infinite Series

6L

Introduction, sequences, series, convergence, series of positive terms, comparison test, Integral test, D'Alembert's Ratio test, Raabe's test, Cauchy's root test, Alternating series: Leibnitz rule, power series.

UNIT IV: Multiple Integrals

8L

Beta and Gamma functions, Double and Triple integrals, change of order of integration, change of variables, Dirichlet integral and its applications.

UNIT V: Vector Calculus

8L

Point functions, Gradient, Divergence and curl of a vector and their physical interpretation, line integral, surface integral, volume integral, Green's Theorem, Stoke's theorem, Gauss Divergence theorem.

References:

1. B. S. Grewal: Higher Engineering Mathematics, Khanna publication.
2. E. Kreyszig : Advanced Engineering Mathematics, Wiley publication.
3. R. K. Jain & S. R. K. Iyenger: Advanced Engineering Mathematics, Narosa publication.
4. G. Prasad: Differential & Integral calculus, Pothishala publication, Allahabad.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Physics	Course Code: PYT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT-I

(8) L

Interference:

Introduction, Coherent Sources, Analytical treatment of interference, Young's double slit experiment and its analysis, Conditions of Interference, Fresnel's Biprism, fringes with white light, Determination of wavelength of monochromatic light by using Fresnel's Biprism method, Displacement of Fringes, Interference in plane parallel thin film (reflected and transmitted light) and wedge shaped film(reflected light only), Newton's Rings, Determination of wavelength of monochromatic light and determination of refractive index of a liquid by using Newton's ring method.

UNIT-II

(8) L

Diffraction:

Introduction, Difference between Interference and diffraction, resultant of superposition of n simple harmonic coherent vibrations, Fraunhofer diffraction due to single slit: resultant intensity, conditions of maxima, minima, angular and linear width of central maximum, Double slit diffraction: resultant intensity, missing order, N-slit diffraction : resultant intensity, conditions of maxima and minima, missing orders, angular width of principal maxima, Diffraction grating: formation of spectra and missing order spectra in spectrum, dispersive power of grating, Resolving power, Rayleigh Criterion of resolution, Resolving power of plane transmission diffraction grating.

UNIT-III

(8) L

Polarization:

Polarised and unpolarised light and its pictorial representation, plane of polarisation and plane of vibration, Phenomenon of Double Refraction, positive and negative double refracting crystals, properties of ordinary and extra-ordinary Rays, Nicol Prism and its application as a polariser and analyser, Mathematical analysis of superposition of two linearly polarised light vectors, retardation plates – half wave plate and quarter wave plate, Production and detection of Plane, Circularly and Elliptically Polarized Light.

UNIT-IV

(10) L

Laser : Spontaneous emission, stimulate demission and stimulated absorption, Einstein's A and B Coefficients and relation between them, Principle of Laser Action, Construction and Working of He-Ne, Semiconductor Laser.

Introduction to Fibre Optics: Fundamental ideas about optical fiber, Types of fibers, Acceptance angle and cone, Numerical aperture.

Magnetic Properties of Materials: Basic Concept of Para-, Dia and Ferro-Magnetism, Phenomenon of Hysterisis

Magnetic Circuits: Introduction, magnetomotive force, magnetic field intensity, permeability of free space, reluctance, law governing magnetic circuits.

Superconductivity: Temperature dependence of resistivity in superconducting material, effect of magnetic field (Meissner effect), Type I and Type II superconductors.

UNIT V

(10) L

Wave Mechanics :

Wave Particle Duality, de Broglie Concept of Matter Waves, Davisson and Germer experiment, Concept of wave packet, group and phase velocity, Heisenberg Uncertainty Principle and its applications viz. non existence of electron in nucleus, radius and energy of Bohr's first orbit, Schrödinger time independent and time dependent wave equation, Physical interpretation of wave function, Application of Schrodinger wave equation : Particle in a one dimensional box (eigen function and eigen values).

Science and Technology of Nanomaterial :

Introduction to Nanomaterial, Basic principle of nano science & technology, creation and use of Bulky Balls, structure, properties and use of Carbon nanotubes, applications of nanotechnology.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Reference & Text Books:

- | | | |
|--|---|------------------------------------|
| 1. Concepts of Modern Physics | - | Arthur Beiser (Mc-Graw Hill) |
| 2. Introduction to Special theory of Relativity | - | Robert Resnick - Wiely |
| 3. Fundamentals of Optics | - | Jenkins and White |
| 4. Optics | - | AjoyGhatak (TMH) |
| 5. Optics | - | Brijlal and Subrahmanyam |
| 6. Lasers: Fundamentals and applications | - | K. Thyagarajan, AjoyGhatak |
| 7. University Physics | - | Sears and Zeemansky |
| 8. Principles of Physics | - | Halliday, Resnick&Jearl Walker |
| 9. An Introduction to Quantum Mechanics | - | David. J. Griffith |
| 10. Introduction to Fiber optics | - | AjoyGhatak& K. Thyagarajan (TMH) |
| 11. Optical Fiber Communications | - | Keiser G. |
| 12. Nanomaterials- Synthesis, Properties
and Applications | - | Edelstein A. A. and Cammaratta R.C |
| 13. Nanotechnology | - | T. Pradeep (Tata McGraw-Hill) |

PHYSICS LAB (PYP151)

List of Experiments

(At least six)

1. To determine the wavelength of monochromatic light by Newton's ring.
2. To determine the wavelength of monochromatic light with the help of Fresnel's biprism.
3. To determine the focal length of two lenses by nodal slide and locate the position of cardinal points.
4. To determine the specific rotation of cane sugar solution using bi quartz polarimeter.
5. To determine the wavelength of spectral lines using plane transmission grating.
6. To determine the specific resistance of the material of given wire using Carey Foster's bridge.
7. To determine the variation of magnetic field along the axis of a current carrying coil and then to estimate the radius of the coil.
8. To verify Stefan's Law by electrical method.
9. To calibrate the given ammeter using potentiometer.
10. To calibrate the give voltmeter using potentiometer.
11. To determine energy band gap of a given semiconductor material by p-n junction method.
12. To determine the viscosity of water by Poisseuille's method.

Note: Additional experiments may be added based on contents of syllabus.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Essentials of Mechanical Engineering	Course Code: MET101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT – I

9L

Introduction to Engineering: Difference between Science and Technology, history of wheel, introduction to prime movers, transmission system, belt, pulleys, gear system and nomenclature, braking system, Mechanism, lever mechanism, Working principle of power generation system, hydel power plant, thermal power plant and its main components.

Coplanar Force system: Resolution of force in two mutually perpendicular direction Free Body Diagram, Moment, Varignon's theorem, static equilibrium, Lami's Theorem, type of joints/Support, Type of load: point load, uniformly constant and varying loads, beam and its type.

UNIT – 2

7L

Engineering material and their properties: Details of hook's law, Proportional limit, Yield point, Yield Stress, Engineering strain, Engineering stress, True stress and Strain, Plasticity, Elasticity, Allowable Strength, Hardness, Ductility, toughness, Fatigue, creep, strain energy, Impact Strength, Young modulus of Elasticity, Bulk Modulus, Poission Ration and its relation in between.

Stress and strain: Normal stress and strain, principle of Superposition, Deformation in stepped and composite bar.

UNIT – 3

7L

Thermodynamics: Macroscopic & microscopic study point of view, System, Surrounding and Universe, Phase, Property, State, Path, Process, Cyclic and non-cyclic processes, Quasi static process, Reversible and irreversible processes , Thermodynamic equilibrium, Concept of continuum, Energy and its forms, Enthalpy, Zeroth law, Different temperature scales and theory of temperature and Pressure measurement.

UNIT – 4

8L

Laws of thermodynamics: Thermodynamic definition of work, Thermodynamic processes, Calculation of work in various processes and sign convention, Non-flow work and flow work, Joules' experiment, First law of thermodynamics, Internal energy and enthalpy, First law of thermodynamics applied to open systems, Steady flow energy equation and its applications, First law analysis for closed system (non flow processes), Limitations of first law of thermodynamics, PMM-I.

Statement of Second law of thermodynamics: Kelvin Planck's statement and Clausius statement and their equivalence.

UNIT – 5

9L

Power generation: Air standard cycle, IC Engine, Carnot cycle, Otto cycle, Diesel cycle, Important components of I.C.Engine, two stroke and four stoke engine, S.I. and C.I. engines, efficiency of Otto and diesel cycle

Basics of Heat Transfer: Concepts of the mechanisms of heat flows: conduction, convection and Radiation heat transfer application in engineering.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Reference Books:

1. Basu,A.R; A Text book of Engineering Mechanics(Applied Mechanics);2003 Edition; Dhanpat Rai & co.(p) Ltd, Delhi.
2. Chandramouli, P.N; Engineering Mechanics; Second Printing; PHI Learning Private Limited, Delhi; 2013.
3. Rajput, R. K; Material Science; S. K. Kataria & Sons, New Delhi.
4. Dubey, N. H; Engineering Mechanics, Statics and Dynamics; First reprint; McGraw Hill Education (India) Private Limited, New Delhi, 2013.
5. Ratan, S.S; Theory of machines; Second Edition; Tata McGraw Hill Publishing Company Limited, New Delhi.
6. Nag.P.K.; Engineering Thermodynamics; 3rd Edition; Tata McGraw Hill Publishing Company Limited, New Delhi.
7. Nag.P.K.; Heat and Mass Transfer; Tata McGraw Hill Publishing Company Limited, New Delhi.
8. Kumar.D.S; Basic of Mechanical Engineering; S. K. Kataria & Sons, New Delhi.

Essentials of Mechanical Engineering (MEP-151)

List of Experiments

1. Tensile test
2. Impact test
3. Hardness test
4. Pulley experiment
5. Experiment on conduction heat transfer
6. Demonstration of Impulse and reaction turbine
7. Study of 4s and 2S engine petrol Engine
8. Study of 4s and 2S engine Diesel Engine
9. Study of refrigerator and air conditioning

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Professional Communication	Course Code: HMT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

OBJECTIVES:

- 1) To strengthen the Professional Communication skills of upcoming professionals.
- 2) To make them aware about the new forms and trends of business and technical writings.
- 3) To develop the students' interpersonal skills in order to ensure his / her optimum performance as an employee.
- 4) To prepare students for facing the challenges of their professional lives in an increasingly globalized world.

Unit –I Professional Communication

8 Hours

1. Professional Communication: Interpretation, Process, Forms, Barriers and Overcoming Barriers.
2. Types of Communication-Verbal, Non-Verbal, Oral, Written, Formal, Informal.
3. Communication Levels (Intra personal, Interpersonal, Group, Public communication) and Communication Flow (Downward, Upward, Lateral and Diagonal flow).
4. Technical Writing-Meaning, Types and process of preparing a technical document. Acronyms, Jargons.
5. Understanding and Practice of Paragraph writing-Principles of paragraph writing (unity, coherence and logical development of the ideas)
6. Communication: Impact of internet on communication, communicating through computers.

Unit-II Business Communication

10 Hours

1. Business communication – Meaning, Type and Format.
2. Intra-office communication – Types (Face to Face communication, Telephonic conversation, Letters, Memorandum, E-mails, Notice, Memo, Agenda, Minutes.), advantages and disadvantages. various types of intra-office communication
3. Inter-office communication –Face to Face communication, Telephonic Communication-mails, Letters (Sales, Credit, Enquiry, Quotation, Order, Complaint and Adjustment Letter), advantages and disadvantages of various types of inter-office communication.
4. Job-Application Letter and Resume.

Unit-III Technical Proposal and Report

A. Technical Proposal –Types, Format, Preparation of Proposal .

5 Hours

- **For B.Tech students-**
Technical Proposal to organize a Technical Training Program, to develop new range of products, establish new laboratory, or start a new venture.
- **For B.Pharma students-**
Technical proposal to establish a new laboratory, to create new drug-composition, or to visit a super specialty Hospital.
- **For B.Arch students-**
Technical proposal for an archeological site visit, or to construct new buildings.
- **For MCA students-**
Technical proposal to develop new software, or, to organize an induction program for the new entrants.
- **For MBA students-**
Proposal for establishment of a new department, for a new administrative system, or for new HR policies.

B. Technical Report –Types, Format, Preparation of Report.

5 Hours

- **For B.Tech students-**
Technical Report describing new machinery, a report on the sudden break-down in production unit, Annual Financial Report and market survey report for formulating new market strategy.
- **For B.Pharma students-**

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Technical Report based on the site-inspection of a drug manufacturing unit, Survey report on health awareness and self-medication.

- **For B.Arch students-**

Technical Reports based on a Site Inspection for geographical and geological aspects of a particular location. A report on the archeological survey of a monument.

- **For MCA students-**

Technical Report based on function of new technology (software or hardware), Technical Reports on Client's need for a Payroll management system/ Hospital management system.

- **For MBA students-**

Preparation of Annual Report of the organization, preparation of departmental reports and report based on the study of a successful organization.

Unit-IV Soft-Skills

8 Hours

1. Non-Verbal Communication -Kinesics, Oculistics, Vocalics, Proxemics, Chronemics.
2. Interpersonal Skills, Social-Skills
3. Personality-Meaning and Types, Attitude
4. Self-Management, Emotional Quotient, Time management, and Stress-Management.
5. Image-building / Impression –Management.
6. Leadership and Team-Building and Conflict.

Language-Lab

12 Labs

1. Stress, Intonation and Rhythm.
2. Overcoming Mother-Tongue Influence.
3. JAM session, Debate, Extempore.
4. Role-play, Information Exchange / Gap Activity.
5. Presentation Skills.
6. Group-Discussion Skills.
7. Preparing for interview.

Text Books:

1. Ruby Gupta, Advanced Technical Communication, Cambridge University Press, 2011
2. Ruby Gupta, Basic Technical Communication, Cambridge University Press, 2011.
3. Aruna Koneru, Professional Communication, Tata Mc Graw Hill, New Delhi, 2008.
4. Meenakshi and Sangeeta Sharma, Technical Communication: Principles and Practice Oxford University Press, 2nd Edition, 2011.

References:

12. Essentials of Business Communication, Rajendra Pal and J. S Kothari- Sultan Chand

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Computer Fundamental & C Programming	Course Code: CST101						
Credit: 2	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">2</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	2	0	0
L	T	P					
2	0	0					
Year: 1 st	Semester: I						

UNIT: 1

5L

Introduction to the Digital Computer (brief description about its components), Characteristics of computer system, Introduction to operating systems(DOS, Linux, Windows), function and types of operating system, Number Systems and conversion methods (Binary, hex, octal), Concept of flow chart, Write & execute the first C programme, C Data Types & Operators.

UNIT 2:

4L

Conditional Program Execution: Applying if-else and nested if-else statements, switch-case statements, restrictions on switch values, use of break & default with switch.

Program Loops & Iteration: Uses of loops (while, do-while and for), use of continue statement.

Function: function prototypes, call by value and call by reference function, recursion.

UNIT 3:

4L

Arrays: Insertion and deletion insingle dimensional array, linear searching, sorting (bubble sort), Strings.

Structures: Purpose and uses of structures, declaring structures, array of structures

TEXT BOOKS:

1. YashwantKanetkar, “Let us C”, BPB Publications, 2nd Edition, 2001.
2. Herbert Schildt, “C:The complete reference”, OsbourneMcgraw Hill, 4th Edition, 2002.
3. P.K. Sinha “Computer Fundamentals” B.P.B Publication

REFERENCE BOOKS:

1. Raja Raman, “Computer Programming in C”, Prentice Hall of India, 1995.
2. Kernighan & Ritchie, “C Programming Language”, The (Ansi C Version), PHI, 2nd Edition.
3. Byron Gottfreid “Schaum's Outline of Programming with C”

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

List of Programs in ‘C’ Lab (CSP-151)

Lab 1	(a) WAP to perform simple arithmetic operations using different data types. (b) WAP to show swap of two no's without using third variable.
Lab 2	(a) WAP to find the roots of a quadratic equation. (b) WAP to check the number is odd or even and find the sum of all odd and all even separately.
Lab 3	(a) WAP to find out whether the given number is prime or not. Find sum of all prime upto N. (b) WAP to reverse a given number and check the palindrome status.
Lab 4	WAP to print corresponding days of a week using switch case.
Lab 5	WAP to find and generate the Armstrong number.
Lab 6	WAP to print pattern triangle like Floyd's, Pascal, pyramid triangle.
Lab 7	(a) WAP to interchange two values using call by value and call by reference. (b) WAP to print factorial of a number using recursion & without using recursion.
Lab 8	WAP to print Fibonacci series. (a) Without using function (b) using function (c) using recursion
Lab 9	(a) WAP to print an array and find greatest/smallest element of an array. (b) WAP to perform linear searching in an array.
Lab 10	(a) WAP to insert/ delete element from an array. (b) WAP to sort the array's element using Bubble sort.
Lab 11	WAP to perform the following string functions. a. Strlen b. strcmp c. strcpy d. strcat e. strlenr f. strupr
Lab 12	Declare a suitable structure of a college and print the name and DOB of the student have scored more than sixty percent marks in end semester exam.
Lab 13	Declare a suitable structure for an organization and print all the names of employees having salary more than Rs.1000.

**Course Structure & Syllabus of
B.Tech – Electronics & Communication Engineering
Applicable for 2013-2017 Batch**

Course Title: Engineering Graphics	Course Code: CGE151		
Credit: 2	L 1	T 0	P 2
Year: 1st	Semester: I		

UNIT-I

3L

Introduction: Sheet Layout, Types of Sheet, Size of Sheets, Title blocks, Type of lines, Lettering, Dimensioning, Scale (Full, Reduced, Large) Geometrical Constructions

UNIT-II

4L

Projection: Methods of Projection, Planes of Projection, Projection of points, Projection of straight lines, Projection of auxiliary planes, Projection of planes.

UNIT-III

4L

Projection of solids, Sections of solids

UNIT-IV

2L

Development of surfaces

UNIT-V

2L

Isometric Projections

Reference Book:

- 1) Bhatt N. D. & Panchal V. M, "Engineering Drawing", Charotar Publisher, 2007.
- 2) Dhanjay A Jolhe, "Engineering Drawing" Tata-Mc-Garw hill, 2008.
- 3) Gill.P.S "Engineering graphics" S. K. Kataria & Sons, 2009
- 4) John K.C, "Engineering graphics" ,2nd edition, PHI Learning Pvt. Ltd., 2010 .

List of Experiments

1. Introduction to AutoCAD Commands, Explaining need of AUTO CAD over Manual drafting, Simple Drawings.
2. Sheet on Lettering and Geometric construction.
3. Orthographic Projections, Basic problem based on Projection of points.
4. Sheet on Projection of Lines.
5. Sheet on Projection of Planes.
6. Sheet on Projection of Auxiliary Planes.
7. Sheet on Projection of Solids.
8. Development of Surfaces.
9. Sheet on Isometric Projections from orthogonal views.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Professional Communication	Course Code: HMT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

OBJECTIVES:

- 1) To strengthen the Professional Communication skills of upcoming professionals.
- 2) To make them aware about the new forms and trends of business and technical writings.
- 3) To develop the students' interpersonal skills in order to ensure his / her optimum performance as an employee.
- 4) To prepare students for facing the challenges of their professional lives in an increasingly globalized world.

Unit –I Professional Communication

8 Hours

1. Professional Communication: Interpretation, Process, Forms, Barriers and Overcoming Barriers.
2. Types of Communication-Verbal, Non-Verbal, Oral, Written, Formal, Informal.
3. Communication Levels (Intra personal, Interpersonal, Group, Public communication) and Communication Flow (Downward, Upward, Lateral and Diagonal flow).
4. Technical Writing-Meaning, Types and process of preparing a technical document. Acronyms, Jargons.
5. Understanding and Practice of Paragraph writing-Principles of paragraph writing (unity, coherence and logical development of the ideas)
6. Communication: Impact of internet on communication, communicating through computers.

Unit-II Business Communication

10 Hours

1. Business communication – Meaning, Type and Format.
2. Intra-office communication – Types (Face to Face communication, Telephonic conversation, Letters, Memorandum, E-mails, Notice, Memo, Agenda, Minutes.), advantages and disadvantages. various types of intra-office communication
3. Inter-office communication –Face to Face communication, Telephonic Communication-mails, Letters (Sales, Credit, Enquiry, Quotation, Order, Complaint and Adjustment Letter), advantages and disadvantages of various types of inter-office communication.
4. Job-Application Letter and Resume.

Unit-III Technical Proposal and Report

A. Technical Proposal –Types, Format, Preparation of Proposal .

5 Hours

- **For B.Tech students-**
Technical Proposal to organize a Technical Training Program, to develop new range of products, establish new laboratory, or start a new venture.
- **For B.Pharma students-**
Technical proposal to establish a new laboratory, to create new drug-composition, or to visit a super specialty Hospital.
- **For B.Arch students-**
Technical proposal for an archeological site visit, or to construct new buildings.
- **For MCA students-**
Technical proposal to develop new software, or, to organize an induction program for the new entrants.
- **For MBA students-**
Proposal for establishment of a new department, for a new administrative system, or for new HR policies.

B. Technical Report –Types, Format, Preparation of Report.

5 Hours

- **For B.Tech students-**
Technical Report describing new machinery, a report on the sudden break-down in production unit, Annual Financial Report and market survey report for formulating new market strategy.
- **For B.Pharma students-**

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Technical Report based on the site-inspection of a drug manufacturing unit, Survey report on health awareness and self-medication.

- **For B.Arch students-**

Technical Reports based on a Site Inspection for geographical and geological aspects of a particular location. A report on the archeological survey of a monument.

- **For MCA students-**

Technical Report based on function of new technology (software or hardware), Technical Reports on Client's need for a Payroll management system/ Hospital management system.

- **For MBA students-**

Preparation of Annual Report of the organization, preparation of departmental reports and report based on the study of a successful organization.

Unit-IV Soft-Skills

8 Hours

1. Non-Verbal Communication -Kinesics, Oculistics, Vocalics, Proxemics, Chronemics.
2. Interpersonal Skills, Social-Skills
3. Personality-Meaning and Types, Attitude
4. Self-Management, Emotional Quotient, Time management, and Stress-Management.
5. Image-building / Impression –Management.
6. Leadership and Team-Building and Conflict.

Language-Lab

12 Labs

1. Stress, Intonation and Rhythm.
2. Overcoming Mother-Tongue Influence.
3. JAM session, Debate, Extempore.
4. Role-play, Information Exchange / Gap Activity.
5. Presentation Skills.
6. Group-Discussion Skills.
7. Preparing for interview.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Maths – II	Course Code: MAT201		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT I: Differential Equations

8L

Linear differential equations, Exact differential equations; Linear differential Equations of nth order with constant coefficients: complementary functions and particular integrals, Euler- Cauchy Homogeneous Linear differential equations, Simultaneous linear differential equations, Solutions of second order differential equations by changing the dependent and independent variables, Method of variation of parameters.

UNIT II: Laplace Transform

8L

Laplace Transform: Existence theorem, Laplace Transform of derivatives and integrals, Laplace Transform of Periodic functions and Unit Step function, Convolution theorem, Applications of Laplace Transform to solve linear and simultaneous differential equations.

UNIT III: Integral Transform

6L

Fourier Integral, Fourier Transform, Fourier Sine and Cosine Transforms and applications to simple Heat Transfer Equations, Z- Transform and its applications to solve difference equations.

UNIT IV: Fourier series

8L

Periodic functions, Fourier series of Periodic functions, Euler's formulae, Functions having arbitrary period, Change of intervals, Even and Odd functions, half range sine and cosine series.

UNIT V: Partial differential equations and its Applications

8L

Introduction to partial differential equations, linear partial differential equations with constant coefficients of second order and their classification, Method of Separation of Variables for solving Partial Differential Equations, One-Dimensional Wave Equation, One Dimensional Heat Equation.

Course Title: Computer Programming in C++	Course Code: CST201						
Credit: 2	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">2</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	2	0	0
L	T	P					
2	0	0					
Year: 1 st	Semester: II						

UNIT – I

4L

Introduction: Introducing Object-Oriented Approach related to other paradigms (functional, data decomposition), Characteristics of Object-Oriented Languages.

Basic terms and ideas: Abstraction, Encapsulation, Information hiding, Inheritance, Polymorphism.

UNIT – II

4L

Classes and Objects: Abstract data types, Object & classes, attributes, methods, C++ class declaration, State identity and behavior of an object, Constructors and destructors, instantiation of objects, Default parameter value, Copy Constructor, Static Class Data, Constant and Classes.

UNIT – III

5L

Inheritance and Polymorphism: Inheritance, Types of Inheritance, Class hierarchy, derivation – public, private & protected, Agrégation, composition vs classification hiérarchies, Polymorphism, Type of Polymorphism – Compile time and runtime, Method polymorphism, Polymorphism by parameter, Operator overloading, Parametric polymorphism, Generic function – template function, function name overloading, Overriding inheritance methods

TEXT BOOKS:

2. YashwantKanethkar, “Object Oriented Programming using C++”, BPB, 2004

**Course Structure & Syllabus of
B.Tech – Electronics & Communication Engineering
Applicable for 2013-2017 Batch
List of Programs in ‘C++’ Lab (CSP-251)**

Lab 1	(a) WAP to print first 10 prime numbers. (b) WAP to demonstrate nested loops. (c) WAP to print reverse of a given number. (d) WAP to read two numbers from keyboard and display the larger one.
Lab 2	(a) Create a class called Employee that includes three pieces of information as instance Variables – a first name (type String), a last name (type String) and a monthly salary (Double) (b) Create a constructor in above class to initialize the three instance variables. Provide a get method for each instance variable. (c) WAP to demonstrate destructors.
Lab 3	(a) Program to implement different types of inheritances like Multiple, Multilevel and hybrid. (b) Write a program in C++ demonstrating the public, protected and private parameters. (c) Write a program in C++ to demonstrate destructor in inheritance. (d) WAP to demonstrate encapsulation property of OOPs.
Lab 4	(a) Write a program that uses a class where the member functions are defined inside a class. (b) WAP that uses a class where member functions are defined outside a class. (c) WAP that uses a class where member functions are defined inside a class. (d) WAP to demonstrate the use of Static Data members.
Lab 5	(a) WAP to demonstrate the use of Dynamic Constructor. (b) WAP to demonstrate the use of function Template. (c) Illustrate and implement the C++ program to initiate the base constructor from derived class constructor.
Lab 6	(a) Write a C++ program to find the largest and smallest element of an array. (b) Create a class Matrix. Implement all possible matrix operations for Matrix type objects by overloading them.
Lab 7	(a) Create 2 classes OM and DB which store the value of distance. DM store distances in meters and cm and DB in feet and inches. Write a program that can read values for the class objects and add 1 object OM with another object of DB. (b) Define a class to represent bank account. Include the following members: Data members 1. Name of depositor. 2. Account number. 3. Type of account. 4. Balance amount in the account. Member functions 1. To assign initial values. 2. To deposit an amount. 3. To withdraw an amount after checking the balance. 4. To display name and balance. Write a main program to test the program.
Lab 8	(a) WAP to demonstrate static class data. (b) WAP to demonstrate the use of Public, Private and protected classes.
Lab 9	(a) WAP to illustrate the concept of call by reference. (b) WAP to illustrate the concept of unary operator overloading. (c) WAP to illustrate the concept of binary operator overloading.
Lab 10	(a) WAP to demonstrate the use of function overloading. (b) WAP using multiple inheritance for collecting employee details.
Lab 11	(a) WAP using function template to find maximum of two Data. (b) WAP to calculate factorial of given number using copy constructor.
Lab 12	(a) WAP to sort five float and integer numbers using template function (use bubble sort). (b) Demonstrate the use of different types of polymorphism.
Lab 13	(a) Write a function to read a matrix of size M × N from keyboard. (b) WAP to implement aggregation concept.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Chemistry and Environment	Course Code: CYT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT – I

Introduction to Environment and Chemistry

Chemical Evolution, Genesis of Environment, Components of Environment, Layers of atmosphere, Chemical composition and reactions of troposphere, Chemistry of Ozone Layer depletion.

UNIT – II

Water Chemistry

Water quality parameters (Physical, Chemical and Biological), CPCB and WHO standards for water, Measurement of parameters of water quality, Analytical tools for analysis of water quality, alkalinity, hardness and its determination (EDTA method only). Water softening processes – Lime – Soda process, Ion exchange method, boiler feed water, boiler problems-scale, sludge, priming and foaming, caustic embitterment and corrosion, their causes and prevention, Numerical problems on alkalinity and hardness.

UNIT – III

Environmental Pollution

Air Pollution: Types of pollutants, source, effects, sink and control of primary pollutants – CO, NO_x, HC, SO_x and particulates, Photochemical smog, Acid rain and Global warming – Process, National and International efforts to combat it.

Water Pollution: Water quality parameters – (BOD & COD), Classification of pollutants and their sources, waste water treatment – domestic and industrial, Ganga pollution and control.

Soil Pollution: Composition of soil, classification and effects of soil pollutants such as agro-chemicals (pesticides and fertilizer related problems), fly ash and their control.

Integrated Solid Waste Management: Classification of waste, Treatment & Disposal methods (Composting, sanitary land filling, incineration, recycling and reuse).

UNIT – IV

Energy Resources

Conventional Energy Sources – Coal and Petroleum, Refining, Fractional Distillation, Reforming, Cracking, Alkylation, Isomerisation, Hydro treating, Sulphur Recovery, Aromatization, Octane number, Cetane number, Aviation fuel, LPG, CNG, PNG, Energy Crises, Non-conventional Energy Sources – Hydro, Wind, Solar, Nuclear, Geo thermal and Biomass based.

UNIT – V

Eco-friendly Materials

Introduction to ecofriendly products and ECOMARK, Ecofriendly domestic appliances, Green Chemistry and Green Building, Organic foods, Biofuel, Biogas, Lignin, Bioplastics, Light weight plastic composites, Fuel cell, Organic Fuel Cells, hydrogen as a fuel and New lighting technologies: Organic Photo-voltaic, OLED and Organic Transistor.

Text Books:

1. Chemistry in Engineering & Technology (Vol I & II) (Latest ed.) By J.C. Kuriacose & J. Rajaraman, Tata McGraw-Hill Co, New Delhi.
2. Engineering Chemistry by O.G. Palanna, Tata McGraw-Hill Co, New Delhi.

Reference Books:

1. Atkins' Physical Chemistry by Peter W. Atkins and Julio de Paula, Oxford University Press.
2. Principles of Physical Chemistry (Latest ed.) By Puri, Sharma & Pathania.
3. Organic chemistry, Morrison and Boyd, Pearson Prentice Hall, 2011
4. Environmental chemistry, S.E. Manahan, 9th edition, CRC Press.
5. Textbook of polymer science by F.W. Billmeyer, Wiley India.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Introduction to Electrical Engineering	Course Code: EET101
Credit: 3	L T P 3 0 0
Year: 1st	Semester: II

UNIT I – D.C. NETWORK THEORY

Review of basic circuit theory concepts, Mesh and Nodal analysis, Superposition theorem, Thevenin's theorem, Norton's theorem, Maximum power transfer theorem, Star–delta transformation, Magnetic Circuits.

UNIT II – A.C. CIRCUITS & MEASURING INSTRUMENTS

Single Phase A.C.: Phasor representation of voltage and current, A.C. circuit behavior of resistance, inductance, capacitance & their combination in series and parallel, Power triangle, Power factor, Concept of series & parallel resonance.

Three Phase A.C.: Star – delta connections, Relation between line and phase quantities, three phase power and its measurement, What is 3 phase 4 wire and 3 phase 5 wire system?

Measuring Instruments: Construction and principle of voltage and current measuring instruments.

UNIT III – TRANSFORMERS

Principle of operation, Types of construction, Phasor diagram, Equivalent circuit, Efficiency and voltage regulation of single phase transformer, O.C. and S.C. tests.

UNIT IV – D.C. & SYNCHRONOUS MACHINES

D.C. Machines: Construction and working principle of d.c. generator and d.c. motor, Types of d.c. machines, E.M.F. equation, Torque equation, Magnetization and load characteristics, Losses and efficiency, Need of starter in d.c. motors.

Synchronous Machines: Construction and Principle of operation of Alternator and Synchronous Motor.

UNIT V – INDUCTION MOTORS

Three Phase Induction Motors: Principle of operation of 3- ϕ induction motor, Types of 3- ϕ induction motor, Need of starters in 3- ϕ induction motors, Slip – torque characteristics,

Single Phase Induction Motor: Principle of operation of single phase induction motor, Methods of starting of single phase induction motor.

Reference Books

1. V. Del Toro. “ Principles of electrical Engineering, “Prentice hall International.
2. W.H. Hayt& J.E. Kemmerly,” Engineering circuit Analysis, “McGraw Hill.
3. I. J. Nagrath, “Basic Electrical Engineering,” Tata Mc. Graw Hill.
4. A. E. Fitzgerald, D.E., Higginbotham and A Gabel, “Basic Electrical Engineering” McGraw Hill.
5. H. Cotton, “Advanced Electrical Technology” Wheeler Publishing.

Basic Electrical Engineering Lab (EEP-151)

(Any Ten)

1. Verification of Network Theorems.
2. Study of diode characteristics. Study of phenomenon of resonance in RLC series circuit.
3. Measurement of power in a three phase circuit by two wattmeter method.
4. Measurement of efficiency of a single phase transformer by load test.
5. Determination of parameters and losses in a single phase transformer by OC and SC test.
6. Study of characteristic of DC Motor.
7. Study of characteristic of AC Motor.
8. DC generator characteristics.
9. 10. Speed control of dc shunt motor.
10. Study running and reversing of a three phase induction motor.
11. Study of a single phase energy meter.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Introduction to Electronics & Communication	Course Code: ECT101						
Credit: 3	<table style="width: 100%; border: none;"> <tr> <td style="width: 33%; text-align: center;">L</td> <td style="width: 33%; text-align: center;">T</td> <td style="width: 33%; text-align: center;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1st	Semester: II						

UNIT 1: Fundamental of Semiconductors

10 Lectures

Energy bands in semiconductors, intrinsic and extrinsic semiconductors, Fermi Level in Intrinsic and Extrinsic semiconductor, Carrier transport in semiconductors: diffusion current, drift current, mobility, Hall Effect and resistivity. Generation and recombination of carriers.

UNIT 2: Application of Low Power and High Power Diodes

10 Lectures

Diode circuits: Construction, Junction diode characteristics, Half and full wave rectifiers - Expression for efficiency and ripple factor - Bridge rectifier – π Filter circuits, Clipper, Clamper and multipliers using diodes, Zener Diode Characteristics - Regulated power supply using Zener diode.

UNIT 3: Transistor fundamentals

8 Lectures

Transistor circuits: Characteristics of a transistor in CB, CE and CC modes - Relatively merits - Biasing of Transistors - Load Line and operating point concept (both AC and DC). Construction and working of JFET and MOSFET.

UNIT 4: Digital fundamentals and Introduction to Signals

8 Lectures

Basic logic gates: AND, OR, and NOT – implementation of all gates using Universal gates, Number Systems conversions, Boolean algebra, K-map (upto 4 variables). Source of Information, Types of Signals.

UNIT 5: Basics of Communications & Instrumentation

9 Lectures

Communication Systems, Communication Channels, Need of modulation, Types of modulations (Wave shapes and final expression only), Study of Piezoelectric, PMMC, LVDT and Strain Gauge transducers and their classifications and display device (7 segment) only.

Reference Learning:

Unit 1. Electronics Devices and Circuits, Millman and Halkias, Tata McGraw Hill, 4th ed.

Unit 2 & 3. Electronic Devices and Circuit Theory, Robert L. Boylestad, Prentice Hall Higher Edu., 2000.

Unit 4. Digital Design, Morris Mano, PHI

Unit 4. Modern Digital & Analog Communications, B. P. Lathi, OUP

Unit 5. Electronic Communication Systems, John Kennedy, Tata McGraw Hill, 4th ed.

Unit 5. Electronic Instrumentation - H. S. Kalsi

ECP-151 ELECTRONICS ENGINEERING LAB.

1. To identify and Study of the various component and Devices of electronics with their specification (CRO, Function Generator, Multimeter, Power Supply, resistor, capacitor, inductor, ICs, LED, potentiometer etc.)
2. To study the V-I characteristics of PN diode and Zener diode.
3. To find the efficiency of Rectifiers and ripple factor of capacitive and non-capacitive half wave and full wave rectifier.
4. To Study and Verify clipper and clamper with biased circuits.
5. To find the characteristics of CB and CE amplifiers.
6. Determine the characteristics of FET.
7. To find out the power energy of various periodic and non periodic signals.
8. To verify the logic gates using diodes.
9. Study and observations of AM & FM Waveforms.
10. Study of various transducers (Strain Gauge).

**Course Structure & Syllabus of
B.Tech – Electronics & Communication Engineering
Applicable for 2013-2017 Batch**

Course Title: Workshop Practice	Course Code: MEP152		
Credit: 2	L 1	T 0	P 2
Year: 1st	Semester: II		

List of Experiments

1. Carpentry: To make a T-Lap joint with soft wood.
2. Arc Welding: To make a Lap joint with mild steel flat by arc welding process.
3. Gas Welding: To make a Lap joint of M.S. sheet with gas welding process.
4. Fitting: To make a plug and socket joint with M.S.flat.
5. Machine Shop: To turn a M.S. rod on lathe to prepare a turning specimen.
6. Sheet Metal: To make a square tray with G.I. sheet.
7. Study of Foundry and Forging tools and equipments.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

L	T	P					
3	1	2					
Year: 2nd	Semester: III						

UNIT-1: INTRODUCTION

8 L

Number Systems, Basic & Universal Logic gates, Boolean algebra, Direct Conversion of various base, Negative number representations, Floating point number representation, BCD & EXCESS-3 arithmetic, Error detecting and correcting codes: Hamming code, parity code, Review and Limitation of K-Map, Quine-Mcclusky Method (Tabular Method).

UNIT-2: COMBINATIONAL LOGIC CIRCUITS

8 L

Characterization of digital circuits: Combinational & Sequential Logic circuit, Design procedure: Adders, Subtractors, Parallel Adder, IC-74LS83 and its applications, Multiplier, Decoder, Encoder, Priority Encoder, Multiplexers, Demultiplexers and their applications, Magnitude Comparators, Code Converters, Parity checker and generator, BCD Adder.

UNIT-3: SEQUENTIAL LOGIC CIRCUITS

6 L

Latch, Flip-Flops and their conversions, Analysis and Synthesis of Sequential Circuits, Excitation Table & Diagram, Counters: Synchronous & Asynchronous, Shift Registers and their applications, Finite State Machine: Mealy and Moore Models.

UNIT-4: MEMORIES

8 L

Memory Characteristics and operations, Sequential, Random Access-MOS & C-MOS Static and Dynamic Memory elements, Memory organization: One dimensional and Multidimensional Arrangement, Read Only Memory, ROM as a Decoder, Memory Bank, Address Decoding of Memory (Internal & External), PAL, PLA.

UNIT-5: LOGIC FAMILIES, HAZARDS & FAULT DETECTIONS

10 L

Logic Families: Diode, BJT & MOS as a switching element, concept of transfer characteristics, ECL, TTL, I²L, Tri-state, PMOS, NMOS and CMOS logic families- Power Consumption, Gate delay and Figure of merit (SPP), Package density, Comparison of standard logic families, pass transistor Logic, Open Collector and Totem pole output stage for TTL. Static and Dynamic Hazards, Gate Delay, Generation of Spikes, Analysis & illustration of Hazard in Combinational Circuits, fault Detection Techniques: Path Sensitization, Boolean Difference Method, K- Map Method.

Text Books:

1. Digital Design, M. Morris Mano and M. D. Ciletti, 4th Edition, Pearson

Reference Books:

1. Digital Systems: Principles and Design, Raj Kamal, Pearson
2. Maini, Digital Electronics: Principles and Integrated Circuits, Wiley India.
3. Switching Theory and Finite Automata, Kohavi, TMH Publications.

Digital System Design Lab

1. Implementation of All Logic Gates using Universal gates (NAND & NOR both).
2. Bread-board implementation (Parallel adder, One bit Multiplier, One bit Magnitude comparator, parity checker)
3. Bread-board implementation of any one code converter (i.e. Gray Code, BCD Code, Excess-3, Hex. etc.).
4. Design of shift registers (SISO, SIPO, PIPO, and PISO), up and down counters.
5. Design of Mod-6 types of Asynchronous Counters.
6. Transfer characteristics of TTL and CMOS inverters.
7. Realization of Decoder, Multiplexer, encoder and De-multiplexers using IC 74138.
8. To design & implement PAL.
9. To design & implement PLA.
10. Clock circuit realization using 555, CMOS inverter.

*Any two (Value Added)

L	T	P					
3	1	2					
Year: 2nd	Semester: III						

UNIT 1: BIPOLAR JUNCTION TRANSISTORS

10 L

Transistor as an amplifier, Review of biasing and stabilization, Ebers-Moll model-Derivation of currents, Switching Characteristics of Transistors, Low frequency (h-parameter) models and derivation of parameters for CE. Inter-conversion of low frequency models parameter for CC & CB. High frequency (π - parameter) model, CE short circuit current gain, Miller's Theorem, Gain-bandwidth product.

UNIT 2. FIELD EFFECT TRANSISTORS

8 L

FET as an amplifier, Biasing of JFET, Hi & Low frequency analysis of FET-Derivation and analysis of parameter for CS. Depletion and Enhancement types of MoSFET, Construction and Working of NMOS & PMOS.

UNIT 3. FEEDBACK AND OSCILLATORS CIRCUITS

8 L

Concepts & Types of feedback, Different topologies of feedback of shunt and series circuits. Effect of feedback on various parameters. Oscillators circuits & Criteria of oscillation. RC-phase shift, Wein-Bridge, Hartley, Colpitt and Crystal Oscillators.

UNIT 4. MULTISTAGE AMPLIFIER

8 L

Types of Coupling (RC & TC), Need for Multistage Amplifier, 2-stage amplifier – gain, frequency Analysis, Gain Bandwidth Product (GBW), Darlington Pair, Cascade & Cascode amplifiers.

UNIT 5. POWER AMPLIFIER

10 L

Amplifier Types, Series Fed and Transformer Coupled Class A Amplifier-operation & Circuit Design, Class B, AB, C,D and S-operation & Circuit Design, efficiency, Amplifier Distortion, Push Pull, complimentary symmetry, second harmonic and cross over Distortion, Thermal stability & Heat Sinking.

Text Books:

1. Jacob Millman & Christos C. Halkias, "Electronic Devices and Circuits" Tata McGraw Hill, 1991.

Reference Books:

1. Nandita Das Gupta and Amitava Das Gupta, "Semiconductor Devices-Modelling and Technology", Prentice Hall of India, 2004.
2. Donald A. Neaman. "Semiconductor Physics and Devices" 3rd Edition, Tata McGraw Hill, 2002.
3. S Salivahanan, N Suresh Kumar, "Electronic Devices and Circuits", 3rd edition, McGraw Hill Publication, 2013.

Electronic Devices and Circuits Lab

- 1) To verify switching characteristics of BJT.
- 2) Find out % error in various gain & impedance of CE, CB.
- 3) To find out % error in various gain & impedance of CS in JFET/ MOSFET.
- 4) To verify characteristics of NMOS & PMOS.
- 5) To Study Positive and Negative feedback circuit using BJT/FET.
- 6) To verify and realize RC-Phase Shift, Wein Bridge, Hartley & Colpitts ,Crystal Oscillator.
- 7) To design and verify gain & frequency of Cascade amplifier.
- 8) To study of Push-Pull amplifiers.
- 9) To determine the gain & input impedance of Darlington Pair.
- 10) To Study Class A, transformer coupled amplifiers.

Year: 2 nd	Semester: III						

UNIT 1: CRYSTALLOGRAPHY & QUANTUM MECHANICS 8L

Crystalline and amorphous solids, system of crystals, symmetry operation, Miller indices, atomic radius, coordination number, atomic packing factor calculation, Inadequacy of classical mechanics, wave and particle duality of radiation, de-Broglie concept of matter waves, Heisenberg's uncertainty principle, Schrodinger's wave equation, Introduction to Dielectrics & Magnetic Materials.

UNIT 2: ATOMS AND ELECTRONS 10L

Atomic Spectra. The Bohr Model. Quantum Mechanics. Potential Well Problem. Tunneling. Atomic Structure and the Periodic Table. Bonding Forces and Energy Bands in Solids. Direct and Indirect Semiconductor's. Effective Mass. Intrinsic Material. Extrinsic Material. Electrons and Holes in Quantum Wells. Carrier Concentrations.. Electron and Hole Concentrations at Equilibrium. Temperature Dependence of Carrier Concentrations. Compensation and Space Charge Neutrality. Drift of Carriers in Electric and Magnetic Fields. Conductivity and Mobility. Drift and Resistance of Semiconductor.

UNIT 3: EXCESS CARRIERS IN SEMICONDUCT 6L

Carrier Lifetime and Photoconductivity. Direct Recombination of Electrons and Holes. Indirect Recombination; Trapping. Steady State Carrier Generation; Quasi-Fermi Levels. Photoconductive Devices. Diffusion of Carriers. Diffusion Processes. Diffusion and Drift of Carriers; Built-in Fields. Diffusion and Recombination; the Continuity Equation. Steady State Carrier Injection; Diffusion Length.

UNIT 4: JUNCTIONS. 10L

The Contact Potential. Equilibrium Fermi Levels. Space Charge at a Junction. Forward- and Reverse-Biased Junctions; Steady State Conditions. Qualitative Description of Current Flow at a Junction. Carrier Injection. Reverse Bias. Reverse-Bias Breakdown, the Breakdown Diode. Time Variation of Stored Charge. Reverse Recovery Transient. Switching Diodes. Capacitance of p-n Junctions. The Varactor Diode. Deviations from the Simple Theory. Effects of Contact Potential on Carrier Injection. Recombination and Generation in the Transition Region. Ohmic Losses, Metal-Semiconductor Junctions. Schottky Barriers. Rectifying Contacts. Ohmic Contacts. Typical Schottky Barriers. Heterojunction.

UNIT 5: FIELD-EFFECT TRANSISTORS 10L

Amplification and Switching. The Junction FET. Pinch-off and Saturation. Gate Control.. The Metal-Semiconductor FET. The GaAs MESFET. The High Electron Mobility Transistor (HEMT). Short Channel Effects. The Metal-Insulator-Semiconductor FET, the Ideal MOS Capacitor. Effects of Real Surfaces. Threshold Voltage. MOS Capacitance-Voltage Analysis. Time- dependent Capacitance Measurements. Current-Voltage Characteristics of MOS Gate Oxides. The MOS Field-Effect Transistor. Mobility Models. Short Channel MOSFET I-V Characteristics. Control of Threshold Voltage. Substrate Bias Effects. Sub threshold Characteristics. MOSFET Scaling and Hot Electron Effects.

Year: 2nd	Semester: III						

UNIT 1: COORDINATE SYSTEMS AND TRANSFORMATION

6L

Cartesian Coordinates, Circular Cylindrical Coordinates, Spherical Coordinates Vector Calculus: Differential Length, Area and Volume, Line Surface and Volume Integrals, Del Operator, Gradient of a Scalar, Divergence of a Vector and Divergence Theorem, Curl of a Vector and Stoke's Theorem, Laplacian of a Scalar.

UNIT 2: ELECTROMAGNETIC WAVE PROPAGATION

8L

Faraday's Law, Transformer and Motional Electromotive Forces, Displacement Current, Derivation of Maxwell's Equations For Static and Time-Varying Fields. Differential and integral forms, concept of displacement current. Boundary conditions.

UNIT 3: ELECTROMAGNETIC WAVE PROPAGATION APPLICATIONS

8L

Electromagnetic Wave Propagation: Wave Propagation in Lossy Dielectrics, Plane Waves in Lossless Dielectrics, Plane Wave in Free Space, Plane Waves in Good Conductors, Power and The Poynting Vector, Reflection of a Plane Wave in a Normal incidence.

UNIT 4: TRANSMISSION LINES

8L

Transmission Lines: Transmission Line Parameters, Transmission Line Equations, Input Impedance, Standing Wave Ratio and Power, Smith Chart, Some Applications of Transmission Lines. Time & Frequency Domain analysis of Transmission lines. Low loss RF and UHF transmission lines. Distortion-less condition. Transmission line charts-impedance matching.

UNIT 5: WAVEGUIDES

8L

Wave Guides: Introduction to Planar (Rectangular) Waveguides, Derivation of TE and TM Modes, TEM Mode. Circular Waveguides- Derivation of TE and TM Modes, TEM Mode. Impedance and characteristics impedances. Transmission line analogy for wave guides. Attenuation and factor of wave guides. Dielectric slab wave guides. Resonators

Text Books:

1. Elements of Electromagnetics, M N O Sadiku, 2012.

Reference Books:

1. Engineering Electromagnetic, William Hayt, McGraw-Hill, 2011.
2. Electromagnetic Fields, K. D. Parsad, 2010.
3. Electromagnetic waves and radiating systems. Edward Conrad Jordan, Keith George Balmain. Prentice-Hall, 1996.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Signals and Systems	Course Code: FA3030		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: III		

A: CONTINUOUS-TIME (CT) SIGNAL AND SYSTEM ANALYSIS

UNIT 1: TIME-DOMAIN ANALYSIS OF LTI CT SYSTEMS

8 L

Properties of Signals, Definition of a CT system, CT system properties, Differential Equation, Impulse response and the convolution integral, Properties of convolution, Differential Equation, System properties in terms of the impulse response, System Response for Complex-Exponential Inputs.

UNIT 2: FREQUENCY DOMAIN ANALYSIS OF CT SIGNALS AND LTI SYSTEMS

10 L

Laplace Transform (LT)-RoC, Properties and Applications. Fourier series (FS)-Exponential FS and its properties, Fourier Transform (FT): Definition, Relation to Laplace transform and FS, Properties, Examples, Frequency Spectra, Frequency Response of LTI systems, Applications of the Fourier Transform (Ideal Filters, Amplitude Modulation)

B: DISCRETE-TIME (DT) SIGNAL AND SYSTEM ANALYSIS

UNIT 3: BASIC DT SIGNAL AND SYSTEM CONCEPT

6 L

Definition of a DT signal, Sampling Theorem, DT signal properties, Energy vs. Power signals, Periodic vs. Aperiodic, Even and odd signals, Operations on signals, Special signals: Harmonics, Singularity signals; Definition of a DT system, DT system properties.

UNIT 4: TIME DOMAIN ANALYSIS OF LTI DT SYSTEMS

6 L

Difference equation representation of I/O relationship, Impulse response and the convolution sum, System properties in terms of the impulse response, System response for complex-exponential inputs.

UNIT 5: FREQUENCY DOMAIN ANALYSIS OF DT SIGNALS AND SYSTEM

10 L

Z-transform: Definition, existence and motivation, Evaluation of ZT, Properties, Inverse ZT, LTI System Applications (transfer functions) Fourier transforms of discrete-time signals: Discrete-Time Fourier Series, Discrete-Time Fourier Transform - Definition, Relationship between DTFT and z-transform, Relationship between DTFT and CTFT, Properties, Frequency response of DT LTI systems

Text Books:

1. Linear Systems and Signals, B. P. Lathi, Oxford Press, 2nd Edition. Reference Learning:
2. Signals and Systems, Oppenheim and Willsky with Nawab, 2nd Edition, Prentice Hall, 1997.
3. Signals and Systems, Tarun Kumar Rawat, 1st Edition, Oxford University Press, 2011

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Network Analysis and Synthesis	Course Code: EA32F0		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: III		

UNIT 1. INTRODUCTION TO CONTINUOUS TIME SIGNALS AND SYSTEMS:

Basic continuous time signals, unit step, unit ramp, unit impulse and periodic signals with their mathematical representation and characteristics. Waveform synthesis, Analogous System: Linear mechanical elements, force-voltage and force-current analogy, modelling of mechanical and electro-mechanical systems

UNIT 2. GRAPH THEORY:

Graph of a Network, definitions, tree, co tree, link, basic loop and basic cut set, Incidence matrix, cut set matrix, Tie set matrix Duality, Loop and Node methods of analysis. Analysis of first and second-order linear systems by classical method.

UNIT 3. NETWORK THEOREMS (APPLICATIONS TO AC NETWORKS):

Superposition Theorem, Thevenin's Theorem, Norton's Theorem, maximum power transfer theorem, Concept of Duality. Network Functions : Concept of Complex frequency, Transform Impedances Network functions of one port and two port networks, concept of poles and zeros, properties of driving point and transfer functions, time response and stability from pole zero plot.

UNIT 4. TWO PORT NETWORKS:

Characterization of LTI two port networks ZY, ABCD, h and g-parameters, reciprocity and symmetry, Inter-relationships between the parameters, inter-connections of two port networks, Ladder and Lattice networks. T & Π Representation.

UNIT 5. NETWORK SYNTHESIS:

Positive real function; definition and properties; properties of LC, RC and RL driving point functions, synthesis of LC, RC and RL driving point admittance functions using Foster and Cauer first and second forms. Introduction to active network synthesis.

Text Books:

1. Kuo, Network Analysis & Synthesis, Wiley India
2. ME Van-Valkenberg; "Network Analysis", Prentice Hall of India

Reference Books:

1. Jagan, Network Analysis, B S Publication
2. Choudhary D.Roy, "Network & Systems", Wiley Eastern Ltd.
3. Donald E.Scott, "Introduction to circuit Analysis" Mc. Graw Hill
4. B.P. Lathi, "Linear Systems & Signals" Oxford University Press, 2008

Network Analysis & Synthesis Lab: List of Experiments

1. Verification of Superposition Theorem, Thevenin's Theorem, Norton's theorem, Maximum power transfer theorem
2. To plot frequency response of a series resonant circuit.
3. To plot frequency response of a parallel resonant circuit.
4. to measure input impedance and output impedance of a given two port network.
5. To design a Π attenuator which attenuate given signal to the desired level.
6. Verification of Superposition Theorem, Thevenin's Theorem, Norton's theorem, Maximum power transfer theorem using Multisim/Pspice.
7. Plot the frequency response of a series resonant circuit using Multisim/Pspice.
8. Plot the frequency response of a parallel resonant circuit using Multisim/Pspice.
9. Measure input impedance and output impedance of a given two port network using Multisim/Pspice..
10. Design a Π attenuator which attenuate given signal to the desired level using Multisim/Pspice.

**Course Structure & Syllabus of
B.Tech – Electronics & Communication Engineering
Applicable for 2013-2017 Batch**

Course Title: Computer Aided Design of Electronics Lab	Course Code: FA3110		
Credit: 1	L 0	T 0	P 2
Year: 2nd	Semester: III		

List of Experiments

1. Introduction to PSpice&OrCAD.
2. To calculate the ripple factor of Full Wave rectifier with and without filters. (Write a Pspice code)
3. To verify the characteristics of CE amplifier. (Write a Pspice code)
4. Write a Pspice code for all the logic gates.
5. Write a Pspice code of 2-to-4 decoder
6. Write a Pspice code of 8-to-3 encoder (without and with priority)
7. Write a Pspice code of 8-to-1 multiplexer
8. Write a Pspice code of 4 bit Binary to Gray code converter
9. Write a Pspice code of Multiplexer/ DE multiplexer, comparator
10. Write a Pspice code of Full Adder using 3 modeling styles
11. Write a Pspice code of Flip Flops: SR, D, JK, T (Asynchronous Reset and Synchronous Reset)

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Digital Signal Processing	Course Code: FA4211						
Credit: 4.5	<table style="width: 100%; border: none;"> <tr> <td style="width: 33%; text-align: center;">L</td> <td style="width: 33%; text-align: center;">T</td> <td style="width: 33%; text-align: center;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	1	2
L	T	P					
3	1	2					
Year: 2nd	Semester: IV						

UNIT-1: DISCRETE FOURIER TRANSFORM

8 L

Frequency Domain Sampling: The Discrete Fourier Transform, Frequency Domain Sampling and Reconstruction of Discrete-Time Signals, Discrete Fourier Transform (DFT), Properties of DFT, DFT as a linear Transformation. Relationship of the DFT to Other Transforms, Multiplication of two DFTs and Circular Convolution, Additional DFT Properties, Frequency analysis of signals using the DFT.

UNIT-2: FAST FOURIER TRANSFORM: AN EFFICIENT COMPUTATION OF DFT

8 L

Efficient Computation of the DFT: FFT Algorithms, Computational Complexity of Direct Computation of the DFT, Radix-2 FFT algorithms. Efficient computation of the DFT of two real sequences, efficient computation of the DFT of 2N-Point real sequences, Linear Filtering Approach to computation of the DFT (Geortzel & Chirp-z Transform algorithms) Quantization effects in the computation of DFT.

UNIT-3: IMPLEMENTATION OF DISCRETE-TIME SYSTEMS

8 L

Structures for the realization of Discrete-Time Systems: Structure of FIR filters, direct form, Cascade form, Frequency sampling structures, lattice structures. Structures for the realization of Discrete-Time Systems: Direct form, Signal flow graphs and transposed structures, Cascade form, Parallel form, Lattice and Lattice ladder Structures.

UNIT-4: DESIGN OF FIR FILTERS

10L

Causality and its implications, Characteristics of Practical Frequency selective filters. Design of FIR Filters: Symmetry and Anti-symmetry FIR filters, Designing of FIR linear phase FIR filters using Windows, Designing of FIR linear phase FIR filters using frequency sampling method, Design of optimum Equiripple Linear phase FIR filters, Design of FIR differentiators, Design of Hilbert Transformers, Comparison of Design methods for linear phase FIR filters.

UNIT-5: DESIGN OF IIR FILTERS

8 L

Design of IIR Filters from Analog Filters: Designing of IIR filters by approximation of derivatives, impulse invariance method, IIR filter Design by Bilinear Transformation, Characteristics of commonly used analog filters (Butterworth and Chebyshev filters), Frequency Transformations: Frequency Transformation in the analog domain and in the frequency domain.

Text Books:

1. Proakis, J.G. & Manolakis, D.G., "Digital Signal Processing: Principles Algorithms and Applications", PHI.
2. Oppenheim and Schaffer, Discrete Time Signal Processing, Prentice- Hall India.

Reference Books:

1. Rabiner, L.R. and Gold B., "Theory and applications of DSP", PHI.
2. Thomas J, Cavichhi, "Digital Signal Processing", John Wiley & Sons
3. Roman KUC, Digital Signal Processing, BSP Hyderabad
4. Apte, "Digital Signal Processing", 2nd Edition, John Wiley (India), 2009.
5. Roman Kuc "Introduction to Digital signal Processing" BSP, Hyderabad.

Digital Signal Processing Lab

1. Code Composer Studio (CCS) introduction, aliasing, quantization, data transfers, guitar distortion
2. CCS, sinusoids, wavetables, AM/FM, ring modulators, tremolo
3. Delays, circular buffers, FIR filters, voice scrambler
4. FIR filtering experiments (software lab)
5. Digital audio effects, reverb, multi-delay, guitar strings, flangers, vibrator
6. IIR filtering experiments (software lab)
7. Verify the Symmetry, time shifting and modulating properties of DTFT with a rectangular pulse of length 21.
8. Study the aliasing effect by using a Sinusoidal Signal. Show the plots of continuous time Signal. Sampled Signal and reconstructed signals by using subplot.
9. Study different window functions available in signal processing toolbox and their Controlling parameters.
10. Write a program to plot real, imaginary phase and magnitude of exponential function.
11. Verify the properties of Discrete Fourier Transform (DFT).
12. Write a program to find the convolution of two sequences.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Analog Integrated Circuits	Course Code: FA4220		
Credit: 4.5	L	T	P
	3	1	2
Year: 2nd	Semester: IV		

UNIT 1: Introduction to Operational Amplifier

8 L

Ideal and practical op-amps, Modes of operation- inverting, non-inverting IC-741 op-amp and its features, CMRR, Slew Rate, PSRR Basic op-amp applications: Summer, Differential, Integrator, Differentiator and Voltage follower, Practical Differentiator and Integrator, Op-amp characteristics (DC & AC) .

UNIT 2: Operational Amplifier Analysis

8 L

Operational amplifier internal circuit, Differential amplifier analysis, Transfer characteristics, low frequency small signal analysis of differential amplifier, Circuit for improving CMRR, Current mirrors, Current repeaters, Input resistance, Active load, Level translator with output stage, Multipliers: Two & Four quadrant (Gilbert Cell).

UNIT 3: Operational Amplifier Applications

10 L

Instrumentation amplifier, V to I and I to V converters, Op-amp circuits using diode, Sample and hold circuit, Log and Anti-log amplifier, OTA. Non-linear Application of Operational Amplifier: Comparators and its applications, Schmitt Trigger Waveform generators: Square wave (Astable Multivibrator), Monostable Multivibrator, Triangular wave.

UNIT 4: Active Filters

8 L

Low pass and High Pass Active Filters (First order and Second order), Band Pass Filters (Narrow Band & Wide Band), Band Rejected Filter, State Variable Filter, Filter Transformation, Active Filter using OTA.

UNIT 5: Timers, Converters and PLL

10 L

Introduction of IC- 555 Timer: Functional diagram and operations (Monostable & Astable), Applications of IC-555 timer (in Monostable and Astable Mode): Linear ramp Generator, Frequency divider, PWM, FSK Generator and Detector. Integrated Circuit Applications: PLL and its applications, A-D and D-A Converters, 723 General Purpose Regulators.

Text Books:

1. D.Roy Choudhry, Shail Jain, "Linear Integrated Circuits", New Age International Pvt. Ltd., 2000
2. Ramakant A. Gayakwad, 'OPAMP and Linear IC's', Prentice Hall / Pearson Education, 1994.
3. Sergio Franco, 'Design with operational amplifiers and analog integrated circuits', McGraw-Hill, 1997.

Reference Books:

1. Gray and Meyer, 'Analysis and Design of Analog Integrated Circuits', Wiley International, 1995.
2. Millman J. and Halkias C.C. 'Integrated Electronics', McGraw-Hill, 1972
3. William D.Stanely, 'Operational Amplifiers with Linear Integrated Circuits'. Pearson Education, 2004.

Analog Integrated Circuits Lab

1. To study OP-AMP as adder and subtractor circuits(IC- 741).
2. To study clipping circuits using OP-AMP(IC-741).
3. To study clamping circuits using OP-AMP(IC-741).
4. To study OP-AMP as Schmitt trigger(IC-741).
5. To study an instrumentation amplifier using OPAMP(IC-741).
6. Study of current to voltage and voltage to current converter using OP-AMP(IC-741).
7. To study Astable multivibrator circuit using timer IC-555.
8. To study monostable multivibrator circuit using timer IC-555.
9. To study Voltage Controlled Oscillator using timer IC-555.
10. To study Frequency divider using IC-555.
11. To design 2nd order low pass butterworth filter.
12. To design 2nd order high pass butterworth filter.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Principles of Antenna & Wave Propagation	Course Code: FA4010						
Credit: 3.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 2 nd	Semester: IV						

UNIT 1: FIELD RADIATIONS & ANTENNA PARAMETERS 10L

Radiation: Review of electromagnetic fields, Displacement current, Maxwell's equations in free space, plane wave & uniform plane wave in free space. Electromagnetic radiations, Physical concept of radiation, Retarded potential, monopole and a half wave dipole.

UNIT 2: PARAMETER MEASUREMENTS 10 L

Antenna Parameters : Introduction, Isotropic radiators, Radiation pattern, Gain, Directive gain, Directivity, Reciprocity theorem & its applications, effective aperture, radiation resistance, antenna beam width, antenna bandwidth, antenna beam efficiency, antenna beam area or beam solid angle. Antenna measurement: Measurements of antenna efficiency, Measurement of noise figure and noise temperature of an antenna polarization measurement.

UNIT 3: ANTENNA ARRAYS 8 L

Antenna Arrays: Introduction, various forms of antenna arrays, arrays of point sources, non- isotropic but similar point sources, multiplication of patterns, arrays of n-isotropic sources of equal amplitude and spacing (Broad-side & End-fire array cases), array factor, directivity and beam width, array of n-isotropic sources of equal amplitude and spacing end-fire array with increased directivity, scanning arrays, Dolph-Tchebysceff arrays, tapering of arrays, binomial arrays, continuous arrays, rectangular arrays, superdirective arrays.

UNIT 4: PRACTICAL ANTENNAS 8 L

Practical Antennas: Aperture Antennas, loop antennas, slot radiators, scanning antennas, signal processing antennas, travelling wave antennas, Smart Antennas. long wire antenna, V-antenna, Rhombic antenna, Folded dipole antenna, Yagi-Uda antenna, and helical antenna, slot antenna, microstrip or patch antennas, and turnstile antenna, frequency independent antennas, and microwave antennas.

UNIT 5: FREE SPACE WAVE PROPAGATION 6 L

Wave Propagation: Introduction, structure of atmosphere, basic idea of ground wave, surface wave, and space wave propagation, tropospheric propagation and duct propagation.

Text Books:

1. Krauss J D, "Antennas", 4th edition, McGraw - Hill Inc., New York (1991).

Reference Books:

1. Prasad K D, "Antenna and Wave Propagation", 3rd edition, Satya Prakashan, New Delhi (1996).
2. Stutzman W L, Thiele G A, "Antenna Theory and Design", 2nd Ed., Wiley (1997)

Credit: 3.5	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 2 nd	Semester: IV						

UNIT-I Memory Organization 8L

history of computers, Introduction to Microprocessor, Tristate devices, buffers, encoder, decoder, latches, Internal memory, semiconductor main memory, cache memory, DRAM organization, associate memory organization, Magnetic disk, CDRom, magnetic tape, memory management, memory hierarchy, partitioning, paging, virtual memory.

UNIT – II Computer Arithmetic & Processor Organization 7L

Von Neumann Machine, computer components, functions, bus inter connection, ALU, integer arithmetic, addition, subtraction, multiplication and division, floating point arithmetic, Machine Instruction set, types of operands, types of operations, addressing modes, instruction formats, processor organization.

UNIT-III 8085 Microprocessor & Control Design 10L

8085 Microprocessor Organization, assembly language programming of 8085, Addressing Modes, 8085 Instruction Set, 8085 interrupts, processor control unit, operation, micro-operations, hardwired control, micro program control, horizontal and vertical micro instructions, micro instruction sequencing and execution, nanoprogramming, Applications of Microprogramming.

UNIT-IV I/O Peripheral Interfacing 8L

Memory interfacing, I/O interfacing Devices- 8255A PPI, 8253/8254 Timer, 8259A PIT, 8237 DMA Controller, and Serial I/O Concepts 8251A USART. Interfacing of above chips with 8085, Programming them In Deferent Modes.

UNIT - V 8086 Microprocessor 7L

Architecture of 8086, block diagram, register set, flags, Queuing, concept of segmentation, Pin description, operating modes, addressing modes.

Text Books:

1. “Microprocessor Architecture, Programming, and Applications with the 8085” Ramesh S. Gaonkar, Penram International
2. “Computer Organization and Architecture” William Stalling, 4th Edition, PHI.
3. “Microprocessors and Interfacing: Programming and Hardware”, Douglas V. Hall, Tata McGraw Hill Edition.

Reference books:

1. “Computer Architecture and Organization” Hayes, MH.
2. “Computer System Architecture”, M. Morris Mano, Prentice-Hall of India, Pvt. Ltd., Third edition.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Probability Theory, Random Variable and Stochastic Process	Course Code: JA4010						
Credit: 3.5	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 2nd	Semester: IV						

UNIT 1:

Theory of Probability & Concept of Random Variable

Axioms of probability: set theory, probability space, conditional, probability. Introduction, distribution and density functions, specific random variables, conditional distributions.

UNIT 2 :

Multiple Random Variables

Bi-variate distributions, one function of two random variables, two functions of two random variables, joint moments, joint characteristic functions, conditional distributions Multiple random variables, sequences of random variables

UNIT 3:

Concept of Stochastic Processes & Random Walks and Other Applications

Definition, systems with stochastic inputs, power spectrum, discrete-time processes. Random walks, Poisson points and shot noise, cyclo-stationary Processes, band-limited processes and sampling theory, deterministic signals in noise.

UNIT 4:

Spectral Representation and Estimation & Mean Square Estimation

Factorization and innovations, finite-order systems and state variables, spectral representation of random processes, ergodicity, spectrum estimation. Prediction, filtering and prediction, Kalman filters. Entropy: Basic concepts, random variables and stochastic processes, MEM.

UNIT 5:

Markov Chain & Queuing Theory

Introduction, higher transition probabilities and the Chapman-Kolmogorov equation, classification of states, stationary distributions and limiting probabilities, transient states and absorption probabilities, branching processes. Markov processes.

Characteristics of Queuing Theory, Queuing Models, Birth & Death Process, Little's Theorem.

Text Books:

1. Probability, Random Variables and Stochastic Processes/A. Papoulis & S. U. Pillai / 4th ed./TMH

Reference Books:

1. Probability, Random Variables & Random Signal Principles/Peyton Z. Peebles, Jr. / TMH
2. Probability & Queuing Theory, R. H. Chitale, Technical Publication Pune

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: VLSI Technology	Course Code: FA4030		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: IV		

UNIT 1: CRYSTAL GROWTH AND WAFER PREPARATION

8 L

Crystal Growth: MGS, EGS, Czochralski crystal Growing: Crystal structure, crystal growing theory, CZ crystal puller, Silicon shaping, Wafer Preparation, processing considerations: chemical cleaning and gettering treatment
Epitaxy: Epitaxy and its concept, Growth kinetics of epitaxy, Vapor Phase Epitaxy, Sputtering, MBE, epitaxial evaluation.

UNIT 2: OXIDATION AND DIFFUSION

10 L

Oxidation: Growth mechanism and kinetics, Silicon oxidation model, Oxidation Techniques: Dry Oxidation and wet oxidation, Plasma Oxidation, High pressure Oxidation, Oxide Properties and Oxidation induced defects.
Diffusion Process: Diffusion models of solid, Fick's theory of diffusion, Solution of Fick's law, Ion implantation-Scattering phenomenon, range theory, channeling, implantation damage, Annealing

UNIT 3: LITHOGRAPHY AND ETCHING

8 L

Lithography: Photolithography, E-beam lithography, X-ray Lithography Etching: Dry and wet etching, Reactive Plasma Etching: Plasma Properties, Feature Size control and anisotropic etching: Pattern transfer, Ion enhanced and ion induced etching, Reactive ion etching and its damages.

UNIT 4: METALLIZATION AND VLSI PROCESS INTEGRATION

8 L

Metallization: Applications and choices, physical vapor deposition, patterning, problem areas VLSI Process Integration: Bipolar IC fabrication Process Sequence, MOS IC fabrication Process Sequence, CMOS IC fabrication Process Sequence

UNIT 5: PACKAGING AND YIELD LOSS

8 L

Assembly Technique and Packaging: Package types, packaging design consideration, VLSI assembly technologies. Yield and Reliability: Yield loss in VLSI, yield loss modelling, reliability requirements, accelerated testing: temperature, humidity, voltage and current

Text Books:

1. S.M. Sze (Ed.) "VLSI Technology" M Hill. 1988

Reference Books:

1. S.K. Ghandhi, "VLSI Fabrication Principles", Jhon Wiley

2. S.A. Campbell "The Science and Engineering of Microelectronic Fabrication", Oxford University Press

**Course Structure & Syllabus of
B.Tech – Electronics & Communication Engineering
Applicable for 2013-2017 Batch**

Course Title: Minor Project of CAD Lab	Course Code: FA4110		
Credit: 1	L 0	T 0	P 2
Year: 2nd	Semester: IV		

Engineering students use this space for computer-aided design, modeling, parametric analysis, and prototyping (Hardware) which facilitates them to work in team environment on engineering design projects as a part of various courses they studied so far.

Course Title: Value Addition Training	Course Code: FA4310		
Credit: 1	L 0	T 0	P 2
Year: 2nd	Semester: IV		

COMPOTIA A+ 220-801 covers the fundamentals of computer technology, installation and configuration of PCs, laptops and related hardware, and basic networking.

COMPOTIA A+ 220-802 covers the skills required to install and configure PC operating systems, as well as configuring common features (e.g. network connectivity and email) for mobile operating systems Android and Apple iOS.

Course Title: Industrial Tour	Course Code: FA4410		
Credit: 1	L 0	T 0	P 2
Year: 2nd	Semester: IV		

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Principles of Management	Course Code: HA5010						
Credit: 2	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">2</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	2	0	0
L	T	P					
2	0	0					
Year: 3 rd	Semester: V						

UNIT – I

5L

Overview of management: Definition of management, need for management, role of managers, Management as science and art, evolution of management thought, contribution of Taylor and Fayol, Types of business organizations, Levels of management

UNIT – II

9L

Planning: Definition of planning, steps involved in planning, types of planning, objectives, process of managing by objectives, Strategy, types of strategies, Policy, types of policies, Decision making, types of decision making process.

UNIT – III

10L

Organizing: Nature, purpose and structure of organization, formal and informal organization, Departmentation, its importance, basis of departmentation, Line and staff authority, Centralization and decentralization, Authority and responsibility, delegation of authority
Selection and recruitment, orientation, appraisal, HRD.

UNIT – IV

8L

Directing: Creativity and innovation, Motivation, hierarchy of needs, motivation theories, Leadership – definition, elements, styles, leadership theories
Organization culture, elements and types of culture, managing cultural diversity.

UNIT – V

8L

Controlling: System and process of controlling, requirements of effective control, Types of control, cost control, purchase control, maintenance control, quality control, planning operations
Globalization and liberalization.

Reference Books:

3. P. C. Tripathy and P. N. Reddy, " Principles and Practices of Management”, Tata McGraw Hill, 1999
4. Joseph L. Massie, “Essentials of Management”, Prentice Hall of India, 2003.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Principles of Communication Engineering	Course Code: FA5210		
Credit: 4.5	L	T	P
	3	1	2
Year: 3rd	Semester: V		

UNIT 1: Introduction

10 L

Communication system, Analog and Digital Messages, channel bandwidth, redundancy, a periodic representation of Fourier Integral transforms of some useful signals, modulation and demodulation. Signal Transmission through a Linear System, Ideal and Practical Filters, Signal Distortion over a Communication Channel, Signal Energy and Energy Spectral Density, Signal Power and Power Spectral Density, Types of noise in Communication systems

UNIT 2: Amplitude Modulation

12 L

Baseband and carrier communication, Amplitude modulation-DSB, Amplitude Modulation (AM) Quadrature Amplitude Modulation (QAM), Amplitude Modulation: Single Sideband (SSB), Amplitude Modulation: Vestigial Sideband (VSB), Carrier Acquisition, TRF & Super heterodyne AM Receiver, Receiver characteristics, Behavior of Baseband Systems, Amplitude-Modulated Systems in presence of noise

UNIT3: Angle Modulation

8 L

Concept of Instantaneous Frequency, Bandwidth of Angle-Modulated Wave, Generation of FM Waves, Demodulation of FM using PLL, Costas Loop, Interference in Angle-Modulated Systems, FM Receiver, Super heterodyne FM Receiver Behavior of Frequency Modulated Systems in presence of noise, Optimum Pre emphasis-De-emphasis System

UNIT 3: Analog Pulse Modulation

8 L

Sampling Theorem for Low pass and Band pass signals, Aliasing. Sampling Techniques: principle, generation, demodulation, spectrum. PAM, PWM, PPM – generation and detection, Behavior of Pulse Modulated Systems in presence of noise

UNIT 5: Concepts of PCM & Digital Transmission

6 L

Quantization, Quantization error, non-uniform quantizing, encoding, Introduction to the concept of Pulse-Code Modulation, A Digital Communication System, Scrambling, Regenerative Repeater, Detection-Error Probability, M-ary Communication, Digital Carrier Systems, Multiplexing techniques

Text Books:

1. Wayne Tomasi, Electronic Communication Systems, Pearson Education 3rd Edition, 2001.
2. B.P. Lathi, Modern Analog and Digital Communication systems, Third edition.

3. William Stanley, Electronic Communication: Principles & Systems, Cenga

Communication Engineering Lab

1. To generate amplitude modulated wave and determine the percentage modulation and Demodulate the modulated wave using envelope detector.
2. To generate AM-Double Side Band Suppressed Carrier (DSB-SC) signal.
3. To generate the SSB modulated wave.
4. To generate frequency modulated signal and determine the modulation index and bandwidth for various values of amplitude and frequency of modulating signal and to demodulate a Frequency Modulated signal using FM detector.
5. To observe the effects of pre-emphasis on given input signal and to observe the effects of De-emphasis on given input signal.
6. To generate the Pulse Amplitude modulated and demodulated signals.
7. To generate PWM and PPM.
8. To construct the frequency division multiplexing and demultiplexing circuit and to verify its operation.
9. To design and obtain the characteristics of a mixer circuit.
10. To study about detection of AM demodulator (or) Synchronous Demodulator
11. To study phase lock loop and its capture range, lock range and free running VCO.
12. To study the AGC Characteristics

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Microwave Engineering	Course Code: FA5221						
Credit: 4.5	<table style="margin: auto; border: none;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	1	2

Year: 3 rd	Semester: V						

UNIT 1: TWO PORT RF NETWORKS-CIRCUIT REPRESENTATION

8 L

Low frequency parameters-impedance, admittance, hybrid and ABCD. High frequency parameters-Formulation of S parameters, properties of S parameters-Reciprocal and lossless networks, transmission matrix, Introduction to component basics, wire, resistor, capacitor and inductor, applications of RF

UNIT 2. RF TRANSISTOR AMPLIFIER DESIGN AND MATCHING NETWORKS

8L

Amplifier power relation, stability considerations, gain considerations noise figure, impedance matching networks, frequency response, T and Π matching networks, microstripline matching networks.

UNIT 3. MICROWAVE PASSIVE COMPONENTS

8L

Microwave frequency range, significance of microwave frequency range - applications of microwaves. Scattering matrix -Concept of N port scattering matrix representation- Properties of S matrix- S matrix formulation of two-port junction. Microwave junctions - Tee junctions -Magic Tee - Rat race - Corners - bends and twists - Directional couplers - two hole directional couplers- Ferrites - important microwave properties and applications – Termination - Gyrator- Isolator-Circulator - Attenuator - Phase changer – S Matrix for microwave components – Cylindrical cavity resonators.

UNIT 4: MICROWAVE SEMICONDUCTOR DEVICES

12L

Microwave semiconductor devices- operation - characteristics and application of BJTs and FETs -Principles of tunnel diodes - Varactor and Step recovery diodes - Transferred Electron Devices -Gunn diode- Avalanche Transit time devices- IMPATT and TRAPATT devices. Parametric devices -Principles of operation - applications of parametric amplifier .Microwave monolithic integrated circuit (MMIC) - Materials and fabrication techniques, HEMT.

UNIT 5. MICROWAVE TUBES AND MEASUREMENTS

8 L

Microwave tubes- High frequency limitations - Principle of operation of Multicavity Klystron, Reflex Klystron, Traveling Wave Tube, and Magnetron. Microwave measurements: Measurement of power, wavelength, impedance, SWR, attenuation, Q and Phase shift.

Microwave Engineering Lab

1. Gunn Diode Characteristics
2. Reflex Klystron Characteristics
3. Attenuation Measurement
4. VSWR Measurement
5. Waveguide Parameters Measurement
6. Impedance and Frequency Measurement
7. Scattering Parameters of Magic Tee
8. Directional Coupler Characteristics
9. Radiation Pattern of Horn Antenna
10. Characterization of LED
11. Characterization of Laser Diode
12. Measurement of NA for optical fiber cable
13. Measurement of losses for Analog Optical Link

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Advanced Microprocessors & Microcontrollers	Course Code: FA5231		
Credit: 4.5	L 3	T 1	P 2
Year: 3rd	Semester: V		

UNIT-I32-BIT MICROPROCESSOR

8 L

80386 Micro Processors: Review of 8086, Salient features of 80386, Architecture and Signal Description of 80386, Register Organization of 80386, Addressing Modes. Data Types of 80386, Real Address mode of 80386, Protected mode of 80386, Segmentation Paging, Virtual 8086 Mode, Enhanced Instruction set of 80386, the Co-processor 80387.

UNIT-II PENTIUM PROCESSORS

8 L

Salient features of Pentium 4, Instruction Translation for Pentium 4, Instruction Translation Look aside Buffer and Branch Prediction, Rapid Execution Module, Memory Subsystem, Hyper threading Technology Hyper threading in Pentium, Extended Instruction set in Advanced Pentium Processors, Instruction Set.

UNIT-III 8051 MICROCONTROLLER

8 L

Introduction to Microcontrollers: Overview of 8051 microcontroller, Architecture, I/O Ports, Memory organization, addressing modes and instruction set of 8051, programming.8051 Real Time Control: Interrupts, timer/Counter and serial communication, programming Timer Interrupts, programming external hardware interrupts, programming the serial communication interrupts, programming 8051 timers and counters

UNIT IV: AVR MICROCONTROLLER

8 L

The AVR RISC microcontroller architecture: Introduction, AVR Family architecture, Register File, The ALU, Memory access and Instruction execution., I/O memory, EEPROM, I/O ports, Timers, UART, Interrupt Structure

UNIT-V PLC MICROCONTROLLER

8 L

Introduction, Architectural Overview, Memory Organization, Data Memory and Flash Memory, Interrupts and Reset, I/O Ports, Timer, Analog to Digital I/O, I2C Interfacing –UART, PWM and introduction to C-Compilers.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: VLSI Design	Course Code: FA5020		
Credit: 4.5	L	T	P
	3	1	2
Year: 3 rd	Semester: V		

UNIT 1: INTRODUCTION

8 L

VLSI design methodologies, VLSI design flow, Design Hierarchy, Concepts of regularity, modularity and locality, VLSI design styles: full custom, semi-custom, FPGA, Gate array
MOS Transistor: MOS structure, MOS system under external bias, threshold voltage, V-I characteristics, derivation of drain current, channel length modulation, substrate bias effect

UNIT 2 : CMOS INVERTER

8 L

Resistive load inverter, Enhancement/depletion load inverter (circuit diagram, advantages and disadvantages); Static CMOS inverter: Voltage transfer characteristics, calculation of VIL, VIH and VTH, noise margin concepts and their evaluation, power consumption.

UNIT 3 : LOGIC

10 L

Combinational Logic: CMOS logic design, Stick diagram and layout design; CMOS transmission gate logic; Sequential Logic: Timing metric for sequential circuits, Static latches and registers: bi-stability principle, MUX based latches, static SR flip-flops, master-slave edge-triggered register, Dynamic latches and registers: CMOS D-latch, Edge triggered flip flop, Dynamic Transmission-Gate Edge-triggered Registers, C2MOS
Dynamic logic Circuits: Pass transistor; ratioed logic; Dynamic CMOS logic; Domino logic; NORA CMOS logic
BiCMOS: Electrical characteristics, comparison with CMOS, design of basic gates

UNIT 4: MEMORY

10 L

Memory classification, Non-volatile memory: design of NAND and NOR based ROM; DRAM: design (1T, 2T, 3T), read and write operations and operating modes; SRAM: design and operation; Flash Memory: design, data programming and erasing techniques; Peripheral circuitry: address decoder, sense amplifier, voltage references
Memory reliability: Signal to noise ratio; memory yield

UNIT 5: DESIGN FOR TESTABILITY

6 L

Fault types and models; controllability and observability; Design for testability: Ad Hoc testing; structured design for testability, Self test and Built-In self Test (BIST) Techniques.

Text Books:

1. CMOS Digital Integrated Circuits by Sung-Mo Kang, Tata McGraw Hill

Reference Books:

2. Digital Integrated Circuits by Jan M. Rabey, Prentice Hall Publication

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Automatic Control Systems	Course Code: FA5010						
Credit: 3.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 3 rd	Semester: VI						

UNIT 1

8 L

Open Loop And Closed Loop Control Systems: feedback characteristics of control systems, Mathematical Representation of physical systems Electrical, Mechanical, Hydraulic, Thermal systems, Block diagram algebra and signal flow graphs, Mason's gain formula.

UNIT 2

8 L

Time Domain Analysis: Standard Test Signals, Time response of First, Second and Higher order systems, Performance Indices.

Frequency Response Analysis: Correlation between time and frequency response, polar and inverse plots, Nyquist stability criterion, Bode plots. All pass and minimum phase systems, M and N circle

ERROR ANALYSIS: Static and Dynamic Error Coefficients, Effect of adding poles and zeroes to the system, response of P, PI, and PID controllers.

UNIT 3

8 L

Stability Of Control Systems: Concept of stability, Asymptotic and conditional stability, Routh-Hurwitz Criterion, Root Locus technique (Concept and construction), Stability analysis of first order LP,HP, Band Pass filters.

State Variable Analysis: Introduction, State space representation, State modes of linear systems, State equations, transfer matrices, diagonalization solution of state equations, controllability and observability, effect of pole zero cancellation in transfer function.

UNIT 4

8 L

Design through Compensation Techniques: Realization of lag, lead and lag-lead compensators, Design of closed loop control system using root locus and Bode plot Compensation, Robustness.

Artificial Intelligence: Introduction to Fuzzy logic controllers and ANN.

UNIT 5

8 L

Basic Non-Linear Analysis: Linearization, describing function and phase plane methods, stability concepts and Lyapunov functions.

Basics of Digital Control: sampled data control system, zero order hold and signal recovery, pulse transfer function and its realization.

Bilinear Transformation

Text Books:

1. I J Nagrath & M Gopal, Control System Engineering; New Age International publishers.
2. B C Kuo, Automatic Control Systems; John Wiley (India)

**Course Structure & Syllabus of
B.Tech – Electronics & Communication Engineering
Applicable for 2013-2017 Batch**

Course Title: Engineering Economics	Course Code: GC5010		
Credit: 2	L 2	T 0	P 0
Year: 3rd	Semester: VI		

UNIT-I

Time value of money: Simple and compound interest, Time value equivalence, Compound interest factors, Cash flow diagrams, Calculation, Calculation of time –value equivalences. Present worth comparisons, Comparisons of assets with equal, unequal and infinite lives, comparison of deferred investments, Future worth comparison, payback period comparison.

UNIT-II

Use and situations for equivalent annual worth comparison, Comparison of assets of equal and unequal life. Rate of return, Internal rate of return, comparison of IRR with other methods, IRR misconceptions.

UNIT-III

Analysis of public Projects: Benefit/ Cost analysis, quantification of project, cost and benefits, benefit/ cost applications, Cost –effectiveness analysis.

UNIT-IV

Depreciation, computing depreciation charges, after tax economic comparison, Break-even analysis; linear and non-linear models. Product and Process Costing, Standard Costing, cost estimation, Relevant Cost for decision making, Cost control and Cost reduction techniques.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Digital Communication	Course Code: FA6210						
Credit: 4.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	1	2
L	T	P					
3	1	2					
Year: 3rd	Semester: VI						

UNIT 1: Elements of Digital Communication and Information Theory:

8 L

Model of a Digital Communication, System, Probability Theory, Entropy and Information Rate, Conditional Entropy and Redundancy, Source Coding, Fixed and Variable Length Code Words, Source Coding Theorem, Prefix free code and, Kraft Inequality, Shannon-Fano and Huffman Coding.

UNIT 2: Digital Base Band Transmission

8 L

PCM Coding, DM, DPCM, ADCM, Data Transfer Rate, Line Coding and Its Properties, NRZ & RZ Types, Signalling Format For Unipolar, Polar, Bipolar(AMI) & Manchester Coding Matched Filter Receiver, Derivation of Its Impulse Response and Peak Pulse Signal to noise ratio, ISI, Rectangular, sync & Raised cosine pulse comparison

UNIT 3: Digital Modulation Techniques

8 L

Gram-Schmidt Orthogonalization Procedure, Hilbert transform, Types of Digital Modulation, correlation receiver, Waveforms for Amplitude, Frequency and Phase Shift Keying, Method of Generation and Detection of Coherent & Non-Coherent Binary ASK, FSK & PSK & PSD derivation for Coherent & Non-Coherent Binary ASK, FSK & PSK. Differential Phase Shift Keying, bit error rate comparison of Digital modulation techniques

UNIT 4: Advanced Modulation Techniques

8 L

Introduction to M-ary modulation techniques 16 PSK, QPSK, QAM, Continuous phase shift keying, MSK, GMSK. Direct sequence spread spectrum, processing gain Frequency hop Spread spectrum.

UNIT 5: Error Control Coding

8 L

Error Free Communication Over a Noise Channel, Hamming code, Relation Between Minimum Distance and Minimum Distance Error Correcting & detection Capability, Linear Block Codes, Encoding and Syndrome Decoding, Cyclic Codes, Encoder and Decoder For Cyclic Codes, Convolution Coding & Viterbi decoding, introduction to burst error correction codes

Text Books:

1. Haykin, Simon "Communication Systems" John Wiley, 5th Ed., 2010.
2. Singh, R .P. & Sapre, S .D. / "Communication Systems : Analog & Digital" / TMH .
3. Lathi, B .P / "Modern Digital & Analog Communication Systems " / OUP.
4. Simon Haykin / "Digital Communication" / John Wiley.
5. Taub & Schilling / "Principles of Communication Systems " / Tata McGraw-Hill /
6. A.B .Carls on / "Communication Systems " / Tata McGraw-Hill.
7. Prokis J.J / "Digital Communications " / McGraw Hill /
8. Charkrabarti .P. / "Analog Communication Systems " / Dhanpat Rai & Co.

Digital Communication Lab

1. To study sampling and reconstruction of the sampled signal
2. To study Delta Modulation and Adaptive Delta Modulation.
- 3 To study ASK, PSK,FSK, -modulation system.
4. To Study TDM/PCM Transmitter /Receiver.
5. To Study DHSS, FHSS.
6. To Study Error Control Coding using Simulink.
7. To Study different Line Coding Techniques.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Micro-Strip Antenna	Course Code: FA6220		
Credit: 4.5	L	T	P
	3	1	2
Year: 3rd	Semester: VI		

UNIT 1: Introduction

8 L

Introduction to Planer Transmission Line, Discontinuities in Micro-strip line, half wave length, Introduction to Patch Antenna, Types of MSA, Basic Principle, Operation of Patch Antenna , Parameters and Fields of Microstrip Antennas, Fringing Fields, Transformation of rectangular to circular.

UNIT 2: Design Methodology

8 L

Feeding And Impedance Matching Methods For Patch Antennas, Line calculation for MSA, Inset Feed, Fed with a Quarter-Wavelength Transmission Line, Coaxial Cable or Probe Feed, Coupled (Indirect) Feeds, Aperture Feeds, series & parallel fed, Corporate Feeds.

UNIT 3: Trade-Offs and Design Parameters of Microstrip Antennas

8 L

Effect of variation in length, width and height, permittivity, Change of substrate, Effect on Antenna Bandwidth and slotting, "shrinking" of the patch antenna.

UNIT 4: Simulation of Transient Fields under a Microstrip Antenna

8 L

Design of Microstrip Patch, transient pulse response, Simulation Methodology, S11 (return loss) , VSWR, Field Effect on Antenna, Analysis of Patch/Microstrip Antennas, Far and near field radiation Pattern.

UNIT 5: Planar Inverted-F Antennas (PIFAS) and Defective Ground Technique

8L

half-Wavelength Patch, Shorting Pin at the Feed to a Patch Antenna, Planar Inverted F-Antenna (PIFA), Capacitive Loading in PIFA Antennas, PIFAS in the Real World, PIFA Analysis, Defective Ground Structure, parasitic structure and its analysis.

Text Books:

1. Microstrip Antennas: The Analysis and Design of Microstrip Antennas and Arrays, edited by David M. Pozar, Daniel H. Schaubert, IEEE Antennas and Wave Propagation, 2012.
2. Broadband Microstrip Antennas, By Girish Kumar, K. P. Ray, Artech House Inc., 2003.

LABORATORY:

Tutorial on the tools used for characterizing antennas and a discussion on the use of the Numerical Electromagnetics Code (NEC)/HFSS/FEKO software. This software can be used for the analysis and design of antennas and can predict antenna input impedances, patterns, currents, etc... The lab instructor will give a brief lesson on the NEC/HFSS/FEKO software through an interactive example. Finally, each lab station will independently analyze an antenna design presented by the instructor.

Using the same groups as used for the microstrip lab, you will use the lab time and help from your instructor to pick an antenna design for construction. Constraints on the design you choose include:

- It must operate in the frequency range from 100MHz to 1 GHz.
- It must have an azimuthal pattern that has directivity. A simple vertical dipole will not suffice.
- The antenna should consist of a wired structure.

This is negotiable with the instructor but wire structures are more conducive for NEC/HFSS/FEKO analysis. Once you have picked a basic design, you will use the NEC/HFSS/FEKO code to optimize your design based on your physical parameters (wire gauge, feed structure,). You will also need to design a matching network to obtain a VSWR of less than 1.5. When you are satisfied that you antenna will work based on simulation, you will proceed with construction.

Before your scheduled testing time, each group will construct their antenna. If you have difficulty finding parts, contact your instructor for help. The final construction of your antenna should be robust enough to allow it to be handled during testing. You may want to use PVC, wood, or plexiglass forms for physical support. The antenna should be light weight enough to allow it to be mounted to a mast and raised into the air. Use a BNC connector as the feedpoint connector for the antenna.

To characterize your antenna, you need to make the following measurements:

- Input impedance (independent)
- VSWR (independent and with instructor)
- Relative current distribution (independent)
- Azimuthal antenna pattern (with instructor)
- Front-back ratio if directional (with instructor)

You will then compare these measurements with your predicted results (from NEC/HFSS/FEKO) in your final report.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Data Communication Networks	Course Code: FA6010		
Credit: 3.5	L	T	P
	3	1	0
Year: 3rd	Semester: VI		

UNIT 1: INTRODUCTION

8 L

INTRODUCTION: Switching systems, network hardware and software, Layering, design issues for layering, reference models and their comparison, example networks

PHYSICAL LAYER: Transmission media and channel impairments, modulation, multiplexing, digital channels, mobile telephone systems

UNIT 2: DATA LINK LAYER

8 L

DATA LINK LAYER: Design issues, framing, error control, elementary data link protocols and sliding window protocols, HDLC, data link layer in internet.

MEDIUM ACCESS CONTROL: Channel allocation problem, MAC protocols- Aloha, CSMA, collision free protocols, limited contention protocol. Ethernet, IEEE 802.3 standard. Repeaters, bridges, routers and gateways.

UNIT 3: NETWORK LAYER

8 L

NETWORK LAYER: Design issues, VC and datagram subnets, routing algorithms for wired and wireless hosts, congestion prevention policies, load shedding. Connectivity of networks, connectionless internetworking, internetwork routing, fragmentation. IP protocols, IP addressing, OSPF, IPv6.

UNIT 4: TRANSPORT LAYER

8 L

TRANSPORT LAYER: Transport service and primitives, Addressing, connection establishment and release, flow control, buffering, multiplexing and crash recovery. Introduction of UDP. Modeling TCP connection management, TCP congestion control. Performance issues

UNIT 5: HIGHER LAYERS

8 L

DNS name space and DNS server, overview of www, http. Introduction of cryptography, substitution cipher and transposition cipher, DES, cipher methods, public key algorithms. Social issues- privacy, freedom of speech, copy right

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Power Electronics & Devices (<i>Inter Departmental Elective-I</i>)	Course Code: EA5210		
Credit: 4.5	L 3	T 1	P 2
Year: 3 rd	Semester: VI		

UNIT I

Power Semiconductor devices: Power semiconductor devices, their symbols and static characteristics, characteristics and specifications of switches, types of power electronic circuits, thyristor operation, V-I characteristics, two transistor model, method of turn on operation of GTO, MCT and TRIAC.

DC-DC Converter: Principle of step down chopper, step down chopper with R-L load, principle of step up chopper and operation with R-L load, classification of choppers.

UNIT II

Phase controlled converters: Single phase half wave controlled rectifier with resistive and inductive loads, effect of freewheeling diode, single phase fully controlled and half controlled bridge converters.

UNIT III

Fundamentals of Electric Drives: Electric drives and its parts, advantage of electric drives, classification of electric drives, speed-torque conventions and multi-quadrant operations, constant torque and constant power operation, types of load, load torque: components, nature and classification.

UNIT IV

Dynamics of motor load combination, steady state stability of electric drive, transient stability of electric drive, Selection of motor power rating: thermal model of motor for heating and cooling, classes of motor duty, determination of motor power rating for continuous duty, short time duty and intermittent duty, load equalization.

UNIT V

Power Electronic Control of DC & AC Drives: Rectifier control of dc series motor, chopper control of separately excited dc motor and dc series motor, special drives switched reluctance motor, brushless dc motor, servo control.

Recommended Books:

Course Title: Artificial Neural Network & Fuzzy Logic (<i>Inter Departmental Elective-I</i>)	Course Code: EA7010		
Credit: 4.5	L 3	T 1	P 2
Year: 3rd	Semester: VI		

UNIT-I

Neural Networks-1(Introduction & Architecture): Neuron, biological neuron, Artificial Neuron and its model, activation functions, Neural network architecture: Single layer and multilayer feed forward networks, recurrent networks, and various learning techniques.

Unit-II

Back propagation networks Architecture: perceptron model, single layer artificial neural networks, multilayer perceptron model; back propagation algorithm, effects of learning coefficient; factors affecting back propagation training, applications.

UNIT-III

Fuzzy logic-I (Introduction): Basic concept of fuzzy, Fuzzy sets and crisp sets, Fuzzy sets theory and operations, Properties of fuzzy sets. Fuzzy and crisp relation.

UNIT-IV

Fuzzy Membership Functions, Rules: Membership functions, inference in fuzzy logic, fuzzy if then rules, fuzzifications&defuzzifications, fuzzy controller.

UNIT-V

Application of Neural and fuzzy logic: Application of neural network, Neural Network approach in load flow study. Fuzzy logic application in industries.

Text Books:

Course Title: Electrical Machines (<i>Inter Departmental Elective-I</i>)	Course Code: EA32L0		
Credit: 4.5	L 3	T 1	P 2
Year: 3rd	Semester: VI		

UNIT I

Principle of Electro-mechanical Energy Conversion:- Introduction, Flow of Energy in Electromechanical Devices, Generated emf in machines, torque in machines with cylindrical air gap.

UNIT II

D.C. Machines: Construction of DC Machines, Emf and torque equation, armature reaction, commutation, performance characteristics of D.C. generators.

UNIT III

D.C. Machines (contd.): - Performance characteristics of D.C. motors, starting of D.C. motors, 3-point and 4-point starters

UNIT IV

Speed Control of D.C. Motors: Field control, armature control, and voltage control (semiconductor device control method)

UNIT V

Universal Motor, single phase a.c. series compensated motor, stepper motors (working & principal), gear motor, Principal of operation of 2-phase & 3-phase induction motor.

Recommended Books:

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: DATA STRUCTURES	Course Code: DA3210		
Credit: 4.5	L 3	T 1	P 2
Year: 3rd	Semester: VI		

Unit I : Introduction: Concept of data structure, Types of data structures, Character String in C, Recursion, Structure, Pointer, Dynamic Allocation, Algorithms, Algorithm analysis, Complexity of algorithms and Time space trade-off.

Arrays: Introduction, Single and multi-Dimensional Arrays, address calculation, application of arrays, Operations defined: traversal, insertion and deletion.

Stacks: Stacks, Array representation of stack, Applications of stacks, Conversion of Infix to Prefix and Postfix Expressions, Evaluation of postfix expression using stack.

Unit II : Queue: Queue, Array representation and implementation of queues, Circular queues, Operations on Queue: Create Add, Delete, and Full and Empty, De-Queue, Priority queues, Applications of Queues.

Linked Lists: Concept of linked list, Representation and implementation of singly linked list, Circular linked list, doubly linked list, Operations on Linked lists, Concepts of header linked lists, applications of linked lists.

Unit III : Trees: Basic terminologies of trees, Binary tree, Complete Binary tree, Extended Binary tree, Representation of Binary tree, Binary tree traversal, Operations on Binary tree.

Binary Search Tree: Binary Search Tree (BST), Insertion and Deletion in BST, Complexity of Search Algorithm, Path Length, AVL Trees, B-trees.

Unit IV : Graphs: Terminology & Representations, Graphs & Multi-graphs, Directed Graphs, Representations of Graphs, Traversal, Connected Component and Spanning Trees, Minimum Cost Spanning Trees.

Unit V : Searching & Hashing: linear search, binary search, Hash Table, Hash Functions, Collision Resolution Strategies, Hash Table Implementation.

Sorting: Bubble sort, Insertion sort, Selection sort, Quick sort, Merge sort, Heap Sort.

File Handling: Introduction to file handling, Data and Information, File concepts, File organization, files and streams, working with files.

Text Book:

1. Lipschutz, “Data Structures” Schaum’s Outline Series, TMH.
2. A. M. Tenenbaum, Langsam, Moshe J. Augentem, Data Structures using C PHI Pub.

Reference Book:

1. Horowitz and Sahani, “Fundamentals of Data Structures”, Galgotia Publication.
2. Robert Kruse, Data Structures and Program Design in C PHI.
3. Willam J. Collins, Data Structure and the Standard Template library –2003, T.M.H.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Optical Fiber Communication	Course Code: FA7210		
Credit: 4.5	L 3	T 1	P 2
Year: 4th	Semester: VII		

UNIT 1

INTRODUCTION: Demand of Information Age, Block Diagram of Optical fiber Communication System, Technology used in OFC System, Structure and types of Fiber, modes and Configuration, mode theory for circular guide modal equation, modes in optical fiber, linearly polarized modes, attenuation factors, pulse broadening in optical fiber, single mode fiber, mode field diameter, single distortion in single mode fiber, Derivation of material dispersion and waveguide dispersion. Attenuation, Signal Degradation in Optical Waveguides, Pulse Broadening in Graded index fiber Waveguides, Mode Coupling.

UNIT 2

OPTICAL SOURCES:

LED: Visible LED, Infrared LED, LED structure and configuration, Loss mechanism, Application of LED, operating Characteristics materials for Visible LED.

LASER: Principle of LASER Action, Efficiency of LASER Diode, principles and structures, index guided and gains guided lasers, mode separation, quantum well laser, laser modulation.

UNIT 3

OPTICAL DETECTORS:

Optical Absorption in semiconductors, Types of Photo Diodes, Principle of photo detection, working and structures of p-i-n and APD photo detectors, noises in photo detectors, SNR, detector response time effects, comparison of various photo detectors.

UNIT 4

ANALYSIS AND PERFORMANCE OF OPTICAL RECEIVER:

Receiver Sensitivity, Photodiode for optical receiver, Optical Receiver Design, recent receiver circuits, System configuration and power budget.

UNIT 5

OPTICAL NETWORKS:

WDM concepts and principles, passive components, SONET/SDH networks, performance of WDM.

Suggested Books:

1. Optical Fiber Communications – Gerd Keiser, McGraw-Hill International edition, 3rd Edition, 2000.
2. Optical Communication- R. K. Singh, KatsonBooks, 2004.
3. Optical Fiber Communications – John M. Senior, PHI, 2nd Edition, 2002.
4. Fiber Optic Communication Systems – Govind P. Agarwal, John Wiley, 3rd Ed, 2004.
5. Text Book on Optical Fibre Communication & its Applications – S.C.Gupta, PHI, 2005.
6. Fiber Optic Communications – D.K. Mynbaev, S.C. Gupta & Lowell L. Scheiner, Pearson Education, 2005
7. Fiber Optic Communications – Joseph C. Palais, 4th Edition, Pearson Education, 2004

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Wireless Communication	Course Code: FA7010		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VII		

UNIT 1

Services and Technical Challenges: Types of Services, Requirements for the services, Multipath propagation, Spectrum Limitations, Noise and Interference limited systems, Principles of Cellular networks, Multiple Access Schemes.

UNIT 2

Wireless Propagation Channels : Propagation Mechanisms (Qualitative treatment), Propagation effects with mobile radio, Channel Classification, Link calculations, Narrowband and Wideband models, propagation models, Path loss components.

UNIT 3

Wireless Transceivers: Structure of a wireless communication link, Modulation and demodulation – Quadrature/4-Differential Quadrature Phase Shift Keying, Offset-Quadrature Phase Shift Keying, Phase Shift Keying, Binary Frequency Shift Keying, Minimum Shift Keying, Gaussian Minimum Shift Keying, Power spectrum and Error performance in fading channels.

UNIT 4

Signal Processing in Wireless Systems: Principle of Diversity, Macro-diversity, Micro-diversity, Signal Combining Techniques, Transmit diversity, Equalizers- Linear and Decision Feedback equalizers, Review of Channel coding and Speech coding techniques.

UNIT 5

Advanced Transceiver Schemes: Spread Spectrum Systems- Cellular Code Division Multiple Access Systems- Principle, Power control, Effects of multipath propagation on Code Division Multiple Access, application of Orthogonal Frequency Division Multiplexing in GSM, IS-95, IS-2000 and Third Generation Wireless Networks and Standards

SUGGESTED BOOKS:

1. Andreas.F. Molisch, “Wireless Communications”, John Wiley – India, 2006.
2. Simon Haykin& Michael Moher, “Modern Wireless Communications”, Pearson Education, 2007.
3. Rappaport. T.S., “Wireless communications”, Pearson Education, 2003.
4. Gordon L. Stuber, “Principles of Mobile Communication”, Springer International Ltd., 2001.
5. Andrea Goldsmith, Wireless Communications, Cambridge University Press, 2007.

**Course Structure & Syllabus of
B.Tech – Electronics & Communication Engineering
Applicable for 2013-2017 Batch**

Course Title: Design of Communication System	Course Code: FA7020		
Credit: 3.5	L	T	P
	3	1	0
Year: 4th	Semester: VII		

UNIT 1:

Network Noise and Inter-Modulation Distortion

Introduction to Radio Communication Systems, Noise sources, noise measures, design of low noise networks, inter-modulation distortions. Frequency selective networks and transformers: Series resonant circuits, parallel resonant circuits with transformers, impedance matching and harmonic filtering using reactive networks.

UNIT 2:

Audio Circuits

General features of audio amplifiers, LM380 audio power amplifier, phono-amplifier, circuits for tone control, audio mixers, graphic equalizers. Wideband amplifiers: Review of high frequency analysis of BJT and FET amplifiers, input compensation, neutralization and feedback techniques for wide banding cascade amplifiers, high frequency amplifiers using MOSFETS.

UNIT 3:

Phase Locked Loop Circuits

Basic PLL operation, transient response of PLL, Linear model of the PLL- 1st order, 2nd order PLL, lock range and capture range, phase detectors, PLL application- tracking filters, angle modulation, frequency demodulation, amplitude demodulation, phase shifters, signal synchronizers, frequency translators PLL IC 565, digital PLL.

UNIT 4:

Frequency Synthesizers

Direct frequency synthesis, frequency synthesis by phase lock, 565 as frequency synthesizer, effect of reference frequency on loop performance variable modulus dividers, down conversion, methods for reducing switching time, multiple loop frequency synthesizer, fractional N loops, direct digital synthesis, synthesizer design.

UNIT 5:

Mixers, Modulators and Demodulator Circuits

Frequency mixers, switching type mixers, diode ring mixers, square law mixers, BJT and FET mixers, review of balanced modulator principle, applications of balanced modulator, modulator/demodulator IC MC 1596, MC 1596 as balanced modulators, amplitude modulators, product detector, mixer, frequency doubler, AM generation and synchronous AM detection using XR-2208.

Text Books:

1. Modern Communication Circuits-Jack Smith, Mc-Graw Hill publication .

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Digital System Design Using Verilog (UG Elective-I)	Course Code: FA7610		
Credit: 4.5	L 3	T 1	P 2
Year: 4 th	Semester: VII		

UNIT 1:

Introduction to Verilog:

ASIC design flow, Introduction to verilog, design methodologies; Language construct and lexical conventions, data types, system task and compiler directives, modules and ports, Gate level modeling

UNIT 2:

Data Flow Modeling:

Modelling at data flow level, Continuous Assignment Structures, Delays and Continuous Assignments, Assignment to Vectors, Operators, Verilog for combinational Circuits, Design of Adder, Subtractor, Decoders, Encoders, Multiplexer, code Converter.

UNIT 3:

Behavioral Modeling:

Behavioral modelling: Structured procedures, procedural assignments, Assignments with Delays, Conditional statements, case, casex and casez statements, Loops: while, for, repeat, forever, sequential and parallel blocks, force-release construct, assign-deassign construct, force and release, Design of Flip flop, Shift register and Counters using Verilog

UNIT 4:

Advance Verilog Topics:

Functions, Tasks, Timing and delays: delay models, path delay modelling, timing checks, user defined primitives, switch level modelling

UNIT 5:

State Machine and Programmable Logic Devices:

State Machine: Moore and mealy state model, Verilog code for moore-type FSM, Specification of Mealy FSM using Verilog, Mealy-type and Moore-type FSM for Serial Adder and verilog code, Programmable logic device: Introduction, Block diagram, macrocell structures and characteristics of PLDs and CPLDs. Architecture and features of FPGAs, FPGA design flow

TextBooks:

1. Verilog HDL by Samir Palnitkar, Sunsoft Press

Reference Books:

1. Fundamental of Digital Logic with Verilog Design; S. Brown & Z. Vransesic, TMH
2. Design through Verilog HDL; T.R. Padmanabhan & B. Bala Tripura Sundari, Wiley Pub. 2007
3. Digital System Design with FPGA and CPLD; Ian Grout, Newnes

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Coding for Reliable Communication (UG Elective-I)	Course Code: FA7620		
Credit: 4.5	L 3	T 1	P 2
Year: 4th	Semester: VII		

UNIT 1:

Information and Channels Capacity

Measure of information – information content of message – average information content of symbol $m \log$ independent sequence – Markov statistical model for information source – Entropy and information rate Markov channel capacity theorem some properties.

UNIT 2:

Source Encoding

Shannon's first fundamental theory – Noiseless coding – source with finite memory Shannon's second fundamental theorem on coding for memory less noise channels Shannon's encoding algorithm.

UNIT 3:

Discrete Communication Channel's

Discrete communication channel's – rate of information transmission over a discrete channels – capacity of discrete memory less channel – discrete channel with memory– discrete channel with continuous noise – discrete channel with discrete noise.

UNIT 4:

Continuous Communication Channels

Continuous channels – Shannon – Hartley Theorem implication – continuous channels with continuous noise – Efficiencies of different communication system.

UNIT 5:

Error Correcting Codes

Galois field, Vector spaces and Matrices – block codes, binary cycle code – multiples Error correcting codes – Majority logic coding – Burst error correcting code – Tow dimensional Codes – ARQ – performance of codes.

Text Books:

1. J. Das, S. K. Mullick, P. K. Chatterjee, Principles of Digital Communication, Wiley Estate limited 1986.

Reference Books:

2. A. J. Viterbi and J.H.K. Omura, Principle of digital communication and coding. McGraw hill

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Industrial Electronics (UG Elective-I)	Course Code: FA7630		
Credit: 4.5	L 3	T 1	P 2
Year: 4 th	Semester: VII		

UNIT 1:

Regulated Supplies and SCR: Switched Mode voltage regulator, Comparison of Linear and Switched Mode Voltage Regulators, Servo Voltage Stabilizer, monolithic voltage regulators Fixed and Adjustable IC Voltage regulators, 3-terminal Voltage regulators, Current boosting .Principles of operation and characteristics of SCR, Triggering of Thyristors, Commutation Techniques of Thyristors, Classes A, B, C, D, E and F, Ratings of SCR.

UNIT 2:

Applications of SCR-I: Static circuit breaker, Protection of SCR, Inverters, Classification, Single Phase inverters, Converters , single phase Half wave and Full wave. Chopper circuits, Principle, methods and Configurations, Diac and Triac, Triggering modes, Firing Circuits, Commutation

UNIT 3:

Applications of SCR-II: Voltage compensator – solid state DC voltage regulation – DC shunt motor – armature control and field control of motor speed – electronic control of DC motor – speed regulator action – full wave motor speed regulation by one SCR.

UNIT 4:

Industrial Timers: Industrial timers -Classification, types, Electronic Timers, Classification, RC and Digital timers, Time base Generators. Electric Welding, Classification, types and methods of Resistance and ARC welding

UNIT 5:

Industrial Heating Applications: High Frequency heating, principle, merits, applications, High frequency Source for Induction heating. Dielectric Heating, principle, material properties, Electrodes and their Coupling to RF generator, Thermal losses and Applications. Ultrasonics, Generation and Applications.

Text Books:

1. Industrial and Power Electronics, G.K. Mithal and Maneesha Gupta, Khanna Publishers, 19th Ed., 2003.

Reference Books:

1. Thyristors and applications, M. Rammurthy, East-West Press, 1977.
2. Industrial electronics and control, S.K. Bhattacharya and S.Chatterjee, Tata McGraw Hill, 1995
3. Frank D. Petruzella, Industrial Electronics, McGraw Hill International Editions, 1996

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Low Power VLSI Design (<i>UG Elective-2</i>)	Course Code: FA8610		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VIII		

UNIT 1:

Introduction:

Need for low power VLSI chips, Sources of power dissipation on Digital Integrated circuits. Emerging Low power approaches. Physics of power dissipation in CMOS devices, Power dissipation in CMOS, low power VLSI design limits.

UNIT 2:

Simulation Power Analysis:

SPICE circuit simulators, gate level logic simulation, capacitive power estimation, static state power, gate level capacitance estimation, architecture level analysis, Monte Carlo simulation. Probabilistic power analysis: Random logic signals, probability & frequency, probabilistic power analysis techniques, signal entropy.

UNIT 3:

Low Power Techniques:

Circuit level: Power consumption in circuits. Flip Flops & Latches design, high capacitance nodes, low power digital cells library Logic level: Gate reorganization, signal gating, logic encoding, state machine encoding, pre-computation logic.

UNIT 4:

Low Power Architecture & Systems:

Power & performance management, switching activity reduction, parallel architecture with voltage reduction, flow graph transformation, low power arithmetic components, low power memory design.

UNIT 5:

Low Power Clock Distribution:

Power dissipation in clock distribution, single driver Vs distributed buffers, Zero skew Vs tolerable skew, chip & package co design of clock network. Algorithm & architectural level methodologies: Introduction, design flow, Algorithmic level analysis & optimization, Architectural level estimation & synthesis.

Text Books:

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Selected Topics in Communication (UG Elective-2)	Course Code: FA8620		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

UNIT 1

Software defined radio; Cognitive radio: Definition, spectrum management, computational intelligence, architecture and radio resource management.

UNIT 2

Review of third generation cellular systems and standards, multicarrier modulation and multiple access techniques; Broadband wireless access, OFDMA and mobile WiMAX.

UNIT 3

Space-time wireless communications, linear diversity techniques, space-time coding; MIMO detection and channel estimation, iterative detection and decoding, MIMO-OFDM; Smart antennas; Ultra wideband communication.

UNIT 4

Advanced physical and MAC layer alternatives for wireless PAN, LAN, MAN and cellular networks; Mobile ad hoc and wireless sensor networks, adaptive link, MAC and network layer, energy efficiency and cross-layer design.

UNIT 5

Wireless capacity and channel state estimation, network capacity, information theory and network architecture, capacity of ad hoc networks; Wireline and wireless cooperation strategies, multi-antenna relaying, cooperative diversity, cooperative physical layer architecture.

Suggested Books:

1. Fette, B., "Cognitive Radio Technology", Elsevier. 2006
2. Mitola III, J., "Cognitive Radio Architecture: The Engineering Foundation of Radio XML", Wiley- Interscience. 2006
3. Giannakis, G.B., Hua, Y., Stoica, P. and Tong, L., "Signal Processing Advances in Wireless and Mobile Communications", Vol.1 and Vol. 2, Prentice- Hall. 2001

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Optimal Control (<i>UG Elective-2</i>)	Course Code: FA8630		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VIII		

UNIT 1

Process Characteristics: Terms and Objectives, Incentives for process Control – design aspects of a Process Control System- Classification of variables.

Process Equation, Process variables, Degrees of freedom. Characteristics of liquid system, gas system, thermal system. Mathematical modelling of processes. Self regulating-Servo and Regulatory, Interacting and Non-Interacting process – Inverse response.

UNIT 2

Process Control Elements: Signal conversion - I/P, P/I Converters, Pneumatic and Electric actuators, Valve Positioner-Control Valve – Characteristics of Control Valves-Types of control valves- Control valve sizing-cavitation and flashing. Dynamics of batch and Continuous process.

UNIT 3

Controller: Basic control actions – Discontinuous control mode, Continuous control mode- Proportional, Single speed floating, Integral and Derivative– Composite control modes – P+I, P+D and P+I+D control modes. Response of controller for different types of test inputs – Integral windup – Auto manual transfer. Selection of control mode for different processes – Typical control schemes for level flow, pressure and temperature.

Controller Tuning: Zeigler and Nichols open and Closed loop methods, Performance indices –Based on evaluation criteria – ISE, IAE, ITAE.

UNIT 4

Introduction to Optimal Control: Statement of optimal control problem – Problem formulation and forms of optimal control – Performance measures for optimal control – Selection of performance measure – Various methods of optimization – Linear programming – Nonlinear programming – Dynamic programming.

UNIT 5

Dynamic Programming: Principle of optimality – Recurrent relation of dynamic programming for optimal control problem – Computational procedure for solving optimal control problems – Characteristics of dynamic programming solution – Hamilton Jacobi Bellman equation – Application to a continuous linear regulator problem.

Text Books:

**Course Structure & Syllabus of
B.Tech – Electronics & Communication Engineering
Applicable for 2013-2017 Batch**

Course Title: PLC, SCADA and Distributed Control System (UG Elective-3)	Course Code: FA86A0		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

UNIT 1

PLC & SCADA Fundamentals – Discrete state Vs continuous state control-Evolution of modern day, PLCs building blocks of PLCs-Communication in PLCs.

UNIT 2

PLC & SCADA Applications-Programming methods- Relay & logic ladder diagrams-Boolean logic-High level languages-Graphical representation- programming examples – Comparative study of industrial PLCs.

UNIT 3

Elements of DCS –Evolution of DCS - Building blocks- Detailed descriptions and functions of field control units- Operator stations and data highways-Redundancy concepts.

UNIT 4

Case studies in DCS-Comparative study of industrial DCS-Reliability calculations -intrinsically safe instrumentation –Case studies

UNIT 5

Communications in DCS - Basics of Computer networks - Special requirements of network used for control - Communication protocols-link access mechanism- Manufactures automation protocols - Field bus and Smart transmitters.

Text Books:

1. Lukcas M.P., Distributed control systems, Van Nostrand Reinhold co., Newyork,1986.
2. Huges T, Programmable Logic Controllers, ISA Press,1994.

Reference Books:

1. Moore, Digital control devices, ISA press, 1986.
2. Tanaenbaum A.S., Computer networks, Prentice Hall, 1998.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Radar and Navigation (UG Elective-3)	Course Code: FA86B0		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VIII		

UNIT 1

Radar Signal Models: Amplitude models, distributed target forms of range equation, radar cross section, statistical description of radar cross section, Swerling model, Clutter, signal to clutter ratio, temporal and spatial correlation of clutter, noise model and signal to noise ratio, frequency models, Doppler shift, simplifies approach to Doppler shift, stop and hop assumption, spatial model, variation with angle, variation with range, projections, multipath, spectral models.

UNIT 2

Radar Wave Forms: Waveform matched filter of moving targets, ambiguity function, ambiguity function of the simple matched pulse filter for the pulse burst, pulse by pulse processing, range ambiguity, Doppler response and ambiguity function of the pulse burst. Introduction to Synthetic Aperture Radar (SAR)

UNIT 3

Detection Fundamentals: Radar detection as hypothesis testing, Neyman-Pearson detection rule, likelihood ratio test, threshold detection of radar signals, non-coherent integration of non fluctuating targets, Albersheim and Shnidaman equations, Binary integration

UNIT 4

Radio Direction Finding: loop direction finder, goniometer, errors in direction finding, RADIO RANGES: LF/MF four course radio ranges, VOR, ground equipment & receiver, VOR errors.

Hyberbolic System of Navigation: LORAN & Decca DME & TECAN

UNIT 5

Aids to Approach and Landing: ILS & GCA & MLS DOPPLER NAVIGATION: Doppler frequency, Doppler radar equipment, CW & FMCW Doppler radar, frequency trackers, Doppler range equation.

Satellite Navigation System: Transit system, NAVSTAR, GPS, basic principles of operation, signal structure of NAVSTAR broadcasts, data message, velocity determination, accuracy of GPS & differential navigation, NAVSTAR receiver.

Suggested Books:

1. Fundamentals of radar signal processing, Mark A Richards, TMH.
2. Elements of Electronics Navigation, N. S. Nagraja, TMH.
3. Radar principles, Peebles Jr. P. Z., Wiley, NY.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Digital System Design using VHDL (UG Elective-3)	Course Code: FA86C0
Credit: 3.5	L T P 3 1 0
Year: 4 th	Semester: VIII

UNIT 1

8 L

Introduction to Hardware Design: Digital System Design Process, Hardware Description Languages, Hardware Simulation, Hardware Synthesis, Levels of Abstraction Basic Terminology: Entity declaration, architecture body, configuration declaration, package declaration and package body Basic Language elements: identifiers, data object, Data types: subtype, scalar, composite and access types, operators, overloading,

UNIT 2

10 L

Behavioral Modeling: Entity declaration, architecture body, process statement, variable assignment, signal assignment. Wait, If, Case, Null, Loop, Exit, Next and Assertion statements. Inertial and transport delays, Simulation deltas, Signal drivers. Data flow and Structural modelling: Concurrent signal assignment, sequential signal assignment, multiple drivers, conditional signal assignment, selected signal assignment, block statements, concurrent assertion statement, component declaration, component instantiation

UNIT 3

8 L

Generics and Configurations: Generics, Why configurations, default configurations, component configurations. Generics in configuration. Generic value specification in architecture, block configurations, architecture configurations. Subprograms and Packages: Subprograms – functions, procedures, declarations. Package declarations, package body, Generate Statements, Type conversions, User defined attributes, predefined attributes

UNIT 4

10L

Design of Networks for Arithmetic Operations: Design of serial adder with accumulator, state graph for control networks design of binary multiplier, multiplication of signed binary numbers, design of binary divider. Digital Design with SM Chart: state machine charts, derivation of SM charts, realization of SM charts, implementation of dice game

UNIT 5

6 L

VHDL Synthesis: Simple gate- concurrent statement, if control flow statement, case control flow statement, simple sequential statements, asynchronous reset, asynchronous preset clear, four bit shifter.

Text books:

1. A VHDL Primer, by J. Bhasker, PH/Pearson, 1999
2. Digital System Design using VHDL by Charles H Roth Jr, Thomson Learning, 02.

Reference books:

2. A VHDL Synthesis Primer, Second Edition, by J. Bhasker, Star Galaxy, 1998

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: CDMA, GSM Systems (UG Elective-4)	Course Code: FA86H0						
Credit: 4.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	1	2
L	T	P					
3	1	2					
Year: 4 th	Semester: VIII						

UNIT 1 **(12L)**
Cellular concept- frequency reuse, channel assignment, hand off, interference, trunking and grade of service, cell splitting, sectoring, microcell concept.

UNIT 2 **(12L)**
Introduction to radio wave propagation-free space propagation model, round reflection (2-ray) model, impulse response model of a multipath channel, parameters of mobile multipath channels, type of small scale fading, fading effect due to multipath time delay spread and Doppler spread, diversity technique for mobile wireless radio system.

UNIT 3 **(12L)**
Multiple access technique for wireless communication-FDMA, TDMA, spread spectrum multiple access-FHMA, CDMA, hybrid spread spectrum technique-space division multiple access- packet radio.

UNIT 4 **(12L)**
GSM-GSM network architecture, GSM channel type, frame structure for GSM,(signal processing in GSM-speech coding, channel coding, interleaving, ciphering, burst formatting, modulation, frequency hopping, demodulation) authentication and security in GSM, GSM call procedures, GSM hand off procedures.

UNIT 5 **(12L)**
CDMA digital cellular standards- Introduction, frequency and channel specification, forward and reverse CDMA channel, CDMA call processing, soft hand off, performance of a CDMA system, comparison of CDMA with GSM, digital cellular standards- DECT, PDC, PHS

Reference Books:

Course Title: Digital Image Processing (UG Elective-4)	Course Code: FA8610		
Credit: 4.5	L 3	T 1	P 2
Year: 4 th	Semester: VIII		

UNIT 1

Introduction: Fundamental steps in DIP, elements of DIP, Simple image model, Sampling & quantization, basic relationships between Pixels, Color image model.

UNIT 2

Image Transforms: One-dimensional & Two-dimensional DFT, Cosine, Sine, Hadamard, Haar, and Slant & KL transforms.

Image Enhancement: Introduction, Point operations, Histogram modeling, spatial operations, Transform operations

UNIT 3

Image Restoration: Introduction, Image observation models, Inverse & Wiener filtering, difference between enhancement & restoration Restoration-spatial filtering, Noise reduction in frequency domain.

UNIT 4

Image Compression: Introduction, Pixel coding, Predictive coding, Transform coding, Inter-frame coding.

UNIT 5

Image Segmentation: Introduction, Spatial feature extraction, Transforms features, Edge detection, Boundary extraction, Segmentation techniques.

Minor Project: submission of 15 pages of MATLAB Program on above.

Suggested Books:

1. Digital Image Processing, Rafael C. Gonzales Richard E Woods, 2ndEd.TMH
2. Pratt “Digital Image Processing” 4thEdition, John Wiley (India)
3. Fundamentals of Digital Image Processing, Anil K Jain.

3	1	2					
Year: 4 th	Semester: VIII						

UNIT 1

Introduction: Introduction to Optical Networks Characteristics of Optical Fiber (Emphasis on Non Linear Characteristics), Timing & Synchronization.

UNIT 2

Components: Couplers, Isolators & Circulators, Multiplexers & Filters, Optical Amplifiers, Tunable Lasers, Switches, Wavelength Converters

UNIT 3

Networks: SONET/SDH- Multiplexing, SONET/ SDH Layers, Frame Structure, Frame Structure, Physical Layer, Elements of a SONET/SDH Infrastructure. ATM - Functions of ATM, Adaptation Layers, Quality of Service, Flow Control, Signaling and Routing. WDM Network Elements, Optical Line Terminals, Optical Line Amplifiers, Optical Add/ Drop Multiplexers, Optical Cross Connects.

UNIT 4

WDM Network Design: Cost Trade-offs, Light path Topology Design, and Routing and wavelength assignment problems, Dimensioning Wavelength Routing Networks, Network Survivability Basic Concepts, Protection in SONET/SDH, Protection in IP networks, Optical Layer Protection, Different Schemes, Interworking between Layers Access Networks, Network Architecture Overview, Enhanced HFC, FTTC.

UNIT 5

Optical Switching: OTDM, Synchronization, Header Processing, Buffering, Burst Switching. Deployment Considerations

Suggested Books:

1. Ramaswami, Rajiv & Sivarajan, Kumar N. / "Optical Networks a Practical perspective"/ Morgan Kaufmann Publishers / 2nd Ed.
2. Black, Uyles / "Optical Networks Third Generation Transport Systems"/ Pearson Educations

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Analog VLSI Design (UG Elective-4)	Course Code: FA86K0						
Credit: 4.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	1	2
L	T	P					
3	1	2					
Year: 4 th	Semester: VIII						

UNIT 1

8 L

Basic MOS Device Physics: MOS IV Characteristics, Second order effects, Short- Channel Effects, MOS Device Models Small Signal & large signal Models of MOS & BJT transistor. Analog MOS Process (Double Poly Process), Digital CMOS Process tailored to Analog IC fabrication, Fabrication of active devices, passive devices and interconnects, Analog Layout Techniques

UNIT 2

8 L

MOS & BJT Transistor Amplifiers: Single transistor Amplifiers stages: Common Emitter, Common base, Common Collector, Common Drain, Common Gate & Common Source Amplifiers Multiple Transistor Amplifier stages: CC-CE, CC-CC, & Darlington configuration, Cascode configuration, Active Cascode. Differential Amplifiers: Differential pair & DC transfer characteristics

UNIT 3

8 L

Current Mirrors, Active Loads & Reference Current Mirrors: Simple current mirror, Cascode current mirrors Widlar current mirror, Wilson Current mirror, etc. Active loads, Voltage & current references. Analysis of Differential Amplifier with active load, supply and temperature independent biasing techniques, Frequency Response.

UNIT 4

10 L

Operational Amplifier: Applications of operational Amplifier, theory and Design; Definition of Performance Characteristics; Design of two stage MOS Operational Amplifier, two stage MOS operational Amplifier with cascodes, MOS Folded-cascode operational amplifiers, Bipolar operational amplifiers. Frequency response & compensation.

UNIT 5

8 L

Nonlinear Analog Circuits: Analysis of four quadrant and variable Transconductance multiplier, Voltage controlled oscillator, Comparators, Analog Buffers, Source Follower, Phase Locked Techniques; Phase Locked Loops (PLL), closed loop analysis of PLL. OTA & Switched Capacitor filters OTA Amplifiers, Switched Capacitor Circuits and Switched Capacitor Filters.

Text books:

1. Paul B Gray and Robert G Meyer, "Analysis and Design of Analog Integrated Circuits". JohnWiley
2. BehzadRazavi, "Principles of data conversion system design", S.Chand and company Ltd, 2000.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Embedded System (UG Elective-4)	Course Code: FA86L0						
Credit: 4.5	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	1	2
L	T	P					
3	1	2					
Year: 4 th	Semester: VIII						

UNIT 1: 6 L

Introduction

Embedded System Overview, Design Challenges, Processor Technology, Design Technology, Embedded design life cycle, hardware and software partitioning and co-design,

UNIT 2: 10 L

Processor Architectures: Harvard V/S Princeton , CISC V/S RISC; microcontrollers memory types; microcontrollers features : clocking, i/o pins, interrupts, timers, peripherals. Software development tools: embedded program development, compiler, cross compiler, linker, assembler, cross assembler, simulator. Out of circuit programming, In system programming, Emulator, In-circuit emulator

UNIT 3: 10L

Microcontrollers:

Role of processor selection in Embedded System (microprocessor vs microcontroller), 8051 microcontroller: architecture, Embedded C programming, instruction set, addressing mode, logical operation, arithmetic operation, interrupt handling, Timing subroutines.

UNIT 4: 12 L

Designing Using Microcontrollers

Music box, Mouse wheel turning, PWM motor control, Aircraft Demonstration, ultra sonic distance measuring, Temperature Sensor, Pressure Sensor, Magnetic Field Sensor

UNIT 5: 7 L

Introduction to RTOS

Task and task states, Task and data, Semaphores, Shared data, Message queues, Mailboxeds and pipes, Timer functions

Text Books:

1. Embedded System Design by Frank Vahid, John Wiley & Sons
2. Embedded Software Primer by David Simon, Pearson
3. Programming and Customizing the 8051 Microcontroller :Predko ; TMH

Reference Books:

1. The 8051 Microcontroller And Embedded Systems Using Assembly And C, 2/E ByMazidi
2. Designing Embedded Hardware: John Catsoulis; Shroff Pub. & Distr. ND.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Signal Condition (UG Elective-4)	Course Code: FA86M0						
Credit: 4.5	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	1	2
L	T	P					
3	1	2					
Year: 4 th	Semester: VIII						

UNIT 1.

Components of Analog Signal Conditioning: Signal level and bias changes, linearization, conversion, filtering and impedance matching, concept of loading. Passive signal conditioners – voltage divider, Wheatstone bridge circuits (Current, Voltage, Balanced and Unbalanced), RC filters, and Active signal conditioners- op-amp based circuits. Standard Signals (Analog).

UNIT 2.

Operational Amplifier: Ideal and practical op-amp, Differential Amplifier-a.c. and d.c. analysis, improving voltage gain using active load etc, current sources, unbalanced op-amp frequency response and stabilizing unbalanced operation, circuit diagram of IC741 and working in detail, a.c. and d.c. characteristics, specifications, measurement of op-amp parameters.

UNIT 3.

Operational Amplifier Circuits in Instrumentation: Voltage follower, inverting and non-inverting Amplifier, Adder, Subtractor, Differential Amplifier, Instrumentation Amplifier, V to I and I to V converter with floating load and grounded load, Integrator, differentiator and compensated differentiator, Precision rectifier-half wave, full wave, absolute value circuits, clipping, clamping circuits, practical clamping circuits, sample and hold circuits, peak detectors, log amplifiers, temperature compensated log amplifier, antilog amplifier, multiplier, divider, comparator, threshold detector, zero crossing detector, window detector, Schmitt trigger, free running multivibrator, Wien-bridge oscillator, Phase shift oscillator, Active filters, Astable, Monostable and Bistable multivibrators, Norton amplifier, Pulse, triangle and Sine wave generator, PLL. Guidelines for analog signal conditioning design, design problems based on these guidelines.

UNIT 4.

Components of Digital Signal Conditioning: Converters – ADC, DAC, V to F (LM331 and 555 timer) and F to V – Types and Structure, conversion, resolution and other characteristics. Characteristics of digital data – digitized value, sampled data system and linearization, Standard signals (Digital). Data acquisition system hardware, Data Logger.

UNIT 5.

Transducer Signal Conditioning Design: Thermal sensor conditioning–design considerations and applications for RTD, Thermistor, thermocouple and solid state temperature sensors. Optical sensor conditioning- photoconductor, photovoltaic, photodiode, phototransistor, and photomultiplier tube, Optical encoder conditioning for linear displacement, linear velocity and angular displacement application. Other Sensors conditioning – Potentiometer, LVDT, strain gauges, piezoelectric transducers and capacitive transducers

Books Recommended:

1. Murty D V S, “Transducers & Instrumentation”, PHI, New Delhi (2000)
2. Sawhney A K, “Electrical and Electronics Measurements and Instrumentation”, Dhanpat Rai and Sons, New Delhi (2000).
3. Kalsi H S, “Electronic Instrumentation “ Tata McGraw Hill, New Delhi, 4thEd. (2001).
4. Patranabis D, “Sensors and Transducers”, PHI, New Delhi (2003).
5. Doebelin Ernest O, “Measurement Systems: Application and Design”, Tata McGraw Hill, New Delhi (2004).

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Virtual Instrumentation (UG Elective-4)	Course Code: FA86N0		
Credit: 4.5	L 3	T 1	P 2
Year: 4 th	Semester: VIII		

UNIT 1:

Virtual Instrumentation: Historical perspective, advantages, blocks diagram and architecture of a virtual instrument, data-flow techniques, graphical programming in data flow, comparison with conventional programming. Development of Virtual Instrument using GUI, Real-time systems, Embedded Controller, OPC, HMI / SCADA software, Active X programming.

UNIT 2:

VI programming techniques: VIS and sub-VIS, loops and charts, arrays, clusters and graphs, case and sequence structures, formula nodes, local and global variables, string and file I/O, Instrument Drivers, Publishing measurement data in the web.

UNIT 3:

Data acquisition basics: Introduction to data acquisition on PC, Sampling fundamentals, Input/Output techniques and buses. ADC, DAC, Digital I/O, counters and timers, DMA, Software and hardware installation, Calibration, Resolution, Data acquisition interface requirements.

UNIT 4:

Chassis requirements. Common Instrument Interfaces: Current loop, RS 232C/ RS485, GPIB. Bus Interfaces: USB, PCMCIA, VXI, SCSI, PCI, PXI, Firewire. PXI system controllers, Ethernet control of PXI. Networking basics for office & Industrial applications, VISA and IVI.

UNIT 5:

VI toolsets, Distributed I/O modules. Application of Virtual Instrumentation: Instrument Control, Development of process database management system, Simulation of systems using VI, Development of Control system, Industrial Communication, Image acquisition and processing, Motion control.

TextBooks:

1. Gary Johnson, Lab VIEW Graphical Programming, Second edition, McGraw Hill, Newyork, 1997.
2. Lisa K. wells & Jeffrey Travis, Lab VIEW for everyone, Prentice Hall, New Jersey, 1997.

Reference Books:

1. Kevin James, PC Interfacing and Data Acquisition: Techniques for Measurement, Instrumentation and Control, Newnes, 2000.

Course Structure & Syllabus of B.Tech – Electronics & Communication Engineering Applicable for 2013-2017 Batch

Course Title: Bio-Medical Instrumentation (UG Elective-4)	Course Code: FA8600						
Credit: 4.5	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	1	2
L	T	P					
3	1	2					
Year: 4 th	Semester: VIII						

UNIT 1. 10 L
Anatomy and Physiology: Elementary ideas of cell structure, heart and circulatory system, control nervous system, Musculo-skeletal system, Respiratory system Body temperature and reproduction system.

UNIT 2. 2 L
Classification of Biomedical Equipment: Diagnostic, therapeutic and clinical laboratory equipment

UNIT 3. 14 L
Bioelectric Signals And Their Recording: Bioelectric signals (ECG, EMG, ECG, EOG & ERG) and their characteristics, Bio-electrodes, electrodes tissue interface, contact impedance, effects of high contact impedance, types of electrodes, electrodes for ECG, EEG and EMG.

UNIT 4. 12 L
Transducers For Biomedical Application: Resistive transducers - Muscle force and Stress (Strain gage), Spirometry (Potentiont) humidity, (Gamstrers), Respiration (Thermistor); Inductive Transducers - Flow measurements, muscle movement (LVDT) Capacitive Transducers - Heart sound measurement, Pulse pick up Photoelectric Transducers - Pulse transducers, Blood pressure, oxygen Analyses Piezoelectric Transducers - Pulse pickup, ultrasonic blood flow meter; Chemical Transducer - Ag-Agfallas (Electrodes, PH electrode)

UNIT 5. 8 L
Bioldectric Signal Recording Machines: Physiological pre-amplifier and specialized amplifiers, ECG lead systems details of ECG, EMG, and EEG machines

Recommended Books:

1. Medical Instrumentation; by John. G. Webster –John Wiley
2. Principles of Applied Biomedical Instrumentation; by Goddes& Baker – John Wiley
3. Biomedical Instrumentation & Measurement; by Carr & Brown-Pearson
4. Biomedical Instrument; by Cromwell-Prentice Hall of India, New Delhi
5. Hand book of Medical instruments; by R.S. Khandpur –TMH, New Delhi
6. Medical Electronics and Instrumentation; by Sanjay Guha – University Publication
7. Introduction to Biomedical electronics; by Edwand J. Bukstein –sane and Co. Inc.USA

**Course Structure & Syllabus of
B.Tech – Electronics & Communication Engineering
Applicable for 2013-2017 Batch**

Course Title: Spread Spectrum Systems	Course Code: FA8010		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

UNIT 1

Introduction: Introduction to spread spectrum, spread spectrum techniques, Direct sequence system, frequency hopping systems, pulse FM(chirp) system, hybrid systems

UNIT 2

Coding for Communication and Ranging: Property of codes for spread spectrum, Autocorrelation and cross correlation of codes, composite codes, code selection and signal spectra, error detection and correlation codes.

UNIT 3

Modulation and Demodulation: – Balance modulator, quadric-phase modulator, frequency synthesis for spread spectrum modulation, in line and heterodyne correlation, base band recovery, phase lock loop, COSTAS loop, FM feedback, PDM and FH demodulators.

UNIT 4

Need for Synchronization: types of synchronizers, RF link- Noise figure, co-channel users, dynamic range and AGC, propagation medium, overall transmitter and receiver design.

UNIT 5

Test and Evaluation of Spread Spectrum System: selectivity, sensitivity, jamming margin, synch acquisition, processing gain. Transmitter measurements.

Suggested Books:

1. R. C. Dixon, "Spread Spectrum Systems with Commercial Application", John Wiley, 3rd Ed.
2. H. Taube and D. L. Schilling, "Principles of Communication Systems", Tata McGraw Hill, 2nd Ed. Reprint 2007.

Second Year	III	24.5	50.5
	IV	26	
Third Year	V	23	47.5
	VI	24.5	
Fourth Year	VII	24.5	45.5
	VIII	21	
Total			188.5

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

A. Evaluation Scheme for the following Courses will be as under:

Course	Evaluation Scheme (%)				
	Attendance	Test-1	Test-2	Final Test	Total
Aptitude Building-1	10	30	30	30	100
Aptitude Building-2	10	30	30	30	100
Value Addition Training	10	30	30	30	100
Soft Skills	10	30	30	30	100

B. Evaluation Scheme for Project will be as under:

Course	Evaluation Scheme (%)				
	Synopsis	Presentation	Report	Viva-Voce	Total
Project Phase-I	10	15	25	50	100
Project Phase-II					
Project Phase-III					

Project Phase-I & II will be evaluated by the Committee comprising of the following:

1. Head of the Department – Chairman
2. Teacher In-charge – Member
3. One nominee appointed by Director (Academic) – Member

Project Phase-III will be evaluated by the Committee comprising of the following:

1. Head of the Department – Chairman
2. Teacher In-charge – Member
3. One nominee appointed by Director (Academic) – Member
4. One nominee appointed by Vice Chancellor – Member

C. Evaluation Scheme for Industrial Training will be as under:

Course	Evaluation Scheme (%)			
	Training Report	Presentation	Monitoring	Total
Industrial Training	25	50	25	100

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch Detailed Syllabus

Course Title: Engineering Maths-I	Course Code: MAT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT I: Matrices

8L

Elementary row and column transformation, rank of matrix, linear dependence, consistency of linear system of equations, Eigen values and Eigen vectors, Cayley-Hamilton theorem.

UNIT II: Differential Calculus

8L

Functions, Limits, Continuity, Differentiability, Leibnitz theorem, Partial differentiation, Euler's theorem, Expansion of functions of several variables, Extrema of functions of several variables, Lagrange's method of multipliers.

UNIT III: Infinite Series

6L

Introduction, sequences, series, convergence, series of positive terms, comparison test, Integral test, D'Alembert's Ratio test, Raabe's test, Cauchy's root test, Alternating series: Leibnitz rule, power series.

UNIT IV: Multiple Integrals

8L

Beta and Gamma functions, Double and Triple integrals, change of order of integration, change of variables, Dirichlet integral and its applications.

UNIT V: Vector Calculus

8L

Point functions, Gradient, Divergence and curl of a vector and their physical interpretation, line integral, surface integral, volume integral, Green's Theorem, Stoke's theorem, Gauss Divergence theorem.

4. G. Prasad: Differential & Integral calculus, Pothishala publication, Allahabad.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Professional Communication	Course Code: HMT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

OBJECTIVES:

- 1) To strengthen the Professional Communication skills of upcoming professionals.
- 2) To make them aware about the new forms and trends of business and technical writings.
- 3) To develop the students' interpersonal skills in order to ensure his / her optimum performance as an employee.
- 4) To prepare students for facing the challenges of their professional lives in an increasingly globalized world.

Unit –I Professional Communication

8 Hours

1. Professional Communication: Interpretation, Process, Forms, Barriers and Overcoming Barriers.
2. Types of Communication-Verbal, Non-Verbal, Oral, Written, Formal, Informal.
3. Communication Levels (Intra personal, Interpersonal, Group, Public communication) and Communication Flow (Downward, Upward, Lateral and Diagonal flow).
4. Technical Writing-Meaning, Types and process of preparing a technical document. Acronyms, Jargons.
5. Understanding and Practice of Paragraph writing-Principles of paragraph writing (unity, coherence and logical development of the ideas)
6. Communication: Impact of internet on communication, communicating through computers.

Unit-II Business Communication

10 Hours

1. Business communication – Meaning, Type and Format.
2. Intra-office communication – Types (Face to Face communication, Telephonic conversation, Letters, Memorandum, E-mails, Notice, Memo, Agenda, Minutes.), advantages and disadvantages. various types of intra-office communication
3. Inter-office communication –Face to Face communication, Telephonic Communication-mails, Letters (Sales, Credit, Enquiry, Quotation, Order, Complaint and Adjustment Letter), advantages and disadvantages of various types of inter-office communication.
4. Job-Application Letter and Resume.

Unit-III Technical Proposal and Report

A. Technical Proposal –Types, Format, Preparation of Proposal .

5 Hours

- **For B.Tech students-**
Technical Proposal to organize a Technical Training Program, to develop new range of products, establish new laboratory, or start a new venture.
- **For B.Pharma students-**
Technical proposal to establish a new laboratory, to create new drug-composition, or to visit a super specialty Hospital.
- **For B.Arch students-**
Technical proposal for an archeological site visit, or to construct new buildings.
- **For MCA students-**
Technical proposal to develop new software, or, to organize an induction program for the new entrants.
- **For MBA students-**
Proposal for establishment of a new department, for a new administrative system, or for new HR policies.

B. Technical Report –Types, Format, Preparation of Report.

5 Hours

- **For B.Tech students-**

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Technical Report describing new machinery, a report on the sudden break-down in production unit, Annual Financial Report and market survey report for formulating new market strategy.

- **For B.Pharma students-**

Technical Report based on the site-inspection of a drug manufacturing unit, Survey report on health awareness and self-medication.

- **For B.Arch students-**

Technical Reports based on a Site Inspection for geographical and geological aspects of a particular location. A report on the archeological survey of a monument.

- **For MCA students-**

Technical Report based on function of new technology (software or hardware), Technical Reports on Client's need for a Payroll management system/ Hospital management system.

- **For MBA students-**

Preparation of Annual Report of the organization, preparation of departmental reports and report based on the study of a successful organization.

Unit-IV Soft-Skills

8 Hours

1. Non-Verbal Communication -Kinesics, Oculistics, Vocalics, Proxemics, Chronemics.
2. Interpersonal Skills, Social-Skills
3. Personality-Meaning and Types, Attitude
4. Self-Management, Emotional Quotient, Time management, and Stress-Management.
5. Image-building / Impression –Management.
6. Leadership and Team-Building and Conflict.

Language-Lab

12 Labs

1. Stress, Intonation and Rhythm.
2. Overcoming Mother-Tongue Influence.
3. JAM session, Debate, Extempore.
4. Role-play, Information Exchange / Gap Activity.
5. Presentation Skills.
6. Group-Discussion Skills.
7. Preparing for interview.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Computer Fundamental & C Programming	Course Code: CST101		
Credit: 2	L 2	T 0	P 0
Year: 1 st	Semester: I		

UNIT: 1

5L

Introduction to the Digital Computer (brief description about its components), Characteristics of computer system, Introduction to operating systems(DOS, Linux, Windows), function and types of operating system, Number Systems and conversion methods (Binary, hex, octal), Concept of flow chart, Write & execute the first C programme, C Data Types & Operators.

UNIT 2:

4L

Conditional Program Execution: Applying if-else and nested if-else statements, switch-case statements, restrictions on switch values, use of break & default with switch.

Program Loops & Iteration: Uses of loops (while, do-while and for), use of continue statement.

Function: function prototypes, call by value and call by reference function, recursion.

UNIT 3:

4L

Arrays: Insertion and deletion in single dimensional array, linear searching, sorting (bubble sort), Strings.

Structures: Purpose and uses of structures, declaring structures, array of structures

TEXT BOOKS:

1. Yashwant Kanetkar, "Let us C", BPB Publications, 2nd Edition, 2001.
2. Herbert Schildt, "C: The complete reference", OsbourneMcgraw Hill, 4th Edition, 2002.
3. P.K. Sinha "Computer Fundamentals" B.P.B Publication

REFERENCE BOOKS:

1. Raja Raman, "Computer Programming in C", Prentice Hall of India, 1995.
2. Kernighan & Ritchie, "C Programming Language", The (Ansi C Version), PHI, 2nd Edition.
3. Byron Gottfreid "Schaum's Outline of Programming with C"

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

List of Programs in ‘C’ Lab (CSP-151)

Lab 1	(a) WAP to perform simple arithmetic operations using different data types. (b) WAP to show swap of two no's without using third variable.
Lab 2	(a) WAP to find the roots of a quadratic equation. (b) WAP to check the number is odd or even and find the sum of all odd and all even separately.
Lab 3	(a) WAP to find out whether the given number is prime or not. Find sum of all prime upto N. (b) WAP to reverse a given number and check the palindrome status.
Lab 4	WAP to print corresponding days of a week using switch case.
Lab 5	WAP to find and generate the Armstrong number.
Lab 6	WAP to print pattern triangle like Floyd's, Pascal, pyramid triangle.
Lab 7	(a) WAP to interchange two values using call by value and call by reference. (b) WAP to print factorial of a number using recursion & without using recursion.
Lab 8	WAP to print Fibonacci series. (a) Without using function (b) using function (c) using recursion
Lab 9	(a) WAP to print an array and find greatest/smallest element of an array. (b) WAP to perform linear searching in an array.
Lab 10	(a) WAP to insert/ delete element from an array. (b) WAP to sort the array's element using Bubble sort.
Lab 11	WAP to perform the following string functions. a. Strlen b. strcmp c. strcpy d. strcat e. strlenr f. strupr
Lab 12	Declare a suitable structure of a college and print the name and DOB of the student have scored more than sixty percent marks in end semester exam.
Lab 13	Declare a suitable structure for an organization and print all the names of employees having salary more than Rs.1000.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Introduction to Electrical Engineering	Course Code: EET101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT I – D.C. NETWORK THEORY

Review of basic circuit theory concepts, Mesh and Nodal analysis, Superposition theorem, Thevenin's theorem, Norton's theorem, Maximum power transfer theorem, Star–delta transformation, Magnetic Circuits.

UNIT II – A.C. CIRCUITS & MEASURING INSTRUMENTS

Single Phase A.C.: Phasor representation of voltage and current, A.C. circuit behavior of resistance, inductance, capacitance & their combination in series and parallel, Power triangle, Power factor, Concept of series & parallel resonance.

Three Phase A.C.: Star – delta connections, Relation between line and phase quantities, three phase power and its measurement, What is 3 phase 4 wire and 3 phase 5 wire system?

Measuring Instruments: Construction and principle of voltage and current measuring instruments.

UNIT III – TRANSFORMERS

Principle of operation, Types of construction, Phasor diagram, Equivalent circuit, Efficiency and voltage regulation of single phase transformer, O.C. and S.C. tests.

UNIT IV – D.C. & SYNCHRONOUS MACHINES

D.C. Machines: Construction and working principle of d.c. generator and d.c. motor, Types of d.c. machines, E.M.F. equation, Torque equation, Magnetization and load characteristics, Losses and efficiency, Need of starter in d.c. motors.

Synchronous Machines: Construction and Principle of operation of Alternator and Synchronous Motor.

UNIT V – INDUCTION MOTORS

Three Phase Induction Motors: Principle of operation of 3- ϕ induction motor, Types of 3- ϕ induction motor, Need of starters in 3- ϕ induction motors, Slip – torque characteristics,

Single Phase Induction Motor: Principle of operation of single phase induction motor, Methods of starting of single phase induction motor.

Reference Books

1. V. Del Toro. “ Principles of electrical Engineering, “Prentice hall International.
2. W.H. Hayt& J.E. Kemmerly,” Engineering circuit Analysis, “McGraw Hill.
3. I. J. Nagrath, “Basic Electrical Engineering,” Tata Mc. Graw Hill.
4. A. E. Fitzgerald, D.E., Higginbotham and A Grabel, “Basic Electrical Engineering” McGraw Hill.
5. H. Cotton, “Advanced Electrical Technology” Wheeler Publishing.

Basic Electrical Engineering Lab (EEP-151)

(Any Ten)

1. Verification of Network Theorems.
2. Study of diode characteristics. Study of phenomenon of resonance in RLC series circuit.
3. Measurement of power in a three phase circuit by two wattmeter method.
4. Measurement of efficiency of a single phase transformer by load test.
5. Determination of parameters and losses in a single phase transformer by OC and SC test.
6. Study of characteristic of DC Motor.
7. Study of characteristic of AC Motor.
8. DC generator characteristics.
9. 10. Speed control of dc shunt motor.
10. Study running and reversing of a three phase induction motor.
11. Study of a single phase energy meter.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Introduction to Electronics & Communication	Course Code: ECT101						
Credit: 3	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1st	Semester: I						

UNIT 1: Fundamental of Semiconductors

10 Lectures

Energy bands in semiconductors, intrinsic and extrinsic semiconductors, Fermi Level in Intrinsic and Extrinsic semiconductor, Carrier transport in semiconductors: diffusion current, drift current, mobility, Hall Effect and resistivity. Generation and recombination of carriers.

UNIT 2: Application of Low Power and High Power Diodes

10 Lectures

Diode circuits: Construction, Junction diode characteristics, Half and full wave rectifiers - Expression for efficiency and ripple factor - Bridge rectifier – π Filter circuits, Clipper, Clamper and multipliers using diodes, Zener Diode Characteristics - Regulated power supply using Zener diode.

UNIT 3: Transistor fundamentals

8 Lectures

Transistor circuits: Characteristics of a transistor in CB, CE and CC modes - Relative merits - Biasing of Transistors - Load Line and operating point concept (both AC and DC). Construction and working of JFET and MOSFET.

UNIT 4: Digital fundamentals and Introduction to Signals

8 Lectures

Basic logic gates: AND, OR, and NOT – implementation of all gates using Universal gates, Number Systems conversions, Boolean algebra, K-map (upto 4 variables). Source of Information, Types of Signals.

UNIT 5: Basics of Communications & Instrumentation

9 Lectures

Communication Systems, Communication Channels, Need of modulation, Types of modulations (Wave shapes and final expression only), Study of Piezoelectric, PMMC, LVDT and Strain Gauge transducers and their classifications and display device (7 segment) only.

Reference Learning:

Unit 1. Electronics Devices and Circuits, Millman and Halkias, Tata McGraw Hill, 4th ed.

Unit 2 & 3. Electronic Devices and Circuit Theory, Robert L. Boylestad, Prentice Hall Higher Edu., 2000.

Unit 4. Digital Design, Morris Mano, PHI

Unit 4. Modern Digital & Analog Communications, B. P. Lathi, OUP

Unit 5. Electronic Communication Systems, John Kennedy, Tata McGraw Hill, 4th ed.

Unit 5. Electronic Instrumentation - H. S. Kalsi

ECP-151 ELECTRONICS ENGINEERING LAB.

1. To identify and Study of the various component and Devices of electronics with their specification (CRO, Function Generator, Multimeter, Power Supply, resistor, capacitor, inductor, ICs, LED, potentiometer etc.)
2. To study the V-I characteristics of PN diode and Zener diode.
3. To find the efficiency of Rectifiers and ripple factor of capacitive and non-capacitive half wave and full wave rectifier.
4. To Study and Verify clipper and clamper with biased circuits.
5. To find the characteristics of CB and CE amplifiers.
6. Determine the characteristics of FET.
7. To find out the power energy of various periodic and non periodic signals.
8. To verify the logic gates using diodes.
9. Study and observations of AM & FM Waveforms.
10. Study of various transducers (Strain Gauge).

**Course Structure & Syllabus of
B.Tech – Electrical Engineering
Applicable for 2013-2017 Batch**

Course Title: Workshop Practice	Course Code: MEP152		
Credit: 2	L 1	T 0	P 2
Year: 1st	Semester: I		

List of Experiments

1. Carpentry: To make a T-Lap joint with soft wood.
2. Arc Welding: To make a Lap joint with mild steel flat by arc welding process.
3. Gas Welding: To make a Lap joint of M.S. sheet with gas welding process.
4. Fitting: To make a plug and socket joint with M.S.flat.
5. Machine Shop: To turn a M.S. rod on lathe to prepare a turning specimen.
6. Sheet Metal: To make a square tray with G.I. sheet.
7. Study of Foundry and Forging tools and equipments.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Chemistry and Environment	Course Code: TCY101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT – I

Introduction to Environment and Chemistry

Chemical Evolution, Genesis of Environment, Components of Environment, Layers of atmosphere, Chemical composition and reactions of troposphere, Chemistry of Ozone Layer depletion.

UNIT – II

Water Chemistry

Water quality parameters (Physical, Chemical and Biological), CPCB and WHO standards for water, Measurement of parameters of water quality, Analytical tools for analysis of water quality, alkalinity, hardness and its determination (EDTA method only). Water softening processes – Lime – Soda process, Ion exchange method, boiler feed water, boiler problems-scale, sludge, priming and foaming, caustic embitterment and corrosion, their causes and prevention, Numerical problems on alkalinity and hardness.

UNIT – III

Environmental Pollution

Air Pollution: Types of pollutants, source, effects, sink and control of primary pollutants – CO, NO_x, HC, SO_x and particulates, Photochemical smog, Acid rain and Global warming – Process, National and International efforts to combat it.

Water Pollution: Water quality parameters – (BOD & COD), Classification of pollutants and their sources, waste water treatment – domestic and industrial, Ganga pollution and control.

Soil Pollution: Composition of soil, classification and effects of soil pollutants such as agro-chemicals (pesticides and fertilizer related problems), fly ash and their control.

Integrated Solid Waste Management: Classification of waste, Treatment & Disposal methods (Composting, sanitary land filling, incineration, recycling and reuse).

UNIT – IV

Energy Resources

Conventional Energy Sources – Coal and Petroleum, Refining, Fractional Distillation, Reforming, Cracking, Alkylation, Isomerisation, Hydro treating, Sulphur Recovery, Aromatization, Octane number, Cetane number, Aviation fuel, LPG, CNG, PNG, Energy Crises, Non-conventional Energy Sources – Hydro, Wind, Solar, Nuclear, Geo thermal and Biomass based.

UNIT – V

Eco-friendly Materials

Introduction to ecofriendly products and ECOMARK, Ecofriendly domestic appliances, Green Chemistry and Green Building, Organic foods, Biofuel, Biogas, Lignin, Bioplastics, Light weight plastic composites, Fuel cell, Organic Fuel Cells, hydrogen as a fuel and New lighting technologies: Organic Photo-voltaic, OLED and Organic Transistor.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Physics	Course Code: PYT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT-I

(8) L

Interference:

Introduction, Coherent Sources, Analytical treatment of interference, Young's double slit experiment and its analysis, Conditions of Interference, Fresnel's Biprism, fringes with white light, Determination of wavelength of monochromatic light by using Fresnel's Biprism method, Displacement of Fringes, Interference in plane parallel thin film (reflected and transmitted light) and wedge shaped film(reflected light only), Newton's Rings, Determination of wavelength of monochromatic light and determination of refractive index of a liquid by using Newton's ring method.

UNIT-II

(8) L

Diffraction:

Introduction, Difference between Interference and diffraction, resultant of superposition of n simple harmonic coherent vibrations, Fraunhofer diffraction due to single slit: resultant intensity, conditions of maxima, minima, angular and linear width of central maximum, Double slit diffraction: resultant intensity, missing order, N-slit diffraction : resultant intensity, conditions of maxima and minima, missing orders, angular width of principal maxima, Diffraction grating: formation of spectra and missing order spectra in spectrum, dispersive power of grating, Resolving power, Rayleigh Criterion of resolution, Resolving power of plane transmission diffraction grating.

UNIT-III

(8) L

Polarization:

Polarised and unpolarised light and its pictorial representation, plane of polarisation and plane of vibration, Phenomenon of Double Refraction, positive and negative double refracting crystals, properties of ordinary and extra-ordinary Rays, Nicol Prism and its application as a polariser and analyser, Mathematical analysis of superposition of two linearly polarised light vectors, retardation plates – half wave plate and quarter wave plate, Production and detection of Plane, Circularly and Elliptically Polarized Light.

UNIT-IV

(10) L

Laser : Spontaneous emission, stimulate demission and stimulated absorption, Einstein's A and B Coefficients and relation between them, Principle of Laser Action, Construction and Working of He-Ne, Semiconductor Laser.

Introduction to Fibre Optics: Fundamental ideas about optical fiber, Types of fibers, Acceptance angle and cone, Numerical aperture.

Magnetic Properties of Materials: Basic Concept of Para-, Dia and Ferro-Magnetism, Phenomenon of Hysterisis

Magnetic Circuits: Introduction, magnetomotive force, magnetic field intensity, permeability of free space, reluctance, law governing magnetic circuits.

Superconductivity: Temperature dependence of resistivity in superconducting material, effect of magnetic field (Meissner effect), Type I and Type II superconductors.

UNIT V

(10) L

Wave Mechanics :

Wave Particle Duality, de Broglie Concept of Matter Waves, Davisson and Germer experiment, Concept of wave packet, group and phase velocity, Heisenberg Uncertainty Principle and its applications viz. non existence of electron in nucleus, radius and energy of Bohr's first orbit, Schrödinger time independent and time dependent wave equation, Physical interpretation of wave function, Application of Schrodinger wave equation : Particle in a one dimensional box (eigen function and eigen values).

Science and Technology of Nanomaterial :

Introduction to Nanomaterial, Basic principle of nano science & technology, creation and use of Bulky Balls, structure, properties and use of Carbon nanotubes, applications of nanotechnology.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Reference & Text Books:

- | | | |
|--|---|------------------------------------|
| 1. Concepts of Modern Physics | - | Arthur Beiser (Mc-Graw Hill) |
| 2. Introduction to Special theory of Relativity | - | Robert Resnick - Wiely |
| 3. Fundamentals of Optics | - | Jenkins and White |
| 4. Optics | - | AjoyGhatak (TMH) |
| 5. Optics | - | Brijlal and Subrahmanyam |
| 6. Lasers: Fundamentals and applications | - | K. Thyagarajan, AjoyGhatak |
| 7. University Physics | - | Sears and Zeemansky |
| 8. Principles of Physics | - | Halliday, Resnick&Jearl Walker |
| 9. An Introduction to Quantum Mechanics | - | David. J. Griffith |
| 10. Introduction to Fiber optics | - | AjoyGhatak& K. Thyagarajan (TMH) |
| 11. Optical Fiber Communications | - | Keiser G. |
| 12. Nanomaterials- Synthesis, Properties
and Applications | - | Edelstein A. A. and Cammaratta R.C |
| 13. Nanotechnology | - | T. Pradeep (Tata McGraw-Hill) |

PHYSICS LAB (PYP151)

List of Experiments

(At least six)

1. To determine the wavelength of monochromatic light by Newton's ring.
2. To determine the wavelength of monochromatic light with the help of Fresnel's biprism.
3. To determine the focal length of two lenses by nodal slide and locate the position of cardinal points.
4. To determine the specific rotation of cane sugar solution using bi quartz polarimeter.
5. To determine the wavelength of spectral lines using plane transmission grating.
6. To determine the specific resistance of the material of given wire using Carey Foster's bridge.
7. To determine the variation of magnetic field along the axis of a current carrying coil and then to estimate the radius of the coil.
8. To verify Stefan's Law by electrical method.
9. To calibrate the given ammeter using potentiometer.
10. To calibrate the give voltmeter using potentiometer.
11. To determine energy band gap of a given semiconductor material by p-n junction method.
12. To determine the viscosity of water by Poisseuille's method.

Note: Additional experiments may be added based on contents of syllabus.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Essentials of Mechanical Engineering	Course Code: MET101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT – I

9L

Introduction to Engineering: Difference between Science and Technology, history of wheel, introduction to prime movers, transmission system, belt, pulleys, gear system and nomenclature, braking system, Mechanism, lever mechanism, Working principle of power generation system, hydel power plant, thermal power plant and its main components.

Coplanar Force system: Resolution of force in two mutually perpendicular direction Free Body Diagram, Moment, Varignon's theorem, static equilibrium, Lami's Theorem, type of joints/Support, Type of load: point load, uniformly constant and varying loads, beam and its type.

UNIT – 2

7L

Engineering material and their properties: Details of hook's law, Proportional limit, Yield point, Yield Stress, Engineering strain, Engineering stress, True stress and Strain, Plasticity, Elasticity, Allowable Strength, Hardness, Ductility, toughness, Fatigue, creep, strain energy, Impact Strength, Young modulus of Elasticity, Bulk Modulus, Poission Ration and its relation in between.

Stress and strain: Normal stress and strain, principle of Superposition, Deformation in stepped and composite bar.

UNIT – 3

7L

Thermodynamics: Macroscopic & microscopic study point of view, System, Surrounding and Universe, Phase, Property, State, Path, Process, Cyclic and non-cyclic processes, Quasi static process, Reversible and irreversible processes , Thermodynamic equilibrium, Concept of continuum, Energy and its forms, Enthalpy, Zeroth law, Different temperature scales and theory of temperature and Pressure measurement.

UNIT – 4

8L

Laws of thermodynamics: Thermodynamic definition of work, Thermodynamic processes, Calculation of work in various processes and sign convention, Non-flow work and flow work, Joules' experiment, First law of thermodynamics, Internal energy and enthalpy, First law of thermodynamics applied to open systems, Steady flow energy equation and its applications, First law analysis for closed system (non flow processes), Limitations of first law of thermodynamics, PMM-I.

Statement of Second law of thermodynamics: Kelvin Planck's statement and Clausius statement and their equivalence.

UNIT – 5

9L

Power generation: Air standard cycle, IC Engine, Carnot cycle, Otto cycle, Diesel cycle, Important components of I.C.Engine, two stroke and four stroke engine, S.I. and C.I. engines, efficiency of Otto and diesel cycle

Basics of Heat Transfer: Concepts of the mechanisms of heat flows: conduction, convection and Radiation heat transfer application in engineering.

Essentials of Mechanical Engineering (MEP-151)

List of Experiments

1. Tensile test
2. Impact test
3. Hardness test
4. Pulley experiment
5. Experiment on conduction heat transfer
6. Demonstration of Impulse and reaction turbine
7. Study of 4s and 2S engine petrol Engine
8. Study of 4s and 2S engine Diesel Engine
9. Study of refrigerator and air conditioning

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Professional Communication	Course Code: HMT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

OBJECTIVES:

- 1) To strengthen the Professional Communication skills of upcoming professionals.
- 2) To make them aware about the new forms and trends of business and technical writings.
- 3) To develop the students' interpersonal skills in order to ensure his / her optimum performance as an employee.
- 4) To prepare students for facing the challenges of their professional lives in an increasingly globalized world.

Unit –I Professional Communication

8 Hours

1. Professional Communication: Interpretation, Process, Forms, Barriers and Overcoming Barriers.
2. Types of Communication-Verbal, Non-Verbal, Oral, Written, Formal, Informal.
2. Communication Levels (Intra personal, Interpersonal, Group, Public communication) and Communication Flow (Downward, Upward, Lateral and Diagonal flow).
3. Technical Writing-Meaning, Types and process of preparing a technical document. Acronyms, Jargons.
4. Understanding and Practice of Paragraph writing-Principles of paragraph writing (unity, coherence and logical development of the ideas)
5. Communication: Impact of internet on communication, communicating through computers.

Unit-II Business Communication

10 Hours

1. Business communication – Meaning, Type and Format.
2. Intra-office communication – Types (Face to Face communication, Telephonic conversation, Letters, Memorandum, E-mails, Notice, Memo, Agenda, Minutes.), advantages and disadvantages. various types of intra-office communication
3. Inter-office communication –Face to Face communication, Telephonic Communication-mails, Letters (Sales, Credit, Enquiry, Quotation, Order, Complaint and Adjustment Letter), advantages and disadvantages of various types of inter-office communication.
4. Job-Application Letter and Resume.

Unit-III Technical Proposal and Report

A. Technical Proposal –Types, Format, Preparation of Proposal .

5 Hours

- **For B.Tech students-**
Technical Proposal to organize a Technical Training Program, to develop new range of products, establish new laboratory, or start a new venture.
- **For B.Pharma students-**
Technical proposal to establish a new laboratory, to create new drug-composition, or to visit a super specialty Hospital.
- **For B.Arch students-**
Technical proposal for an archeological site visit, or to construct new buildings.
- **For MCA students-**
Technical proposal to develop new software, or, to organize an induction program for the new entrants.
- **For MBA students-**
Proposal for establishment of a new department, for a new administrative system, or for new HR policies.

B. Technical Report –Types, Format, Preparation of Report.

5 Hours

- **For B.Tech students-**

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Technical Report describing new machinery, a report on the sudden break-down in production unit, Annual Financial Report and market survey report for formulating new market strategy.

- **For B.Pharma students-**

Technical Report based on the site-inspection of a drug manufacturing unit, Survey report on health awareness and self-medication.

- **For B.Arch students-**

Technical Reports based on a Site Inspection for geographical and geological aspects of a particular location. A report on the archeological survey of a monument.

- **For MCA students-**

Technical Report based on function of new technology (software or hardware), Technical Reports on Client's need for a Payroll management system/ Hospital management system.

- **For MBA students-**

Preparation of Annual Report of the organization, preparation of departmental reports and report based on the study of a successful organization.

Unit-IV Soft-Skills

8 Hours

7. Non-Verbal Communication -Kinesics, Oculistics, Vocalics, Proxemics, Chronemics.
8. Interpersonal Skills, Social-Skills
9. Personality-Meaning and Types, Attitude
10. Self-Management, Emotional Quotient, Time management, and Stress-Management.
11. Image-building / Impression –Management.
12. Leadership and Team-Building and Conflict.

Language-Lab

12 Labs

8. Stress, Intonation and Rhythm.
9. Overcoming Mother-Tongue Influence.
10. JAM session, Debate, Extempore.
11. Role-play, Information Exchange / Gap Activity.
12. Presentation Skills.
13. Group-Discussion Skills.
14. Preparing for interview.

Text Books:

UNIT I: Differential Equations

8L

Linear differential equations, Exact differential equations; Linear differential Equations of nth order with constant coefficients: complementary functions and particular integrals, Euler- Cauchy Homogeneous Linear differential equations, Simultaneous linear differential equations, Solutions of second order differential equations by changing the dependent and independent variables, Method of variation of parameters.

UNIT II: Laplace Transform

8L

Laplace Transform: Existence theorem, Laplace Transform of derivatives and integrals, Laplace Transform of Periodic functions and Unit Step function, Convolution theorem, Applications of Laplace Transform to solve linear and simultaneous differential equations.

UNIT III: Integral Transform

6L

Fourier Integral, Fourier Transform, Fourier Sine and Cosine Transforms and applications to simple Heat Transfer Equations, Z- Transform and its applications to solve difference equations.

UNIT IV: Fourier series

8L

Periodic functions, Fourier series of Periodic functions, Euler's formulae, Functions having arbitrary period, Change of intervals, Even and Odd functions, Half range sine and cosine series.

UNIT V: Partial differential equations and its Applications

8L

Introduction to partial differential equations, linear partial differential equations with constant coefficients of second order and their classification, Method of Separation of Variables for solving Partial Differential Equations, One-Dimensional Wave Equation, One Dimensional Heat Equation.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Computer Programming in C++	Course Code: CST201		
Credit: 2	L 2	T 0	P 0
Year: 1 st	Semester: II		

UNIT – I

4L

Introduction: Introducing Object-Oriented Approach related to other paradigms (functional, data decomposition), Characteristics of Object-Oriented Languages.

Basic terms and ideas: Abstraction, Encapsulation, Information hiding, Inheritance, Polymorphism.

UNIT – II

4L

Classes and Objects: Abstract data types, Object & classes, attributes, methods, C++ class declaration, State identity and behavior of an object, Constructors and destructors, instantiation of objects, Default parameter value, Copy Constructor, Static Class Data, Constant and Classes.

UNIT – III

5L

Inheritance and Polymorphism: Inheritance, Types of Inheritance, Class hierarchy, derivation – public, private & protected, Agrégation, composition vs classification hiérarchies, Polymorphism, Type of Polymorphism – Compile time and runtime, Method polymorphism, Polymorphism by parameter, Operator overloading, Parametric polymorphism, Generic function – template function, function name overloading, Overriding inheritance methods

**Course Structure & Syllabus of
B.Tech – Electrical Engineering
Applicable for 2013-2017 Batch
List of Programs in ‘C’ Lab (CSP-251)**

Lab 1	(a) WAP to print first 10 prime numbers. (b) WAP to demonstrate nested loops. (c) WAP to print reverse of a given number. (d) WAP to read two numbers from keyboard and display the larger one.
Lab 2	(a) Create a class called Employee that includes three pieces of information as instance Variables – a first name (type String), a last name (type String) and a monthly salary (Double) (b) Create a constructor in above class to initialize the three instance variables. Provide a get method for each instance variable. (c) WAP to demonstrate destructors.
Lab 3	(a) Program to implement different types of inheritances like Multiple, Multilevel and hybrid. (b) Write a program in C++ demonstrating the public, protected and private parameters. (c) Write a program in C++ to demonstrate destructor in inheritance. (d) WAP to demonstrate encapsulation property of OOPs.
Lab 4	(a) Write a program that uses a class where the member functions are defined inside a class. (b) WAP that uses a class where member functions are defined outside a class. (c) WAP that uses a class where member functions are defined inside a class. (d) WAP to demonstrate the use of Static Data members.
Lab 5	(a) WAP to demonstrate the use of Dynamic Constructor. (b) WAP to demonstrate the use of function Template. (c) Illustrate and implement the C++ program to initiate the base constructor from derived class constructor.
Lab 6	(a) Write a C++ program to find the largest and smallest element of an array. (b) Create a class Matrix. Implement all possible matrix operations for Matrix type objects by overloading them.
Lab 7	(a) Create 2 classes OM and DB which store the value of distance. DM store distances in meters and cm and DB in feet and inches. Write a program that can read values for the class objects and add 1 object OM with another object of DB. (b) Define a class to represent bank account. Include the following members: Data members 1. Name of depositor. 2. Account number. 3. Type of account. 4. Balance amount in the account. Member functions 1. To assign initial values. 2. To deposit an amount. 3. To withdraw an amount after checking the balance. 4. To display name and balance. Write a main program to test the program.
Lab 8	(a) WAP to demonstrate static class data. (b) WAP to demonstrate the use of Public, Private and protected classes.
Lab 9	(a) WAP to illustrate the concept of call by reference. (b) WAP to illustrate the concept of unary operator overloading. (c) WAP to illustrate the concept of binary operator overloading.
Lab 10	(a) WAP to demonstrate the use of function overloading. (b) WAP using multiple inheritance for collecting employee details.
Lab 11	(a) WAP using function template to find maximum of two Data. (b) WAP to calculate factorial of given number using copy constructor.
Lab 12	(a) WAP to sort five float and integer numbers using template function (use bubble sort). (b) Demonstrate the use of different types of polymorphism.
Lab 13	(a) Write a function to read a matrix of size M × N from keyboard. (b) WAP to implement aggregation concept.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Graphics	Course Code: CGP151		
Credit: 2	L 1	T 0	P 2
Year: 1st	Semester: II		

UNIT-I

3L

Introduction: Sheet Layout, Types of Sheet, Size of Sheets, Title blocks, Type of lines, Lettering, Dimensioning, Scale (Full, Reduced, Large) Geometrical Constructions

UNIT-II

4L

Projection: Methods of Projection, Planes of Projection, Projection of points, Projection of straight lines, Projection of auxiliary planes, Projection of planes.

UNIT-III

4L

Projection of solids, Sections of solids

UNIT-IV

2L

Development of surfaces

UNIT-V

2L

Isometric Projections

Reference Book:

- 1) Bhatt N. D. & Panchal V. M, "Engineering Drawing", Charotar Publisher, 2007.
- 2) Dhanjay A Jolhe, "Engineering Drawing" Tata-Mc-Garw hill, 2008.
- 3) Gill.P.S "Engineering graphics" S. K. Kataria & Sons, 2009
- 4) John K.C, "Engineering graphics" ,2nd edition, PHI Learning Pvt. Ltd., 2010 .

List of Experiments

1. Introduction to AutoCAD Commands, Explaining need of AUTO CAD over Manual drafting, Simple Drawings.
2. Sheet on Lettering and Geometric construction.
3. Orthographic Projections, Basic problem based on Projection of points.
4. Sheet on Projection of Lines.
5. Sheet on Projection of Planes.
6. Sheet on Projection of Auxiliary Planes.
7. Sheet on Projection of Solids.
8. Development of Surfaces.
9. Sheet on Isometric Projections from orthogonal views.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Mathematics – III	Course Code: JA3010		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: III		

UNIT – 1 8L

Complex variable- I

Elementary functions; limit, continuity & differentiability; Analytic Functions; Cauchy – Riemann equations; Harmonic functions; Line integral in the complex plane; Cauchy’s Integral theorem; Cauchy’s Integral formula for derivatives of analytic function.

UNIT – 2 6L

Complex Variables -II

Power series; Taylor’s series; Laurent’s series; Poles; Zeros; Singularities; Residue Theorem; Evaluation of real

integrals of the type $\int_0^{2\pi} f(\cos \theta, \sin \theta) d\theta$ and $\int_{-\infty}^{\infty} f(x) dx$.

UNIT – 3 8L

Special Functions

Series solution of ODE of 2nd order with variable coefficient with special emphasis to Legendre and Bessel differential equation by Frobenius method; Legendre polynomial of first kind; Bessel function of first kind and their properties.

UNIT – 4 8L

Fourier Transform & Z-transform

Fourier integral; Fourier transform; Fourier sine and cosine transforms; Linearity, Scaling, frequency shifting and time shifting properties; Convolution theorem and its application.

Z – Transform; Properties of Z-transforms; Convolution of two sequences; Inverse Z-transform; Solution of difference equations.

UNIT – 5 8L

Partial differential equations and its Applications

Introduction to partial differential equations; Linear partial differential equations with constant coefficients of second order and their classification; Method of Separation of Variables for solving Partial Differential Equations; One-Dimensional Wave Equation; One Dimensional Heat Equation.

Text Books:

1. Brown & Churchill: **Complex Variables & Applications**, 9th edition, McGraw-Hill, 2013.
2. R. K. Jain & S. R. K. Iyenger, **Advanced Engineering Mathematics**, 2nd Edition, Narosa Publishing House, New Delhi, India, 2006.

Reference Books:

1. B. S. Grewal, **Higher Engineering Mathematics**, 42th Edition, Khanna publication, New Delhi, India, 2012.
2. E. Kreyszig, **Advanced Engineering Mathematics**, 9th Edition, John Wiley & Sons, U.K., 2006.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Basic Network Analysis	Course Code: EA3210		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: III		

Unit – 1

Introduction to continuous time signals and systems: Basic continuous time signals, unit step, unit ramp, unit impulse and periodic signals with their mathematical representation and characteristics. Waveform synthesis,

Analogous System: Linear mechanical elements, force-voltage and force-current analogy, modeling of mechanical and electro- mechanical systems

Unit – 2

Graph Theory: Graph of a Network, definitions, tree, co tree, link, basic loop and basic cut set, Incidence matrix, cut set matrix, Tie set matrix Duality, Loop and Node methods of analysis. Analysis of first and second order linear systems by classical method.

Unit – 3

Network Theorems (Applications to ac networks): Super- position theorem, Thevenin's theorem, Norton's theorem, maximum power transfer theorem, Reciprocity theorem. Millman's theorem, compensation theorem, Tellegen's theorem

Unit – 4

Transform methods of Analysis: Exponential form and Trigonometric form of Fourier series, Fourier symmetry, Fourier Integral and Fourier Transform. Transform of common functions and periodic wave forms: Applications of Fourier Transform to network analysis.

Unit – 5

Laplace Transform Analysis: Laplace Transform, Laplace Transform of periodic functions, Initial and Final Value Theorems, Inverse Laplace Transform, Convolution Theorem, Superposition Integral, Application of Laplace Transform to analysis of networks, waveform synthesis and Laplace Transform of complex waveforms.

Text Books

1. William Hayt, Jack Kemmerly, Steven Durbin, "Engineering Circuit Analysis", Tata McGraw Hill, 8th Edition
2. Choudhary D.Roy, "Network & Systems", Wiley Eastern Ltd.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Electrical Measurement & Measuring Instruments	Course Code: EA3220		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: III		

UNIT – 1

Philosophy Of Measurement: Methods of Measurement, Measurement System, Classification of instrument system, Characteristics of instruments & measurement system, Errors in measurement & its analysis, Standards.

Analog Measurement of Electrical Quantities: Electrodynamic, Thermocouple, Electrostatic & Rectifier type Ammeters & Voltmeters, Electrodynamic Wattmeter, Three Phase Wattmeter, Power in three phase system, errors & remedies in wattmeter and energy meter.

UNIT – 2

Instrument transformers: Instrument Transformer and their applications in the extension of instrument range, Introduction to measurement of speed, frequency and power factor.

UNIT – 3

Measurement of Parameters: Different methods of measuring low, medium and high resistances, measurement of inductance & capacitance with the help of AC Bridges, Q Meter.

UNIT – 4

AC Potentiometer: Polar type & Co-ordinate type AC potentiometers, application of AC Potentiometers in electrical measurement

Magnetic Measurement: Ballistic Galvanometer, flux meter, determination of hysteresis loop, Measurement of iron losses.

UNIT – 5

Digital Measurement of Electrical Quantities: Concept of digital measurement, block Diagram, Study of digital voltmeter, frequency meter Power Analyzer and Harmonics Analyzer; Electronic Multimeter.

Text Book:

1. E.W. Golding & F.C. Widdis, “Electrical Measurement & Measuring Instrument”, A.W. Wheeler & Co. Pvt. Ltd. India.
2. A.K. Sawhney, “Electrical & Electronic Measurement & Instrument”, Dhanpat Rai & Sons, India.

1. Forest K. Harries, “Electrical Measurement”, Willey Eastern Pvt. Ltd. India.
2. M.B. Stout, “Basic Electrical Measurement”, Prentice hall of India, India.
3. W.D. Cooper, “Electronic Instrument & Measurement Technique”, Prentice Hall International.
4. Rajendra Prashad, “Electrical Measurement & Measuring Instrument”, Khanna Publisher.
5. J.B. Gupta, “Electrical Measurements and Measuring Instruments”, S.K. Kataria & Sons.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Electro-Mechanical Energy Conversion – I	Course Code: EA3230		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: III		

UNIT – 1

Principles of Electro-mechanical Energy Conversion:- Introduction, Flow of Energy in Electromechanical Devices, Energy in magnetic systems (defining energy & Co-energy), Singly Excited Systems; determination of mechanical force, mechanical energy, torque equation, Doubly excited Systems; Energy stored in magnetic field, electromagnetic torque Generated emf in machines; torque in machines with cylindrical air gap .

UNIT – 2

D.C. Machines:- Construction of DC Machines, Armature winding, Emf and torque equation Armature Reaction, Commutation, Interpoles and Compensating Windings, Performance Characteristics of D.C. generators.

UNIT –3

D.C. Machines (Contd.):- Performance Characteristics of D.C. motors, Starting of D.C. motors; 3-point and 4-point starters, Speed control of D.C. motors: Field Control, armature control and Voltage Control (Ward Leonard method); Efficiency and Testing of D.C. machines (Hopkinson's and Swinburne's Test).

UNIT –4

Review of Single Phase Transformer:Phasor diagram, efficiency and voltage regulation, all day efficiency, Testing of Transformers: O.C. and S.C. tests, Sumpner's test, polarity test.
Auto Transformer: Single phase and three phase auto transformers, volt-amp relationship, efficiency, merits & demerits and applications.

UNIT –5

Three Phase Transformers: Construction, three phase transformer phasor groups and their connections, open delta connection, three phase to 2 phase, 6 phase or 12 phase connections, and their applications, parallel operation and load sharing of single phase and three phase transformers, excitation phenomenon and harmonics in transformers.

Text Books:

1. P.S.Bhimbra, "Electrical Machinery", Khanna publication India
2. I.J. Nagrath & D.P.Kothari, "Electrical Machines", Tata McGraw Hill

Reference Books:

1. Charles Gross, Electric Machines, T & F, Delhi
2. A.E. Fitzgerald, C.Kingsley Jr & Umans, "Electric Machinery", 6th Edition, McGraw Hill International Student Edition
5. Sen, "Principles of Electric Machines and Power Electronics", 2nd edition, Wiley India

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Analog & Digital Electronics	Course Code: FA3290		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: III		

UNIT – 1

Special Diodes- LED, Varactor diode, Photo diode, Schottky diode, Tunnel diode; their characteristics and applications. Transistors as a switch.

UNIT – 2

Frequency Response: Amplifier transfer function, low and high frequency response of common emitter and common source amplifiers.

Feedback: General feedback structure; properties of negative feedback; series-series, series-shunt, shunt-series and shunt-shunt feedback amplifiers.

UNIT – 3

Basic principle of sinusoidal oscillator, R-C Phase Shift and Wein Bridge oscillators, tuned oscillators- Collpits and Hartley; Crystal oscillator

UNIT – 4

Combinational Logic Circuits: Multiplexers/Demultiplexers, Encoders/Decoders. Sequential Logic Circuits: latches, flip-flops- S-R, T, D, J-K.

Shift Registers: Basic principle, serial and parallel data transfer, shift left/right registers, universal shift register.

Counters: Mode N Counters, ripple counters, synchronous counters, ring/Johnson counters.

UNIT – 5

OP-AMP applications – Astable, Monostable and Bistable multivibrators, Schmitt trigger, IC555 Timer, A/D and D/A converters.

Voltage Regulators: Series, shunt and switching regulators, op-amp based configurations.

Memories: Introduction to ROM, RAM; Sequential Memory, Memory organization.

Text Books:

1. A.S. Sedra and K.C. Smith “Microelectronics Circuits” Oxford University Press (India)
2. Malvino& Leach, “Digital Principles and applications” Tata Mc. Graw Hill
3. R.A. Gayakwad “Op amps and Linear Integrated Circuits” Prentice Hall of India.

4. Anand Kumar, “Switching Theory and Logic Design” Prentice Hall of India, 2008.
5. Alope. K. Dutta, “Semiconductor Devices and circuits”, Oxford University Press, 2008.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Hydraulic Machines	Course Code: LA30A0		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: III		

UNIT – 1

Thermodynamics: Thermodynamic equilibrium, cyclic process, enthalpy, Zero, first and second laws of thermodynamics, carnot cycle, concept of entropy, properties of steam, processes involving steam in closed and open systems, Enthalpy.

Vapour Pressure Cycles: Rankine cycle, reheat cycle, Regenerative cycle

UNIT – 2

Steam Turbine: Classification, impulse and reaction turbines their velocity diagrams and related calculations, work done and efficiencies, re-heat factor, staging, bleeding and governing of turbines.

Gas Turbine: Classification, Brayton cycle, working principle of gas turbine, gas turbine cycle with intercooling, reheat and regeneration, stage and polytropic efficiencies.

UNIT – 3

Compressors: Classification, single and multistage reciprocating compressors, isothermal and volumetric efficiencies, centrifugal and axial flow compressors, surging, choking and stalling.

I.C. Engines: Otto, Diesel and Dual cycles, introduction to 2-stroke and 4-stroke SI and CI engines, indicator diagram and power measurement.

UNIT – 4

Hydraulic Turbines: Classification, heads and efficiencies, construction, working, work done and efficiency of impulse and reaction turbines.

Reference Books:

1. P.L. Ballany “Thermal Engineering”, Khanna Publishers, 2003
2. R.K. Bansal “A Text Book of Fluid Mechanics and Hydraulic Machines” Laxmi Publications, 2006.
3. Onkar Singh “Applied Thermodynamics” New Age International, 2006
4. R.K. Rajput “A Text Book of Hydraulic Machines” S. Chand & Co., 2008.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

EA3210: NETWORK LAB

Note: Minimum eight experiments are to be performed from the following list. The department may add 3 to 4 more experiments in the following list.

1. Verification of principle of superposition with dc and ac sources.
2. Verification of Thevenin, Norton and Maximum power transfer theorems in ac circuits
3. Verification of Tellegen's theorem for two networks of the same topology
4. Determination of transient response of current in RL and RC circuits with step voltage input
5. Determination of transient response of current in RLC circuit with step voltage input for underdamp, critically damp and overdamp cases
6. Determination of frequency response of current in RLC circuit with sinusoidal ac input
7. Determination of driving point and transfer functions of a two port ladder network and verify with theoretical values
8. Determination of image impedance and characteristic impedance of T and Π networks, using O.C. and S.C. tests Write Demo for the following (in Ms-Power point)
9. Determination of frequency response of a Twin – T notch filter.

EA3220: MEASUREMENT LAB

Note: Minimum eight experiments are to be performed from the following list. The department may add 3 to 4 more experiments in the following list.

1. Calibration of ac voltmeter and ac ammeter
2. Measurement of form factor of a rectified sine wave and determine source of error if r.m.s. value is measured by a multi-meter
3. Measurement of phase difference and frequency of a sinusoidal ac voltage using C.R.O.
4. Measurement of power and power factor of a single phase inductive load and to study effect of capacitance connected across the load on the power factor
5. Measurement of low resistance by Kelvin's double bridge
6. Measurement of voltage, current and resistance using dc potentiometer
7. Measurement of inductance by Maxwell's bridge
8. Measurement of inductance by Hay's bridge
9. Measurement of inductance by Anderson's bridge
10. Measurement of capacitance by Owen's bridge
11. Measurement of capacitance by De Sauty Bridge
12. Measurement of capacitance by Schering Bridge
13. Study of Frequency and differential time counter

EA3230: ELECTROMECHANICAL ENERGY CONVERSION- I LAB

Note: Minimum eight experiments are to be performed from the following list. The department may add 3 to 4 more experiments in the following list.

1. To obtain magnetization characteristics of a d.c. shunt generator.
2. To obtain load characteristics of a d.c. shunt generator and compound generator.
3. To obtain efficiency of a dc shunt machine using Swinburne's test.
4. To perform Hopkinson's test and determine losses and efficiency of DC machine.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

5. To obtain speed-torque characteristics of a dc shunt motor.
6. To obtain speed control of dc shunt motor using (a) armature resistance control (b) field control.
7. To obtain speed control of dc separately excited motor using Conventional Ward-Leonard/ Static Ward –Leonard method.
8. To study polarity and ratio test of single phase and 3-phase transformers.
9. To obtain equivalent circuit, efficiency and voltage regulation of a single phase transformer using O.C. and S.C. tests.
10. To obtain efficiency and voltage regulation of a single phase transformer by Sumpner's test.
11. To obtain 3-phase to 2-phase conversion by Scott connection.
12. To determine excitation phenomenon (B.H. loop) of single phase transformer using C.R.O.
13. To perform parallel operation of single phase transformers.

FA3290: ANALOG & DIGITAL ELECTRONICS LAB

Note: Minimum eight experiments are to be performed from the following list. The department may add 3 to 4 more experiments in the following list.

1. To Plot V-I characteristics of junction diode and zener diode.
2. To draw wave shape of the electrical signal at input and output points of the half wave, full wave and bridge rectifiers.
3. To Plot input / output characteristics for common base transistor.
4. To Plot input /output characteristics of FET and determine FET parameters at a given operating point.
5. To determine voltage gain, current gain, input impedance and output impedance of common emitter amplifier.
6. To determine voltage gain, current gain, input impedance and output impedance and frequency response of R-C coupled common emitter amplifier.
7. To design R-C Phase shift / Wein Bridge oscillator and verify experimentally the frequency of oscillation.
8. To study transistor as a switch and determine load voltage and load current when the transistor is ON.
9. To study application of Operational Amplifier as summer integrator and voltage comparator
10. To study operation of Op-Amp based astable and monostable multivibrators.
11. To study operation IC 555 based astable and monostable multivibrators.
12. To study operation of (a) multiplexer using IC 74150 (b) demultiplexer using IC 74138.
13. To study operation of Adder / Subtractor
14. To study operation of J K Master – slave flip – flop
15. To verify experimentally output of A/D and D/A converters.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Electromechanical Energy Conversion - II	Course Code: EA4210		
Credit: 4.5	L 3	T 1	P 2
Year: 2 nd	Semester: IV		

UNIT – 1

Synchronous Machine–I:

Constructional features, Armature winding, EMF Equation, Winding coefficients, equivalent circuit and phasor diagram, Armature reaction, Working principle of synchronous generator, O. C. & S. C. tests, Voltage Regulation using Synchronous Impedance Method, MMF Method, Potier's Triangle Method, Parallel Operation of synchronous generators, operation on infinite bus, synchronizing power and torque co-efficient

UNIT – 2

Synchronous Machine–II:

Two Reaction Theory, Power flow equations of cylindrical and salient pole machines, Operating characteristics

Synchronous Motor: Working principle of synchronous motor, Starting methods, Effect of varying field current at different loads, V-Curves, Hunting & damping, synchronous condenser.

UNIT – 3

Three phase Induction Machine–I:

Constructional features, Rotating magnetic field, Principle of operation, Phasor diagram, equivalent circuit, torque and power equations, Torque-slip characteristics, no load & blocked rotor tests, efficiency, Induction generator

UNIT – 4

Three phase Induction Machine-II:

Starting, Deep bar and double cage rotors, Cogging & Crawling, Speed Control (with and without emf injection in rotor circuit.)

UNIT – 5

Single phase Induction Motor:

Double revolving field theory, Equivalent circuit, No load and blocked rotor tests, Starting methods, repulsion motor. AC Commutator Motors: Universal motor, Single phase a.c. series compensated motor, stepper motors

Text Books:

1. Dr.P.S.Bhimbra, "Electrical Machinery", Khanna Publishers India
2. D.P.Kothari&I.J.Nagrath, "Electric Machines", Tata McGraw Hill

Reference Books:

1. Sen, "Principles of Electrical Machines & Power Electronics", Wiley India
2. O.C. Taylor, "The performance & design of A.C. Commutator Motors", A.H. Wheeler & Co (P) Ltd.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Network Analysis and Synthesis	Course Code: EA4220		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: IV		

UNIT 1

Network Functions : Concept of Complex frequency, Transform Impedances Network functions of one port and two port networks, concept of poles and zeros, properties of driving point and transfer functions, time response and stability from pole zero plot.

UNIT 2

Two Port Networks: Characterization of LTI two port networks Z, Y, ABCD, h and g-parameters, reciprocity and symmetry, Inter- relationships between the parameters, inter-connections of two port networks, Ladder and Lattice networks. T & Π Representation.

UNIT 3

Network Synthesis : Positive real function; definition and properties; properties of LC, RC and RL driving point functions, synthesis of LC, RC and RL driving point immittance functions using Foster and Cauer first and second forms.

UNIT 4

Filters: Introduction, Classification of filters, Image parameters and characteristics impedance, passive and active filter, low pass, high pass, constant K type, M derived filters and their design.

UNIT 5

Sampled Data System: Introduction, Spectrum analysis of sampling process, Signal reconstruction, Difference equation, Z- transform, Z-transform function, Inverse Z-transform, Relation of z- and s-transform, Stability analysis, Application of z-transform

Text Books:

1. Kuo, "Network Analysis and Synthesis", 2nd edition, Wiley India.
2. M.E. Van Valkenburg, "Network Analysis", Prentice Hall of India.

Reference Books:

1. N.C. Jagan and C. Lakshminarayana, "Network Analysis & Synthesis", B.S. Publications, 2008.
2. Nagrath and Gopal, "Control System Engineering", Wiley Eastern Ltd.
3. M.E. Van Valkenburg, "An Introduction to Modern Network Synthesis", Wiley Eastern Ltd.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Microprocessor	Course Code: EA4230		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: IV		

UNIT – 1

Introduction To Microprocessor: 8085 Evolution Of Microprocessor, Register Structure, ALU, Bus Organization, Timing And Control, Instruction set.

Architecture of 16-bit Microprocessors: Architecture of 8086; (Bus Interface Unit, Execution unit) Register Organization, Bus operation, Memory segmentation.

UNIT – 2

Assembly Language Programming: Addressing Modes and instruction set of 8086, Arithmetic and Logic instructions, Program Control Instructions (jumps, conditional jumps, subroutine call) Loop and string instructions , Assembler Directives.

UNIT – 3

CPU MODULE: Signal Description of pins of 8086 and 8088, Clock generator, Address and Data bus Demultiplexing, Buffering Memory Organization, Read and Write cycle Timings, Interrupt Structures, Minimum Mode, Maximum Mode Operation.

UNIT – 4

Peripheral Interfacing: Programmed I/O, Interrupt Driven, I/O, DMA, Parallel I/O, (8255-PPI, Parallel port), 8253/8254 programmable Timer/Counter Interfacing with ADC.

UNIT – 5

Peripheral Interfacing (Contd.): 8259 Programmable Interrupt controller, 8237 DMA controller, Concept of Advanced 32 bit Microprocessors: Pentium Processor.

Text Book:

1. Ray, A.K. & Burchandi, K.M., “Advanced Microprocessors and Peripherals: Architecture, Programming and Interfacing”, Tata McGraw Hill.
2. Hall D.V. , “Microprocessors Interfacing” ,2nd edition, Tata McGraw Hill

3. Liu and Gibson G.A. , “Microcomputer Systems: The 8086/8088 Family”, Prentice Hall (India), 2nd edition
4. Brey, Barry B. , “INTEL microprocessors”, Prentice Hall (India), 4th edition
5. Ram B., “Advanced Microprocessor & Interfacing” , Tata McGraw Hill
6. Renu Singh & B.P. Singh, “Microprocessors and Interfacing & Applications”, New Age International.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Electrical Power Generation	Course Code: EA4010		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: IV		

UNIT – 1

Introduction: Electric energy demand and growth in India, electric energy sources.

Thermal Power Plant: Site selection, general layout and operation of plant, detailed description and use of different parts.

Hydro Electric Plants: Classifications, location and site selection, detailed description of various components, general layout and operation of Plants, brief description of impulse, reaction, Kaplan and Francis turbines, advantages & disadvantages, hydro-potential in India

UNIT – 2

Nuclear Power Plant: Location, site selection, general layout and operation of plant. Brief description of different types of reactors Moderator material, fissile materials, control of nuclear reactors, disposal of nuclear waste material, shielding.

Gas Turbine Plant: Operational principle of gas turbine plant & its efficiency, fuels, open and closed-cycle plants, regeneration, inter-cooling and reheating, role and applications.

Diesel Plants: Diesel plant layout, components & their functions, its performance, role and applications

UNIT – 3

Power Plant Economics and Tariffs:

Load curve, load duration curve, different factors related to plants and consumers, Cost of electrical energy, depreciation, generation cost, effect of Load factor on unit cost. Fixed and operating cost of different plants, role of load diversity in power system economy. Objectives and forms of Tariff including three part tariff; Causes and effects of low power factor, advantages of power factor improvement, different methods for power factor improvements

UNIT – 4

Major Electrical Equipment in Power Plants: Alternators for hydro plants, turbo alternators, requirement of excitation systems, types of excitation systems, duties and qualities of automatic voltage regulators, brief description of different types of voltage regulators, earthing of power systems

Cogeneration: Introduction, types of cycles and technologies, advantages and scope in India

Captive Generation: Introduction, advantages and constraints, types of captive power generation, future prospects, energy banking and wheeling.

MHD generation: Working principle, open and closed cycles, MHD systems, advantages, parameters governing power output.

UNIT – 5

Solar power plant: Conversion of solar heat to electricity, Solar energy collectors, Photovoltaic cell, power generation, future prospects of solar energy use.

Wind Energy: Windmills, power output with combined operation of wind turbine generation and isolated generating system, technical choices & economic size.

Introduction to Geothermal energy, Ocean Energy and Tidal energy, Introduction to fuel cells.

Energy Conservation: Principles of energy conservation, energy conservation planning; energy conservation in industries, generation, transmission, distribution, transport, agriculture etc.,

Text Books:

1. B.R. Gupta, “Generation of Electrical Energy”, S. Chand Publications

Reference Books:

1. Elements of Electric Power Station Design by M.V. Deshpande

2. A. Chakrabarti, M.L. Soni, P.V. Gupta, U.S. Bhatnagar, “A Text Book on Power System Engineering”, Dhanpat Rai & Co

3. J.B.Gupta, “A Course in Electrical Power”, Kataria Publications

4. R.K.Rajput, “Power Plant Engineering”, Laxmi Publications

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Materials	Course Code: EA4020		
Credit: 3.5	L	T	P
	3	1	0
Year: 2nd	Semester: IV		

UNIT – 1

Crystal Structure of Materials:

Bonds in solids, crystal structure, co-ordination number, atomic radius representation of plane distance b/w two planed packing factor, Miller Indices, Bragg's law and x-ray diffraction, structural Imperfections, crystal growth

UNIT – 2

Electrical Engineering Material:

Electron theory of metals, factors affecting electrical resistance of materials, thermal conductivity of metals, heat developed in current carrying conductors, Half effect, Drift and Diffusion currents, continuity equation, thermoelectric effect, superconductivity and super conducting materials, optical properties of solids

UNIT – 3

Magnetic Material:

Origin of permanent magnetic dipoles in matters, Classification Diamagnetism, Paramagnetism, Ferromagnetism, Antiferromagnetism and Ferrimagnetism, magnetostriction, Properties of magnetic materials, soft and hard magnetic materials, permanent magnetic materials.

UNIT – 4

Dielectric Materials:

Polarization and Dielectric constant, Dielectric constant of mono-atomic, Poly atomic gases and solids, frequency dependence of electronic and ionic polarisabilities, dipolar relaxation, dielectric loss, piezoelectricity, ferroelectric materials

UNIT – 5

Polarization and Dielectric constant, Dielectric constant of mono-atomic, Poly atomic gases and solids, frequency dependence of electronic and ionic polarisabilities, dipolar relaxation, dielectric loss, piezoelectricity, ferroelectric materials

Text Books:

1. A.J. Dekker, "Electrical Engineering Materials", Prentice Hall of India
2. R. K. Rajput, "Electrical Engineering Materials", Laxmi Publications

Reference Books:

1. Solymar, "Electrical Properties of Materials" Oxford University Press.
2. Ian P. Hones, "Material Science for Electrical & Electronic Engineering," Oxford University Press.
3. J.B. Gupta, "Electrical and Electronics Engineering Materials" Katson publishers.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Numerical Techniques (<i>Departmental Elective</i>)	Course Code: JA4610		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: IV		

UNIT – 1

Introduction to numerical computing, approximations and errors in numerical computations Truncation and round off errors, propagation of errors. Root finding: Bisection method, Regula-falsi method, iteration method, Newton Raphson method, Rate of convergence of above methods.

UNIT – 2

Matrix algebra, Solution of simultaneous linear algebraic equations: Gauss elimination, Gauss Jordan method, LU Decomposition method, Jacobi method, Gauss Seidel method.

UNIT – 3

Interpolation and Extrapolation: Finite differences, Difference table, Newton's forward and backward interpolation formula. Divided differences and Newton's divided difference formula. Numerical differentiation, Numerical integration: Trapezoidal and Simpson's rules, Weddle's formula.

UNIT – 4

Numerical solution of O.D.E.: Taylor series method, Euler's method, Modified Euler's method, Forth order RungeKutta methods. Multistep methods: Milne's method, Adams Bashforth method.

Text Books:

1. Numerical Method: E. Balagurusamy, Tata McGraw Hill Publication.
2. Applied Numerical Analysis: Curtis F. Gerald and Patrick O. Wheatley – Pearson Education Lt.

Reference Books:

1. Introductory Methods of Numerical Analysis: S.S. Sastry, PHI learning Pvt. Ltd.
2. Numerical Methods for Scientific and Engineering computation: M.K Jain, S.R.K Iyengar and R.K Jain, New age International Publishers.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Operation Research (<i>Departmental Elective</i>)	Course Code: LA6040		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: IV		

UNIT – 1

11L

Introduction: Linear programming, Definition, scope of Operations Research, approach and limitations. Models, Characteristics and phases of O.R., Mathematical formulation of L.P. Problems. Graphical solution methods.

Linear Programming Problems: The simplex method - slack, surplus and artificial variables. Concept of duality, two phase method, dual simplex method, degeneracy, and procedure for resolving degenerate cases.

UNIT – 2

11L

Transportation Problem:

Formulation of transportation model, Basic feasible solution using different methods, Optimality, Methods, Unbalanced transportation problem, Degeneracy in transportation problems, Applications of Transportation problems.

Assignment Problem: Formulation, unbalanced assignment problem, traveling problem.

UNIT – 3

7L

Game Theory: Formulation of games, two person-Zero sum game, games with and without saddle point, Graphical solution ($2 \times n$, $m \times 2$ game), and dominance property.

UNIT – 4

7L

Queuing Theory: Queuing system and their characteristics. The M/M/1 Queuing system, Steady state performance analysis of M/M/1 and M/M/C queuing model.

UNIT – 5

8L

PERT-CPM Techniques: Network construction, determining critical path, floats, scheduling by network, project duration, variance under probabilistic models, prediction of date of completion, crashing of simple networks.

Reference Books:

- 1) J.K. Sharma; Operation Research; Theory and application, 5th edition, 2013.
- 2) A.M. Natrajan, P. Balsubramani, A. Tamil Aravari, Operation Research; 4th edition, 2005.
- 3) Taha H.A.; Operation Research; Pearson; 8th edition, 2008.
- 4) Vivek Kumar; Operation Research; Katson Books, 5th edition, 2012.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

EA4210: ELECTRO-MECHANICAL ENERGY CONVERSION – II LAB

Note: Minimum eight experiments are to be performed from the following list. The department may add 3 to 4 more experiments in the following list.

1. To perform no load and blocked rotor tests on a three phase squirrel cage induction motor and determine equivalent circuit.
2. To perform load test on a three phase induction motor and draw:
(i) Torque -speed characteristics (ii) Power factor-line current characteristics
3. To perform no load & blocked rotor tests on 1- ϕ induction motor and determine equivalent circuit.
4. To study speed control of three phase induction motor by keeping V/f ratio constant
5. To perform O.C. & S.C. tests on a 3- ϕ alternator and determine voltage regulation at full load and at unity, 0.8 lagging and leading power factors by (i) EMF method (ii) MMF method.
6. To determine V-curves and inverted V-curves of a three phase synchronous motor.
8. To determine X_d and X_q of a three phase salient pole synchronous machine using the slip test and draw the power-angle curve.
9. To study synchronization of an alternator with the infinite bus by using: (i) dark lamp method (ii) two bright and one dark lamp method

EA4220: SIMULATION LAB

Note: Minimum eight experiments are to be performed from the following list. The department may add 3 to 4 more experiments in the following list.

1. To determine node voltages and branch currents in a resistive network. To obtain Thevenin's equivalent circuit of a resistive network.
2. To obtain transient response of a series R-L-C circuit for step voltage input.
3. To obtain transient response of a parallel R-L-C circuit for step current input.
4. To obtain transient response of a series R-L-C circuit for alternating square voltage waveform.
5. To obtain frequency response of a series R-L-C circuit for sinusoidal voltage input
6. To determine line and load currents in a three phase delta circuit connected to a 3-phase balanced ac supply.
7. To plot magnitude, phase and step response of a network function.
8. To determine Z, Y, G, H and transmission parameters of a two part network.
9. To obtain transient response of output voltage in a single phase half wave rectifier circuit using capacitance filter.

EA4230: MICROPROCESSOR LAB

Note: Minimum eight experiments are to be performed from the following list. The department may add 3 to 4 more experiments in the following list.

A. Study Experiments

1. To study 8085 based microprocessor system
 2. To study 8086 and 8086A based microprocessor system
 3. To study Pentium Processor
- B. Programming based Experiments (any four)
4. To develop and run a program for finding out the largest/smallest number from a given set of numbers.
 5. To develop and run a program for arranging in ascending/descending order of a set of numbers
 6. To perform multiplication/division of given numbers
 7. To perform conversion of temperature from $^{\circ}\text{F}$ to $^{\circ}\text{C}$ and vice-versa
 8. To perform computation of square root of a given number
 9. To perform floating point mathematical operations (addition, subtraction, multiplication and division)

B. Interfacing based Experiments (any four)

10. To obtain interfacing of RAM chip to 8085/8086 based system
11. To obtain interfacing of keyboard controller
12. To obtain interfacing of DMA controller
13. To obtain interfacing of PPI
14. To obtain interfacing of UART/USART
15. To perform microprocessor based stepper motor operation through 8085 kit
16. To perform microprocessor based traffic light control
17. To perform microprocessor based temperature control of hot water

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Economics	Course Code: GC5010		
Credit: 2	L	T	P
	2	0	0
Year: 3rd	Semester: V		

UNIT – 1

Time value of money: Simple and compound interest, Time value equivalence, Compound interest factors, Cash flow diagrams, Calculation, Calculation of time –value equivalences. Present worth comparisons, Comparisons of assets with equal, unequal and infinite lives, comparison of deferred investments, Future worth comparison, payback period comparison.

UNIT – 2

Use and situations for equivalent annual worth comparison, Comparison of assets of equal and unequal life. Rate of return, Internal rate of return, comparison of IIR with other methods, IRR misconceptions.

UNIT – 3

Analysis of public Projects: Benefit/ Cost analysis, quantification of project, cost and benefits, benefit/ cost applications, Cost –effectiveness analysis.

UNIT – 4

Depreciation, computing depreciation charges, after tax economic comparison, Break-even analysis; linear and non-linear models. Product and Process Costing, Standard Costing, cost estimation, Relevant Cost for decision making, Cost control and Cost reduction techniques.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Power Electronics	Course Code: EA5210		
Credit: 4.5	L 3	T 1	P 2
Year: 3rd	Semester: V		

UNIT-1

Power semiconductor Devices: Power semiconductor devices their symbols and static characteristics; Characteristics and specifications of switches, types of power electronic circuits. Thyristor – Operation V- I characteristics, two transistor model; Triacs, GTOs, MOSFETs and IGBTs - static characteristics and principles of operation

UNIT-2

Power Semiconductor Devices (Contd): Protection of devices; Series and parallel operation of thyristors; Commutation techniques of thyristor

DC-DC Converters: Principles of step-down and step-up chopper and their operation with R-L load; Classification of choppers.

UNIT-3

Phase Controlled Converters: Single phase half wave controlled rectifier with resistive and inductive loads, effect of freewheeling diode; Single phase fully controlled and half controlled bridge converters; Three phase half wave converters, three phase fully controlled and half controlled bridge converters; Effect of source impedance; Single phase and three phase dual converters.

UNIT-4

AC Voltage Controllers: Principle of On-Off and phase controls; Single phase ac voltage controller with resistive and inductive loads; Three phase ac voltage controllers (various configurations and comparison)

Cyclo Converters: Basic principle of operation, single phase to single phase, three phase to single phase and three phase to three phase cyclo converters, output voltage equation.

UNIT-5

Inverters: Single phase series resonant inverter; Single phase bridge inverters

Three phase bridge inverters: 120° and 180° mode of operation; Voltage control of inverters; Harmonics reduction techniques; Single phase and three phase current source inverters.

Text Books:

1. M.H. Rashid, “Power Electronics: Circuits, Devices & Applications”, Prentice Hall of India Ltd. 3rd Edition, 2004.
2. P.S.Bimbhra, “Power Electronics” Khanna Publication.
3. Umanand “Power Electronics” Wiley India.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Control System	Course Code: EA5220		
Credit: 4.5	L 3	T 1	P 2
Year: 3rd	Semester: V		

UNIT – 1

The Control System: Open loop & closed control; servomechanism, Physical examples. Transfer functions, Block diagram algebra, Signal flow graph, Mason's gain formula Reduction of parameter variation and effects of disturbance by using negative feedback

UNIT – 2

Time Response analysis: Standard test signals, time response of first and second order systems, time response specifications, steady state errors and error constants.

Controllers: Introduction to P, PI, & PID controller. performance indices

UNIT – 3

Control System Components: Constructional and working concept of ac servomotor, synchros and stepper motor.

Concept of Stability: Routh-Hurwitz criteria, Root Locus Technique

UNIT – 4

Frequency response Analysis: Frequency response, correlation between time and frequency responses, polar and inverse polar plots, Bode plots: gain margin and phase margin.

Stability in Frequency Domain: Nyquist stability criterion, relative stability.

UNIT – 5

Introduction to Design: The design problem and preliminary considerations lead, lag and lead-lag networks, design of closed loop systems using compensation techniques in time domain and frequency domain.

Text Book:

1. I.J. Nagrath & Gopal, "Control System Engineering", 4th Edition, New age International.
2. K. Ogata, "Modern Control Engineering", Prentice Hall of India.

Reference Books:

1. Norman S. Nise, Control System Engineering 4th edition, Wiley Publishing Co.
2. M.Gopal, "Control System; Principle and design", Tata McGraw Hill.
3. M.Gopal, "Modern Control system", Tata McGraw Hill.
4. D.RoyChoudhary, "Modern Control Engineering", Prentice Hall of India.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Elements of Power System	Course Code: EA5010		
Credit: 3.5	L	T	P
	3	1	0
Year: 3 rd	Semester: V		

UNIT – 1

Power System Components

Single line diagram of Power System, Supply system, Different types of supply system and their comparison, Transmission line configurations, Types of conductors, Skin effect, Kelvin's law, Proximity effect.

UNIT – 2

Over Head Transmission Lines

Calculation of inductance and capacitance of single phase, three phase, single circuit, and double circuit transmission lines. Representation of short, medium and long transmission lines, Ferranti effect, Surge impedance loading

UNIT – 3

Corona and Line Insulators

Corona formation, calculation of potential gradient, corona loss, factors affecting corona, Methods of reducing corona and interference. Electrostatic and electromagnetic interference with communication lines. Types of insulators and their application, Potential distribution over a string of insulators, Methods of equalizing the potential, String efficiency

UNIT – 4

Mechanical Design of Transmission Lines

Catenary curve, Calculation of sag & tension, Effects of wind and ice loading, Sag template, Vibration dampers, Types of towers and their design

UNIT – 5

Insulated Cables

Types of cables and their construction, Dielectric stress, Grading of cables, Insulation resistance, Capacitance of single phase and three phase cables, Dielectric losses, Heating of cables.

Text Books

1. W.D. Stevenson, "Element of Power System Analysis", McGraw Hill, USA
2. C.L. Wadhwa, "Electrical Power Systems", New Age International Ltd., Third Edition
3. Ashfaq Husain, "Power System", CBS Publishers & Distributors, India
4. B.R. Gupta, "Power System Analysis & Design", S.Chand & Co, Third Edition
5. M.V. Deshpande, "Electrical Power System Design", Tata McGraw Hill

Reference Books

1. Soni, Gupta & Bhatnagar, "A Course in Electrical Power", Dhanpat Rai & Sons, India
2. S.L. Uppal, "Electric Power", Khanna Publishers
3. S.N. Singh, "Electric Power Generation, Transmission & Distribution", PHI, New Delhi

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Fundamentals of EM Theory	Course Code: EA5020		
Credit: 3.5	L	T	P
	3	1	0
Year: 3rd	Semester: V		

UNIT 1: 6L

COORDINATE SYSTEMS AND TRANSFORMATION

Cartesian Coordinates, Circular Cylindrical Coordinates, Spherical Coordinates Vector Calculus: Differential Length, Area and Volume, Line Surface and Volume Integrals, Del Operator, Gradient of a Scalar, Divergence of a Vector and Divergence Theorem, Curl of a Vector and Stoke's Theorem, Laplacian of a Scalar.

UNIT 2: 8L

ELECTROMAGNETIC WAVE PROPAGATION

Faraday's Law, Transformer and Motional Electromotive Forces, Displacement Current, Derivation of Maxwell's Equations For Static and Time-Varying Fields. Differential and integral forms, concept of displacement current, Boundary conditions.

UNIT 3: 8L

ELECTROMAGNETIC WAVE PROPAGATION APPLICATIONS

Electromagnetic Wave Propagation: Wave Propagation in Lossy Dielectrics, Plane Waves in Lossless Dielectrics, Plane Wave in Free Space, Plain Waves in Good Conductors, Power and The Poynting Vector, Reflection of a Plane Wave in a Normal incidence.

UNIT 4: 8L

TRANSMISSION LINES

Transmission Lines: Transmission Line Parameters, Transmission Line Equations, Input Impedance, Standing Wave Ratio and Power, Smith Chart, Some Applications of Transmission Lines. Time & Frequency Domain analysis of Transmission lines, Low loss RF and UHF transmission lines, Distortion-less condition, Transmission line charts- impedance matching.

UNIT 5: 8L

WAVE GUIDES

Wave Guides: Introduction to Planar (Rectangular) Waveguides, Derivation of TE and TM Modes, TEM Mode. Circular Waveguides-Derivation of TE and TM Modes, TEM Mode. Impedance and characteristics impedances. Transmission line analogy for wave guides. Attenuation and factor of wave guides. Dielectrics lab waveguides, Resonators

Text Books:

1. Elements of Electromagnetics, MN OSadiku, 2012.

Reference Books:

1. Engineering Electromagnetic, William Hayt, McGraw-Hill, 2011.
2. Electromagnetic Fields, K. D. Parsad, 2010.
3. Electromagnetic waves and radiating systems. Edward Conrad *Jordan*, Keith George *Balmain*. Prentice-Hall, 1996.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Data Structure	Course Code: DA3210		
Credit: 4	L	T	P
	3	0	2
Year: 3rd	Semester: V		

UNIT 1

(8L)

Introduction: Concept of data structure, Types of data structures, Character String in C, Recursion, Structure, Pointer, Dynamic Allocation, Algorithms, Algorithm analysis, Complexity of algorithms and Time space trade-off.

Arrays: Introduction, Single and multi-Dimensional Arrays, address calculation, application of arrays, Operations defined: traversal, insertion and deletion.

Stacks: Stacks, Array representation of stack, Applications of stacks, Conversion of Infix to Prefix and Postfix Expressions, Evaluation of postfix expression using stack.

UNIT 2

(8L)

Queue: Queue, Array representation and implementation of queues, Circular queues, Operations on Queue: Create Add, Delete, and Full and Empty, De-Queue, Priority queues, Applications of Queues.

Linked Lists: Concept of linked list, Representation and implementation of singly linked list, Circular linked list, doubly linked list, Operations on Linked lists, Concepts of header linked lists, applications of linked lists.

UNIT 3

(8L)

Trees: Basic terminologies of trees, Binary tree, Complete Binary tree, Extended Binary tree, Representation of Binary tree, Binary tree traversal, Operations on Binary tree.

Binary Search Tree: Binary Search Tree (BST), Insertion and Deletion in BST, Complexity of Search Algorithm, Path Length, AVL Trees, B-trees.

UNIT 4

(6L)

Graphs: Terminology & Representations, Graphs & Multi-graphs, Directed Graphs, Representations of Graphs, Traversal, Connected Component and Spanning Trees, Minimum Cost Spanning Trees.

UNIT 5

(10L)

Searching & Hashing: linear search, binary search, Hash Table, Hash Functions, Collision Resolution Strategies, Hash Table Implementation.

Sorting: Bubble sort, Insertion sort, Selection sort, Quick sort, Merge sort, Heap Sort.

File Handling: Introduction to file handling, Data and Information, File concepts, File organization, files and streams, working with files.

Text Books:

1. "Data Structures" Schaum's Outline Series, Lipschutz, TMH.
2. Data Structures using C by A. M. Tenenbaum, Langsam, Moshe J. Augentem, PHI Pub.

Reference Books:

1. "Fundamentals of Data Structures", Horowitz and Sahani, Galgotia Publication.
2. Data Structures and Program Design in C By Robert Kruse, PHI.
3. Data Structure and the Standard Template library – Willam J. Collins, 2003, T.M.H.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

EA5210: POWER ELECTRONICS LAB

Note: Minimum eight experiments are to be performed from the following list. The department may add 3 to 4 more experiments in the following list.

1. To study V-I characteristics of SCR and measure latching and holding currents.
2. To study UJT trigger circuit for half wave and full wave control.
3. To study single-phase half wave controlled rectified with (i) resistive load (ii) inductive load with and without freewheeling diode.
4. To study single phase (i) fully controlled (ii) half controlled bridge rectifiers with resistive and inductive loads.
5. To study three-phase fully/half controlled bridge rectifier with resistive and inductive loads.
6. To study single-phase ac voltage regulator with resistive and inductive loads.
7. To study single phase cyclo-converter
8. To study triggering of (i) IGBT (ii) MOSFET (iii) power transistor
9. To study operation of IGBT/MOSFET chopper circuit
10. To study MOSFET/IGBT based single-phase series-resonant inverter.
11. To study MOSFET/IGBT based single-phase bridge inverter.

Software based experiments (PSPICE/MATLAB)

12. To obtain simulation of SCR and GTO thyristor.
13. To obtain simulation of Power Transistor and IGBT.
15. To obtain simulation of single phase full wave ac voltage controller and draw load voltage and load current waveforms for inductive load.

EA5220: CONTROL SYSTEM LAB

Note: Minimum eight experiments are to be performed from the following list. The department may add 3 to 4 more experiments in the following list.

1. To determine response of first order and second order systems for step input for various values of constant 'K' using linear simulator unit and compare theoretical and practical results.
2. To study P, PI and PID temperature controller for an oven and compare their performance.
3. To study and calibrate temperature using resistance temperature detector (RTD)
4. To design Lag, Lead and Lag-Lead compensators using Bode plot.
5. To study DC position control system
6. To study synchro-transmitter and receiver and obtain output V/S input characteristics
7. To determine speed-torque characteristics of an ac servomotor.
8. To study performance of servo voltage stabilizer at various loads using load bank.
9. To study behaviour of separately excited dc motor in open loop and closed loop conditions at various loads.
10. To study PID Controller for simulation proves like transportation lag.

Software based experiments (Use MATLAB, LABVIEW software etc.)

11. To determine time domain response of a second order system for step input and obtain performance parameters.
12. To convert transfer function of a system into state space form and vice-versa.
13. To plot root locus diagram of an open loop transfer function & determine range of gain 'k' for stability.
14. To plot a Bode diagram of an open loop transfer function.
15. To draw a Nyquist plot of an open loop transfer functions and examine the stability of the closed loop system.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Principles of Management	Course Code: HA5010		
Credit: 2	L	T	P
	2	0	0
Year: 3rd	Semester: VI		

UNIT – 1

5L

Overview of management: Definition of management, need for management, role of managers, Management as science and art, evolution of management thought, contribution of Taylor and Fayol, Types of business organizations, Levels of management

UNIT – 2

9L

Planning: Definition of planning, steps involved in planning, types of planning, objectives, process of managing by objectives, Strategy, types of strategies, Policy, types of policies, Decision making, types of decision making process.

UNIT – 3

10L

Organizing: Nature, purpose and structure of organization, formal and informal organization, Departmentation, its importance, basis of departmentation, Line and staff authority, Centralization and decentralization, Authority and responsibility, delegation of authority
Selection and recruitment, orientation, appraisal, HRD.

UNIT – 4

8L

Directing: Creativity and innovation, Motivation, hierarchy of needs, motivation theories, Leadership – definition, elements, styles, leadership theories
Organization culture, elements and types of culture, managing cultural diversity.

UNIT – 5

8L

Controlling: System and process of controlling, requirements of effective control, Types of control, cost control, purchase control, maintenance control, quality control, planning operations
Globalization and liberalization.

Reference Books:

1. Charles W. L. Hill and Steven McShane, “Principles of Management”, McGraw Hill Education, Special Indian edition, 2007.
2. R. N. Gupta, “Principles of Management “, S Chand Limited, 2007.
3. P. C. Tripathy and P. N. Reddy, " Principles and Practices of Management”, Tata McGraw Hill, 1999
4. Joseph L. Massie, “Essentials of Management” , Prentice Hall of India, 2003.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Switch Gear and Protection	Course Code: EA6210		
Credit: 4.5	L	T	P
	3	1	2
Year: 3rd	Semester: VI		

UNIT I

Protective Relays

Basic principles, types, Construction and characteristics of electromagnetic relays, Elements of static relays, Comparators, Basic principle of digital relays, Overcurrent, Earth fault and differential relays.

UNIT II

Protection Schemes

Protection of generators, transformers, transmission line, busbar and motors

UNIT III

Arc Interruption Theories

Formation and extinction of arc, properties of the arc, Restriking and recovery voltage, Methods and control devices for arc extinction, Current chopping, Resistance switching

UNIT IV

Circuit Breakers

Oil circuit breaker, Air blast circuit breaker, SF₆ circuit breaker, Vacuum circuit breaker, Circuit breaker duties and ratings, Testing and maintenance of circuit breakers, HRC and other types of fuse, Isolators

UNIT V

Power System Transients

Overvoltage in the transmission lines, Fault clearance, Lightning and switching surges, Transmission, refraction and attenuation of surges. Ground wire, Sphere gaps, Lightning arrestors, BIL and insulation coordination, Grounding of power system.

Text Books

1. Switchgear and protection Sunil S. Rao, Khanna Publishers
2. Power System Engg. Soni Gupta & Bhatnagar, Dhanpat Rai & Sons
3. A course in Electrical Power, C.L. Wadhawa, New Age International
4. Power system protection and switchgear, B. Ram, Wiley Eastern Ltd.

Reference Books

1. Power system protection & switchgear, Badriram & D.V. Vishwakarma, TMH
2. Switchgear & Protection, M.V. Deshpande, TMH

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Instrumentation and Process Control	Course Code: EA6220		
Credit: 4.5	L 3	T 1	P 2
Year: 3 rd	Semester: VI		

UNIT – 1

Transducer – I

Definition, advantages of electrical transducers, classification, characteristics, factors affecting the choice of transducers, Potentiometers, Strain gauges, Resistance thermometer, Thermistors, Thermocouples, LVDT, RVDT

UNIT – 2

Transducer – II

Capacitive, Piezoelectric Hall effect and opto electronic transducers. Measurement of Motion, Force pressure, temperature, flow and liquid level.

UNIT – 3

Telemetry

General telemetry system, land line & radio frequency telemetering system, transmission channels and media, receiver & transmitter. Data Acquisition System: Analog data acquisition system, Digital data acquisition system, Modern digital data acquisition system.

UNIT – 4

Display Devices and Recorders

Display devices, storage oscilloscope, spectrum analyzer, strip chart & x-y recorders, magnetic tape & digital tape recorders.

Recent Developments: Computer aided measurements, fibre optic transducers, microprocessors, smart sensors, smart transmitters.

UNIT – 5

Process Control

Principle, elements of process control system, process characteristics, proportional (P), integral (I), Derivative (D), PI, PD and PID control modes. Electronic, Pneumatic & digital controllers.

Text Books:

1. A.K.Sawhney, “Advanced Measurements & Instrumentation”, DhanpatRai& Sons
2. B.C. Nakra&K.Chaudhry, “Instrumentation, Measurement and Analysis”, Tata McGraw Hill 2nd Edition.
3. Curtis Johns, “Process Control Instrumentation Technology”, Prentice Hall

Reference Books:

4. E.O. Decblin, “Measurement System – Application & design”, McGraw Hill.
5. W.D. Cooper and A.P. Beltried, “Electronics Instrumentation and Measurement Techniques”, Prentice Hall International
6. RajendraPrasad, “Electronic Measurement and Instrumentation Khanna Publisher
7. M.M.S. Anand, “Electronic Instruments and Instrumentation Technology” PHI Learning.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Power System Analysis	Course Code: EA6010		
Credit: 3.5	L 3	T 1	P 0
Year: 3 rd	Semester: VI		

UNIT – 1

Introduction

Representation of power system components like synchronous machine, transformer, transmission line. One line diagram, Impedance and Reactance diagram, per unit system of calculation, Brief description of power system components like synchronous machine, transformer, busbar, transmission line and isolators.

UNIT – 2

Load Flow Analysis

Bus classifications, Formation of bus admittance matrix by singular transformation, Formation of load flow problem, Gauss – Siedel and Newton – Raphson method of load flow analysis, Approximation of Newton – Raphson load flow analysis, Fast decoupled method.

UNIT – 3

Fault Analysis

Types of fault – shunt and series, Calculation of fault current and voltages for symmetrical short circuit, Symmetrical components, Sequence impedance, Unsymmetrical short circuits, Open conductor fault, Current limiting reactors

UNIT – 4

Stability Analysis

Introduction to steady state and transient Stability of power systems, Swing equation, Equal area criteria, Solution of swing equation, Methods of improving stability

UNIT – 5

Distribution System & Substations

Different types of distribution systems, Distribution from one and both ends, Ring mains, Unbalanced loading, 3 phase 4 wire and 3 phase 5 wire distribution system, Layout of distribution substation, Rural electrification and grounding.

Text Books

1. W.D. Stevenson, “Element of Power System Analysis”, McGraw Hill, USA
2. C.L. Wadhwa, “Electrical Power Systems”, New Age International Ltd., Third Edition
3. Ashfaq Husain, “Power System”, CBS Publishers & Distributors, India
4. B.R. Gupta, “Power System Analysis & Design”, S.Chand& Co, Third Edition
5. M.V. Deshpande, “ Electrical Power System Design”, Tata McGraw Hill

Reference Books

1. Soni, Gupta &Bhatnagar, “A Course in Electrical Power”, DhanpatRai& Sons, India
2. S.L. Uppal, “ Electric Power”, Khanna Publishers
3. S.N. Singh, “Electric Power Generation, Transmission & Distribution”, PHI, New Delhi

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Modern Control System	Course Code: EA6020		
Credit: 3.5	L 3	T 1	P 0
Year: 3 rd	Semester: VI		

UNIT – 1

Discrete Data Systems: Introduction to discrete time systems, sample and hold circuits, pulse transfer function, representation by differential equations and its solution using z-transform and inverse-z transforms, analysis of LTI systems, unit circle concepts.

UNIT – 2

State Space analysis

State equations for dynamic systems, State equations using phase, physical and canonical variables, realization of transfer matrices, Solution of state equation, concepts of controllability, observability, Controllability and Observability tests.

UNIT – 3

Non-linear System & Linearization: Introduction to non-linear system and their state variable representation. Linearization, describing function of various non-linearities. Stability analysis using describing function.

UNIT – 4

Stability: Liapunov's method, generation of Liapunov's function, Popov's criteria, design of state observers and controllers, adaptive control systems, model reference.

UNIT – 5

Optimal Control: Introduction, formation of optimal control problems, calculus of variation, minimization of functions, constrained optimization, dynamic programming, performance index, optimality principles, Hamilton – Jacobian equation, linear quadratic problem, Riccati II equation and its solution, solution of two point boundary value problem

Text Books:

1. K. Ogata, "Modern Control Engineering", Prentice Hall of India.
2. M. Gopal, "Modern Control System", Wiley Eastern.
3. Stefani, Shahain, Savant, Hostetter, "Design of feedback control system", oxford university press.

Reference Books:

1. B.D.O. Anderson and IB. Moore, " Optimal Control System: Linear Quadratic Methods", Prentice Hall International.
2. U. Itkis, "Control System of Variable Structure", John Wiley and Sons.
3. H. Kwakemaok and R. Sivan, "Linear Optimal Control System", Wiley Interscience.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Principles of Communication Engineering	Course Code: FA63E0		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: VI		

UNIT – 1

Amplitude Modulation: Amplitude modulation, DSBSC, SSB and VSB modulation and demodulation schemes, AM transmitters and receivers, super-heterodyne receiver, IF amplifiers, AGC circuits. Frequency division multiplexing.

UNIT – 2

Angle Modulation: Frequency modulation, phase modulation, Generation of frequency modulation FM receivers and demodulators

Noise: External noise, internal noise, Noise calculations, signal to noise ratio, Noise in AM and FM systems

UNIT – 3

Pulse Communication: Sampling Process, PAM, PWM, PPM and PCM, Delta modulation and adaptive delta modulation

Digital Modulation: Introduction, brief description of phase shift keying(PSK), Differential phase shift keying (DPSK), frequency shift Keying (FSK), Quadrature amplitude modulation (QAM) and time division multiplexing (TDM).

UNIT – 4

Radio Propagation: Ground waves, sky wave propagation, space waves, tropospheric scatter propagation,

Satellite Communication: transponders, Geo-stationary satellite system, low earth and medium earth-orbit satellite system. Introduction to Cellular system. Personal communication system (PCS), data communication with PCS.

UNIT – 5

Television: TV systems and standards, scanning and synchronizing, common video and sound circuits, vertical and horizontal deflections, colour transmission and reception.

Fibre Optical Communication Optical fibre and fibre cables, fibre characteristics and classification, fibre optic components and systems.

Text Books :

1. G. Kennedy and B. Davis , “Electronic Communication Systems” Tata McGraw Hill
2. Simon Haykin, “ Communication Systems” John Wiley & Sons

Reference Books :

1. Roy Blake, “ Wireless Communication Technology” Thomson Asia Pvt. Ltd. Singapore
2. B. P. Lathi, “Modern Analog and Digital Communication Systems” Oxford University Press.
3. Taub& Schilling, “Principles of Communication Systems” McGraw Hill.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch EA6010: POWER SYSTEM LAB

Note: - At least 8 experiments should be performed out of which 3 should be simulation based. The department may add 3 to 4 more experiments in the following list.

(A) Hardware Based:

1. To determine direct axis reactance (x_d) and quadrature axis reactance (x_q) of a salient pole alternator.
2. To determine negative and zero sequence reactances of an alternator.
3. To determine sub transient direct axis reactance (x_d) and sub transient quadrature axis reactance (x_q) of an alternator
4. To determine fault current for L-G, L-L, L-L-G and L-L-L faults at the terminals of an alternator at very low excitation
5. To study the IDMT over current relay and determine the time current characteristics
6. To study percentage differential relay
7. To study Impedance, MHO and Reactance type distance relays
8. To determine location of fault in a cable using cable fault locator
9. To study ferranti effect and voltage distribution in H.V. long transmission line using transmission line model.
10. To study operation of oil testing set.

Simulation Based Experiments (using MATLAB or any other software)

11. To determine transmission line performance.
12. To obtain steady state, transient and sub-transient short circuit currents in an alternator
13. To obtain formation of Y-bus and perform load flow analysis
14. To perform symmetrical fault analysis in a power system
15. To perform unsymmetrical fault analysis in a power system

EA6220: INSTRUMENTATION LAB

Note: Minimum eight experiments are to be performed from the following list. The department may add 3 to 4 more experiments in the following list.

1. Measurement of displacement using LVDT.
2. Measurement of displacement using strain gauge based displacement transducer.
3. Measurement of displacement using magnetic pickup.
4. Measurement of load using strain gauge based load cell.
5. Measurement of water level using strain gauge based water level transducer
6. Measurement of flow rate by anemometer
7. Measurement of temperature by RTD
8. Measurement of temperature by thermocouple
9. Study of P, PI and PID controllers
10. Study of storage oscilloscope and determination of transient response of RLC circuit.
11. Determination of characteristics of a solid state sensor/fibre-optic sensor
12. Design and test a signal conditioning circuit for any transducer
13. Study of data acquisition system using “lab view” software and test all signal points
14. Measurement of sine, triangular, square wave signal of function generator and verify its frequency at 100 Hz tap point using “labview” software.
15. Measurement of voltage and current signal of programmable power supply using Lab view GPIB interface

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Electric Drives	Course Code: EA7210		
Credit: 4.5	L	T	P
	3	1	2
Year: 4th	Semester: VII		

UNIT – 1

Fundamentals of Electric Drive: Electric Drives and its parts, advantages of electric drives, classification of electric drives; Speed-torque conventions and multi-quadrant operations; Types of load, Load torque: components, nature and classification

Dynamics of Electric Drive: Dynamics of motor-load combination; Steady state stability of Electric Drive; Load equalization.

UNIT – 2

Selection of Motor Power rating: Thermal model of motor for heating and cooling, classes of motor duty, determination of motor power rating for continuous duty, short time duty and intermittent duty.

UNIT – 3

Electric Braking: Purpose and types of electric braking, braking of dc, three phase induction and synchronous motors

Dynamics During Starting and Braking: Calculation of acceleration time and energy loss during starting of dc shunt and three phase induction motors, methods of reducing energy loss during starting; Energy relations during braking, dynamics during braking

Special Drives: Switched Reluctance motor,.

UNIT – 4

Power Electronic Control of DC Drives: Single phase and three phase controlled converter fed separately excited dc motor drives (continuous conduction only); dual converter fed separately excited dc motor drive; rectifier control of dc series motor; Chopper control of separately excited dc motor and dc series motor.

UNIT – 5

Power Electronic Control of AC Drives:

Three Phase Induction Motor Drive: Static Voltage control scheme, static frequency control scheme (VSI, CSI, and cyclo – converter based) static rotor resistance and slip power recovery control schemes.

Text Books:

1. G.K. Dubey, “Fundamentals of Electric Drives”, Narosa publishing House.
2. V.Subrahmanyam, “Electric Drives: Concepts and Applications”, Tata McGraw Hill.

Reference Books:

1. M.Chilkin, “Electric Drives”, Mir Publishers, Moscow.
2. Mohammed A. El-Sharkawi, “Fundamentals of Electric Drives”, Thomson Asia Pvt. Ltd. ,Singapore.
3. N.K. De and Prashant K.Sen, “Electric Drives”, Prentice Hall of India Ltd.
4. S.K.Pillai, “A First Course on Electric Drives”, New Age International.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Artificial Neural Network and Fuzzy Logic	Course Code: EA7010		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

UNIT – 1

Neural Networks-1(Introduction & Architecture): Neuron, biological neuron, Artificial Neuron and its model, activation functions, Neural network architecture: Single layer and multilayer feed forward networks, recurrent networks, and various learning techniques.

UNIT – 2

Back propagation networks Architecture: perceptron model, single layer artificial neural networks, multilayer perceptron model; back propagation algorithm, effects of learning coefficient; factors affecting back propagation training, applications.

UNIT – 3

Fuzzy logic-I (Introduction): Basic concept of fuzzy, Fuzzy sets and crisp sets, Fuzzy sets theory and operations, Properties of fuzzy sets. Fuzzy and crisp relation.

UNIT – 4

Fuzzy Membership Functions, Rules: Membership functions, inference in fuzzy logic, fuzzy if then rules, fuzzifications & defuzzifications, fuzzy controller.

UNIT – 5

Application of Neural and fuzzy logic: Application of neural network, Neural Network approach in load flow study. Fuzzy logic application in industries.

Text Books:

1. S. Rajasekaran and G.A.V.Pai, “Neural Networks, Fuzzy Logic and Genetic Algorithms”, PHI

Reference Books:

1. Simon Haykins, ”Neural Networks” Prentice Hall of India
2. Moore, “Digital control devices”, ISA press, 1986.
3. Kumar Satish, “Neural Networks”, Tata McGraw Hill
4. Timothy J Ross, “Fuzzy Logic with Engineering Applications”, McGraw Hill 1997

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Power System Operation and Control	Course Code: EA7020		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VII		

UNIT 1

Introduction: Structure of power system, power system control center, level decomposition in power system, power system security, various operational stages of power system, power system voltage stability, introduction to SCADA

UNIT 2

Economic Operation: Concept and problems of unit commitment, input output characteristics of thermal and hydroplants, system constraints, Optimal operation of thermal units without and with transmission losses, penalty factor, incremental transmission loss, transmission loss, formula (without derivation), hydrothermal scheduling long and short terms, concept of optimal power flow

UNIT 3

Load Frequency Control: Concept of load frequency control, load frequency control of single area system: turbine speed governing system and modeling, block diagram representation of single area system, steady state analysis, dynamic response control area concept, P-I control, load frequency Control and economic dispatch control. Load frequency control of two area system tie line power modeling, block diagram representation of two area system,

UNIT 5

Automatic Voltage Control: Schematic diagram and block diagram representation, Different type of excitation system & their controllers. Concept of voltage control, methods of voltage control, control by tap changing transformer. Shunt compensation, series compensation, phase angle compensation

UNIT 6

Fact Devices

Concept and objectives of FACTS controllers, Introduction to different FACT controllers like TCR, FC-TCR, TSC, SVC, STATCOM, TSSC, TCSC, SSSC, TC-PAR, UPFC

Text Books:

1. D.P. Kothari & I.J. Nagrath, "Modern Power System Analysis" Tata McGraw Hill, 3rd edition.
2. P.S.R. Murty, "Operation and Control in Power Systems" B.S. publications

Reference Books:

1. N.G. Hingorani & I. Gyugyi, "Understanding Facts "Concepts and Technology of Flexible AC Transmission Systems", IEEE Press Publications
2. A.J. Wood & B.F. Wollenburg, "Power Generation, Operation and Control ", John Wiley & Sons
3. O.J. Elgerd, "Electric Energy System Theory", Tata McGraw Hill.
4. P. Kundur, "Power System Stability and Control", McGraw Hill.
5. M.H. Rashid, "Power Electronics: Circuits, Devices and Applications "Prentice Hall of India", 3rd edition.
6. T.K. Nagsarkar & M.S. Sukhiza, "Power System Analysis", Oxford University Press

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Electrical Machine Design	Course Code: EA7030		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

UNIT 1

Introduction

Standards & standardization, Classification of insulating materials. Modes of heat dissipation & temperature rise-time curves. Methods of cooling ventilation (induced & forced, radial & axial), direct cooling & quantity of cooling medium.

UNIT 2

Design of Transformer

Output equation design of core, yoke and windings, overall dimensions, Computation of no load current to voltage regulation, efficiency and cooling system designs.

UNIT 3

Design of Synchronous Machines

Output equations of synchronous machines, specific electric and magnetic loadings, separation of main dimensions, Rotor design, Design of field system. Estimation of performance from design data. Flow chart for design of three phase synchronous generators.

UNIT 4

Design of Induction Machines

Output equations, specific electric and magnetic loadings, factors affecting size of rotating machines, separation of main dimensions, selection of frame size, Rotor design of three phase induction motors. Circle diagram, Estimation of performance from design data. Flow chart for design of three phase induction motors

UNIT 5

Design of DC Machines & Computer Aided Design

Output equation, Main dimensions, Design of armature, commutator, flow chart for design of dc machines.

Philosophy of computer aided design, advantages and limitations. Computer aided design approaches analysis-, synthesis and hybrid methods.

Text Books:

1. A.K. Sawhney, "Electrical Machine Design", DhanpatRai& Sons.
2. S. K. Sen, "Principles of Electrical Machine Design with Computer Programmes", Oxford & IBH Pub. Company

Reference Books

1. M.G. Say, "Alternating Current Machines", Pitman Publishing Company Ltd.
2. A.E. Clayton, "The Performance and Design of DC Machines", Pitman Publishing Company Ltd.
3. H. Cotton, "Advanced Electrical Technology" Wheeler Publishing.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

EA7210: ELECTRIC DRIVES LAB

Note: - At least 8 experiments should be performed out of which 3 should be simulation based. The department may add 3 to 4 more experiments in the following list.

Hardware Based Experiments:

1. To study speed control of separately excited dc motor by varying armature voltage using single-phase fully controlled bridge convertor.
2. To study speed control of separately excited dc motor by varying armature voltage using single-phase half controlled bridge convertor.
3. To study speed control of separately excited dc motor using single-phase dual converter (Static Ward-Leonard Control)
4. To study speed control of separately excited dc motor using MOSFET/IGBT chopper.
5. To study closed loop control of separately excited dc motor.
6. To study speed control of single-phase induction motor using single-phase ac voltage controller.
7. To study speed control of three-phase induction motor using three-phase ac voltage controller.
8. To study speed control of three-phase induction motor using three-phase current source inverter.
9. To study speed control of three-phase induction motor using three-phase voltage source inverter.
10. To study speed control of three-phase slip ring induction motor using static rotor resistance control using rectifier and chopper.
11. To study speed control of three-phase slip ring induction motor using static scherbius slip power recovery control scheme.

Simulation Based Experiments (using MATLAB or any other software)

1. To study starting transient response of separately excited dc motor.
2. To study speed control of separately excited dc motor using single phase fully/half controlled bridge converter in discontinuous and continuous current modes.
3. To study speed control of separately excited dc motor using chopper control in motoring and braking modes.
4. To study starting transient response of three phase induction motor.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: High Voltage Engineering (<i>Departmental Elective-I</i>)	Course Code: EA7610		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VII		

UNIT – 1

Break Down In Gases: Ionization processes, Townsend's criterion, breakdown in electronegative gases, time lags for breakdown, streamer theory, Paschen's law, breakdown in non-uniform field, breakdown in vacuum.

Break Down In Liquid Dielectrics: Classification of liquid dielectric, characteristics of liquid dielectric, breakdown in pure liquid and commercial liquid.

Break Down In Solid Dielectric: Intrinsic breakdown, electromechanical breakdown, breakdown of solid, dielectric in practice, breakdown in composite dielectrics.

UNIT – 2

Generation of High Voltage and Currents: Generation of High direct Current Voltage, Generation of high voltage alternating voltages, generation of impulse voltages generation of impulse currents, tripping and control of impulse generators.

UNIT – 3

Measurement of High Voltage and Currents: Measurement of High direct Current Voltages, Measurement of High alternating & Impulse voltages, Measurement of High direct, alternating & Impulse Currents, Cathode ray Oscillographs for impulse voltage and current measurements.

UNIT – 4

Over Voltage Phenomenon & insulation Coordination: Lighting Phenomenon as natural cause for over voltage, over voltage due to switching surges and abnormal conditions, Principal of insulation coordination.

UNIT – 5

Non -Destructive Testing: Measurement of direct current resistively, measurement of dielectric constant and loss factor, partial discharge measurements.

High voltage testing: Testing of insulator & bushing, testing of isolators and circuit breakers, testing of cables, testing of transformers, testing of surge arresters, radio interference measurements.

Text Book:

1. M.S. Naidu & V. Kamraju," High voltage Engineering, Tata Mc-Graw hill.

Reference books:

1. E Kuffel and W.S.Zacngal , High voltage Engineering:, Pergamum Press
2. M.P Churasia, High Voltage Engineering Khanna Publishers.
3. R.S. Jha,"High voltage Engineering", DhanpatRai& Sons.
4. C.L. Wadhwa,"High Voltage Engineering", Wiley Eastern Ltd.
5. M.Khalifa," High Voltage Engineering theory and practice, "Marcel Dekker.
6. Subir Ray." An Introduction to High Voltage Engineering" Prentice Hall of India.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: FACTS Devices (<i>Departmental Elective-I</i>)	Course Code: EA7620		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VII		

UNIT – 1

FACTS: Concept, power flow and stability, basic theory of line compensation

Power Electronic Controllers: Review of PWM voltage source inverters used in FACTS, classifications of FACTS controllers.

UNIT – 2

Static Shunt Compensators: SVC and STATCOM- TCR, TSC, system stability.

Static Series Compensators: GCSC, TSSC, TCSC and SSSC, control techniques.

UNIT – 3

Static Voltage and Phase Angle Regulators: Power flow control, TCVR and TCPAR.

Unified Power Flow Controller (UPFC): Concept of power flow control, operation and control of UPFC, Interline Power Flow Controller.

UNIT – 4

Stability Analysis: Modeling of FACTS devices, optimization of FACTS, transient and dynamic stability enhancement

UNIT – 5

Applications of FACTS controller: Principle of control of FACTS in HVDC links, co- ordination of FACTS devices with HVDC links, case study. Advanced FACTS devices.

Text Books:

1. Hingorani N.G. and Gyugyi L., “Understanding FACTS”, IEEE Press, Standard Publishers Distributors.
2. Ghosh A. and Ledwich G., “Power Quality Enhancement Using Custom Power Devices,” Kluwer Academic Publishers.

Reference Books:

1. Song Y. H. and Johns A. T., “Flexible AC Transmission Systems (FACTS)”, IEE Press.
2. Mathur R.M. and Varma R.K., “Thyristor–Based FACTS Controllers for Electrical Transmission Systems,” John Wiley and Sons.
3. Padiyar K.R., “FACTS Controller in Power Transmission and Distribution”, New Age International Private Limited.
4. Miller T.J.E., “Reactive Power Control in Electric Systems,” Wiley-Interscience.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Power Converter Applications (Departmental Elective-I)	Course Code: EA7630		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VII		

UNIT – 1

HVDC Transmission:

Schematic diagram, modes of operation, twelve pulse line commutated converters, effect of source inductance, control of HVDC converters, converter faults and protection, harmonic filters.

UNIT – 2

FACT Controllers:

Principle of power transmission, principles of shunt compensation and series compensation; Shunt compensators-TCR, TSC, SVC, STATCOM
Series compensators-TSSC, FCSC, TCSC, SSSVC; Phase angle compensator, Unified power flow controller (UPFC), comparison of compensators.

UNIT – 3

Power Supplies:

Desirable specifications of power supplies, drawbacks of linear power supply.
Switch-Mode Power supply (SMPS)-schematic diagram, flyback converter, forward converter, push-pull converter, half bridge and full bridge converters; Uninterruptible power supply (UPS)-configurations of offline and on-line UPS, switch mode and resonant power supplies; air-craft power supply.

UNIT – 4

Industrial Applications:

High frequency inverters for induction and dielectric heating, ac voltage controllers for resistance heating and illumination control, high frequency fluorescent lighting, electric welding control.

UNIT – 5

Interconnection of Renewable Energy Sources to the Utility Grid:

Photovoltaic array interconnection, wind and small hydro interconnection, interconnection of energy storage systems; DC circuit breaker, single phase and three phase ac switches; Excitation control of synchronous generators.

Text Books:

1. Ned Mohan, T.M. Undeland and William P. Robins, "Power Electronics: Converters, Applications and Design", John Wiley & Sons.
2. M.H. Rashid, "Power Electronics: Circuits, Devices and Applications" Prentice Hall of India.

Reference Books:

1. K.R. Padiyar, "HVDC Power Transmission: Technology and System Reactions" New Age International

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Bio Instrumentation (<i>Departmental Elective-I</i>)	Course Code: EA7640		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VII		

UNIT – 1

Basic Physiological system of body: Problem encountering measuring leaving system, bioelectric potential, biomaterial, Basic transducers principle, Active and passive transducers, transducer for biomedical applications, Generation, propagation and distribution of bioelectric potential (ECG, EEG and EMG)

UNIT – 2

Bio Potential Electrode: Basic type (micro skin surface and needle electrodes), Biochemical transducer (PH, blood gas and specification electrodes), Cardiovascular System & Measurement, Heat and cardiovascular system and circulation block diagram blood pressure and, measurement, characteristics of blood flow and heart sound, Electrocardiography, ECG an lead, configuration, ECG recording and their types

UNIT – 3

Nervous System: The anatomy of nervous system, neuronal communication, EPSP, IPSP, Organization of brain, Measurement from the nervous system, Systematic skin and body temperature measurement, Temperature measurement, Brief idea about ultrasonic measurements

UNIT – 4

Patient Care Monitoring: Element of intensive care, Organizational the hospital for patient-care monitoring, Pace makers-type, systems, mode and generators, Defibrillator-types. Biotelemetry and application of telemeter inpatient care

UNIT – 5

Automation of Chemical Test: Instrumentation for diagnostic X rays, Interfacing computer with medical instrumentation and other equipments, Bio medical computer application. Shock hazards from electrical equipments, methods of accident prevention.

Text Books:

1. Khandpur R.S. - Biomedical Instrumentation- TMH
2. Venkata Ram, S.K.-Bio-Medical Electronics & Instrumentation (Revised) - Galgotia.

Reference Books:

1. Cromwell- Biomedical Instrumentation and Measurements- PHI
2. Webster, J.G. –Bio- Instrumentation, Wiley (2004)
3. Ananthi, S. –A Text Book of Medical Instruments-2005-New Age International
4. Carr & Brown –Introduction to Biomedical Equipment Technology – Pearson
5. Pandey & Kumar-Biomedical Electronics and Instrumentation. - Kataria

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: EHV A.C. and D.C. Transmission (Departmental Elective)	Course Code: EA8610		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VIII		

UNIT – 1

Introduction: Need of EHV transmission, standard transmission voltage, comparison of EHV AC & DC transmission systems and their applications & limitations, surface voltage gradients in conductor, distribution of voltage gradients on sub-conductors, mechanical considerations of transmission lines, modern trends in EHV AC & DC transmission, Types of tower

UNIT – 2

EHV AC Transmission: Corona loss formulas, corona current, audible noise- generation and characteristics corona pulses their generation and properties, radio interference (RI) effects, over voltage due to switching, ferro-resonance, reduction of switching surges on EHV system.

UNIT – 3

Extra High Voltage Testing: Characteristics and generation of impulse voltage, generation of high AC and DC voltages, measurement of high voltage by sphere gaps and potential dividers. Consideration for Design of EHV Lines, Design factors under steady state limits, EHV line insulation design based upon transient over voltages. Effects of pollution on performance of EHV lines.

UNIT – 4

EHV DC Transmission-I: Types of dc links, converter station, choice of converter configuration and pulse number, effect of source inductance on operation of converters, principle of dc link control, converter controls characteristics, firing angle control, current and excitation angle control, power control, starting and stopping of dc link.

UNIT – 5

EHV DC Transmission- II: Converter faults, protection against over currents and over voltage, HVDC Circuit breakers, Smoothing reactors, generation of harmonics, ac and dc filters, multi –terminal dc systems (MTDC): Types, control, protection and application.

Text Books:

1. R.D. Begamudre, “Extra High Voltage AC Transmission Engineering “Wiley Eastern
2. K.R Padiyar, “HVDC power transmission System, Technology and System Reactions “New Age International.

Reference Books:

1. M.HRashid, ”Power Electronics: Circuit, Devices and Applications”, Prentice hall of India.
2. S .Rao, “EHV AC & HVDC Transmission Engineering and practice”, Khanna Publishers
3. J Arrillaga, ”High Voltage Direct current Transmission”, IFFE Power Engineering Series 6, Peter Peregrionus Ltd. London.
4. M.S Naidu & V.K Kamaraju “High Voltage Engineering”, Tata McGraw Hill.

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Telemetry and Data Transmission (Departmental Elective)	Course Code: EA8620		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VIII		

UNIT – 1

Sampling Fundamentals: Introduction to sampling theorem and sampling process, convolution, computing minimum sampling rate. Aliasing Errors.

Digital Modulation Techniques: Review of PCM, DPCM, Methods of binary data transmission, Data Formats, DM code converters, PSK, QPSK, FSK, probability of error, phase ambiguity resolution and differential encoding, error detection, error correction, error correction codes.

UNIT – 2 & 3

Data Handling System: Block schematic, Sensors, Signal conditioners, Multiplexing- high level and low level, ADC- range and resolution, Word Format, Frame format, Frame synchronizer codes, R. F. links, X24, RS 422, RS423, RS 232C interfaces, Multi terminal configuration, Multiplier & Concentrator, Data Modems, Data transmission over telephone lines.

Data Reception Systems: Bit synchronizers, frame synchronizers, subframe synchronizers, PLL, Display systems.

UNIT – 4

Remote Control: Communication based processing control systems, pipelines, Operational security systems components, Pipeline control, Power system control, Programmable controllers for factory automation.

Command: Tone command system, Tone digital command system, ON/OFF command and data commands.

UNIT – 5

Aerospace Telemetry: Signal formation and conversion, Multiplexing techniques in telecontrol, Industrial telecontrol installations, reliability in telecontrol installations.

Text Books:

1. Patranabis, "Telemetry Principles", Tata McGraw Hill.
2. Schweber, "Data Communication", McGraw Hill.
3. Berder&Menjewlse, "Telemetry Systems".

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Non-Conventional Energy Resources (Departmental Elective)	Course Code: EA8630		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VIII		

UNIT – 1

Introduction Various non-conventional energy resources: Introduction, availability, classification, relative merits and demerits, present energy scenario.

UNIT – 2

Solar Cells: Theory of solar cells. Solar cell materials, solar cell power plant, limitations. Solar Thermal Energy Solar radiation flat plate collectors and their materials, applications and performance, focusing of collectors and their materials, applications and performance; solar thermal power plants, thermal energy storage for solar heating and cooling, limitations.

UNIT – 3

Geothermal Energy: Resources of geothermal energy, thermodynamics of geo-thermal energy conversion-electrical conversion, non-electrical conversion, environmental considerations. Magneto-hydrodynamics (MHD) Principle of working of MHD Power plant, performance and limitations.

UNIT – 4

Fuel Cells: Principle of working of various types of fuel cells and their working, performance and limitations. Thermo-electrical and thermionic conversions, Principle of working, performance and limitations.

Wind Energy: Wind power and its sources, site selection, criterion, momentum theory, classification of rotors, concentrations and augments, wind characteristics. Performance and limitations of energy conversion systems.

UNIT – 5

Bio-mass: Availability of bio-mass and its conversion theory.

Ocean Thermal Energy Conversion (OTEC): Availability, theory and working principle, performance and limitations.

Wave and Tidal Wave: Principle of working, performance and limitations. Waste Recycling Plants

Text Books:

1. D.S. Chauhan, "Non-Conventional Energy Resources", New Age International
2. B.H. Khan, "Non-Conventional Energy Resources", Tata McGraw Hill

Reference Books:

1. AndraGabel, "A Handbook for Engineers and Economists".
2. Mani, "Handbook of Solar radiation Data for India".
3. Peter Auer, "Advances in Energy System and Technology". Vol. 1 & II Edited by Academic Press.
4. F.R. the MITTRE, "Wind Machines" by Energy Resources and Environmental Series.
5. Frank Kreith, "Solar Energy Hand Book".
6. N. Chermisinogg and Thomes, C. Regin, "Principles and Application of Solar Energy".
7. N.G. Calvert, "Wind Power Principles".
8. W. Palz., P. Chartier and D.O. Hall, "Energy from Biomass".

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Special Electrical Machines (<i>Departmental Elective</i>)	Course Code: EA8640		
Credit: 3.5	L	T	P
	3	1	0
Year: 4th	Semester: VIII		

UNIT – 1

Poly-phase AC Machines: Construction and performance of double cage and deep bar three phase induction motors; e.m.f. injection in rotor circuit of slip ring induction motor, concept of constant torque and constant power controls, static slip power recovery control schemes (constant torque and constant power), Introduction to multiphase machines.

UNIT – 2

Single phase Induction Motors: Construction, starting characteristics and applications of split phase, capacitor start, capacitor run, capacitor start, capacitor-run and shaded pole motors.

Two Phase AC Servomotors: Construction, torque-speed characteristics, performance and applications.

UNIT – 3

Stepper Motors: Principle of operation, variable reluctance, permanent magnet and hybrid stepper motors, characteristics, drive circuits and applications.

Switched Reluctance Motors: Construction; principle of operation; torque production, modes of operation, drive circuits.

UNIT – 4

Permanent Magnet Machines: Types of permanent magnets and their magnetization characteristics, demagnetizing effect, permanent magnet dc motors, sinusoidal PM ac motors, brushless dc motors and their important features and applications, PCB motors. Single phase synchronous motor; construction, operating principle and characteristics of reluctance and hysteresis motors; introduction to permanent magnet generators.

UNIT – 5

Single Phase Commutator Motors: Construction, principle of operation, characteristics of universal and repulsion motors; Linear Induction Motors. Construction, principle of operation, Linear force, and applications.

Text Books:

1. P.S. Bimbhra “Generalized Theory of Electrical Machines” Khanna Publishers.
2. P.C. Sen “Principles of Electrical Machines and Power Electronics” John Willey & Sons, 2001

Reference Books:

1. G.K. Dubey “Fundamentals of Electric Drives” Narosa Publishing House, 2001
2. Cyril G. Veinott “Fractional and Sub-fractional horse power electric motors” McGraw Hill International, 1987
3. M.G. Say “Alternating current Machines” Pitman & Sons

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Power Quality (<i>Departmental Elective</i>)	Course Code: EA8650		
Credit: 3.5	L	T	P
	3	1	0
Year: 4 th	Semester: VIII		

UNIT – 1

Power Quality Terms and Definitions: Introduction, transients, sag and swell, short duration/long duration voltage variations, voltage imbalance, waveform distortion, voltage fluctuations, power frequency variation.

Power Quality Problems: Poor load power factor, loads containing harmonics, notching in load voltage, DC offset in loads, unbalanced loads, disturbance in supply voltage.

UNIT – 2

Fundamentals of Harmonics: Representation of harmonics, waveform, harmonic power, measures of harmonic distortion; current and voltage limits of harmonic distortion: IEEE, IEC, EN, NORSOK

Causes of Harmonics: 2-pulse, 6-pulse and 12-pulse converter configurations, input current waveforms and their harmonic spectrum; Input supply harmonics of AC regulator, integral cycle control, cycloconverter, transformer, rotating machines, ARC furnace, TV and battery charger.

UNIT – 3

Effect of Harmonics: Parallel and series resonance, effect of harmonics on static power plant- transmission lines, transformers, capacitor banks, rotating machines, harmonic interference with ripple control systems, power system protection, consumer equipments and communication systems, power measurement.

UNIT – 4

Elimination/Suppression of Harmonics: High power factor converter, multi-pulse converters using transformer connections (Delta, polygon)

Passive Filters: Types of passive filters, single tuned and high pass filters, filter design criteria, double tuned filters, damped filters and their design.

UNIT – 5

Active Power filters: Compensation principle, classification of active filters by objective, systems configuration, power circuit and control strategy.

Shunt Active Filter: Single phase active filter, principle of operation, expression for compensating current, concept of constant capacitor voltage control; Three phase active filter: Operation, analysis and modeling; Instantaneous reactive power theory

Three phase series active filters: Principle of operation, analysis and modeling.

Other Techniques: Unified power quality conditioner, voltage source and current configurations, principle of operation for sag, swell and flicker control.

Text Books:

1. Roger. C. Dugan, Mark. F. McGranaghan, Surya Santoso, H.WayneBeaty, 'Electrical Power Systems Quality' McGraw Hill, 2003. (For Chapters 1,2,3, 4 and 5)

Reference Books:

2. G.T. Heydt, 'Electric Power Quality', 2nd Edition. (West Lafayette, IN, Stars in a Circle Publications, 1994). (For Chapter 1, 2, 3 and 5)
3. M.H.J Bollen, 'Understanding Power Quality Problems: Voltage Sags and Interruptions', (New York: IEEE Press, 1999). (For Chapters 1, 2, 3 and 5)
4. J. Arrillaga, N.R. Watson, S. Chen, 'Power System Quality Assessment', (New York: Wiley, 1999). (For Chapters 1, 2, 3, 4 and 5)
5. PSCAD User Manual

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Switch Mode and Resonant Converters (Departmental Elective)	Course Code: EA8660		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VIII		

UNIT – 1

Introduction: Linear power supply regulators and their drawbacks; switch mode power regulators-elements, salient features and application. Switch-Mode DC-DC Regulators, Without Isolation: Characteristics and analysis of Buck, Boost, BuckBoost, Cuk and Full bridge converters, Multiple output and Diode rectifier-fed Boost converters.

Unit – 2

Switching Power DC Supplies: Overview of Switch-mode dc power supply (SMPS), Introduction to dc-dc converters and their control. Characteristics and analysis of Flyback, Forward, Push-pull, Half bridge, Full bridge and Current source converters, control circuits; Design considerations

UNIT – 3

Switch-Mode DC-AC Inverters (DC to Sinusoidal AC): Basic concepts, single phase full bridge inverter (PWM with unipolar and bipolar voltage switching) and push-pull inverters, three phase PWM inverters other switching schemes. Power conditioners and Uninterruptible Power Supplies (UPS): Disturbances in commercial power supply, power quality and power conditioners, configurations of off-line and on-line UPS, various inverter arrangements, control, batteries.

UNIT – 4

Resonant Converters – I: Concept, advantage and limitations characteristics and analysis of series, parallel, series-parallel, resonant converters, quasi resonant converters, class E resonant inverter, class E rectifier.

UNIT – 5

Resonant Converters-II: ZCS resonant converters (L and M types), and ZVS resonant converters and their comparison Two quadrant ZVS resonant converters, resonant dc link inverters. Utility interface with Power Electronic Systems: Harmonic standards and recommended practices need for improved utility interface, improved single phase utility interface, Electromagnetic interference

Text Books:

1. M.H. Rashid, “Power Electronics: Circuits, Devices and Applications” Prentice hall of India, 3rd Edition
2. Ned Mohan, T.M. Undeland and William P. Robins, “Power Electronics: Converters, Applications and Design” John Willey & Sons, 2nd Edition

Reference Books:

1. M.S. Jamil Asghar, “Power Electronics” Prentice Hall of India
2. R.P. Severns and G.E. Bloom, “Modern DC to DC Switch-Mode Power Converter Circuits” Van Nostrand Reinhold
3. K.Kit Sum, “Switch-Mode Power conversion. Basic Theory and Design” Marcel Decker.
4. G. Chryssis, “High Frequency Switching Power supplies: Theory and Design” McGraw Hill

Course Structure & Syllabus of B.Tech – Electrical Engineering Applicable for 2013-2017 Batch

Course Title: Utilization of Electrical Energy & Traction (Departmental Elective)	Course Code: EA8670		
Credit: 3.5	L 3	T 1	P 0
Year: 4 th	Semester: VIII		

UNIT – 1

Electric Heating: Advantage & methods of electric heating, Resistance heating, Electric arc heating, Induction heating, Dielectric heating,

UNIT – 2

Electric Welding: Electric arc welding, electric resistance welding, Electric Welding control, Electrolyte Process: Principal of Electro deposition, laws of Electrolysis, application Electrolysis.

UNIT – 3

Illumination: Various definition, laws of Illumination, requirement of good lighting, Design of indoor lighting & outdoor lighting system.

Refrigeration and Air Conditioning: Refrigeration system, domestic Refrigerator, water cooler, Types of Air conditioning, Window air conditioner

UNIT – 4

Electric Traction – I: Types of electric traction, system of track electrification, Traction mechanics- types of services, speed time curve and its simplification, average and schedule speeds, Tractive effort specific energy consumption, mechanics of train movement, coefficient of adhesion and its influence

UNIT – 5

Electric Traction – II: Salient features of traction drives, Series-parallel control of dc traction drives (bridge traction) and energy saving, Power Electronic control of dc & ac traction drives, Diesel electric traction.

Text books:

1. H. Pratab. “Art & Science of Electric Energy’s” Dhanpat Rai & Sons.
2. G.K. Dubey,” Fundamentals of Electric Drives” Narosa Publishing house.

Reference Book:

1. H.Pratab, “Modern electric traction” DhanpatRai& Sons.
2. C.L. Wadhwa, “Generation, Distribution and Utilization of Electrical Energy “New Age International Publishers.

	Total				18.5

List of Elective –II

Course Code	Course Title
IA8610	Soft Computing
IA8620	Service Oriented Computing
IA8630	Introduction to Remote Sensing & GIS

**Course Structure & Syllabus of
B.Tech – Information Technology
Applicable for 2013-2017 Batch**

List of Elective –III

Course Code	Course Title
IA8640	Ethical Hacking
IA8651	Cyber Crime and Computer Forensics
IA8660	Pattern Recognition

List of Elective –IV

Course Code	Course Title
IA8670	Knowledge Management
IA8680	Software Project Management
IA8690	Information and Coding Theory

List of Open Electives (To be conducted in VIII Semester)

Sl. No.	Branch	Subject Code	Name of Elective subjects
1	Physics	OA8710 OA8720	1. Nano Scale Science and Technology 2. Photonics Technology
2	EE	EA8710 EA8720	1. Non-Conventional Energy Resources 2. Instrumentation and Process control
3	ME	LA8710 LA8720	1. Entrepreneurship development 2. Quality Management
4	Civil	CA8710 CA8720	1. Environment and Ecology 2. GIS
5	CSE	DA8710 DA8720	1. Business Intelligence 2. Artificial Intelligence
6	IT	IA8710 IA8720	1. Multi-Media Technology 2. IT In Business
7	ECE	FA8710	1. Consumer Electronics
8	Humanities	HA8710 HA8720	1. Industrial Psychology 2. Human Values and Ethics
9	MBA	GA8710 GA8730 GA8740	1. Organizational Behavior 2. Digital Marketing 3. Financial Modeling with Spread sheet

**Course Structure & Syllabus of
B.Tech – Information Technology
Applicable for 2013-2017 Batch
Summary of the Credits**

Year	Semester	Credit	Year Credit
First Year	I	21	45
	II	24	
Second Year	III	23.5	48
	IV	24.5	
Third Year	V	22.5	46.5
	VI	24	
Fourth Year	VII	21	39.5
	VIII	18.5	
Total			179

A. Evaluation Scheme for the following Courses will be as under:

Course	Evaluation Scheme (%)				
	Attendance	Test-1	Test-2	Final Test	Total
Aptitude Building-1	10	30	30	30	100
Aptitude Building-2	10	30	30	30	100
Value Addition Training	10	30	30	30	100
Soft Skills	10	30	30	30	100

B. Evaluation Scheme for Project will be as under:

Course	Evaluation Scheme (%)				
	Synopsis	Presentation	Report	Viva-Voce	Total
Project Phase-I	10	15	25	50	100
Project Phase-II					
Project Phase-III					

Project Phase-I & II will be evaluated by the Committee comprising of the following:

1. Head of the Department – Chairman
2. Teacher In-charge – Member
3. One nominee appointed by Director (Academic) – Member

Project Phase-III will be evaluated by the Committee comprising of the following:

1. Head of the Department – Chairman
2. Teacher In-charge – Member
3. One nominee appointed by Director (Academic) – Member
4. One nominee appointed by Vice Chancellor – Member

C. Evaluation Scheme for Industrial Training will be as under:

Course	Evaluation Scheme (%)			
	Training Report	Presentation	Monitoring	Total
Industrial Training	25	50	25	100

**Course Structure & Syllabus of
B.Tech – Information Technology
Applicable for 2013-2017 Batch**

Course Title: Engineering Maths-I	Course Code: MAT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT I: Matrices

8L

Elementary row and column transformation, rank of matrix, linear dependence, consistency of linear system of equations, Eigen values and Eigen vectors, Cayley-Hamilton theorem.

UNIT II: Differential Calculus

8L

Functions, Limits, Continuity, Differentiability, Leibnitz theorem, Partial differentiation, Euler's theorem, Expansion of functions of several variables, Extrema of functions of several variables, Lagrange's method of multipliers.

UNIT III: Infinite Series

6L

Introduction, sequences, series, convergence, series of positive terms, comparison test, Integral test, D'Alembert's Ratio test, Raabe's test, Cauchy's root test, Alternating series: Leibnitz rule, power series.

UNIT IV: Multiple Integrals

8L

Beta and Gamma functions, Double and Triple integrals, change of order of integration, change of variables, Dirichlet integral and its applications.

UNIT V: Vector Calculus

8L

Point functions, Gradient, Divergence and curl of a vector and their physical interpretation, line integral, surface integral, volume integral, Green's Theorem, Stoke's theorem, Gauss Divergence theorem.

References:

1. B. S. Grewal: Higher Engineering Mathematics, Khanna publication.
2. E. Kreyszig : Advanced Engineering Mathematics, Wiley publication.
3. R. K. Jain & S. R. K. Iyenger: Advanced Engineering Mathematics, Narosa publication.
4. G. Prasad: Differential & Integral calculus, Pothishala publication, Allahabad.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Engineering Physics	Course Code: PYT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT-I

(8) L

Interference:

Introduction, Coherent Sources, Analytical treatment of interference, Young's double slit experiment and its analysis, Conditions of Interference, Fresnel's Biprism, fringes with white light, Determination of wavelength of monochromatic light by using Fresnel's Biprism method, Displacement of Fringes, Interference in plane parallel thin film (reflected and transmitted light) and wedge shaped film(reflected light only), Newton's Rings, Determination of wavelength of monochromatic light and determination of refractive index of a liquid by using Newton's ring method.

UNIT-II

(8) L

Diffraction:

Introduction, Difference between Interference and diffraction, resultant of superposition of n simple harmonic coherent vibrations, Fraunhofer diffraction due to single slit: resultant intensity, conditions of maxima, minima, angular and linear width of central maximum, Double slit diffraction: resultant intensity, missing order, N-slit diffraction : resultant intensity, conditions of maxima and minima, missing orders, angular width of principal maxima, Diffraction grating: formation of spectra and missing order spectra in spectrum, dispersive power of grating, Resolving power, Rayleigh Criterion of resolution, Resolving power of plane transmission diffraction grating.

UNIT-III

(8) L

Polarization:

Polarised and unpolarised light and its pictorial representation, plane of polarisation and plane of vibration, Phenomenon of Double Refraction, positive and negative double refracting crystals, properties of ordinary and extra-ordinary Rays, Nicol Prism and its application as a polariser and analyser, Mathematical analysis of superposition of two linearly polarised light vectors, retardation plates – half wave plate and quarter wave plate, Production and detection of Plane, Circularly and Elliptically Polarized Light.

UNIT-IV

(10) L

Laser : Spontaneous emission, stimulate demission and stimulated absorption, Einstein's A and B Coefficients and relation between them, Principle of Laser Action, Construction and Working of He-Ne, Semiconductor Laser.

Introduction to Fibre Optics: Fundamental ideas about optical fiber, Types of fibers, Acceptance angle and cone, Numerical aperture.

Magnetic Properties of Materials: Basic Concept of Para-, Dia and Ferro-Magnetism, Phenomenon of Hysterisis

Magnetic Circuits: Introduction, magnetomotive force, magnetic field intensity, permeability of free space, reluctance, law governing magnetic circuits.

Superconductivity: Temperature dependence of resistivity in superconducting material, effect of magnetic field (Meissner effect), Type I and Type II superconductors.

UNIT V

(10) L

Wave Mechanics :

Wave Particle Duality, de Broglie Concept of Matter Waves, Davisson and Germer experiment, Concept of wave packet, group and phase velocity, Heisenberg Uncertainty Principle and its applications viz. non existence of electron in nucleus, radius and energy of Bohr's first orbit, Schrödinger time independent and time dependent wave equation, Physical interpretation of wave function, Application of Schrodinger wave equation : Particle in a one dimensional box (eigen function and eigen values).

Science and Technology of Nanomaterial :

Introduction to Nanomaterial, Basic principle of nano science & technology, creation and use of Bulky Balls, structure, properties and use of Carbon nanotubes, applications of nanotechnology.

PHYSICS LAB (PYP151)

List of Experiments

(At least six)

1. To determine the wavelength of monochromatic light by Newton's ring.
2. To determine the wavelength of monochromatic light with the help of Fresnel's biprism.
3. To determine the focal length of two lenses by nodal slide and locate the position of cardinal points.
4. To determine the specific rotation of cane sugar solution using bi quartz polarimeter.
5. To determine the wavelength of spectral lines using plane transmission grating.
6. To determine the specific resistance of the material of given wire using Carey Foster's bridge.
7. To determine the variation of magnetic field along the axis of a current carrying coil and then to estimate the radius of the coil.
8. To verify Stefan's Law by electrical method.
9. To calibrate the given ammeter using potentiometer.
10. To calibrate the give voltmeter using potentiometer.
11. To determine energy band gap of a given semiconductor material by p-n junction method.
12. To determine the viscosity of water by Poisseuille's method.

Note: Additional experiments may be added based on contents of syllabus.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Essentials of Mechanical Engineering	Course Code: MET101
Credit: 3	L T P 3 0 0
Year: 1st	Semester: I

UNIT – I

9L

Introduction to Engineering: Difference between Science and Technology, history of wheel, introduction to prime movers, transmission system, belt, pulleys, gear system and nomenclature, braking system, Mechanism, lever mechanism, Working principle of power generation system, hydel power plant, thermal power plant and its main components.

Coplanar Force system: Resolution of force in two mutually perpendicular direction Free Body Diagram, Moment, Varignon's theorem, static equilibrium, Lami's Theorem, type of joints/Support, Type of load: point load, uniformly constant and varying loads, beam and its type.

UNIT – 2

7L

Engineering material and their properties: Details of hook's law, Proportional limit, Yield point, Yield Stress, Engineering strain, Engineering stress, True stress and Strain, Plasticity, Elasticity, Allowable Strength, Hardness, Ductility, toughness, Fatigue, creep, strain energy, Impact Strength, Young modulus of Elasticity, Bulk Modulus, Poission Ration and its relation in between.

Stress and strain: Normal stress and strain, principle of Superposition, Deformation in stepped and composite bar.

UNIT – 3

7L

Thermodynamics: Macroscopic & microscopic study point of view, System, Surrounding and Universe, Phase, Property, State, Path, Process, Cyclic and non-cyclic processes, Quasi static process, Reversible and irreversible processes , Thermodynamic equilibrium, Concept of continuum, Energy and its forms, Enthalpy, Zeroth law, Different temperature scales and theory of temperature and Pressure measurement.

UNIT – 4

8L

Laws of thermodynamics: Thermodynamic definition of work, Thermodynamic processes, Calculation of work in various processes and sign convention, Non-flow work and flow work, Joules' experiment, First law of thermodynamics, Internal energy and enthalpy, First law of thermodynamics applied to open systems, Steady flow energy equation and its applications, First law analysis for closed system (non flow processes), Limitations of first law of thermodynamics, PMM-I.

Statement of Second law of thermodynamics: Kelvin Planck's statement and Clausius statement and their equivalence.

UNIT – 5

9L

Power generation: Air standard cycle, IC Engine, Carnot cycle, Otto cycle, Diesel cycle, Important components of I.C.Engine, two stroke and four stoke engine, S.I. and C.I. engines, efficiency of Otto and diesel cycle

Basics of Heat Transfer: Concepts of the mechanisms of heat flows: conduction, convection and Radiation heat transfer application in engineering.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Reference Books:

1. Basu,A.R; A Text book of Engineering Mechanics(Applied Mechanics);2003 Edition; Dhanpat Rai & co.(p) Ltd, Delhi.
2. Chandramouli, P.N; Engineering Mechanics; Second Printing; PHI Learning Private Limited, Delhi; 2013.
3. Rajput, R. K; Material Science; S. K. Kataria & Sons, New Delhi.
4. Dubey, N. H; Engineering Mechanics, Statics and Dynamics; First reprint; McGraw Hill Education (India) Private Limited, New Delhi, 2013.
5. Ratan, S.S; Theory of machines; Second Edition; Tata McGraw Hill Publishing Company Limited, New Delhi.
6. Nag.P.K.; Engineering Thermodynamics; 3rd Edition; Tata McGraw Hill Publishing Company Limited, New Delhi.
7. Nag.P.K.; Heat and Mass Transfer; Tata McGraw Hill Publishing Company Limited, New Delhi.
8. Kumar.D.S; Basic of Mechanical Engineering; S. K. Kataria & Sons, New Delhi.

Essentials of Mechanical Engineering (MEP-151)

List of Experiments

1. Tensile test
2. Impact test
3. Hardness test
4. Pulley experiment
5. Experiment on conduction heat transfer
6. Demonstration of Impulse and reaction turbine
7. Study of 4s and 2S engine petrol Engine
8. Study of 4s and 2S engine Diesel Engine
9. Study of refrigerator and air conditioning

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Professional Communication	Course Code: HMT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

OBJECTIVES:

- 1) To strengthen the Professional Communication skills of upcoming professionals.
- 2) To make them aware about the new forms and trends of business and technical writings.
- 3) To develop the students' interpersonal skills in order to ensure his / her optimum performance as an employee.
- 4) To prepare students for facing the challenges of their professional lives in an increasingly globalized world.

Unit –I Professional Communication

8 Hours

1. Professional Communication: Interpretation, Process, Forms, Barriers and Overcoming Barriers.
2. Types of Communication-Verbal, Non-Verbal, Oral, Written, Formal, Informal.
3. Communication Levels (Intra personal, Interpersonal, Group, Public communication) and Communication Flow (Downward, Upward, Lateral and Diagonal flow).
4. Technical Writing-Meaning, Types and process of preparing a technical document. Acronyms, Jargons.
5. Understanding and Practice of Paragraph writing-Principles of paragraph writing (unity, coherence and logical development of the ideas)
6. Communication: Impact of internet on communication, communicating through computers.

Unit-II Business Communication

10 Hours

1. Business communication – Meaning, Type and Format.
2. Intra-office communication – Types (Face to Face communication, Telephonic conversation, Letters, Memorandum, E-mails, Notice, Memo, Agenda, Minutes.), advantages and disadvantages. various types of intra-office communication
3. Inter-office communication –Face to Face communication, Telephonic Communication-mails, Letters (Sales, Credit, Enquiry, Quotation, Order, Complaint and Adjustment Letter), advantages and disadvantages of various types of inter-office communication.
4. Job-Application Letter and Resume.

Unit-III Technical Proposal and Report

A. Technical Proposal –Types, Format, Preparation of Proposal .

5 Hours

- **For B.Tech students-**
Technical Proposal to organize a Technical Training Program, to develop new range of products, establish new laboratory, or start a new venture.
- **For B.Pharma students-**
Technical proposal to establish a new laboratory, to create new drug-composition, or to visit a super specialty Hospital.
- **For B.Arch students-**
Technical proposal for an archeological site visit, or to construct new buildings.
- **For MCA students-**
Technical proposal to develop new software, or, to organize an induction program for the new entrants.
- **For MBA students-**
Proposal for establishment of a new department, for a new administrative system, or for new HR policies.

B. Technical Report –Types, Format, Preparation of Report.

5 Hours

- **For B.Tech students-**

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Technical Report describing new machinery, a report on the sudden break-down in production unit, Annual Financial Report and market survey report for formulating new market strategy.

- **For B.Pharma students-**

Technical Report based on the site-inspection of a drug manufacturing unit, Survey report on health awareness and self-medication.

- **For B.Arch students-**

Technical Reports based on a Site Inspection for geographical and geological aspects of a particular location. A report on the archeological survey of a monument.

- **For MCA students-**

Technical Report based on function of new technology (software or hardware), Technical Reports on Client's need for a Payroll management system/ Hospital management system.

- **For MBA students-**

Preparation of Annual Report of the organization, preparation of departmental reports and report based on the study of a successful organization.

Unit-IV Soft-Skills

8 Hours

1. Non-Verbal Communication -Kinesics, Oculistics, Vocalics, Proxemics, Chronemics.
2. Interpersonal Skills, Social-Skills
3. Personality-Meaning and Types, Attitude
4. Self-Management, Emotional Quotient, Time management, and Stress-Management.
5. Image-building / Impression –Management.
6. Leadership and Team-Building and Conflict.

Language-Lab

12 Labs

1. Stress, Intonation and Rhythm.
2. Overcoming Mother-Tongue Influence.
3. JAM session, Debate, Extempore.
4. Role-play, Information Exchange / Gap Activity.
5. Presentation Skills.
6. Group-Discussion Skills.
7. Preparing for interview.

Text Books:

1. Ruby Gupta, Advanced Technical Communication, Cambridge University Press, 2011
2. Ruby Gupta, Basic Technical Communication, Cambridge University Press, 2011.
3. Aruna Koneru, Professional Communication, Tata Mc Graw Hill, New Delhi, 2008.

11. Effective Business Communication- Murphy, Hildebrandt, Thomas
12. Essentials of Business Communication, Rajendra Pal and J. S Kothari- Sultan Chand

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Computer Fundamental & C Programming	Course Code: CST101		
Credit: 2	L 2	T 0	P 0
Year: 1 st	Semester: I		

UNIT: 1

5L

Introduction to the Digital Computer (brief description about its components), Characteristics of computer system, Introduction to operating systems(DOS, Linux, Windows), function and types of operating system, Number Systems and conversion methods (Binary, hex, octal), Concept of flow chart, Write & execute the first C programme, C Data Types & Operators.

UNIT 2:

4L

Conditional Program Execution: Applying if-else and nested if-else statements, switch-case statements, restrictions on switch values, use of break & default with switch.

Program Loops & Iteration: Uses of loops (while, do-while and for), use of continue statement.

Function: function prototypes, call by value and call by reference function, recursion.

UNIT 3:

4L

Arrays: Insertion and deletion insingle dimensional array, linear searching, sorting (bubble sort), Strings.

Structures: Purpose and uses of structures, declaring structures, array of structures

TEXT BOOKS:

1. YashwantKanetkar, "Let us C", BPB Publications, 2nd Edition, 2001.
2. Herbert Schildt, "C:The complete reference", OsbourneMcgraw Hill, 4th Edition, 2002.
3. P.K. Sinha "Computer Fundamentals" B.P.B Publication

REFERENCE BOOKS:

1. Raja Raman, "Computer Programming in C", Prentice Hall of India, 1995.
2. Kernighan & Ritchie, "C Programming Language", The (Ansi C Version), PHI, 2nd Edition.
3. Byron Gottfreid "Schaum's Outline of Programming with C"

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

List of Programs in ‘C’ Lab (CSP-151)

Lab 1	(a) WAP to perform simple arithmetic operations using different data types. (b) WAP to show swap of two no's without using third variable.
Lab 2	(a) WAP to find the roots of a quadratic equation. (b) WAP to check the number is odd or even and find the sum of all odd and all even separately.
Lab 3	(a) WAP to find out whether the given number is prime or not. Find sum of all prime upto N. (b) WAP to reverse a given number and check the palindrome status.
Lab 4	WAP to print corresponding days of a week using switch case.
Lab 5	WAP to find and generate the Armstrong number.
Lab 6	WAP to print pattern triangle like Floyd's, Pascal, pyramid triangle.
Lab 7	(a) WAP to interchange two values using call by value and call by reference. (b) WAP to print factorial of a number using recursion & without using recursion.
Lab 8	WAP to print Fibonacci series. (a) Without using function (b) using function (c) using recursion
Lab 9	(a) WAP to print an array and find greatest/smallest element of an array. (b) WAP to perform linear searching in an array.
Lab 10	(a) WAP to insert/ delete element from an array. (b) WAP to sort the array's element using Bubble sort.
Lab 11	WAP to perform the following string functions. a. Strlen b. strcmp c. strcpy d. strcat e. strlenr f. strupr
Lab 12	Declare a suitable structure of a college and print the name and DOB of the student have scored more than sixty percent marks in end semester exam.
Lab 13	Declare a suitable structure for an organization and print all the names of employees having salary more than Rs.1000.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Engineering Graphics	Course Code: CGE151		
Credit: 2	L 1	T 0	P 2
Year: 1st	Semester: I		

UNIT-I

3L

Introduction: Sheet Layout, Types of Sheet, Size of Sheets, Title blocks, Type of lines, Lettering, Dimensioning, Scale (Full, Reduced, Large) Geometrical Constructions

UNIT-II

4L

Projection: Methods of Projection, Planes of Projection, Projection of points, Projection of straight lines, Projection of auxiliary planes, Projection of planes.

UNIT-III

4L

Projection of solids, Sections of solids

UNIT-IV

2L

Development of surfaces

UNIT-V

2L

Isometric Projections

Reference Book:

- 1) Bhatt N. D. & Panchal V. M, "Engineering Drawing", Charotar Publisher, 2007.
- 2) Dhanjay A Jolhe, "Engineering Drawing" Tata-Mc-Garw hill, 2008.
- 3) Gill.P.S "Engineering graphics" S. K. Kataria & Sons, 2009
- 4) John K.C, "Engineering graphics" ,2nd edition, PHI Learning Pvt. Ltd., 2010 .

List of Experiments

1. Introduction to AutoCAD Commands, Explaining need of AUTO CAD over Manual drafting, Simple Drawings.
2. Sheet on Lettering and Geometric construction.
3. Orthographic Projections, Basic problem based on Projection of points.
4. Sheet on Projection of Lines.
5. Sheet on Projection of Planes.
6. Sheet on Projection of Auxiliary Planes.
7. Sheet on Projection of Solids.
8. Development of Surfaces.
9. Sheet on Isometric Projections from orthogonal views.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Professional Communication	Course Code: HMT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

OBJECTIVES:

- 1) To strengthen the Professional Communication skills of upcoming professionals.
- 2) To make them aware about the new forms and trends of business and technical writings.
- 3) To develop the students' interpersonal skills in order to ensure his / her optimum performance as an employee.
- 4) To prepare students for facing the challenges of their professional lives in an increasingly globalized world.

Unit –I Professional Communication

8 Hours

1. Professional Communication: Interpretation, Process, Forms, Barriers and Overcoming Barriers.
2. Types of Communication-Verbal, Non-Verbal, Oral, Written, Formal, Informal.
3. Communication Levels (Intra personal, Interpersonal, Group, Public communication) and Communication Flow (Downward, Upward, Lateral and Diagonal flow).
4. Technical Writing-Meaning, Types and process of preparing a technical document. Acronyms, Jargons.
5. Understanding and Practice of Paragraph writing-Principles of paragraph writing (unity, coherence and logical development of the ideas)
6. Communication: Impact of internet on communication, communicating through computers.

Unit-II Business Communication

10 Hours

1. Business communication – Meaning, Type and Format.
2. Intra-office communication – Types (Face to Face communication, Telephonic conversation, Letters, Memorandum, E-mails, Notice, Memo, Agenda, Minutes.), advantages and disadvantages. various types of intra-office communication
3. Inter-office communication –Face to Face communication, Telephonic Communication-mails, Letters (Sales, Credit, Enquiry, Quotation, Order, Complaint and Adjustment Letter), advantages and disadvantages of various types of inter-office communication.
4. Job-Application Letter and Resume.

Unit-III Technical Proposal and Report

A. Technical Proposal –Types, Format, Preparation of Proposal .

5 Hours

- **For B.Tech students-**
Technical Proposal to organize a Technical Training Program, to develop new range of products, establish new laboratory, or start a new venture.
- **For B.Pharma students-**
Technical proposal to establish a new laboratory, to create new drug-composition, or to visit a super specialty Hospital.
- **For B.Arch students-**
Technical proposal for an archeological site visit, or to construct new buildings.
- **For MCA students-**
Technical proposal to develop new software, or, to organize an induction program for the new entrants.
- **For MBA students-**
Proposal for establishment of a new department, for a new administrative system, or for new HR policies.

B. Technical Report –Types, Format, Preparation of Report.

5 Hours

- **For B.Tech students-**

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Technical Report describing new machinery, a report on the sudden break-down in production unit, Annual Financial Report and market survey report for formulating new market strategy.

- **For B.Pharma students-**

Technical Report based on the site-inspection of a drug manufacturing unit, Survey report on health awareness and self-medication.

- **For B.Arch students-**

Technical Reports based on a Site Inspection for geographical and geological aspects of a particular location. A report on the archeological survey of a monument.

- **For MCA students-**

Technical Report based on function of new technology (software or hardware), Technical Reports on Client's need for a Payroll management system/ Hospital management system.

- **For MBA students-**

Preparation of Annual Report of the organization, preparation of departmental reports and report based on the study of a successful organization.

Unit-IV Soft-Skills

8 Hours

7. Non-Verbal Communication -Kinesics, Oculistics, Vocalics, Proxemics, Chronemics.
8. Interpersonal Skills, Social-Skills
9. Personality-Meaning and Types, Attitude
10. Self-Management, Emotional Quotient, Time management, and Stress-Management.
11. Image-building / Impression –Management.
12. Leadership and Team-Building and Conflict.

Language-Lab

12 Labs

8. Stress, Intonation and Rhythm.
9. Overcoming Mother-Tongue Influence.
10. JAM session, Debate, Extempore.
11. Role-play, Information Exchange / Gap Activity.
12. Presentation Skills.
13. Group-Discussion Skills.
14. Preparing for interview.

**Course Structure & Syllabus of
B.Tech – Information Technology
Applicable for 2013-2017 Batch**

Course Title: Engineering Maths – II	Course Code: MAT201		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT I: Differential Equations

8L

Linear differential equations, Exact differential equations; Linear differential Equations of nth order with constant coefficients: complementary functions and particular integrals, Euler- Cauchy Homogeneous Linear differential equations, Simultaneous linear differential equations, Solutions of second order differential equations by changing the dependent and independent variables, Method of variation of parameters.

UNIT II: Laplace Transform

8L

Laplace Transform: Existence theorem, Laplace Transform of derivatives and integrals, Laplace Transform of Periodic functions and Unit Step function, Convolution theorem, Applications of Laplace Transform to solve linear and simultaneous differential equations.

UNIT III: Integral Transform

6L

Fourier Integral, Fourier Transform, Fourier Sine and Cosine Transforms and applications to simple Heat Transfer Equations, Z- Transform and its applications to solve difference equations.

UNIT IV: Fourier series

8L

Periodic functions, Fourier series of Periodic functions, Euler's formulae, Functions having arbitrary period, Change of intervals, Even and Odd functions, Half range sine and cosine series.

UNIT V: Partial differential equations and its Applications

8L

Introduction to partial differential equations, linear partial differential equations with constant coefficients of second order and their classification, Method of Separation of Variables for solving Partial Differential Equations, One-Dimensional Wave Equation, One Dimensional Heat Equation.

**Course Structure & Syllabus of
B.Tech – Information Technology
Applicable for 2013-2017 Batch**

Course Title: Computer Programming in C++	Course Code: CST201		
Credit: 2	L 2	T 0	P 0
Year: 1 st	Semester: II		

UNIT – I

4L

Introduction: Introducing Object-Oriented Approach related to other paradigms (functional, data decomposition), Characteristics of Object-Oriented Languages.

Basic terms and ideas: Abstraction, Encapsulation, Information hiding, Inheritance, Polymorphism.

UNIT – II

4L

Classes and Objects: Abstract data types, Object & classes, attributes, methods, C++ class declaration, State identity and behavior of an object, Constructors and destructors, instantiation of objects, Default parameter value, Copy Constructor, Static Class Data, Constant and Classes.

UNIT – III

5L

Inheritance and Polymorphism: Inheritance, Types of Inheritance, Class hierarchy, derivation – public, private & protected, Agrégation, composition vs classification hiérarchies, Polymorphism, Type of Polymorphism – Compile time and runtime, Method polymorphism, Polymorphism by parameter, Operator overloading, Parametric polymorphism, Generic function – template function, function name overloading, Overriding inheritance methods

TEXT BOOKS:

1. E Balagurusamy “Object Oriented Programming with C++” T.M.H 2nd Edition
2. R. Lafore, “Object Oriented Programming using C++”, BPB Publications, 2004.

REFERENCE BOOKS:

1. Schildt Herbert, “C++ Programming”, 2nd Edition, Wiley DreamTech.
2. YashwantKanethkar, “Object Oriented Programming using C++”, BPB, 2004

**Course Structure & Syllabus of
B.Tech – Information Technology
Applicable for 2013-2017 Batch
List of Programs in ‘C++’ Lab (CSP-251)**

Lab 1	(a) WAP to print first 10 prime numbers. (b) WAP to demonstrate nested loops. (c) WAP to print reverse of a given number. (d) WAP to read two numbers from keyboard and display the larger one.
Lab 2	(a) Create a class called Employee that includes three pieces of information as instance Variables – a first name (type String), a last name (type String) and a monthly salary (Double) (b) Create a constructor in above class to initialize the three instance variables. Provide a get method for each instance variable. (c) WAP to demonstrate destructors.
Lab 3	(a) Program to implement different types of inheritances like Multiple, Multilevel and hybrid. (b) Write a program in C++ demonstrating the public, protected and private parameters. (c) Write a program in C++ to demonstrate destructor in inheritance. (d) WAP to demonstrate encapsulation property of OOPs.
Lab 4	(a) Write a program that uses a class where the member functions are defined inside a class. (b) WAP that uses a class where member functions are defined outside a class. (c) WAP that uses a class where member functions are defined inside a class. (d) WAP to demonstrate the use of Static Data members.
Lab 5	(a) WAP to demonstrate the use of Dynamic Constructor. (b) WAP to demonstrate the use of function Template. (c) Illustrate and implement the C++ program to initiate the base constructor from derived class constructor.
Lab 6	(a) Write a C++ program to find the largest and smallest element of an array. (b) Create a class Matrix. Implement all possible matrix operations for Matrix type objects by overloading them.
Lab 7	(a) Create 2 classes OM and DB which store the value of distance. DM store distances in meters and cm and DB in feet and inches. Write a program that can read values for the class objects and add 1 object OM with another object of DB. (b) Define a class to represent bank account. Include the following members: Data members 1. Name of depositor. 2. Account number. 3. Type of account. 4. Balance amount in the account. Member functions 1. To assign initial values. 2. To deposit an amount. 3. To withdraw an amount after checking the balance. 4. To display name and balance. Write a main program to test the program.
Lab 8	(a) WAP to demonstrate static class data. (b) WAP to demonstrate the use of Public, Private and protected classes.
Lab 9	(a) WAP to illustrate the concept of call by reference. (b) WAP to illustrate the concept of unary operator overloading. (c) WAP to illustrate the concept of binary operator overloading.
Lab 10	(a) WAP to demonstrate the use of function overloading. (b) WAP using multiple inheritance for collecting employee details.
Lab 11	(a) WAP using function template to find maximum of two Data. (b) WAP to calculate factorial of given number using copy constructor.
Lab 12	(a) WAP to sort five float and integer numbers using template function (use bubble sort). (b) Demonstrate the use of different types of polymorphism.
Lab 13	(a) Write a function to read a matrix of size M × N from keyboard. (b) WAP to implement aggregation concept.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Chemistry and Environment	Course Code: TCY101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT – I

Introduction to Environment and Chemistry

Chemical Evolution, Genesis of Environment, Components of Environment, Layers of atmosphere, Chemical composition and reactions of troposphere, Chemistry of Ozone Layer depletion.

UNIT – II

Water Chemistry

Water quality parameters (Physical, Chemical and Biological), CPCB and WHO standards for water, Measurement of parameters of water quality, Analytical tools for analysis of water quality, alkalinity, hardness and its determination (EDTA method only). Water softening processes – Lime – Soda process, Ion exchange method, boiler feed water, boiler problems-scale, sludge, priming and foaming, caustic embitterment and corrosion, their causes and prevention, Numerical problems on alkalinity and hardness.

UNIT – III

Environmental Pollution

Air Pollution: Types of pollutants, source, effects, sink and control of primary pollutants – CO, NO_x, HC, SO_x and particulates, Photochemical smog, Acid rain and Global warming – Process, National and International efforts to combat it.

Water Pollution: Water quality parameters – (BOD & COD), Classification of pollutants and their sources, waste water treatment – domestic and industrial, Ganga pollution and control.

Soil Pollution: Composition of soil, classification and effects of soil pollutants such as agro-chemicals (pesticides and fertilizer related problems), fly ash and their control.

Integrated Solid Waste Management: Classification of waste, Treatment & Disposal methods (Composting, sanitary land filling, incineration, recycling and reuse).

UNIT – IV

Energy Resources

Conventional Energy Sources – Coal and Petroleum, Refining, Fractional Distillation, Reforming, Cracking, Alkylation, Isomerisation, Hydro treating, Sulphur Recovery, Aromatization, Octane number, Cetane number, Aviation fuel, LPG, CNG, PNG, Energy Crises, Non-conventional Energy Sources – Hydro, Wind, Solar, Nuclear, Geo thermal and Biomass based.

UNIT – V

Eco-friendly Materials

Introduction to ecofriendly products and ECOMARK, Ecofriendly domestic appliances, Green Chemistry and Green Building, Organic foods, Biofuel, Biogas, Lignin, Bioplastics, Light weight plastic composites, Fuel cell, Organic Fuel Cells, hydrogen as a fuel and New lighting technologies: Organic Photo-voltaic , OLED and Organic Transistor.

Text Books:

1. Chemistry in Engineering & Technology (Vol I & II) (Latest ed.) By J.C. Kuriacose & J. Rajaraman, Tata McGraw-Hill Co, New Delhi.
2. Engineering Chemistry by O.G. Palanna, Tata McGraw-Hill Co, New Delhi.

Reference Books:

1. Atkins' Physical Chemistry by Peter W. Atkins and Julio de Paula, Oxford University Press.
2. Principles of Physical Chemistry (Latest ed.) By Puri, Sharma & Pathania.
3. Organic chemistry, Morrison and Boyd, Pearson Prentice Hall, 2011
4. Environmental chemistry, S.E. Manahan, 9th edition, CRC Press.
5. Textbook of polymer science by F.W. Billmeyer, Wiley India.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Introduction to Electrical Engineering	Course Code: EET101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT I – D.C. NETWORK THEORY

Review of basic circuit theory concepts, Mesh and Nodal analysis, Superposition theorem, Thevenin's theorem, Norton's theorem, Maximum power transfer theorem, Star–delta transformation, Magnetic Circuits.

UNIT II – A.C. CIRCUITS & MEASURING INSTRUMENTS

Single Phase A.C.: Phasor representation of voltage and current, A.C. circuit behavior of resistance, inductance, capacitance & their combination in series and parallel, Power triangle, Power factor, Concept of series & parallel resonance.

Three Phase A.C.: Star – delta connections, Relation between line and phase quantities, three phase power and its measurement, What is 3 phase 4 wire and 3 phase 5 wire system?

Measuring Instruments: Construction and principle of voltage and current measuring instruments.

UNIT III – TRANSFORMERS

Principle of operation, Types of construction, Phasor diagram, Equivalent circuit, Efficiency and voltage regulation of single phase transformer, O.C. and S.C. tests.

UNIT IV – D.C. & SYNCHRONOUS MACHINES

D.C. Machines: Construction and working principle of d.c. generator and d.c. motor, Types of d.c. machines, E.M.F. equation, Torque equation, Magnetization and load characteristics, Losses and efficiency, Need of starter in d.c. motors.

Synchronous Machines: Construction and Principle of operation of Alternator and Synchronous Motor.

UNIT V – INDUCTION MOTORS

Three Phase Induction Motors: Principle of operation of 3- ϕ induction motor, Types of 3- ϕ induction motor, Need of starters in 3- ϕ induction motors, Slip – torque characteristics,

Single Phase Induction Motor: Principle of operation of single phase induction motor, Methods of starting of single phase induction motor.

Reference Books

1. V. Del Toro. “ Principles of electrical Engineering, “Prentice hall International.
2. W.H. Hayt& J.E. Kemmerly,” Engineering circuit Analysis, “McGraw Hill.
3. I. J. Nagrath, “Basic Electrical Engineering,” Tata Mc. Graw Hill.
4. A. E. Fitzgerald, D.E., Higginbotham and A Grabel, “Basic Electrical Engineering” McGraw Hill.
5. H. Cotton, “Advanced Electrical Technology” Wheeler Publishing.

Basic Electrical Engineering Lab (EEP-151)

(Any Ten)

1. Verification of Network Theorems.
2. Study of diode characteristics. Study of phenomenon of resonance in RLC series circuit.
3. Measurement of power in a three phase circuit by two wattmeter method.
4. Measurement of efficiency of a single phase transformer by load test.
5. Determination of parameters and losses in a single phase transformer by OC and SC test.
6. Study of characteristic of DC Motor.
7. Study of characteristic of AC Motor.
8. DC generator characteristics.
9. 10. Speed control of dc shunt motor.
10. Study running and reversing of a three phase induction motor.
11. Study of a single phase energy meter.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Introduction to Electronics & Communication	Course Code: ECT101						
Credit: 3	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1st	Semester: II						

UNIT 1: Fundamental of Semiconductors

10 Lectures

Energy bands in semiconductors, intrinsic and extrinsic semiconductors, Fermi Level in Intrinsic and Extrinsic semiconductor, Carrier transport in semiconductors: diffusion current, drift current, mobility, Hall Effect and resistivity. Generation and recombination of carriers.

UNIT 2: Application of Low Power and High Power Diodes

10 Lectures

Diode circuits: Construction, Junction diode characteristics, Half and full wave rectifiers - Expression for efficiency and ripple factor - Bridge rectifier – π Filter circuits, Clipper, Clamper and multipliers using diodes, Zener Diode Characteristics - Regulated power supply using Zener diode.

UNIT 3: Transistor fundamentals

8 Lectures

Transistor circuits: Characteristics of a transistor in CB, CE and CC modes - Relatively merits - Biasing of Transistors - Load Line and operating point concept (both AC and DC). Construction and working of JFET and MOSFET.

UNIT 4: Digital fundamentals and Introduction to Signals

8 Lectures

Basic logic gates: AND, OR, and NOT – implementation of all gates using Universal gates, Number Systems conversions, Boolean algebra, K-map (upto 4 variables). Source of Information, Types of Signals.

UNIT 5: Basics of Communications & Instrumentation

9 Lectures

Communication Systems, Communication Channels, Need of modulation, Types of modulations (Wave shapes and final expression only), Study of Piezoelectric, PMMC, LVDT and Strain Gauge transducers and their classifications and display device (7 segment) only.

Reference Learning:

Unit 1. Electronics Devices and Circuits, Millman and Halkias, Tata McGraw Hill, 4th ed.

Unit 2 & 3. Electronic Devices and Circuit Theory, Robert L. Boylestad, Prentice Hall Higher Edu., 2000.

Unit 4. Digital Design, Morris Mano, PHI

Unit 4. Modern Digital & Analog Communications, B. P. Lathi, OUP

Unit 5. Electronic Communication Systems, John Kennedy, Tata McGraw Hill, 4th ed.

Unit 5. Electronic Instrumentation - H. S. Kalsi

ECP-151 ELECTRONICS ENGINEERING LAB.

1. To identify and Study of the various component and Devices of electronics with their specification (CRO, Function Generator, Multimeter, Power Supply, resistor, capacitor, inductor, ICs, LED, potentiometer etc.)
2. To study the V-I characteristics of PN diode and Zener diode.
3. To find the efficiency of Rectifiers and ripple factor of capacitive and non-capacitive half wave and full wave rectifier.
4. To Study and Verify clipper and clamper with biased circuits.
5. To find the characteristics of CB and CE amplifiers.
6. Determine the characteristics of FET.
7. To find out the power energy of various periodic and non-periodic signals.
8. To verify the logic gates using diodes.
9. Study and observations of AM & FM Waveforms.
10. Study of various transducers (Strain Gauge).

**Course Structure & Syllabus of
B.Tech – Information Technology
Applicable for 2013-2017 Batch**

Course Title: Workshop Practice	Course Code: MEP152		
Credit: 2	L 1	T 0	P 2
Year: 1st	Semester: II		

List of Experiments

1. Carpentry: To make a T-Lap joint with soft wood.
2. Arc Welding: To make a Lap joint with mild steel flat by arc welding process.
3. Gas Welding: To make a Lap joint of M.S. sheet with gas welding process.
4. Fitting: To make a plug and socket joint with M.S.flat.
5. Machine Shop: To turn a M.S. rod on lathe to prepare a turning specimen.
6. Sheet Metal: To make a square tray with G.I. sheet.
7. Study of Foundry and Forging tools and equipments.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Data Structure	Course Code: DA3210
Credit: 4	L T P 3 0 2
Year: 2nd	Semester: III

UNIT 1 **(8L)**

Introduction: Concept of data structure, Types of data structures, Character String in C, Recursion, Structure, Pointer, Dynamic Allocation, Algorithms, Algorithm analysis, Complexity of algorithms and Time space trade-off. **Arrays:** Introduction, Single and multi-Dimensional Arrays, address calculation, application of arrays, Operations defined: traversal, insertion and deletion.

Stacks: Stacks, Array representation of stack, Applications of stacks, Conversion of Infix to Prefix and Postfix Expressions, Evaluation of postfix expression using stack.

UNIT 2 **(8L)**

Queue: Queue, Array representation and implementation of queues, Circular queues, Operations on Queue: Create Add, Delete, and Full and Empty, De-Queue, Priority queues, Applications of Queues.

Linked Lists: Concept of linked list, Representation and implementation of singly linked list, Circular linked list, doubly linked list, Operations on Linked lists, Concepts of header linked lists, applications of linked lists.

UNIT 3 **(8L)**

Trees: Basic terminologies of trees, Binary tree, Complete Binary tree, Extended Binary tree, Representation of Binary tree, Binary tree traversal, Operations on Binary tree. **Binary Search Tree:** Binary Search Tree (BST), Insertion and Deletion in BST, Complexity of Search Algorithm, Path Length, AVL Trees, B-trees.

UNIT 4 **(6L)**

Graphs: Terminology & Representations, Graphs & Multi-graphs, Directed Graphs, Representations of Graphs, Traversal, Connected Component and Spanning Trees, Minimum Cost Spanning Trees.

UNIT 5 **(10L)**

Searching & Hashing: linear search, binary search, Hash Table, Hash Functions, Collision Resolution Strategies, Hash Table Implementation. **Sorting:** Bubble sort, Insertion sort, Selection sort, Quick sort, Merge sort, Heap Sort. **File Handling:** Introduction to file handling, Data and Information, File concepts, File organization, files and streams, working with files.

Text Books:

1. “Data Structures” Schaum’s Outline Series, Lipschutz, TMH.
2. Data Structures using C by A. M. Tenenbaum, Langsam, Moshe J. Augentem, PHI Pub.

Reference Books:

1. “Fundamentals of Data Structures”, Horowitz and Sahani, Galgotia Publication.
2. Data Structures and Program Design in C By Robert Kruse, PHI.
3. Data Structure and the Standard Template library – Willam J. Collins, 2003, T.M.H.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Computer Based Numerical & Statistical Techniques	Course Code: DA3220		
Credit:4	L 3	T 0	P 2
Year: 2nd	Semester: III		

UNIT 1 **(10L)**

Introduction: Numbers and their accuracy, Computer Arithmetic, Errors and their Computation, General error formula, Error in a series approximation.

Solution of Algebraic and Transcendental Equation: Bisection Method, Iteration method, Method of false position, Secant method, Newton-Raphson method, Rate of convergence of Iterative, Newton Raphson methods.

UNIT 2 **(16L)**

Interpolation: Finite Differences, Difference tables Polynomial Interpolation: Newton's forward and backward formula Central Difference Formulae: Gauss forward and backward formula, Stirling's, Bessel's, Everett's formula. Interpolation with unequal intervals: Langrange's Interpolation, Newton Divided difference Formula.

Statistical Computation: Frequency chart, Curve fitting by method of least squares, fitting of straight lines, polynomials, exponential curves, Regression Analysis, Linear and Non linear Regression, Multiple regression.

UNIT 3 **(14L)**

Numerical Integration and Differentiation: Introduction, Numerical differentiation Numerical Integration: Trapezoidal rule, Simpson's 1/3 and 3/8 rule, Boole's rule.

Solution of differential Equations: Picards Method, Eulers Method, Taylors Method, Runge-Kutta Methods, Automatic Error Monitoring and Stability of solution.

Suggested Books:

1. Yang, "Applied Numerical Methods using MATLAB", Wiley India
2. Pradip Niyogi, "Numerical Analysis and Algorithms", TMH, 1st Edition.
3. Gerald & Whealey, "Applied Numerical Analysis", AW
4. Grewal B S, "Numerical methods in Engineering and Science", Khanna Publishers, Delhi.
5. Numerical Method Principles, analysis and algorithms, Srimamta Pal (Oxford Higher ed)
6. Rajaraman V, "Computer Oriented Numerical Methods", PHI, 3rd edition.

**Course Structure & Syllabus of
B.Tech – Information Technology
Applicable for 2013-2017 Batch**

Course Title: Programming with Java	Course Code: DA3230		
Credit:4	L 3	T 0	P 2
Year: 2nd	Semester: III		

UNIT 1 **(6L)**

Object Modeling: Objects and classes, links and association, generalization and inheritance, aggregation, abstract class, multiple inheritance, Meta data, candidate keys, constraints.

UNIT 2 **(6L)**

Dynamic Modeling: Events and states, operations, nested state diagrams and concurrency, advanced dynamic modeling concepts, a sample dynamic model.

UNIT 3 **(8L)**

Functional Modeling: Data flow diagram, specifying operations, constraints, a sample functional model. OMT (object modeling techniques) methodologies, examples and case studies to demonstrate methodologies, comparisons of methodologies, SA/SD, JSD.

UNIT 4 **(10L)**

Java Programming: Introduction, Operator, Data types, Variables, Methods & Classes, Multithread Programming, I/O, Java Applet. **Java Library:** String Handling, Input/output exploring Java.io, Networking, Applets classes, Event Handling, Introduction to AWT, Working with window, Graphics, AWT Controls, Layout Manager and Menus, Images, Additional packages.

UNIT 5 **(10L)**

Software Development using Java: Java Beans, Java Swing, Java Servlets, Migrating from C++ to java, Application of java, Dynamic Billboard Applet, Image Menu: An image based menu, Lavatron Applets, Scrabblets, JDBC, Brief functioning of upper layer E-mail and their applications.

Text Books:

1. Herbert Schildt, "The Complete Reference: Java", TMH.
2. E. Balagurusamy, "Programming in JAVA", TMH.

Reference Books:

1. Booch Grady, "Object Oriented Analysis & Design with application 3/e", Pearson Education, New Delhi.
2. Bjarne Stroustrup, "C++ Programming Language", Addison Wesley.
3. E. Balagurusamy, "Object Oriented Programming with C++", TMH.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Discrete Mathematics	Course Code: DA3010		
Credit:3.5	L 3	T 1	P 0
Year: 2nd	Semester: III		

UNIT 1 **(10L)**

Permutations, Combinations, selection with & without replacement, Sets and multisets, permutation and combination of multisets, enumeration of permutation and combination of sets & multisets, placing distinguishable (indistinguishable) objects into distinguishable (indistinguishable) boxes. Inclusion-Exclusion principle, discrete probability; the rules of sum & products, generation of permutation and combination.

UNIT 2 **(8L)**

Relations and functions-properties of binary relation, equivalence relation, partial order relation, chains and antichains, Pigeon hole principle, Lattices and Boolean algebra; Algebraic structures: binary operation, group, ring, field; Mathematical Logic: Basic connectives, rules of inference, normal forms, proof of validity, predicate logic.

UNIT 3 **(7L)**

Basic concepts of graph theory: vertices, edges, degree, paths, circuits, cycles, complete graphs and trees. Multi-graphs, weighted graphs and directed graphs. Adjacency matrix of a graph. Connected and disconnected graphs. K-connected and K-edge connected graphs.

UNIT 4 **(7L)**

Shortest path in weighted graphs, Eulerian path and circuits, Hamiltonian path and circuits, Planner graphs, chromatic number, edge colouring of graphs. Tree and cut sets: Tree, spanning tree and cut set, minimum spanning tree.

UNIT 5 **(8L)**

Generating function and recurrence relations, Linear recurrence relation with constant coefficients and their solution, Homogeneous solution, particular solution and total solution, Solution by the method of generating functions.

Text Books:

1. Liu C.L., Elements of Discrete Mathematics, McGraw Hill Int. edn.
2. Kolman B & Busby C.R., Discrete Mathematical Structure for Computer Science, Prentice Hall of India Ltd.
3. Deo N., Graph Theory, Prentice Hall of India.

Reference Books:

1. Trembley J.P. & Manohar R., Discrete Mathematical Structures with Applications to Computer Science, Tata McGraw Hill.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Computer Organization	Course Code: DA3020		
Credit:3.5	L	T	P
	3	1	0
Year: 2nd	Semester: III		

UNIT 1

(12L)

Register Transfer and Micro operation: Register Transfer Language, Bus and Memory Transfers, Bus Architecture, Arithmetic, Logic, Shift Microoperation, Design of ALU, Design of Fast adder.

Computer Arithmetic: Introduction, addition and subtraction algorithms, Booth Multiplication Algorithms, floating point arithmetic operation, IEEE format for floating point numbers.

Processor Organization: General register organization, Stack organization, Addressing modes, Instruction format, Data transfer & manipulations, Program Control.

UNIT 2

(14L)

Control Design: Single and multiple bus architecture, Execution of a Complete Instruction, sequencing of control signals, Hardwired control, Micro programmed Control, microinstruction format. **Input-**

Output Organization: I/O Interface, Modes of transfer, Interrupts & Interrupt handling, Direct Memory Access, Input-Output processor, Serial Communication.

UNIT 3

(12L)

Memory Organization: Memory Hierarchy, Main Memory (RAM and ROM Chips), organization of Cache Memory, Virtual Memory, Memory management hardware. **Parallel Processing:** Flynn's classification, Pipelining- Arithmetic Pipelining, Vector Processing, Array Processor. **Multiprocessor:** Characteristic of Multiprocessor, Interconnection Structure, Interprocessor Arbitration.

Text Books:

1. Computer System Architecture, M. Mano, Pearson, 3rd Edition.

Reference Books:

1. Computer Organization, Vravice, Zaky&Hamacher (TMH Publication) Structured Computer Organization, Tannenbaum(PHI), Computer Organization, Stallings(PHI).

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Digital System Design	Course Code: FA3221						
Credit: 4.5	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	1	2
L	T	P					
3	1	2					
Year: 2nd	Semester: III						

UNIT-1: INTRODUCTION

8 L

Number Systems, Basic & Universal Logic gates, Boolean algebra, Direct Conversion of various base, Negative number representations, Floating point number representation, BCD & EXCESS-3 arithmetic, Error detecting and correcting codes: Hamming code, parity code, Review and Limitation of K-Map, Quine-Mcclusky Method (Tabular Method).

UNIT-2: COMBINATIONAL LOGIC CIRCUITS

8 L

Characterization of digital circuits: Combinational & Sequential Logic circuit, Design procedure: Adders, Subtractors, Parallel Adder, IC-74LS83 and its applications, Multiplier, Decoder, Encoder, Priority Encoder, Multiplexers, Demultiplexers and their applications, Magnitude Comparators, Code Converters, Parity checker and generator, BCD Adder.

UNIT-3: SEQUENTIAL LOGIC CIRCUITS

6 L

Latch, Flip-Flops and their conversions, Analysis and Synthesis of Sequential Circuits, Excitation Table & Diagram, Counters: Synchronous & Asynchronous, Shift Registers and their applications, Finite State Machine: Mealy and Moore Models.

UNIT-4: MEMORIES

8 L

Memory Characteristics and operations, Sequential, Random Access-MOS & C-MOS Static and Dynamic Memory elements, Memory organization: One dimensional and Multidimensional Arrangement, Read Only Memory, ROM as a Decoder, Memory Bank, Address Decoding of Memory (Internal & External), PAL, PLA.

UNIT-5: LOGIC FAMILIES, HAZARDS & FAULT DETECTIONS

10 L

Logic Families: Diode, BJT & MOS as a switching element, concept of transfer characteristics, ECL, TTL, I²L, Tri-state, PMOS, NMOS and CMOS logic families- Power Consumption, Gate delay and Figure of merit (SPP), Package density, Comparison of standard logic families, pass transistor Logic, Open Collector and Totem pole output stage for TTL. Static and Dynamic Hazards, Gate Delay, Generation of Spikes, Analysis & illustration of Hazard in Combinational Circuits, fault Detection Techniques: Path Sensitization, Boolean Difference Method, K- Map Method.

Text Books:

1. Digital Design, M. Morris Mano and M. D. Ciletti, 4th Edition, Pearson

Reference Books:

1. Digital Systems: Principles and Design, Raj Kamal, Pearson
2. Maini, Digital Electronics: Principles and Integrated Circuits, Wiley India.
3. Switching Theory and Finite Automata, Kohavi, TMH Publications.

Digital System Design Lab

1. Implementation of All Logic Gates using Universal gates (NAND & NOR both).
2. Bread-board implementation (Parallel adder, One bit Multiplier, One bit Magnitude comparator, parity checker)
3. Bread-board implementation of any one code converter (i.e. Gray Code, BCD Code, Excess-3, Hex. etc.).
4. Design of shift registers (SISO, SIPO, PIPO, and PISO), up and down counters.
5. Design of Mod-6 types of Asynchronous Counters.
6. Transfer characteristics of TTL and CMOS inverters.
7. Realization of Decoder, Multiplexer, encoder and De-multiplexers using IC 74138.
8. To design & implement PAL.
9. To design & implement PLA.
10. Clock circuit realization using 555, CMOS inverter.

*Any two (Value Added)

**Course Structure & Syllabus of
B.Tech – Information Technology
Applicable for 2013-2017 Batch**

Course Title: Theory of Computation	Course Code: DA4010		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: IV		

UNIT 1 **(7L)**

Mathematical preliminaries, alphabets, strings, languages, states, transition, transition graph, generalized transition graph, Deterministic Finite Automata, Non-Deterministic Finite Automata, Non-Deterministic Finite Automata with ϵ transitions, minimization of DFA.

UNIT 2 **(8L)**

Conversions and Equivalence: Equivalence between NFA with and without ϵ transitions. NFA to DFA conversion; Equivalence between two DFA's, Limitations of FSM; Application of finite automata, Finite Automata with output- Moore & Melay machine and its conversion.

UNIT 3 **(10L)**

Regular Languages: Regular sets; Regular expressions, Arden's theorem, Construction of finite Automata for a given regular expression, Pumping lemma for regular sets. Closure properties of regular sets. Grammar Formalism: right linear and left linear grammars; Equivalence between regular linear grammar and FA, Context free grammar; Derivation trees, sentential forms. Ambiguity in context free grammars; Normal forms: Chomsky normal form and Greibach normal form; Pumping Lemma for Context Free Languages, Closure property of CFL.

UNIT 4 **(7L)**

Push Down Automata: Push down automata, definition; Acceptance of CFL, Acceptance by final state and acceptance by empty state and its equivalence; Equivalence of CFL and PDA; Introduction to DCFL and DPDA.

UNIT 5 **(8L)**

Turing Machine: Turing Machine, definition, model, Design of TM, Computable functions Church's hypothesis, Types of Turing machines: Universal Turing Machine, Halting problem, Properties of recursive and recursively enumerable languages, unsolvable decision problem, un-decidability of Post correspondence problem, Church turing Thesis.

Text Books:

1. "Introduction to Automata Theory Language and Computation", Hopcroft H.E. and Ullman J. D., Pearson Education.
2. "Introduction to Languages and the Theory of Computation", J. C. Martin, 3rd edition, Tata McGraw-Hill.
3. "Formal Languages and Automata Theory", C.K.Nagpal, Oxford.

Reference Books:

1. Cohen, "Introduction to Computer theory", Wiley India.
2. "Elements of Theory of Computation", Lewis H.P. & Papadimitrou C.H. Pearson, PHI.

**Course Structure & Syllabus of
B.Tech – Information Technology
Applicable for 2013-2017 Batch**

Course Title: Operating System	Course Code: DA4020		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: IV		

UNIT 1

(7L)

Introduction: Operating system and function, Evolution of operating system, Batch, Interactive, Time Sharing and Real Time System, System protection. **Operating System Structure:** System Components, System structure, Operating System Services.

UNIT 2

(10L)

Concurrent Processes: Process concept, Principle of Concurrency, Producer Consumer Problem, Critical Section problem, Semaphores, Classical problems in Concurrency, Inter Process Communication, Process Generation, Process Scheduling. **CPU Scheduling:** Scheduling Concept, Performance Criteria Scheduling Algorithm, Evolution, Multiprocessor Scheduling. **Deadlock:** System Model, Deadlock Characterization, Prevention, Avoidance and Detection, Recovery from deadlock combined approach.

UNIT 3

(8L)

Memory Management: Base machine, Resident monitor, Multiprogramming with fixed partition, Multiprogramming with variable partition, Multiple base register, Paging, Segmentation, Virtual memory concept, Demand paging, Performance, Paged replaced algorithm, Allocation of frames, Thrashing, Cache memory, Organization, Impact on performance.

UNIT 4

(6L)

File System: Different types of files and their access methods, directory structures, various allocation methods, disk scheduling and management and its associated algorithms, Introduction to distributed file system.

UNIT 5

(9L)

I/O Management and Disk Scheduling: I/O Devices, Organization of I/O functions, Operating System Design issues, I/O Buffering, Disk Scheduling (FCFS, SCAN, C-SCAN, SSTF), Disk Caches. **Case Studies:** LINUX / UNIX Operating System and Windows based operating system.

Text Books:

1. Silberschatz, Galvin and Gagne, "Operating Systems Concepts", Wiley.
2. D M Dhamdhare, "Operating Systems : A Concept based Approach", 2nd Edition.

Reference Books:

1. Sibsankar Halder and Alex A Aravind, "Operating Systems", Pearson Education.
2. Harvey M Dietel, "An Introduction to Operating System", Pearson Education.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Computer Networks	Course Code: DA4210		
Credit:4	L 3	T 0	P 2
Year: 2nd	Semester: IV		

UNIT 1

(8L)

Introduction: Motivation, OSI model, Signals and media, Bits over signals, Synchronous communication, Modulation and modems, Bandwidth, Throughput, and noise, Time division and Frequency division multiplexing, Standards, Switching methods, ISDN.

UNIT 2

(8L)

Packet Transmission: Multiplexing, Frames, Error correction techniques, LAN/WAN/MAN, Topology, CSMA/CD, LAN protocol, Elementary Data link protocol- Sliding window protocols, Token passing rings, FDDI, IEEE 802.3, 802.5.

UNIT 3

(8L)

Routing Algorithms: Distance-Vector, Link-State, Shortest path computation, Dijkstra's algorithm, Congestion control, WAN technologies including frame relay, X.25, ATM.

UNIT 4

(8L)

Internetworking: Motivation, Concept, Goals, TCP/IP model, IP addressing with sub netting, Address binding with ARP, IP Datagram, Encapsulation IP fragmentation and reassembly, ICMP, IGMP, TCP.

UNIT 5

(8L)

Network Services: Electronic mail, File transfer, Access and management, Virtual terminals, Remote procedure call.

Text Books:

1. Forouzan, B.A., Data communication and Networking, McGraw Hill (2006) 4th ed.
2. Tanenbaum, A.S., Computer Networks, Prentice Hall (2003) 4th ed.

Course Title: Web Technology	Course Code: DA4220		
Credit:4	L 3	T 0	P 2
Year: 2nd	Semester: IV		

UNIT 1

(8L)

Web Essentials: Clients, Servers, and Communication. The Internet-Basic Internet Protocols – The World Wide Web-HTTP request message-response message-Web Clients Web Servers-Case Study. Markup Languages: XHTML. An Introduction to HTML History-Versions-Basic XHTML Syntax and Semantics-Some Fundamental HTML Elements-Relative URLs-Lists-tables-Frames-Forms-XML Creating HTML Documents Case Study.

UNIT 2

(8L)

Style Sheets: CSS-Introduction to Cascading Style Sheets-Features-Core Syntax-Style Sheets and HTML Style Rule Cascading and Inheritance-Text Properties-Box Model Normal Flow Box Layout-Beyond the Normal Flow-Other Properties-Case Study. Client-Side Programming: The JavaScript Language-History and Versions Introduction JavaScript in Perspective-Syntax-Variables and Data Types-Statements-Operators-Literals-Functions-Objects-Arrays-Built-in Objects-JavaScript Debuggers.

UNIT 3

(8L)

Host Objects: Browsers and the DOM-Introduction to the Document Object Model DOM History and Levels-Intrinsic Event Handling-Modifying Element Style-The Document Tree-DOM Event Handling-Accommodating Noncompliant Browsers Properties of window-Case Study. Server-Side Programming: Java Servlets- Architecture -Overview-A Servlet-Generating Dynamic Content-Life Cycle-Parameter Data-Sessions-Cookies- URL Rewriting-Other Capabilities-Data Storage Servlets and Concurrency-Case Study- Related Technologies.

UNIT 4

(8L)

Representing Web Data: XML-Documents and Vocabularies-Versions and Declaration-Namespaces JavaScript and XML: Ajax-DOM based XML processing Event-oriented Parsing: SAX-Transforming XML Documents-Selecting XMLData: XPATH-Templatebased Transformations: XSLT-Displaying XML Documents in Browsers-Case Study- Related Technologies. Separating Programming and Presentation: JSP Technology Introduction-JSP and Servlets-Running JSP Applications Basic JSP-JavaBeans Classes and JSP-Tag Libraries and Files-Support for the Model-View-Controller Paradigm-Case Study-Related Technologies.

UNIT 5

(8L)

Web Services: JAX-RPC-Concepts-Writing a Java Web Service-Writing a Java Web Service Client-Describing Web Services: WSDL- Representing Data Types: XML Schema- communicating Object Data: SOAP Related Technologies-Software Installation-Storing Java Objects as Files-Databases and Java Servlets.

TEXT BOOKS

3	0	2					
Year: 2nd	Semester: IV						

UNIT 1 (8L)

Introduction: Data base System Applications, data base System VS file System, Data Abstraction, Instances and Schemas, data Models: the ER Model, Relational Model & Other Models , Database Languages, data base Users and Administrator, data base System Structure, Storage Manager, the Query Processor, Two/Three tier architecture.

UNIT 2 (8L)

E-R model: Basic concepts, Design Issues, Mapping Constraints, Attributes and Entity sets, Relationships and Relationship sets, Keys, Entity-Relationship Diagram, Weak Entity Sets, Extended E-R features

UNIT 3 (8L)

Relational Model & SQL: Structure of relational Databases, Relational Algebra, Relational Calculus, Extended Relational Algebra; SQL: Form of Basic SQL Query, Nested Queries, Aggregative Operators, NULL values, Logical operators, Outer Joins, Complex Integrity Constraints in SQL.

UNIT 4 (8L)

Database Design: Schema refinement, Different anomalies in designing a Database, Decompositions , Problem related to decomposition, Functional Dependency, Normalization using functional dependencies, 1NF, 2NF, 3NF & BCNF , Lossless join decomposition, Dependency preserving Decomposition , Schema refinement in Data base Design, Multi valued Dependencies, 4NF, 5NF.

UNIT 5 (8L)

Transaction Management: Transaction-concepts, states, ACID property, schedule, serializability of schedules, concurrency control techniques - locking, timestamp, deadlock handling, recovery-log based recovery, shadow paging.

Text Books:

1. Data base Management Systems, Raghurama Krishnan, Johannes Gehrke, Tata McGrawHill,3rdEdition.
2. Data base System Concepts, Silberschatz, Korth, McGraw hill, V edition.

Reference Books:

1. Data base Systems design, Implementation, and Management, Peter Rob & Carlos Coronel 7thEdition.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Linux Administration & Shell Programming	Course Code: DA4240		
Credit:3.5	L 2	T 1	P 2
Year: 2nd	Semester: IV		

UNIT 1 **(9L)**

Linux introduction and file system: Basic Features, Advantages, Installing requirement, Basic Architecture of Unix/Linux system, Kernel, Shell. Linux File system-Boot block, super block, Inode table, data blocks, How Linux access files, storage files, Linux standard directories. Commands for files and directories cd, ls, cp, md, rm, mkdir, rmdir, pwd, file, more, less, creating and viewing files using cat, file comparisons – cmp&comm, View files, disk related commands, checking disk free spaces. LINUX vs. UNIX operating system.

UNIT 2 **(9L)**

UNIX system organization (the kernel and the shell), Unix File System, Basic file attributes. Essential Linux commands Understanding shells, Processes in Linux-process fundamentals, connecting processes with pipes, tee, Redirecting input output, manual help, Background processing, managing multiple processes, changing process priority with nice, scheduling of processes at command, batch commands, kill, ps, who, sleep, Handling editors (vi/ed editors).

UNIT 3 **(9L)**

Unix Shell programming: Types of Shells, Shell Meta characters, Shell variables, Shell scripts, Shell commands, the environment, Integer arithmetic and string Manipulation, Special command line characters, Decision making and Loop control, controlling terminal input, trapping signals, arrays. Processes in Unix/Linux, Filters using regular expressions: grep and sed, UNIX system administration.

Suggested Books:

1. Sumitabh Das, “Unix Concepts and applications”, TMH, 2003
2. Mike Joy, Stephen Jarvis, Michael Luck, “Introducing Unix and Linux”, Palgrave Macmillan.
3. O'Reilly Media “Linux System Administration”

Course Title: Principles of Management	Course Code: HA5010		
Credit:2	L 2	T 0	P 0
Year: 3rd	Semester: V		

UNIT – I

5L

Overview of management: Definition of management, need for management, role of managers, Management as science and art, evolution of management thought, contribution of Taylor and Fayol, Types of business organizations, Levels of management

UNIT – II

9L

Planning: Definition of planning, steps involved in planning, types of planning, objectives, process of managing by objectives, Strategy, types of strategies, Policy, types of policies, Decision making, types of decision making process.

UNIT – III

10L

Organizing: Nature, purpose and structure of organization, formal and informal organization, Departmentation, its importance, basis of departmentation, Line and staff authority, Centralization and decentralization, Authority and responsibility, delegation of authority
Selection and recruitment, orientation, appraisal, HRD.

UNIT – IV

8L

Directing: Creativity and innovation, Motivation, hierarchy of needs, motivation theories, Leadership – definition, elements, styles, leadership theories
Organization culture, elements and types of culture, managing cultural diversity.

UNIT – V

8L

Controlling: System and process of controlling, requirements of effective control, Types of control, cost control, purchase control, maintenance control, quality control, planning operations
Globalization and liberalization.

Reference Books:

2. R. N. Gupta, “Principles of Management”, S Chand Limited, 2007.
3. P. C. Tripathy and P. N. Reddy, " Principles and Practices of Management", Tata McGraw Hill, 1999
4. Joseph L. Massie, “Essentials of Management”, Prentice Hall of India, 2003.

**Course Structure & Syllabus of
B.Tech – Information Technology
Applicable for 2013-2017 Batch**

Course Title: Probability and Random Variables	Course Code: JA5010		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: V		

UNIT – 1 **(8L)**

Theory of Probability

Definition of Probability; Types of Probability; Classical Probability; Odds in favour and Odds against an event; Axioms of probability; Conditional probability; Dependent and Independent events; Bayes' theorem.

UNIT – 2 **(8L)**

Random Variable

Random variables; Probability Distribution function; Probability Mass function; Continuo Distribution; Conditional Distribution; Mathematical Expectation of a Discrete Random Variable and Continuous Random Variable.

UNIT – 3 **(8L)**

Statistical Techniques

Moment; Moment Generating function; Mean and Variance; Skewness; Kurtosis; Correlation and Regression Analysis; Binomial and Poisson Distributions.

UNIT – 4 **(8L)**

Discrete Random Variable and their Distributions

Binomial Negative Distribution, Binomial Hyper Geometric and Multinomial Distributions, Poisson Distribution, Relationship between Distributions of various Discrete Random Variables.

UNIT V: **(8L)**

Continuous Random Variable and their Distributions

Normal log Distribution; Normal Distribution; Normal Multivariate Distribution; Gamma Exponential; Chi-square; Weibull and Ray-Leigh Distributions; Relationship between Distributions of various continuous Random Variables.

Text Books:

1. Probability Theory and Stochastic Process, Prabhakar Rao and TSR Murty, Hyd., Reference Learning, 2013.
2. Fundamentals of Mathematical Statistics, S.C. Gupta and V.K. Kapoor, S. Chand and Co, 2000.

Reference Books:

1. Probability, Random variables and Stochastic Process, Athanasios, Papoulis, McGraw Hill, 2nd edition, 1984.
2. Probability and Statistics with Reliability, Queuing and Computer Science Application, Kishor S. Trivedi, Willey, 2nd edition, 2001.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Algorithms: Analysis & Design	Course Code: DA5210
Credit:4	L T P 3 0 2
Year: 3rd	Semester: V

UNIT 1 **(7L)**

Introduction: Algorithms, Performance Analysis-Space complexity, Time complexity, Asymptotic Notation- Big oh notation, Omega notation, Theta notation and Little oh notation, Probabilistic analysis.

UNIT 2 **(8L)**

Divide and conquer: General method, applications-Binary search, Quick sort, Merge sort, Strassen's matrix multiplication. **Greedy method:** General method, applications-Job sequencing with deadlines, knapsack problem, Minimum cost spanning trees, Single source shortest path problem.

UNIT 3 **(8L)**

Transform and conquer , Presorting , Balanced Search trees , AVL Trees , Warshall's and Floyd's Algorithm , Optimal Binary Search trees , Greedy Techniques , Prim's Algorithm , Kruskal's Algorithm Dijkstra's Algorithm , Huffman trees.

UNIT 4 **(10L)**

Backtracking: N-Queen's Problem, Hamiltonian Circuit problem, Subset-Sum problem, Branch and bound , Assignment problem , Knapsack problem ,Traveling salesman problem.

UNIT 5 **(7L)**

NP-Hard and NP-Complete problems: Basic concepts, non deterministic algorithms, NP - Hard and NP-Complete classes, Cook's theorem.

SUGGESTED BOOKS

Text Books:

1. Fundamentals of Computer Algorithms, Ellis Horowitz, SatrajSahniand Rajasekharam, Galgotia publications pvt. Ltd.
2. AnanyLevitin, "Introduction to the Design and Analysis of Algorithm", Pearson Education Asia,2003 3.
3. Algorithm Design: Foundations, Analysis and Internet examples, M.T.Goodrich and R.Tomassia, Johnwiley and sons.

Reference Books:

1. T.H. Cormen, C.E. Leiserson, R.L. Rivest and C. Stein, "Introduction to Algorithms", PHI Pvt. Ltd., 20012.
2. Introduction to Design and Analysis of Algorithms A strategic approach, R.C.T.Lee, S.S.Tseng, R.C.Chang and T.Tsai, McGraw Hill.
3. Design and Analysis of algorithms, Aho, Ullman and Hopcroft,Pearson education.
4. Algorithms – Richard Johnson baugh and Marcus Schaefer, Pearson Education.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Advanced Java Programming	Course Code: DA5220		
Credit:4	L 3	T 0	P 2
Year: 3rd	Semester: V		

UNIT 1 **(8L)**

J2SE: Concepts and Prerequisites: Data Types, Arrays, Dynamic Arrays, Type Casting, Classes and Objects, Inheritance, Interfaces, Exception Handling, Multi-Threading.

J2EE Architecture: J2EE as a framework, Client Server Traditional model, Comparison amongst 2-tier, 3-tier and N-tier architectures.

UNIT 2 **(8L)**

JDBC: Introduction, JDBC Architecture, Types of JDBC Drivers, The Connectivity Model, The java.sql package, Navigating the Result Set object's contents, Manipulating records of a Result Set object through User Interface, The JDBC Exception classes, Database Connectivity, Data Manipulation (using Prepared Statements, Joins, Transactions, Stored Procedures), Data navigation.

UNIT 3 **(8L)**

Java Beans: The software component assembly model- The java beans development kit- developing beans – notable beans – using info bus - Glasgow developments - Application Builder tool- JAR files- Introspection-Bound Properties-Persistence-customizers - java beans API.

EJB: EJB architecture- EJB requirements – design and implementation – EJB session beans- EJB entity beans-EJB Clients – deployment tips, tricks and traps for building distributed and other systems – implementation and future directions of EJB-Variable in perl- perl control structures and operators – functions and scope.

UNIT 4 **(8L)**

Java Servlet: Servlet overview, Brief origin and advantages over CGI, Writing small Servlet Programs, Deployment Descriptor, Servlet Life Cycle, Sharing Information, Initializing a Servlet, Writing Service Methods, Filtering Requests and Responses, Invoking Other Web Resources, Accessing the Web Context, Maintaining Client State, Finalizing a Servlet, Session: Definition, Different ways to track sessions

UNIT 5 **(8L)**

JSP: Introduction to JSP, JSP processing, JSP Application Design, Tomcat Server, Implicit JSP objects, Conditional Processing, Declaring variables and methods, Error Handling and Debugging, Sharing data between JSP pages- Sharing Session and Application Data. Accessing a database from a JSP page, Application-specific Database Action, Developing Java Beans in a JSP page, introduction to Struts framework.

Text Books:

1. J. McGovern, R. Adatia, Y. Fain, 2003, J2EE 1.4 Bible, Wiley-dream tech India Pvt. Ltd, New Delhi.
2. H. Schildt, 2002, Java 2 Complete Reference, 5th Edition, Tata McGraw-Hill, New Delhi.

Reference Books:

1. K. Moss, 1999, Java Servlets, Second edition, Tata McGraw Hill, New Delhi.
2. D. R. Callaway, 1999, Inside Servlets, Addison Wesley, Boston.
3. Joseph O'Neil, 1998, Java Beans from the Ground Up, Tata McGraw Hill, New Delhi.
4. Tom Valesky, Enterprise JavaBeans, Addison Wesley.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Artificial Intelligence	Course Code: DA5010						
Credit: 3.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 3rd	Semester: V						

UNIT 1 **(8L)**

Introduction: History of AI, Intelligent agents – Structure of agents and its functions, Problem spaces and search - Heuristic Search techniques – Best-first search, Problem reduction -Constraint satisfaction - Means Ends Analysis.

UNIT 2 **(8L)**

Knowledge Representation: Approaches and issues in knowledge representation, Knowledge Based Agent, Propositional Logic, Predicate logic – Unification – Resolution, Weak slot – filler structure, Strong slot - filler structure.

UNIT 3 **(8L)**

Reasoning under uncertainty: Logics of non-monotonic reasoning, Implementation, Basic probability notation, Bayes rule, Certainty factors and rule based systems, Bayesian networks, Dempster - Shafer Theory, Fuzzy Logic.

UNIT 4 **(8L)**

Planning and Learning: Planning with state space search, conditional planning, continuous planning, Multi-Agent planning. Forms of learning - inductive learning – Reinforcement Learning - learning decision trees - Neural Net learning and Genetic learning

UNIT 5 **(8L)**

Advanced Topics: Game Playing: Minimax search procedure - Adding alpha-beta cutoffs. **Expert System:** Representation - Expert System shells - Knowledge Acquisition. CASE STUDY- Dendral, Mycin. **Swarm Intelligent Systems** – Ant Colony System, Development, Application and Working of Ant Colony System.

Text Books:

1. Elaine Rich, Kevin Knight and Shivashankar B.Nair, “Artificial Intelligence”, Tata McGraw-Hill, Third edition, 2009. (UNITs I, II, III & V)
2. Stuart J. Russell and Peter Norvig, "Artificial Intelligence: A Modern Approach", Pearson Education Asia, Second edition, 2003. (UNIT IV)
3. N. P. Padhy, “Artificial Intelligence and Intelligent System”, Oxford University Press, Second edition, 2005. (UNIT V)

Reference Books:

1. Rajendra Akerkar, “Introduction to Artificial Intelligence”, Prentice-Hall of India, 2005.
2. Patrick Henry Winston, “Artificial Intelligence”, Pearson Education Inc., Third edition, 2001.
3. Eugene Charniak and Drew Mc Dermott, “Introduction to Artificial Intelligence”, Addison-Wesley, ISE Reprint, 1998.
4. Nils J.Nilsson, “Artificial Intelligence - A New Synthesis", Harcourt Asia Pvt. Ltd., Morgan Kaufmann, 1988.

**Course Structure & Syllabus of
B.Tech – Information Technology
Applicable for 2013-2017 Batch**

Course Title: Multimedia Technologies	Course Code: IA5010		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: V		

UNIT 1 **(8L)**

Introduction: Introduction to Multimedia, Multimedia Information, Multimedia Objects, Multimedia in business and work, Stages of Multimedia Projects, presentation tools, tools for object generations, video, sound, image capturing, authoring tools, card and page based authoring tools.

UNIT 2 **(8L)**

Multimedia Building Blocks: Text, Sound MIDI, Digital Audio, audio file formats, MIDI under windows environment Audio & Video Capture.

UNIT 3 **(8L)**

Data Compression: Introduction to data compression, Compression ratio, loss less & lossy compression, Huffman Coding, Shannon Fano Algorithm, Huffman Algorithms, Adaptive Coding, Arithmetic Coding, Finite Context Modelling, Dictionary based Compression, Sliding Window Compression, LZ77, LZ78, LZW compression.

UNIT 4 **(8L)**

Image, Audio and Video Compression: Digital Audio concepts, Sampling Variables, Loss less compression of sound, loss compression & silence compression, lossy graphic compression, image file format animations Images standards, JPEG Compression, ZigZag Coding, Multimedia Database. Content based retrieval for text and images, Video Compression, MPEG standards, MHEG Standard Video Streaming on net.

UNIT 5 **(8L)**

Advanced forms of interaction in Multimedia: Video Conferencing, Elements of (immersive/non-immersive) Virtual Reality, Augmented Reality, Telepresence, Mobile technologies **Multimedia Security:** Overview- Multimedia Systems, Secured Multimedia, Digital Rights Management Systems and Technical trends, Multimedia Encryption and Digital Watermarking, Security Attacks and Multimedia Authentication.

SUGGESTED BOOKS:

1. Tay Vaughan "Multimedia, Making IT Work" Osborne McGraw Hill.
2. Buford "Multimedia Systems" Addison Wesley.
3. Mark Nelson "Data Compression Book" BPB.

**Course Structure & Syllabus of
B.Tech – Information Technology
Applicable for 2013-2017 Batch**

Course Title: Engineering Economics	Course Code: GC5010		
Credit: 2	L 2	T 0	P 0
Year: 3rd	Semester: VI		

To be taught by Humanities Department

UNIT-I

Time value of money: Simple and compound interest, Time value equivalence, Compound interest factors, Cash flow diagrams, Calculation, Calculation of time –value equivalences. Present worth comparisons, Comparisons of assets with equal, unequal and infinite lives, comparison of deferred investments, Future worth comparison, payback period comparison.

UNIT-II

Use and situations for equivalent annual worth comparison, Comparison of assets of equal and unequal life. Rate of return, Internal rate of return, comparison of IRR with other methods, IRR misconceptions.

UNIT-III

Analysis of public Projects: Benefit/ Cost analysis, quantification of project, cost and benefits, benefit/cost applications, Cost –effectiveness analysis.

UNIT-IV

Depreciation, computing depreciation charges, after tax economic comparison, Break-even analysis; linear and non-linear models. Product and Process Costing, Standard Costing, cost estimation, Relevant Cost for decision making, Cost control and Cost reduction techniques.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Computer Graphics	Course Code: DA6210		
Credit: 4	L 3	T 0	P 2
Year: 3rd	Semester: VI		

UNIT 1 **(7L)**

Introduction to computer graphics and primitives algorithms: Points, planes, pixels and frames buffers, lines, circles and ellipse drawing algorithms, display devices, primitive devices, applications of computer graphics.

UNIT 2 **(7L)**

Two-Dimensional Transformation: Introduction to transformation matrix, **Types of transformations in 2-D:** Identity Transformation, Scaling, Reflection, Shear Transformation, Rotation, Translation, Rotation about an arbitrary point, Combined Transformation, Homogeneous coordinates, 2-D transformation using homogeneous coordinates.

UNIT 3 **(9L)**

Three-Dimensional Transformation: Objects in homogeneous coordinates, **3-D Transformation:** Scaling, Translation, Rotation, Shear Transformations, Reflection, world coordinates and viewing coordinates, Projection, parallel Projection, Perspective projection. **Hidden Lines and Surfaces:** Back face removal algorithms, Hidden lines methods.

UNIT 4 **(9L)**

Viewing and Solid Area Scan-Conversion: Introduction to viewing and clipping, viewing transformation in 2-D, Point Clipping, Line Clipping, Introduction to polygon Clipping, Viewing and clipping in 3-D, Three Dimensional Viewing Transformations, Text Clipping, generalize Clipping, Multiple windowing.

Introduction to Solid Area Scan: Conversion, Inside-Outside Test, Winding Number Method and Coherence Property, Polygon Filling, Seed Fill Algorithms, Scan Line Algorithm, priority Algorithm, Scan Conversion of Characters, Aliasing, Anti-aliasing, Halfoning, Threshold and Dithering.

UNIT 5 **(8L)**

Introduction to curves: Curves Continuity, Conic Curves, Piecewise Curve Design, Spline curve representation, Bezier Curves, Fractals and its Applications.

Object rendering: Introduction to Object Rendering, Shading, Ray Tracing, Illuminational model, Colour Models.

Text Books:

1. Computer Graphics, R.K. Maurya, John Willey.
2. Procedural Elements of Computer Graphics, David F. Rogers, Tata McGraw Hill.

Reference Books:

1. Computer Graphics, Donald hearn and M.Pauline Beaker, Prentice Hall of India.
2. Computer Graphics, Steven Harrington, McGraw Hill.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Dot Net Technologies	Course Code: DA6220
Credit: 4	L T P 3 0 2
Year: 3rd	Semester: VI

UNIT 1

(8L)

Introduction to C#: C# Language Fundamentals: An Anatomy of a basic class, Creating objects: Constructor basic, the composition of an application, Default Assignment and variable scope, member initialization syntax, Basic input and output with the console class, Understanding value types and reference types, the master node: System. Objects, The system Data type (And C# aliases), Converting between value type and reference type: Boxing and Unboxing, Defining program constraints, Iterations constructs, control flow constructs, The complete set operator, Defining Custom class methods, Understanding static methods, Method parameter modifiers, Array manipulation, String manipulation, Enumerations, Defining structures, Defining custom namespaces.

UNIT 2

(8L)

Object Oriented Aspects Of C#: Formal definition of the class, Definition the “Default public interface” of a type, Recapping the pillars of OOP, The first pillar: Encapsulation services, Pseudo Encapsulation: Creating read only field, The second pillar: Inheritance supports keeping family secrets: The “Protected” keyword, The Nested type definitions, The third pillar: Polymorphic support casting between types, Generating class definitions using Visual Studio.Net. Exceptions and Objects Life Time Ode to errors, Bugs and exceptions, the role of .NET exceptions handling, the system. Exception base class throwing a generic exception catching exception, CLR system level exception(System. system exception), Custom application level exception (System. application exception), Handling multiple exception, The finally block The last chance exception, dynamically identify application and system level exception, Debugging system exception using VS.Net, Understanding Object life time, The CIT of new, The basic of garbage collection, Finalizing a type, Finalization process, building and Ad hoc destruction method, garbage collection optimization, The system .GC type.

UNIT 3

(8L)

The CLR And The .Net Framework: The building Block of the .NET platform (CLR,CTS,CLS), the role of the .NET base class libraries, , additional .NET Aware programming Languages, Understanding .Net Assemblies, Problems with classic COM Binaries, The role of the common intermediate language, The role of .NET type metadata, The role of the assembly manifest, Compiling CIL to platform specific instruction. Building a simple file test assembly, Cross Language Inheritance. Building the multi file assembly, Using the multi file assembly, Understanding private assemblies, robing for private assemblies (The Basics), Private assemblies and XML Configuration files, Probing for private assemblies (The details),Understanding Shared assembly, Understanding Shared Names, Building a shared assembly, Understanding delay Signing, Installing/Removing shared assemblies, Using a Shared assembly.

UNIT 4

(8L)

Application Development On .Net: Using the visual studio.Net IDE, key aspects of the VS.Net IDE, Documenting source code via XML, Building Windows Applications, Event Driven Programming, Delegate, Event and its association, Synchronous and asynchronous operation with delegate, User Defined events and delegates,ADO.NET Architecture,.NET Framework Data Providers, Data set, Data reader, data adapter, Accessing Data with ADO.NET.

UNIT 5

(8L)

Web Based Application Development On .Net: Introduction to web form, Need of Web Application, Static and Dynamic Page, Working of IIS and Browser, Differences between ASP and ASP.NET, understanding post back, understanding page life cycle, State management, Server control form validation, Master pages, ASP.NET web security, server control form validation, Programming Web Applications with Web Forms, Web service, Programming Web Services.

Text Books:

1. E. Balagurusamy, "Programming in C#", Tata McGraw-Hill, 2004. (Unit I, II)
2. J. Liberty, "Programming C#", 2nd ed., O'Reilly, 2002. (Unit III, IV, V)

Reference Books:

1. Herbert Schildt, "The Complete Reference: C#", Tata McGraw-Hill, 2004.
 2. Robinson et al, "Professional C#", 2nd ed., Wrox Press, 2002.
 3. Andrew Troelsen, "C# and the .NET Platform", A! Press, 2003.
- S. ThamaraiSelvi, R. Murugesan, "A Textbook on C#", Pearson Education, 2003

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Software Engineering	Course Code: DA6010						
Credit: 3	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 3rd	Semester: VI						

UNIT 1

(8L)

Introduction to Software Engineering, Software Characteristics, Software Crisis, Software Engineering Processes, Software Development Life Cycle (SDLC) Models: Water Fall Model, Prototype Model, Spiral Model, Evolutionary Development Models, Iterative Enhancement Models.

UNIT 2

(8L)

Software Requirement Analysis and Specifications: Requirement Engineering Process: Elicitation, Analysis, Documentation, Review and Management of User Needs, Data Flow Diagrams, Data Dictionaries, Entity-Relationship diagrams, Software Requirement and Specifications, Functional and non-Functional requirements, Software Prototyping, Feasibility Study, Information Modeling, Decision Tables, SRS Document, IEEE Standards for SRS, Software Quality Assurance (SQA), SEI-CMM Model.

UNIT 3

(8L)

Design: Basic Concept of Software Design, Architectural Design, Low Level Design: Modularization, Design Structure Charts, Pseudo Codes, Flow Charts, Coupling and Cohesion Measures, Design Strategies: Function Oriented Design, Object Oriented Design, Top-Down and Bottom-Up Design. Software Measurement and Metrics: Various Size Oriented Measures: Halstead's Software Science, Function Point (FP) Based Measures, Cyclomatic Complexity Measures: Control Flow Graphs.

UNIT 4

(7L)

Software Reliability: Failure and Faults, Reliability Models: Basic Model, Logarithmic Poisson Model, Calendar time Component, Reliability Allocation. **Coding:** Top-Down and Bottom –Up programming, structured programming, Compliance with Design and Coding Standards.

UNIT 5

(9L)

Testing: Objectives, Testing Tools & Standards. Unit Testing, Integration Testing, Acceptance Testing, Regression Testing, Top-Down and Bottom-Up Testing Strategies: Test Drivers and Test Stubs, Path Testing, Structural Testing (White Box Testing), Functional Testing (Black Box Testing),

Maintenance: Corrective and Perfective Maintenance, Maintenance Process, Maintenance Models, Maintenance Cost, Software Re-Engineering, Reverse Engineering. Constructive Cost Models (COCOMO).

Software Quality Management: Software Quality Factors, Quality Assurance, Quality Standards, Software Maintenance.

Text Books:

1. R. S. Pressman, "Software Engineering – A practitioner's approach", 3rd ed., McGraw Hill Int. Ed., 1992.
2. K.K. Aggarwal & Yogesh Singh, "Software Engineering", New Age International, 2001
3. Pankaj Jalote, Software Engineering, Wiley India

Reference Books:

1. Rajib Mall, Fundamentals of Software Engineering, PHI Publication, 3rd Edition.
2. Ian Sommerville, Software Engineering, Addison Wesley, 8th Edition.
3. James Peter, W Pedrycz, "Software Engineering", John Wiley & Sons

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Data Warehousing and Data Mining	Course Code: DA6020						
Credit: 3.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 3rd	Semester: VI						

UNIT 1 **(12L)**

Overview, Motivation (for Data Mining), Data Mining-Definition & Functionalities. **Data Warehousing:** Overview, Definition, Delivery Process, Difference between Database System and Data Warehouse, Multi-Dimensional Data Model, Data Cubes, Stars, Snow Flakes, Fact Constellations, Concept hierarchy, Process Architecture, 3 Tier Architecture, Data Marting. ROLAP, MOLAP, HOLAP.

UNIT 2 **(7L)**

Data Pre-Processing: Data Cleaning: Missing Values, Noisy Data,(Binning, Clustering, Regression, Inconsistent Data, Data Integration and Transformation. Data Reduction: Data Cube Aggregation, Dimensionality reduction, Data Compression, Numerosity Reduction, Clustering, Discretization and Concept hierarchy generation.

UNIT 3 **(7L)**

Concept Description: Definition, Data Generalization, Analytical Characterization, Analysis of attribute relevance, Mining Class comparisons, Statistical measures in large Databases. Measuring Central Tendency, Measuring Dispersion of Data, Apriori Algorithm, Mining Multilevel Association rules from Transaction Databases

UNIT 4 **(6L)**

Classification: What is Classification, Issues regarding Classification, Decision tree, Bayesian Classification, Classification by Back propagation.

UNIT 5 **(8L)**

Cluster Analysis: Data types in cluster analysis, Partitioning methods. Hierarchical Clustering- CURE and Chameleon, Density Based Methods-DBSCAN, OPTICS, Grid Based Methods- STING, CLIQUE, Outlier Analysis.

Suggested Books:

1. Jiawei Han, MichelineKamber, "Data Mining Concepts & Techniques" Elsevier
2. M.H.Dunham,"DataMining:Introductory and Advanced Topics" Pearson Education
3. Mallach,"Data Warehousing System",McGraw –Hill

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Building Enterprise Applications	Course Code: IA6010		
Credit:3.5	L 3	T 1	P 0
Year: 3rd	Semester: VI		

UNIT 1 **(6L)**

Introduction to enterprise applications and their types, software engineering methodologies, life cycle of raising an enterprise application, introduction to skills required to build an enterprise application, key determinants of successful enterprise applications, and measuring the success of enterprise applications

UNIT 2 **(6L)**

Inception of enterprise applications, enterprise analysis, business modeling, requirements elicitation, use case modeling, prototyping, non-functional requirements, requirements validation, planning and estimation

UNIT 3 **(10L)**

Concept of architecture, views and viewpoints, enterprise architecture, logical architecture, technical architecture - design, different technical layers, best practices, data architecture and design – relational, XML, and other structured data representations, Infrastructure architecture and design elements - Networking, Internetworking, and Communication Protocols, IT Hardware and Software, Middleware, Policies for Infrastructure Management, Deployment Strategy, Documentation of application architecture and design

UNIT 4 **(12L)**

Construction readiness of enterprise applications - defining a construction plan, defining a package structure, setting up a configuration management plan, setting up a development environment, introduction to the concept of Software Construction Maps, construction of technical solutions layers, methodologies of code review, static code analysis, build and testing, dynamic code analysis – code profiling and code coverage

UNIT 5 **(6L)**

Types and methods of testing an enterprise application, testing levels and approaches, testing environments, integration testing, performance testing, penetration testing, usability testing, globalization testing and interface testing, user acceptance testing, rolling out an enterprise application.

Text Books:

1. Raising Enterprise Applications – Published by John Wiley, authored by Anubhav Pradhan, Satheesha B. Nanjappa, Senthil K. Nallasamy, Veerakumar Esakimuthu
2. Building Java Enterprise Applications – Published by O'Reilly Media, authored by Brett McLaughlin.

Reference Books:

1. Software Requirements: Styles & Techniques – published by Addison-Wesley Professional
2. Software Systems Requirements Engineering: In Practice – published by McGraw-Hill/Osborne Media
3. Managing Software Requirements: A Use Case Approach, 2/e – published by Pearson
4. Software Architecture: A Case Based Approach – published by Pearson

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Business Intelligence	Course Code: DA8010
Credit: 3.5	L T P 3 1 0
Year: 4th	Semester: VII

UNIT 1 **(6L)**

Introduction to Business Intelligence: Introduction to OLTP and OLAP, BI Definitions & Concepts, Business Applications of BI, BI Framework, Role of Data Warehousing in BI, BI Infrastructure Components – BI Process, BI Technology, BI Roles & Responsibilities

UNIT 2 **(12L)**

Basics of Data Integration (Extraction Transformation Loading): Concepts of data integration need and advantages of using data integration, introduction to common data integration approaches, introduction to ETL using SSIS, Introduction to data quality, data profiling concepts and application

UNIT 3 **(6L)**

Introduction to Multi-Dimensional Data Modeling: Introduction to data and dimension modeling, multidimensional data model, ER Modeling vs. multi-dimensional modeling, concepts of dimensions, facts, cubes, attribute, hierarchies.

UNIT 4 **(4L)**

Star and snowflake schema, introduction to business metrics and KPIs, creating cubes using SSAS.

UNIT 5 **(12L)**

Basics of Enterprise Reporting: Introduction to enterprise reporting, concepts of dashboards, balanced scorecards, introduction to SSRS Architecture, enterprise reporting using SSRS.

Suggested Books:

The courseware including PowerPoint and notes are available for the Elective. In addition, following reference books can also be used:

1. Business Intelligence by David Loshin
2. Business intelligence for the enterprise by Mike Biere
3. Business intelligence roadmap by Larissa Terpeluk Moss, ShakuAtre
4. Successful Business Intelligence: Secrets to making Killer BI Applications by CindiHowson
5. Delivering business intelligence with Microsoft SQL server 2008 by Brain, Larson
6. Foundations of SQL Server 2005 Business Intelligence by Lynn Langit
7. Information dashboard design by Stephen Few.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Credit: 3.5	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 4th	Semester: VII						

UNIT 1

(10L)

Cloud Computing – History of Cloud Computing – Cloud Architecture – Cloud Storage – Why Cloud Computing Matters – Advantages of Cloud Computing – Disadvantages of Cloud Computing – Companies in the Cloud Today – Cloud Services.

UNIT 2

(10L)

Web-Based Application –Types of Cloud Service Development – Software as a Service – Platform as a Service – Web Services – On-Demand Computing – Discovering Cloud Services Development Services and Tools – Amazon Ec2 – Google App Engine – IBM Clouds

UNIT 3

(10L)

Centralizing Email Communications– Cloud Computing for the Community –Collaborating on Group Projects and Events – Cloud Computing for the Corporation--Evaluating web mail services--Evaluating web conference tools--Evaluating on line groupware--collaborating via blogs and wikis

UNIT 4

(10L)

Understanding cloud storage--evaluating on linefile storage-- exploring on line book marking services--exploring on line photo editing applications--exploring photo sharing communities--controlling it with web based desktops.

Suggested Books:

1. Michael Miller, Cloud Computing: Web-Based Applications That Change the Way You Work and Collaborate Online, Que Publishing, August 2008.
2. Haley Beard, Cloud Computing Best Practices for Managing and Measuring Processes for On-demand Computing, Applications and Data Centers in the Cloud with SLAs, Emereo Pty Limited, July 2008.
3. Anthony T Velte , Robert Elsenpeter Cloud Computing A Practical Approach , Tata McGraw-Hill Education, 01-Jan-2009.
4. Lee Gilliam, Cloud Computing Principles, Systems and Applications, Springer, 2010.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: ADVANCED WEB TECHNOLOGY	Course Code: IA7220						
Credit: 3.5	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 4 th	Semester: VII						

Unit 1: Revised tour of basics: HTML with CSS, sample codes in java script, introduction to XML with CSS, working with images, revision of mysql installation and commands.

Unit 2: Web development and Bootstrap: Introduction to bootstrap, history of bootstrap, responsive website, usage of bootstrap, first webpage with bootstrap Bootstrap controls – buttons, table, images, button groups, dropdown, collapse, tabs, forms etc.

UNIT 3: Ruby Introduction: what is ruby?, brief history of ruby, ruby on rails download and installation, first program in ruby, ruby variables and data types- numbers, Boolean, strings etc., puts and print, String functions: length, reverse, upcase, downcase etc., writing comments.

UNIT 4: Ruby on rails: introduction to rails, installation of DBMS, writing test application for database connections, starting rails web server and open application, sample website project on rails.

UNIT 5: Android Application Development: *introduction to android, download and installation of android studio, understand the structure of hello project, design sample app in SDK, configuration and launching of emulator, load application using mobile phone, introduction to sqllite.*

SUGGESTED BOOKS:

1. *Michael Hartl, Ruby on rails tutorial (rails 5) learn web development with rails, ed 4, online*
2. Head First Android Development A Brain-Friendly Guide By Dawn Griffiths, David Griffiths
Publisher: O'Reilly Media , 2015
3. **Programming Ruby 1.9 & 2.0: The Pragmatic Programmers' Guide (The Facets of**

Ruby) 4th Edition by Dave Thomas (**Author**), Andy Hunt (**Author**), Chad Fowler (**Author**)

Laboratory Work:

- Design bordered table for storing details of all employees in IT department using bootstrap. Also highlight HOD of department.
- Insert an image in the webpage in different shapes like circle, rectangle etc.
- Design login form using bootstrap classes.
- Design one page web poster of your project using bootstrap.
- Downloading and installation of ruby on rails.
- Create a module for simple calculator function.
- Write a program to calculate factorial of a no using ruby.
- Write first database application using rails and map the web server.
- Develop your own website by using bootstrap and rails.
- Create some basic android applications like: working with button, Toggle Button, checkbox, date-time picker, AlertDialog box etc.

Create a MediaPlayer application in android using the above concepts

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Cryptography and Network Security	Course Code: DA7210
Credit: 4	L T P 3 0 2
Year: 4th	Semester: VII

UNIT 1

(8L)

Introduction to security attacks, services and mechanism, introduction to cryptography. **Conventional Encryption:** Conventional encryption model, classical encryption techniques-substitution ciphers and transposition ciphers, cryptanalysis, steganography, stream and block ciphers.

Modern Block Ciphers: Block ciphers principals, Shannon’s theory of confusion and diffusion, fiestal structure, data encryption standard(DES), strength of DES, differential and linear crypt analysis of DES, block cipher modes of operations, triple DES, confidentiality using conventional encryption, traffic confidentiality, key distribution,

UNIT 2

(8L)

Introduction to prime and relative prime numbers, finite field of the form GF(p), modular arithmetic, Fermat’s and Euler’s theorem, primality testing, Euclid’s Algorithm, Chinese Remainder theorem, Principals of public key crypto systems, RSA algorithm, security of RSA, key management, Diffie-Hellman key exchange algorithm, introductory idea of Elliptic curve cryptography, Elgamel encryption.

UNIT 3

(8L)

Message Authentication and Hash Function: Authentication requirements, authentication functions, message authentication code, hash functions, birthday attacks, security of hash functions and MACS, MD5 message digest algorithm, Secure hash algorithm(SHA). **Digital Signatures:** Digital Signatures, authentication protocols, digital signature standards (DSS), proof of digital signature algorithm.

UNIT 4

(8L)

Authentication Applications: Kerberos and X.509, directory authentication service, electronic mail security-pretty good privacy (PGP), S/MIME.

UNIT 5

(8L)

IP Security: Architecture, Authentication header, Encapsulating security payloads, combining security associations, key management. **Web Security:** Secure socket layer and transport layer security, secure electronic transaction (SET). **System Security:** Intruders, Viruses and related threads, firewall design principals, trusted systems.

Suggested Books:

1. William Stallings, “Cryptography and Network Security: Principals and Practice”, Prentice Hall, New Jersey.
2. Johannes A. Buchmann, “Introduction to Cryptography”, Springer-Verlag.
3. Bruce Schneier, “Applied Cryptography”.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Compiler Design	Course Code: DA7610		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

UNIT 1 **(8L)**

Introduction: Review of Languages & Grammar, Compiler and Interpreter- Basic Concepts. Phases and Passes, Design Issues using Finite State Machines, Scanner Generator- LEX. Formal Grammar and their application to Syntax Analysis, Ambiguous Grammar, The Syntactic specification of Languages: CFG, Derivation and Parse Trees, Capabilities of CFG, BNF Notation.

UNIT 2 **(10L)**

Basic Parsing Techniques: Parsing-Top Down and Bottom-Up Strategies: General Consideration. Top Down Parsing: Brute-Force Method, Recursive Descent, & Predictive Parsing. Bottom-Up Parsing: Shift Reduce Parsing, Operator Precedence Parsing. LR Grammars- LR(0), SLR(1), Canonical LR(1) & LALR(1) Parser, Comparison of parsing methods.

UNIT 3 **(8L)**

Semantic Analysis: Basic Concepts, Syntax Directed Definitions-Inherited & Synthesized Attributes, Evaluation Orders of SDDs. Syntax directed Translation Schemes, Intermediate Codes, Postfix notation, Parse Trees and Syntax Trees, Directed Acyclic Graphs, Three address Codes: Quadruple & Triples, Translation of Assignment Statements, Boolean expressions, Control Statements, Postfix Translation, Translation with a Top Down Parser, Array References in Arithmetic expressions, Procedure Calls, Declarations and Case statements Translations.

UNIT 4 **(6L)**

Symbol Tables: Organization of Non-Block Structured Language (Unordered /Ordered/Tree/Hash) and Block Structured Language (Stack Tables & Stack Implementation), Runtime Storage Management: Static Allocation, Dynamic Allocation- Activation Records and their usage, Recursive Procedure. Heap Allocation-Storage Registers and Release Strategies.

UNIT 5 **(8L)**

Error detection and Recovery: Code Optimization- Basic Blocks and Optimization, Loop Optimization, Flow Graph Analysis, Machine Dependent Optimization. **Error Handling:** Detection, Reporting, Recovery and Maintenance, Compiler-Compiler—YACC, Code Generation, Concept of Compiler Design for Object-Oriented Language.

SUGGESTED BOOKS:

1. Alfred V. Aho, Ravi Sethi, Jeffrey D. Ullman, “Compilers-Principles, Techniques & Tools”, Pearson Education
2. Robin Hunter, “Essence of Compilers”, Pearson Education
3. Steven S. Muchnick, Advanced Compiler Design & Implementation, Morgan Kaufmann Publishers

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Mobile Communication	Course Code: IA7620		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

Unit -1 (8 L)

Mobile Computing (MC): Introduction to MC, novel applications, and limitations, **GSM**: Mobile services, System architecture, Location Management: HLR-VLR, handoffs, channel allocation in cellular systems, CDMA, GPRS Architecture. .

Unit -2 (8 L)

Wireless networking, wireless LAN overview: MAC issues, IEEE 802.11, Blue tooth, wireless multiple access protocol, TCP over wireless, Mobile IP (Goals, assumptions, entities and terminology, IP packet delivery, agent advertisement and discovery, registration, tunneling and encapsulation, optimizations), Dynamic Host Configuration Protocol (DHCP).

Unit -3 (8 L)

Data management issues, data replication for mobile computers, adaptive clustering for mobile wireless networks, file system, disconnected operations. Data delivery models: push and pull. Data dissemination in wireless channels. Effects of caching, Mobile Databases and transaction.

Unit -4 (8 L)

Mobile agents computing, security and fault tolerance, transaction processing in mobile computing environment.

Unit -5 (8 L)

Ad Hoc networks, localization, MAC issues, Routing Protocols, and Algorithms, QoS in MANETS, applications of MANETS.

SUGGESTED BOOKS:

1. J. Schiller, Mobile Communications, Addison Wesley, 2012
2. Hansmann, Merk, Nicklous, Stober, "Principles of Mobile Computing", Springer, second edition, 2013.
3. Charles perkins, Mobile IP, Addison Wesley, 2014.
4. Martyn Mallick, "Mobile and Wireless Design Essentials", Wiley DreamTech, 2003.
5. Charles Perkins, Ad Hoc Networks, Addison Wesley, 2012.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: E-Business Applications	Course Code: IA7630
Credit: 3.5	L T P 3 1 0
Year: 4th	Semester: VII

UNIT 1 **(12L)**
 Overview of e-Business, World Wide Web, Overview of Electronics payments, Home Banking, Online Banking. Customer Relation Management (CRM): Why CRM? Defining CRM, New CRM architecture, CRM trends. Selling-Chain Management: Deriving forces for Selling-Chain management, Selling-Chain management, Elements of Selling-Chain infrastructure.

UNIT 2 **(5L)**
 Enterprise Resource Planning (ERP): What is ERP? Why ERP? ERP usage in the real World, ERP implementation, Future of ERP applications.

UNIT 3 **(5L)**
 Supply Chain Management (SCM): Defining SCM, Basics of Internet-Enabled SCM, e-Supply chain fusion, Manager’s roadmap for SCM.

UNIT 4 **(5L)**
 E-Procurement: Purchasing versus procurement, Elements of Buy-Side e-Procurement solutions, Elements of Sell-Side e-Procurement solutions, Manager’s roadmap for e-Procurement.

UNIT 5 **(13L)**
 Knowledge-Tone Applications: Why knowledge applications and what is it? Developing the e-Business Design: Challenges of e-Business strategy creation, Roadmap to moving your company into e-Business. Maturity Models: Five Maturity Levels, Characteristics of Maturity Levels, Key process areas. Overview of E-business proposal, calculating ROI (return on investment).

Suggested Books:

1. Ravi Kalakota and Marcia Robinson; e-Business- Roadmap for Success; Addison-Wesley Longman Publishing Co., Inc, 2001
2. H. Albert Napier, Philip J. Judd, Ollie Rivers, Stuart W. Wagner; Creating a Winning E-Business; Thompson, Course Technology; Edition 2 , 2007.
3. Greenstein and Feinman, “E-Commerce”, TMH
4. Ravi Kalakota, Andrew Whinston, “Frontiers of Electronic Commerce”, Addison Wesley
5. Denial Amor, “The E-Business Revolution”, Addison Wesley

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Advanced Computer Architecture	Course Code: DA7020						
Credit: 3.5	<table style="margin: auto; border: none;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 4 th	Semester: VII						

UNIT 1

(6L)

Introduction: Parallel Computing, Parallel Computer Model, Program and Network Properties, Parallel (Architectural Classification Schemes, Flynn’s & Feng’s Classification, Performance Metrics and Measures, Speedup Performance Laws: Multiprocessor System and Interconnection Networks; IEEE POSIX Threads: Creating and Exiting Threads, Simultaneous Execution of Threads, Thread Synchronization using Semaphore and Mutex, Canceling the Threads.

UNIT 2

(9L)

Pipelining and Memory Hierarchy: Basic and Intermediate Concepts, Instruction Set Principle; ILP: Basics, Exploiting ILP, Limits on ILP; Linear and Nonlinear Pipeline Processors; Super Scalar and Super Pipeline Design; Memory Hierarchy Design: Advanced Optimization of Cache Performance, Memory Technology and Optimization, Cache Coherence and Synchronization Mechanisms.

UNIT 3

(8L)

Thread and Process Level Parallel Architecture: Introduction to MIMD Architecture, Multithreaded Architectures, Distributed Memory MIMD Architectures, Shared Memory MIMD Architecture, Clustering, Instruction Level Data Parallel Architecture, SIMD Architecture, Fine Grained and Coarse Grained SIMD Architecture, Associative and Neural Architecture, Data Parallel Pipelined and Systolic Architectures, Vector Architectures.

UNIT 4

(8L)

Parallel Computing model: Sequential model, need of alternative model, parallel computational models such as PRAM, LMCC, Hypercube, Cube Connected Cycle, Butterfly, Perfect Shuffle Computers, Tree model, Pyramid model, Fully Connected model, PRAM-CREW, EREW Models.

UNIT 5

(9L)

Parallel Algorithms: PRAM Algorithms: Parallel Reduction, Prefix Sums, Preorder Tree Traversal, Merging two Sorted lists; Matrix Multiplication: Row Column Oriented Algorithms, Block Oriented Algorithms; Parallel Quicksort, Hyper Quicksort; Solving Linear Systems: Gaussian Elimination, Jacobi Algorithm; Parallel Algorithm Design Strategies.

Text Book:

1. Kai Hwang, ” Advance Computer Architecture”, TMH
2. Matthew, ”Beginning Linux Programming”, SPD/WROX

Reference Book:

1. Hennessy and Patterson, ” Computer Architecture: A Quantitative Approach”, Elsevier
2. Dezso and Sima, ”Advanced Computer Architecture”, Pearson
3. Quinn, ”Parallel Computing: Theory & Practice”, TMH
4. Quinn, ”Parallel Programming in C with MPI and Open MP”, TMH

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Service Oriented Computing	Course Code: IA8620		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

UNIT 1 (8L)

Introduction Service-Oriented Architecture: Computing with services, Basic standards for web services, services analysis, design, development and test, Service orchestration and composition, Resource management for web services, Quality and reliability of web services

UNIT 2 (8L)

Modeling and representation: Modelling to enable interoperation, Integration vs. Interoperation, Common ontologies, Knowledge representations, Elementary algebra: relations, modeling fundamentals Resource description framework: Motivation of RDF, RDF Basics, Key Primitives, XML syntax, Storing RDF

UNIT 3 (8L)

System Technology: Execution Models: Basic Interaction models, messaging, CORBA, peer to peer computing Security, trust and privacy, QoS and end-to-end performance, Web service standards, Autonomic computing, Service connection technology Grid-based web services

UNIT 4 (8L)

Service-Oriented Semantic Computing: Semantic web Software agent Service discovery Ontological engineering Service evolutionary approaches, Semantic service selection, Building SOC application, Service Management

UNIT 5 (8L)

Service-Oriented Challenges & Applications: Security, Challenges & Extensions, Application E-business and e-commerce M-commerce E-entertainment E-learning E-government E-health.

Suggested Books:

1. Munindar P. Singh, Michael N Hunns; Service oriented Computing, Wiley 2005
2. Huang, J.; Kowalczyk, R.; Maamar; Service-Oriented Computing: Agents, Semantics, and Engineering; Springer 2007.
3. Michael Rosen, Boris Lublinsky, Kevin T. Smith, Marc J. Balcer; Applied Soa: Service- Oriented Architecture and Design Strategies; Wiley India.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Soft Computing	Course Code: IA8610						
Credit: 3.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 4th	Semester: VIII						

UNIT 1 (8L)

Introduction of Soft Computing: Introduction to soft computing techniques, Basic concepts of fuzzy logic, Artificial neural networks, Genetic algorithm and probabilistic reasoning, application areas of soft computing techniques. **Artificial Neural Networks:** Basic concepts - Single layer perception - Multilayer Perception - Supervised and Unsupervised learning – Backpropagation networks - Kohonen's self organizing networks - Hopfield network.

UNIT 2 (8L)

Fuzzy Systems: Fuzzy sets, Fuzzy Relations and Fuzzy reasoning, Fuzzy functions - Decomposition – Fuzzy automata and languages - Fuzzy control methods - Fuzzy decision making.

UNIT 3 (8L)

Neuro - Fuzzy Modeling: Adaptive networks based Fuzzy interface systems - Classification and Regression Trees – Data clustering algorithms - Rule based structure identification - Neuro-Fuzzy controls – Simulated annealing – Evolutionary computation.

UNIT 4 (8L)

Genetic Algorithms: Survival of the Fittest - Fitness Computations - Cross over - Mutation - Reproduction – Rank method - Rank space method.

UNIT 5 (8L)

Application of Soft Computing: Optimization of traveling salesman problem using Genetic Algorithm, Genetic algorithm based Internet Search Techniques, Soft computing based hybrid fuzzy controller, Introduction to MATLAB Environment for Soft computing Techniques.

Text Books:

1. Sivanandam, Deepa, — Principles of Soft Computing, Wiley
2. Jang J.S.R, Sun C.T. and Mizutani E, "Neuro-Fuzzy and Soft computing", Prentice Hall
3. Timothy J. Ross, "Fuzzy Logic with Engineering Applications", McGraw Hill
4. Laurene Fausett, "Fundamentals of Neural Networks", Prentice Hall
5. D.E. Goldberg, "Genetic Algorithms: Search, Optimization and Machine Learning", Addison Wesley
6. Wang, — Fuzzy Logic, Springer

Reference Books:

1. Hongxing Li, C.L. Philip Chen and Han Pang Huang, Fuzzy Neural Intelligent Systems, Prentice-Hall (2010).
2. Haykin Simon, Neural Networks and Learning Machines, Imperial College Press (2012).
3. Goldberg, David E. Genetic; Algorithms in Search, Optimization and Machine Learning, Pearson Education, 2013.
4. Rosen, Kenneth H. Discrete Mathematics and its Applications, Tata Mcgraw-Hill (2014)

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Introduction to Remote Sensing & GIS	Course Code: IA8630		
Credit: 3.5	L	T	P
	3	1	0
Year: 4th	Semester: VIII		

IA8630: Introduction to Remote Sensing & GIS

UNIT 1

(8L)

Remote Sensing: Basic concepts and foundation of remote sensing – elements involved in remote sensing, electromagnetic spectrum, energy resources, energy interactions with earth surface features and atmospheres, spatial temporal, spectral and radiometric resolution of satellite sensors and satellite visual interpretation techniques.

UNIT 2

(6L)

Geographical Information System: Introduction, GIS definition and terminology, components of GIS, fundamental operations of GIS, A theoretical framework for GIS.

GIS database: spatial and attribute data; conceptual models of spatial information, Raster and Vector data. Representation of geographic information: point, line and area features and topology.

UNIT 3

(10L)

Raster to Vector data conversion, map projection, Remote sensing data as an input to GIS data. GIS functionality. Geospatial database: object–relational databases; data storage and data retrieval through query.

Overlay: arithmetical, logical and conditional overlay, buffer analysis.

Unit 4

Web-GIS architecture, mapping server (Geoserver and Mapserver), OGC standard services WMS, WFS, WFS-T, WCS, WPS.

UNIT 5

(8L)

Applications of GIS: -

Terrain Mapping and analysis:- DEM, TIN, contouring and vertical profiling, Viewshed analysis.

Path Analysis and Network: - Shortest path, closest facility, location allocation.

SUGGESTED BOOKS:

1. Lillesand, T.M., and Kieffer, R.M., 2013: Remote Sensing and Image Interpretation, John Wiley.
2. Jensen, J.R. 2014: Remote Sensing of the Environment: An Earth resource Perspective. Prentice Hall.
3. Introduction to GIS: Kang –Tsunng –Chang, TMH International, 2000.
4. Fundamentals of Spatial Information Systems by Robert Laurini and Derek Thompson, Academic Press.
5. Geographical Information Systems, Vo. I and II edited by Paul Longely, M.F. Goodchild, et.al, John Wiley and Sons, Inc. 2015.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Ethical Hacking	Course Code: IA8640		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

UNIT 1

(8L)

Ethical hacking, Foot Printing- information gathering methodology, Hacking Tools, Scanning- Definition, Types of Scanning, Objectives of Scanning, Scanning Methodology, Counter measures; Enumeration- NetBios Null Sessions, Hacking tools - Enumerating User Accounts, Active Directory Enumeration and Countermeasures; System Hacking- Administrator password guessing, Password Cracking Algorithm, Automated Password Cracking, Types of Password Attacks, Hacking tools.

UNIT 2

(8L)

Trojans and Backdoors- Overt and Covert Channels, Indications of a Trojan Attack, Reverse Engineering Trojans, Backdoor Countermeasures; Sniffers- Working of Sniffer, Passive Sniffing, Active Sniffing, Hacking tools, Sniffing Countermeasures; Denial of Service- Goal of DoS, Impact and Modes of Attack, DoS Attack Classification, Countermeasures for Reflected DoS, Tools for Detecting DDoS Attacks.

UNIT 3

(8L)

Session Hijacking- Spoofing vs Hijacking, Steps in Session Hijacking, Types of Session Hijacking, Hacking Tools, Protection against Session Hijacking, IP Security; Hacking Web Servers- Popular Web Servers and Common Security Threats, Apache Vulnerability, Attack against IIS Console, Hacking Tools, Countermeasures, Increasing Web Server Security; Web Application Vulnerabilities- Web Application Hacking, Anatomy of an Attack, Web Application Threats, Carnivore, Google Hacking, Countermeasures.

UNIT 4

(8L)

Web Based Password Cracking Techniques- Authentication mechanisms, Password Guessing, Cookies, Password Crackers Available, Hacking Tools, Countermeasures; SQL Injection- Attacking SQL Servers, SQL Server Resolution Service (SSRS), Osql-L Probing, SQL Server Talks, Preventive Measures; Hacking Wireless Networks – Rouge Access Points, Scanning Tools, Sniffing Tools, Securing Wireless.

UNIT 5

(8L)

Linux Hacking – Linux Vulnerabilities, Scanning Tools, Scanning Tools, Linux Security Tools, Advanced Intrusion Detection System, Linux Security Auditing Tool; Evading Firewalls, Intrusion Detection Systems, Intrusion Detection Tools, Penetration Testing – Penetration Test vs. Vulnerability Test, Reliance on Checklists and Templates, Phases of Penetration Testing, Risk Analysis, Active Reconnaissance.

Suggested Books:

1. Manish Kumar; The Secret of Hacking; 3rd Edition; Publisher Leo Impact Security Services.
2. Ankit Fadia; An Unofficial Guide To Ethical Hacking; 2nd Edition; Macmillan India; 2006
3. Eric Cole; Hackers Beware: The Ultimate Guide To Network Security; Publisher Sams
4. Nitesh Dhanjani, Billy Rios, Brett Brett; Hacking: The Next Generation; Publisher Shroff/o'reilly (2009)
5. Shon Harris, Allen Harper, Chris Eagle, Jonathan Ness; Gray Hat Hacking: The Ethical Hacker's Handbook, Publisher: Mcgraw-hill/osborne Media (Dec 2007)

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Cyber Crime and Computer Forensics	Course Code: IA8651
Credit: 3.5	L T P 3 1 0
Year: 4th	Semester: VIII

UNIT 1

(8L)

Cybercrime: Definition – History and evolution Types and forms of cybercrimes -Malicious Code - Computer Viruses ,Computer Worms ,Computer Trojans, Web Hacking Foot printing, Port Scanning, E-Shoplifting Web Defacement, Denial of Service Attacks, Manipulating Cookies - Email Hacking: Email Hacking using Packet Sniffers, Email Hacking & Phishing, Email Frauds & Phishing, Email Bombing Email Hijacking - Social Engineering .

UNIT 2

(8L)

Cyber Crime Investigation: Best Practices for Cyber Crime Investigation: Initializing a Search and Seizure Operation Tracking & Tracing Emails, Recovery of Digital Evidence, Cyber Law: Prevention and detection of cybercrime – Cyber Policing Current statutes in India: Penalties & Offences under the Information Technology Act, Offences under the Indian Penal Code, Issues relating to investigation and adjudication of cybercrimes in India Digital evidence IT act 2000 and other legal provisions

UNIT 3

(8L)

Intellectual property rights: Intellectual Property Issues and Cyberspace – The Indian Perspective: Overview of Intellectual Property related Legislation in India, Copyright law & Cyberspace Trademark law & Cyberspace. Digital Delivery of Intellectual Property Services. Forensics: Basic Forensic Principles, Forensic Imaging & Verification, Data Recovery and Analysis. Types of computer forensics i.e. Media Forensics, Network forensics (internet forensics), Machine forensic, Email forensic (e-mail tracing and investigations)

UNIT 4

(8L)

Computer Forensics Analysis: Discovery of electronic evidence - electronic document discovery, identification of data-Time keeping, forensic identification and analysis of technical surveillance devices, reconstructing fast events. Network forensics: Setting up the system, advanced network surveillance. Attackers goals: ICMP covert channelling, TCP covert channelling, HTTP. Establishing identity in cyberspace: Investigating IP address-MAC address-Tracing E-mails-E-mail address-Usernames-Nicknames and host names

UNIT 5

(8L)

Forensic tools and report generation: Recovery of Deleted files in windows and Unix, Analyzing network traffic, sniffers, Ethical Hacking, Hardware forensic tools like Port scanning and vulnerability assessment tools like Nmap, Netscan etc . Password recovery (tools like John the ripper, L0phtcrack, and THC-Hydra), Mobile forensic tools and analysis of called data record Template for computer forensic reports. Stages & Steps of Forensic Investigation in Tracking Cyber Criminals, Incident Handling. Footprinting, Scanning (Types-Port, Network, Vulnerability), E-Mail Spiders, Overview of System Hacking Cycle.

Suggested Books:

1. Cyber Crime and Intellectual Property Rights; Harish Chander, PHI, New Delhi.
2. Incident Response & Computer Forensics; Mandia, K. Prosis, C., Pepe, M. 2nd edition. Tata McGraw Hill, 2003.
3. McQuade, Samuel C (2005); Understanding and managing cyber crime; New Jersey: Allyn & Bacon.
4. Guide to Computer Forensics and Investigations; 2nd edition, Bill Nelson, Amelia Phillips, Frank Enfinger, and Chris Steuart, Thomson Learning
5. Derek Atkins et. al., (1997); Internet Security: Professional Reference, Techmedia, New Delhi.
6. Eric Cole; Hackers Beware: The Ultimate Guide To Network Security; Publisher Sams

References Books:

1. Digital Evidence and Computer Crime, 2nd Edition, Eoghan Casey, academic Press File System Forensic Analysis by Brian Carrier, Addition Wesley
2. Windows Forensic Analysis; DVD Toolkit (Book with DVD-ROM), Harlan Carvey, Syngress Publication
3. EnCE: The Official EnCase Certified Examiner Study Guide, 2nd Edition, Steve Bunting, Sybex Publication
4. Chad Steel, —Windows Forensicsl, Wiley India, 2006.
5. Majid Yar, —Cybercrime and Societyl, Sage Publications, 2006.
6. Robert M Slade, —Software Forensicsl, Tata McGraw Hill, 2004.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Pattern Recognition	Course Code: IA8660
Credit: 3	L T P 3 0 0
Year: 4th	Semester: VIII

Unit-I

Introduction: Basics of pattern recognition, Design principles of pattern recognition system, Learning and adaptation, Pattern recognition approaches, Mathematical foundations – Linear algebra, Probability Theory, Expectation, mean and covariance, Normal distribution, multivariate normal densities, Chi squared test.

Unit-II

Statistical Pattern Recognition: Bayesian Decision Theory, Classifiers, Normal density and discriminant functions.

Unit – III

Parameter estimation methods: Maximum-Likelihood estimation, Bayesian Parameter estimation, Dimension reduction methods - Principal Component Analysis (PCA), Fisher Linear discriminant analysis, Expectation-maximization (EM), Hidden Markov Models (HMM), Gaussian mixture models.

Unit - IV

Nonparametric Techniques: Density Estimation, Parzen Windows, K-Nearest Neighbor Estimation, Nearest Neighbor Rule, Fuzzy classification.

Unit - V

Unsupervised Learning & Clustering: Criterion functions for clustering, Clustering Techniques: Iterative square - error partitional clustering – K means, agglomerative hierarchical clustering, Cluster validation.

Suggested books:

1. Richard O. Duda, Peter E. Hart and David G. Stork, "Pattern Classification", 2nd Edition, John Wiley, 2012.
2. C. M. Bishop, "Pattern Recognition and Machine Learning", Springer, 2013.
3. S. Theodoridis and K. Koutroumbas, "Pattern Recognition", 4th Edition, Academic Press, 2014.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Knowledge Management	Course Code: IA8670
Credit: 3	L T P 3 0 0
Year: 4th	Semester: VIII

IA8670 Knowledge Management

Unit -1 (8 L)

An Introduction to knowledge management- the foundations of knowledge management including cultural issues, technology applications, organizations concepts and processes, management aspects and decision support systems. The evolution of knowledge management from information management to knowledge management, key challenges, ethics for knowledge management.

Unit-2 (8 L)

Creating the culture of learning and knowledge sharing – organization and knowledge management, building the learning organization, knowledge markets- cooperation among distributed technical specialists, tacit knowledge and quality assurance.

Unit-3 (8 L)

Knowledge management tools- telecommunication and networks in knowledge management, internet search engines and knowledge management, information technology in support of knowledge management, knowledge management and vocabulary control, information mapping in information retrieval.

Unit-4 (8 L)

Knowledge Management Applications – Components of a knowledge management, case studies - from library to knowledge center, knowledge management in health sciences.

Unit -5 (8 L)

Future trends and case studies- Advanced topics and case studies in knowledge management, development of a knowledge management map/plan that is integrated with an organization's strategic and business plan.

SUGGESTED BOOKS:

1. Srikantaiah, T.K., M., Knowledge Management for the information Professional, Information Today, Inc, 2000.
2. D. Hislop, Knowledge Management in Organizations, Oxford University Press; Second edition (6 November 2009)
3. R.C.Agrawal, Knowledge Management Tools & Techniques , Neha Publishers and Distributors, 2009

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Software Project Management	Course Code: IA8680						
Credit: 3	<table style="width: 100%; border: none;"> <tr> <td style="width: 33%; text-align: center;">L</td> <td style="width: 33%; text-align: center;">T</td> <td style="width: 33%; text-align: center;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 4th	Semester: VIII						

UNIT 1

(8L)

Introduction to software project management, importance of software project management, software projects versus other projects, activities covered by software project management, plans, methods, category of software projects, success and failure of a project, management control. Project management and evaluation, project portfolio management, cost benefit evaluation techniques, risk evaluation, programme management, resource allocation within programmes, strategic programme management, benefits management.

UNIT 2

(8L)

Overview of project planning, stepwise project planning, project selection, project scope identification, project infrastructure identification, project characteristics, identification of project product and activities, effort estimation, activity risks, resource allocation, review plan, lower level plan execution; selection of appropriate project approach, build or buy, selection of methodologies, choice of process models, structure versus speed of delivery, waterfall model, spiral model, software prototyping, incremental delivery, agile methods, extreme programming, iterative process management, appropriate process model selection.

UNIT 3

(8L)

Software effort estimation, problems with under and over estimation, basis for software estimation, estimation techniques, bottom-up estimating, top-down and parametric models, expert judgment, estimation by analogy, COCOMO13, function point analysis; activity planning, when to plan, project schedules, sequencing and scheduling activities, network planning models, adding time dimension, forward pass, backward pass, critical path identification, activity float, project shortening, critical activity identification, activity on arrow; risk management, categories of risk, framework for risk, risk identification, risk assessment, risk planning, risk evaluation, PERT, critical chain concepts.

UNIT 4

(8L)

Resource allocation, nature of resources, identification of resource requirements, scheduling resources, creating critical path, counting the cost, cost schedule, scheduling sequence; monitoring and control, creating framework, collecting data, visualizing progress, cost monitoring, earned value analysis, priority monitoring, change control; managing contracts, types of contracts, stages in contracts, terms of contracts, contract management, acceptance of contract.

UNIT 5

(8L)

Managing People, understanding behaviour, organization behaviour, selecting the right person for the job, best method for instruction, motivation, Oldham-hackman job model, stress, health and safety; working in teams, becoming a team, decision making, co-ordinating dependencies, dispersed and virtual teams, communication of genres and plans, leadership; software quality, software quality in project planning, importance of software quality, ISO 9126, product versus process quality management, quality management system, process capability models, techniques to help enhance software quality, testing, quality plans.

Suggested Books:

1. Shtub, Bard, and Globerson, "Project Management: Engineering, Technology, & Implementation", Prentice Hall
2. Bob Hughes, Mike Cotterell, "Software Project Management", Tata McGraw Hill
3. Neal Whitten, "Managing Software Development Projects, Formula for Success", John Wiley & Sons

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch

Course Title: Information and Coding Theory	Course Code: IA8690		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

Unit- I: Source Coding: Definitions and Examples, Uniquely Decodable Codes, Instantaneous Codes, Constructing Instantaneous Codes, Kraft's Inequality, McMillan's Inequality, Comments on Kraft's and McMillan's Inequalities. Optimal Codes: Optimality, Binary Huffman Codes, Average Word-length of Huffman Codes, Optimality of Binary Huffman Codes, r-ary Huffman Codes, Extensions of Sources.

Unit-II: Entropy: Information and Entropy, Properties of the Entropy Function, Entropy and Average Word-length, Shannon-Fano Coding, Entropy of Extensions and Products, Shannon's First Theorem, An Examples of Shannon's First Theorem.

Unit- III: Information Channels: Notation and Definitions, The Binary Symmetric Channel, System Entropies, System Entropies for the Binary Symmetric Channel, Extension of Shannon's first Theorem to Information Channels, Mutual Information, Mutual Information for the Symmetric Channel, Channel Capacity.

Unit-IV Using an Unreliable Channel: Decision Rules, An Examples of Improved Reliability, Hamming Distance, Statement and Outline Proof of Shannon's Theorem, The Converse of Shannon's Theorem, Comments on Shannon's Theorem

Unit-V: Error- correcting Codes: Introductory Concepts, Examples of Codes, Minimum Distance, Hamming's Sphere-packing Bound, The Gilbert – Varshamov Bound, Hadamard Matrices and Codes. Linear Codes: Matrix Description of Linear Codes, Equivalence of Linear Codes, Minimum Distance of Linear Codes, The Hamming Codes, The Golay Codes, The Standard Array, Syndrome Decoding.

Text Book:

1. G.A.Jones & J.M.Jones-Information and Coding Theory, 3rd Edition, Springer Publication, New Delhi, 2013.

Reference Book: 1. R.Bose- Information Theory, Coding and Cryptography, TMH, New Delhi, 2012. 2. R.W. Hamming- Coding and Information Theory, Prentice-Hall, New Jersey, 2013.

Course Structure & Syllabus of B.Tech – Information Technology Applicable for 2013-2017 Batch Open Elective

Course Title: IT in Business	Course Code: IA8720						
Credit: 3	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 4th	Semester: VIII						

UNIT – 1

Business Drivers, IT's Competitive Potential Strategic, Alignment Strategic Management and Competitive Strategy ; Enterprise-wide and Inter-Organizational System, Information System Architecture, Legacy System ; Business Driven IT Infrastructure, BPR (Business Process Re-engineering), Business Resources and International Issues; IT Environment Values Resources (EVR), Strategic Management and its role in IT, Customer Matrix and Producer Matrix , Planning for Competitive Advantage ; Software Agents, Intelligent Agents, Traditional Computing Environment;

UNIT – 2

Rethinking Business through IT, Developing a Competitive Strategy, Inter-organization Information; E-Commerce and Electronic Markets- Inter-Organizational Information System and Transactions, Success Factor in E-Commerce; E-Business-Infrastructure, Hardware, Network; Business-To-Business Systems, Electronic Commerce and Market Systems; EDI- Electronic Data Interchange, Elements of EDI, Benefits, Applications; Electronic Commerce Payment Mechanism-Magnetic Strip Card, Smart Card, E-Cash, E-Wallets, IMPS, UPI, NACH .

UNIT – 3

Forming a Corporate IT Strategy, Information Economy, Decision making process; Corporate IT Strategy ,Management in Technological Environment, Competitive Strategy, Framework for Strategic use of IT; Developing an Information Architecture, Information Architecture, B2B System- Characteristics, Models, IT Solutions, Three pillars of E-Commerce ;Capitalizing of Information Technology, IBM's E-Business Strategy.

UNIT – 4

Incorporating Business Innovation into the Corporate IT Strategy, Impact of IT globalization in Software Industry, International IT Business Strategy; Global Strategic Management in IT, Application, Data Issues, System Development, IT Management in Business; Implementing Business Change with IT, Changing Role of IT in International business, The Changing Global IT Practices, Conversion Methods, Information System Maintenance .

UNIT – 5

The Impact and value of Information Technology in Competitive Strategy, Benefits of IT- Cost, Revenues, Profits, Quality, Opportunities; Organizational Technology Flexibility, Social Responsibilities in IT, Ethics in IT industry; Future of IT- Multimedia, Hardware, Virtual Reality, Digital System; Maximize the utilization of IT, Use of Accessible Technology to a Wider Audience of Computer, Changing the Focus of Strategy Trends: Beyond 2000

Recommended Books:

	Total				17.5

List of UG Electives

Course Code	Course Title
LA8610	Non-Conventional Energy Resources
LA8620	Computational Methods for Heat Transfer and Fluid Flow
LA8640	Machine Tool Design
LA8650	Advanced Engineering Materials
LA8660	Product Design & Development
LA8670	Mechanical Vibrations
LA8680	Finite Element Methods
LA8690	Automatic Control
LA8600	Mechatronics

List of Open Electives (To be conducted in VIII Semester)

Sl. No.	Branch	Subject Code	Name of Elective subjects
1	Physics	OA8710 OA8720	1. Nano Scale Science and Technology 2. Photonics Technology
2	EE	EA8710 EA8720	1. Non-Conventional Energy Resources 2. Instrumentation and Process control

**Course Structure & Syllabus of
B.Tech – Mechanical Engineering
Applicable for 2013-2017 Batch**

3	ME	LA8710 LA8720	1. Entrepreneurship development 2. Quality Management
4	Civil	CA8710 CA8720	1. Environment and Ecology 2. GIS
5	CSE	DA8710 DA8720	1. Business Intelligence 2. Artificial Intelligence
6	IT	IA8710 IA8720	1. Multi-Media Technology 2. IT In Business
7	ECE	FA8710	1. Consumer Electronics
8	Humanities	HA8710 HA8720	1. Industrial Psychology 2. Human Values and Ethics
9	MBA	GA8710 GA8730 GA8740	1. Organizational Behavior 2. Digital Marketing 3. Financial Modeling with Spread sheet

Summary of the Credits

Year	Semester	Credit	Year Credit
First Year	I	24	45
	II	21	
Second Year	III	23.5	49
	IV	25.5	
Third Year	V	21	43
	VI	22	
Fourth Year	VII	24	41.5
	VIII	17.5	
Total			178.5

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

A. Evaluation Scheme for the following Courses will be as under:

Course	Evaluation Scheme (%)				
	Attendance	Test-1	Test-2	Final Test	Total
Aptitude Building-1	10	30	30	30	100
Aptitude Building-2	10	30	30	30	100
Value Addition Training	10	30	30	30	100
Soft Skills	10	30	30	30	100

B. Evaluation Scheme for Project will be as under:

Course	Evaluation Scheme (%)				
	Synopsis	Presentation	Report	Viva-Voce	Total
Project Phase-I	10	15	25	50	100
Project Phase-II					
Project Phase-III					

Project Phase-I & II will be evaluated by the Committee comprising of the following:

1. Head of the Department – Chairman
2. Teacher In-charge – Member
3. One nominee appointed by Director (Academic) – Member

Project Phase-III will be evaluated by the Committee comprising of the following:

1. Head of the Department – Chairman
2. Teacher In-charge – Member
3. One nominee appointed by Director (Academic) – Member
4. One nominee appointed by Vice Chancellor – Member

C. Evaluation Scheme for Industrial Training will be as under:

Course	Evaluation Scheme (%)			
	Training Report	Presentation	Monitoring	Total
Industrial Training	25	50	25	100

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Maths-I	Course Code: MAT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT I: Matrices

8L

Elementary row and column transformation, rank of matrix, linear dependence, consistency of linear system of equations, Eigen values and Eigen vectors, Cayley-Hamilton theorem.

UNIT II: Differential Calculus

8L

Functions, Limits, Continuity, Differentiability, Leibnitz theorem, Partial differentiation, Euler's theorem, Expansion of functions of several variables, Extrema of functions of several variables, Lagrange's method of multipliers.

UNIT III: Infinite Series

6L

Introduction, sequences, series, convergence, series of positive terms, comparison test, Integral test, D'Alembert's Ratio test, Raabe's test, Cauchy's root test, Alternating series: Leibnitz rule, power series.

UNIT IV: Multiple Integrals

8L

Beta and Gamma functions, Double and Triple integrals, change of order of integration, change of variables, Dirichlet integral and its applications.

UNIT V: Vector Calculus

8L

Point functions, Gradient, Divergence and curl of a vector and their physical interpretation, line integral, surface integral, volume integral, Green's Theorem, Stoke's theorem, Gauss Divergence theorem.

2. E. Kreyszig : Advanced Engineering Mathematics, Wiley publication.
3. R. K. Jain & S. R. K. Iyenger: Advanced Engineering Mathematics, Narosa publication.
4. G. Prasad: Differential & Integral calculus, Pothishala publication, Allahabad.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Professional Communication	Course Code: HMT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

OBJECTIVES:

- 1) To strengthen the Professional Communication skills of upcoming professionals.
- 2) To make them aware about the new forms and trends of business and technical writings.
- 3) To develop the students' interpersonal skills in order to ensure his / her optimum performance as an employee.
- 4) To prepare students for facing the challenges of their professional lives in an increasingly globalized world.

Unit –I Professional Communication

8 Hours

1. Professional Communication: Interpretation, Process, Forms, Barriers and Overcoming Barriers.
2. Types of Communication-Verbal, Non-Verbal, Oral, Written, Formal, Informal.
3. Communication Levels (Intra personal, Interpersonal, Group, Public communication) and Communication Flow (Downward, Upward, Lateral and Diagonal flow).
4. Technical Writing-Meaning, Types and process of preparing a technical document. Acronyms, Jargons.
5. Understanding and Practice of Paragraph writing-Principles of paragraph writing (unity, coherence and logical development of the ideas)
6. Communication: Impact of internet on communication, communicating through computers.

Unit-II Business Communication

10 Hours

1. Business communication – Meaning, Type and Format.
2. Intra-office communication – Types (Face to Face communication, Telephonic conversation, Letters, Memorandum, E-mails, Notice, Memo, Agenda, Minutes.), advantages and disadvantages. various types of intra-office communication
3. Inter-office communication –Face to Face communication, Telephonic Communication-mails, Letters (Sales, Credit, Enquiry, Quotation, Order, Complaint and Adjustment Letter), advantages and disadvantages of various types of inter-office communication.
4. Job-Application Letter and Resume.

Unit-III Technical Proposal and Report

A. Technical Proposal –Types, Format, Preparation of Proposal .

5 Hours

- **For B.Tech students-**
Technical Proposal to organize a Technical Training Program, to develop new range of products, establish new laboratory, or start a new venture.
- **For B.Pharma students-**
Technical proposal to establish a new laboratory, to create new drug-composition, or to visit a super specialty Hospital.
- **For B.Arch students-**
Technical proposal for an archeological site visit, or to construct new buildings.
- **For MCA students-**
Technical proposal to develop new software, or, to organize an induction program for the new entrants.
- **For MBA students-**
Proposal for establishment of a new department, for a new administrative system, or for new HR policies.

B. Technical Report –Types, Format, Preparation of Report.

5 Hours

- **For B.Tech students-**
Technical Report describing new machinery, a report on the sudden break-down in production unit, Annual Financial Report and market survey report for formulating new market strategy.
- **For B.Pharma students-**

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Technical Report based on the site-inspection of a drug manufacturing unit, Survey report on health awareness and self-medication.

- **For B.Arch students-**

Technical Reports based on a Site Inspection for geographical and geological aspects of a particular location. A report on the archeological survey of a monument.

- **For MCA students-**

Technical Report based on function of new technology (software or hardware), Technical Reports on Client's need for a Payroll management system/ Hospital management system.

- **For MBA students-**

Preparation of Annual Report of the organization, preparation of departmental reports and report based on the study of a successful organization.

Unit-IV Soft-Skills

8 Hours

1. Non-Verbal Communication -Kinesics, Oculistics, Vocalics, Proxemics, Chronemics.
2. Interpersonal Skills, Social-Skills
3. Personality-Meaning and Types, Attitude
4. Self-Management, Emotional Quotient, Time management, and Stress-Management.
5. Image-building / Impression –Management.
6. Leadership and Team-Building and Conflict.

Language-Lab

12 Labs

1. Stress, Intonation and Rhythm.
2. Overcoming Mother-Tongue Influence.
3. JAM session, Debate, Extempore.
4. Role-play, Information Exchange / Gap Activity.
5. Presentation Skills.
6. Group-Discussion Skills.
7. Preparing for interview.

Text Books:

12. Essentials of Business Communication, Rajendra Pal and J. S Kothari- Sultan Chand

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Computer Fundamental & C Programming	Course Code: CST101		
Credit: 2	L 2	T 0	P 0
Year: 1 st	Semester: I		

UNIT: 1

5L

Introduction to the Digital Computer (brief description about its components), Characteristics of computer system, Introduction to operating systems(DOS, Linux, Windows), function and types of operating system, Number Systems and conversion methods (Binary, hex, octal), Concept of flow chart, Write & execute the first C programme, C Data Types & Operators.

UNIT 2:

4L

Conditional Program Execution: Applying if-else and nested if-else statements, switch-case statements, restrictions on switch values, use of break & default with switch.

Program Loops & Iteration: Uses of loops (while, do-while and for), use of continue statement.

Function: function prototypes, call by value and call by reference function, recursion.

UNIT 3:

4L

Arrays: Insertion and deletion in single dimensional array, linear searching, sorting (bubble sort), Strings.

Structures: Purpose and uses of structures, declaring structures, array of structures

TEXT BOOKS:

1. Yashwant Kanetkar, "Let us C", BPB Publications, 2nd Edition, 2001.
2. Herbert Schildt, "C: The complete reference", OsbourneMcgraw Hill, 4th Edition, 2002.
3. P.K. Sinha "Computer Fundamentals" B.P.B Publication

REFERENCE BOOKS:

1. Raja Raman, "Computer Programming in C", Prentice Hall of India, 1995.
2. Kernighan & Ritchie, "C Programming Language", The (Ansi C Version), PHI, 2nd Edition.
3. Byron Gottfreid "Schaum's Outline of Programming with C"

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

List of Programs in ‘C’ Lab (CSP-151)

Lab 1	(a) WAP to perform simple arithmetic operations using different data types. (b) WAP to show swap of two no's without using third variable.
Lab 2	(a) WAP to find the roots of a quadratic equation. (b) WAP to check the number is odd or even and find the sum of all odd and all even separately.
Lab 3	(a) WAP to find out whether the given number is prime or not. Find sum of all prime upto N. (b) WAP to reverse a given number and check the palindrome status.
Lab 4	WAP to print corresponding days of a week using switch case.
Lab 5	WAP to find and generate the Armstrong number.
Lab 6	WAP to print pattern triangle like Floyd's, Pascal, pyramid triangle.
Lab 7	(a) WAP to interchange two values using call by value and call by reference. (b) WAP to print factorial of a number using recursion & without using recursion.
Lab 8	WAP to print Fibonacci series. (a) Without using function (b) using function (c) using recursion
Lab 9	(a) WAP to print an array and find greatest/smallest element of an array. (b) WAP to perform linear searching in an array.
Lab 10	(a) WAP to insert/ delete element from an array. (b) WAP to sort the array's element using Bubble sort.
Lab 11	WAP to perform the following string functions. a. Strlen b. strcmp c.strcpy d. strcat e. strlenr f.strupr
Lab 12	Declare a suitable structure of a college and print the name and DOB of the student have scored more than sixty percent marks in end semester exam.
Lab 13	Declare a suitable structure for an organization and print all the names of employees having salary more than Rs.1000.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Introduction to Electrical Engineering	Course Code: EET101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT I – D.C. NETWORK THEORY

Review of basic circuit theory concepts, Mesh and Nodal analysis, Superposition theorem, Thevenin's theorem, Norton's theorem, Maximum power transfer theorem, Star–delta transformation, Magnetic Circuits.

UNIT II – A.C. CIRCUITS & MEASURING INSTRUMENTS

Single Phase A.C.: Phasor representation of voltage and current, A.C. circuit behavior of resistance, inductance, capacitance & their combination in series and parallel, Power triangle, Power factor, Concept of series & parallel resonance.

Three Phase A.C.: Star – delta connections, Relation between line and phase quantities, three phase power and its measurement, What is 3 phase 4 wire and 3 phase 5 wire system?

Measuring Instruments: Construction and principle of voltage and current measuring instruments.

UNIT III – TRANSFORMERS

Principle of operation, Types of construction, Phasor diagram, Equivalent circuit, Efficiency and voltage regulation of single phase transformer, O.C. and S.C. tests.

UNIT IV – D.C. & SYNCHRONOUS MACHINES

D.C. Machines: Construction and working principle of d.c. generator and d.c. motor, Types of d.c. machines, E.M.F. equation, Torque equation, Magnetization and load characteristics, Losses and efficiency, Need of starter in d.c. motors.

Synchronous Machines: Construction and Principle of operation of Alternator and Synchronous Motor.

UNIT V – INDUCTION MOTORS

Three Phase Induction Motors: Principle of operation of 3- ϕ induction motor, Types of 3- ϕ induction motor, Need of starters in 3- ϕ induction motors, Slip – torque characteristics,

Single Phase Induction Motor: Principle of operation of single phase induction motor, Methods of starting of single phase induction motor.

Reference Books

1. V. Del Toro. “Principles of electrical Engineering, “Prentice hall International.
2. W.H. Hayt& J.E. Kemmerly,” Engineering circuit Analysis, “McGraw Hill.
3. I. J. Nagrath, “Basic Electrical Engineering,” Tata Mc. Graw Hill.
4. A. E. Fitzgerald, D.E., Higginbotham and A Gabel, “Basic Electrical Engineering” McGraw Hill.
5. H. Cotton, “Advanced Electrical Technology” Wheeler Publishing.

Basic Electrical Engineering Lab (EEP-151)

(Any Ten)

1. Verification of Network Theorems.
2. Study of diode characteristics. Study of phenomenon of resonance in RLC series circuit.
3. Measurement of power in a three phase circuit by two wattmeter method.
4. Measurement of efficiency of a single phase transformer by load test.
5. Determination of parameters and losses in a single phase transformer by OC and SC test.
6. Study of characteristic of DC Motor.
7. Study of characteristic of AC Motor.
8. DC generator characteristics.
9. 10. Speed control of dc shunt motor.
10. Study running and reversing of a three phase induction motor.
11. Study of a single phase energy meter.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Introduction to Electronics & Communication	Course Code: ECT101
Credit: 3	L T P 3 0 0
Year: 1st	Semester: I

UNIT 1: Fundamental of Semiconductors

10 Lectures

Energy bands in semiconductors, intrinsic and extrinsic semiconductors, Fermi Level in Intrinsic and Extrinsic semiconductor, Carrier transport in semiconductors: diffusion current, drift current, mobility, Hall Effect and resistivity. Generation and recombination of carriers.

UNIT 2: Application of Low Power and High Power Diodes

10 Lectures

Diode circuits: Construction, Junction diode characteristics, Half and full wave rectifiers - Expression for efficiency and ripple factor - Bridge rectifier – π Filter circuits, Clipper, Clamper and multipliers using diodes, Zener Diode Characteristics - Regulated power supply using Zener diode.

UNIT 3: Transistor fundamentals

8 Lectures

Transistor circuits: Characteristics of a transistor in CB, CE and CC modes - Relatively merits - Biasing of Transistors - Load Line and operating point concept (both AC and DC). Construction and working of JFET and MOSFET.

UNIT 4: Digital fundamentals and Introduction to Signals

8 Lectures

Basic logic gates: AND, OR, and NOT – implementation of all gates using Universal gates, Number Systems conversions, Boolean algebra, K-map (upto 4 variables). Source of Information, Types of Signals.

UNIT 5: Basics of Communications & Instrumentation

9 Lectures

Communication Systems, Communication Channels, Need of modulation, Types of modulations (Wave shapes and final expression only), Study of Piezoelectric, PMMC, LVDT and Strain Gauge transducers and their classifications and display device (7 segment) only.

Reference Learning:

Unit 1. Electronics Devices and Circuits, Millman and Halkias, Tata McGraw Hill, 4th ed.

Unit 2 & 3. Electronic Devices and Circuit Theory, Robert L. Boylestad, Prentice Hall Higher Edu., 2000.

Unit 4. Digital Design, Morris Mano, PHI

Unit 4. Modern Digital & Analog Communications, B. P. Lathi, OUP

Unit 5. Electronic Communication Systems, John Kennedy, Tata McGraw Hill, 4th ed.

Unit 5. Electronic Instrumentation - H. S. Kalsi

ECP-151 ELECTRONICS ENGINEERING LAB.

1. To identify and Study of the various component and Devices of electronics with their specification (CRO, Function Generator, Multimeter, Power Supply, resistor, capacitor, inductor, ICs, LED, potentiometer etc.)
2. To study the V-I characteristics of PN diode and Zener diode.
3. To find the efficiency of Rectifiers and ripple factor of capacitive and non-capacitive half wave and full wave rectifier.
4. To Study and Verify clipper and clamper with biased circuits.
5. To find the characteristics of CB and CE amplifiers.
6. Determine the characteristics of FET.
7. To find out the power energy of various periodic and non periodic signals.
8. To verify the logic gates using diodes.
9. Study and observations of AM & FM Waveforms.
10. Study of various transducers (Strain Gauge).

**Course Structure & Syllabus of
B.Tech – Mechanical Engineering
Applicable for 2013-2017 Batch**

Course Title: Workshop Practice	Course Code: MEP152		
Credit: 2	L 1	T 0	P 2
Year: 1st	Semester: I		

List of Experiments

1. Carpentry: To make a T-Lap joint with soft wood.
2. Arc Welding: To make a Lap joint with mild steel flat by arc welding process.
3. Gas Welding: To make a Lap joint of M.S. sheet with gas welding process.
4. Fitting: To make a plug and socket joint with M.S.flat.
5. Machine Shop: To turn a M.S. rod on lathe to prepare a turning specimen.
6. Sheet Metal: To make a square tray with G.I. sheet.
7. Study of Foundry and Forging tools and equipments.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Chemistry and Environment	Course Code: TCY101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT – I

Introduction to Environment and Chemistry

Chemical Evolution, Genesis of Environment, Components of Environment, Layers of atmosphere, Chemical composition and reactions of troposphere, Chemistry of Ozone Layer depletion.

UNIT – II

Water Chemistry

Water quality parameters (Physical, Chemical and Biological), CPCB and WHO standards for water, Measurement of parameters of water quality, Analytical tools for analysis of water quality, alkalinity, hardness and its determination (EDTA method only). Water softening processes – Lime – Soda process, Ion exchange method, boiler feed water, boiler problems-scale, sludge, priming and foaming, caustic embitterment and corrosion, their causes and prevention, Numerical problems on alkalinity and hardness.

UNIT – III

Environmental Pollution

Air Pollution: Types of pollutants, source, effects, sink and control of primary pollutants – CO, NO_x, HC, SO_x and particulates, Photochemical smog, Acid rain and Global warming – Process, National and International efforts to combat it.

Water Pollution: Water quality parameters – (BOD & COD), Classification of pollutants and their sources, waste water treatment – domestic and industrial, Ganga pollution and control.

Soil Pollution: Composition of soil, classification and effects of soil pollutants such as agro-chemicals (pesticides and fertilizer related problems), fly ash and their control.

Integrated Solid Waste Management: Classification of waste, Treatment & Disposal methods (Composting, sanitary land filling, incineration, recycling and reuse).

UNIT – IV

Energy Resources

Conventional Energy Sources – Coal and Petroleum, Refining, Fractional Distillation, Reforming, Cracking, Alkylation, Isomerisation, Hydro treating, Sulphur Recovery, Aromatization, Octane number, Cetane number, Aviation fuel, LPG, CNG, PNG, Energy Crises, Non-conventional Energy Sources – Hydro, Wind, Solar, Nuclear, Geo thermal and Biomass based.

UNIT – V

Eco-friendly Materials

Introduction to ecofriendly products and ECOMARK, Ecofriendly domestic appliances, Green Chemistry and Green Building, Organic foods, Biofuel, Biogas, Lignin, Bioplastics, Light weight plastic composites, Fuel cell, Organic Fuel Cells, hydrogen as a fuel and New lighting technologies: Organic Photo-voltaic, OLED and Organic Transistor.

Text Books:

1. Chemistry in Engineering & Technology (Vol I & II) (Latest ed.) By J.C. Kuriacose & J. Rajaraman, Tata McGraw-Hill Co, New Delhi.
2. Engineering Chemistry by O.G. Palanna, Tata McGraw-Hill Co, New Delhi.

Reference Books:

1. Atkins' Physical Chemistry by Peter W. Atkins and Julio de Paula, Oxford University Press.
2. Principles of Physical Chemistry (Latest ed.) By Puri, Sharma & Pathania.
3. Organic chemistry, Morrison and Boyd, Pearson Prentice Hall, 2011
4. Environmental chemistry, S.E. Manahan, 9th edition, CRC Press.
5. Textbook of polymer science by F.W. Billmeyer, Wiley India.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Physics	Course Code: PYT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT-I

(8) L

Interference:

Introduction, Coherent Sources, Analytical treatment of interference, Young's double slit experiment and its analysis, Conditions of Interference, Fresnel's Biprism, fringes with white light, Determination of wavelength of monochromatic light by using Fresnel's Biprism method, Displacement of Fringes, Interference in plane parallel thin film (reflected and transmitted light) and wedge shaped film(reflected light only), Newton's Rings, Determination of wavelength of monochromatic light and determination of refractive index of a liquid by using Newton's ring method.

UNIT-II

(8) L

Diffraction:

Introduction, Difference between Interference and diffraction, resultant of superposition of n simple harmonic coherent vibrations, Fraunhofer diffraction due to single slit: resultant intensity, conditions of maxima, minima, angular and linear width of central maximum, Double slit diffraction: resultant intensity, missing order, N-slit diffraction : resultant intensity, conditions of maxima and minima, missing orders, angular width of principal maxima, Diffraction grating: formation of spectra and missing order spectra in spectrum, dispersive power of grating, Resolving power, Rayleigh Criterion of resolution, Resolving power of plane transmission diffraction grating.

UNIT-III

(8) L

Polarization:

Polarised and unpolarised light and its pictorial representation, plane of polarisation and plane of vibration, Phenomenon of Double Refraction, positive and negative double refracting crystals, properties of ordinary and extra-ordinary Rays, Nicol Prism and its application as a polariser and analyser, Mathematical analysis of superposition of two linearly polarised light vectors, retardation plates – half wave plate and quarter wave plate, Production and detection of Plane, Circularly and Elliptically Polarized Light.

UNIT-IV

(10) L

Laser : Spontaneous emission, stimulate demission and stimulated absorption, Einstein's A and B Coefficients and relation between them, Principle of Laser Action, Construction and Working of He-Ne, Semiconductor Laser.

Introduction to Fibre Optics: Fundamental ideas about optical fiber, Types of fibers, Acceptance angle and cone, Numerical aperture.

Magnetic Properties of Materials: Basic Concept of Para-, Dia and Ferro-Magnetism, Phenomenon of Hysterisis

Magnetic Circuits: Introduction, magnetomotive force, magnetic field intensity, permeability of free space, reluctance, law governing magnetic circuits.

Superconductivity: Temperature dependence of resistivity in superconducting material, effect of magnetic field (Meissner effect), Type I and Type II superconductors.

UNIT V

(10) L

Wave Mechanics :

Wave Particle Duality, de Broglie Concept of Matter Waves, Davisson and Germer experiment, Concept of wave packet, group and phase velocity, Heisenberg Uncertainty Principle and its applications viz. non existence of electron in nucleus, radius and energy of Bohr's first orbit, Schrödinger time independent and time dependent wave equation, Physical interpretation of wave function, Application of Schrodinger wave equation : Particle in a one dimensional box (eigen function and eigen values).

Science and Technology of Nanomaterial :

Introduction to Nanomaterial, Basic principle of nano science & technology, creation and use of Bulky Balls, structure, properties and use of Carbon nanotubes, applications of nanotechnology.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Reference & Text Books:

- | | | |
|---|---|------------------------------------|
| 1. Concepts of Modern Physics | - | Arthur Beiser (Mc-Graw Hill) |
| 2. Introduction to Special theory of Relativity | - | Robert Resnick - Wiely |
| 3. Fundamentals of Optics | - | Jenkins and White |
| 4. Optics | - | AjoyGhatak (TMH) |
| 5. Optics | - | Brijlal and Subrahmanyam |
| 6. Lasers: Fundamentals and applications | - | K. Thyagarajan, AjoyGhatak |
| 7. University Physics | - | Sears and Zeemansky |
| 8. Principles of Physics | - | Halliday, Resnick&Jearl Walker |
| 9. An Introduction to Quantum Mechanics | - | David. J. Griffith |
| 10. Introduction to Fiber optics | - | AjoyGhatak& K. Thyagarajan (TMH) |
| 11. Optical Fiber Communications | - | Keiser G. |
| 12. Nanomaterials- Synthesis, Properties and Applications | - | Edelstein A. A. and Cammaratta R.C |
| 13. Nanotechnology | - | T. Pradeep (Tata McGraw-Hill) |

PHYSICS LAB (PYP151) List of Experiments

(At least six)

1. To determine the wavelength of monochromatic light by Newton's ring.
2. To determine the wavelength of monochromatic light with the help of Fresnel's biprism.
3. To determine the focal length of two lenses by nodal slide and locate the position of cardinal points.
4. To determine the specific rotation of cane sugar solution using bi quartz polarimeter.
5. To determine the wavelength of spectral lines using plane transmission grating.
6. To determine the specific resistance of the material of given wire using Carey Foster's bridge.
7. To determine the variation of magnetic field along the axis of a current carrying coil and then to estimate the radius of the coil.
8. To verify Stefan's Law by electrical method.
9. To calibrate the given ammeter using potentiometer.
10. To calibrate the give voltmeter using potentiometer.
11. To determine energy band gap of a given semiconductor material by p-n junction method.
12. To determine the viscosity of water by Poisseuille's method.

Note: Additional experiments may be added based on contents of syllabus.

Course Title: Essentials of Mechanical Engineering	Course Code: MET101		
Credit: 3	L	T	P
	3	0	0
Year: 1st	Semester: II		

UNIT – I

9L

Introduction to Engineering: Difference between Science and Technology, history of wheel, introduction to prime movers, transmission system, belt, pulleys, gear system and nomenclature, braking system, Mechanism, lever mechanism, Working principle of power generation system, hydel power plant, thermal power plant and its main components.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Coplanar Force system: Resolution of force in two mutually perpendicular direction Free Body Diagram, Moment, Varignon's theorem, static equilibrium, Lami's Theorem, type of joints/Support, Type of load: point load, uniformly constant and varying loads, beam and its type.

UNIT – 2

7L

Engineering material and their properties: Details of hook's law, Proportional limit, Yield point, Yield Stress, Engineering strain, Engineering stress, True stress and Strain, Plasticity, Elasticity, Allowable Strength, Hardness, Ductility, toughness, Fatigue, creep, strain energy, Impact Strength, Young modulus of Elasticity, Bulk Modulus, Poission Ration and its relation in between.

Stress and strain: Normal stress and strain, principle of Superposition, Deformation in stepped and composite bar.

UNIT – 3

7L

Thermodynamics: Macroscopic & microscopic study point of view, System, Surrounding and Universe, Phase, Property, State, Path, Process, Cyclic and non-cyclic processes, Quasi static process, Reversible and irreversible processes, Thermodynamic equilibrium, Concept of continuum, Energy and its forms, Enthalpy, Zeroth law, Different temperature scales and theory of temperature and Pressure measurement.

UNIT – 4

8L

Laws of thermodynamics: Thermodynamic definition of work, Thermodynamic processes, Calculation of work in various processes and sign convention, Non-flow work and flow work, Joules' experiment, First law of thermodynamics, Internal energy and enthalpy, First law of thermodynamics applied to open systems, Steady flow energy equation and its applications, First law analysis for closed system (non flow processes), Limitations of first law of thermodynamics, PMM-I.

Statement of Second law of thermodynamics: Kelvin Planck's statement and Clausius statement and their equivalence.

UNIT – 5

9L

Power generation: Air standard cycle, IC Engine, Carnot cycle, Otto cycle, Diesel cycle, Important components of I.C.Engine, two stroke and four stroke engine, S.I. and C.I. engines, efficiency of Otto and diesel cycle

Basics of Heat Transfer: Concepts of the mechanisms of heat flows: conduction, convection and Radiation heat transfer application in engineering.

**Course Structure & Syllabus of
B.Tech – Mechanical Engineering
Applicable for 2013-2017 Batch
Essentials of Mechanical Engineering (MEP-151)**

List of Experiments

1. Tensile test
2. Impact test
3. Hardness test
4. Pulley experiment
5. Experiment on conduction heat transfer
6. Demonstration of Impulse and reaction turbine
7. Study of 4s and 2S engine petrol Engine
8. Study of 4s and 2S engine Diesel Engine
9. Study of refrigerator and air conditioning

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Professional Communication	Course Code: HMT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

OBJECTIVES:

1. To strengthen the Professional Communication skills of upcoming professionals.
2. To make them aware about the new forms and trends of business and technical writings.
3. To develop the students' interpersonal skills in order to ensure his / her optimum performance as an employee.
4. To prepare students for facing the challenges of their professional lives in an increasingly globalized world.

Unit –I Professional Communication

8 Hours

1. Professional Communication: Interpretation, Process, Forms, Barriers and Overcoming Barriers.
2. Types of Communication-Verbal, Non-Verbal, Oral, Written, Formal, Informal.
3. Communication Levels (Intra personal, Interpersonal, Group, Public communication) and Communication Flow (Downward, Upward, Lateral and Diagonal flow).
4. Technical Writing-Meaning, Types and process of preparing a technical document. Acronyms, Jargons.
5. Understanding and Practice of Paragraph writing-Principles of paragraph writing (unity, coherence and logical development of the ideas)
6. Communication: Impact of internet on communication, communicating through computers.

Unit-II Business Communication

10 Hours

1. Business communication – Meaning, Type and Format.
2. Intra-office communication – Types (Face to Face communication, Telephonic conversation, Letters, Memorandum, E-mails, Notice, Memo, Agenda, Minutes.), advantages and disadvantages. various types of intra-office communication
3. Inter-office communication –Face to Face communication, Telephonic Communication-mails, Letters (Sales, Credit, Enquiry, Quotation, Order, Complaint and Adjustment Letter), advantages and disadvantages of various types of inter-office communication.
4. Job-Application Letter and Resume.

Unit-III Technical Proposal and Report

A. Technical Proposal –Types, Format, Preparation of Proposal.

5 Hours

- **For B.Tech students-**
Technical Proposal to organize a Technical Training Program, to develop new range of products, establish new laboratory, or start a new venture.
- **For B.Pharma students-**
Technical proposal to establish a new laboratory, to create new drug-composition, or to visit a super specialty Hospital.
- **For B.Arch students-**
Technical proposal for an archeological site visit, or to construct new buildings.
- **For MCA students-**
Technical proposal to develop new software, or, to organize an induction program for the new entrants.
- **For MBA students-**
Proposal for establishment of a new department, for a new administrative system, or for new HR policies.

B. Technical Report –Types, Format, Preparation of Report.

5 Hours

- **For B.Tech students-**
Technical Report describing new machinery, a report on the sudden break-down in production unit, Annual Financial Report and market survey report for formulating new market strategy.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

- **For B.Pharma students-**
Technical Report based on the site-inspection of a drug manufacturing unit, Survey report on health awareness and self-medication.
- **For B.Arch students-**
Technical Reports based on a Site Inspection for geographical and geological aspects of a particular location. A report on the archeological survey of a monument.
- **For MCA students-**
Technical Report based on function of new technology (software or hardware), Technical Reports on Client's need for a Payroll management system/ Hospital management system.
- **For MBA students-**
Preparation of Annual Report of the organization, preparation of departmental reports and report based on the study of a successful organization.

Unit-IV Soft-Skills

8 Hours

1. Non-Verbal Communication -Kinesics, Oculistics, Vocalics, Proxemics, Chronemics.
2. Interpersonal Skills, Social-Skills
3. Personality-Meaning and Types, Attitude
4. Self-Management, Emotional Quotient, Time management, and Stress-Management.
5. Image-building / Impression –Management.
6. Leadership and Team-Building and Conflict.

Language-Lab

12 Labs

1. Stress, Intonation and Rhythm.
2. Overcoming Mother-Tongue Influence.
3. JAM session, Debate, Extempore.
4. Role-play, Information Exchange / Gap Activity.
5. Presentation Skills.
6. Group-Discussion Skills.
7. Preparing for interview.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Maths – II	Course Code: MAT201		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT I: Differential Equations

8L

Linear differential equations, Exact differential equations; Linear differential Equations of nth order with constant coefficients: complementary functions and particular integrals, Euler- Cauchy Homogeneous Linear differential equations, Simultaneous linear differential equations, Solutions of second order differential equations by changing the dependent and independent variables, Method of variation of parameters.

UNIT II: Laplace Transform

8L

Laplace Transform: Existence theorem, Laplace Transform of derivatives and integrals, Laplace Transform of Periodic functions and Unit Step function, Convolution theorem, Applications of Laplace Transform to solve linear and simultaneous differential equations.

UNIT III: Integral Transform

6L

Fourier Integral, Fourier Transform, Fourier Sine and Cosine Transforms and applications to simple Heat Transfer Equations, Z- Transform and its applications to solve difference equations.

UNIT IV: Fourier series

8L

Periodic functions, Fourier series of Periodic functions, Euler's formulae, Functions having arbitrary period, Change of intervals, Even and Odd functions, Half range sine and cosine series.

UNIT V: Partial differential equations and its Applications

8L

Introduction to partial differential equations, linear partial differential equations with constant coefficients of second order and their classification, Method of Separation of Variables for solving Partial Differential Equations, One-Dimensional Wave Equation, One Dimensional Heat Equation.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Computer Programming in C++	Course Code: CST201		
Credit: 2	L 2	T 0	P 0
Year: 1 st	Semester: II		

UNIT – I 4L

Introduction: Introducing Object-Oriented Approach related to other paradigms (functional, data decomposition), Characteristics of Object-Oriented Languages.

Basic terms and ideas: Abstraction, Encapsulation, Information hiding, Inheritance, Polymorphism.

UNIT – II 4L

Classes and Objects: Abstract data types, Object & classes, attributes, methods, C++ class declaration, State identity and behavior of an object, Constructors and destructors, instantiation of objects, Default parameter value, Copy Constructor, Static Class Data, Constant and Classes.

UNIT – III 5L

Inheritance and Polymorphism: Inheritance, Types of Inheritance, Class hierarchy, derivation – public, private & protected, Agrégation, composition vs classification hiérarchies, Polymorphism, Type of Polymorphism – Compile time and runtime, Method polymorphism, Polymorphism by parameter, Operator overloading, Parametric polymorphism, Generic function – template function, function name overloading, Overriding inheritance methods

**Course Structure & Syllabus of
B.Tech – Mechanical Engineering
Applicable for 2013-2017 Batch
List of Programs in ‘C++’ Lab (CSP-251)**

Lab 1	(a) WAP to print first 10 prime numbers. (b) WAP to demonstrate nested loops. (c) WAP to print reverse of a given number. (d) WAP to read two numbers from keyboard and display the larger one.
Lab 2	(a) Create a class called Employee that includes three pieces of information as instance Variables – a first name (type String), a last name (type String) and a monthly salary (Double) (b) Create a constructor in above class to initialize the three instance variables. Provide a get method for each instance variable. (c) WAP to demonstrate destructors.
Lab 3	(a) Program to implement different types of inheritances like Multiple, Multilevel and hybrid. (b) Write a program in C++ demonstrating the public, protected and private parameters. (c) Write a program in C++ to demonstrate destructor in inheritance. (d) WAP to demonstrate encapsulation property of OOPs.
Lab 4	(a) Write a program that uses a class where the member functions are defined inside a class. (b) WAP that uses a class where member functions are defined outside a class. (c) WAP that uses a class where member functions are defined inside a class. (d) WAP to demonstrate the use of Static Data members.
Lab 5	(a) WAP to demonstrate the use of Dynamic Constructor. (b) WAP to demonstrate the use of function Template. (c) Illustrate and implement the C++ program to initiate the base constructor from derived class constructor.
Lab 6	(a) Write a C++ program to find the largest and smallest element of an array. (b) Create a class Matrix. Implement all possible matrix operations for Matrix type objects by overloading them.
Lab 7	(a) Create 2 classes OM and DB which store the value of distance. DM store distances in meters and cm and DB in feet and inches. Write a program that can read values for the class objects and add 1 object OM with another object of DB. (b) Define a class to represent bank account. Include the following members: Data members 1. Name of depositor. 2. Account number. 3. Type of account. 4. Balance amount in the account. Member functions 1. To assign initial values. 2. To deposit an amount. 3. To withdraw an amount after checking the balance. 4. To display name and balance. Write a main program to test the program.
Lab 8	(a) WAP to demonstrate static class data. (b) WAP to demonstrate the use of Public, Private and protected classes.
Lab 9	(a) WAP to illustrate the concept of call by reference. (b) WAP to illustrate the concept of unary operator overloading. (c) WAP to illustrate the concept of binary operator overloading.
Lab 10	(a) WAP to demonstrate the use of function overloading. (b) WAP using multiple inheritance for collecting employee details.
Lab 11	(a) WAP using function template to find maximum of two Data. (b) WAP to calculate factorial of given number using copy constructor.
Lab 12	(a) WAP to sort five float and integer numbers using template function (use bubble sort). (b) Demonstrate the use of different types of polymorphism.
Lab 13	(a) Write a function to read a matrix of size M × N from keyboard. (b) WAP to implement aggregation concept.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Graphics	Course Code: CGP151		
Credit: 2	L 1	T 0	P 2
Year: 1st	Semester: II		

UNIT-I

3L

Introduction: Sheet Layout, Types of Sheet, Size of Sheets, Title blocks, Type of lines, Lettering, Dimensioning, Scale (Full, Reduced, Large) Geometrical Constructions

UNIT-II

4L

Projection: Methods of Projection, Planes of Projection, Projection of points, Projection of straight lines, Projection of auxiliary planes, Projection of planes.

UNIT-III

4L

Projection of solids, Sections of solids

UNIT-IV

2L

Development of surfaces

UNIT-V

2L

Isometric Projections

- 4) John K.C, "Engineering graphics" ,2nd edition, PHI Learning Pvt. Ltd., 2010 .

List of Experiments

1. Introduction to AutoCAD Commands, Explaining need of AUTO CAD over Manual drafting, Simple Drawings.
2. Sheet on Lettering and Geometric construction.
3. Orthographic Projections, Basic problem based on Projection of points.
4. Sheet on Projection of Lines.
5. Sheet on Projection of Planes.
6. Sheet on Projection of Auxiliary Planes.
7. Sheet on Projection of Solids.
8. Development of Surfaces.
9. Sheet on Isometric Projections from orthogonal views.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Electrical Machines	Course Code: EA32L0		
Credit:4.5	L	T	P
	3	1	2
Year: 2nd	Semester: III		

UNIT – I

7L

Single phase Transformer: Construction, phasor diagram, Voltage Regulation, OC & SC Test, Polarity test, Sumpner's test, all day efficiency

Three phase Transformer: Construction: core type, shell type, three phase bank of single phase transformer, scott connection.

Autotransformer: Volt-Ampere Relationship, efficiency, advantages and disadvantages, applications.

UNIT – II

9L

DC Machine: Construction, EMF and torque equation, Armature Reaction, Commutation, Methods to improve Commutation, performance characteristics of motors and generators, starting of motors, speed control methods, losses, efficiency, applications.

UNIT – III

8L

Three phase Induction Motor: Constructional features, Rotating magnetic field, Principle of operation Phasor diagram, equivalent circuit, torque and power equations, Torque- slip characteristics, Speed Control, starting of squirrel cage and slip ring induction motor.

UNIT – IV

8L

Synchronous Machine: Constructional features, Armature winding, EMF Equation, Winding coefficients, equivalent circuit and phasor diagram, Armature reaction, Working principle of synchronous generator, O. C. & S. C. tests, Voltage Regulation using Synchronous Impedance Method, Working principle of synchronous motor, Starting torque and mechanical power developed, Effect of varying field current at different loads, V-Curves, application.

UNIT – V

5L

Special Purpose Machines:

Two phase servomotor: Construction, working principle and application.

Stepper motor: construction, working principle and application.

Text Books:

1. Dr.P.S.Bhimbra, "Electrical Machinery", Khanna Publishers India
2. D.P.Kothari & I.J.Nagrath, "Electric Machines", Tata McGraw Hill

Reference Books:

1. Sen, "Principles of Electrical Machines & Power Electronics", Wiley India
2. O.C. Taylor, "The performance & design of A.C. Commutator Motors", A.H.Wheeler & Co(P) Ltd.

List of Experiments

Note: Minimum eight experiments are to be performed from the following list. The department may add 3 to 4 more experiments in the following list.

- 1) Polarity and voltage ratio test of a 1- phase transformer.
 - 2) O.C and S.C test of 1-phase transformer
 - 3) Sumner's test on two identical 1-phase transformers.
 - 4) Internal and external characteristics of dc shunt motor
 - 5) Load test on dc shunt motor.
 - 6) Speed control of dc shunt motor.
 - 7) Load test on 3-phase induction motor.
- O.C and S.C test of synchronous machine.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Material Science	Course Code: LA3210						
Credit: 4.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	1	2
L	T	P					
3	1	2					
Year: 2nd	Semester: III						

UNIT-I

7L

Introduction: Historical perspective, importance of materials. Brief review of modern & atomic concepts in Physics and Chemistry, Atomic models, Periodic table, Chemical bonding.

Crystallography and Imperfections: Concept of unit cell space lattice, Bravais lattices, common crystal structures, Atomic packing factor and density. Miller indices. X-ray crystallography techniques. Imperfections, Defects & Dislocations in solids.

UNIT-II

10L

Mechanical properties and Testing: Stress strain diagram, Ductile & brittle material, Stress vs strength, Toughness, Hardness, Fracture, Fatigue and Creep. Testings such as Strength testing, Hardness testing, Impact testing, Fatigue testing Creep testing, Non-destructive testing (NDT).

Micro structural Exam: Microscope principle and methods. Preparation of samples and Microstructure exam and grain size determination. Comparative study of microstructure of various metals & alloys such as Mild steel, CI, Brass.

Phase Diagram and Equilibrium Diagram: Unary and Binary diagrams, Phase rules. Types of equilibrium diagrams: Solid solution type, eutectic type and combination type. Iron-carbon equilibrium diagram.

UNIT-III

8L

Ferrous materials: Brief introduction of iron and steel making furnaces. Various types of carbon steels, alloy steels and cast irons, its properties and uses.

Heat Treatment: Various types of heat treatment such as Annealing, Normalizing, Quenching, Tempering and Case hardening. Time Temperature Transformation (TTT) diagrams.

Non-Ferrous metals and alloys: Non-ferrous metals such as Cu, Al, Zn, Cr, Ni etc. and its applications. Various type Brass, Bronze, bearing materials, its properties and uses. Aluminum alloys such as Duralumin. Other advanced materials/alloys.

UNIT-IV

7L

Magnetic properties: Concept of magnetism – Dia, para, ferro Hysteresis. Soft and hard magnetic materials, Magnetic storages.

Electric properties: Energy band concept of conductor, insulator and semi-conductor. Intrinsic & extrinsic semi-conductors. P-n junction and transistors. Basic devices and its application. Diffusion in Solid. Super conductivity and its applications. Messier effect. Type I & Type II superconductors.

UNIT-V

9L

Ceramics: Structure, types, properties and applications of ceramics. Mechanical/Electrical behavior and processing of Ceramics.

Plastics: Various types of polymers/plastics and its applications. Mechanical behavior and processing of plastics. Future of plastics.

Other materials: Brief description of other material such as optical and thermal materials concrete, Composite Materials and its uses. Brief introduction to Smart materials & Nano-materials and their potential applications

Performance of materials in service: Brief theoretical consideration of Fracture, Fatigue, and Corrosion and its control.

3. Van Vlack - Elements of Material Science & Engineering, John Wiley & Sons, 6th edition, 2010.
4. V. Raghvan - Material Science, Prentice Hall, 5th edition, 2005.

**Course Structure & Syllabus of
B.Tech – Mechanical Engineering
Applicable for 2013-2017 Batch**

MATERIAL SCIENCE LAB (PME-351)

List of Experiments

1. Making a plastic mould for small metallic specimen.
2. Specimen preparation for micro structural examination-cutting, grinding, polishing, etching.
3. Grain size determination of a given specimen.
4. Comparative study of microstructures of different given specimens (mild steel, gray cast iron, brass, copper etc.)
5. Heat treatment experiments such as annealing, normalizing, quenching, case hardening and comparison of hardness before and after.
6. Material identification of, say, 50 common items kept in a box.
7. Faradays law of electrolysis experiment.
8. Study of corrosion and its effects.
9. Study of microstructure of welded component and HAZ. Macro and Micro Examination.
10. Suitable experiment on Magnetic/ Electrical/ Electronic materials.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Thermodynamics	Course Code: LA3010						
Credit: 3.5	<table style="margin: auto; border: none;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 2nd	Semester: III						

UNIT-I

8L

Review of First law of Thermodynamics

Second Law of thermodynamics: Limitations of first law of thermodynamics, essence of 2nd law of thermodynamics, Kelvin Planck's statement of second law of thermodynamics, Clausius statement of second law of thermodynamics, Equivalence of two statements of second law of thermodynamics, Thermal reservoir, Heat engine, Heat pump, refrigerator, Reversible and irreversible process, Carnot cycle and Carnot engine, Carnot theorem and its corollaries, thermodynamic temperature scale, PMM-II.

UNIT-II

8L

Entropy: Definition, Clausius theorem, Clausius inequality, Entropy a property of system, change in entropy for process, Tds relations, entropy principle, application of entropy principle for mixing of two fluids, Third law of thermodynamics.

UNIT-III

8L

Properties of pure substance: Pure substance, Property of steam, Triple point, Critical point, Sub-cooled liquid, Saturation states, Superheated states, Phase transformation process of water, Graphical representation of thermodynamic processes on P-T & P-V diagrams, T-S and H-S diagrams, Use of property diagram, Steam-Tables and Mollier charts, Dryness fraction and its measurement.

UNIT-IV

8L

Available energy, Energy and Irreversibility: Source of energy, Available energy and Unavailable energy, dead state and useful work, available energy referred to a cycle, quality of energy, maximum work in a reversible process, availability of energy entering a system, availability of closed system, reversible work by an open system exchanging heat only with surroundings, useful work, dead state, availability, second law efficiency.

UNIT-V

8L

Thermodynamic relations: properties of ideal and real gases, Helmholtz and Gibb's function, Mathematical conditions for exact differentials. Maxwell Relations, Clapeyron Equation, Joule-Thompson coefficient and Inversion curve, Coefficient of volume expansion, Adiabatic & Isothermal compressibility.

Reference Books:

Course Title: Strength of Materials	Course Code: LA3020						
Credit: 3.5	<table style="width: 100%; border: none;"> <tr> <td style="width: 33%;">L</td> <td style="width: 33%;">T</td> <td style="width: 33%;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 2nd	Semester: III						

UNIT-I

7L

Simple stress and strain: Introduction and definitions; Hooke's law; true and engineering stress-strain curves; axial stress; thermal stress and strain.

Compound stress and strains: Introduction; state of plane stress; stress on an inclined plane; Maximum normal stress and strain; Mohr's stress circle.

Introduction to centre of gravity and moment of inertia of commonly used cross sections

UNIT-II

10L

Stresses in Beams: Shear force and bending moment diagrams; bending stress in beams; shear stress in beams and shear stress distribution diagrams.

Torsion of circular shaft: Torsion equation; shaft in series and parallel; combined bending and torsion in shafts.

UNIT-III

8L

Strain energy: Concept and application; Impact load & stresses; Castigliano's theorem.

Deflections of Beams: Introduction; differential equation of the deflected beam; Macaulay's method; Moment area method.

UNIT-IV

8L

Thin cylinders and shells: Hoop and axial stresses and strain, volumetric strain.

Thick cylinders: Radial, axial and circumferential stresses in thick cylinders subjected to internal and external pressures; Compound cylinder.

UNIT-V

8L

Column and strut: Combined bending and direct stress; middle third and middle quarter rules; Euler's theory of buckling of column for different end conditions; limitations of Euler's formula; Rankine's formula.

Introduction to three dimensional stress and strain: Equilibrium equation, Normal and shear-stresses and strains; Generalized Hook's Law; Theories of failure.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Manufacturing Process – I	Course Code: LA3030						
Credit: 3	<table style="width: 100%; border: none;"> <tr> <td style="width: 33%;">L</td> <td style="width: 33%;">T</td> <td style="width: 33%;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 2nd	Semester: III						

UNIT – I

9L

Introduction: Importance of manufacturing, Economic and technological considerations in manufacturing. Classification of manufacturing processes.

Metal Forming Processes: Elastic & plastic deformation, yield criteria. Hot working vs cold working.

Forging equipments and methods: hand, drop and die forging.

Rolling: Rolling mills and Rolling mills & rolled-sections, Friction angle and rolling force, no slip condition.

Drawing and Extrusion processes: Wire / strip drawing, tube drawing and extrusion processes and their applications, lubrication in metal forming operation, defects in formed parts.

UNIT – II

9L

Sheet Metal working: Presses and their classification, Die & punch assembly and press work methods and processes, Cutting/Punching mechanism, blanking vs piercing, Compound vs Progressive die, Flat-face vs Inclined-face punch and Load (capacity) needed.

Analysis of forming process like cup/deep drawing. Bending & spring-back.

Blank development force and press tonnage calculation in shearing, bending and deep drawing operations.

UNIT – III

8L

Powder Metallurgy: Powder metallurgy manufacturing process. The need, process, advantage and applications.

Jigs & Fixtures: Locating & Clamping devices & principles, Jigs and Fixtures and its applications.

UNIT – IV

7L

Manufacturing of Plastic components: Review of plastics, and its past, present & future uses, Injection moulding, Extrusion of plastic section. Welding of plastics. Future of plastic & its applications. Resins & Adhesives.

UNIT – V

9L

Casting (Foundry): Basic principle & survey of casting processes, Types of patterns and allowances. Types and properties of moulding sand, Elements of mould and design considerations, Gating, Riser, Runnes, Core, Solidification of casting, Sand casting, defects & remedies and inspection.

Die Casting, Centrifugal casting, Investment casting, CO₂ casting and Stir casting etc.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Kinematics of Machines	Course Code: LA3040						
Credit: 3.5	<table style="margin: auto; border: none;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 2nd	Semester: III						

UNIT – I

8L

Introduction: Link or element, kinematic pairs, degrees of freedom, Grubler's criterion (without derivation), Kinematic chain, Mechanism, structure, Mobility of Mechanism, Inversion, Machine.

Kinematic chains and inversions: Inversions of Four bar chain; Single slider crank chain and Double slider crank chain. **Mechanisms:** Whitworth quick return motion mechanisms, Crank and slotted lever Mechanism, Exact straight line motion and approximate straight line motion mechanisms.

UNIT – II

10L

Velocity and acceleration analysis of mechanisms (graphical method): Velocity and acceleration analysis of Four Bar mechanism, slider crank mechanism and Simple Mechanisms by vector polygons and by instantaneous centre method. Relative velocity and acceleration of points on a link, relative velocity and accelerations of coincident Points on separate links Coriolis component of acceleration, Angular velocity and angular acceleration of links.

Analytical method: Analysis of single slider crank chain using analytical equation of motion

UNIT – III

8L

Spur gears: Gear terminology, law of gearing, Characteristics of involute action, Path of contact, Arc of contact, Contact ratio, Interference in involute gears, Methods of avoiding interference, Back lash, Comparison of involute and cycloidal teeth.

UNIT – IV

7L

Gear trains: Simple gear trains, Compound gear trains for large speed reduction, Epicyclic gear trains, Tabular Method of finding velocity ratio of Epicyclic gear trains.

UNIT – V

7L

Cams: Types of cams, Types of followers, Displacement, Velocity and Acceleration vs time curves for cam profiles. Disc cam with reciprocating follower having knife-edge, roller and flat-faced follower, Disc cam with oscillating roller follower, Follower motions including SHM, Uniform velocity, uniform acceleration & retardation and Cycloid motion.

2. The Theory of Machines, Thomas Bevan, CBS Publisher, 1984.
3. Theory of Machines & Mechanisms, Shigley J.E. and Uickers, J. J., McGraw-Hill, 1995.
4. Theory of Machines, Khurmi.R.S. and Gupta.J.K, S.Chand & Company Ltd..New Delhi, 2005.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: MACHINE DRAWING	Course Code: LA3110		
Credit:1	L 0	T 0	P 2
Year: 2nd	Semester: III		

Machine Drawing Conventions: Need for drawing conventions, introduction to IS conventions; (**any three**)

- a) Conventional representation of materials and common machine components.
- b) Representation of geometrical and dimensional tolerance.
- c) Representation of surface roughness and direction of lay of machining.
- d) Representation of welded joints.
- e) Sectional views and sectioning.

Computer aided Drafting: Generation of points, lines, curves, polygons, dimensioning, utility commands etc. Use of modeling software.

Drawing of Machine Elements and simple parts: Views of **any three** sets of the following machine elements and parts:

- a) Popular forms of Screw threads, bolts, nuts, stud bolts.
- b) Keys, cotter joints and knuckle joint.
- c) Shaft coupling, spigot and socket pipe joint.
- d) Journal, pivot and collar and foot step bearings.
- e) Rivet joints for plates

Assembly Drawings: Drawings of assembled views for the part drawings of the following using conventions and easy drawing proportions; (**any one**)

- a) Engine parts – stuffing boxes, cross heads, connecting rod, piston assembly.
- b) Other machine parts - Screws jacks, Machine Vices, Plummer block, Tailstock.
- c) Valves : Steam stop valve, spring loaded safety valve, feed check valve and air cock.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Mathematics – III	Course Code: JA3010		
Credit: 3.5	L 3	T 1	P 0
Year: 2 nd	Semester: IV		

UNIT – I **8L**

Complex variable- I

Elementary functions; limit, continuity & differentiability; Analytic Functions; Cauchy – Riemann equations; Harmonic functions; Line integral in the complex plane; Cauchy’s Integral theorem; Cauchy’s Integral formula for derivatives of analytic function.

UNIT – II **6L**

Complex Variables -II

Power series; Taylor’s series; Laurent’s series; Poles; Zeros; Singularities; Residue Theorem; Evaluation of real integrals of the type $\int_0^{2\pi} f(\cos \theta, \sin \theta) d\theta$ and $\int_{-\infty}^{\infty} f(x) dx$.

UNIT – III **8L**

Special Functions

Series solution of ODE of 2nd order with variable coefficient with special emphasis to Legendre and Bessel differential equation by Frobenius method; Legendre polynomial of first kind; Bessel function of first kind and their properties.

UNIT – IV **8L**

Fourier Transform & Z-transform

Fourier integral; Fourier transform; Fourier sine and cosine transforms; Linearity, Scaling, frequency shifting and time shifting properties; Convolution theorem and its application.

Z – Transform; Properties of Z-transforms; Convolution of two sequences; Inverse Z-transform; Solution of difference equations.

UNIT – V **8L**

Partial differential equations and its Applications

Introduction to partial differential equations; Linear partial differential equations with constant coefficients of second order and their classification; Method of Separation of Variables for solving Partial Differential Equations; One-Dimensional Wave Equation; One Dimensional Heat Equation.

Text Books:

1. Brown & Churchill: **Complex Variables & Applications**, 9th edition, McGraw-Hill, 2013.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Manufacturing Process-II	Course Code: LA4210		
Credit:4	L 3	T 0	P 2
Year: 2nd	Semester: IV		

UNIT – I

8L

Metal Cutting and Machine Tools: Mechanics of metal cutting. Geometry of tool and nomenclature as per ASA system. Comparison between orthogonal and oblique cutting. Mechanics of chip formation and types of chips. Shear angle relationship. Merchant's force circle diagram. Calculations of cutting forces and power required. Cutting fluids/lubricants. Tool materials. Tool wear and tool life. Machinability. Brief introduction to machine tool vibration and surface finish. Economics of metal cutting.

UNIT – II

8L

Machine Tools: Lathe: Principle, types, operations, Turret/capstan, semi-automatic, automatic lathes. Shaper, slotter, planer: operations & drives.

Milling: Milling cutters, up & down milling. Dividing head & indexing,

Drilling and boring: Drilling, boring, reaming tools, Geometry of twist drills.

UNIT – III

10L

Grinding and Super finishing:

Grinding: Grinding wheels, abrasive, cutting action. Grinding wheel- specifications, attritions wear, fracture wear, dressing and truing. Maximum chip thickness and Guest criteria. Surface and Cylindrical grinding, Center less grinding.

Super finishing: Honing, lapping, and polishing.

Surface finish: description and measurements.

Limits, Fits & Tolerance: Introduction to Limits, Fits, Tolerances and IS standards, Interchangeability and standardization.

UNIT – IV

8L

Metal Joining (Welding): Survey of welding and allied processes, Gas welding and cutting process & equipments. Arc welding: Power sources and consumables. TIG & MIG processes and their parameters, Resistance welding-spot, seam projection etc. Other welding processes such as atomic hydrogen, submerged arc, electro slag, friction welding, soldering and brazing.

Thermodynamic and Metallurgical aspects in welding Shrinkage/residual stress in welds. Distortions & Defects in welds and their remedies, Weld decay in Heat affected Zone.

UNIT – V

8L

Introduction to non-conventional Manufacturing Process: Benefits, application and working principle of EDM, ECM, LBM, EBM, USM. AJM, WJM.

Non-conventional welding application such as LBW, USW, EBW, Plasma arc welding, Explosive welding and Explosive Forming.

**Course Structure & Syllabus of
B.Tech – Mechanical Engineering
Applicable for 2013-2017 Batch
Manufacturing Process Lab**

List of Experiments

1. Design of pattern for a desired casting (containing hole).
2. Pattern making.
3. Making a mould (with core) and casting.
4. Sand testing (at least one such as grain fineness number determination).
5. Injection moulding with plastics.
6. Forging hand forging processes.
7. Forging - power hammer study & operation.
8. Tube bending with the use of sand and on tube bending m/c.
9. Press work experiment such as blanking/piercing, washer, making etc.
10. Wire drawing/extrusion on soft material.
11. Rolling-experiment.
12. Bending & spring back.
13. Powder metallurgy experiment.
14. Jigs & Fixture experiment.

3	1	2					
Year: 2nd	Semester: IV						

UNIT – I

9L

Static force analysis: Static Force Analysis: Introduction: Static Equilibrium. Equilibrium of two and three Force Members, Member with two forces and torque, Free Body Diagram. Static Force Analysis of Four bar Mechanism and Slider-Crank Mechanism.

Dynamic force analysis: D’Alembert’s Principle, Inertia Force, Inertia Torque, Dynamic Force Analysis of Single Slider Crank Mechanism. Dynamically Equivalent Systems, Turning Moment Diagrams and Flywheels, Fluctuation of Energy, Determination of size of flywheels.

UNIT – II

7L

Friction and belt drives: Friction and frictional torque in Pivot and Collar Bearings, Brakes and Clutches, Belt Drives: Flat Belt Drives, Ratio of Belt Tensions, Centrifugal Tension.

UNIT – III

8L

Balancing of rotating masses: Static and Dynamic Balancing, Balancing of Single Rotating Mass by Balancing Masses in Same plane and in Different planes. Balancing of Several Rotating Masses by Balancing Masses in Same plane and in Different planes.

Balancing of reciprocating masses: Inertia Effect of Crank and Connecting rod, Single Cylinder Engine, Balancing in Multi Cylinder-inline engine (Primary and Secondary forces).

UNIT – IV

8L

Governors: Types of Governors; Force Analysis of Porter, Proell, Hartnell Governors, Controlling Force, Stability, Sensitiveness, Isochronism, Effort and Power.

UNIT – V

8L

Vibration: Types of vibrations, Degrees of freedom, Single degree free & damped vibrations, Forced vibration of single degree system under harmonic excitation, Critical speeds of shaft **4**

Gyroscope: Law of gyroscope, Gyroscopic Couple, Effect of Gyroscopic Couple on Ship, Plane Disc, Aeroplane, Stability of Four Wheelers.

Theory of Machines Lab

List of Experiments

1. To study the Different types of kinematic links, kinematic pairs and inversions of mechanisms.
2. To study different types of Gears and Gear trains.
3. To study different types of Cams and followers.
4. To perform the experiments of static and dynamic balancing on a shaft.
5. To perform the experiment on a governor and to plot the graph between “r” and “f”.
6. To perform the experiment on the Gyroscope & prove the law of gyroscope.
7. To perform an experiment on cam dynamics apparatus.
8. To calculate the frequency of a free vibrating spring.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Fluid Mechanics	Course Code: LA4230		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: IV		

UNIT – I

8L

Fluid Properties and Hydrostatics: Introduction to Fluid Mechanics, Definition of Fluid, Solid and Fluid Continuum, Definitions, Units and Dimensions of Mass density, Specific weight, Specific Volume, Relative density, Viscosity, Capillarity and Surface Tension, Newton’s law of Viscosity, Equation for capillarity, Definition of Pressure, Hydrostatic pressure equation, Absolute and Gauge pressures, Measurement of Pressure; Simple and Differential Manometer, Buoyancy, Force exerted by a liquid on an inclined flat surface, Meta-centre and Meta-centric height.

UNIT – II

9L

Kinematics of Fluid Flow: Introduction, Classification of flow, Three dimensional continuity equation in Cartesian coordinate, Stream function, Velocity potential, Stream line, Equipotential line (2D only).
Dynamics of Fluid Flow: Derivation of Euler’s equation & Bernoulli’s equation and its applications.

UNIT – III

9L

Flow Measurements: Equation for discharge over triangular notch, Rectangular notch, Trapezoidal notch, Equations for discharge through horizontal and inclined venturimeter, Measurement of velocity using pitot tube, Classification of orifices.

Viscous flow: Basic Boundary layer theory: displacement, momentum and energy thickness, flow through circular pipe, fluid between two parallel plates, energy and momentum correction factor.

UNIT – IV

8L

Flow through Pipes: Introduction, Reynolds’s number and its significance, Major and minor losses in pipe flow, Equation for head loss due to friction, Equation for head loss due to sudden expansion, Pipes in series, pipes in parallel and equivalent pipes, Water Hammer in pipes, Equations for pressure rise due to gradual and sudden closure of valves.

UNIT – V

7L

Dimensional Analysis and Model Studies: Introduction to Dimensional analysis, Units and dimensions, Dimensional Homogeneity, Raleigh’s and Buckingham’s methods of analysis, Model studies, similitude, dimensional parameters, Types of models.

Reference Books:

1. White, F.M., “Fluid Mechanics”, McGraw Hill Pvt. Ltd., 7th edition, 2011.
2. Munson, “Fundamentals of Fluid Mechanics”, Willey India Pvt Ltd, New Delhi, 6th edition, 2010.
3. Duglas, J. “Fluid Mechanics”, Pearson Ltd, 14th edition, New Delhi, 2013.
4. Bansal R. K., Fluid Mechanics and Hydraulic Machine, Lakshmi Publications, New Delhi.
5. Bansal R. K., “A Text Book of Fluid Mechanics and Hydraulic Machine”, Lakshmi Publications, N.Delhi, 2010.
6. Modi P.N and Seth S. M., “Hydraulics and Fluid Mechanics”, Standard Book House, New Delhi.
7. Rajput, R.K., “Text Book of Fluid Mechanics”, S.Chand Publication, 4th edition, New Delhi, 2013.

Fluid Mechanics Lab

List of Experiments

1. Verification of Bernoulli’s Theorem.
2. To calibrate an orifice meter and venturimeter, and determination of the co-efficient of discharge
3. Determination of coefficient of discharge for triangular, rectangular and trapezoidal notch.
4. Determination of Metacentric height for a floating ship
5. To study the transition from laminar to turbulent flow in a circular pipe.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Energy Conversion	Course Code: LA4010		
Credit: 3.5	L	T	P
	3	1	0
Year: 2nd	Semester: IV		

UNIT – I

9L

Vapor Power cycles: Carnot cycle, Effect of pressure & temperature on Rankine cycle, Reheat cycle, Regenerative cycle, Cogeneration.

Boilers: Classification, comparison between fire and water tube boilers, Essentials of a good boiler, Constructional and operational details of Locomotive & Lancashire Boilers, High pressure boilers- Benson, Lamont, Loeffler and Velox boilers, boiler mountings and accessories, air pre-heater, feed water heater, super heater, Boiler performance, Draught & its calculations, natural and forced draught, Chimney height, Maximum draft and chimney efficiency, Equivalent evaporation, Boiler trial and boiler heat balance sheet.

UNIT – II

7L

Steam and Gas Nozzles: Flow through nozzle, Variation of velocity, Area and specific volume, Choked flow, Throat area, Nozzle efficiency, off design operation of nozzle, Effect of friction on nozzle, super saturated flow.

UNIT – III

8L

Steam Turbines : Classification of steam turbine, Impulse and reaction turbines, Staging, Stage and overall efficiency, Reheat factor, state point locus, Bleeding, Velocity diagram of simple & compound multistage impulse & reaction turbines & related calculations work done efficiencies of reaction, Impulse reaction Turbines, Losses in steam turbines, Governing of turbines.

Condenser: Classification of condenser, Air leakage, Condenser performance parameters.

UNIT – IV

8L

Compressors: Single stage reciprocating air compressor, volumetric efficiency, multi stage compression, rotary compressors, blowers and fans, Centrifugal compressor, Elementary theory, Vector Diagram & efficiencies, Surging and choking.

UNIT – V

8L

Gas Turbines: Gas turbine classification, Brayton cycle, Gas turbine cycles with inter cooling, reheat and regeneration and their combinations, Stage efficiency, Polytropic efficiency, Deviation of actual cycles from ideal cycles.

Reference books:

5. Ballaney, P.L., “Thermal Engineering”, Khanna Publishers, 20th edition, 1994.
6. Ganeshan, V. “Gas Turbine”, Tata McGraw Hill Publishing Company Ltd, New Delhi, 2002.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Machine Design – I	Course Code: LA4020
Credit: 3.5	L T P 3 1 0
Year: 2nd	Semester: IV

UNIT – I

6L

Introduction: Definition, Methods, standards in design & selection of preferred size.

Selection of materials for static & fatigue loads, Materials for components subjected to creep, BIS system of designation of steels, steels.

UNIT – II

9L

Design against static load: Modes of failure, Factor of safety, stress-strain relationship, principal stresses, theories of failure

Design against fluctuating load: stress concentration, stress concentration factors, Fluctuating/alternating stresses, fatigue failure, endurance limit, design for finite & infinite life, Soderberg & Goodman criteria, S-N curve.

UNIT – III

9L

Design of Joints: Welded joint, screwed joints, eccentric loading of above joints, joint design for fatigue loading.

Shaft, keys & coupling: Design against static and fatigue loads, strength & rigidity design, Selection of square, flat keys and splines, rigid and flexible couplings.

UNIT – IV

8L

Mechanical springs: Design of Helical and leaf springs, against static & fatigue loading.

UNIT – V

8L

Design analysis of Power Screws: Form of threads, square threads, trapezoidal threads, stresses in screw, design of screw jack.

Reference books:

Credit: 4.5	<table style="width: 100%; border: none;"> <tr> <td style="width: 33%; text-align: center;">L</td> <td style="width: 33%; text-align: center;">T</td> <td style="width: 33%; text-align: center;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	1	2
L	T	P					
3	1	2					
Year: 3rd	Semester: V						

UNIT – I

8L

Introduction: Classification of Fluid Machines, Application of momentum and momentum equation to flow through hydraulic machinery, Euler’s fundamental equation.

Impact of jet: Introduction to hydrodynamic thrust of jet on a fixed and moving surface (flat & curve), effect of inclination of jet with the surface.

Hydraulic Turbines: Classification of turbines, Impulse turbines, constructional details, velocity triangles, power and efficiency calculations, governing of Pelton wheel.

UNIT – II

8L

Reaction Turbines: Francis and Kaplan turbines, constructional details, velocity triangles, power and efficiency calculations, degree of reaction, draft tube, cavitation in turbines, principles of similarity, unit and specific speed, performance characteristics, selection of water turbines.

UNIT – III

8L

Centrifugal Pumps: Classifications of centrifugal pumps, vector diagram, work done by impeller, efficiencies of centrifugal pumps, specific speed, model testing, cavitation and separation, performance characteristics.

UNIT – IV

8L

Positive Displacement Pumps: Reciprocating pump theory, slip and coefficient of discharges, indicator diagram, effect and acceleration, work saved by fitting air vessels, comparison of centrifugal and reciprocating pumps, positive rotary pumps, Gear and Vane pumps, performance characteristics.

UNIT – V

8L

Other Machines: Hydraulic accumulator, Intensifier, Hydraulic press, Lift and Cranes, theory of hydraulic coupling and torque converters, performance characteristics.

Water Lifting Devices: Hydraulic ram, Jet pumps, Airlift pumps, water distribution systems.

References books:

7. Rajput, R.K., “Text Book of Fluid Mechanics”, S.Chand Publication, 4th edition, New Delhi, 2013.

FLUID MACHINERY LAB

List of Experiments

1. To determine the coefficient of impact jet vane combination by comparing the actual force with the theoretical force for stationary vanes of different shapes.
2. To find out Pelton wheel turbine efficiency by comparing the fluid energy to mechanical energy.
3. To find out the performance of Francis turbine.
4. To study the performance of reciprocating pump
5. To study the performance of centrifugal pump.
6. Study through visit of any pumping station/plant.
7. Study through visit of any hydraulic power plant.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Heat and Mass Transfer	Course Code: LA5220
Credit: 4.5	L T P 3 1 2
Year: 3rd	Semester: V

UNIT – I

6L

Introduction to Heat Transfer: Concepts of heat flows: conduction, convection and radiation; effect of temperature on thermal conductivity of materials; introduction to combined heat transfer mechanism.

Conduction: One-dimensional general differential heat conduction equation in the rectangular, cylindrical and spherical coordinates, initial and boundary conditions.

Steady State one-dimensional Heat conduction : Composite Systems in rectangular, cylindrical and spherical coordinates with and without Energy generation; thermal resistance concept; Analogy between heat and electricity flow; thermal contact resistance; Overall Heat Transfer Coefficient, critical thickness of insulation.

UNIT – II

9L

Fins: Types of fins, Fins of uniform cross-sectional area; errors of measurement of temperature in thermometer wells.

Transient Conduction: Lumped capacitance method, unsteady state heat conduction in one dimension only, Heisler charts.

UNIT – III

9L

Forced Convection: Basic concepts; hydrodynamic boundary layer; thermal boundary layer, flow over a flat plate; flow across a single cylinder and a sphere; flow inside ducts; empirical heat transfer relations; relation between fluid friction and heat transfer; liquid metal heat transfer.

Natural Convection: Physical mechanism of natural convection; buoyant force; empirical heat transfer relations for natural convection over vertical plates and cylinders, horizontal plates and Cylinders, and sphere.

UNIT – IV

8L

Condensation And Boiling : Introduction to condensation phenomena; heat transfer relations for laminar film. Condensation on vertical surfaces and on a horizontal tube; Boiling modes pool boiling curve.

Heat Exchanger: Types of heat exchangers; fouling factors; overall heat transfer coefficient; logarithmic Mean temperature difference (LMTD) method; effectiveness-NTU method; compact heat Exchangers.

Introduction To Mass Transfer: Introduction; Fick's law of diffusion, analogy between heat and mass transfer, steady mass diffusion through a wall, convective mass transfer.

UNIT – V

8L

Thermal Radiation: Basic radiation concepts; radiation properties of surfaces; black body radiation laws; shape factor; black-body radiation exchange; Radiation exchange between non-blackbodies in an enclosure; Infinite parallel Planes, radiation shields.

Reference Books:

2. Thirumaleswar, M. "Fundamentals of Heat and Mass Transfer", Pearson Education, 1st edition, 2013.
3. Incropera, F.P., "Fundamentals of Heat & Mass Transfer", Wiley Publication, 6th edition, 2013.
4. Kreith, F. and Bohn, M.S., "Principles of Heat Transfer", Brooks/Cole, 6th edition, 2006.
5. Holman, J.P., "Heat Transfer", TataMcGraw-Hill Publishing Company Limited, 6th edition, 2008.

Heat and Mass Transfer Lab : List of Experiments

1. Conduction - Composite wall experiment.
2. Convection - Experiment on heat transfer from tube-natural convection.
3. Convection - Heat transfer through fin-natural convection.
4. Convection - Heat transfer through fin-forced convection.
5. Convection- Heat transfer from forced convection from tube.
6. Heat exchanger - Parallel flow experiment.
8. Heat exchanger - Counter flow experiment.
9. Conduction - Determination of thermal conductivity of metal.
10. Determination of Stefan-Boltzman constant.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Mechanical Measurements	Course Code: LA5230		
Credit: 4.5	L 3	T 1	P 2
Year: 3rd	Semester: V		

UNIT – I

6L

Basic Concepts of Measurements: Introduction to measurement and measuring instruments, Generalized measuring system and functional elements, units of measurement, static and dynamic performance characteristics of measurement devices, calibration, standards of measurements, concept of error, sources of error, statistical analysis of errors.

Sensors and Transducers: Types of sensors, types of transducers and their characteristics.

Signal transmission and processing: Devices and systems. Signal Display & Recording Devices

UNIT – II

9L

Strain measurement: Types of strain gauges and their working, strain gauge circuits, temperature compensation. Strain rosettes, calibration.

Measurements of force and torque: Different types of load cells, elastic transducers, pneumatic & hydraulic systems.

Vibration Measurement: Seismic instruments, vibration pickups and decibel meters, vibrometers accelerometers.

UNIT – III

9L

Angular and Taper Measurements: Introduction; Working principle & construction of Angular Measuring

Instruments like Protractors, Sine bars, Sine Centre, Angle gauges, Spirit level, Clinometers, angle dekkor; Applications, Advantages & limitations of commonly used angular measuring instruments; Taper Measuring instruments: Measurement of taper shafts & holes.

UNIT – IV

8L

Screw Thread Measurements: Introduction & classification of Threads; Elements, Specification & forms of Screw Threads; Various Methods for measuring elements of External & Internal Screw Thread; Screw Thread Gauges; Errors in Threads.

Gear Measurements: Measurement and testing of spur gear: Various methods of measuring tooth thickness, tooth profile & pitch; Gear Errors.

UNIT – V

8L

Temperature Measurement: Introduction; Temperature and Temperature Scales; Methods of temperature Measurement; Expansion thermometers; Filled System thermometers; Electrical temperature measuring instrument; Pyrometers; Calibration of temperature measuring instruments.

Pressure Measurement: Introduction; Pressure standards and methods of pressure measurement; Manometers; Elastic pressure transducers; Measurement of Vacuum; Force balance pressure gauges; Electrical pressure transducers; pressure Switches; Calibration of pressure measuring instruments, Maintenance and repair of pressure measuring instrument; Trouble shooting.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Reference Books:

1. R.K. Rajput, “Mechanical Measurements & Instruments”, 3rd edition, 2007-2008
2. Beckwith, Marangoni, Lienhard, “Mechanical Measurements”, 5th edition, 2003
3. A.K. Sawhney and P. Sawhney, “Mechanical Measurements and Instrumentation”, 12th edition, 2001
4. Doebelin, “Measurement Systems”, 5th edition, 2004

MECHANICAL MEASUREMENTS LAB

List of Experiments

1. Study & working of simple measuring instruments- Vernier calipers, micrometer, tachometer.
2. Measurement of effective diameter of a screw thread using 3 wire method.
3. Measurement of angle using sine bar & slip gauges. Study of limit gauges.
4. Study & angular measurement using level protector.
5. Study of dial indicator & its constructional details.
6. Study and understanding of limits, fits & tolerances.
7. Study of Pressure & Temperature measuring equipments.
8. Strain gauge measurement.
9. Speed measurement using stroboscope.
10. Flow measurement experiment.
11. Vibration/work measuring experiment.
12. Experiment on Dynamometer

L	T	P					
3	0	0					
Year: 3rd	Semester: V						

UNIT – I

6L

Production, Production systems and Productivity:

Definition of production, factors of production, types of production systems. Definition of productivity, application and advantages of productivity, Improvement tools, reasons for increase and decreases in productivity

UNIT – II

9L

Location Selection and Plant Layout:

Nature of Location Decision, Importance of Plant Location, Dynamic Nature of Plant Location, Choice of site for selection, State regulations on location, Government policies on decentralization. Industrial Estates, Economic Survey of Site selection, Comparison of location,

Principles of Plant layout and Types, factors affecting layout, methods, factors governing flow pattern, travel chart, analytical tools of plant layout, layout of manufacturing shop, repair shop and services sectors.

UNIT – III

9L

Production Planning and Control:

Types of production systems and their characteristics functions and objectives of P.P.C., product design and development including standardization and simplification,

Sales forecasting, concept, techniques, application, production planning and process planning,

Sequencing, loading and scheduling, techniques and their selection, line of balance, assembly line balancing, dispatching, progress control.

UNIT – IV

8L

Inspection and Statistical Quality Control:

Inspection – functions, types, objectives and benefits, quality control – principles, Concepts of quality circles, Total quality management, Quality assurance, Quality audit, ISO, and six sigma.

SQC Concept, variable and attributes, normal distribution curves and its property charts for variable and attributes and their applications and interpretation (analysis) process capability, Acceptance sampling, sampling plans, OC curves and AOQ curves.

UNIT – V

8L

Basics of Management: introduction, definition of management, functions of management – planning, organising, staffing, directing, co-ordination, controlling, motivating, communication, decision making.

Principles of management, administration and management, nature of management, levels of management, managerial skills, managerial roles, styles of management.

Forms of organisation – line, staff, line-staff

Forms of ownership – partnership, joint stock, cooperative society, govt. sector etc.

3	1	0					
Year: 3rd	Semester: V						

UNIT – I

8L

Spur Gear: Tooth forms, System of gear teeth, contact ratio, Standard proportions of gear systems, Interference in involute gears, Backlash, Selection of gear materials, Gear manufacturing methods, Design considerations, Beam strength of gear tooth, Dynamic tooth load, Wear strength of gear tooth, Failure of gear tooth, Design of spur gears, AGMA and Indian standards.

UNIT – II

8L

Helical Gear: Terminology, Proportions for helical gear, Beam strength and wear strength of helical gear, herringbone gear, crossed helical gear, Design of helical gears.

Worm Gear: Types of worm, Terminology, Gear tooth proportions, Efficiency of worm gear, Heat dissipation in worm gearing, Strength and wear tooth load for worm gear, Design of worm gearing.

UNIT – III

8L

Sliding Contact Bearing Types, Selection of bearing, Plain journal bearing, Hydrodynamic lubrication, Properties and materials, Lubricants, Hydrodynamic journal bearing, Heat generation, Design of journal bearing, Thrust bearing-pivot and collar bearing, Hydrodynamic thrust bearing.

UNIT – IV

8L

Rolling Contact Bearing Advantages and disadvantages, Types of ball bearing, Thrust ball bearing, Types of roller bearing, Selection of radial ball bearing, Bearing life, Selection of roller bearings, Dynamic equivalent load for roller contact bearing under constant and variable loading, Reliability of Bearing, Selection of rolling contact bearing, Lubrication of ball and roller bearing, Mounting of bearing.

UNIT – V

8L

I. C. Engine parts

Selection of type of IC engine, General design considerations, Design of Cylinder and cylinder head; Design of piston, piston ring and gudgeon pin; Design of connecting rod; Design of center crankshaft.

B.Tech – Mechanical Engineering
Applicable for 2013-2017 Batch**

Course Title: Engineering Economics	Course Code: GC5010		
Credit: 2	L 2	T 0	P 0
Year: 3 rd	Semester: VI		

UNIT – I

8L

Time value of money, simple interest vs. compound interest, cash flow diagrams, future value and compounding, present value and discounting, uneven cash flow and annuity, calculate present worth, future worth and annual worth, discounted cash flow valuation, effective interest rate, annual percentage rate, multi period interest, continuous compounding, capital recovery and sinking fund model.

UNIT – II

6L

Analysis of public Projects: Use and situations for equivalent annual worth comparison, Comparison of assets of equal and unequal life. Benefit/ Cost analysis, quantification of project, cost and benefits, benefit/ cost applications, Cost –effectiveness analysis.

UNIT – III

6L

Investment Decisions: Techniques of capital budgeting, payback period, discounting payback period, NPV Vs IRR comparison Rate of return, internal rate of return, comparison of IIR with other methods, IRR Misconceptions.

UNIT – IV

6L

Indian capital Market: Structure, efficiency and forms of capital market efficiency, Primary market and capital market, Exposure on trading of various types of security instruments i.e. Equity shares, Mutual funds etc.

UNIT – I

9L

Introduction to I.C Engines: Engine classification, Air standard cycles, Otto, Diesel, Stirling, Ericsson cycles, Actual Cycle analysis, Two and four stroke engines, SI and CI engines, Valve timing diagram, Rotary engines, Stratified charge engine.

Fuels: Fuels for SI and CI engine, important qualities of SI engine fuels, Rating of SI engine fuels, Important qualities of CI engine fuels, Dopes, Additives, Gaseous fuels, LPG, CNG, Biogas, Producer gas, Alternative fuels for IC engines.

UNIT – II

9L

SI Engines: Carburetion, Mixture requirements, Carburetor types Theory of carburetor, MPFI. Combustion in SI engine, Flame speed, Ignition delay, Abnormal combustion and its control, Combustion chamber design for SI engines.

Ignition system requirements, Magneto and Battery ignition systems, Ignition timing and spark plug, Electronic ignition, Battery and its types, Charging and discharging of batteries.

UNIT – III

8L

CI Engines: Fuel injection in CI engines, Requirements, Types of injection systems, Fuel pumps, Fuel injectors, Injection timings.

Combustion in CI engines, Ignition delay, Knock and its control, Combustion chamber design of CI engines. Scavenging in 2 Stroke engines, Pollution and its control.

UNIT – IV

9L

Engine Cooling: Different cooling systems, Cooling Towers, Radiators and cooling fans.

Lubrication: Engine friction, Lubrication principal, Type of lubrication, Lubrication Oils, Crankcase ventilation.

Supercharging: Effect of altitude on power output, Types of supercharging.

UNIT – V

7L

Testing and Performance: Performance parameters, Basic measurements, Blow by measurement, Testing of SI and CI engines. Heat balance sheet.

Reference Books:

8L

Fundamentals of CAD:

Introduction, Reasons for implementing a CAD system, Computer Aided Process application, conventional design vs CAD. Benefits, Hardware, CAD software's, review of c, c++ , statement such as if else for while and switch, functions, pointer-notations, structure and class, concept of oops.

Computer graphics

Graphics input devices-cursor control devices,digitizers,scanners and touch panels,

Graphics display devices: CRT, colour CRT monitors,DVST,Flat panel display,graphics output devices

UNIT – II

9L

Geometric modeling:

Graphics functions, output-primitives- bresenham's line drawing and mid point circle algorithms, Types of mathematical representation of curves, wire frame models, wireframe entities,parametric representation of synthetic curves- her mite cubic splines, Bezier curves ,B-splines rational curves

Surface modeling: Mathematical representation surfaces, Surface model, Surface entities, surface representation, Parametric representation of surfaces, plane surface, rule surface, surface of revolution, Tabulated Cylinder

UNIT – III

9L

Parameteric representation of synthetic surfaces–:

Hermite Bicubic surface, Bezier surface, B- Spline surface, COONs surface, Blending surface , Sculptured surface, Surface manipulation – Displaying, Segmentation, Trimming, Intersection, Transformations (both 2D and 3D).

Geometric Modelling-3D : Solid modeling, Solid Representation, Boundary Representation (B-rep), Constructive Solid Geometry (CSG),quadric and superquadric surfaces and blobby objects

Graphics Standards: Standards for graphics programming, features of GKS, other graphics standards, PHIGS, IGES, PDES. Standards in CAD

UNIT – IV

8L

Collaborative Engineering: Collaborative Design, Principles, Approaches, Tools, Design Systems. Introduction to CAD/CAE, Element of CAD, Concepts of integrated CAD/CAM, CAD Engineering applications, its importance & necessity.

Finite Element Methods: Introduction and Application of FEM, Stiffness Matrix/ Displacement Matrix, One/Two Dimensional bar & beam element (as spring system) analysis

UNIT – V

7L

Optimization:

Introduction, design synthesis, Engineering vs Optimum Design, Objectives of Optimization, Classification of Optimization problems and their procedure, techniques of optimization, Optimized design of machine components, Optimization Software.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Reference Books:

COMPUTER AIDED DESIGN LAB

List of Experiments

1. Line Drawing or Circle Drawing experiment: Writing and validation of computer program.
2. Geometric Transformation algorithm experiment for translation/rotation/scaling: Writing and validation of computer program.
3. Design of machine component or other system experiment: Writing and validation of computer program.
4. Understanding and use of any 3-D Modeling Software commands.
5. Pro/E/Idea etc. Experiment: Solid modeling of a machine component
6. Writing a small program for FEM for 2 spring system and validation of program or using a fem Package
7. Root findings or curve fitting experiment: Writing and validation of computer program.
8. Numerical differentiation or numerical integration experiment: Writing and validation of computer program.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Refrigeration and Air Conditioning	Course Code: LA6230						
Credit: 4.5	<table style="width: 100%; border: none;"> <tr> <td style="width: 33%; text-align: center;">L</td> <td style="width: 33%; text-align: center;">T</td> <td style="width: 33%; text-align: center;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	1	2
L	T	P					
3	1	2					
Year: 3rd	Semester: VI						

UNIT – I

8L

Introduction: Principles and methods of refrigeration; reverse Carnot cycle; unit of refrigeration; coefficient of performance (COP)

Air refrigeration system: Classification; Bell Coleman cycle; Open and closed air refrigeration cycles; Simple, Boot-strap, reduced ambient and regenerative cooling systems; Dry air rated temperature (D.A.R.T).

UNIT – II

7L

Vapour compression system (single stage): Vapour compression cycle, p-h and t-s diagrams; deviations from theoretical cycle; Effects of sub-cooling and super heating, condenser and evaporator pressure on system performance.

Refrigerants: Nomenclature & classification; desirable properties; common refrigerants- comparative study; leak detection methods; Secondary refrigerants; Environment friendly & CFC free refrigerant.

UNIT – III

7L

Vapour compression system (multi stage): Removal of flash gas; multiple expansion & compression with flash inter cooling.

Vapour absorption system: Theoretical and practical systems such as aqua-ammonia, Lithium bromide-water & Electrolux absorption systems; Binary mixture; Temperature-concentration, Enthalpy-concentration diagrams.

UNIT – IV

8L

Psychrometry: Psychrometric properties and their definitions; psychrometric processes: sensible heating and cooling, evaporative cooling, cooling and dehumidification, adiabatic dehumidification, heating and humidification; adiabatic saturation temperature; mixing of air stream, sensible heat factor (SHF), apparatus dew point (ADP), bypass factor of coil;

Applied Psychrometry: Air washer, cooling tower.

UNIT – V

10L

Principle of air conditioning: Requirements of comfort air conditioning; thermal analysis of human body; human comfort, effective temperature & chart.

Air-conditioning loads: Basic knowledge of summer & winter air conditioning load; calculation of supply air rate & its condition; ventilation and infiltration, room sensible heat factor (RSHF), grand sensible heat factor (GSHF), effective sensible heat factor (ESHF).

7. ASHRAE Handbook.

Refrigeration and Air Conditioning Lab

List of Experiments

1. Experiment on refrigeration test rig and calculation of various performance parameters.
2. To study different types of expansion devices used in refrigeration system.
3. To study different types of evaporators used in refrigeration systems.
4. To study basic components of air-conditioning system.
5. Experiment on air-conditioning test rig & calculation of various performance parameters.
6. To study air washers.
7. Study of window air conditioner.
8. Study & determination of volumetric efficiency of compressor.
9. Visit of a central air conditioning plant.
10. Visit of cold storage.

**Course Structure & Syllabus of
B.Tech – Mechanical Engineering
Applicable for 2013-2017 Batch**

Course Title: Operation Research	Course Code: LA6010		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: VI		

UNIT – I

11L

Introduction: Linear programming, Definition, scope of Operations Research, approach and limitations. Models, Characteristics and phases of O.R., Mathematical formulation of L.P. Problems. Graphical solution methods.

Linear Programming Problems: The simplex method - slack, surplus and artificial variables. Concept of duality, two phase method, dual simplex method, degeneracy, and procedure for resolving degenerate cases.

UNIT – II

11L

Transportation Problem: Formulation of transportation model, Basic feasible solution using different methods, Optimality, Methods, Unbalanced transportation problem, Degeneracy in transportation problems, Applications of Transportation problems.

Assignment Problem: Formulation, unbalanced assignment problem, traveling problem.

UNIT – III

7L

Game Theory: Formulation of games, two person-Zero sum game, games with and without saddle point, Graphical solution ($2 \times n$, $m \times 2$ game), and dominance property.

UNIT – IV

7L

Queuing Theory: Queuing system and their characteristics. The M/M/1 Queuing system, Steady state performance analysis of M/M/1 and M/M/C queuing model.

UNIT – V

8L

PERT-CPM Techniques: Network construction, determining critical path, floats, scheduling by network, project duration, variance under probabilistic models, prediction of date of completion, crashing of simple networks.

Reference Books:

- 1) J.K. Sharma; Operation Research; Theory and application, 5th edition, 2013.
- 2) A.M. Natrajan, P. Balsubramani, A. Tamil Aravari, Operation Research; 4th edition, 2005.
- 3) Taha H.A.; Operation Research; Pearson; 8th edition, 2008.
- 4) Vivek Kumar; Operation Research; Katson Books, 5th edition, 2012.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Computer Integrated Manufacturing	Course Code: LA7210
Credit: 4	L T P 3 0 2
Year: 4th	Semester: VII

UNIT – I

8L

Introduction- Concepts of CIM, Manufacturing system, components of CIM, CASA/SME model of CIM, CIM II, Benefits of CIM, Communication matrix in CIM, Fundamentals of computer communication in CIM, computer networking in CIM- seven layers of OSI model.

UNIT – II

8L

NC & CNC part programming: Fundamental of NC technology, computer numerical control, distributed numerical control, coding systems and formats, Manual NC part programming, Examples drilling and milling, turning, CNC machines and turning centers, CNC part programming.

UNIT – III

8L

Material Handling System -introduction to material handling, material transport equipment like industrial trucks, automated guided vehicles, monorail and other rail guided vehicles, conveyors, cranes and hoists.AS/RS design process

Identification technologies- introduction, bar code technology, radio frequency identification.

UNIT – IV

7L

Flexible manufacturing systems: introduction, FMS components, equipments, FMS tool management systems, system layout, FMS control, case study. FMS applications and benefits.

Group technology and cellular Manufacturing: part families, part classification and coding Production flow analysis, application of Group technology.

UNIT – V

8L

Process planning and Concurrent Engineering- process planning, computer aided process planning, concurrent engineering and design for manufacturing, advance manufacturing planning,

Production Planning and Control systems- Aggregate production planning and the Master Production schedule, Material Requirement planning, Shop floor control, Inventory control, JUST IN TIME, Lean and Agile manufacturing

References Books:

5. Paul G. Ranky., “ Computer Integrated Manufacturing”, Prentice hall of India Pvt Ltd., 2005

List of Experiments

1. Study of Flexible manufacturing system
2. Writing a part-programming (in word address format or in APT) for a job for drilling operation (point-to-point) and running on NC machine.
3. Writing a part programming (in word address format or in APT) for a job for milling operation (contouring) and running on NC machine
4. Experiment on Robots and it programs
5. Experiment on Transfer line/Material handling.
6. Experiment on difference between ordinary machine and NC machine
7. Study of retrofitting.
8. Experiment on study of system devices such as motors and feedback devices.
9. Experiment on Mechatronics & controls

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Automobile Engineering	Course Code: LA7220						
Credit: 4.5	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	3	1	2
L	T	P					
3	1	2					
Year: 4 th	Semester: VII						

UNIT – I

13L

Introduction: Classification of automobiles, Parts of an automobile, Description of an automobile, performance of automobile, engine cycle-energy balance, performance parameters, tractive efforts.

Fuel-supply system:

S.I. engine: Carburetion & carburetors, factor influencing carburetion, Mixture requirement, Distribution, Complete carburetor, theory of simple carburetor.

C.I. engine: Functional requirements of an injection system, Fuel pump and fuel injector (Atomizer), Types of nozzles and fuel spray patterns. Turbo Charger.

MPFI: Introduction and functioning

UNIT – II

8L

Engine friction, lubrication & cooling system: Determination of engine friction, lubrication system, crankcase ventilation, necessity of engine cooling, areas of heat flow in engines, gas temperature variation, heat transfer, temperature distribution & temp. Profiles, cooling air and water requirements, cooling systems.

UNIT – III

6L

Chassis: Introduction. Classification of chassis, Frame.

Suspension: Introduction, requirements of suspension system, springs, damper.

Wheels: Introduction, Requirement, types of wheels.

Tyres: Introduction, requirements, types of tyre, tyre construction-cross ply, radial ply, belted bias, tyre materials tyre shape, tread patterns,, wheel balancing, wheel alignments.

UNIT – IV

10L

Steering and gears: Purpose, function, requirements, general arrangements of steering systems, steering gears, steering ratio, reversibility, steering geometry, under steering, over steering, steering arms, Drag link, power steering, adjusting of steering geometry, steering troubleshooting. Requirements. Clutches. Torque converters. Over drive and free wheel, Universal joint. Differential Gear .Mechanism of Rear Axle. Automatic transmission, Steering and Front Axle. Castor Angle.

Front axle: Introduction, construction, types of front axles, stub axles.

Braking system: Necessity, functions, requirements, classification of brakes, Mechanical brakes, hydraulics brakes, power brakes, brake service, air brakes & Brake shoes & drums.

UNIT – V

7L

Automotive electrical system: Introduction, main parts of vehicles.

Starting system: Introduction, battery, starting motor.

Ignition system: Introduction, purpose, requirements, coil ignition system, firing order, ignition timing, spark plugs, digital ignition.

Charging system: Introduction. Dynamo, alternators.

Lighting: introduction, main circuits, lighting system.

References Books:

2. Gupta, K.N., “Automobile Engineering”, Umesh Publication, 3rd Edition, 2008.
3. Singh, K., “Automobile Engineering”, Standard Publication, 13th Edition, 2011.

LIST OF EXPERIMENTS

1. Study of braking system of an automobile.
2. Study of steering system of an automobile.
3. Study of Fuel supply system of an automobile.
4. Study of Suspension system of an automobile.
5. Heat balance sheet of diesel engine test rig.
6. Morse’s test.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Total Quality Management	Course Code: LA7010		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VII		

UNIT – I **8L**

Introduction, Need for quality, Evolution of quality, Definition of quality, Dimensions of manufacturing and service quality, Basic concepts of TQM, Definition of TQM, TQM Framework, Contributions of Deming, Juran and Crosby, Barriers to TQM.

UNIT – II **8L**

Process Control & Product Control, Concept of control charts, variables & attributes control chart for variables & attributes Acceptance Sampling and Sample Plans

UNIT – III **8L**

Concept of reliability, maintainability and availability. Bath tub curve, MTTF, MTTR, Zero Defect

UNIT – IV **8L**

The seven traditional tools of quality, New management tools, Six-sigma: Concepts, methodology, applications to manufacturing, service sector including IT, Bench marking. Reason to bench mark, Bench marking process, FMEA, Stages, Types. Deming Cycle, 5S Techniques, Kaizen

UNIT – V **8L**

Quality circles, Quality Function Deployment (QFD), Taguchi quality loss function, TPM – Concepts, Concept of Cost of Quality

Text Book:

L	T	P					
3	1	0					
Year: 4 th	Semester: VII						

UNIT – I

6L

Automation: Introduction, Element of Automation, Types of automation, Advantages and limitations of Automation, Low cost Automation, and Current emphases in Automation.

Fluid power: Introduction of hydraulics and Pneumatics fluid, Basic elements of fluid power system, Application of fluid power, Pneumatics vs. Hydraulics. Advantage and disadvantages.

UNIT – II

10L

Pump and Compressors: Introduction, Pumps vs. Compressors, Classification of Hydraulic Pumps, Air compressors, Types of air compressors

Fluid Accessories: Introduction, Pneumatic accessories, hydraulic accessories like Air receiver, After cooler, Air dryer, Air filter, Pressure regulator. Air lubricator Air service unit (F.R.L) Pipeline layout. Seals, Hydraulic reservoir, Hydraulic filter. Pressure gauges and volume meters, Hydraulic accumulator, Hydraulic seals.

Cylinders and Motors-Introduction, Classification of cylinders. Applications, Cylinder cushioning, Cylinders mountings, Cylinder sizing, Cylinder specification, Introduction to motors, Motor ratings, Hydraulic and pneumatic motors, Symbol of motors, Classification of motors.

UNIT – III

10L

Control valves. Introduction, Classification of valves. Direction control valves, flow control valves, pressure control valves, check valves, servo valves.

Hydraulic Pneumatic Circuits- Introduction, hydraulic and pneumatic symbols, comparison of hydraulic, pneumatic and Hydro pneumatic systems, hydraulic circuits and its design, meter in circuits, meter out circuits, bleed off circuits, accumulator circuits, sequencing circuits, hydraulic circuit for robot arm, circuit design for control of single and double acting cylinder, Open and Closed loop, Control system Circuit design Methods, Motion sequence representation.

Transfer devices and feeders: Introduction, Fundamentals of production lines, Types of assembly lines, Transfer systems in assembly lines, Automatic machines, Transfer Devices/ Machines, Classification of transfer devices, Conveyor systems used in transfer devices, Feeders, Classification of feeders, Types of feeders.

UNIT – IV

6L

Fundamentals of Robot- Definition, Laws of Robotics, Motivating Factors, objective of using industrial Robot, Advantages and Disadvantages of Robots, Characteristics of an Industrial Robot, Components of an Industrial Robot, Robot Wrist and Robot Terminology, Robotics mechanical Joints, Classification of industrial Robots, Robot control systems, Type of controller used in Robotics, Robot cell layout, work cell Control, interlocks, Error detection and recovery.

UNIT – V

8L

Robotics sensors- Types of sensors used in robotics, touch or tactile sensors, position and displacement sensors, force and torque sensors , proximity sensors, types of proximity sensors, range sensors, selection of right sensor.

Robot End Effectors- Types of end effectors, mechanical grippers, vacuum grippers, magnetic grippers, adhesive grippers, force analysis of gripper mechanism, remote center compliance devices (RCCs).

Robot programming- Introduction, Robot Programming, Method of robot programming Robot Programming, Overview of Robot Programming Languages, Robot Languages, Types of Robot Languages, Robot Capabilities, Applications of Robots.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Power Plant Engineering	Course Code: LA7030		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VII		

UNIT – I

7L

Introduction: economics of power generation: - Introduction, Power and energy, sources of energy, load duration curves, power plant economics, tariff methods for electrical energy

Combustion of fuels: Combustion chemistry, Conversion of volumetric to weight analysis and vice-versa, Weight of air required for complete combustion of fuel, excess air, weight of carbon in flue gases, Weight of flue gas per kg of fuel burnt.

UNIT – II

7L

Analysis of Rankine cycle: characteristics of ideal working fluid for vapour power cycle, Rankine cycle and layout of power plant consists of economizer, evaporator, and super heater, effect of superheat, effect of inlet pressure, effect of reheater, effect of regeneration, effect of variation of steam condition on thermal efficiency of steam power plant, feed water heater, deaerator, carnotization of Rankine cycle, efficiency in a steam power plant.

Pulverized coal firing system: crushers and pulveriser, fluidized bed combustion and boiler: regime of fluidization, bubbling fluidized bed boilers, circulating fluidized bed boilers, circulation, Steam Drum and Internals Parts, Electrostatic Precipitator, Condenser and cooling water system , Cooling Towers.

UNIT – III

7L

Diesel power plant: General layout, performance of diesel engine, fuel system, lubrication system, air intake and admission system, supercharging system, exhaust system, diesel plant operation and efficiency, heat balance.

Gas turbine power plant: Components of gas turbine power plants, Classification and comparison of different gas turbine power plants, Analysis of closed cycle and open cycle constant pressure gas turbine plants, methods to improve the thermal efficiency of a simple open cycle constant pressure gas turbine power plant. Advantage of Gas turbine plant over Diesel and Thermal Power Plants. Combined cycle power plants.

UNIT – IV

5L

Hydro electric Power Plant: Hydrology and hydrographs, Flow duration curves, Principles of working, applications, site selection, classification and arrangements of hydroelectric plants.

UNIT – V

7L

Nuclear power plant: Introduction, Types of Nuclear Reactions, Principles of nuclear energy, nuclear power station. Nuclear fuels in fission and fusion reactors, Nuclear materials, Neutron chain reaction in fission reactors, Neutron flux.

Nuclear reactors: Components: Coolants, Moderators, Reflector, Control rods, Shielding and structural materials. Different Types of Reactors and their comparison, Location of Nuclear Power Plant.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch DEPARTMENTAL ELECTIVES

Course Title: Non-Conventional Energy Resources and Utilization	Course Code: LA8610						
Credit: 3.5	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 4 th	Semester: VIII						

UNIT – I

8L

Energy resources and their utilization: Renewable and non-renewable energy sources, energy consumption as a measure of Nation's development; strategy for meeting the future energy requirements Global and National scenarios, Prospects of renewable energy sources. Energy parameters (energy intensity, energy-GDP elasticity), Introduction to various sources of energy, Solar thermal, Photovoltaic, Water power, Wind energy, Biomass, Ocean thermal, Tidal and wave energy, Geothermal energy, Hydrogen energy systems, Fuel cell.

Solar radiations: Extra-terrestrial radiation, Spectral distribution, Solar constant, Solar radiations on earth, Measurement of solar radiations, Solar radiation geometry, Flux on a plane surface, Latitude, Declination angle, Surface azimuth angle, Hour angle, Zenith angle, Solar altitude angle expression for angle between incident beam and the normal to a plane surface (no derivation), Local apparent time, Apparent motion of sun, Day length, Solar radiation data for India.

UNIT – II

8L

Solar energy: Solar thermal power and it's conversion, Solar collectors, Flat plate, Performance analysis of flat plate collector, Solar concentrating collectors, Types of concentrating collectors, Thermodynamic limits to concentration, Cylindrical collectors, Thermal analysis of solar collectors Tracking CPC and solar swing. Solar thermal energy storage, Different systems, Solar pond, Applications, Water heating, Space heating & cooling, Solar distillation, solar pumping, solar cooking, Greenhouses, Solar power plants Solar photovoltaic system: Photovoltaic effect, Efficiency of solar cells, Semiconductor materials for solar cells, Solar photovoltaic system, Standards of solar photovoltaic system, Applications of PV system, PV hybrid system.

UNIT – III

6L

Biogas: Availability of bio-mass and its conversion theory Photosynthesis, Bio gas production Aerobic and anaerobic bio-conversion process, Raw materials, Properties of bio gas, Producer gas, Transportation of bio gas, bio gas plant technology & status, Community biogas plants, Problems involved in bio gas production, Bio gas applications, Biomass gasification, Energy recovery from urban waste, Power generation from liquid waste, Biomass cogeneration, Energy plantation, Fuel properties, Biomass resource development in India.

Wind energy: Properties of wind, Availability of wind energy in India, wind velocity, Wind machine fundamentals, Types of wind machines and their characteristics, Horizontal and Vertical axis wind mills, Elementary design principles, Coefficient of performance of a wind mill rotor, Aerodynamic considerations in wind mill design, Selection of a wind mill, Wind energy farms, Economic issues, Recent development. Performance and limitations of energy conversion systems

UNIT – IV

6L

Electrochemical effects and fuel cells: Principle of operation of an acidic fuel cell, Reusable cells, Ideal fuel cells, Other types of fuel cells, Comparison between acidic and alkaline hydrogen-oxygen fuel cells,

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Efficiency and EMF of fuel cells, Operating characteristics of fuel cells, Advantages of fuel cell power plants, Future potential of fuel cells.

UNIT – V

8L

Geothermal energy: Structure of earth's interior, Geothermal sites, earthquakes & volcanoes, Geothermal resources, Hot springs, Steam ejection, Principal of working, Types of geothermal station With schematic representation, Site selection for geothermal power plants. Advanced concepts, Problems associated with geothermal conversion.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Computational Methods For Heat Transfer & Fluid Flow	Course Code: LA8620						
Credit: 3.5	<table style="margin: auto; border: none;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 4 th	Semester: VIII						

UNIT – I

8L

Review of basic fluid mechanics and the governing (Navier-Stokes) equations. Types of partial differential equations- hyperbolic, parabolic and elliptic. Traditional solution methods- method of characteristics, separation of variables, Greens function method.

UNIT – II

10L

Preliminary computational techniques: Discretisation, converting derivatives to discrete algebraic expressions, spatial derivatives, time derivatives. Approximation of derivatives, Taylor series expansion, general techniques. Accuracy of discretisation process-higher order vs lower order formulae.

UNIT – III

8L

Finite difference method: conceptual implementation, application to transient heat conduction problem. Convergence, consistency and stability of FD equation.

UNIT – IV

8L

Weighted residual methods: General formulation, Introduction to Finite Volume method, Equations with first derivatives and second derivatives. FV method applied to Laplace's equation.

UNIT – V

8L

Finite Element method: Linear interpolation, quadratic interpolation, two dimensional interpolations. Application to heat transfer problems.

Reference Books:

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Machine Tool Design	Course Code: LA8640		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

UNIT – I

8L

Introduction and General Principles of Machine Tool Design

Developments in machine tools, Types of machine tools, Constructional and Operational Features of basic machine tools e.g. Lathe, Drill, Milling, Shapers and Planers, Grinding machine etc., General requirement of machine tool design, Machine tool design process, Tool wear, Force Analysis

UNIT – II

7L

Machine Tools Drives

Classification of machine tool drives, Group vs Individual drives, Selection of electric motor, A brief review of the elements of mechanical transmission e.g. gear, belt and chain drives, slider-crank mechanism, cam mechanism, nut & screw transmission, Devices for intermittent motion, Reversing & Differential mechanisms, Couplings and clutches, Elements of hydraulic transmission system. e.g. pumps, cylinder, directional control valves, pressure valves etc., Fundamentals of kinematic structure of machine tools.

UNIT – III

7L

Regulation of Speed and Feedrates

Laws of stepped regulation, Selection of range ratio, Standard progression ratio, Selection of best possible structural diagram, Speed chart, Design of feed box, Developing gearing diagrams, Step-less regulation of speed and feed in machine tool, Speed and feed control.

UNIT – IV

8L

Design of Machine Tool Structure

Function of machine tool structures and their requirements, Design criteria for machine tool structures, Selection of material, Basic design procedure for machine tool structures, Design of bed, column and housing, Model technique in design, Design of guide ways and power screws: basic guide way profiles, Designing guide way for stiffness and wear resistance, Hydrostatic and antifricition grand ways, Design of sliding friction power screws, Design of spindle & spindle supports, Layout of bearings, selection of bearings for machine tools.

UNIT – V

8L

Dynamics of machine tools

General procedure for assessing the dynamic stability of cutting process, Closed loop system, Chatter in machine tools. Control Systems: Functions, requirements & types of machine tool controls, Controls for speed & feed change, Automatic and manual Controls, Basics of numerical controls, Machine tool testing: Geometrical tests on Lathe, Milling and Drilling machines, their performance & significance;

3. G.C. Sen and A. Bhattacharya, "Principles of Machine Tools", Second Edition, New Central Book Agency (P) Ltd., Kolkata, 2009

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Advanced Engineering Materials	Course Code: LA8650		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

UNIT – I

8L

Equilibrium and kinetics: stability and metastability, basic thermodynamic function, statistical nature of entropy and kinetics of thermally activated process.

Introduction to crystal structure and crystal imperfections

Radius ratio rule. Diamond cubic structure and structure of graphite

UNIT – II

8L

Diffusion In Solid: Fick's law of diffusion, Solution to Fick's law of diffusion, application of Fick's law, Kirkendall effect, atomic model of diffusion in solid, vacancy and interstitial model of diffusion and the mathematical modeling

Phase transformation: Gibbs phase rule, Lever rule, some typical phase diagram. Nucleation and growth, Nucleation and growth kinetics, growth and overall transformation kinetics, transformation in steel and effect of alloying in steel and in cast iron. Precipitation process, solidification and crystallization, Glass transition, recovery, recrystallization and grain growth. Strengthening mechanism, Hall-Petch relation.

UNIT – III

8L

Plastic deformation: Mechanism of plastic deformation, shear strength of perfect and real crystal, stress required to move a dislocation. Effect of temperature in dislocation motion, multiplication of dislocation during deformation, effect of solute atom and grain size on dislocation motion.

Fracture: Ductile and brittle fracture, Fracture toughness, ductile brittle transition, fracture mechanism map, method of protection against fracture.

UNIT – IV

8L

Composites Polymer – polymer, metal-metal, ceramic–ceramic, ceramic-polymer, metal-ceramic, metal polymer composites. Dispersion reinforced, particle reinforced, laminated and fibre reinforced composites. Mechanical behaviour of polymer, ceramic and composite.

UNIT – V

8L

Elastomers and Miscellaneous types, properties and identifications of different types of rubbers vulcanization, fabrication and forming techniques of rubber. Introduction of plastics and ceramics – types, application and process. Smart materials-introduction and types. Selection of materials and factors affecting deflection, Selection process and systematic evaluation.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Product Design And Development	Course Code: LA8660						
Credit: 3.5	<table style="margin: auto; border: none;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 4 th	Semester: VIII						

UNIT – I

8L

Significance of product design, Need for developing products, product design and development process, the importance of engineering design, sequential engineering design method, relevance of product lifecycle issues in design, the challenges of product development

Product Planning and Project Selection

generic product development process, Identifying opportunities, evaluate and prioritize projects, allocation of resources, various phases of product development-planning for products

UNIT – II

8L

Identifying Customer Needs

Voice of customer, customer populations, Interpret raw data in terms of customers need, hierarchy of human needs, need gathering methods, establish the relative importance of needs

Product Specifications: Establish target specifications, setting final specifications

Concept Generation: Activities of concept generation, clarifying problem, search both internally and externally, explore the output

UNIT – III

6L

Industrial Design: Assessing need for industrial design, industrial design process, management, assessing quality of industrial design, human factors design, user friendly design

Concept Selection: Overview, concept screening and concept scoring, methods of selection, case studies

UNIT – IV

6L

Theory of inventive problem solving (TRIZ): Fundamentals, methods and techniques, General Theory of Innovation and TRIZ, Value engineering Applications in Product development and design, Model-based technology for generating innovative ideas

Concept Testing: Elements of testing: qualitative and quantitative methods including survey, measurement of customers' response

UNIT – V

8L

Intellectual Property: Elements and outline, patenting procedures, claim procedure

Design for Environment: Impact, regulations from government, ISO system, case studies

Credit: 3.5	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 4 th	Semester: VIII						

UNIT – I

10L

INTRODUCTION:

Periodic motion, harmonic motion, superposition of simple harmonic motions, beats, Fourier analysis. Single Degree Freedom System: Free vibration, Natural frequency, Newton's method, Rayleigh method and Energy method for determining natural frequency, Response to an initial disturbance, Torsional vibrations, Damped vibrations. Damping models – Structural, Coulomb and Viscous damping, Vibrations of system with viscous damping, Logarithmic decrement, Viscous dampers

UNIT – II

10L

Single Degree Freedom: Forced vibration, Sources of excitation, Harmonic Excitation with viscous damping, Steady state vibrations, Forced vibrations with rotating and reciprocating unbalance, Support excitation, Vibration Isolation and Transmissibility, Vibration measuring instruments- Displacement, Velocity, Acceleration and Frequency measuring instrument

UNIT – III

6L

Two Degree of Freedom System: Introduction, Principal modes, Double pendulum, Torsional system with damping, Coupled System, Vibration absorbers, Centrifugal pendulum absorber, Dry friction damper, Untuned viscous damper

UNIT – IV

7L

Multidegree of Freedom Systems: Exact Analysis, Undamped free and forced vibrations of multi degree system, Influence coefficients, Reciprocal Theorem, Torsional vibration of multi-rotor system, Principal coordinates, Numerical Analysis - Rayleigh's Method, Dunkerley's formula, Holzer's Method, Stodola's Methods and Rayleigh – Ritz method.

UNIT – V

7L

Critical Speed of Shafts: Shafts with one disc with and without damping, Multi-disc shafts, Secondary Critical speed.

Continuous systems- Longitudinal vibration of bars, Torsional vibrations of Circular Shafts, Lateral vibration of beams.

**Course Structure & Syllabus of
B.Tech – Mechanical Engineering
Applicable for 2013-2017 Batch**

Course Title: Finite Element Methods	Course Code: LA8680		
Credit: 3.5	L	T	P
	3	1	0
Year: 4th	Semester: VIII		

UNIT – I **8L**

Introduction to Finite Difference Method and Finite Element Method, Advantages and disadvantages.

UNIT – II **8L**

Mathematical formulation of FEM, Variation and Weighted residual approaches, Shape functions, Natural co-ordinate system, Element and global stiffness matrix, Boundary conditions, Errors, Convergence and patch test, Higher order elements.

UNIT – III **6L**

Application to plane stress and plane strain problems, Axi-symmetric and 3D bodies, Plate bending problems with isotropic and anisotropic materials, Structural stability, Other applications e.g., Heat conduction and fluid flow problems.

UNIT – IV **6L**

Idealization of stiffness of beam elements in beam-slab problems, Applications of the method to materially non-linear problems, Organization of the Finite Element programmes, Data preparation and Mesh generation through computer graphics, Numerical techniques, 3D problems.

UNIT – V **8L**

FEM, an essential component of CAD, Use of commercial FEM packages, Finite element solution of existing complete designs, Comparison with conventional analysis.

Reference Books:

**Course Structure & Syllabus of
B.Tech – Mechanical Engineering
Applicable for 2013-2017 Batch**

Course Title: Automatic Control	Course Code: LA8690		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

UNIT – I

8L

Introduction to control system, types of control system, applications of control system, transfer function, block diagram analysis, signal flow graphs, introduction to differential equations, mathematical models of physical systems.

UNIT – II

8L

Introduction to Laplace transform, Laplace transform theorems, inverse Laplace transforms and theorems, application of the Laplace Transform to the Solution of Linear Ordinary Differential Equations.

UNIT – III

6L

Feedback characteristics of control systems, control systems and components; Time response analysis: Time Response of linear control systems, the Unit-Step Response and Time-Domain Specification, Steady-State Error, Time Response of a First-Order System, Transient Response of a Second-Order System.

UNIT – IV

6L

Concepts of stability and algebraic criteria; Routh's stability criteria, Root locus technique; basic Properties of Root Loci, properties of the Root Loci, Frequency response analysis, Bode plot and Nyquist stability criteria and Nyquist plot.

UNIT – V

8L

Stability in frequency domain; phase lag, phase lead, Introduction to controller design, PI, PD and PID controller. Introduction to state variable analysis.

Reference books:

1. Ogata, K., "Modern Control Engineering", Prentice Hall, 5th edition, 2010.
2. Kuo, B., "Automatic Control Systems", John Willey and Sons, 8th edition, 2009.

Course Structure & Syllabus of B.Tech – Mechanical Engineering Applicable for 2013-2017 Batch

Course Title: Mechatronics	Course Code: LA8600		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

UNIT – I

8L

Mechatronics-A leading edge technology, Systems, measurement system, control system, microprocessor based controller, Response of systems, automation and Mechatronics application.
Signal conditioning- Wheatstone bridge, digital signal –Analog to digital convertor, digital to analog convertor, data acquisition

UNIT – II

8L

Sensors and transducers – performance terminology, displacement, position and proximity, velocity and motion, force, fluid pressure, temperature, light sensors, selection of sensors.
Actuation system- Mechanical actuations, Pneumatics and Hydraulic actuations system, Electrical actuations systems.

UNIT – III

8L

Microprocessor and microcontrollers- Concept, Microprocessor system, Architecture and instruction sets for 8085, 8051. Difference between Microprocessor and Microcontrollers.
Digital logic – number system, logic gates, Boolean algebra, karnaugh maps, flip flops, decoders, demultiplexers and multiplexers.

UNIT – IV

8L

Programmable logic controllers (PLC)- introduction, basic structure of PLC, input and out modules, programming, ladder diagram for Timers, Internal relay and Counters, Shift registers , Master and Jumps controls, selection of PLC, ladder diagram for sequencing of two and three cylinders.

UNIT – V

8L

Micro-electro mechanical system (MEMS)- introduction, Basic block diagram, material used in MEMS, Manufacturing methods for MEMS like Bulk micromachining, Surface-micro machining and Photolithographic, Application, Advantage.
Industrial Robots- Anatomy of Robots, Robot control system, Robot accuracy and repeatability, law of Robots, End effectors, industrial application, Robots in material handling.

MA8020	Oil & Gas Transportation System	3	1	0	3.5
MA8030	Enhanced Oil Recovery	3	1	0	3.5
	Departmental Elective-II	3	1	0	3.5
MA8110	Project Phase –III	0	0	8	4
	Total				21

List of Departmental Elective-II for VIII Semester:

MA8610	Health, Safety and Environmental Management in Petroleum Operations
MA8620	Oil and Gas Marketing and Resource Management
MA8630	Fuel Technology
MA8640	Carbon Capture and Sequestration

**Course Structure & Syllabus of
B.Tech – Petroleum Engineering
Applicable for 2013-2017 Batch
List of Open Electives (To be conducted in VIII Semester)**

Sl. No.	Branch	Subject Code	Name of Elective subjects
1	Physics	OA8710 OA8720	1. Nano Scale Science and Technology 2. Photonics Technology
2	EE	EA8710 EA8720	1. Non-Conventional Energy Resources 2. Instrumentation and Process control
3	ME	LA8710 LA8720	1. Entrepreneurship development 2. Quality Management
4	Civil	CA8710 CA8720	1. Environment and Ecology 2. GIS
5	CSE	DA8710 DA8720	1. Business Intelligence 2. Artificial Intelligence
6	IT	IA8710 IA8720	1. Multi-Media Technology 2. IT In Business
7	ECE	FA8710	1. Consumer Electronics
8	Humanities	HA8710 HA8720	1. Industrial Psychology 2. Human Values and Ethics
9	MBA	GA8710 GA8730 GA8740	1. Organizational Behavior 2. Digital Marketing 3. Financial Modeling with Spread sheet

Summary of the Credits

Year	Semester	Credit	Year Credit
First Year	I	21	45
	II	24	
Second Year	III	23	49
	IV	26	
Third Year	V	24.5	47
	VI	22.5	
Fourth Year	VII	23.5	44.5
	VIII	21	
Total			185.5

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

A. Evaluation Scheme for the following Courses will be as under:

Course	Evaluation Scheme (%)				
	Attendance	Test-1	Test-2	Final Test	Total
Aptitude Building-1	10	30	30	30	100
Aptitude Building-2	10	30	30	30	100
Value Addition Training	10	30	30	30	100
Soft Skills	10	30	30	30	100

B. Evaluation Scheme for Project will be as under:

Course	Evaluation Scheme (%)				
	Synopsis	Presentation	Report	Viva-Voce	Total
Project Phase-I	10	15	25	50	100
Project Phase-II					
Project Phase-III					

Project Phase-I & II will be evaluated by the Committee comprising of the following:

1. Head of the Department – Chairman
2. Teacher In-charge – Member
3. One nominee appointed by Director (Academic) – Member

Project Phase-III will be evaluated by the Committee comprising of the following:

1. Head of the Department – Chairman
2. Teacher In-charge – Member
3. One nominee appointed by Director (Academic) – Member
4. One nominee appointed by Vice Chancellor – Member

C. Evaluation Scheme for Industrial Training will be as under:

Course	Evaluation Scheme (%)			
	Training Report	Presentation	Monitoring	Total
Industrial Training	25	50	25	100

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Mathematics-I	Course Code: MAT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT I: Matrices

8L

Elementary row and column transformation, rank of matrix, linear dependence, consistency of linear system of equations, Eigen values and Eigen vectors, Cayley-Hamilton theorem.

UNIT II: Differential Calculus

8L

Functions, Limits, Continuity, Differentiability, Leibnitz theorem, Partial differentiation, Euler's theorem, Expansion of functions of several variables, Extrema of functions of several variables, Lagrange's method of multipliers.

UNIT III: Infinite Series

6L

Introduction, sequences, series, convergence, series of positive terms, comparison test, Integral test, D'Alembert's Ratio test, Raabe's test, Cauchy's root test, Alternating series: Leibnitz rule, power series.

UNIT IV: Multiple Integrals

8L

Beta and Gamma functions, Double and Triple integrals, change of order of integration, change of variables, Dirichlet integral and its applications.

UNIT V: Vector Calculus

8L

Point functions, Gradient, Divergence and curl of a vector and their physical interpretation, line integral, surface integral, volume integral, Green's Theorem, Stoke's theorem, Gauss Divergence theorem.

2. E. Kreyszig : Advanced Engineering Mathematics, Wiley publication.
3. R. K. Jain & S. R. K. Iyenger: Advanced Engineering Mathematics, Narosa publication.
4. G. Prasad: Differential & Integral calculus, Pothishala publication, Allahabad.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Physics	Course Code: PYT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT-I

(8) L

Interference:

Introduction, Coherent Sources, Analytical treatment of interference, Young's double slit experiment and its analysis, Conditions of Interference, Fresnel's Biprism, fringes with white light, Determination of wavelength of monochromatic light by using Fresnel's Biprism method, Displacement of Fringes, Interference in plane parallel thin film (reflected and transmitted light) and wedge shaped film(reflected light only), Newton's Rings, Determination of wavelength of monochromatic light and determination of refractive index of a liquid by using Newton's ring method.

UNIT-II

(8) L

Diffraction:

Introduction, Difference between Interference and diffraction, resultant of superposition of n simple harmonic coherent vibrations, Fraunhofer diffraction due to single slit: resultant intensity, conditions of maxima, minima, angular and linear width of central maximum, Double slit diffraction: resultant intensity, missing order, N-slit diffraction : resultant intensity, conditions of maxima and minima, missing orders, angular width of principal maxima, Diffraction grating: formation of spectra and missing order spectra in spectrum, dispersive power of grating, Resolving power, Rayleigh Criterion of resolution, Resolving power of plane transmission diffraction grating.

UNIT-III

(8) L

Polarization:

Polarised and unpolarised light and its pictorial representation, plane of polarisation and plane of vibration, Phenomenon of Double Refraction, positive and negative double refracting crystals, properties of ordinary and extra-ordinary Rays, Nicol Prism and its application as a polariser and analyser, Mathematical analysis of superposition of two linearly polarised light vectors, retardation plates – half wave plate and quarter wave plate, Production and detection of Plane, Circularly and Elliptically Polarized Light.

UNIT-IV

(10) L

Laser : Spontaneous emission, stimulate demission and stimulated absorption, Einstein's A and B Coefficients and relation between them, Principle of Laser Action, Construction and Working of He-Ne, Semiconductor Laser.

Introduction to Fibre Optics: Fundamental ideas about optical fiber, Types of fibers, Acceptance angle and cone, Numerical aperture.

Magnetic Properties of Materials: Basic Concept of Para-, Dia and Ferro-Magnetism, Phenomenon of Hysterisis

Magnetic Circuits: Introduction, magnetomotive force, magnetic field intensity, permeability of free space, reluctance, law governing magnetic circuits.

Superconductivity: Temperature dependence of resistivity in superconducting material, effect of magnetic field (Meissner effect), Type I and Type II superconductors.

UNIT V

(10) L

Wave Mechanics:

Wave Particle Duality, de Broglie Concept of Matter Waves, Davisson and Germer experiment, Concept of wave packet, group and phase velocity, Heisenberg Uncertainty Principle and its applications viz. non existence of electron in nucleus, radius and energy of Bohr's first orbit, Schrödinger time independent and time dependent wave equation, Physical interpretation of wave function, Application of Schrodinger wave equation: Particle in a one dimensional box (eigen function and eigen values).

Science and Technology of Nanomaterial:

Introduction to Nanomaterial, Basic principle of nano science & technology, creation and use of Bulky Balls, structure, properties and use of Carbon nanotubes, applications of nanotechnology.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Reference & Text Books:

- | | | |
|---|---|------------------------------------|
| 1. Concepts of Modern Physics | - | Arthur Beiser (Mc-Graw Hill) |
| 2. Introduction to Special theory of Relativity | - | Robert Resnick - Wiely |
| 3. Fundamentals of Optics | - | Jenkins and White |
| 4. Optics | - | AjoyGhatak (TMH) |
| 5. Optics | - | Brijlal and Subrahmanyam |
| 6. Lasers: Fundamentals and applications | - | K. Thyagarajan, AjoyGhatak |
| 7. University Physics | - | Sears and Zeemansky |
| 8. Principles of Physics | - | Halliday, Resnick&Jearl Walker |
| 9. An Introduction to Quantum Mechanics | - | David. J. Griffith |
| 10. Introduction to Fiber optics | - | AjoyGhatak& K. Thyagarajan (TMH) |
| 11. Optical Fiber Communications | - | Keiser G. |
| 12. Nanomaterials- Synthesis, Properties and Applications | - | Edelstein A. A. and Cammaratta R.C |
| 13. Nanotechnology | - | T. Pradeep (Tata McGraw-Hill) |

PHYSICS LAB (PYP151)

List of Experiments

(At least six)

1. To determine the wavelength of monochromatic light by Newton's ring.
2. To determine the wavelength of monochromatic light with the help of Fresnel's biprism.
3. To determine the focal length of two lenses by nodal slide and locate the position of cardinal points.
4. To determine the specific rotation of cane sugar solution using bi quartz polarimeter.
5. To determine the wavelength of spectral lines using plane transmission grating.
6. To determine the specific resistance of the material of given wire using Carey Foster's bridge.
7. To determine the variation of magnetic field along the axis of a current carrying coil and then to estimate the radius of the coil.
8. To verify Stefan's Law by electrical method.
9. To calibrate the given ammeter using potentiometer.
10. To calibrate the give voltmeter using potentiometer.
11. To determine energy band gap of a given semiconductor material by p-n junction method.
12. To determine the viscosity of water by Poisseuille's method.

Note: Additional experiments may be added based on contents of syllabus.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Essentials of Mechanical Engineering	Course Code: MET101
Credit: 3	L T P 3 0 0
Year: 1st	Semester: I

UNIT – I

9L

Introduction to Engineering: Difference between Science and Technology, history of wheel, introduction to prime movers, transmission system, belt, pulleys, gear system and nomenclature, braking system, Mechanism, lever mechanism, Working principle of power generation system, hydel power plant, thermal power plant and its main components.

Coplanar Force system: Resolution of force in two mutually perpendicular direction Free Body Diagram, Moment, Varignon's theorem, static equilibrium, Lami's Theorem, type of joints/Support, Type of load: point load, uniformly constant and varying loads, beam and its type.

UNIT – 2

7L

Engineering material and their properties: Details of hook's law, Proportional limit, Yield point, Yield Stress, Engineering strain, Engineering stress, True stress and Strain, Plasticity, Elasticity, Allowable Strength, Hardness, Ductility, toughness, Fatigue, creep, strain energy, Impact Strength, Young modulus of Elasticity, Bulk Modulus, Poission Ration and its relation in between.

Stress and strain: Normal stress and strain, principle of Superposition, Deformation in stepped and composite bar.

UNIT – 3

7L

Thermodynamics: Macroscopic & microscopic study point of view, System, Surrounding and Universe, Phase, Property, State, Path, Process, Cyclic and non-cyclic processes, Quasi static process, Reversible and irreversible processes , Thermodynamic equilibrium, Concept of continuum, Energy and its forms, Enthalpy, Zeroth law, Different temperature scales and theory of temperature and Pressure measurement.

UNIT – 4

8L

Laws of thermodynamics: Thermodynamic definition of work, Thermodynamic processes, Calculation of work in various processes and sign convention, Non-flow work and flow work, Joules' experiment, First law of thermodynamics, Internal energy and enthalpy, First law of thermodynamics applied to open systems, Steady flow energy equation and its applications, First law analysis for closed system (non flow processes), Limitations of first law of thermodynamics, PMM-I.

Statement of Second law of thermodynamics: Kelvin Planck's statement and Clausius statement and their equivalence.

UNIT – 5

9L

Power generation: Air standard cycle, IC Engine, Carnot cycle, Otto cycle, Diesel cycle, Important components of I.C.Engine, two stroke and four stoke engine, S.I. and C.I. engines, efficiency of Otto and diesel cycle

Basics of Heat Transfer: Concepts of the mechanisms of heat flows: conduction, convection and Radiation heat transfer application in engineering.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Reference Books:

1. Basu,A.R; A Text book of Engineering Mechanics(Applied Mechanics);2003 Edition; Dhanpat Rai & co.(p) Ltd, Delhi.
2. Chandramouli, P.N; Engineering Mechanics; Second Printing; PHI Learning Private Limited, Delhi; 2013.
3. Rajput, R. K; Material Science; S. K. Kataria & Sons, New Delhi.
4. Dubey, N. H; Engineering Mechanics, Statics and Dynamics; First reprint; McGraw Hill Education (India) Private Limited, New Delhi, 2013.
5. Ratan, S.S; Theory of machines; Second Edition; Tata McGraw Hill Publishing Company Limited, New Delhi.
6. Nag.P.K.; Engineering Thermodynamics; 3rd Edition; Tata McGraw Hill Publishing Company Limited, New Delhi.
7. Nag.P.K.; Heat and Mass Transfer; Tata McGraw Hill Publishing Company Limited, New Delhi.
8. Kumar.D.S; Basic of Mechanical Engineering; S. K. Kataria & Sons, New Delhi.

Essentials of Mechanical Engineering (MEP-151)

List of Experiments

1. Tensile test
2. Impact test
3. Hardness test
4. Pulley experiment
5. Experiment on conduction heat transfer
6. Demonstration of Impulse and reaction turbine
7. Study of 4s and 2S engine petrol Engine
8. Study of 4s and 2S engine Diesel Engine
9. Study of refrigerator and air conditioning

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Professional Communication	Course Code: HMT101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

OBJECTIVES:

- 1) To strengthen the Professional Communication skills of upcoming professionals.
- 2) To make them aware about the new forms and trends of business and technical writings.
- 3) To develop the students' interpersonal skills in order to ensure his / her optimum performance as an employee.
- 4) To prepare students for facing the challenges of their professional lives in an increasingly globalized world.

Unit –I Professional Communication

8 Hours

1. Professional Communication: Interpretation, Process, Forms, Barriers and Overcoming Barriers.
2. Types of Communication-Verbal, Non-Verbal, Oral, Written, Formal, Informal.
3. Communication Levels (Intra personal, Interpersonal, Group, Public communication) and Communication Flow (Downward, Upward, Lateral and Diagonal flow).
4. Technical Writing-Meaning, Types and process of preparing a technical document. Acronyms, Jargons.
5. Understanding and Practice of Paragraph writing-Principles of paragraph writing (unity, coherence and logical development of the ideas)
6. Communication: Impact of internet on communication, communicating through computers.

Unit-II Business Communication

10 Hours

1. Business communication – Meaning, Type and Format.
2. Intra-office communication – Types (Face to Face communication, Telephonic conversation, Letters, Memorandum, E-mails, Notice, Memo, Agenda, Minutes.), advantages and disadvantages. various types of intra-office communication
3. Inter-office communication –Face to Face communication, Telephonic Communication-mails, Letters (Sales, Credit, Enquiry, Quotation, Order, Complaint and Adjustment Letter), advantages and disadvantages of various types of inter-office communication.
4. Job-Application Letter and Resume.

Unit-III Technical Proposal and Report

A. Technical Proposal –Types, Format, Preparation of Proposal .

5 Hours

- **For B.Tech students-**
Technical Proposal to organize a Technical Training Program, to develop new range of products, establish new laboratory, or start a new venture.
- **For B.Pharma students-**
Technical proposal to establish a new laboratory, to create new drug-composition, or to visit a super specialty Hospital.
- **For B.Arch students-**
Technical proposal for an archeological site visit, or to construct new buildings.
- **For MCA students-**
Technical proposal to develop new software, or, to organize an induction program for the new entrants.
- **For MBA students-**
Proposal for establishment of a new department, for a new administrative system, or for new HR policies.

B. Technical Report –Types, Format, Preparation of Report.

5 Hours

- **For B.Tech students-**
Technical Report describing new machinery, a report on the sudden break-down in production unit, Annual Financial Report and market survey report for formulating new market strategy.
- **For B.Pharma students-**

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Technical Report based on the site-inspection of a drug manufacturing unit, Survey report on health awareness and self-medication.

- **For B.Arch students-**

Technical Reports based on a Site Inspection for geographical and geological aspects of a particular location. A report on the archeological survey of a monument.

- **For MCA students-**

Technical Report based on function of new technology (software or hardware), Technical Reports on Client's need for a Payroll management system/ Hospital management system.

- **For MBA students-**

Preparation of Annual Report of the organization, preparation of departmental reports and report based on the study of a successful organization.

Unit-IV Soft-Skills

8 Hours

1. Non-Verbal Communication -Kinesics, Oculistics, Vocalics, Proxemics, Chronemics.
2. Interpersonal Skills, Social-Skills
3. Personality-Meaning and Types, Attitude
4. Self-Management, Emotional Quotient, Time management, and Stress-Management.
5. Image-building / Impression –Management.
6. Leadership and Team-Building and Conflict.

Language-Lab

12 Labs

1. Stress, Intonation and Rhythm.
2. Overcoming Mother-Tongue Influence.
3. JAM session, Debate, Extempore.
4. Role-play, Information Exchange / Gap Activity.
5. Presentation Skills.
6. Group-Discussion Skills.
7. Preparing for interview.

Text Books:

1. Ruby Gupta, Advanced Technical Communication, Cambridge University Press, 2011
2. Ruby Gupta, Basic Technical Communication, Cambridge University Press, 2011.

12. Essentials of Business Communication, Rajendra Pal and J. S Kothari- Sultan Chan

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Computer Fundamental & C Programming	Course Code: CST101		
Credit: 2	L	T	P
	2	0	0
Year: 1 st	Semester: I		

UNIT: 1

5L

Introduction to the Digital Computer (brief description about its components), Characteristics of computer system, Introduction to operating systems(DOS, Linux, Windows), function and types of operating system, Number Systems and conversion methods (Binary, hex, octal), Concept of flow chart, Write & execute the first C programme, C Data Types & Operators.

UNIT 2:

4L

Conditional Program Execution: Applying if-else and nested if-else statements, switch-case statements, restrictions on switch values, use of break & default with switch.

Program Loops & Iteration: Uses of loops (while, do-while and for), use of continue statement.

Function: function prototypes, call by value and call by reference function, recursion.

UNIT 3:

4L

Arrays: Insertion and deletion insingle dimensional array, linear searching, sorting (bubble sort), Strings.

Structures: Purpose and uses of structures, declaring structures, array of structures

TEXT BOOKS:

1. YashwantKanetkar, “Let us C”, BPB Publications, 2nd Edition, 2001.
2. Herbert Schildt, “C:The complete reference”, OsbourneMcgraw Hill, 4th Edition, 2002.
3. P.K. Sinha “Computer Fundamentals” B.P.B Publication

REFERENCE BOOKS:

1. Raja Raman, “Computer Programming in C”, Prentice Hall of India, 1995.
2. Kernighan & Ritchie, “C Programming Language”, The (Ansi C Version), PHI, 2nd Edition.
3. Byron Gottfreid “Schaum's Outline of Programming with C”

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

List of Programs in ‘C’ Lab (CSP-151)

Lab 1	(a) WAP to perform simple arithmetic operations using different data types. (b) WAP to show swap of two no's without using third variable.
Lab 2	(a) WAP to find the roots of a quadratic equation. (b) WAP to check the number is odd or even and find the sum of all odd and all even separately.
Lab 3	(a) WAP to find out whether the given number is prime or not. Find sum of all prime upto N. (b) WAP to reverse a given number and check the palindrome status.
Lab 4	WAP to print corresponding days of a week using switch case.
Lab 5	WAP to find and generate the Armstrong number.
Lab 6	WAP to print pattern triangle like Floyd's, Pascal, pyramid triangle.
Lab 7	(a) WAP to interchange two values using call by value and call by reference. (b) WAP to print factorial of a number using recursion & without using recursion.
Lab 8	WAP to print Fibonacci series. (a) Without using function (b) using function (c) using recursion
Lab 9	(a) WAP to print an array and find greatest/smallest element of an array. (b) WAP to perform linear searching in an array.
Lab 10	(a) WAP to insert/ delete element from an array. (b) WAP to sort the array's element using Bubble sort.
Lab 11	WAP to perform the following string functions. a. Strlen b. strcmp c. strcpy d. strcat e. strlenr f. strupr
Lab 12	Declare a suitable structure of a college and print the name and DOB of the student have scored more than sixty percent marks in end semester exam.
Lab 13	Declare a suitable structure for an organization and print all the names of employees having salary more than Rs.1000.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Graphics	Course Code: CGE151		
Credit: 2	L 1	T 0	P 2
Year: 1st	Semester: I		

UNIT-I

3L

Introduction: Sheet Layout, Types of Sheet, Size of Sheets, Title blocks, Type of lines, Lettering, Dimensioning, Scale (Full, Reduced, Large) Geometrical Constructions

UNIT-II

4L

Projection: Methods of Projection, Planes of Projection, Projection of points, Projection of straight lines, Projection of auxiliary planes, Projection of planes.

UNIT-III

4L

Projection of solids, Sections of solids

UNIT-IV

2L

Development of surfaces

UNIT-V

2L

Isometric Projections

Reference Book:

- 1) Bhatt N. D. & Panchal V. M, "Engineering Drawing", Charotar Publisher, 2007.
- 2) Dhanjay A Jolhe, "Engineering Drawing" Tata-Mc-Garw hill, 2008.
- 3) Gill.P.S "Engineering graphics" S. K. Kataria & Sons, 2009
- 4) John K.C, "Engineering graphics" ,2nd edition, PHI Learning Pvt. Ltd., 2010 .

List of Experiments

1. Introduction to AutoCAD Commands, Explaining need of AUTO CAD over Manual drafting, Simple Drawings.
2. Sheet on Lettering and Geometric construction.
3. Orthographic Projections, Basic problem based on Projection of points.
4. Sheet on Projection of Lines.
5. Sheet on Projection of Planes.
6. Sheet on Projection of Auxiliary Planes.
7. Sheet on Projection of Solids.
8. Development of Surfaces.
9. Sheet on Isometric Projections from orthogonal views.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Maths – II	Course Code: MAT201		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT I: Differential Equations

8L

Linear differential equations, Exact differential equations; Linear differential Equations of nth order with constant coefficients: complementary functions and particular integrals, Euler- Cauchy Homogeneous Linear differential equations, Simultaneous linear differential equations, Solutions of second order differential equations by changing the dependent and independent variables, Method of variation of parameters.

UNIT II: Laplace Transform

8L

Laplace Transform: Existence theorem, Laplace Transform of derivatives and integrals, Laplace Transform of Periodic functions and Unit Step function, Convolution theorem, Applications of Laplace Transform to solve linear and simultaneous differential equations.

UNIT III: Integral Transform

6L

Fourier Integral, Fourier Transform, Fourier Sine and Cosine Transforms and applications to simple Heat Transfer Equations, Z- Transform and its applications to solve difference equations.

UNIT IV: Fourier series

8L

Periodic functions, Fourier series of Periodic functions, Euler's formulae, Functions having arbitrary period, Change of intervals, Even and Odd functions, Half range sine and cosine series.

UNIT V: Partial differential equations and its Applications

8L

Introduction to partial differential equations, linear partial differential equations with constant coefficients of second order and their classification, Method of Separation of Variables for solving Partial Differential Equations, One-Dimensional Wave Equation, One Dimensional Heat Equation.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Computer Programming in C++	Course Code: CST201		
Credit: 2	L 2	T 0	P 0
Year: 1 st	Semester: II		

UNIT – I

4L

Introduction: Introducing Object-Oriented Approach related to other paradigms (functional, data decomposition), Characteristics of Object-Oriented Languages.

Basic terms and ideas: Abstraction, Encapsulation, Information hiding, Inheritance, Polymorphism.

UNIT – II

4L

Classes and Objects: Abstract data types, Object & classes, attributes, methods, C++ class declaration, State identity and behavior of an object, Constructors and destructors, instantiation of objects, Default parameter value, Copy Constructor, Static Class Data, Constant and Classes.

UNIT – III

5L

Inheritance and Polymorphism: Inheritance, Types of Inheritance, Class hierarchy, derivation – public, private & protected, Agrégation, composition vs classification hiérarchies, Polymorphism, Type of Polymorphism – Compile time and runtime, Method polymorphism, Polymorphism by parameter, Operator overloading, Parametric polymorphism, Generic function – template function, function name overloading, Overriding inheritance methods

TEXT BOOKS:

**Course Structure & Syllabus of
B.Tech – Petroleum Engineering
Applicable for 2013-2017 Batch
List of Programs in ‘C++’ Lab**

Lab 1	(a) WAP to print first 10 prime numbers. (b) WAP to demonstrate nested loops. (c) WAP to print reverse of a given number. (d) WAP to read two numbers from keyboard and display the larger one.
Lab 2	(a) Create a class called Employee that includes three pieces of information as instance Variables – a first name (type String), a last name (type String) and a monthly salary (Double) (b) Create a constructor in above class to initialize the three instance variables. Provide a get method for each instance variable. (c) WAP to demonstrate destructors.
Lab 3	(a) Program to implement different types of inheritances like Multiple, Multilevel and hybrid. (b) Write a program in C++ demonstrating the public, protected and private parameters. (c) Write a program in C++ to demonstrate destructor in inheritance. (d) WAP to demonstrate encapsulation property of OOPs.
Lab 4	(a) Write a program that uses a class where the member functions are defined inside a class. (b) WAP that uses a class where member functions are defined outside a class. (c) WAP that uses a class where member functions are defined inside a class. (d) WAP to demonstrate the use of Static Data members.
Lab 5	(a) WAP to demonstrate the use of Dynamic Constructor. (b) WAP to demonstrate the use of function Template. (c) Illustrate and implement the C++ program to initiate the base constructor from derived class constructor.
Lab 6	(a) Write a C++ program to find the largest and smallest element of an array. (b) Create a class Matrix. Implement all possible matrix operations for Matrix type objects by overloading them.
Lab 7	(a) Create 2 classes OM and DB which store the value of distance. DM store distances in meters and cm and DB in feet and inches. Write a program that can read values for the class objects and add 1 object OM with another object of DB. (b) Define a class to represent bank account. Include the following members: Data members 1. Name of depositor. 2. Account number. 3. Type of account. 4. Balance amount in the account. Member functions 1. To assign initial values. 2. To deposit an amount. 3. To withdraw an amount after checking the balance. 4. To display name and balance. Write a main program to test the program.
Lab 8	(a) WAP to demonstrate static class data. (b) WAP to demonstrate the use of Public, Private and protected classes.
Lab 9	(a) WAP to illustrate the concept of call by reference. (b) WAP to illustrate the concept of unary operator overloading. (c) WAP to illustrate the concept of binary operator overloading.
Lab 10	(a) WAP to demonstrate the use of function overloading. (b) WAP using multiple inheritance for collecting employee details.
Lab 11	(a) WAP using function template to find maximum of two Data. (b) WAP to calculate factorial of given number using copy constructor.
Lab 12	(a) WAP to sort five float and integer numbers using template function (use bubble sort). (b) Demonstrate the use of different types of polymorphism.
Lab 13	(a) Write a function to read a matrix of size M × N from keyboard. (b) WAP to implement aggregation concept.

Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT – I

Introduction to Environment and Chemistry

Chemical Evolution, Genesis of Environment, Components of Environment, Layers of atmosphere, Chemical composition and reactions of troposphere, Chemistry of Ozone Layer depletion.

UNIT – II

Water Chemistry

Water quality parameters (Physical, Chemical and Biological), CPCB and WHO standards for water, Measurement of parameters of water quality, Analytical tools for analysis of water quality, alkalinity, hardness and its determination (EDTA method only). Water softening processes – Lime – Soda process, Ion exchange method, boiler feed water, boiler problems-scale, sludge, priming and foaming, caustic embitterment and corrosion, their causes and prevention, Numerical problems on alkalinity and hardness.

UNIT – III

Environmental Pollution

Air Pollution: Types of pollutants, source, effects, sink and control of primary pollutants – CO, NO_x, HC, SO_x and particulates, Photochemical smog, Acid rain and Global warming – Process, National and International efforts to combat it.

Water Pollution: Water quality parameters – (BOD & COD), Classification of pollutants and their sources, waste water treatment – domestic and industrial, Ganga pollution and control.

Soil Pollution: Composition of soil, classification and effects of soil pollutants such as agro-chemicals (pesticides and fertilizer related problems), fly ash and their control.

Integrated Solid Waste Management: Classification of waste, Treatment & Disposal methods (Composting, sanitary land filling, incineration, recycling and reuse).

UNIT – IV

Energy Resources

Conventional Energy Sources – Coal and Petroleum, Refining, Fractional Distillation, Reforming, Cracking, Alkylation, Isomerisation, Hydro treating, Sulphur Recovery, Aromatization, Octane number, Cetane number, Aviation fuel, LPG, CNG, PNG, Energy Crises, Non-conventional Energy Sources – Hydro, Wind, Solar, Nuclear, Geo thermal and Biomass based.

UNIT – V

Eco-friendly Materials

Introduction to ecofriendly products and ECOMARK, Ecofriendly domestic appliances, Green Chemistry and Green Building, Organic foods, Biofuel, Biogas, Lignin, Bioplastics, Light weight plastic composites, Fuel cell, Organic Fuel Cells, hydrogen as a fuel and New lighting technologies: Organic Photo-voltaic, OLED and Organic Transistor.

Text Books:

1. Chemistry in Engineering & Technology (Vol I & II) (Latest ed.) By J.C. Kuriacose & J. Rajaraman, Tata McGraw-Hill Co, New Delhi.
2. Engineering Chemistry by O.G. Palanna, Tata McGraw-Hill Co, New Delhi.

Reference Books:

1. Atkins' Physical Chemistry by Peter W. Atkins and Julio de Paula, Oxford University Press.
2. Principles of Physical Chemistry (Latest ed.) By Puri, Sharma & Pathania.
3. Organic chemistry, Morrison and Boyd, Pearson Prentice Hall, 2011
4. Environmental chemistry, S.E. Manahan, 9th edition, CRC Press.
5. Textbook of polymer science by F.W. Billmeyer, Wiley India.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Introduction to Electrical Engineering	Course Code: EET101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT I – D.C. NETWORK THEORY

Review of basic circuit theory concepts, Mesh and Nodal analysis, Superposition theorem, Thevenin's theorem, Norton's theorem, Maximum power transfer theorem, Star–delta transformation, Magnetic Circuits.

UNIT II – A.C. CIRCUITS & MEASURING INSTRUMENTS

Single Phase A.C.: Phasor representation of voltage and current, A.C. circuit behavior of resistance, inductance, capacitance & their combination in series and parallel, Power triangle, Power factor, Concept of series & parallel resonance.

Three Phase A.C.: Star – delta connections, Relation between line and phase quantities, three phase power and its measurement, What is 3 phase 4 wire and 3 phase 5 wire system?

Measuring Instruments: Construction and principle of voltage and current measuring instruments.

UNIT III – TRANSFORMERS

Principle of operation, Types of construction, Phasor diagram, Equivalent circuit, Efficiency and voltage regulation of single phase transformer, O.C. and S.C. tests.

UNIT IV – D.C. & SYNCHRONOUS MACHINES

D.C. Machines: Construction and working principle of d.c. generator and d.c. motor, Types of d.c. machines, E.M.F. equation, Torque equation, Magnetization and load characteristics, Losses and efficiency, Need of starter in d.c. motors.

Synchronous Machines: Construction and Principle of operation of Alternator and Synchronous Motor.

UNIT V – INDUCTION MOTORS

Three Phase Induction Motors: Principle of operation of 3- ϕ induction motor, Types of 3- ϕ induction motor, Need of starters in 3- ϕ induction motors, Slip – torque characteristics,

Single Phase Induction Motor: Principle of operation of single phase induction motor, Methods of starting of single phase induction motor.

Reference Books

1. V. Del Toro. “Principles of electrical Engineering,” Prentice hall International.
2. W.H. Hayt & J.E. Kemmerly, “Engineering circuit Analysis,” McGraw Hill.
3. I. J. Nagrath, “Basic Electrical Engineering,” Tata Mc. Graw Hill.
4. A. E. Fitzgerald, D.E., Higginbotham and A Grabel, “Basic Electrical Engineering” McGraw Hill.
5. H. Cotton, “Advanced Electrical Technology” Wheeler Publishing.

Basic Electrical Engineering Lab (EEP-151)

(Any Ten)

1. Verification of Network Theorems.
2. Study of diode characteristics. Study of phenomenon of resonance in RLC series circuit.
3. Measurement of power in a three phase circuit by two wattmeter method.
4. Measurement of efficiency of a single phase transformer by load test.
5. Determination of parameters and losses in a single phase transformer by OC and SC test.
6. Study of characteristic of DC Motor.
7. Study of characteristic of AC Motor.
8. DC generator characteristics.
9. 10. Speed control of dc shunt motor.
10. Study running and reversing of a three phase induction motor.
11. Study of a single phase energy meter.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Introduction to Electronics & Communication	Course Code: ECT101
Credit: 3	L T P 3 0 0
Year: 1st	Semester: II

UNIT 1: Fundamental of Semiconductors

10 Lectures

Energy bands in semiconductors, intrinsic and extrinsic semiconductors, Fermi Level in Intrinsic and Extrinsic semiconductor, Carrier transport in semiconductors: diffusion current, drift current, mobility, Hall Effect and resistivity. Generation and recombination of carriers.

UNIT 2: Application of Low Power and High Power Diodes

10 Lectures

Diode circuits: Construction, Junction diode characteristics, Half and full wave rectifiers - Expression for efficiency and ripple factor - Bridge rectifier – π Filter circuits, Clipper, Clamper and multipliers using diodes, Zener Diode Characteristics - Regulated power supply using Zener diode.

UNIT 3: Transistor fundamentals

8 Lectures

Transistor circuits: Characteristics of a transistor in CB, CE and CC modes - Relatively merits - Biasing of Transistors - Load Line and operating point concept (both AC and DC). Construction and working of JFET and MOSFET.

UNIT 4: Digital fundamentals and Introduction to Signals

8 Lectures

Basic logic gates: AND, OR, and NOT – implementation of all gates using Universal gates, Number Systems conversions, Boolean algebra, K-map (upto 4 variables). Source of Information, Types of Signals.

UNIT 5: Basics of Communications & Instrumentation

9 Lectures

Communication Systems, Communication Channels, Need of modulation, Types of modulations (Wave shapes and final expression only), Study of Piezoelectric, PMMC, LVDT and Strain Gauge transducers and their classifications and display device (7 segment) only.

Reference Learning:

Unit 1. Electronics Devices and Circuits, Millman and Halkias, Tata McGraw Hill, 4th ed.

Unit 2 & 3. Electronic Devices and Circuit Theory, Robert L. Boylestad, Prentice Hall Higher Edu., 2000.

Unit 4. Digital Design, Morris Mano, PHI

Unit 4. Modern Digital & Analog Communications, B. P. Lathi, OUP

Unit 5. Electronic Communication Systems, John Kennedy, Tata McGraw Hill, 4th ed.

Unit 5. Electronic Instrumentation - H. S. Kalsi

ECP-151 ELECTRONICS ENGINEERING LAB.

1. To identify and Study of the various component and Devices of electronics with their specification (CRO, Function Generator, Multimeter, Power Supply, resistor, capacitor, inductor, ICs, LED, potentiometer etc.)
2. To study the V-I characteristics of PN diode and Zener diode.
3. To find the efficiency of Rectifiers and ripple factor of capacitive and non-capacitive half wave and full wave rectifier.
4. To Study and Verify clipper and clamper with biased circuits.
5. To find the characteristics of CB and CE amplifiers.
6. Determine the characteristics of FET.
7. To find out the power energy of various periodic and non-periodic signals.
8. To verify the logic gates using diodes.
9. Study and observations of AM & FM Waveforms.
10. Study of various transducers (Strain Gauge).

**Course Structure & Syllabus of
B.Tech – Petroleum Engineering
Applicable for 2013-2017 Batch**

Course Title: Workshop Practice	Course Code: MEP152		
Credit: 2	L 1	T 0	P 2
Year: 1st	Semester: II		

List of Experiments

1. Carpentry: To make a T-Lap joint with soft wood.
2. Arc Welding: To make a Lap joint with mild steel flat by arc welding process.
3. Gas Welding: To make a Lap joint of M.S. sheet with gas welding process.
4. Fitting: To make a plug and socket joint with M.S.flat.
5. Machine Shop: To turn a M.S. rod on lathe to prepare a turning specimen.
6. Sheet Metal: To make a square tray with G.I. sheet.
7. Study of Foundry and Forging tools and equipments.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Basic Surveying	Course Code: CA3230		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: III		

UNIT-I

Introduction: Importance of surveying to engineers. Types and classification of survey. Concept of scale, Symbols & colours, Principles of surveying. Concept of field and office work. Horizontal and vertical control. Units of measurement. Definition of maps and understanding topographical maps of Survey of India.

UNIT-II

Horizontal Control: Operation and use of metric chain and tape. Sources of errors and corrections. Use of ranging rods, cross staff, arrows, pegs etc. Use of prismatic compass and - Surveyor's compass - Bearings - Whole circle and Reduced Bearing - Traversing - Local attraction - Magnetic dip and declination. Plane table survey and accessories- Radiation, intersection and traversing.

UNIT-III

Vertical Control: Definitions of terms used in levelling, different types of levels, adjustments, bench marks. Booking and reducing the levels- rise and fall method and plane of collimation method. Profile levelling- longitudinal and cross sectioning – Plotting. Contouring- definition and characteristics of contours. Uses of contours. Methods of contouring-direct and indirect.

UNIT-IV

Theodolite Survey: Definition – types, principle and fundamental axes. Temporary adjustments. Measurements of horizontal and vertical angles. Method of repetition and Reiteration. Finding out height and elevation of object by single and double plane method. Curves: Simple curve-Elements of simple curves. Designation of a curve. Setting out simple curve Tabulation and setting out of compound curve, reverse curve, transition curve, combined curve and vertical curves.

UNIT-V

Areas and Volumes: General methods for determining areas. Areas from offsets to a base line, area by double meridian distances, coordinates, map measurements and planimeter. Measurement of volume by prismoidal and trapezoidal formula, volume from spot levels and volume from contour plans.

LIST OF EXPERIMENTS

1. Study of different types of maps, their scales, latitude, longitude, colours and symbols.
2. Setting out polygons using prismatic compass & Location of details using compass traversing.
3. Method of radiation and intersection by plane tabling.
4. Two point and three point problem.
5. Finding elevations using dumpy level with change point and using plane of collimation method.
6. Plotting of contours by block levelling.
7. Finding horizontal angle by method of repetition, method of reiteration and measurement of vertical angles.
8. Finding out height and elevation of an object by single plane method.
9. Longitudinal and cross sectioning and plotting using AutoCAD.
10. Setting out simple curves by offsets from long chord & chord produced method.
11. Setting out simple curves by Rankine's deflection angle method.

Text Book:

1. Punmia, B. C., Jain, A. K., "Surveying", Laxmi Publications Pvt. Ltd., New Delhi, Vol. I, 16th Edition, 2005.
2. Punmia, B. C., Jain, A. K., "Surveying", Laxmi Publications Pvt. Ltd., New Delhi, Vol. II, 15th Edition, 2005.
3. Roy, S. K., "Fundamentals of surveying", Prentice Hall of India, New Delhi, 2nd Edition, 2010.
4. Basak, N. N., "Surveying and Levelling", Tata McGraw-Hill Publishing Company Ltd., 2008.

Reference Books:

1. Chandra, A. M., "Plane Surveying", New age International, 2nd Edition, 2006.
2. De, A., "Plane surveying", S. Chand and Company Ltd., 2000.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Mathematics – III	Course Code: JA3010		
Credit: 3.5	L	T	P
	3	1	0
Year: 2nd	Semester: III		

UNIT – 1

10L

Functions of a complex variable:

Analytic functions, Cauchy – Riemann equations, Harmonic functions, Line internal in the complex plane, Cauchy’s integral theorem, Cauchy’s integral formula for derivatives of analytic function.

UNIT – 2

8L

Power series, Taylor’s series Laurent’s series Residue, Poles, Zeros, singularities, Residue Theorem, Evaluation of real integrals of the type

$$\int_0^{2\pi} f(\cos\theta, \sin\theta)d\theta \text{ \& \ } \int_{-\infty}^{\infty} f(x)dx$$

UNIT – 3

8L

Statistical Techniques.

Moments, Moment generating function, skewness, kurtosis, Curve fitting, Method of least square, Fitting of straight lines, Polynomials, Exponential curves etc., Correlation and Regression, Binomial, Poisson & Normal Distribution.

UNIT – 4

8L

Integral Transform.

Fourier integral, Fourier complex transform. Fourier sine and cosine transform, Hankel transform and its application.

UNIT – 5

8L

Series solution of ODE of 2nd order with variable coefficient with special emphasis to differential equation of Legendre and Bessel, Legendre Polynomial, Bessel functions and their properties.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Applied Geology – I	Course Code: MA3210		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: III		

UNIT – 1 **8L**
Origin of Earth, Earth's structure: Core, mantle and crust; geological time scale and geological processes.

UNIT – 2 **8L**
Rock types: igneous, sedimentary and metamorphic process and rocks. Geological markers. Rocks and minerals; properties and identification in hand specimen and under microscope

UNIT – 3 **6L**
Stratigraphy: Litho-stratigraphy, biostratigraphy and Chrono stratigraphy.

UNIT – 4 **8L**
Fossils, mode of preservation and significance stratigraphy of major sedimentary basins in India.

UNIT – 5 **10L**
Structural Geology: Rock-structure types; fault, topography and outcrops. Folds, faults, joints & unconformities; classification and recognition. Igneous intrusion - dykes, Sill and batholith. Significance of structural type in petroleum exploration.

Books:

1. Parbin Singh, "Engineering and General Geology", Katson Publication House, 1987.
2. G.B. Mahapatra, "A text book of Geology", CBS Publisher, 1st edition
3. Marland P. Billings "Structural Geology", Prentice-Hall, 1972 Third edition.
4. John D. Winter, "An Introduction to Igneous and Metamorphic Petrology", Library of Congress Cataloging-in-Publication Data, 2001.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Introduction to Petroleum Operation	Course Code: MA3010						
Credit: 3.5	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 2nd	Semester: III						

UNIT – 1 **6L**
Occurrence of oil and gas in subsurface structures. Geological and geo-physical exploration for oil and gas pools.

UNIT – 2 **10L**
Drilling for oil and gas. Rotary drilling. Rig types and components. Drilling bit types; drill string and circulation system. Well planning; casing cementation. Slant/horizontal wells.

UNIT – 3 **8L**
Casing perforation, well activation. Well head equipment. Production tubing. Well productivity evaluation. Artificial lift methods. Gas lift, plunger lift, Sucker rod pumping etc.

UNIT – 4 **6L**
Surface treatment of oil/gas stream. Oil/gas/water separation, demulsification, storage, rate measurement, transportation.

UNIT – 5 **10L**
Petroleum Reservoir, Reserve estimation, field development, safety and environmental pollution problems. Field treatment of Oil and Gas. Crude oil refining and Natural Gas processing.

Books:

1. Joe Dunn Clegg, Production Operations Engineering, Vol-IV, SPE (Larry W. Lake, Petroleum Engineering Handbook).
2. John R. Fanchi, General Engineering, Vol. I, SPE (Larry W. Lake, Petroleum Engineering Handbook).
3. Bradley H B, Petroleum Engineering Handbook, third edition, SPE, 1992.
4. Warner H R, Emerging and Peripheral Technologies, Vol. VI, Petroleum Engineering Handbook, SPE, 2007.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Physics – II	Course Code: OA3010		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: III		

UNIT – 1

10L

Electromagnetics: Physical significance of gradient, divergence and curl, Ampere's law and displacement current, Maxwell's equations in Integral and Differential forms, Electromagnetic wave propagation in free space: wave equation, wave velocity, transverse nature, intrinsic impedance, Wave propagation in conducting media: wave equation, propagation constant, attenuation constant, skin depth, Poynting vector and Poynting Theorem.

UNIT – 2

10L

Quantum Mechanics:

Applications of Schrödinger time independent wave equations: Particle in 3 dimensional box, Potential well, Potential barrier and tunneling effect, Hydrogen atom, Kronig-Penny model.

UNIT – 3

8L

Crystallography:

Unit cell, space lattice, seven system of crystals, Bravais space lattice (sc, fcc, bcc), packing fraction, coordination number, Miller Indices, Lattice constant, Lattice spacing, lattice planes, Bragg's law of diffraction, Crystal structure, Laue equation

UNIT – 4

8L

Semiconductor Materials:

Group-IV materials, Covalent bond, electron-hole concepts, Basic concepts of energy bands in materials, concept of forbidden gap, Intrinsic and extrinsic semiconductors, donors and acceptors impurities, p-n junction, depletion layer, V-I characteristics, diode resistance, capacitance, zener diode

UNIT – 5

8L

Dielectrics:

Dielectric constant, Dielectric polarization, dielectric susceptibility, Relation between P & E, Types of polarization, temperature and frequency dependence of polarization, ClausiusMossotti, equation, Dielectric loss, Basic concept of piezoelectricity, Ferroelectricity and Pyroelectricity.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Essentials of Mechanical Engineering-II	Course Code: LA3090		
Credit: 3.5	L	T	P
	3	1	0
Year: 2nd	Semester: III		

UNIT – 1

12L

Review of First law of Thermodynamics: its application: fuels & combustion, Theoretical air/fuel ratio, adiabatic temperature, Second Law of thermodynamics & its applications: Heat engine, heat pump/refrigerator, reversible and irreversible processes, criterion of reversibility, Thermodynamics temperature scale, Entropy, calculation of entropy change, Principle of entropy increase, T-S diagram, Second law analysis of control volume. Thermodynamic Potentials, Maxwell relations, Availability, Phase rule.

UNIT – 2

8L

Power generator: Prime moves: Types & Choice, Internal combustion engines, Gas turbine, Factors affecting engine performance, Trouble shooting, Cogeneration & Transmission: Mechanical & Electromagnetic.

UNIT – 3

12L

Mechanics of Solid: Free body diagram, conditions of equilibrium, Friction factor, Force-deformation relationship, Force analysis (axial force, Shear forces, bending moment and twisting moment diagrams), Stress in spherical and cylindrical shells, Thin walled pressure vessels. Concept of stress at a point, Principle stresses, concept of strain at a point, Principle strains, principle of elasticity, plasticity, strain hardening, concept of isotropy, orthotropy, anisotropy, bending of beams, combined stresses, concept of elastic instability, Introduction of column buckling.

UNIT – 4

8L

Engineering Material & Manufacturing: Engineering material special materials (nanomaterials, polymers) and their properties, Introduction to manufacturing process, classification, casting, metal forming, plastic deformation, hot & cold working, bulk deformation process etc

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Fluid Mechanics and Machinery	Course Code: MA4210		
Credit: 4.5	L	T	P
	3	1	2
Year: 2nd	Semester: IV		

- UNIT – 1** **8L**
 Newtonian and non-Newtonian fluids. Incompressible and compressible flow. Two-phase flow. Friction factor estimation. Straight pipe bends, elbows, converging diverging section.
- UNIT – 2** **6L**
 Fluid pressure measurement. Piezometers, Manometers, Flow of fluid in pipes and flat surfaces.
- UNIT – 3** **8L**
 One and two dimensional flow equations. Bernoulli's equation, application, venturimeter, orifice meter. Equivalent length. Slurry transport.
- UNIT – 4** **10L**
 Pumps: Types, reciprocating and rotary pumps, construction details, performance characteristics. Single & multistage operation. Turbine pumps: multistage turbine pumps.
- UNIT – 5** **8L**
 Compressors: Types, Rotary and centrifugal. Single stage and multi stage. Construction details and performance characteristics.

Text Books:

1. Fluid Mechanics; R.K. Bansal.
2. Fluid Flow Operations; K.A. Gavhane; NBP

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Heat Transfer Process	Course Code: MA4220		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: IV		

UNIT – 1 Heat transfer modes: conduction, convection, Radiation.	6L
UNIT – 2 Heat flow through solid and fluid; steady and unsteady heat transfer; heat transfer coefficient.	6L
UNIT – 3 Heat transfer to fluid without and with phase change. Evaporation.	8L
UNIT – 4 Heat exchange equipment: types, construction details. Operating characteristics: shell & tube, double pipe, extended surface heat exchangers. Heat exchange fouling. Remedial action.	12L
UNIT – 5 Pipe still furnace: construction details and operational characteristics.	8L

Text Books:

1. Process Heat transfer; by D.Q Kern, TMH Publication
2. A course in Heat & Mass Transfer; by Domkundwar, Dhanpatrai publication
3. Unit operations of chemical engineering; by McCabe, Smith & Harriot

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Drilling Fluid and Cements	Course Code: MA4230		
Credit: 4.5	L 3	T 1	P 2
Year: 2nd	Semester: IV		

UNIT – 1	8L
Types of drilling fluid: water-base and oil base, components of drilling fluid system: bentonite types and hydration characteristics; properties, sp.gr. viscosity.	
UNIT – 2	6L
Fluid-loss characteristics, filtrate resistively caking characteristics.	
UNIT – 3	8L
Oil-base drilling fluid system; saline mud system. Additives used to control drilling fluid system.	
UNIT – 4	10L
Oil-well cements; composition, cement slurry components, setting and rheological behavior of cement slurry, strength characteristics of set cement-mass additives used to modify cement slurry characteristics.	
UNIT – 5	8L
Cement-slurry preparation and down hole displacement processes and system.	

Text Books:

1. Gatlin C.; Petroleum Engineering, Drilling and Well Completions, Prentice Hall.
2. Azar, J. J., G. Robello Samuel; Drilling Engineering, Penn Well.
3. Drilling Mud and Cement Slurry Rheology Manual; Gulf Publishing Company.
4. Smith.P.K' Cementing' SPE Publications 2nd Edition 1976.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Applied Geology – II (Sedimentary & Petroleum Geology)	Course Code: MA4010						
Credit: 3.5	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="padding: 0 10px;">3</td> <td style="padding: 0 10px;">1</td> <td style="padding: 0 10px;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 2nd	Semester: IV						

UNIT – 1	8L
Sedimentary process: Morphology and textural properties. Sedimentary structure. Important sedimentary groups: sand stone, carbonates.	
UNIT – 2	6L
Sedimentary environment reconstruction. Sequence stratigraphy.	
UNIT – 3	6L
Sedimentology and petroleum exploration. Basin modeling.	
UNIT – 4	10L
Origin of oil source rock and maturation process. Migration of petroleum: mechanism, path, barriers reservoirs rocks and cap rocks.	
UNIT – 5	10L
Petroleum entrapment – process and types. Geology of prospective basins in India: on shore & off-shore.	

Text Books:

1. Sam Boggs. Jr., “Principles of Sedimentology and Stratigraphy”, 5th edition 2011
2. Leveson, “Geology of Petroleum”, 2006.
3. Richard C. Selley., “Elements of Petroleum Geology”, 2nd edition, 1997.
4. Bhagwansahay., “Petroleum Exploration and Exploitation Practices” Allied Publishers, 2001

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Chemical Thermodynamics	Course Code: MA4020		
Credit: 3.5	L 3	T 1	P 0
Year: 2nd	Semester: IV		

UNIT – 1

Compression/expansion of ideal and non-ideal gases. Horse power calculations. Single, double and multi-stage operation.

6L

UNIT – 2

Thermodynamics of Gases and Liquid Hydrocarbons: Force energy, work function, Mollier diagram, perfect and imperfect gaseous mixtures. Equation of state, Law of corresponding states, Joule-Thompson effect, Arrhenius equation, Activation energy, Fugacity and fugacity coefficient, Lewis fugacity rules. Third law of thermodynamics.

10L

UNIT – 3

Solution Thermodynamics: Vapour-liquid equilibria, partial molar properties, chemical potential, Raoult's Law and Henry's Law. ideal and non-ideal solutions, activity and activity coefficients.

8L

UNIT – 4

Gibb's – Duhem equation, Gibb's adsorption equation. Phase rule: Single, two and multicomponent system. Phase behavior, Phase equilibria calculations. Ternary and pseudo-ternary phase diagrams.

8L

UNIT – 5

Fluid flow thermodynamics: multiphase flow in vertical, inclined and horizontal conduits. Pressure traverse and calculation. Thermodynamics of multiphase multi-component system.

8L

Text Books:

1. Introduction to Chemical Engineering Thermodynamics; J M Smith; TMH.
2. Thermodynamics an Engineering Approach; Cengel and Boles.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Oil & Gas Well Drilling Technology and Well Completion	Course Code: MA4030						
Credit: 3.5	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 2nd	Semester: IV						

UNIT – 1 **8L**
 Site selection. Rig selection. Choice of drilling methods. Rotary drilling rig components. Rocks bit types and operational characteristics: Drill string components drill pipe, drill collar, Kelly.

UNIT – 2 **8L**
 Load estimation and choice of material, joint types, casing types and scheme. Stress condition in casing string; design factors. Casing head system. Casing seat selection.

UNIT – 3 **8L**
 Oil-well cement and casing cementation. Cement-slurry design for efficient mud displacement, Cementing quality evaluation: height of the cement, cement bonding with casing and formation.

UNIT – 4 **10L**
 Use of logging methods for quality assessment; cement bond log. Formation isolation testing. Formation drill-ability; factor affecting; load on bit, rotational rpm; drilling fluid characteristics.

UNIT – 5 **6L**
 Well orientation survey. Well deflection; direction determination and presentation

Books:

1. Drilling Engineering-A complete well planning approach; Neal J. Adams; PennWell publishing Company; Tulsa, Okhlama.
2. Drilling Well Completions; Carl Gatlin, PHI
3. Applied Drilling Engineering; Adam T. Bourgyne Jr., Keith K. Milheim; SPE
4. Casing design theory and practice; S.S. Rahman, G.V. Chilingarian; Elsevier

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Engineering Economics	Course Code: GC5010		
Credit: 2	L 2	T 0	P 0
Year: 3 rd	Semester: V		

UNIT – I

8L

Time value of money, simple interest vs. compound interest, cash flow diagrams, future value and compounding, present value and discounting, uneven cash flow and annuity, calculate present worth, future worth and annual worth, discounted cash flow valuation, effective interest rate, annual percentage rate, multi period interest, continuous compounding, capital recovery and sinking fund model.

UNIT – II

6L

Analysis of public Projects: Use and situations for equivalent annual worth comparison, Comparison of assets of equal and unequal life. Benefit/ Cost analysis, quantification of project, cost and benefits, benefit/ cost applications, Cost –effectiveness analysis.

UNIT – III

6L

Investment Decisions: Techniques of capital budgeting, payback period, discounting payback period, NPV Vs IRR comparison Rate of return, internal rate of return, comparison of IIR with other methods, IRR Misconceptions.

UNIT – IV

6L

Indian capital Market: Structure, efficiency and forms of capital market efficiency, Primary market and capital market, Exposure on trading of various types of security instruments i.e. Equity shares, Mutual funds etc.

Reference Books:

1. Horn gren, C.T., **Cost Accounting**, Prentice Hall of India
2. White, **Engineering Economics**, Wiley India
3. Riggs, J.L., Dedworth, Bedworth, D.B, Randhawa, S.U., **Engineering Economics**, McGraw Hill International Edition, 1996
4. Rustagi R.P. - GalgotiaPublications
5. **Contemporary Engineering Economics**, Third Edition by Chan S. Park, 2002, Prentice Hall.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Elements of Reservoir Engineering	Course Code: MA5210		
Credit: 4.5	L 3	T 1	P 2
Year: 3rd	Semester: V		

UNIT – 1

8L

Reservoir rock properties: Porosity, Permeability; evaluation. Parallel and series bed systems. Fluid saturation, effective and relative permeability, wettability, capillary pressure characteristics; evaluations and significance.

UNIT – 2

10L

Reservoir Fluid System: Volumetric and phase behavior of multi-component oil/ gas system. Formation volume factor for oil and gas, viscosity, reservoir fluid sampling, PVT properties: measurement, estimation and application.

UNIT – 3

8L

Fluid flow through Porous media: Darcy's law, single and multi-phase system, linear, radial and spherical flow, steady and unsteady state flow. Flow through fracture, GOR and WOR equations.

UNIT – 4

6L

Reservoir pressure determination: Pressure measurement techniques, Bottom hole pressure gauges, determination of reservoir pressure, significance.

UNIT – 5

8L

Reservoir drives: Depletion, water drive, gas cap drive, combination drive, recovery factor. Reserve estimation: Resource and reserve, SPE classification of reserve, Volumetric reserve estimation.

Books:

1. Reservoir Engineering Handbook, Tarek Ahmed
2. Applied Petroleum Reservoir Engineering, B.C. Craft & M. Hawlone
3. Fundamentals of Reservoir Engineering by L.P. Dake, Shell learning & development, Elsevier publication

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Unit Operation	Course Code: MA5220		
Credit: 4.5	L 3	T 1	P 2
Year: 3rd	Semester: V		

UNIT – 1	8L
Momentum, heat and mass balance in multi-component system, heat transfer process: Modes of heat transfer, heat flow through solid and fluid steady and unsteady state heat transfer.	
UNIT – 2	6L
Heat transfer coefficient: conductive, convective and overall-heat transfer to fluid with phase change.	
UNIT – 3	8L
Heat exchange equipment and their performance characteristics.	
UNIT – 4	6L
Mass transfer and application. Phase equilibrium, diffusion and inter-phase mass transfer.	
UNIT – 5	12L
Mass transfer processes: distillation, absorption, extraction, stage and continuous contact mass transfer units – plate column, packed bed and fluidized bed.	

Books:

1. Unit Operations of Chemical Engineering; Warren L. McCabe; MHIE
2. Mass Transfer Operations; Robert. E. Treybal; MHB.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Petroleum Production Operation – I	Course Code: MA5010		
Credit: 3.5	L	T	P
	3	1	0
Year: 3rd	Semester: V		

UNIT – 1

Production well equipment: tubing heads, Christmas tree valves and chokes, flow tubing and flow line performance. **8L**

UNIT – 2

Self-flow well characteristics, productivity and GOR, fluid production handling system, group gathering station, layout separation system. **8L**

UNIT – 3

Artificial-lift methods of production: continuous gas-lift and intermittent gas lift: principle, system and performance. **10L**

UNIT – 4

Sucker rod pumping methods: system characteristics, plunger and rod stress conditions. **8L**

UNIT – 5

Dynamometer system and applications, down hole pumping system. **6L**

Books:

1. Production Operations Vol.- 1 & Vol. 2, Thomas O. Allen & Alan P. Roberts.
2. Surface production Operation Vol.-1 & Vol. 2, Ken Arnold & Maurice Stewart
3. Well Completion and Servicing, D. Perrin, Editions Technip
4. The Technology of Artificial Lift Methods, Vol, 1, Kermit E. Brown, H. Dale Beggs

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Petroleum Exploration Methods	Course Code: MA5020		
Credit: 3.5	L	T	P
	3	1	0
Year: 3rd	Semester: VI		

A. Geological and geo-chemical methods:

UNIT – 1 **7 L**
Surface indication of oil/gas accumulation. Accumulation parameters; Regional and local structures. Time of generation vis-à-vis accumulation.

UNIT – 2 **7 L**
Geochemical methods of prospecting: Soil-chemical survey, source-rock characterization; Hydro-geochemistry as exploration tool. Plate tectonics and hydrocarbon accumulation.

UNIT – 3 **6 L**
Geological exploration processes: Sequence of operation. Field development: Prognostication of reserve.

B. Geophysical exploration methods and their significance

UNIT – 1 **5 L**
Magnetic survey – survey instruments Geo-magnetic anomalies, field methods, Data correction and reduction. Anomaly interpretation. Response for different type of geological structures.

UNIT – 2 **5 L**
Gravity method: Units, Measuring instruments, Gravity anomaly, Data correction and reduction. Free-air and bouguer anomalies. Anomaly interpretation. Application.

UNIT – 3 **10 L**
Seismic methods: Type, Methodology of refraction profiling. Field survey arrangements. Recoding instruments. Data correction, special shooting methods: Fan and broadside. Data interpretation and application in identification of structures. Reflection seismograph and seismogram relative advantage over refractive survey. Common depth point profiling and stacks time correction. Well seismic methods. Vertical seismic profiling. Interpretation. 3D data acquisition and interpretation, application of reflection survey.

Books:

1. Allen P A and J R Allen, Basin Analysis: Principles and Applications, Second edition, Wiley Blackwell, 2005
2. Beacons, M, Simm, Rabd Redshaw, T. 3D Seismic Interpretation. Cambridge University Press, 2003. 212 pp.
3. Coffeen J. A., "Interpreting Seismic Data Workbook", Penn Well Books, 1984.
4. Dobrin M. P. and Savit C. H., "Principles of Geophysical Prospecting", 4th Edition, McGraw Hill Publishing Company, 1988.
5. Tedesco S. A., "Surface Geochemistry in Petroleum Exploration" Chapman and Hall Publishing, 1993.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Computer Based Numerical Techniques	Course Code: JA5210		
Credit: 4.5	L	T	P
	3	1	2
Year: 3rd	Semester: V		

UNIT – 1

8L

Introduction to numerical computing; Approximations and Errors in numerical computations; Truncation and Round off errors; Propagation of errors; Root finding: Bisection method; Regula-falsi method; Iteration method; Newton Raphson method; Rate of convergence of above methods.

UNIT – 2

10L

Matrix algebra; Solution of simultaneous linear algebraic equations: Gauss elimination; Gauss Jordan method; LU Decomposition method; Jacobi method; Gauss Seidel method.

UNIT – 3

10L

Interpolation and Extrapolation: Finite differences; Difference table; Newton's forward and backward interpolation formula; Divided differences and Newton's divided difference formula; Numerical differentiation; Numerical integration: Trapezoidal; Simpson's rules and Weddle's formula.

UNIT – 4

6L

Numerical solution of O.D.E.: Taylor series method; Euler's method; Modified Euler's method;

UNIT – 5

6L

Forth order Runge-Kutta methods; Multistep methods: Milne's method; Adams Bashforth method.

Text Books:

- S.S. Sastry, **Introductory Methods of Numerical Analysis**, 4th edition, PHI learning Pvt. Ltd, 2005.
- M.K Jain, S.R.K Iyengar and R.K Jain, **Numerical Methods for Scientific and Engineering computation**, 4th Edition, New age International Publishers, 2003.

Reference Books:

- B. S. Grewal, **Numerical Methods in Engineering and Science**, (9th Edition), Khanna Publishers, New Delhi, India, 2010.
- Curtis F. Gerald and Patrick O. Wheatley, **Applied Numerical Analysis**, 7th Edition, Pearson Education Lt, 2009.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Principles of Management	Course Code: HA5010						
Credit: 2	<table style="margin: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">2</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	2	0	0
L	T	P					
2	0	0					
Year: 3 rd	Semester: VI						

UNIT – 1	6L
Introduction to Management	
Theories of management: Traditional behavioral, contingency and systems approach. Organization as a system.	
UNIT – 2	5L
Management Information	
Interaction with external environment, Managerial decision making and MIS.	
UNIT – 3	5L
Planning Approach to Organizational Analysis	
Design of organization structure; Job design and Enrichment; Job evaluation and merit rating.	
UNIT – 4	6L
Leading and Control	
Theories of motivation, Leadership styles and managerial grid.	
UNIT – 5	5L
Co-ordination, Monitoring and Control in organizations. Techniques of Control. Japanese management techniques.	
Minor Project: Submission of 15 pages of Case Studies on above.	

Suggested Books:

1. Peter Drucker, Harper and Row: The Practice of Management.
2. Koontz H, Wehrich, H. Essentials of Management, *Tata McGraw-Hill Education*, 2006.
3. Schermerhorn, John R. Management and Organisational Behaviour Essentials, Wiley India, 2005
4. Staner: Management, PHI Learning
5. Hirschey. Managerial Economics, Cengage Learning, 2009.
6. Chhabra, A. Principle of Management, Sun India publication , 2012

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Petroleum Production Operation – II	Course Code: MA6010		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: VI		

UNIT – 1 Extraneous Gas and water entry in to well bore; source identification and control measures.	6 L
UNIT – 2 Sand production and control: Sand control techniques, produced sand analysis, gravel size selection, gravel-packing fluid and gravel packing techniques.	10 L
UNIT – 3 Well work-over problems, rig selection, Rigless work-over, coiled tubing system. Work-over fluid design. Planning and economics.	10 L
UNIT – 4 Oil and gas separation process optimization, separation system.	8 L
UNIT – 5 Crude oil storage; underground gas storage. Effluent treatment and disposal.	6 L

Books:

1. Thomas O. Allen & Alan P. Roberts, Production Operations Vol.- 1 & Vol. 2.
2. Ken Arnold & Maurice Stewart, Surface Production Operation Vol.-1 & Vol. 2, Second Edition, Gulf Publishing Company, 1986.
3. D. Perrin, Editions Technip, Well Completion and Servicing.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Formation Evaluation	Course Code: MA6020		
Credit: 3.5	L	T	P
	3	1	0
Year: 3rd	Semester: VI		

UNIT – 1 **4 L**

Direct methods: core evaluation, mud and cutting analysis and significance.

UNIT – 2 **10 L**

Indirect Methods: SP log: principles and application, Resistivity logs: principles; electrodes systems: Normal, lateral, latero logs; Non-electrode system: Induction log; principles and application.

UNIT – 3 **8 L**

Resistivity departure curves: Origin and application. Acoustic logs: Ultrasonic wave velocity propagation through formation and relevant factors: Wave amplitude and relevant factors; CBL.

UNIT – 4 **8 L**

Radioactivity Logs: Natural gamma-ray and neutron-log: Principles, system and application. Special logging methods: Casing inspection tools, formation micro scanner, NMR log. Logging high angle wells.

UNIT – 5 **10 L**

Interpretation and analysis: Formation types, thickness and sequence construction; fluid saturation determination. Standard interpretation methods. Cross-plotting methods; neutron-density, sonic density, clean and shaly sand interpretation.

Books:

1. Bhagwansahay., “Petroleum Exploration and Exploitation Practices” Allied Publishers, 2001.
2. Richard C. Selley., “Elements of Petroleum Geology”, 2nd edition, 1997

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Applied Petroleum Reservoir Engineering	Course Code: MA6030		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: VI		

UNIT – 1

6 L

Gas, gas-condensate and oil reserves: Identification from fluid composition, production characteristics. Reservoir drive mechanics.

UNIT – 2

8 L

Material balance equation: generalized and specific form for different drive systems. Drive-type identification. Rock and fluid compressibility factor; Recovery factor estimation.

UNIT – 3

6 L

Performance prediction; water influx estimation. Drive-Index: reservoir pressure maintenance, choice and system.

UNIT – 4

10 L

Immiscible displacement process: Fractional flow and fractional displacement process in linear reservoir. Buckley and Leverett treatment. Reservoir water flood performance.

UNIT – 5

10 L

Oil and gas field development: Injection-Production wells distribution patterns and characteristics. Optimum well spacing from techno economic analysis of field performance. Well and field production rate estimation, investment and operational cost, profitability estimation.

Books:

1. Oil & Gas Field development, Dr. Santkumar
2. Reservoir Engineering Handbook, Tarek Ahmed
3. Petroleum Reservoir Engineering, James.W. Amyx

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Petroleum Refining and Petrochemicals	Course Code: MA6040		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: VI		

UNIT – 1	Crude oil evaluation, choice of crude types for a product mix.	6 L
UNIT – 2	Distillation system: pipe still heater, distillation column, heat exchangers condenser, reflux control, pressure control; vacuum distillation system.	8 L
UNIT – 3	Other refining processes: Cracking, reforming, alkylation, isomerization, hydro-processing.	8 L
UNIT – 4	Specialty products: Lube oil production, propane de-asphalting, solvent extraction, dewaxing, coke and carbon black production.	8 L
UNIT – 5	Petro-chemical feed stock: BTX, olefins: method ethane and butane treated products from natural gas. Storage and safety measures: Floating roof tanks, spherical storage vessels; fire safety measures.	10 L

Books:

1. Mall I.D. "Petrochemical Process Technology", Macmillan India Ltd, 2007
2. Gary J.H. and Handework G.E., "Petroleum Refining Technology and Economics", Marcel Dekker, Inc., 1984.
3. B.K. Bhaskara Rao, 'Modern Petroleum Refining Processes', Fifth Edition, Oxford and IBH Publishing Co. Pvt. Ltd. (2007)

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Oil and Gas Well Testing	Course Code: MA6050		
Credit: 3.5	L	T	P
	3	1	0
Year: 3rd	Semester: VI		

UNIT – 1 **6 L**
Drill stem testing, RFT, Wire-line Testing: System. Interpretation.

UNIT – 2 **6 L**
Flow of compressible fluid through porous media; Unsteady state, semi-steady state fluid flow equations, diffusivity equation. Solution techniques.

UNIT – 3 **10 L**
Pressure-transient tests: pressure draw-down, build-up test, interpretations; skin factor.

UNIT – 4 **8 L**
Multi-rate test, Reservoir limit test, Injection and fall-off test, interference testing, pulse testing.

UNIT – 5 **10 L**
Type curves: generation and interpretation. Gas well testing, fractured wells, dual porosity reservoirs.

Books:

1. Pressure buildup and flow tests in wells; C.S. Mathews and D.G. Russel; Vol-1; SPE
2. Gas Reservoir Engineering; John Lee, Robert A. Wattenbarger; Vol-5; SPE
3. Advances in Well Testing; Robert C. Earlougher; Vol-5; SPE

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Petroleum Engineering System Design	Course Code: MA7010		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

UNIT – 1 **10 L**
Choice of well profile: drill string and casing design. Rig choice for load and installed power for a drill well.

UNIT – 2 **8 L**
Design of cementing operation for a drilling. Specification of casing head and well head system.

UNIT – 3 **6 L**
Specification of optimum separation process and system for a given type of oil production.

UNIT – 4 **6 L**
Design of sucker-rod pumping production system.

UNIT – 5 **8 L**
Design of gas-lift production system for continuous and intermittent gas-lift systems.

Books:

1. Well Performance; Michael Golan; Norwegian university of science and technology.
2. Production optimization; H. Dale Beggs; OGCI and Petroskills publications.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Reservoir Simulation	Course Code: MA7020		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

UNIT – 1

6 L

Model types: Physical, analog and mathematical. Single-phase, multi-phase in one, two and three dimension mathematical model for reservoir fluid flow. Grid blocks and Grid orientation.

UNIT – 2

6 L

Model Equations: Black oil and composition models. Pseudo functions. Data Preparation: Rock, fluid, mechanical, production and validation

UNIT – 3

10 L

Solution Techniques: Analytical and numerical methods, explicit and implicit methods of discretization, finite-difference and finite element method, linearization, solution of simultaneous equations.

UNIT – 4

8 L

Stability criteria, Iterative methods, IMPES & IMPIS methods. Numerical dispersion. Grid and time step size selection. History matching: Manual and automated system Reservoir performance using simulation approach.

UNIT – 5

10 L

Simulating special processes: Compositional simulation, Miscible displacement, chemical and polymer flooding, thermal recovery processes.

Books:

1. Basic Applied Reservoir Simulation by T. Ertenim, J.H Abou-kassem and G.R. King, SPE Text book series.
2. Notes on reservoir simulation, Institute of Petroleum Engineering, Herriot-watt University.
3. Principles of Applied Reservoir Simulation, by J.R.Fanchi, Gulf Publication.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Off-Shore Drilling & Production Practices	Course Code: MA7030		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

UNIT – 1 **6 L**
Sea states and weather: Meteorology, oceanography. Sea-bed soil condition. wave condition. Wave- structure interaction.

UNIT – 2 **8 L**
Off-shore structures: Fixed platform, jack-up rig: design and operational features mobile units; semi-submersible, floating structures, description and installation, station keeping, mooring and dynamic positioning system.

UNIT – 3 **8 L**
Off-shore drilling: Well head and sea floor connection; conductor and riser. Off-shore well completion: Platform and subsea completion system, well control and work-over system.

UNIT – 4 **8 L**
Sub-sea technology in deep water – use of divers and robots. Off-shore production: Platform oil and gas processing, water and gas injection system.

UNIT – 5 **10 L**
Storage for oil; SPM & SBM system. Deep water technology: use of remote operating vehicle (ROV).

Books:

1. Offshore Structures: Design Construction and Maintenance, Mohamed A El-Reedy, Gulf professional Publication
2. Handbook of Offshore Engineering Volume I and II, Elsevier, 2006, 1213 pp. by Chakraborty S.K.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Well Simulation	Course Code: MA7040		
Credit: 3.5	L	T	P
	3	1	0
Year: 4th	Semester: VII		

UNIT – 1 **8 L**
 Chemical Properties of Oil-bearing formations and fluids; Rock composition & mineralogy, clays, surface charge, charge exchange capacity, formation water, crude oils.

UNIT – 1 **8 L**
 Physical properties of formation materials: Mechanical properties and Thermal properties.
 Chemical and Mechanical properties of injected fluids: polymer solution. Entry hole dia. Perforating for Hydraulic fracturing.

UNIT – 1 **8 L**
 Hydraulic Fracturing: Dynamic fracture Geometry: Orientation, vertical, horizontal and penny-shaped. Fluid loss, fracture conductivity. Proppant fracturing, Acid fracturing.

UNIT – 1 **10 L**
 Well Productivity; design and optimization of fracturing processes. Acidization: Methods, Rates of reaction, Sand Stone Acidization. Design consideration in Matrix acidizing.

UNIT – 1 **6 L**
 Designing Matrix acidizing in carbonates. Acid additives. Sand Control: Gravel Packing. Sand consolidation.

Books:

1. Well completion and servicing , D. Perrin
2. Reservoir stimulation by Ahmed S. Abou-Sayed
3. Petroleum Production systems by Michael J. Economides, A Daniel Hill & Christine Ehlig Economides
Prentice Hall Publication

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Non-Conventional Petroleum Resources (Elective-I)	Course Code: MA7610		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

UNIT – 1

10L

Introduction and present status of coal bed methane. Formation and properties of coal bed methane. Thermodynamics of coal bed methane. Drilling, completion and logging of coal bed methane wells.

UNIT – 2

8L

Hydro-fracturing of coal bed methane seam. Production, installation and surface facilities. Well operation and production equipments. Treating and disposing produced water. Testing of coal bed methane wells.

UNIT – 3

10L

Introduction and present status of gas hydrates. Formation and properties of gas hydrates. Thermodynamics of gas hydrates. Phase behavior of gas hydrates. Kinetics of gas hydrates. Drilling and completion of gas hydrates wells. Prevention and control of gas hydrates.

UNIT – 4

6L

Gas hydrates accumulation in porous media. Gas extraction from gas hydrates. Uses and applications of gas hydrates.

UNIT – 5

8L

Introduction and present status of shale gas. Formation and properties of shale gas. Drilling and completion of shale gas. Uses and applications of shale gas. Prevention and control of shale gas. Environmental issues in shale gas exploration. Future prospects of shale gas

Books:

1. Coal Bed Reservoir Gas –in Place Analysis; Matt Mavor, Charles R. Nelson; Gas Research Institute.
2. A guide to Coal Bed Methane Reservoir Engineering; Jerrald L. Saulsberry; Paul S. Schafer; Gas Research Institute

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Material Technology (<i>Elective-I</i>)	Course Code: MA7620		
Credit: 3.5	L	T	P
	3	1	0
Year: 4th	Semester: VII		

UNIT – 1

6L

Properties and behavior of materials useful in structure, machines and equipments, atomic arrangements and imperfections elasticity, micro elasticity and phase transformation. Theories of corrosion and corrosion and method of corrosion control.

UNIT – 2

8L

Theory of alloying, constitutional diagrams, their construction and applications. Cast iron as material of construction with reference to its application, selection of material, general criterion of selection of material of construction in process industries.

UNIT – 3

10L

Materials of construction and their technology with reference to application in industry mild steel, high carbon steel, stainless steel, high silicon steel, molybdenum and tungsten steel, heat treatment of plane steel.

UNIT – 4

6L

Nonferrous metals – copper, aluminum, lead, chromium, tin, brass, bronze and monel

UNIT – 5

8L

Non-metals – Glass, Enamels, graphite, wood, plastics, rubber, ebonite lining materials, composite materials: fiber reinforced plastic composite material, concrete, asphalt and asphalt mixture, ceramic mixture and silicates, structure and properties, polymeric material.

Books:

1. Material Science and Technology; John Willy.
2. Engineering Materials Technology; James A. Jacobs.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Polymer Technology (Elective – I)	Course Code: MA7630		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

UNIT – 1

6L

Introduction to polymer science Classification of polymer structure Molecular weight, Chemical structure & Thermal transition.

UNIT – 2

8L

The synthesis of high polymers Step-growth polymerization. Chain growth polymerization. Polymerization techniques, Reactions of synthetic polymers, special topics in polymer, synthesis, Chemical structure determination.

UNIT – 3

10L

Solution & solid-state properties, Viscosity & Rubber elasticity.

UNIT – 4

6L

Degradation, stability & environmental issues, polymer additives, blends & composites.

UNIT – 5

8L

Commodity thermoplastics & fibers elastomers & thermosets engineering & speciality polymers.

Books:

1. Ebewele Outlines of Polymer Technology; R. Sinha.
2. Polymer Science and Technology; P. Ghosh.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Directional Drilling (Elective – I)	Course Code: MA7640		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VII		

UNIT – 1 **6L**
Objectives, Types of deflection tools, tool orientation, Directional well profiles, Well path deflection & correction.

UNIT – 2 **8L**
Positive displacement motors and Turbo-drills - motor description, Power calculation and applications. Auto-track and verti-track system. Rotary Steerable motors, Geo-steering tools.

UNIT – 3 **8L**
Horizontal well objectives and selection, Different profiles, Drilling techniques, Mud requirements & characteristics, casing and drill string requirements and completion programs.

UNIT – 4 **8L**
Slant Hole Drilling: Objectives and selections, Well profiles and applications. Down the Hole Well Surveying: Well surveying objectives, surveying methods, Surveying Analysis methods and calculations for well coordinates.

UNIT – 5 **10L**
Objectives of MWD/ LWD, MWD tools, Telemetry system and data interpretation. Directional Drilling Problems and Their Remedies.

Books:

1. Introduction to Directional Drilling; Raymond de Verteuil and Iain McCourt; Schlumberger.
 2. Drilling Engineering-A complete well planning approach; Neal J. Adams; PennWell publishing Company; Tulsa, Okhlama.
- Well Engineering and Construction; Hussan Rabia.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Natural Gas Engineering	Course Code: MA8010		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

UNIT – 1 **6L**
Natural Gas industry: Size and direction of development. Physical properties of natural gas and associated gas; compressibility; thermal properties.

UNIT – 2 **6L**
Flow of gas in well tubing. Pws, Pwf, Pwh equations. Gas flow measurement: orifice meter, turbine meter, principles and performance.

UNIT – 3 **10L**
Natural Gas processing: Free-liquid removal, low temperature separation, Dehydration process: chemical and refrigeration system.

UNIT – 4 **10L**
Natural Gas sweetening: Amine process, sulphur recovery, LPG, CNG production. Natural Gas liquefaction (NGL): Process, system, storage, transportation and utilization.

UNIT – 5 **8L**
Underground storage; system and production performance. Special problems: Natural gas hydrates. CBM, in-situ coal gasification.

Books:

1. Fundamentals of Natural Gas Processing; L.L.Faulkner. Natural Gas Engineering Handbook; Guo and Ghalambor.
2. Fundamentals of Natural Gas Processing; L.L.Faulkner.
3. Natural Gas Engineering Handbook; Guo and Ghalambor.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Oil and Gas Transportation System	Course Code: MA8020		
Credit: 3.5	L 3	T 1	P 0
Year: 4th	Semester: VIII		

- UNIT – 1** **6L**
 Road and rail transport of crude oil & product. Tanker design, safety features.
 Oceanic transport of oil and liquefied natural gas: design of ocean going tankers and safety features.
- UNIT – 2** **8L**
 Pipe line transport of oil and gas: Route selection, pipe line construction process and equipment: trenching, aligning, connecting pipes, corrosion protection, lowering & back filling.
- UNIT – 3** **8L**
 Flow of oil and gas through pipelines. Pressure drop calculation, types, sizing and location of pumps and compressor. Instrumentation and control.
- UNIT – 4** **8L**
 Flow measurement and control arrangement. Corrosion in pipelines: Types, chemical and electro-chemical process; coating, cathodic protection principle and design.
- UNIT – 5** **10L**
 Pipe line branching: Gas distribution control. Offshore pipe line: Sag and overbend; stinger and riser, under-water welding.

Books:

1. Pipeline engineering by Henry Liu, Lewis Publishers Washington, D.C.
2. Piping and pipeline engineering, George A. Antaki, Marcel Dekker Inc. New York
3. Fundamentals of pipeline engineering by J. Vincent Genod, Technip Editions.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Enhanced Oil Recovery Techniques	Course Code: MA8030		
Credit: 3.5	L	T	P
	3	1	0
Year: 4th	Semester: VIII		

UNIT – 1 **6L**
Principles and Mechanism. Screening criteria, Macroscopic displacement of fluids: Areal sweep efficiency. Vertical sweep efficiency Displacement efficiency, mobility ratio, well spacing.

UNIT – 2 **8L**
Water flooding in reservoir: Equation of motion. Continuity, solution methods, Pattern flooding, recovery etc., permeability heterogeneity.

UNIT – 3 **10L**
Chemical flooding: Polymer flood; mobility control in-situ permeability modification, foam flooding; WAG process. Surfactant flooding, miscellar/polymer flooding, micro emulsion phase behavior, wettability modification, Alkaline flooding.

UNIT – 4 **8L**
Miscible displacement processes – miscibility condition, high pressure gas injection, enriched gas injection, LPG flooding, carbon dioxide flooding, alcohol flooding.

UNIT – 5 **8L**
Thermal Recovery processes: Hot water flooding, steam flooding, cyclic steam injection, in-situ combustion, air requirement; combustion front monitoring, microbial oil recovery.

Books:

1. Bradley H B, Petroleum Engineering Handbook, third edition, SPE, 1992.
2. Lake L., “Enhanced Oil Recovery”
3. Green D W and Willhite G P, “Enhanced Oil Recovery”, SPE, 2003, 556 pp
4. Enhanced Oil Recovery; Teknica; Teknica Petroleum Services Ltd.; Calagry, Alberta.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Health, Safety and Environmental Management in Petroleum Operations (Elective-II)	Course Code: MA8610						
Credit: 3.5	<table style="margin: auto; border: none;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="padding: 0 10px;">3</td> <td style="padding: 0 10px;">1</td> <td style="padding: 0 10px;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 4th	Semester: VIII						

UNIT – 1

8L

Health hazard: Toxicity, physiological, asphyxiation, respiration and skin effects. Effect of sour gases (H₂S and CO) on human health. Effect of corrosive material and atmosphere during sand control, fracturing and acidization operations.

UNIT – 2

10L

Safety analysis: Operational risk in drilling, production and handling of oil and gas, fire hazard: safety system in drilling, production operations. Manual and automatic shutdown systems, blow down systems. Gas leakage, fire detection and suppression systems. Hazard and failure mode analysis: safety analysis: disaster and crisis management.

UNIT – 3

8L

Environment Health and Safety Management. Impact of oil and gas on air, water and soil pollution, impact of drilling and production operations, offshore problems, oil-spill control. Environmental impact assessment. Waste treatment & management methods, effluent water treatment and disposal. Contaminated soil remediation.

UNIT – 4

8L

Noise pollution and remediation measure. Industrial Accident & Prevention: Safety sampling, Accident and Safety Audit; Legal requirements, Disaster Planning and control. Safety in offshore operations.

UNIT – 5

8L

Gas detection, fire detection and suppression, personal protection measures. Occupational Physiology: Respiratory and skin effect. HSE regulations; oil mines regulations.

Books:

1. OrzuOrszulik, “Environmental Technology in oil Industry”, Springer –Verlag, 1996.
2. Reis, J.C., “Environmental control in Petroleum Engineering”, Gulf publications.1998.
3. Boyce, A., “Introduction to Environmental Technology”, John Wiley and Sons, 1996

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Oil & Gas Marketing and Resource Management (<i>Elective-II</i>)	Course Code: MA8620						
Credit: 3.5	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 4 th	Semester: VIII						

UNIT – 1

8L

Introduction: The development of Oil & Gas Industry, Structure of Oil & Gas Industry, Introduction to Indian Oil & Gas Industry, India hydrocarbon vision 2050. Petroleum resource classification, Analysis of resource management.

UNIT – 2

8L

Natural Gas: What is Natural Gas, Measuring Natural Gas, Pipeline quality Natural Gas. Demand, Supply & Storage of Natural Gas: Gas Production, Sources of demand in India, Supply system, Pipeline operations & network, Storage of Natural Gas, Liquefied Natural Gas Plant & Operations, Gas Scale pattern in India, Gas regulations in India, Gas trading, gas pricing.

UNIT – 3

8L

Coal Bed Methane: Introduction, Present status of Coal Bed Methane, CBM storage and scale, CBM pricing in India. Crude Oil: Crude oil specification, measuring/Custody transfer of crude Oil, Crude Oil transportation, Crude Oil production in India, Crude Oil Refineries, products from Crude Oil.

UNIT – 4

8L

International & National Institutions of Oil & Gas: OPEC, OECD, OADB, DGH, PNGRB, CHT, PII, PPAC, PCRA. Petroleum Contracts: NEPL- Role & Background, Types of Contracts and fiscal components, production sharing contracts in India, Crude Oil trading and pricing, CBM Contracts and Shale Gas Contracts.

UNIT – 5

8L

Trade Practices & Taxation: Norms on various trade practices, Elements of Petroleum Development Policy, Financial and taxation issues.

Risk Management: source of risk, managing risks by risk reduction, diversification, and uncertainty and decision analysis by decision tree.

Books:

1. Petroleum Economics and Engineering by Abdel A. A., Bakr A. B, and Al Sahlawi M. A., Decker Publications, 1992
2. IFP, Oil and Gas Exploration and Production, Reserves, Costs and Contracts. Technip Publication 2007.336 pp.
3. Petroleum Exploration and Production Rights by SilvanaTordo and D Johnston, World Bank Working Paper 179, Washington, 2010.

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Fuel Technology (<i>Elective-II</i>)	Course Code: MA8630		
Credit: 3.5	L	T	P
	3	1	0
Year: 4th	Semester: VIII		

UNIT – 1 **10L**
 Classification of Fuel- Solid Fuels, Liquid Fuels, Gaseous Fuels. Various Terms Related to the Study of Fuels and Combustion. Coal-Origin, Composition, Petrography. Analysis and Properties of Coal. Classification of coal.

UNIT – 2 **8L**
 Coal Preparation, Coal Storage, Coal Carbonization and by-product Recovery. Physical and Chemical Properties of Coke. Briquetting of Solid Fuels. Liquefaction of Solid Fuels.

UNIT – 3 **10L**
 Coal: A Source of Energy- Gasification of Coal. Fixed Bed Gasification, Fluidized Bed Gasification, Entrained Bed Gasification. Integrated Gasification Combined Cycle (IGCC). Underground Gasification of Coal. Indian Scenario related to Coal Gasification. Coal to Liquid (CTL) via Fischer – Tropsch (F-T) Synthesis.

UNIT – 4 **6L**
 Gaseous and Liquid Fuels- Natural gas, Producer gas, Water gas, Carbureted Water gas, Coal gas, Gases from biomass, LPG. Gasoline, Kerosene, Diesel. Physico-Chemical Properties and Testing of Liquid Fuels. Coal Tar Fuels (CTF).

UNIT – 5 **8L**
 Combustion: General Principle of Combustion. Combustion of Solid Fuels – Grate Firing and Pulverized Fuel Firing System. Combustion of Liquid Fuels. Burners for Liquid and Gaseous Fuels Combustion.

Books:

1. Kuo, K.K., Principles of Combustion, John Wiley and Sons, Inc. (2005).
2. Sarkar, S., Fuels and Combustion, Orient Longman, (1990).
3. Sharma, S.P., and Chander, M., Fuels and Combustion, Tata Mcgraw Hill (1984).

Course Structure & Syllabus of B.Tech – Petroleum Engineering Applicable for 2013-2017 Batch

Course Title: Carbon Capture and Sequestration (<i>Elective-II</i>)	Course Code: MA8640		
Credit: 3.5	L	T	P
	3	1	0
Year: 4th	Semester: VIII		

UNIT – 1

Introduction: Scope, Objectives and Necessity of CCS

6L

UNIT – 2

The contribution of fossil fuels emission to Climate change and global warming. Concept of Carbon Credit and carbon footprint.

8L

UNIT – 3

Carbon capture techniques: Carbon-di-oxide emission, Scrubbing of CO₂, Carbon dioxide recycling

6L

UNIT – 4

Carbon dioxide sequestration: Underground storage, Potential for Geologic Storage, Application in Oil and gas industry, Carbon di oxide flooding projects, Methane recovery projects.

10L

UNIT – 5

Strategy for implementing CCS technology: Modelling of Cost and Performance of CCS Plants. Role and function of IPCC

8L

Books:

1. Carbon Capture; Jennifer Wilcox; Springer
2. Capturing Carbon – The new weapon in the War Against Climate Change; Mills, Robin M.; Columbia University Press.

List of Open Electives (To be conducted in VIII Semester)

Sl. No.	Branch	Subject Code	Name of Elective subjects	Credit
1	Physics	OA8710 OA8720	1. Nano Scale Science and Technology 2. Photonics Technology	3
2	EE	EA8710 EA8720	1. Non-Conventional Energy Resources 2. Instrumentation and Process control	3
3	ME	LA8710 LA8720	1. Entrepreneurship development 2. Quality Management	3
4	Civil	CA8710 CA8720	1. Environment and Ecology 2. GIS	3
5	CSE	DA8710 DA8720	1. Business Intelligence 2. Artificial Intelligence	3
6	IT	IA8710 IA8720	1. Multi-Media Technology 2. IT In Business	3
7	ECE	FA8710 FA8720	1. Consumer Electronics	3
8	Humanities	HA8710 HA8720	1. Industrial Psychology 2. Human Values and Ethics	3
9	MBA	GA8710 GA8730 GA8740	1. Organizational Behavior 2. Digital Marketing 3. Financial Modeling with Spread sheet	3

Course Structure & Syllabus of Open Electives Applicable for 2013-2017 Batch

Course Title: Nano Scale Science and Technology	Course Code: OA8710		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

UNIT 1

Historical perspective of nano science and technology, types of nanotechnology and Nano machines, top-down and bottom-up techniques, molecular nanotechnology, atomic manipulations – nano dots, self-assembly, dip pen nanolithography, simple details of characterization tools – SEM, TEM, STM, AFM.

UNIT 2

Nano materials: preparation of nano-materials, PVD, CVD, sol-gel techniques, electro deposition, ball milling, natural nano-materials, application of nanomaterials – insulating materials, machine tools, polymers, batteries, high power magnets and medical implants.

UNIT 3

New form of carbon, carbon nanotubes, single walled carbon nanotubes (SWNTs), multiple walled carbon nanotubes (MWNTs), graphenes, fullerenes, nano wires and nano rods (fabrication methods and their applications).

UNIT 4

Nanophotonics and solar energy: Metamaterials & Plasmonics, Photonic crystals, Silicon photonics and Photovoltaics.

UNIT 5

Nanofabrication: Introduction, tools of micro and nano fabrication, optical and electron beam lithography, molecular beam lithography, quantum electronic devices, simple ideas about Nano computers.

Applications: Micro Electro Mechanical system (MEM), Nano Electro Mechanical system (NEM), Robots, Nanomachines.

Course Structure & Syllabus of Open Electives Applicable for 2013-2017 Batch

Course Title: Photonics Technology	Course Code: OA8720		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

Unit I: Integrated Optics

Step-index and graded-index waveguides, guided and radiation modes. Strip and channel waveguides, electro-optic waveguide devices. Directional couplers, optical switch; phase and amplitude modulators, filters, etc.

Unit II: Fiber Optics

Introduction, The optical fiber, the numerical aperture, Step and graded index multimode fibers, Pulse dispersion in step index fibers, Scalar wave equation and modes of a fiber, Multimode fibers, Single mode fibers, Splice loss etc.

Unit III: Nonlinear Optics

Introduction, Self focusing phenomenon, simple SHG, Nonlinear frequency up conversion, Single-pass SHG and SFG, Resonator-enhanced SHG, parametric amplification and SFG.

Unit IV: Fabrication of Photonic Devices

Material selection for various applications, Fabrication of integrated optical waveguides and devices. Waveguide characterization, end-fire and prism coupling; grating and tapered couplers. Fabrication techniques for various kinds of Photonic structures, such as Waveguide structures.

Recommended Books:

- Ajoy Ghatak & K. Thyagarajan, "Optical Electronics", Cambridge University Press
- A.K.Ghatak & K.Thyagarajan, "Introduction to Fiber Optics", Cambridge University Press.
- M. J. Adams, "An Introduction to Optical Wave guides", John Wiley & Sons.
- Hiroshi Nishihara, Masamitsu Haruna, "Optical Integrated Circuits", McGraw Hill Professional.
- William P Risk, Timothy R. Gishell, "Compact Blue-Green Lasers", Cambridge Univ. Press.
- Saleh & Tiech, "Fundamentals Of Photonics", (2012), John Wiley, New York.
- B.B. Laud, "Non-Linear Optics",
- Vijayan (IIT Madras), Non-Linear Optics

Course Structure & Syllabus of Open Electives Applicable for 2013-2017 Batch

Course Title: Non-Conventional Energy Resources	Course Code: EA8710						
Credit: 3	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 4th	Semester: VIII						

Unit I: Introduction Various non-conventional energy resources- Introduction, availability, classification, relative merits and demerits, present energy scenario.

Unit II: Solar Cells - Theory of solar cells. Solar cell materials, solar cell power plant, limitations. Solar Thermal Energy Solar radiation flat plate collectors and their materials, applications and performance, focusing of collectors and their materials, applications and performance; solar thermal power plants, thermal energy storage for solar heating and cooling, limitations.

Unit III: Geothermal Energy - Resources of geothermal energy, thermodynamics of geo-thermal energy conversion-electrical conversion, non-electrical conversion, environmental considerations. Magneto-hydrodynamics (MHD) Principle of working of MHD Power plant, performance and limitations.

Unit IV: Fuel Cells - Principle of working of various types of fuel cells and their working, performance and limitations. Thermo-electrical and thermionic conversions, Principle of working, performance and limitations.

Wind Energy: Wind power and its sources, site selection, criterion, momentum theory, classification of rotors, concentrations and augments, wind characteristics. Performance and limitations of energy conversion systems.

Unit V: Bio-mass - Availability of bio-mass and its conversion theory.

Ocean Thermal Energy Conversion (OTEC) - Availability, theory and working principle, performance and limitations.

Wave and Tidal Wave - Principle of working, performance and limitations. Waste Recycling Plants

Text Books:

1. D.S. Chauhan, "Non-Conventional Energy Resources", New Age International
2. B.H. Khan, "Non-Conventional Energy Resources", Tata McGraw Hill

Reference Books:

1. Andra Gabdel, "A Handbook for Engineers and Economists".
2. A. Mani, "Handbook of Solar radiation Data for India".
3. Peter Auer, "Advances in Energy System and Technology". Vol. 1 & II Edited by Academic Press.
4. F.R. the MITTRE, "Wind Machines" by Energy Resources and Environmental Series.
5. Frank Kreith, "Solar Energy Hand Book".
6. N. Chermisinogg and Thomes, C. Regin, "Principles and Application of Solar Energy".
7. N.G. Calvert, "Wind Power Principles".
8. W. Palz., P. Chartier and D.O. Hall, "Energy from Biomass".

Course Structure & Syllabus of Open Electives Applicable for 2013-2017 Batch

Course Title: Instrumentation and Process control	Course Code: EA8720		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

UNIT – 1

Transducer – I

Definition, advantages of electrical transducers, classification, characteristics, factors affecting the choice of transducers, Potentiometers, Strain gauges, Resistance thermometer, Thermistors, Thermocouples, LVDT, RVDT

UNIT – 2

Transducer – II

Capacitive, Piezoelectric Hall effect and opto electronic transducers. Measurement of Motion, Force pressure, temperature, flow and liquid level.

UNIT – 3

Telemetry

General telemetry system, land line & radio frequency telemetering system, transmission channels and media, receiver & transmitter. Data Acquisition System: Analog data acquisition system, Digital data acquisition system, Modern digital data acquisition system.

UNIT – 4

Display Devices and Recorders

Display devices, storage oscilloscope, spectrum analyzer, strip chart & x-y recorders, magnetic tape & digital tape recorders.

Recent Developments: Computer aided measurements, fibre optic transducers, microprocessors, smart sensors, smart transmitters.

UNIT – 5

Process Control

Principle, elements of process control system, process characteristics, proportional (P), integral (I), Derivative (D), PI, PD and PID control modes. Electronic, Pneumatic & digital controllers.

Text Books:

1. A.K.Sawhney, “Advanced Measurements & Instrumentation”, DhanpatRai& Sons
2. B.C. Nakra&K.Chaudhry, “Instrumentation, Measurement and Analysis”, Tata McGraw Hill 2nd Edition.
3. Curtis Johns, “Process Control Instrumentation Technology”, Prentice Hall

Reference Books:

4. E.O. Decblin, “Measurement System – Application & design”, McGraw Hill.
5. W.D. Cooper and A.P. Beltried, “Electronics Instrumentation and Measurement Techniques”, Prentice Hall International
6. RajendraPrasad, “Electronic Measurement and Instrumentation Khanna Publisher
7. M.M.S. Anand, “Electronic Instruments and Instrumentation Technology” PHI Learning.

Course Structure & Syllabus of Open Electives Applicable for 2013-2017 Batch

Course Title: Entrepreneurship Development	Course Code: LA8710		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

Unit-I

Entrepreneurship- definition. Growth of small-scale industries in developing countries and their positions vis-a-vis large industries; role of small-scale industries in the national economy; characteristics and types of small-scale industries; demand based and resources-based ancillaries and sub-control types. Government policy for small scale industry; stages in starting a small-scale industry.

7

UNIT -II

Project identification- assessment of viability, formulation, evaluation, financing, field-study and collection of information, preparation of project report, demand analysis, material balance and output methods, benefit cost analysis, discounted cash flow, internal rate of return and net present value methods.

8

UNIT -III

Accountancy- Preparation of balance sheets and assessment of economic viability, decision making, expected costs, planning and production control, quality control, marketing, industrial relations, sales and purchases, advertisement, wages and incentive, inventory control, preparation of financial reports, accounts and stores studies.

9

UNIT -IV

Project Planning and control:

The financial functions, cost of capital approach in project planning and control. Economic evaluation, risk analysis, capital expenditures, policies and practices in public enterprises. Profit planning and programming, planning cash flow, capital expenditure and operations. control of financial flows, control and communication.

9

UNIT -V

Laws concerning entrepreneur viz, partnership laws, business ownership, sales and income taxes and workman compensation act. Role of various national and state agencies which render assistance to small scale industries.

7

Text / Reference Books:

1. Forbat, John, "Entrepreneurship" New Age International.
2. Havinal, Veerbhadrapa, "Management and Entrepreneurship" New Age International
3. Joseph, L. Massod, "Essential of Management", Prentice Hall of India.

Course Structure & Syllabus of Open Electives Applicable for 2013-2017 Batch

Course Title: Quality Management	Course Code: LA8720		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

Unit - I

Introduction: Need for quality, Evolution of quality, Definition of quality, Dimensions of manufacturing and service quality, Basic concepts of TQM, Definition of TQM, TQM Framework, Contributions of Deming, Juran and Crosby, Barriers to TQM.

Unit – II

Process Control & Product Control, Concept of control charts, variables & attributes control chart for variables & attributes Acceptance Sampling and Sample Plans

Unit - III

Concept of reliability, maintainability and availability. Bath tub curve, MTTF, MTTR, Zero Defect

Unit - IV

The seven traditional tools of quality, New management tools, Six-sigma: Concepts, methodology, applications to manufacturing, service sector including IT, Bench marking. Reason to bench mark, Bench marking process, FMEA, Stages, Types. Deming Cycle, 5S Techniques, Kaizen

Unit - V

Quality circles, Quality Function Deployment (QFD), Taguchi quality loss function, TPM – Concepts, Concept of Cost of Quality

Text Book:

1. Dale H. Besterfield, et al., “Total Quality Management”, Pearson Education Asia, Third Edition, Indian Reprint (2006).

Reference Books:

1. Quality Management by Kanishka Bedi -Oxford University press First Edition 2008
2. James R. Evans and William M. Lindsay, “The Management and Control of Quality”, 6th Edition, South-Western (Thomson Learning), 2005.
3. Oakland, J.S. “TQM – Text with Cases”, Butterworth – Heinemann Ltd., Oxford, 3rd Edition, 2003.
4. Suganthi, L and Anand Samuel, “Total Quality Management”, Prentice Hall (India) Pvt. Ltd., 2006.
5. Janakiraman, B and Gopal, R.K, “Total Quality Management – Text and Cases”, Prentice Hall (India) Pvt. Ltd., 2006.
6. Total Quality Management by Shri Dhara Bhatt K.

**Course Structure & Syllabus of
Open Electives
Applicable for 2013-2017 Batch**

Course Title: Environment & Ecology	Course Code: CA8710		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

Unit I

Environment

Environment and its components, pollution of environment by human activity, kinds of pollution.

Unit II

Water Quality

Measure of water quality, water quality standards, water treatment; waste water transport and treatment, sludge treatment and disposal.

Air Quality

Sources and effects of air pollution, major air pollutants, air quality control, treatment of emissions, dispersion of air pollutants.

Unit III

Solid waste

Collection of refuse, removal and transport, disposal of refuse.

Noise Pollution

Effect of noise on human health and its control.

Unit IV

Ecology

Ecology and Ecosystems, concept of ecological imbalances, physical and climate factors, biotic components, energy and material flows in ecosystems, human influence on ecosystems.

Unit V

Conservation of Natural Resources

water resources, mineral resources, agricultural and forestry resources, agriculture soil and need of nutrients, fertilizers and pesticides. Brief introduction about environmental legislation and environmental audit.

Books Recommended:

1. Vesilind, " Introduction to Environmental Engineering," Thomson Asia Pvt. Ltd. Singapore.

Course Structure & Syllabus of Open Electives Applicable for 2013-2017 Batch

Course Title: GIS	Course Code: CA8720		
Credit: 3	L	T	P
	3	0	0
Year: 4th	Semester: VIII		

Unit I

Definition of GIS, Cartography and GIS, GIS database: spatial and attribute data; Spatial models: Semantics, spatial information, temporal information, conceptual models of spatial information, representation of geographic information: point, line and area features, topology,

Unit II

Raster and vector data, raster to vector data conversion, map projection, analytical transformation, rubber sheet transformation, manual digitizing and semi-automatic line following digitizer; Remote sensing data as an input to GIS data;

Unit III

Attribute database: scale and source of inaccuracy; GIS functionality; data storage and data retrieval through query, generalization, classification, containment search within a spatial region;

Unit IV

Overlay: arithmetical, logical and conditional overlay, buffers, inter visibility, aggregation; Network analysis;

Unit V

Applications of GIS in planning and management of utility lines and in the field of environmental engineering, geotechnical engineering, transportation engineering and water resources engineering.

Books Recommended:

1. Geographic Information Systems: A Management Perspective, by Stan Arnoff, WDL Publications.
2. Fundamentals of Spatial Information Systems by Robert Laurini and Derek Thompson, Academic Press.
3. Geographical Information Systems, Vo. I and II edited by Paul Longley, M.F. Goodchild, et.al, John Wiley and Sons, Inc. 1999

Course Structure & Syllabus of Open Electives Applicable for 2013-2017 Batch

Course Title: Business Intelligence	Course Code: DA8710						
Credit: 3	<table style="width: 100%; border: none;"> <tr> <td style="width: 33%;">L</td> <td style="width: 33%;">T</td> <td style="width: 33%;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 4th	Semester: VIII						

UNIT I: (8 L)

Introduction to Business Intelligence:

Introduction to OLTP and OLAP, BI Definitions & Concepts, Business Applications of BI, BI Framework, Role of Data Warehousing in BI, BI Infrastructure Components – BI Process, BI Technology, BI Roles & Responsibilities

UNI -II: (8 L)

Basics of Data Integration (Extraction Transformation Loading):

Concepts of data integration need and advantages of using data integration, introduction to common data integration approaches, introduction to ETL using SSIS, Introduction to data quality, data profiling concepts and application

UNIT-III: (8 L)

Introduction to Multi-Dimensional Data Modeling,

Introduction to data and dimension modeling, multidimensional data model, ER Modeling vs. multi-dimensional modeling, concepts of dimensions, facts, cubes, attribute, hierarchies,

UNIT –IV: (8 L)

Star and snowflake schema, introduction to business metrics and KPIs, creating cubes using SSAS

Unit V: (8 L)

Basics of Enterprise Reporting:

Introduction to enterprise reporting, concepts of dashboards, balanced scorecards, introduction to SSRS Architecture, enterprise reporting using SSRS

Courseware & Reference Books:

The courseware including PowerPoint and notes are available for the Elective. In addition, following reference books can also be used:

1. Business Intelligence by David Loshin
2. Business intelligence for the enterprise by Mike Biere
3. Business intelligence roadmap by Larissa Terpeluk Moss, ShakuAtre
4. Successful Business Intelligence: Secrets to making Killer BI Applications by CindiHowson
5. Delivering business intelligence with Microsoft SQL server 2008 by Brain, Larson
6. Foundations of SQL Server 2005 Business Intelligence by Lynn Langit
7. Information dashboard design by Stephen Few

Course Structure & Syllabus of Open Electives Applicable for 2013-2017 Batch

Course Title: Artificial Intelligence	Course Code: DA8720						
Credit: 3	<table style="width: 100%; border: none;"> <tr> <td style="width: 33%;">L</td> <td style="width: 33%;">T</td> <td style="width: 33%;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 4th	Semester: VIII						

UNIT 1 **(8L)**

Introduction: History of AI, Intelligent agents – Structure of agents and its functions, Problem spaces and search - Heuristic Search techniques – Best-first search, Problem reduction -Constraint satisfaction - Means Ends Analysis.

UNIT 2 **(8L)**

Knowledge Representation: Approaches and issues in knowledge representation, Knowledge Based Agent, Propositional Logic, Predicate logic – Unification – Resolution, Weak slot – filler structure, Strong slot - filler structure.

UNIT 3 **(8L)**

Reasoning under uncertainty: Logics of non-monotonic reasoning, Implementation, Basic probability notation, Bayes rule, Certainty factors and rule based systems, Bayesian networks, Dempster - Shafer Theory, Fuzzy Logic.

UNIT 4 **(8L)**

Planning and Learning: Planning with state space search, conditional planning, continuous planning, Multi-Agent planning. Forms of learning - inductive learning – Reinforcement Learning - learning decision trees - Neural Net learning and Genetic learning

UNIT 5 **(8L)**

Advanced Topics: Game Playing: Minimax search procedure - Adding alpha-beta cutoffs.

Expert System: Representation - Expert System shells - Knowledge Acquisition. CASE STUDY- Dendral, Mycin.

Swarm Intelligent Systems – Ant Colony System, Development, Application and Working of Ant Colony System.

Text Books:

1. Elaine Rich, Kevin Knight and Shivashankar B. Nair, “Artificial Intelligence”, Tata McGraw-Hill, 3rd edition, 2009. (UNITs I, II, III & V)
2. Stuart J. Russell and Peter Norvig, "Artificial Intelligence: A Modern Approach", Pearson Education Asia, 2nd edition, 2003. (UNIT IV)
3. N. P. Padhy, “Artificial Intelligence and Intelligent System”, Oxford University Press, 2nd edition, 2005. (Unit V)

Reference Books:

1. Rajendra Akerkar, “Introduction to Artificial Intelligence”, Prentice-Hall of India, 2005.
2. Patrick Henry Winston, “Artificial Intelligence”, Pearson Education Inc., 3rd edition, 2001.
3. Eugene Charniak and Drew Mc Dermott, “Introduction to Artificial Intelligence”, Addison-Wesley, ISE Reprint, 1998.
4. Nils J. Nilsson, “Artificial Intelligence - A New Synthesis", Harcourt Asia Pvt. Ltd., Morgan Kaufmann, 1988.

Course Structure & Syllabus of Open Electives Applicable for 2013-2017 Batch

Course Title: Multimedia Technologies	Course Code: IA8710		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

UNIT 1 **(8L)**

Introduction: Introduction to Multimedia, Multimedia Information, Multimedia Objects, Multimedia in business and work, Stages of Multimedia Projects, presentation tools, tools for object generations, video, sound, image capturing, authoring tools, card and page based authoring tools.

UNIT 2 **(8L)**

Multimedia Building Blocks: Text, Sound MIDI, Digital Audio, audio file formats, MIDI under windows environment Audio & Video Capture.

UNIT 3 **(8L)**

Data Compression: Introduction to data compression, Compression ratio, loss less & lossy compression, Huffman Coding, Shannon Fano Algorithm, Huffman Algorithms, Adaptive Coding, Arithmetic Coding, Finite Context Modelling, Dictionary based Compression, Sliding Window Compression, LZ77, LZ78, LZW compression.

UNIT 4 **(8L)**

Image, Audio and Video Compression: Digital Audio concepts, Sampling Variables, Loss less compression of sound, loss compression & silence compression, lossy graphic compression, image file formatic animations Images standards, JPEG Compression, ZigZag Coding, Multimedia Database. Content based retrieval for text and images, Video Compression, MPEG standards, MHEG Standard Video Streaming on net.

UNIT 5 **(8L)**

Advanced forms of interaction in Multimedia: Video Conferencing, Elements of (immersive/non-immersive) Virtual Reality, Augmented Reality, Telepresence, Mobile technologies **Multimedia Security:** Overview- Multimedia Systems, Secured Multimedia, Digital Rights Management Systems and Technical trends, Multimedia Encryption and Digital Watermarking, Security Attacks and Multimedia Authentication.

SUGGESTED BOOKS:

1. Tay Vaughan "Multimedia, Making IT Work" Osborne McGraw Hill.
2. Buford "Multimedia Systems" Addison Wesley.
3. Mark Nelson "Data Compression Book" BPB.

Course Structure & Syllabus of Open Electives Applicable for 2013-2017 Batch

Course Title: IT in Business	Course Code: IA8720
	L T P
Credit: 3	3 0 0
Year: 4 th	Semester: VIII

UNIT – 1

Business Drivers, IT's Competitive Potential Strategic, Alignment Strategic Management and Competitive Strategy ; Enterprise-wide and Inter-Organizational System, Information System Architecture, Legacy System ; Business Driven IT Infrastructure, BPR (Business Process Re-engineering), Business Resources and International Issues; IT Environment Values Resources (EVR), Strategic Management and its role in IT, Customer Matrix and Producer Matrix , Planning for Competitive Advantage ; Software Agents, Intelligent Agents, Traditional Computing Environment;

UNIT – 2

Rethinking Business through IT, Developing a Competitive Strategy, Inter-organization Information; E-Commerce and Electronic Markets- Inter-Organizational Information System and Transactions, Success Factor in E-Commerce; E-Business- Infrastructure, Hardware, Network; Business-To-Business Systems, Electronic Commerce and Market Systems; EDI-Electronic Data Interchange, Elements of EDI, Benefits, Applications; Electronic Commerce Payment Mechanism-Magnetic Strip Card, Smart Card, E-Cash, E-Wallets, IMPS, UPI, NACH .

UNIT – 3

Forming a Corporate IT Strategy, Information Economy, Decision making process; Corporate IT Strategy ,Management in Technological Environment, Competitive Strategy, Framework for Strategic use of IT; Developing an Information Architecture, Information Architecture, B2B System-Characteristics, Models, IT Solutions, Three pillars of E-Commerce ;Capitalizing of Information Technology, IBM's E-Business Strategy.

UNIT – 4

Incorporating Business Innovation into the Corporate IT Strategy, Impact of IT globalization in Software Industry, International IT Business Strategy; Global Strategic Management in IT, Application, Data Issues, System Development, IT Management in Business; Implementing Business Change with IT, Changing Role of IT in International business, The Changing Global IT Practices, Conversion Methods, Information System Maintenance .

UNIT – 5

The Impact and value of Information Technology in Competitive Strategy, Benefits of IT- Cost, Revenues, Profits, Quality, Opportunities; Organizational Technology Flexibility, Social Responsibilities in IT, Ethics in IT industry; Future of IT- Multimedia, Hardware, Virtual Reality, Digital System; Maximize the utilization of IT, Use of Accessible Technology to a Wider Audience of Computer, Changing the Focus of Strategy Trends: Beyond 2000

Recommended Books:

Year: 4th	Semester: VIII						

UNIT-I Lecture-8
 Audio Systems: Microphones, Loudspeakers, Speaker baffle and enclosure, Acoustics, Mono, Stereo, Quad, Amplifying Systems, Equalisers and Mixers, Electronic Music Synthesisers, Commercial Sound, Theater Sound System

UNIT – II Lecture-8
 Video Systems and Displays: Monochrome TV, Colour TV standards and systems, TFT, Plasma, HDTV, Digital TV, Video Telephone and Video Conferencing

UNIT III: Lecture-8
 Domestic Appliances: Washing machines, Microwave ovens, Air- conditioners and Refrigerators, In car computers Office Systems: FAX, Xerox, Telephone Switching System, Mobile Radio System

UNIT IV: Lecture-8
 Recording and Reproduction Systems: Disc recording and reproduction, Magnetic recording and reproduction, Video tape recording and reproduction, Video disc recording and play back, Distortion and Noise reduction in Audio and Video System

UNIT-V Lecture-8
 Power Supplies and other systems: SMPS, UPS and Preventive Maintenance, Set Top Boxes, Remote controls, Bar codes, ATM

L	T	P					
3	0	0					
Year: 4 th	Semester: VIII						

UNIT I

INTRODUCTION TO INDUSTRIAL PSYCHOLOGY

(6Hrs)

1. Definitions, History & Scope of Industrial Psychology.
2. Major influences on Industrial Psychology-
3. Classical Approaches (Scientific Management)
4. Neo-Classical Approaches (Hawthorne Experiments)

UNIT II

INDIVIDUAL BEHAVIOR AT WORKPLACE

(10 Hrs)

Emotional Quotient

1. Job Satisfaction–Job related attitude: Job Satisfaction; Satisfaction with regards to pay and supervision,
2. Measuring Job Satisfaction: Job Descriptive Index, Minnesota Satisfaction Questionnaire.
3. Relationship of Job Satisfaction with Productivity, Absenteeism and Attrition.
4. Motivation-Meaning and Concept of Motivation,
5. Theories of Motivation; Need Theories (Maslow McClelland and Herzberg). Cognitive Theories(Goal Setting Theory, Self-Efficacy Theory).

UNIT III

WORK ENVIRONMENT

(6 Hrs)

1. Organizational Culture- Meaning and Types, Influence of Organizational Culture on Employees.
2. Leadership- Nature, Style and Approaches to Leadership
3. Group dynamics
4. Change Management

UNIT IV

PERFORMANCE MANAGEMENT

(8 Hrs)

1. Job Analysis and Learning,
2. Training and Development- Objectives and Needs, Training Process
3. Methods of Training, Tools and Aids, Evaluation of Training Programs.
4. Methods of Performance Appraisal

UNIT V

STRESS AND CONFLICT MANAGEMENT

(8Hrs)

1. Stress Management- Meaning, Causes, Types,
2. Work and Mental Health; Fatigue. Boredom, Accidents and Safety,
3. Everyday Stress and its management-Refuting Irrational Ideas, Rational Emotive Behavioral Therapy, Goal Setting and Time Management, Facing Worry and Anxiety.

**Course Structure & Syllabus of
Open Electives
Applicable for 2013-2017 Batch**

4. Conflict–Definition, Traditional Vs. Modern view of conflict,
5. Types of Conflict – Intra personnel, Interpersonal, Organizational, Constructive and Destructive Conflict,
6. Conflict Management.

TEXT BOOK

Open Electives
Applicable for 2013-2017 Batch**

Course Title: Human Values & Ethics	Course Code: HA8720		
Credit: 3	L 3	T 0	P 0
Year: 4 th	Semester: VIII		

UNIT I: INTRODUCTION

(7 Hours)

1. Nature of Value-Crisis in the contemporary Indian society, Meaning, Nature & Types of Values; Sources of Value Formation.
2. Holistic View of Life and Human Values, Foundational Human Values – Integrity, Freedom, Creativity, Morals, Love and Wisdom.

UNIT II: SOCIETAL VALUES & MATERIAL VALUES

(7 Hours)

1. Definition of Society, Units of Society, and Social Consciousness.
2. Concepts & Principles of Interdependence, Conceptualizing ‘Good Society’ and ‘Social Goods’ and Corporate Social Responsibility.
3. Socio-Political Ideologies for promoting Material Well-being.
4. Role of Material Values in promoting Human Well-being.
5. Role of Science and Technology; Problems of Material Development.

UNIT III PSYCHOLOGICAL & SPIRITUAL VALUES

(8 Hours)

1. Humanistic Psychology; Concept of Intelligence, Emotional Intelligence & Mental health.
2. Cognitive Dissonance & Ego Defense, Maslow’s Hierarchy of Human Need; Characteristics of ‘Self-Actualizing’ persons.
3. Understanding Common Religion & Concept of Dharma.
4. Spiritual Values with Special Reference to Indian Spirituality.

Case Studies on the above aspects.

UNIT IV: ETHICAL VALUES & MORALITY

(8 hours)

1. Principle of Ethics: Ethical Canons and their Significance in Modern lives.
2. Virtue Ethics; Personal Virtues for the Modern Times
3. Principles of Ethics, Bases for moral Judgments: Customary Morality, Religious Morality, Reflective Morality.

Case Studies on the above aspects

Course Structure & Syllabus of Open Electives Applicable for 2013-2017 Batch

UNIT V PROFESSIONAL VALUES

(10Hours)

1. Concept of Professional values; Definition, Competence , Confidence , Devotion to Duty, Efficiency , Accountability , Respect for learning / Learned , Willingness to Learn, Open and Balanced mind
2. Team spirit ; Willingness for Discussion, Aims, Effort , Avoidance of Procrastination and Slothfulness, Alertness, IEEE Code of Business Ethics

Case Studies Case Studies on the above aspects

BOOKS RECOMMENDED

1. Human Values - Prof. A.N.Tripathi New Age International, 2009
2. Human Values and Professional Ethics - Jayshree, Suresh and B.S. Raghwan , S. Chand Publication, 2011-12
3. Just Business: Business Ethics in Action- Elaine Sternberg, Oxford University Press, 2000.
4. Ethics in Engineering-Mike Martin and Roland Schinzinger, McGraw-Hill, New York, 1996.
5. Engineering Ethics-Govindarajan M, Natarajan S, Senthil Kumar V. S, Prentice Hall of India, New Delhi, 2004

Course Structure & Syllabus of Open Electives Applicable for 2013-2017 Batch

Course Title: Organizational Behavior	Course Code: GA8710		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

UNIT-1:

Organizational Behavior- Nature, Importance and Scope; Models of OB; Managing Workforce Diversity; Emerging Challenges for Management and OB, Determinants of Individual Behavior.

UNIT-2:

Foundations of Individual Behavior- Values, Attitudes, Personality, Perception and Emotions; Transactional Analysis; Johari Window; Motivation- Importance and Theories; Determinants of Personality; Personality Attributes influencing OB; Interactive Behavior and Interpersonal Conflict.

UNIT-3:

Foundations of Organizational Structure, Work Design and Technology, , Organizational Culture & Climate, Organizational Learning- Importance and Theories; Learning and Behavior Modification; Principles of Learning & Reinforcement.

UNIT-4:

Team Building and Group Dynamics; Working Teams and Team Effectiveness; Intra-Team Dynamics; Dynamics of Managerial Leadership; Leadership- Transition of Leadership Theories; Implementation of Leadership Theories in Contemporary Business Environment.

UNIT-5:

Organizational Conflicts; Power & Politics –Concept of Authority & Power; Sources of Power, Unequal Power in Organization, Organizational Politics, Dysfunctional Aspects of Politics, Organizational Communication, Functional and Dysfunctional Conflicts, Stages in Conflict.

Text Books:

1. Organizational Behaviour, understanding and managing life at work, 7th Ed., Johns, G., & Saks, A. Pearson.
2. Organizational Behaviour, 7 th ed. ,by Luthans, Fred McGraw-Hill, New York
3. Organizational behaviour, 9th edition by Stephen P. Robbins. Prentice Hall International, Inc..
4. Luthans, Fred, Organizational Behaviour: An evidence based approach, 12th edition. Tata McGraw Hill

Reference Books:

Course Title: Digital Marketing	Course Code: GA8730						
Credit: 3	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 4 th	Semester: VIII						

UNIT-1:

INTRODUCTION TO DIGITAL MARKETING

Digital Marketing Fundamentals – Definition, Different Terminologies (E-marketing, online marketing, web marketing, internet marketing), key constituents of Digital Marketing, scope of Digital marketing (Applications), Digital Marketing Plan, Concept of e-Business & e-commerce, Revenue or Business Models

Digital Marketing Revolution -Historical evolution of Internet, Changing face of media & Impact of Digital Channels, Digital Marketing Industry

Digital Marketing Environment - Political, Economic, Socio-cultural, Technological, Ethical and Legal Issues: Ethical codes, Privacy issues, Digital Property (Patents, Copyright, Trademarks, licenses), Different types of online payment modes, E-Security –Firewalls,

UNIT-2:

DIGITAL MARKETING STRATEGY

Digital Marketing Research - Data Driven strategy, Electronic Marketing information Systems, monitoring Social Media , Web Analytics tools

Online Consumer Behaviour – Customer Personas, Online Consumer Behaviour models, Online exchanges and outcomes.

Segmentation, Targeting and Positioning (STP) – three markets (Business, Government, Consumer), Segmentation bases (Geographic, Demographic, Psychographic, Behavioural), Targeting Online Customers, Differentiating and positioning Online

UNIT-3:

DELIVERING THROUGH DIGITAL MARKETING

Conceptualizing and Developing a Website – conceptualizing online Product (benefits, attributes, branding etc.), Researching Site User’s requirement (Usability, Web Accessibility, and Localization), Reviewing Competitors’ website, Designing the information architecture, Website Prototyping, Domain Name registration, Hosting a website.

Introduction to Website designing tools – Website designing editors (HTML, Dreamweaver 8), elements of site design, site design and structure, Page design, Content Design, Testing of Content, Other standardized website designing free resources (Google sites, blogs, Webs etc.)

Pricing and Distribution of Digital Offer.

UNIT-4:

DIGITAL MARKETING COMMUNICATION TOOLS

Integrated Marketing Communication (IMC), IMC tools, Differences in Advertising through traditional & Digital Media, Setting Online Marketing objectives - Conversion Marketing Objectives, Timescales for Objective setting, Campaign Cost Objectives

Online Promotion Techniques –

- a) Search Engine Marketing - Search Engine optimization, Pay-per-click, Search Engine Marketing, Introduction to Google Adwords, Google Adsense
- b) Interactive Advertising - Fundamentals and Purpose, Measurement, Interactive Ad targeting options, Interactive Ad formats, Making banner ads work, Buying Advertising

Course Structure & Syllabus of Open Electives

Applicable for 2013-2017 Batch

- c) E-mail Marketing – Opt-in e-mail options for customer acquisition, Opt-in email options for Prospect Conversion and Customer retention(house list), Key success factors, Inbound e-mail communication
- d) Online Public Relations
- e) Online Partnerships - affiliate Marketing, Online sponsorship
- f) Marketing using videos on Youtube, facebook etc.
- g) Viral Marketing

UNIT-5:

MARKETING THROUGH SOCIAL MEDIA

The Horizontal Revolution, Strategic Planning with Social Media, The **four zones of social media**- Social Consumers, Social Communities , Social Publishing, Social Entertainment, Social Commerce, Creating and analyzing business pages on social networking sites such as Facebook, Twitter, LinkedIn, Google+, role of Virtual communities and blogs, Social Media for Consumer Insight, Social Media Metrics, **Maintaining And Monitoring The Online Presence**, Defining Performance Metrics framework, Tools and techniques for collecting metrics and summarizing results, The Maintenance Process, Content Management Process.

Text Books & Reference Books

1. e-Marketing: Strass, El-Ansary, Frost
2. Social Media Marketing: Strategies for Engaging in Facebook, Twitter & Other Social Media by Liana Li Evans, Pearson Publication.
3. Social Median Marketing Book; By Dan Zarrel, O'Reilly Media, 2009.
4. Digital Marketing: Strategy, Implementation and Practice, 5/E, Dave Chaffey, Pearson.

**Course Structure & Syllabus of
Open Electives
Applicable for 2013-2017 Batch**

Course Title: Financial Modeling with Spreadsheet	Course Code: GA8740		
Credit: 3	L 3	T 0	P 0
Year: 4th	Semester: VIII		

UNIT-1:

Overview on decision modelling, types of models, steps involved in decision modelling, problems in developing decision models, modelling through spreadsheet- hands on examples.

UNIT-2:

Linear programming models- concept, assumptions and applications, Formulating a linear programming model, graphical solution to LPP with two variables, Simplex algorithm

UNIT-3:

An introduction to transportation models, VAM and MODI methods, Unbalanced transportation models, Overview of assignment models

UNIT-4:

Overview on decision analysis, steps involved in decision analysis, Decision Tree Analysis, Forecasting models

UNIT-5:

Queuing models, characteristics of a queuing system, types of queuing systems, An overview on simulation modeling, Monte Carlo simulation, role of computers in simulation,.

Text Books:

1. Wayne L. Winston, Practical Management Science: spreadsheet modeling and applications
2. Taha, Hamdy, Operations Research, 7th edition, (USA: Macmillan Publishing Company), 2003
3. Vohra; Quantitative Techniques in Management (Tata McGraw-Hill, 2nd edition), 2003.
4. J K Sharma; Operations Research (Pearson)

S.No.	Unit No.	Content	Duration
1	Unit – I	A Study of the Indian Pharmaceutical industry vis-a vis global scenario (detail studies about top 5 National and Multi National Pharma industries including SWOT analysis)	12
2	Unit – II	Stages in product development – flow chart. (acceptance criteria) preformulation studies including decision tree	12
3	Unit –III	Basic concepts in designing and development of pediatric and geriatric Formulations and Development of various pediatric formulations,	12
4	Unit –IV	A. Design and Qualification of automatic dissolution systems B. Development of dissolution tests and interpretation	12
5	Unit -V	Stability testing – stress testing of drug substances, stability indicating assays. Role of kinetic studies. Stability testing protocols, retest period/shelf life determination, photo stability Testing stability testing of biotechnological and phytopharmaceuticals, post approval changes.	12

Faculty of Pharmacy
Course Structure & Syllabus for M.Pharm.
Batch: 2013–2015

Course Title: AAT (Separation Technique & Spectral Analysis)	Course Code: PCE102
Credit: 2	L T P 2 0 0
Year: 1st	Semester: I

S.No.	Unit No.	Content	Duration
1	Unit – I	UV-Visible Spectroscopy - Introduction. Application in determination of pKa values, pharmaceutical quantitative analysis, preformulation and formulation. Difference spectrophotometry, derivative spectra. Solid State Analysis: X-ray diffraction and crystallography, thermal analysis, DSC, TGA.	12
2	Unit – II	Infrared spectroscopy – Introduction, Application in structure elucidation and in identifying polymorphs. I R as a fingerprint technique. Near IR analysis and its applications, FTIR	12
3	Unit –III	a) Nuclear Magnetic Resonance Spectroscopy: Introduction, instrumentation, chemical shifts, shielding and deshielding effects, spin-spin coupling, reference standard and solvents, proton NMR, carbon- 13 NMR Application to structure elucidation. b) Mass Spectrometry: Principle, instrumentation, mass spectra obtained under electron impact (EI) ionization conditions, molecular fragmentation patterns, molecular ion, metastable ion, McLafferty rearrangement, EI mass spectra of some drug molecules. GC-MS and LC-MS : principle and applications.	12
4	Unit –IV	Chromatographic techniques: Chromatographic Theory: void volume, capacity factor, band broadening, calculation of column efficiency, parameters used in evaluating column performance (resolution and peak asymmetry). HPLC: instrumentation, stationary phases, mobile phases and its selection, columns and detectors, applications in quantitative analysis of drugs in formulations, specialized HPLC techniques. HPTLC, /gc, High-performance capillary electrophoresis: principle, instrumentation and application. Method Development and Validation for HPLC, HPTLC for any 2 API and Marker compounds.	12
5	Unit -V	Interpretation of APIs, Pharmaceutical Excipients by NMR, Mass, GC MS, IR, DSC and Other Spectroscopic Data (Any 5)	12

Faculty of Pharmacy

Year: 1st	Semester: I						

S.No.	Unit No.	Content	Duration
1	Unit – I	Drug and cosmetic act-Drugs and Cosmetics Act and rules with special reference to schedule M and Y	8
2	Unit – II	International Drug regulatory affairs – registration procedure (Pharmaceutical products) for International Marketing, Including preparation of dossiers SMF, Validation calibration and other documents like product development, stability data for different countries.	8
3	Unit –III	CFR-CGMP requirements – 21 CFR parts 210 and 211, Orange Guide, TRS, ICH, etc. GLP – Facilities for quality control lab qualifying GLP requirements.	7
4	Unit –IV	Intellectual property rights, patents Act, Trademark and Copyright Act	7

Faculty of Pharmacy

Course Structure & Syllabus for M.Pharm.

Batch: 2013–2015

Course Title: Biopharmaceutics & Pharmacokinetics	Course Code: PCE201		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: II		

S.No.	Unit No.	Content	Duration
1	Unit – I	Introduction to BCS classification of drugs. Gastrointestinal absorption of drugs – Biologic, Physicochemical consideration and role of dosage form. Drug distribution, drug binding in blood and tissues. Drug metabolism and excretion.	12
2	Unit – II	Pharmacokinetics: Component models – one compartment & multi compartment models. Non compartmental & nonlinear pharmacokinetics	12
3	Unit –III	Pharmacokinetic Variability – Body weight, Age, Sex, Genetic factors, Disease and Drug Interactions.	12
4	Unit –IV	Bioavailability – Introduction, measurement and enhancement, in vitro dissolution & in vivo bioavailability (in vitro – in vivo correlation) bioavailability and bioequivalence studies – protocol and regulatory requirement.	12
5	Unit -V	Dosage regimens – repetitive dosing and dose adjustments in renal and hepatic failure. Individualisation and optimization of drug dosing regimens.	12

Faculty of Pharmacy
Course Structure & Syllabus for M.Pharm.
Batch: 2013–2015

Course Title: Advance Drug Delivery System		Course Code: PCE202		
Credit: 4		L 4	T 0	P 0
Year: 1st				Semester: II

S.No.	Unit No.	Content	Duration
1	Unit – I	A. Theory of controlled release drug delivery systems. B. Physical, chemical and biomedical engineering approach to achieve controlled delivery.	12
2	Unit – II	Factors influencing delivery, formulation and evaluation of Transmucosal, Gastroretentive and colonic drug delivery system.	12
3	Unit –III	Transderma, Liposomes, Niosomes, Microgels, Nanogels, Emulgels, SNEEDS, Hydrogels, SEEDS, Osmotic Pump Drug Delivery.	12
4	Unit –IV	Target oriented drug delivery system – Pulmonary Drug Delivery, Cell specific Drug Deliver, Gene Delivery, Pro Drug, ADEPT, GDEp, Monoclonal Antibodies, Parenteral formulation for peptides, protein drugs.	12
5	Unit -V	Vaginal and Interuterine drug Delivery, transungual drug delivery, transcranial drug delivery, Nose to brain, and stemceuticals.	12

Course Title: Packaging Technology	Course Code: PCE214						
Credit: 2	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">2</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	2	0	0
L	T	P					
2	0	0					
Year: 1st	Semester: II						

S.No.	Unit No.	Content	Duration
1	Unit – I	Introduction : Purpose of Packaging, prerequisites of an ideal package, various types of inner and outer packages used for different pharmaceutical dosage forms, selection of a suitable package, hazards encountered by the package during storage and distribution, child resistant packaging and tamper evident packaging, Law and regulations governing packaging.	8
2	Unit – II	Strip, blister & pouch packaging: advantages, limitation, packaging materials used, machinery, types and evaluation of strips, blister & pouch package.	7
3	Unit –III	Liquid, semi-solid & sterile formulation packaging: Various packages/containers/closures employed, Machinery and Evaluation of liquid, semi-solid & sterile formulation packages.	7
4	Unit –IV	Labeling: Objectives and contents of a pharmaceutical label. Types of label (including Bilingual label, Bar code label, Radiofrequency (RF) label, structured program label, In- mould label and decorative labels), Legal requirements of labelling, packaging inserts and outserts. Adhesives and machinery employed for labelling. Concept of paperless labelling and new developments in labelling technologies.	8

Year: 1st	Semester: II						

Unit I

Fundamentals of Drug Nanoparticles :- Introduction, Nanoparticle Size, Nanoparticle Surface, Nanoparticle Suspension and Settling. Magnetic and Optical Properties, Production of Nanoparticles, Biological Transport of Nanoparticles. (10)

Unit II

Manufacturing of Nanoparticles by Milling and Homogenization Techniques, Supercritical Fluid Technology and Recent Advances

Nanoparticles from Emulsions

Introduction. Emulsification Solvent Evaporation Process. Nanoparticle Hardening. Residual Solvent and Emulsifier. Protein Stabilized Nanoparticles. (10)

Unit III

Nanoparticle characterization and properties, Physical Characterization of Nanoparticles, **Nanoparticle**

Interface: An Important Determinant in Nanoparticle-Mediated Drug/Gene Delivery.

Toxicological Characterization of Engineered Nanoparticles. (10)

Unit IV

Drug Delivery Application :- Nano carriers and Injectable Nanoparticles for Efficient Drug Delivery, Polymeric Nanoparticles for Oral Drug Delivery, Brain Delivery by Nanoparticles, Nanoparticles for Ocular Drug Delivery, DNA Nanoparticle Gene Delivery Systems. (10)

Unit V

Micromeritics And Powder Rheology: Average particle size, Particle size distribution, number and weight distribution, particle number; methods for determining particle size – optical

Text Book: Title, Author, Publication House, Edition, Year

Books Recommended (Current Edition) :-

- Nanoparticle Technology for Drug Delivery, edited by Ram B. Gupta and Uday B. Kompella
- Nanoparticulate Drug Delivery Systems, edited by Deepak Thassu, Michel Deleers, and Yashwant Pathak
- Drug Delivery Nanoparticles Formulation and Characterization, edited by Yashwant Pathak and Deepak Thassu
- Modern Pharmaceutics, Fifth Edition, Volume 1: Basic Principles and Systems, edited by Alexander T. Florence and Jürgen Siepmann .
- Modern Pharmaceutics, Fifth Edition, Volume 2: Applications and Advances, edited by Alexander T. Florence and Jürgen Siepmann

Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Object Oriented Modeling and Design	Course Code: CSE101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

Unit I **(12L)**

Objects and classes, links and association, generalization and inheritance, aggregation, abstract class, multiple inheritance, meta data, candidate keys, constraints, Events and states, operations, nested state diagrams and concurrency, advanced dynamic modeling concepts, a sample dynamic model, Data flow diagram, specifying operations, constraints, a sample functional model. OMT (object modeling techniques) methodologies.

Unit II **(10L)**

The Rumbaugh OMT, The Booch methodology. c. Jacobson's OOSE methodologies, Unified Process. Introduction to UML, Important views & diagram to be modeled for system by UML. Use case diagram, Activity diagram, Object diagram, Class diagram, State diagram, Sequence diagram, Collaboration diagram.

Unit III **(10L)**

Java Programming: Introduction, Migrating from C++ to java, Operator, Data types, Variables, Methods & Classes, Multithread Programming, I/O, Java Applet.

Java Library: String Handling, Input/output exploring Java.io, Networking, Applets classes, Event Handling, Introduction to AWT, Working with window, Graphics, AWT Controls, Layout Manager and Menus, Images, Additional packages.

Unit IV **(10L)**

Database Connectivity: Overview of Database Driver Architecture, Introduction to JDBC Standard Extension API (javax.sql), Connection Pooling, JDBC Programming with ORACLE, MYSQL, etc., Batch Processing, Connecting to non-conventional databases, Use of Excel API, caching (case study with HSDB, CSQL), Working with Multiple Databases, Handling SQL escape syntax, Calling SQL functions, Database stored procedures.

Text Books:

1. James Rumbaugh et al, "Object Oriented Modeling and Design", PHI
2. Herbert Schildt, "The Complete Reference: Java", TMH.
3. E. Balagurusamy, "Programming in JAVA", TMH.

Reference Books:

1. Booch Grady, "Object Oriented Analysis & Design with application 3/e", Pearson Education, New Delhi.
2. Bjarne Stroustrup, "C++ Programming Language", Addison Wesley
3. E. Balagurusamy, "Object Oriented Programming with C++", TMH

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Foundation of Computing – I	Course Code: CSE102		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

Unit – 1 Applied Numerical Analysis (10L)

Solution of Algebraic and Transcendental Equation: Bisection Method, Iteration method, Method of false position, Secant method, Newton-Raphson method, Rate of convergence of Newton Raphson method;

Interpolation: Newton's forward and backward formula, Gauss forward and backward formula, Stirling's, Bessel's, Everett's formula, Lagrange's Interpolation, Newton Divided difference Formula.

Unit – 2 Applied Numerical Analysis (8L)

Numerical Integration and Differentiation: Numerical differentiation, Numerical Integration: Trapezoidal rule, Simpson's 1/3 and 3/8 rule, Boole's rule; **Statistical Computation:** Curve fitting by method of least squares, fitting of straight lines, polynomials, exponential curves, Regression Analysis; Coefficient of Correlation.

Unit – 3 Applied Discrete Mathematics (6L)

Counting: Addition Rule, Multiplication Rule, Permutations, Combinations, Combinations where repetitions are allowed, Counting the elements of a list, pigeonhole principle, Probability, Conditional probability, independent events, probability distribution.

Unit – 4 Applied Discrete Mathematics – (6L)

Relations and functions-properties of binary relation, equivalence relation, partial order relation, chains and anti-chains, Lattices and Boolean algebra; Generating function and recurrence relations, Linear recurrence relation with constant coefficients and their solution, Homogeneous solution, particular solution and total solution, Solution by the method of generating functions.

Unit – 5 Applied Discrete Mathematics – (12L)

Graph Theory: Basic Concepts, Special Graphs, Subgraphs, Isomorphism of Graphs, Walks, Paths, & Circuits, Eulerian Paths & Circuits, Hamiltonian Circuits, Matrix representation of graphs, Planar Graphs, Colouring of Graph, Directed Graphs, Trees, Representation of Algebraic expressions by Binary trees, Spanning tree, Shortest Path problem, Minimal Spanning tree.

Text Books:

1. Yang, "Applied Numerical Methods using MATLAB", Wiley India
2. Pradip Niyogi, "Numerical Analysis and Algorithms", TMH, 1st Edition.
3. Gerald & Whealey, "Applied Numerical Analysis", AW
4. Grewal B S, "Numerical methods in Engineering and Science", Khanna Publishers, Delhi.

Reference Books:

1. Numerical Method Principles, analysis and algorithms, Srimamta Pal (Oxford Higher ed)
2. Rajaraman V, "Computer Oriented Numerical Methods", PHI, 3rd edition.
3. Liu C.L., Elements of Discrete Mathematics, McGraw Hill Int. edn.
4. Kolman B & Busby C.R., Discrete Mathematical Structure for Computer Science, PHI
5. Deo N., Graph Theory, Prentice Hall of India.
6. Trembley J.P. & Manohar R., Discrete Mathematical Structures with Applications to Computer Science, TMH.

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Advanced Analysis and Design of Algorithms	Course Code: CSE103		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT 1 **(8L)**

Introduction: Algorithms, The role of algorithms in computing, analysis of algorithms, Time and Space Complexity; Relation; Asymptotic notation, Growth of Functions, asymptotic analysis of recurrence relations, Recursion Tree; Master's Theorem, Medians and Order Statistics; Max-Min.

Divide and conquer paradigm: Analysis of Divide-and-Conquer Algorithm; Quick Sort, Merge sort Analysis; Best Case, Worst Case and Average Case Analysis.

UNIT 2 **(8L)**

Advanced Design and Analysis Techniques : Dynamic Programming: Matrix Chain multiplication, Longest Common subsequence, optimal binary search trees; Greedy Algorithm: Activity Selection problem, Theoretical foundation of greedy algorithm, Task Scheduling problem, Comparison of dynamic programming and Greedy algorithm with Knapsack as case study; Fractional Knapsack and 0/1 Knapsack; Back Tracking: Graph Coloring Problem, Queen Problem, BFS, DFS; Amortized Analysis:

UNIT 3 **(8L)**

Elementary Graphs Algorithms: Minimum Spanning Trees, Single-source Shortest Paths, All Pairs Shortest Paths and Traveling Salesman Problem. Review of Graphs (Kruskal and Prim Algorithm, Dijkstra's Algorithm); Flow networks: Maximum Flow, Ford-Fulkerson method, Zero-one Principle, Merging Network, Sorting Network.

UNIT 4 **(8L)**

Advanced Data Structure: Red-Black Trees, Binary Search Tree, B Trees, Binomial Heaps, Fibonacci Heaps, Data Structure for Disjoint Sets ; Matrix Operation : Properties, Strassen's Algorithm; Number-Theoretic Algorithm, Elementary number-theoretic notion, Greatest common divisor, modular arithmetic, solving modular linear equation, the Chinese remainder Theorem.

UNIT 5 **(8L)**

Approximation Algorithms- the vertex-cover problem, The Traveling-Salesman Problem, The set covering problem ; Randomized Algorithms ; String Matching : Rabin-Karp Algorithm, Knuth - Morris-Pratt Algorithm ; Polynomial time, Polynomial time verification, NP-completeness and reducibility, NP-Completeness proofs.

Text Books:

1. T.H. Cormen, C. E. Leiserson, R.L. Rivest, C. Stein, "Introduction to Algorithms", 2nd Edition, PHI.
2. A.A.Puntambekar, "Advanced Data Structures And Algorithms", Technical Publications, Pune, 2008.
3. Ellis Harwitz and Sartaz Sahani, "Fundamentals of Computer Algorithms", Galgotia.
4. Basse, "Computer Algorithms: Introduction to Design & Analysis", Addison Wesley

Reference Books:

1. A.V. Aho, J. E. Hopcroft, J.D. Ulman, "The Design & Analysis of Computer Algorithms", Addison Wesley.
2. V. Manber, "Introduction to Algorithms – A Creative Approach", Addison Wesley.

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Object Oriented Modeling and Design Lab	Course Code: CSE151		
Credit: 1	L 0	T 0	P 2
Year: 1st	Semester: I		

List of Experiments

1. Design an object oriented model for a simple ATM (automatic teller machine).
2. Write a Java Program to define a class, define instance methods and overload them and use them for dynamic method invocation.
3. To successfully write program that involves Conditional Statements and control structure and a parameterized constructor.
4. Write a Java program to practice using String Buffer class and its methods.
5. Write a program to implement Exception Handling.
6. Write a program to implement multithreading (three threads using single run method).
7. Write a program for a calculator using Applet.
8. Write a Java program to demonstrate keyboard event.
9. Construct a JDBC connection using different Databases (Oracle, MySql, SqlServer etc).
10. Write a program for using Graphics class to display basic shapes and fill them, draw different items using basic shapes and set background and foreground colors.
11. Develop a GUI application of your choice with proper object oriented modeling.

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Advanced Analysis and Design of Algorithms Lab	Course Code: CSE153		
Credit: 1	L	T	P
	0	0	2
Year: 1st	Semester: I		

List of Experiments

1. Sort a given set of elements using the Quicksort method and determine the time required to sort the elements. Repeat the experiment for different values of n, the number of elements in the list to be sorted and plot a graph of the time taken versus n. The elements can be read from a file or can be generated using the random number generator.
2. Using Open MP, implement a parallelized Merge Sort algorithm to sort a given set of elements and determine the time required to sort the elements. Repeat the experiment for different values of n, the number of elements in the list to be sorted and plot a graph of the time taken versus n. The elements can be read from a file or can be generated using the random number generator.
3. (a) Obtain the Topological ordering of vertices in a given digraph.
(b) Compute the transitive closure of a given directed graph using Warshall's algorithm.
4. Implement 0/1 Knapsack problem using Dynamic Programming.
5. From a given vertex in a weighted connected graph, find shortest paths to other vertices using Dijkstra's algorithm
6. Find Minimum Cost Spanning Tree of a given undirected graph using Kruskal's algorithm
7. (a) Print all the nodes reachable from a given starting node in a digraph using BFS method.
(b) Check whether a given graph is connected or not using DFS method.
8. Find a subset of a given set $S = \{s_1, s_2, \dots, s_n\}$ of n positive integers whose sum is equal to a given positive integer d. For example, if $S = \{1, 2, 5, 6, 8\}$ and $d = 9$ there are two solutions $\{1, 2, 6\}$ and $\{1, 8\}$. A suitable message is to be displayed if the given problem instance doesn't have a solution.
9. Implement any scheme to find the optimal solution for the Traveling Salesperson problem and then solve the same problem instance using any approximation algorithm and determine the error in the approximation.
10. Find Minimum Cost Spanning Tree of a given undirected graph using Prim's algorithm.
11. Implement All-Pairs Shortest Paths Problem using Floyd's algorithm. Parallelize this algorithm, implement it using Open MP and determine the speed-up achieved.
12. Implement N Queen's problem using Back Tracking.

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)

Batch: 2013-15

Course Title: Digital Image Processing (<i>Elective-I</i>)	Course Code: CSE121		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT-I

(8L)

Introduction and Fundamentals: Motivation and Perspective, Applications, Components of Image Processing System, Element of Visual Perception, A Simple Image Model, Sampling and Quantization.

Image Enhancement in Spatial Domain: Introduction; Basic Gray Level Functions – Piecewise-Linear Transformation Functions: Contrast Stretching; Histogram Specification; Histogram Equalization; Local Enhancement; Enhancement using Arithmetic/Logic Operations – Image Subtraction, Image Averaging; Basics of Spatial Filtering; Smoothing - Mean filter, Ordered Statistic Filter; Sharpening – The Laplacian.

UNIT-II

(8L)

Image Enhancement in Frequency Domain : Fourier Transform and the Frequency Domain, Basis of Filtering in Frequency Domain, Filters – Low-pass, High-pass; Correspondence Between Filtering in Spatial and Frequency Domain; Smoothing Frequency Domain Filters – Gaussian Lowpass Filters; Sharpening Frequency Domain Filters – Gaussian Highpass Filters; Homomorphic Filtering.

Image Restoration: A Model of Restoration Process, Noise Models, Restoration in the presence of Noise only-Spatial Filtering – Mean Filters: Arithmetic Mean filter, Geometric Mean Filter, Order Statistic Filters – Median Filter, Max and Min filters; Periodic Noise Reduction by Frequency Domain Filtering – Bandpass Filters; Minimum Mean-square Error Restoration.

UNIT-III

(8L)

Color Image Processing: Color Fundamentals, Color Models, Converting Colors to different models, Color Transformation, Smoothing and Sharpening, Color Segmentation.

Morphological Image Processing: Introduction, Logic Operations involving Binary Images, Dilation and Erosion, Opening and Closing, Morphological Algorithms – Boundary Extraction, Region Filling, Extraction of Connected Components, Convex Hull, Thinning, Thickening

UNIT-IV

(8L)

Registration: Introduction, Geometric Transformation – Plane to Plane transformation, Mapping, Stereo Imaging – Algorithms to Establish Correspondence, Algorithms to Recover Depth

Segmentation : Introduction, Region Extraction, Pixel-Based Approach, Multi-level Thresholding, Local Thresholding, Region-based Approach, Edge and Line Detection: Edge Detection, Edge Operators, Pattern Fitting Approach, Edge Linking and Edge Following, Edge Elements Extraction by Thresholding, Edge Detector Performance, Line Detection, Corner Detection.

UNIT-V

(8L)

Feature Extraction: Representation, Topological Attributes, Geometric Attributes

Description: Boundary-based Description, Region-based Description, Relationship.

Object Recognition: Deterministic Methods, Clustering, Statistical Classification, Syntactic Recognition, Tree Search, Graph Matching

Text Books:

1. Digital Image Processing 2nd Edition, Rafael C. Gonzalvez and Richard E.Woods. Published by: Pearson Education.
2. Digital Image Processing and Computer Vision, R.J. Schalkoff. Published by: John Wiley and Sons, NY.

Reference Books:

1. Fundamentals of Digital Image Processing, A.K. Jain. Published by Prentice Hall, Upper Saddle River, NJ.

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Mobile and Ad-hoc Networks (<i>Elective-I</i>)	Course Code: CSE122
Credit: 3	L T P 3 0 0
Year: 1st	Semester: I

UNIT 1 **(8L)**
 Issues in Mobile Computing, Wireless Telephony: Frequency Reuse, Cell Design, Cellular Architecture. Digital Cellular Standards, GSM: Air-Interface, Channel Structure, Location Management: HLR- VLR, Handoffs, Channel allocation in Cellular Systems, CDMA, GPRS, EDGE, Overview of 3G Cellular Networks

UNIT 2 **(8L)**
 Wireless Networking, WLAN Overview, Infrared LAN, Spread-Spectrum LAN, Narrowband Microwave LAN, MAC issues, Wireless Multiple Access Protocols, MACA & MACAW, IEEE 802.11 variants, IEEE 802.16, Bluetooth, Wireless Metropolitan Area Networks (Wireless Local Loop)

UNIT 3 **(8L)**
 Wireless Internet: IP Limitations, Mobile IP & its working, Issues in Mobile IP. TCP over Wireless, Wireless Access Protocol (WAP): Architecture & Protocol Stack. Security in Wireless Systems, Mobile Agents Computing, Transaction Processing in Mobile Computing Environment

UNIT 4 **(8L)**
 Ad Hoc Networks: Ad Hoc Networks vs. Cellular Networks, Issues in Ad Hoc Wireless Networks, MAC Protocols, Routing Protocols for Ad Hoc Wireless Networks-Design Issues and Classification, Proactive Routing Protocols, Reactive Routing Protocols, Hybrid Routing Protocols.

UNIT 5 **(8L)**
 Wireless Sensor Networks: Overview, Application Areas, Sensor Nodes' Architecture, Data Aggregation, Routing, and Query Processing in WSN.

Text Books:

1. Jochen H. Schiller, "Mobile Communication", Addison-Wesley, Pearson Education
2. Sipra Das Bit, Biplab K. Sikdar, "Mobile Computing", PHI Learning
3. Vijay Garg, "Wireless Communication & Networking", Elsevier, Morgan Kaufmann Publisher

Reference Books:

1. Subir K Sarkar, T G Basavaraju, C Puttamadappa, "Ad Hoc Mobile Wireless Networks", Auerbach Publication
2. A. Ananda, Mun Choon Chan, Wei Tsang Ooi, "Mobile, Wireless & Sensor Networks", IEEE press, Willy Intersciences

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)

Batch: 2013-15

Course Title: Information Theory and Coding (<i>Elective-I</i>)	Course Code: CSE123		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT 1: Information Theory **8L**

Information-Entropy, Information rate, classification of codes, Kraft McMillan inequality, Source coding theorem, Shannon-Fanocoding, Huffman coding, Extended Huffman coding -Joint and conditional entropies, Mutual information - Discrete memoryless channels – BSC,BEC – Channel capacity, Shannon limit.

UNIT 2: Source Coding: Text, Audio and Speech **8L**

Text: Adaptive Huffman Coding, Arithmetic Coding, LZW algorithm Audio: Perceptualcoding, Masking techniques, Psychoacoustic model, MEG Audio layers I,II,III, Dolby AC3 Speech: Channel Vocoder, Linear Predictive Coding

UNIT 3: Source Coding: Image and Video **8L**

Image and Video Formats – GIF, TIFF, SIF, CIF, QCIF Image compression: READ, JPEG
Video Compression: Principles-I,B,P frames, Motion estimation, Motion compensation,H.261, MPEG standard

UNIT 4: Error Control Coding: Block Codes **8L**

Definitions and Principles: Hamming weight, Hamming distance, Minimum distancedecoding - Single parity codes, Hamming codes, Repetition codes - Linear block codes,Cyclic codes - Syndrome calculation, Encoder and decoder - CRC

UNIT 5: Error Control Coding: Convolutional Codes **8L**

Convolutional codes– code tree, trellis, state diagram - Encoding – Decoding: Sequentialsearch and Viterbi algorithm – Principle of Turbo coding

Text Books:

1. R Bose, “Information Theory, Coding and Cryptography”, TMH 2007
2. Fred Halsall, “Multimedia Communications: Applications, Networks, Protocols and Standards”, Perason Education Asia, 2002

Batch: 2013-15

Course Title: Advanced Theory of Computation ((<i>Elective-I</i>))	Course Code: CSE127						
Credit: 3	<table style="width: 100%; border: none;"> <tr> <td style="width: 33%;">L</td> <td style="width: 33%;">T</td> <td style="width: 33%;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1st	Semester: I						

UNIT 1 **(8L)**

Automata: Basic machine, FSM, Transition graph, Transition matrix, Deterministic and non-deterministic FSM'S, Equivalence of DFA and NDFA, Mealy & Moore machines, minimization of finite automata, Two-way finite automata.

Regular Sets and Regular Grammars: Alphabet, words, Operations, Regular sets, Finite automata and regular expression, Myhill- Nerode theorem Pumping lemma and regular sets, Application of pumping lemma, closure properties of regular sets.

UNIT 2 **(8L)**

Context –Free Grammars: Introduction to CFG, Regular Grammars, Derivation trees and Ambiguity, Simplification of Context free grammars, Normal Forms (Chomsky Normal Form and Greibach Normal forms).

UNIT 3 **(8L)**

Pushdown Automata: Definition of PDA, Deterministic Pushdown Automata, PDA corresponding to given CFG, CFG corresponding to a given PDA.

Context Free Languages: The pumping lemma for CFL's, Closure properties of CFL's, Decision problems involving CFL's.

UNIT 4 **(8L)**

Turing Machines: Introduction, TM model, representation and languages acceptability of TM Design of TM, Universal TM & Other modification, Church's hypothesis, composite & iterated TM.

Turing machine as enumerators. Properties of recursive & recursively enumerable languages, Universal Turing machine

UNIT 5 **(8L)**

Tractable and Untractable Problems: P, NP, NP complete and NP hard problems, examples of these problems like satisfy ability problems, vertex cover problem, Hamiltonian path problem, traveling sales man problem, Partition problem etc.

Text Books:

1. John E. Hopcroft, Jeffery Ullman, "Introduction to Automata theory, Languages & computation", Narosa Publishers.
2. K.L.P Mishra & N.Chandrasekaran, "Theory of Computer Science", PHI Learning

Reference Books:

1. Michael Sipsev, "Theory of Computation", Cenage Learning
2. John C Martin, "Introduction to languages and theory of computation", McGraw Hill
3. Daniel I.A. Cohen, "Introduction to Computer Theory", Wiley India.
4. Kohavi, "Switching & Finite Automata Theory", TMH

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Soft Computing (<i>Elective-II</i>)	Course Code: CSE124		
Credit: 3.5	L 3	T 1	P 0
Year: 1st	Semester: I		

UNIT-1: INTRODUCTION TO SOFT COMPUTING (8L)

Evolution of Computing, Intelligent Computing, Introduction to Soft Computing- Techniques and Structure, Constituents of Soft Computing- Historical Sketch and traditional AI, Features of Soft Computing, Hard Computing Vs Soft Computing, , Applications of Soft Computing, Machine Learning Basics.

UNIT-2: ARTIFICIAL NEURAL NETWORK (8L)

Functions of a Biological Neuron, Introduction to Artificial Neural Network, Architecture of an ANN, Various models of ANN -Feed forward, Feed backward, Recurrent, Back Propagation, Perceptron, Radial Basis Function, Adaptive Resonance architectures, Machine Learning using Neural Network- Supervised learning, Unsupervised learning, Reinforcement learning.

UNIT-3: GENETIC ALGORITHM (8L)

Introduction to Genetic Algorithms, Genetic representations, Difference between Genetic Algorithms and Traditional Methods, Application of GA in Machine Learning- Knowledge Acquisition, Importance and Goal of Traditional Optimization Methods, Classification of Search Techniques, Introduction to Hill climbing Simulated annealing, Decision Tree, Genetic operators, Mutation, Genetic Modeling- Offspring, Encoding, Fitness Function, Reproduction, Crossover, Inverse and Deletion, Generational Cycle, Convergences.

UNIT-4: FUZZY LOGIC (8L)

Introduction to Fuzzy Logic, Crisp set and Fuzzy set, Basic concepts of Fuzzy sets, Membership Functions. Basic operations on Fuzzy sets, Properties of Fuzzy sets, Fuzzy relations, Propositional logic and Predicate logic, Fuzzy If – Then rules, Fuzzy mapping rules and Fuzzy implication functions, Fuzzyfications & Defuzzificataions, Fuzzy Controller, Applications of Fuzzy Logic.

UNIT-5: HYBRID SYSTEMS (8L)

Integration of neural networks- fuzzy logic-genetic algorithms, Neuro-Fuzzy Modeling- Approaches of Neuro- Fuzzy Systems, Framework of Adaptive Neuro- Fuzzy Inference Systems(ANFIS), Hybrid Learning Algorithm, Neuro-Fuzzy Control, Other Hybrid System- Genetic–Fuzzy Systems, Neuro-Genetic Systems, Genetic-Fuzzy-Neural Network.

Text Books:

1. S. Rajasekaran and G.A. Vijayalaksmi Pai, "Neural Network, Fuzzy Logic, and Genetic Algorithms - Synthesis and Applications", Prentice Hall.
2. Naresh K. Sinha and Madan M. Gupta, "Soft Computing and Intelligent Systems - Theory and Application", Academic Press.

Reference Books:

1. Simon S. Haykin, "Neural Networks: A Comprehensive Foundation", Prentice Hall.
2. M Ganesh, "Introduction To Fuzzy Sets And Fuzzy Logic", Prentice-Hall.
3. David E. Goldberg, "Genetic Algorithms in Search, Optimization, and Machine Learning; Addison-Wesley.

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Distributed Computing (<i>Elective-II</i>)	Course Code: CSE125		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT 1 **(8L)**

Fundamentals of Distributed Computing: Architectural models for distributed computing systems, Issues and challenges in Distributed systems, Basic concepts in distributed computing such as clocks, message ordering, consistent global states.

Distributed Environments: Current systems and developments (DCE, CORBA, JAVA).

UNIT 2 **(8L)**

Coordination & Synchronization: Introduction, Distributed Mutual Exclusion, Elections, Multicast Communication, Atomic transactions, Deadlocks in Distributed systems.

Message Passing & Remote Procedure Calls : Features of a good message-passing system, RPC model. Implementing RPC mechanism, Stub Generation, RPC Messages, Marshaling Arguments and Results, Server Management, Communication protocols for RPCs.

UNIT 3 **(8L)**

Distributed File Systems: Features of Good DFS, File Models, File-Accessing models, File Service Architecture, File-sharing semantics, File Caching schemes, File replications.

UNIT 4 **(8L)**

Distributed Shared Memory: Shared memory consistency models, Page based distributed shared memory, Shared variable distributed shared memory, Object based distributed shared memory.

Replication: Introduction, System Model & Group Communication, Fault Tolerant Services, Transactions with Replicated Data.

UNIT 5 **(8L)**

Advanced Topics in Distributed Computing: High Performance Computing-HPF, Distributed and mobile multimedia systems. Adaptability in Mobile Computing. Grid Computing and applications. Fault tolerant Computing Systems.

Text Books:

1. Tannenbaum, A, Van Steen. Distributed Systems, Principles and Paradigm , Prentice Hall India, 2002
2. Tannenbaum, A. Distributed Operating Systems, Pearson Education. 2006

Reference Books:

1. Attiya, Welch, “Distributed Computing”, Wiley India, 2006
2. Singhal and Shivaratri, “Advanced Concepts in Operating Systems”, McGraw Hill, 1994
3. Cameron Hughes, Tracey Hughes, “Parallel and distributed programming using C++”, Pearson Education, 2005

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Object Oriented Software Engineering (<i>Elective-II</i>)	Course Code: CSE126		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT-1 **(8L)**

Introduction to Software Engineering: Software Engineering Development Activities, Managing Software Development, Rationale Management, Software Configuration Management, Software Project Management.

UNIT-2 **(8L)**

Modeling with UML: Overview of UML, Modeling Concepts, Object Oriented Modeling, Requirement Elicitation- Concepts, Activities.

UNIT-3 **(8L)**

UML: Use case Diagram, Class Diagram, Object Diagram, Sequence Diagram, Component Diagram, Deployment Diagram, Collaboration Diagram, State-chart Diagram, Activity Diagram.

UNIT-4 **(8L)**

Analysis Model: Analysis Concepts (Entity, Boundary, Control Objects, association, Qualified Associations), Analysis Activities- From Use case to Object.

Design Model: System Design Concepts (Subsystem, classes, interfaces, coupling, coherence) System Design Activities- From objects to Subsystems.

UNIT-5 **(8L)**

Testing: Quality Control Techniques, Testing Concepts (Faults, Errors, Failure, Test Case, Test Stubs and Drivers), Testing Activities (Unit Testing, Integration Testing, System Testing).

TEXT BOOK

1. Bernd Bruegge, Allen H. Dutoit “Object Oriented Software Engineering: Using UML, Patterns and Java” 2/E Pearson Education.

Batch: 2013-15

Course Title: Advanced Data Warehousing and Mining (<i>Elective-II</i>)	Course Code: CSE128		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT-1 (8L)
Evolution of Database System Technology, Architecture of Data Mining System, Data Warehouse, Advanced Data and Information Systems and Advanced Applications, Data Mining Functionalities, Data Mining Task Primitives

UNIT-2 (8L)
Data Preprocessing, Descriptive Data Summarization, Data Cleaning, Data Integration and Transformation, Data Reduction, Data Discretization and Concept Hierarchy Generation

UNIT-3 (8L)
Data Warehouse Architecture, Data Warehouse Schemas, Multidimensional Data Model, OLTP, OLAP, OLAP operations, ROLAP, MOLAP, HOLAP

UNIT-4 (8L)
Market Basket Analysis, Apriori Algorithm, Mining Multilevel Association Rules, Classification and Prediction, Classification by Decision Tree Induction, Bayesian Classification, Classification by Back propagation

UNIT-5 (8L)
Cluster Analysis, Types of Data in Cluster Analysis, Partitioning Methods, K-Means Method, K-Medoids Method, DBSCAN, OPTICS

Mining Sequence pattern in Biological Data, Mining Multidimensional, Multilevel Sequential Pattern

Text Books:

1. Jiawei Han and Micheline Kamber, "Data Mining: Concepts and Techniques"

Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Modern Web Programming	Course Code: CSE201		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

Unit I (8L)
An Introduction to **HTML**, History-Versions-Basic XHTML Syntax and Semantics-Some Fundamental HTML Elements-Relative URLs-Lists-tables-Frames-Forms-XML Creating HTML Documents Case Study, HTML5, New features of HTML5, SVG. The DOM-Introduction to the Document Object Model DOM History and Levels-Intrinsic Event Handling-Modifying Element Style-The Document Tree-DOM

Unit II (8L)
Style Sheets: CSS-Introduction to Cascading Style Sheets-Features-Core Syntax Style Sheets and HTML, Type of style sheets, new features of CSS3, XML, Representing web data using XML, XML processing Event-oriented Parsing: SAX-Transforming XML Documents-Selecting XMLData: XPATH-Template based Transformations: XSLT-Displaying XML Documents.

Unit III (8L)
Introduction to **JavaScript**, HTML and scripting languages, Where to insert JavaScript in HTML, The <script> tag, JavaScript variables and data types, Basic JavaScript programming concepts, Defining functions, Passing parameters and receiving data from functions, Variable scope and the **var** statement, The Document object, The Image object, Creating an image rollover effect, The Form object, The elements Input object, Common properties and methods, The Select and option objects, Interacting with HTML form elements, Validating data entered in a form

Unit IV (10L)
Java Servlet: Servlet overview–the Java web server–your first servlet–servlet chaining–server side includes-Session management–security–HTML forms–using JDBC in servlets–applet to servlet communication, Session.
JSP: Introduction to JSP, JSP processing, JSP Application Design, Tomcat Server, Implicit JSP objects, Conditional Processing, Declaring variables and methods, Error Handling and Debugging, Sharing data between JSP pages- Sharing Session and Application Data. Accessing a database from a JSP page

Unit IV (8L)
PHP-Introduction to PHP, History, Webserver, Xampp, Installation and Configuration files, Syntax, Operators, Variables, Constants, Control, Structure, Language construct and functions, Function – Syntax, Arguments, Variables, References, Returns and Variable Scope, Ajax Basics, Sending data to PHP with Ajax.

Text Books:

1. Robert. W. Sebesta, "Programming the World Wide Web", 4th Edition, Pearson Education, 2007.
2. Deitel, Deitel, Goldberg, "Internet & World Wide Web: How To Program", 3rd Edition, Pearson Education, 2006.

Reference Books:

1. Marty Hall and Larry Brown, "Core Web Programming"; 2nd Edition, Volume I & II, Pearson Education, 2001.

Detailed Syllabus for M.Tech. (CSE)

Batch: 2013-15

Course Title: Modern Web Programming Lab	Course Code: CSE251		
Credit: 1	L 0	T 0	P 2
Year: 1st	Semester: II		

List of Experiments

1. Create a simple HTML page for the home page of any website using HTML5.
2. Use CSS3 in the page developed in practical 1 to make it more attractive and add some animation to it using CSS3.
3. Creation of a XML document of 20 students of any university. Add their roll numbers, marks obtained in 5 subjects, total and percentage and save this XML document at the server.
4. Write a program that takes students' roll number as an input and returns the student's marks, total and percentage by taking the students' information from the XML document.
5. Write a program in java script to warn user if he enters numerical input greater than 4 digits.
6. Write a program in Java script to add element to the DOM.
7. Write a java servlet program to demonstrate session management.
8. Design a login, Registration and forgot password page using JSP.
9. Design a website using JSP and servlet.
10. Write a program in PHP to validate user.
11. Write a program in PHP demonstrate the session management in PHP.
12. Create a registration form using PHP.

Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Foundation of Computing – II	Course Code: CSE202						
Credit: 3	<table style="width: 100%; border: none;"> <tr> <td style="width: 33%; text-align: center;">L</td> <td style="width: 33%; text-align: center;">T</td> <td style="width: 33%; text-align: center;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1st	Semester: II						

Unit – 1 **(9L)**

Propositional Logic: Proposition, First order logic, Basic logical operations, Tautologies, Contradictions, Algebra of Proposition, Logical implication, Logical equivalence;

Mathematical preliminaries: alphabets, strings, languages, states, transition, transition graph, Deterministic Finite Automata, Non-Deterministic Finite Automata, Non-Deterministic Finite Automata with ϵ transitions, minimization of DFA.

Unit – 2 **(6L)**

Equivalence between NFA with and without ϵ transitions. NFA to DFA conversion; Equivalence between two DFA's, Regular Languages: Regular sets; Regular expressions, Arden's theorem, Construction of finite Automata for a given regular expression, Pumping lemma for regular sets. Closure properties of regular sets.

Unit – 3 **(9L)**

Context free grammar; Ambiguity in context free grammars; Normal forms: Chomsky normal form and Greibach normal form; Pumping Lemma for Context Free Languages, Closure property of CFL. Push Down Automata: Push down automata, definition; Acceptance of CFL, Acceptance by final state and acceptance by empty state and its equivalence; Equivalence of CFL and PDA;

Unit – 4 **(6L)**

Basic Parsing Techniques: Parsing-Top Down and Bottom-Up Strategies: General Consideration. Top Down Parsing: Brute-Force Method, Recursive Descent, & Predictive Parsing. Bottom-Up Parsing: Shift Reduce Parsing, Operator Precedence Parsing.

Unit – 5 **(12L)**

Turing Machine: Turing Machine, definition, model, Design of TM, Church's hypothesis, Types of Turing machines: Universal Turing Machine, diagonalization language: a non-re language; Halting problem, Properties of recursive and recursively enumerable languages, unsolvable decision problem, Post's Correspondence problem, undecidability of Post correspondence problem, Church turing Thesis.

3. Lewis H.P. & Papadimitrou, "Elements of Theory of Computation", C.H. Pearson, PHI.

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Modeling and Simulation	Course Code: CSE203
Credit: 3	L T P 3 0 0
Year: 1st	Semester: II

Unit-1 **(8L)**
Modelling: Definition of SYSTEM, system concepts, types of system, continuous and discrete systems, modelling process, verification and validation. **Simulation:** Introduction, classification of simulation models, advantages and disadvantages of simulation.

Unit-2 **(8L)**
Discrete system simulation: Monte Carlo method, Random Number Generation: Congruence generators, long period generators, uniformity and independence testing. Random Variate Generation: Location, scale and shape parameters, discrete and continuous probability distributions; Inverse transformation method.

Unit-3 **(7L)**
Queuing Theory: Introduction, notation and assumption, Little’s theorem, queuing model with poison input, exponential service and arbitrary service times, simulation of queuing system, simulation of single-server queue, Simulation of two server queuing system.

Unit-4 **(7L)**
Inventory Control: Elements of Inventory Theory, more complex inventory models, finite and infinite delivery rate model with and without back ordering, simulation of inventory systems.

Unit-5 **(10L)**
Evaluation of simulation: length of simulation runs, variance reduction techniques. Project Management: PERT/CPM techniques, simulation of PERT networks. Model as components of information systems, modelling for decision support. Virtual Reality: the ultimate interactive model.

Text Books:

1. Gordon G., System Simulation, Prentice-Hall.
2. Deo Narsing, System Simulation, McGraw Hill

Reference Books:

1. Payne J.A., Introduction to Simulation, McGraw Hill.
2. Banks, J., Carson, L.S., Nelson, B.L. and Nicol, D.M., “Discrete Event System Simulation”, 3rd Ed., Pearson Education.

Course Title: Modeling and Simulation Lab	Course Code: CSE253
Credit: 1	L T P 0 0 2
Year: 1st	Semester: II

Programs will be based on random number generation, modeling & simulation using Matlab.

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Advanced Database Management System (<i>Elective-III</i>)	Course Code: CSE221		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT-1 **(8L)**

DBMS Architecture, Relational Algebra (Unary & Binary Operations, Aggregate Functions, Joins), Tuple Calculus, Domain Calculus, SQL (DDL, DML, Aggregate Functions, Joins)

UNIT-2 **(8L)**

Normalization- Normal Forms, Functional Dependency, Multivalued Dependency, Join Dependency

UNIT-3 **(8L)**

Indexing and Hashing- Ordered Indices, B+ Tree Index Files, Static Hashing, Hash Functions, Hash Indices, Dynamic Hashing, Comparison Of Ordered Indexing and Hashing, Index Definition in SQL, Multiple Key Access.

UNIT-4 **(8L)**

Query Processing- Overview, Measures of Query Cost, Selection Operation, Sorting, Join Operation, Aggregation, Evaluation of Expression, Materialization, Pipelining, Implementation Of Pipelining.

UNIT-5 **(8L)**

Query Optimization- Overview, Estimating Statistics of Expression Results, Catalog Information, Selection Size Estimation, Join Size Estimation, Transformation of Relational Expressions, Equivalence Rules

Text Book:

1. Silberschatz–Korth–Sudarshan , “Database System Concepts”.

Reference Book:

2. Ramez Elmasri and Shamkant B. Navathe “Fundamentals of Database Systems”.

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Advanced Computer Architecture (<i>Elective-III</i>)	Course Code: CSE222		
Credit: 3	L	T	P
	3	0	0
Year: 1st	Semester: II		

UNIT 1: Introduction (6L)

Parallel Computing, Parallel Computer Model, Program and Network Properties, Parallel Architectural Classification Schemes, Flynn's & Feng's Classification, Performance Metrics and Measures, Speedup Performance Laws: Multiprocessor System and Interconnection Networks; IEEE POSIX Threads: Creating and Exiting Threads, Simultaneous Execution of Threads, Thread Synchronization using Semaphore and Mutex, Canceling the Threads.

UNIT 2: Pipelining and Memory Hierarchy (9L)

Basic and Intermediate Concepts, Instruction Set Principle; ILP: Basics, Exploiting ILP, Limits on ILP; Linear and Nonlinear Pipeline Processors; Super Scalar and Super Pipeline Design; Memory Hierarchy Design: Advanced Optimization of Cache Performance, Memory Technology and optimization, Cache Coherence and Synchronization Mechanisms.

UNIT 3: Thread and Process Level Parallel Architecture (8L)

Introduction to MIMD Architecture, Multithreaded Architectures, Distributed Memory MIMD Architectures, Shared Memory MIMD Architecture, Clustering, Instruction Level Data Parallel Architecture, SIMD Architecture, Fine Grained and Coarse Grained SIMD Architecture, Associative and Neural Architecture, Data Parallel Pipelined and Systolic Architectures, Vector Architectures.

UNIT 4: Multi-core Architectures (8L)

Introduction to multi-core architectures, issues involved into writing code for multi-core architectures, development of programs for these architectures, program optimizations techniques, building of some of these techniques in compilers, OpenMP and other message passing libraries, threads, mutex etc.

UNIT 5: Developing Parallel Computing Applications (9L)

OpenMP Implementation in 'C': Execution Model, Memory Model; Directives: Conditional Compilation, Internal Control Variables, Parallel Construct, Work Sharing Constructs, Combined Parallel Work-Sharing Constructs, Master and Synchronization Constructs; Run-Time Library Routines: Execution Environment Routines, Lock Routines, Timing Routines; Simple Examples in 'C'. Basics of MPI.

Text Books:

1. Kai Hwang, "Advance Computer Architecture", TMH
2. Matthew, "Beginning Linux Programming", SPD/WROX
3. M. Matthew, "Beginning Linux Programming", SPD/WROX

Reference Books:

2. Dezso and Sima, "Advanced Computer Architecture", Pearson
3. Quinn, "Parallel Computing: Theory & Practice", TMH

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Advanced Computer Network (<i>Elective-III</i>)	Course Code: CSE223		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT-1 **(8L)**

Network Layer design Issues, IPv4, IPv6, Shortest Path Routing, Distance Vector Routing, Flooding, Hierarchical Routing, Broadcast Routing, Multicast Routing

UNIT-2 **(8L)**

Wireless Networks, GSM Architecture, CDMA, Mobility in networks, Handoffs.

Mobile IP- IP Packet Delivery, Agent Discovery, Registration, Tunneling and Encapsulation.

UNIT-3 **(8L)**

Mobile TCP- Traditional TCP (Congestion Control, Slow Start, Fast Retransmit/Fast Recovery), Indirect TCP, Snooping TCP, Mobile TCP, Selective Retransmission, Transaction Oriented TCP

UNIT-4 **(8L)**

Wireless LAN- Infrared Vs Radio Transmission, Infrastructure and Ad-hoc Network, IEEE 802.11-System Architecture, Protocol Architecture, Physical Layer, Bluetooth.

UNIT-5 **(8L)**

IP Security: Architecture, Authentication header, Encapsulating security payloads, combining security associations, key management, SSL.

Text Books:

1. Jochen Schiller, "Mobile Communications"
2. Andrew S. Tanenbaum, "Computer Networks," Pearson Education

Reference Books:

1. William Stallings, "Cryptography and Network Security Principles and Practices".

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: GIS (Elective-III)	Course Code: CSE224		
Credit: 3	L 3	T 0	P 0
Year: 3rd	Semester: II		

UNIT 1 (**8L**)

Introduction to GIS – definitions, concept and history of developments in the field of information systems; Computer fundamentals for GIS; Hardware and software requirements for GIS; Coordinate System and Projections in GIS – Conic, cylindrical and planner.

UNIT 2 (**8L**)

Data structure and formats; Spatial data models – Raster and Vector; Data inputting in GIS; Data base design - editing and topology creation in GIS, Linkage between spatial and non spatial data.

UNIT 3 (**8L**)

Spatial data analysis – significance and type, Attribute Query, spatial query; Vector based spatial data analysis; Raster based spatial data analysis; Buffer analysis.

UNIT 4 (**6L**)

Data quality and sources of errors; Integration of RS and GIS data; Digital Elevation Model; Network Analysis in GIS; Applications of GIS.

UNIT 5 (**10L**)

Data analysis and modelling in GIS– types of GIS modelling; Decision support systems. Overview of image processing & GIS Packages – ARC GIS, ERDAS, MAP INFO, ILWIS, GEOMEDIA, IDRISI. Recent Trends in GIS – AM/FM, Virtual 3D GIS, OLAP, Internet GIS, Open GIS, Cloud GIS.

Text Book:

1. Anji Reddy, M. 2004 : Geoinformatics for environmental management. B.S. Publications
2. Chang.T.K. 2002 : Geographic Information Systems. Tata McGrawHill
3. Heywood.I, Cornelius S, CrverSteve. 2003: An Introduction to Geographical Information Systems. Pearson Education

Reference Book:

1. Ram Mohan Rao. 2002: Geographical Information Systems. Rawat Publication.
2. Skidmore A.2002: Environmental modeling with GIS and Remote Sensing. Taylor and Francis
3. Tar Bernhardsen. Geographical Information Systems. John Wiley. Wise S.2002: GIS Basics. Taylor Publications

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Fuzzy Logic and Genetic Algorithms (<i>Elective-IV</i>)	Course Code: CSE225
Credit: 3	L T P 3 0 0
Year: 1st	Semester: II

UNIT 1 **(8L)**

Fuzzy Logic-I (Introduction)

Basic concepts of fuzzy logic, Fuzzy sets and Crisp sets, Fuzzy set theory, Basic operations, Properties of fuzzy sets, Fuzzy and Crisp relations, Fuzzy to Crisp conversion.

UNIT 2 **(8L)**

Fuzzy Logic –II (Fuzzy Membership, Rules)

Membership functions, Propositional logic and predicate logic, interference in fuzzy logic, fuzzy if-then rules, Fuzzy mapping rules, Fuzzy implications and Fuzzy algorithms, Fuzzyfication & Defuzzification, Fuzzy Controller, Industrial applications.

UNIT 3 **(8L)**

Neural Networks-1(Introduction & Architecture)

Basic model of a neuron. Neural network topologies: Feed forward topology and Recurrent topology; Neural network activation functions; Neural network learning algorithms: Supervised learning, Un-supervised learning, Reinforcement learning;

UNIT 4 **(8L)**

Neural Networks-II (Back propagation networks)

Topology of multi- layer perceptron, Backpropagation learning algorithm, Applications and limitations of Multi layer perceptron. Classification of Neural networks; Radial Basis Function networks: Topology, learning algorithm for RBF, Applications; Kohonen’s self-organising network: Topology, learning algorithm, Applications; Hopfield network: Topology, learning algorithm, Applications of Hopfield networks.

UNIT 5 **(8L)**

Basic concepts of Recurrent neural networks; Dynamics of recurrent neural networks; Architecture and Training algorithms and applications of Recurrent neural networks; Industrial commercial applications of Neural networks: Semiconductor manufacturing processes, Communication, Process monitoring and optimal control, Robotics, Decision fusion and pattern recognition.

Text Books:

1. S. Rajsekar & G.A. Vijayalakshmi Pai, “Neural Networks, Fuzzy Logic and Genetic Algorithm: Synthesis and Applications” Prentice Hall of India.

Reference Books:

4. Chin-Teng Lin and C.S.George Lee, “Neural Fuzzy Systems”, PHI , 1996

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Cryptography and Network Security (<i>Elective-IV</i>)	Course Code: CSE226		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT 1 **(8L)**
 Introduction to security attacks, services and mechanism, introduction to cryptography; classical encryption techniques; substitution ciphers and transposition ciphers, cryptanalysis, stream and block ciphers; Modern Block Ciphers: Block Cipher Design Principles and Modes of Operation ;Shannon’s theory of confusion and diffusion, fiestal structure, data encryption standard(DES), strength of DES, differential and linear crypt analysis of DES, triple DES, IDEA encryption and decryption, strength of IDEA, Evaluation criteria for AES; AES Cipher ; Placement of Encryption Function – Traffic Confidentiality

UNIT 2 **(8L)**
 Introduction to Number Theory ;Modular arithmetic ; Fermat’s and Euler’s theorem ; prime and relative prime numbers, primality testing; Principals of public key crypto systems, RSA algorithm, security of RSA, key management, Diffe-Hellman key exchange algorithm, introductory idea of Elliptic curve cryptography.

UNIT 3 **(8L)**
 Message Authentication and Hash Function: Authentication requirements, authentication functions, message authentication code,MDC ; hash functions, security of hash functions and MACS: Random Oracle Model ; MD5 message digest algorithm, Secure hash algorithm(SHA). Whirlpool Algorithm ; RIPEMD – HMAC ,NMAC ;Digital Signatures: authentication protocols, digital signature standards (DSS), proof of digital signature algorithm.

UNIT 4 **(8L)**
 Authentication Applications: KDC , KDC Requirements ; Kerberos – X.509; Revocation ; Trust Model; Authentication Service – Electronic Mail Security –PGP – S/MIME . IP Security: Architecture, Authentication header, Encapsulating security payloads, combining security associations.

UNIT5 **(8L)**
 Intrusion detection – password management – Viruses and related Threats – Virus Counter measures – Firewall Design Principles – Trusted Systems; Web Security: Secure socket layer and transport layer security, secure electronic transaction (SET).

Text Book:

1. B. Forouzan, “Cryptography and Network Security, TMH
2. William Stallings, “Cryptography And Network Security – Principles and Practices”, Prentice Hall of India, Third Edition, 2003.

3. Bruce Schneier, “Applied Cryptography”, John Wiley & Sons Inc, 2001

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Information System Management (<i>Elective-IV</i>)	Course Code: CSE227		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT 1 **(8L)**

Definition of Management Information System - Structure of MIS - Information system for decision making - The role of system analyst - Data base management system

UNIT 2 **(8L)**

Computes and Information Processing - Classification of computers - Main frames - Mini Computers workstations - microcomputers - super computers - Personal Computers - Input Devices - Computer mouse - touch screen - MICA - OCR - pen based input - digital scanners - voice input devices - sensors - Output devices - video display terminals - printers - plotters - voice output devices - Secondary storage - magnetic disk storage - magnetic tape storage - optical disk storage.

UNIT 3 **(8L)**

System Analysis - System Planning and the mutual investigation - Information gathering MIS Organisation - Top management - Data processing group's responsibility

UNIT 4 **(8L)**

Management and MIS - Strategic information system - MIS as competitive advantage - implications for managers - MIS support for planning, organizing, operating, controlling an knowledge work - specific function - finance - personnel - production - materials - marketing - computer - hardware and software - Data representation in computers - Batch Processing Vs. online processing.

UNIT 5 **(8L)**

Decision Support System - definition - examples of DSS - components - building DSS - Group Decision Support System - GDSS tools - role of GDSS - Executive System - role developing DSS - benefits - examples.

Text Book:

1. Gordan B. Davis ,Management Information System
2. Sadagopan - Management Information Systems - Prentice-Hall of India
3. Mudrick & Ross - Management Information Systems - Prentice -Hall of India

Reference Book:

1. Rajagopal SP - Management Information System
2. Lawrence S. On/la - Introduction to Business Data
3. Davis - Computer Data Processing
4. Laudon & Laudon - Management Information Systems - Prentice-Hall of India.

Department of Computer Science & Engineering
Detailed Syllabus for M.Tech. (CSE)
Batch: 2013-15

Course Title: Software Testing	Course Code: CSE228		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT 1 **(8L)**

Introduction: Terminology, evolving nature of area, Errors, Faults and Failures, Correctness and reliability, Testing and debugging, Static and dynamic testing, Exhaustive testing: Theoretical foundations: impracticality of testing all data, impracticality of testing all paths, no absolute proof of correctness.

UNIT 2 **(8L)**

Software V & V Approaches and their Applicability: Software technical reviews; Testing techniques and their applicability -functional testing and analysis, structural testing and analysis, error-oriented testing and analysis, hybrid approaches, integration strategies, transaction flow analysis, stress analysis, failure analysis, concurrency analysis, performance analysis; Proof of correctness; simulation and prototyping; Requirement tracing.

UNIT 3 **(8L)**

Software Testing: Levels of Testing, Functional Testing, Structural Testing, Test Plan, Test Case Specification, Software Testing Strategies, Verification & Validation, Unit, Integration Testing, Top Down and Bottom Up Integration Testing, Regression and Stress Testing, Alpha & Beta Testing, White box and black box testing techniques, System Testing and Debugging.

UNIT 4 **(8L)**

Test Generation: Test generations from requirements, Test generation pats, Data flow analysis, Finite State Machines models for flow analysis, Regular expressions based testing, Test Selection, Minimizations and Prioritization, Regression Testing.

UNIT 5 **(8L)**

Program Mutation Testing: Introduction, Mutation and mutants, Mutation operators, Equivalent mutants, Fault detection using mutants, Types of mutants, Mutation operators for C and Java.

Text Book:

1. Boris Beizer, Software Testing Techniques, John Wiley & Dreamtech (2002).
2. William Perry, Effective Methods for Software Testing, John Wiley & Sons, Inc. (2006) 3rd ed.

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Advanced Data Communication Network	Course Code: DCT101		
Credit: 3.5	L 3	T 1	P 0
Year: 1st	Semester: I		

UNIT 1. INTRODUCTION

Introduction of data networks: network elements, protocols, and applications, Protocols: OSI reference model, Physical Layer and Access Network Technologies: SONET, DSL, cable, PON ATM Protocols and Services, Physical, ATM, and AAL layers: functions and PDU formats ATM services. Local Area Networks: Ethernet, Fast Ethernet, Switched Ethernet, Gigabit Ethernet, Access control protocol, Performance analysis

UNIT 2. FRAME RELAY:

Frame format and functions, congestion control. Point-to-Point Protocol: PPP format and operations, Packet over SONET. Multi-Protocol Label switching: MPLS protocol, forwarding and control components, MPLS fast-reroute, Pseudo-wire emulation

UNIT 3. NETWORK LAYER

Internet Protocol Suite, Protocol model, Network layer protocols: IPv4, IPv6, ICMP, Transport layer protocols: TCP, UDP, RTP, Application protocols: Telnet, DNS, FTP, RTSP, HTTP, SNMP
Internet Routing: Unicast routing protocols: RIP, OSPF, IS-IS, BGP, Multicast routing protocols: DVMRP, MOSPF, CBT, PIM,

UNIT 4. TRANSPORT AND HIGHER LAYERS

Router/Switch Design: Architectures: single stage, multi-interconnect network, Performance analysis: queuing delay and cell loss ratio

UNIT 5. QOS AND TRAFFIC MANAGEMENT

QOS: QOS Protocols: IntServ/RSVP, DiffServ, MPLS, SBM, Queuing and scheduling disciplines, Congestion control techniques. Traffic Management: Network dimensioning, Call admission control, Usage parameter control/ Network parameter control, MPLS- Traffic engineering. Voice over IP: Codecs, Network architecture & protocols.

Text Books:

1. Computer Networks: A. S. Tanenbaum, 4th Edition, PHI (For I, II and III)

Reference Books:

1. An engineering Approach to Computer Networking, S. Keshav, Person Edition.
2. Computer Networking a top – Down Approach Featuring the Internet, J. F. Kurose, K. W. Ross, Pearson Education.

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Advanced Digital Modulations	Course Code: DCT102		
Credit: 3.5	L 3	T 1	P 0
Year: 1st	Semester: I		

UNIT 1: BASEBAND DIGITAL TRANSMISSION

Power Spectra of Digital PAM, Spectral Shaping by Preceding, Transmission Limitations of Digital PAM, M-ary Error Probabilities, Design of Matched Filters of Digital PAM, Nyquist Pulse Shaping, Optimum Terminal Filters, Equalization, Correlative Coding, Synchronization techniques in digital transmission.

UNIT 2: DIGITIZATION TECHNIQUES FOR ANALOG MESSAGES AND NETWORKS

PCM versus Analog Modulation, Delta-Sigma Modulation, Adaptive Delta Modulation, Differential PCM, LPC Speech Synthesis, Digital Multiplexers (ISDN, Optical SDH/SONET). Case studies related to Digitalization Techniques in communication Networks.

UNIT 3: CHANNEL CODING AND ENCRYPTION

Error Detection and Correction, Code Vectors, FEC Systems, ARQ Systems, Matrix Representation of Block Codes, Syndrome Decoding, Cyclic Codes, M-ary Codes, Convolution Codes, Convolution Encoding, Distance and Coding Gain, Decoding Methods, Turbo Codes, Data Encryption Standard, Rivest-Shamir-Adleman System, Case studies based on use of Channel coding techniques for optimization.

UNIT 4: BANDPASS DIGITAL TRANSMISSION

Coherent and non-coherent binary systems (OOK, BPSK, CPFSK, MSK), Quadrature-Carrier Systems, M-ary PSK Systems, M-ary QAM Systems, Comparison of Digital Modulation Systems, Trellis-Coded Modulation, Hard Versus Soft Decisions, Case studies on Comparison of Digital Modulation Systems

UNIT 5: TERRESTRIAL BASED WIRELESS COMMUNICATION

Terrestrial based wireless communication using smart antenna, Butler matrix, side lobe canceller in smart antenna application, look at switched beam smart antenna. Deterministic signals, random noise and coherent noise (pseudo) combining in an array antenna.

TEXT BOOKS:

1. A. Bruce Carlson, P.B. Crilly, Communication Systems, Tata McGraw Hill, 4th edition

REFERENCE BOOKS:

1. John G. Proakis, Digital Communication – 4th ed, Mc-Graw Hill publication.
2. Simon Haykin, Digital Communication, John Wiley, 1988

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Advanced Digital Signal Processing	Course Code: DCT103		
Credit: 3.5	L 3	T 1	P 0
Year: 1st	Semester: I		

UNIT 1: FAST FOURIER TRANSFORMS:

Fast Fourier transforms (FFT) - Radix-2 decimation-in-time and decimation-in-frequency FFT Algorithms, Inverse FFT and FFT with general Radix-N

UNIT 2: REALIZATION OF DIGITAL FILTERS:

Applications of Z - transforms, solution of difference equations of digital filters, System function. Stability criterion. Frequency response of stable systems, Realization of digital filters - Direct, Canonic, Cascade and Parallel forms

UNIT 3: IIR & FIR DIGITAL FILTERS:

Analog filter approximations - Butterworth and Chebyshev, Design of IIR Digital filters from analog filters. Step and Impulse invariant techniques. Bilinear transformation method, Spectral transformations. Characteristics of FIR Digital Filters. Frequency response. Design of FIR Filters: Fourier Method. Digital Filters using Window Techniques, Frequency Sampling technique, Case study on Comparison of various IIR & FIR filters

UNIT 4: MULTIRATE DIGITAL SIGNAL PROCESSING:

Introduction. Down sampling, Decimation. Up sampling, Interpolation, Sampling Rate Conversion, conversion of band pass signals. Concept of re-sampling. Case study on Applications of multi rate signal processing

UNIT 5: FINITE WORD LENGTH EFFECTS:

Limit cycles. Overflow oscillations. Round-off noise in I.IR digital filters. Computational output round off noise. Methods to prevent overflow. Trade-off between round-off and overflow noise. Measurement of coefficient quantization effects through pole-zero movement. Dead band effects.

TEXT BOOKS:

1. Digital Signal Processing, Principles, Algorithms, and Applications: John G. Proakis, Dimitris Manolakis. Pearson Education / PHI. 2007.
2. Discrete Time Signal Processing-A. V. Oppenheim and R.W. Schaffer. PHI, 2009
3. Fundamentals of Digital Signal Processing - LoneyLudeman. John Wiley, 2009
4. Digital Signal Processing- S. Palani- Ane Books Pvt. Ltd., 2013

REFERENCE BOOKS:

1. Digital Signal Processing - Fundamentals and Applications - Li Tan, Elsevier. 2008
2. Fundamentals of Digital Signal Processing using Matlab - Robert J. Schilling. Sandra L, Harris, Thomson. 2007
3. Digital Signal Processing - S.Salivahanan. A.Vallavaraj and CGnanapriya.TMH.2009

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Optical Communication Networks	Course Code: DCT104		
Credit: 3.5	L 3	T 1	P 0
Year: 1st	Semester: I		

UNIT 1: OPTICAL FIBER:

Optical fiber modes and configuration, Mode theory of circular waveguide, Single mode fiber, Attenuation and distortion in optical waveguide, Design optimization of single mode fiber.

UNIT 2: OPTICAL SOURCES AND DETECTORS:

LED: structure, materials, efficiency, and modulation. LASER: lasing action, threshold condition, rate equation, efficiency, modulation. Light source linearity, noises. PHOTODIODES: structure and principle of working, Photodetector noise, SNR.

UNIT 3: OPTICAL RECEIVER AND TRANSMISSION SYSTEMS:

Fundamental receiver operation and detailed performance calculations. Point to point link analysis, Noise effects on system performance. Carrier to noise ration evaluation for analog link

UNIT 4: WDM CONCEPTS AND COMPONENTS:

Operational principle of WDM, Passive components: Couplers, Multiplexers & Filters, Tunable sources. Semiconductor Optical Amplifier: pumping and amplifier gain, EDFA, Wavelength converters.

UNIT 5: OPTICAL NETWORKS:

Basic networks, network topologies. SONET / SDH: transmission formats and speed, optical interface, SONET/SDH rings. Broadcast-and-select WDM networks, Wavelength routed networks: optical cross connect, nonlinear effects on network performance.

TEXT BOOKS:

1. Gerd Keiser, "Optical Fiber Communication", McGraw Hill, Third Edition,
2. G.P Agrawal, "Fiber Optic Communication Systems", John Wiley and Sons, Fourth Edition, 2010.
3. Rajiv Ramaswami and Kumar N. Sivarajan, "Optical Networks: A Practical Perspective", Harcourt Asia Pte Ltd., Second Edition 2006

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Advanced Communication Technology	Course Code: DCT201
Credit: 3.5	L T P 3 1 0
Year: 1st	Semester: II

UNIT 1: SOFTWARE DEFINED RADIO:

Operating principles- Ideal concept, Receiver architecture, SPEAK easy phase I/II, Joint Tactical Radio System, Amateur Radio or Home Use, spectrum management, Resource management

UNIT 2: COGNITIVE RADIO:

Digital dividend, cognitive radio (CR) architecture, functions of cognitive radio, dynamic spectrum access (DSA), components of cognitive radio, spectrum sensing, spectrum analysis and decision, potential applications of cognitive radio. Case studies on cross-layer design for cognitive radio networks.

UNIT 3: OFDM PRINCIPLES:

Motivation for Multi Carrier Vs. Single Carrier, Sub Carrier Symbol Structure, Generation of OFDM symbols using the IFFT, Cyclic prefix (guard interval), OFDM signal bandwidth, Multipath interference on an OFDM symbol, Protecting against multipath using cyclic prefix, Reducing bandwidth (windowing Vs filtering), Peak-to-average power ratio (PAPR), Minimizing / reducing PAPR, SC-FDMA

UNIT 4: MIMO BASICS:

Motivation, Types of multi-antenna systems, MIMO vs. multi-antenna systems, Spectral efficiency and capacity, Transmitting independent streams in parallel, The generic MIMO problem, Singular Value Decomposition, Predistortion in MIMO systems, Disadvantages of predistortion in MIMO systems, Precoding and combining in MIMO systems, Advantages of precoding and combining, Disadvantages of precoding and combining, Beamforming Analog and Digital Networks, Case study: MIMO in LTE.

UNIT 5: LTE vs. WI-MAX:

3GPP evolution towards LTE/LTE-Advanced standardization, LTE/LTE-Advanced Radio Resource Management, Radio network deployment and frequency planning, Spectrum management, Satellite wireless mobile Communication, 4G Mobile WiMAX (IEEE 802.16m-2011), Femto cells in advanced WiMAX systems, WiMAX Interworking with LTE/LTE-Advanced networks , Mobile IP, IEEE 802.21 for seamless, Mobility , 4G regulation: Mobile WiMAX and LTE/LTE-Advanced

TEXT BOOKS:

1. Mitola III, J., "Cognitive Radio Architecture: The Engineering Foundation of Radio XML", Wiley-Interscience. 2006
2. Pietrzyk, S., "OFDMA for Broadband Wireless Access", Artech House. 2006
3. Gilsic, S.G., "Advanced Wireless Networks: 4G Technology", John Wiley & Sons. 2006

L	T	P					
3	1	0					
Year: 1st	Semester: II						

UNIT 1: THEORY OF PROBABILITY & RANDOM VARIABLE

THEORY OF PROBABILITY: Axioms of probability: set theory, probability space, conditional, probability. **CONCEPT OF RANDOM VARIABLE:** Introduction, distribution and density functions, specific random variables, conditional distributions.

UNIT 2: MULTIPLE RANDOM VARIABLES:

Bivariate distributions, one function of two random variables, two functions of two random variables, joint moments, joint characteristic functions, conditional distributions Multiple random variables, sequences of random variables

UNIT 3 :

CONCEPT OF STOCHASTIC PROCESSES & RANDOM WALKS AND APPLICATION

Definition, systems with stochastic inputs, power spectrum, discrete-time processes. **RANDOM WALKS AND OTHER APPLICATIONS:** random walks, Poisson points and shot noise, cyclo-stationary Processes, band-limited processes and sampling theory, deterministic signals in noise.

UNIT 4: SPECTRAL REPRESENTATION AND ESTIMATION:

Factorization and innovations, finite-order systems and state variables, spectral representation of random processes, ergodicity, spectrum estimation. **MEAN SQUARE ESTIMATION:** prediction, filtering and prediction, Kalman filters. Entropy: Basic concepts, random variables and stochastic processes, MEM.

UNIT 5: MARKOV CHAIN & QUEING THEORY:

Introduction, higher transition probabilities and the Chapman-Kolmogorov equation, classification of states, stationary distributions and limiting probabilities, transient states and absorption probabilities, branching processes. Markov processes. **QUEING THEORY:** Characteristics of Queuing Theory, Queuing Models, Birth & Death Process, Little's Theorem.

TEXT BOOKS:

1. Probability, Random Variables and Stochastic Processes/A. Papoulis & S. U. Pillai / 4th ed. /TMH
2. Probability, Random Variables & Random Signal Principles/Peyton Z. Peebles, Jr. / TMH
3. Probability& Queuing Theory, R. H. Chitale, Technical Publication Pune

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Wireless Communication Network	Course Code: DCT203		
Credit: 3.5	L	T	P
	3	1	0
Year: 1st	Semester: II		

UNIT 1: INTRODUCTION TO WIRELESS COMMUNICATION SYSTEMS

Evaluation of Mobile Radio Comm. – Examples of wireless comm. Systems – Cordless Telephone system – cellular Telephone systems – Comparison & Trends. Modern wireless comm. systems - 2nd, 3rd and 4th Generation wireless networks, WLL, WLANS.

UNIT 2: CELLULAR CONCEPT

System design fundamentals – Frequency re – use Channel assignment and hand off strategies – Interference and system capacity – trunking and grade of services – Importing coverage and capacity in cellular systems.

UNIT 3: Radio Propagation and Cellular Engineering. Concepts – Fundamental Radio Propagation – Propagation Characteristics – Models of Multi – parts faded radio signals – Industry Standards for Propagation Models. (Refer Text Book – 2)

UNIT 4: MULTI-ACCESS TECHNIQUES OF WIRELESS COMMUNICATION

Introduction – FDMA, TDMA – Spread Spectrum multiple accesses: FDMA, CDMA, SDMA, Spread Spectrum techniques- FHSS, DSSS.

UNIT 5: WIRELESS NETWORKS

Introduction – Development of wireless networks, Traffic routing in wireless networks: CKT switching, Packet Switching, X.25 protocols – Wireless data services – Common Channel signaling (CCS) – ISDN – Signaling system no (S7): Network services part, User part, Signaling Traffic, Performance.

TEXT BOOKS:

1. Wireless Communications Principles and Practice, Second Edition – Theodore S. Rappaport Pearson Education Inc.,
2. Wireless Digital Communication – Modulation, 2 Spread Spectrum Applications – Dr. Kamilo Feher, PHI.

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Coding for Reliable Communication (PG Elective-1)	Course Code: DCT111		
Credit: 3.5	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT 1: INFORMATION AND CHANNELS CAPACITY:

Measure of information – information content of message – average information content of symbol m log independent sequence – Markov statistical model for information source – Entropy and information rate Markov channel capacity theorem some properties.

UNIT 2: SOURCE ENCODING:

Shannon's first fundamental theory – Noiseless coding – source with finite memory Shannon's second fundamental theorem on coding for memory less noise channels Shannon's encoding algorithm.

UNIT 3: DISCRETE COMMUNICATION CHANNELS:

Discrete communication channel's – rate of information transmission over a discrete channels – capacity of discrete memory less channel – discrete channel with memory – discrete channel with continuous noise – discrete channel with discrete noise.

UNIT 4: CONTINUOUS COMMUNICATION CHANNELS:

Continuous channels – Shannon – Hartley Theorem implication – continuous channels with continuous noise – Efficiencies of different communication system.

UNIT 5: ERROR CORRECTING CODES:

Galois field, Vector spaces and Matrices – block codes, binary cycle code – multiples Error correcting codes – Majority logic coding – Burst error correcting code – Tow dimensional Codes – ARQ – performance of coeds.

TEXT BOOKS:

1. J. Das, S. K. Mulick, P. K. Chatterjee, principles of Digital Communication, Wiley Estate limited 1986.

REFERNCE BOOKS:

1. K. Sam Shanmugham 'Digital and Analog Communication System', John Wiely& Sons 1985.
2. J. Viterbi and J.H.K. Omura, Principle of digital communication and coding. McGraw hill.

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Satellite Communication (PG Elective-1)	Course Code: DCT112		
Credit: 3.5	L	T	P
	3	0	0
Year: 1st	Semester: I		

UNIT 1: SATELLITE ORBITS

Elements of Satellite Communication. Orbital mechanics, look angle and orbit determination, launches & launch vehicle, orbital effects, Geostationary Orbit, Comparison of LEO, MEO and GEO.

UNIT 2: SPACE SEGMENT AND SATELLITE LINK DESIGN

Introduction; attitude and orbit control system; telemetry, tracking and command; power systems, communication subsystems, antenna subsystem, equipment reliability and space qualification.

UNIT 3: SATELLITE ACCESS

Modulation and multiplexing techniques for satellite links Introduction, space segment access methods, TDMA, FDMA, CDMA, SDMA, assignment methods. Case study on capacity analysis.

UNIT 4: SATELLITE LINK DESIGN

Introduction, general link design equation, system noise temperature, uplink design, downlink design, complete link design, effects of rain. Case Study on satellite link design.

UNIT 5: EARTH SEGMENT AND RELATED APPLICATION OF SATELLITES

Earth Station Technology-- Terrestrial Interface, Transmitter and Receiver, Types of earth stations, Earth Station architecture and design considerations, Introduction to communication satellites, satellite telephony, satellite television, satellite radio, satellite data communication services. Case study on QoS analysis of mobile satellite systems.

TEXT BOOKS:

1. Dennis Roddy, 'Satellite Communication', McGraw Hill International, 4th Edition, 2006.
2. Wilbur L. Pritchard, Hendri G. Suyderhoud, Robert A. Nelson, 'Satellite Communication Systems Engineering', Prentice Hall/Pearson, 2007.

Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Speech Processing (PG Elective-1)	Course Code: DCT113		
Credit: 3.5	L	T	P
	3	0	0
Year: 1 st	Semester: I		

UNIT 1.DIGITAL MODELS FOR THE SPEECH SIGNAL :

The process of speech production – Acoustic theory of speech production – Lossless tube digital models for speech signals.

UNIT 2. TIME DOMAIN MODELS FOR SPEECH PROCESSING:

Time dependent processing of speech short time energy & average magnitude, zero crossing rate, pitch period estimation short time auto correlation function, median smoothing and speech processing. Digital representation of speech waveform quantization – instantaneous and adaptive delta modulation, DPCM, Comparison of system.

UNIT 3.SHORT TIME FOURIER ANALYSIS :

Basic model short time analysis and synthesis of speech, implementation of filter bank summation methods using FFT, pitch detection, analysis – by – synthesis. Analysis – synthesis systems. Homomorphic speech processing complex cepstrum approach, pitch detection format detection, Homomorphic vocoder.

UNIT 4. LINER PREDICTIVE CODING OF SPEECH.

Principles of linear predictive analysis, solution of LPC Equation; prediction error signal, frequency DOMAIN REPRESENTATION OF lpc ANALYSIS, Relation between the various speech parameter Synthesis of speech from LP parameters and applications.

UNIT 5. SPEECH CODING:

Sub – band coding, transform coding channel Vocoder, format Vocoder, cepstral Vocoder, LP Vocoders. Vector quantizer coders.

TEXT BOOKS:

1. L. R. Rabiner & R. W. Schafer: Digital Processing of Speech Signals, PH.
2. Papamichalis, Practical approach to speech coding, PHI 1987.
3. OWENS, Signal Processing of Speech.
4. DEKKAR & PROAKIS, Digital Speech Processing.

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Optoelectronic Devices (PG Elective-1)	Course Code: DCT114		
Credit: 3.5	L	T	P
	3	0	0
Year: 1st	Semester: I		

UNIT 1. INTRODUCTION TO OPTICAL WAVE GUIDES:

Integrated optic – Substrate materials for optical integrated circuits – Optical wave guide modes – theory of planer wave guides – symmetric and symmetric slab wave guides – channel waveguides – strip loaded waveguides – losses in optical waveguides. Transverse couplers – prism couplers – Grating Tapered couplers – Fiber to waveguides couplers.

UNIT2. ELECTRO OPTIC MODULATORS :

Characteristics of switches and modulators – Electro optic effect – Single and dual channel wave guides – electro – optic modulator – Mach Zehnder type electro – optic modulator – Comparison of waveguides modulators.

UNIT 3. ACOUSTO – OPTIC MODULATOR:

Principle of acousto – optic effect – Raman – Nath type modulator – Bragg type deflectors and switches acousto – optic frequency shifters.

UNIT 4. MAGNETO OPTIC DEVICES :

Characteristics of magneto Optic effect – Non – reciprocal waveguides – Interaction between magnetic spin wave and Optic wave – Optical isolator – Optical isolator – Optical filter.

UNIT 5. NON LINEAR FIBER OPTICS AND APPLICATIONS :

Fiber non linear ties – Optical solutions – Nonlinear birefringence effects – Optical pulse compression – RF spectrum analyzer – Analog to digital converter – integrated optic Doppler velocimeter Opto electronic integrated circuits – Opto microwave applications.

TEXT BOOKS:

1. R. G. Hullsperger. Integrated Optics: Theory and Technology Springer, verlag series, 1991.
2. G. P. Agarwal, Nonlinear Optics, Academic Press, 1989.

REFERENCE BOOKS:

1. J. Wilson & J.F.B. Hawkes, Optoelectronics: An introduction prentice hall Inter nation's series, 1983.
2. L. J. Pansion. Electro optics, John Willy & sons, 1085.
3. L. Sharupic. N. Tugliv, Optoelectronics, MIR Publishers. 1987.

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Spread Spectrum System (<i>PG Elective-2</i>)	Course Code: DCT211
Credit: 3.5	L T P 3 0 0
Year: 1st	Semester: II

UNIT 1. PSEUDO – NOISE GENERATOR:

Forms of spread spectrum (SS) – Communication – advantage off spectrum spreading example of early models – processing, games and other fundamentals parameter jamming methods- liner feedback shift register sequence generation – M sequences and then statistical properness – correlation properness – nonpnear sequence – gold sequence.

UNIT 2. SPREAD SPECTRUM TECHNIQUE:

Coherent direct sequence system model of DS / BPSK system m – coded bit probability forartary, jammer wave font – chenof bound – performance under constant power board band noise jammer – pulse jammar – partial band jammar – multi tone jammar coded DS / BPSK system.

UNIT 3. FREQUENCY HOPPING SS SYSTEM:

Non coherent FH system model – coherent FH system – frequency synthesis – performance of FH QPK and FH DPSK system in presence of partial band jamming – Time hoping SS technique.

UNIT 4. SYNCHRONIZATION OF RECEIVER:

Acquistation and tracking in DS and receiver sequentially estimation matches filter techniques of acquisition and tracking delay locked loop Tau – Dither loop.

UNIT 5. APPLICATION:

Code division multiple acess in satellite communication, antijam military communication low – probability interrupt communication – mobile communication.

Batch: 2013-15

Course Title: Wireless Mobile and Smart Antenna (PG Elective-2)	Course Code: DCT212		
Credit: 3.5	L	T	P
	3	0	0
Year: 1st	Semester: II		

UNIT 1. PLANNER ANTENNAS

Planner antennas for mobile phone, two separate patches with dual feed design. Different patch micro strip type, patch with LC resonators, triple frequency PIFA type.

UNIT 2. MONOPOLE ANTENNA

Very low profile monopoles for internal mobile phone antenna. Branch line planner monopole, Branch patch monopole, Printed inverted F – type.

UNIT 3. BASE STATION ANTENNA FOR CELLULAR COMMUNICATION SYSTEMS :

Antenna for single band operations and for multi band operations. Antennas for dual polarized operations using different feeds.

UNIT 4. ANTENNAS FOR WLAN APPLICATIONS :

– WLAN access point antennas, surface mountable antenna, printed monopole antennas for dual band operations. Dielectric resonator antenna.

UNIT 5. INTEGRATION OF ANTENNAS:

Different operating bands, DCS and WLAN, DCS and GPS antennas.

TEXT BOOKS:

Kin. Lu. Wong “Planar Antennas for Wireless Communications,” WILEY inter Science

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Principles of Secure Communication (PG Elective-2)	Course Code: DCT213		
Credit: 3.5	L	T	P
	3	0	0
Year: 1st	Semester: II		

UNIT 1 DIRECT SEQUENCE SPREAD SPECTRUM SYSTEMS:

Model of SS digital communication system, direct sequence spread spectrum signal, error rate performance of the decoder, processing gain and jamming margin, uncoded DSSS signals, applications of DSSS signals in anti-jamming, low detectability signal transmission, code division multiple access and multipath channels, effect of pulsed interference on DSSS systems, Generation of PN sequences using m sequence and Gold sequences, excision of narrowband interference in DSSS systems, acquisition and tracking of DSSS system.

UNIT 2 FREQUENCY HOPPED SPREAD SPECTRUM SYSTEMS:

Basic concepts, slow and fast frequency hopping, performance of FHSS in AW GN and partial band interference, FHSS in CDMA system, Time hopping and hybrid SS system, acquisition and tracking of FH SS systems.

UNIT 3 CRYPTOGRAPHIC TECHNIQUES:

Classical encryption technique, Symmetric cipher model, cryptography and cryptanalysts, Substitution techniques, transposition techniques

UNIT 4 BLOCK CIPHER AND DATA ENCRYPTION STANDARD:

Block cipher principle, data encryption standard (DES) strength of DES, differential and linear cryptanalysts, block cipher design principles, simplified advanced encryption standard (S-AES), multiple encryption and triple DES, Block cipher modes of operation, stream ciphers and RC4 algorithm

UNIT 5 PUBLIC KEY CRYPTOGRAPHY:

Prime numbers, Fermat and Euler's theorem, Chinese remainder theorem, discrete algorithms, principles of public key cryptosystems, RSA algorithm, key management Diffie-Hellman key exchange, message authentication requirements and functions.

TEXT BOOKS:

1. Digital Communication by J.G. Proakis McGraw Hill 2nd Ed.
2. Cryptography and Network Security by W. Stallivgs 4th Ed., PHI
3. Digital Communication by Simon Haykin, Wiley.
4. Principle of Communication systems by Taub& Schilling TMH.
5. Cryptography and secure Communications by M.Y. Rhee, Mc Graw Hill

Batch: 2013-15

Course Title: DSP Processors and Architectures (PG Elective-2)	Course Code: DCT214
Credit: 3.5	L T P 3 0 0
Year: 1st	Semester: II

UNIT I: INTRODUCTION TO DIGITAL SIGNAL PROCESSING:

Introduction, A Digital signal – processing system, the sampling process, discrete time sequences. Discrete Fourier Transform (DFT) and Fast Fourier Transform (FFT), linear time – invariant systems, Digital filters, Decimation and interpolation, Analysis and Design tool for DSP Systems MATLAB, DSP using MATLAB.

UNIT 2: COMPUTATIONAL ACCURACY IN DSP IMPLEMENTATIONS:

Number formats for signals and coefficients in DSP systems, Dynamic Range and Precision, Sources of error in DSP implementations, A/D Conversion errors, DSP Computational error, D/A Conversion Errors, Compensating filter.

UNIT 3: ARCHITECTURES FOR PROGRAMMABLE DSP DEVICES

Basic Architectural features, DSP Computational Building Blocks, Bus Architecture and Memory, Data Addressing Capabilities, Address Generation Unit, Programmability and Program Execution, Speed Issues, Features for External interfacing.

UNIV 4: EXECUTION CONTROL AND PIPELING

Hardware looping, Interrupts, Stacks, Relative Branch support, Pipeling and Performance, Pipeline Depth, Interlocking, Branching effects, Interrupts effects, Pipeline Programming models.

UNIT 5: PROGRAMMABLE DIGITAL SIGNAL PROCESSORS

Commercial Digital signal – processing Devices, Data Addressing modes of TMS320C54XXDSPs, Data Addressing modes of TMS320C54XX Processors, memory space of TMS320C54XX Processors, Program Control TMS320C54XX instructions and Programming, On – Chip Peripherals, Interrupts of TMS320C54XX processors, Pipeline Operation of TMS320C54XX Processors.

TEXT BOOKS:

1. Digital signal processing – Avtar Singh and S. Srinivasan, Thomson Publications, 2004.
2. DSP Processor Fundamentals, Architectures & Features – Lapsley et al. S. Chand & Co. 2000.

Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Detection and Estimation Theory (<i>PG Elective-3</i>)	Course Code: DCT311		
Credit: 3.5	L	T	P
Year: 1 st	3	0	0
	Semester: II		

UNIT 1. STOCHASTIC SIGNAL :

Stochastic signal / orthogonal representation of signal random process, Markov process. Correlation. Function, power spectral density, Tcheloycheffi Inequality.

UNIT 2. DETECTION:

Detection, presences of noise, correlator, optimum filter, matched filter.

UNIT 3 HYPOTHESIS TESTING:

Weighed probabilities and hypothesis testing, compsite hypothesis, likelihood ratio detection Sequential detection.

UNIT 4 ESTIMATION :

Principles of estimation, properties of estimator. Comar – Rao bound, Bye’s maximum likelihood and current trends.

UNIT 5. ADAPTIVE ARRAY :

Compensation of a Adaptive Array, current Trends in Adaptive Array.

TEXT BOOKS:

1. Robert A. Monzmg and Thomas W. Miller Introduction to adaptive array john Willey and Sons 1980.

REFERENCE BOOKS:

1. L. E. Hudsom. Adaptive Principal Paragons Ltd. 1981.

Batch: 2013-15

Course Title: Wireless Ad-hoc Networks (PG Elective-3)	Course Code: DCT312		
Credit: 3.5	L	T	P
	3	0	0
Year: 1st	Semester: II		

UNIT 1.

Introduction to Ad-hoc Networks:

Need for ad-hoc networks, Applications, variations- Fully symmetric, Asymmetric environment, Asymmetric responsibility, Traffic variations, Mobility Patterns, Challenges, Hidden terminal problem, Exposed terminal problem, Routing in Ad-hoc.

UNIT2.

Unicast, Multicast Routing:

Types of routing protocols- proactive, reactive and Hybrid protocol, Flooding of Data, Advantages & disadvantages, Dynamic source Routing (DSR), Location Aided Routing (LAR), and Distance Routing Effect Algorithm for Mobility (DREAM), Geographic Distance Routing (GEDIR), Query Localization, Broadcast Storm Problem, Ad Hoc On-Demand Distance Vector Routing (AODV), Link Reversal Algorithm, Partial Reversal Method.

UNIT 3.

Partition, Geocast Routing, Power Aware Routing:

Temporally-Ordered Routing Algorithm(TORA), Core-Extraction Distributed Ad Hoc Routing (CEDAR), Link State Routing, Optimized Link State Routing (OLSR), Destination-Sequenced Distance-Vector (DSDV), Zone Routing Protocol (ZRP), Power-Aware Routing.

UNIT 4.

Medium Access Control:

Security Issues, Implementation Issues, Introduction, Background, Fundamentals of MAC Protocols.

UNIT 5.

Distributed Algorithms, Standards Activities, Open Problems:

Vulnerabilities of Mobile Adhoc Networks, Potential Attacks, Attack Prevention Techniques. Intrusion Detection Techniques. Introduction, Background, Range of Applications, Examples of Category 2 WSN Applications, Examples of Category I WSN applications, Another Taxonomy of VSN Technology.

TEXT BOOKS:

1. Prasant Mohapatra and Srihanamurthy, "Ad Hoc Networks Technologies and Protocols", Springer, Springer International Edition, 2009.

SUGGESTED READING:

1. KazemSohraby, Daniel Minoli, TaiebZnati, "Wireless Sensor Networks", A John Wiley & Sons, Inc., Publication-2007.

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Advanced Microwave Communication <i>(PG Elective-3)</i>	Course Code: DCT313		
Credit: 3.5	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT 1: MICROWAVE AND MILLIMETER WAVE DEVICES:

Overview of microwave and millimeter wave vacuum tube devices, limitations of microwave vacuum tubes, gyration vacuum tube devices.

Advances in microwave and millimeter wave solid state devices, Gunn devices, oscillator using Gunn diode, and injection locked oscillators, IMPATT devices, and microwave and mm wave performance of IMPATT. Other solid state devices like Tunnel diode, BARITT and TRAPAT.

UNIT 2. MICROWAVE AND MM WAVE CIRCUITS:

Review of scattering matrix concept in the light of vector network analyzer, impedance matching network, couplers, power dividers, resonators and filters.

Detectors, mixers, attenuators, phase shifters, amplifier and oscillator, Ferrite based circuits.

UNIT 3. ANTENNAS:

Hertzian dipole, loop antenna, helical antenna, frequency independent antenna: Du-Hamel principle, log spiral and log periodic dipole antenna array.

Babinet principle, waveguide slot antenna, microstrip antenna, horn antenna, parabolic reflector.

Antenna arrays and phased array antenna. Antenna measurement.

UNIT 4. MICROWAVE AND MM WAVE PROPAGATION:

Overview of basic radio wave propagation mechanisms, Friis transmission formula, plane earth propagation model, troposcatter systems, ionosphere propagation, duct propagation, microwave radio link and calculation of link budget.

UNIT 5.

Effect on radio wave propagation due to rain, fog, snow, ice, atmospheric gases, Earth's magnetic field.

TEXT BOOK:

1. David M Pozar, Microwave Engineering, John Wiley & Sons
2. R E Collin, Antenna & Radio wave Propagation, McGraw Hill Book Co.
3. Jordan&Balman, Electromagnetic waves & Radiating System
4. R E Collin, Microwave Engineering, McGraw Hill CO.

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Artificial Neural Networks <i>(PG Elective-3)</i>	Course Code: DCT314						
Credit: 3.5	<table style="width: 100%; text-align: center;"> <tr> <td>L</td> <td>T</td> <td>P</td> </tr> <tr> <td>3</td> <td>1</td> <td>0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 1 st	Semester: II						

UNIT 1:

Fundamentals Concepts and Models of Artificial Neural Systems:

Biological Neuron, Biological Neural Models and their artificial models, McCulloch – Pitts Neuron Model, Neuron Modeling for Artificial Neuron Models Neuron Systems. Models of Artificial Neural Networks: Feed forward network and feedback Network. Neural Processing, learning and adaptation; Supervised and Unsupervised learning.

UNIT 2:

Natural Network Learning Rules:

Hebbian Learning Rule, Perception Learning Rule, Delta Learning Rule Widrow – Hoff Rule, Correlation Learning Rule, Winner – Take – All Learning rule, Out Star Learning Rule, Summary of Learning rules.

UNIT 3:

Single Layer Perception Classifiers:

Classification Model, Features and Decision Regions, Discriminant Functions, linear Machine and Minimum Distance Classification, Nonparametric training concept Training and classification using the discrete perceptron: algorithm and example. Single Layer Continuous Perceptron's Network.

UNIT 4:

Multilayer Feed Forward Networks:

Linearly nonseparable pattern classification Delta Learning rule for Multiperceptron layer. Generalized Delta Learning rule. Feed forward Recall and Error Back Propagation Training: Examples of Error Back-Propagation. Training errors : Learning Factors; Internal weights, Cumulative Weight Adjustment versus Incremental Updating, Steepness of activation function, learning consent, momentum method, Network architecture Versus Data Representation, Necessary number of Hidden Neurons. Application of Back propagation Networks in pattern recognition & Image processing, Madalun: Architecture & Algorithms.

Unit 5: Single – Layer Feedback Networks :

Basic concepts of Dynamical systems. Mathematical Foundation of Discrete – Time Hop field Networks. Mathematical Foundation of Gradient – Type Hopfield Networks. Transient response of Continuous time Networks. Example Solution of Optimization Problems: Summing networks with digital outputs, Minimization of the Travelling salesman tour length, Solving Simultaneous Linear Equations.

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Seminar	Course Code: FCC310		
Credit: 4	L	T	P
	0	0	8
Year: 2nd	Semester: III		

Objective:

To assess the debating capability of the student to present a technical topic. Also to impart training to a student to face audience and present his ideas and thus creating in him self esteem and courage that are essential for an engineer.

Individual students are required to choose a topic of their interest from power electronics and drives related topics preferably from outside the M.Tech syllabus and give a seminar on that topic about 30 minutes. A committee consisting of at least three faculty members (preferably specialized in power electronics) shall assess the presentation of the seminar and award marks to the students. Each student shall submit two copies of a write up of his seminar topic. One copy shall be returned to the student after duly certifying it by the chairman of the assessing committee and the other will be kept in the departmental library. Internal continuous assessment marks are awarded based on the relevance of the topic, presentation skill, quality of the report and participation.

Course Title: Pre Dissertation	Course Code: FCC320		
Credit: 12	L	T	P
	0	0	24
Year: 2nd	Semester: III		

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (Digital Communication)
Batch: 2013-15

Course Title: Dissertation -II	Course Code: FCD110		
Credit: 16	L	T	P
	0	0	32
Year: 2nd	Semester: IV		

Objective:

To improve the professional competency and research aptitude by touching the areas which otherwise not covered by theory or laboratory classes. The project work aims to develop the work practice in students to apply theoretical and practical tools/techniques to solve real life problems related to industry and current research.

The project work can be a design project/experimental project and/or computer simulation project on any of the topics in power electronics/drives related topics. The project work is allotted individually on different topics. The students shall be encouraged to do their project work in the parent institute itself. If found essential, they may be permitted to continue their project outside the parent institute. Department will constitute an Evaluation Committee to review the project work. The Evaluation committee will consist of at least three faculty members of which internal guide and another expert in the specified area of the project shall be two essential members.

The student is required to undertake the master research project phase 1 during the third semester and the same is continued in the 4th semester (Phase 2). Phase 1 consist of preliminary thesis work, two reviews of the work and the submission of preliminary report. First review would highlight the topic, objectives, methodology and expected results. Second review evaluates the progress of the work, preliminary report and scope of the work which is to be completed in the 4th semester. The Evaluation committee consists of at least three faculty members of which internal guide and another expert in the specified area of the project shall be two essential members.

Course Title: Energy Resources	Course Code: E101		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I		

UNIT I:

Classification of Energy Sources, prospecting, extraction and resource assessment and their peculiar characteristics

UNIT II

Conventional energy Sources: Coal, Oil, Natural Gas, Nuclear and Hydro power etc.

UNIT III

Renewable Energy Sources: Solar, biomass, wind, tidal, geothermal, microhydel etc.- availability and potential, basic principles, systems used in practice and applications, resource assessment criteria.

UNIT IV

Direct use of primary energy sources, Conversion of primary into secondary energy sources such as Electricity, Hydrogen, Nuclear energy etc.

UNIT V

Energy Conversion through fission and fusion, Nuclear power generation etc.
Waste to Energy Conversion.

Batch: 2013-15

Course Title: Advanced Mathematics	Course Code: E102		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I		

UNIT-I

Numerical Techniques: Zeros of Transcendental and Polynomial equation using bisection method; Newton-Raphson method; Rate of convergence of above methods. Interpolation: Finite differences; difference tables; Newton's Forward and Newton's Backward Interpolation; Lagrange's and Newton divided difference formula for unequal intervals. Solution of system of Linear equations: Gauss-Seidal method; Crout method. Numerical Integration: Trapezoidal rule; Simpson's one-third rule; Simpson's three-eighth rule; Solution of ordinary differential (first order, second order and simultaneous) equations by Picard's and Fourth order Runge - Kutta methods.

UNIT-II

Partial Differential Equations (PDE)

Formation and Classification of PDE; Solution of One Dimension Wave Equation; and Heat Equation; Two Dimension Heat and Laplace Equation by Separation of variables Method.

UNIT-III

Integral Equations

Introduction, Conversion of a linear differential equation to an integral equation and vice versa; Solution of an integral equation; Integral equations with separable kernels; Solution of Fredholm and Volterra equation by the method of successive approximations.

UNIT-IV

Special Functions

Series solution of ODE of 2nd order with variable coefficient with special emphasis to Legendre and Bessel differential equation, Legendre polynomial of first kind, Bessel Function of first kind and their properties.

UNIT-V

System of Ordinary Differential Equations

Matrix Theory; Solution of linear system of differential equations by Matrix method; Eigen values and Eigenvectors; Unitary; Hermitian and Normal matrices

Department of Mechanical Engineering
Detailed Syllabus for M.Tech. (Energy Engg.)

Batch: 2013-15

Course Title: Advanced Heat Transfer	Course Code: E103		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I		

UNIT I

12L

Heat Conduction: Fourier's law, thermal conductivity of matter, heat diffusion equation for isotropic and anisotropic media, boundary and initial conditions; One-dimensional steady-state conduction through plane wall, cylinder and sphere, conduction with thermal energy generation, heat transfer from extended surfaces, radial fins and fin optimization; Transient conduction – lumped capacitance method and its validity, plane wall and radial systems with convection, semi-infinite solid.

UNIT II

10L

Heat Convection: Boundary layers concepts, laminar and turbulent flows, conservation equation, non-dimensional analysis, boundary layer equations, Reynolds analogy for turbulent flows; Forced convection inside tubes and ducts – correlations for laminar and turbulent forced convection; Forced convection over exterior surfaces – bluff bodies, packed beds, tube bundles in cross flow; Natural convection; Combined free and forced convection; Combined convection and radiation.

UNIT III

6L

Heat Transfer with Phase Change: Nucleate, film and pool boiling, boiling in forced convection; Filmwise and dropwise condensation

UNIT IV

8L

Thermal Radiation: Fundamental concepts, radiation intensity and its relation to emission, irradiation and radiosity, blackbody radiation, surface emission, surface absorption, reflection, and transmission, gray surface; Radiation exchange between surfaces, view factor, blackbody radiation exchange, radiation exchange between diffuse gray surfaces in an enclosure with absorbing and emitting media; Flame Radiation, solar Radiation.

UNIT V

4L

Numerical Methods in Heat Transfer: Finite difference method for numerical simulation of steady state and transient heat transfer problems.

Batch: 2013-15

Course Title: Advanced Fluid Mechanics	Course Code: E104		
Credit: 4	L	T	P
	4	0	0
Year: 1st	Semester: I		

UNIT I

Review of Basic Concepts: Concept of continuum, types of fluid, tensor analysis.

Basic Laws in Integral Form: Reynold's transport theorem, mass, momentum and energy equations in integral form and their applications.

UNIT II

Differential Fluid Flow Analysis: Continuity equation, Navier-Stokes equations and exact solutions, energy equation.

UNIT III

Ideal Fluid Flow Analysis: Two dimensional flow in rectangular and polar coordinates; Continuity equation and the stream function; Irrotationality and the velocity potential function; Vorticity and circulation; Plane potential flow and the complex potential function; Sources, sinks, doublets and vortices; Flow over bodies and d'Alembert's paradox; Aerofoil theory and its application.

UNIT IV

Low Reynolds Number Flow: Approximation of Navier-Stokes equation, approximate solutions of Navier-Stokes equation, Stokes and Oseen flows, hydrodynamic theory of lubrication.

Large Reynolds Number Flow: Prandtl's boundary layer equations, Blasius solutions, Falkner-Skan solutions, momentum integral equation, Halstein and Bohlen method, thermal boundary layers.

UNIT V

Compressible Fluid Flow: One dimensional isentropic flow, Fanno and Rayleigh flows, choking phenomenon, normal and oblique shocks.

Course Title: Power Plant Engineering (<i>PG Elective-I</i>)	Course Code: E112		
Credit: 4	L	T	P
	4	0	0
Year: 1st	Semester: I		

UNIT I

8L

Introduction: Choice of power generation; Load & Load duration curves; Load factor; Diversity factor; Load deviation curve; Load management; Number and size of generating unit; Cost of electrical energy; Tariff-Power factor improvement.

UNIT II

8L

Thermal Power Stations: Types of thermal power plants; elements of thermal power plant: Boiler, superheater, economizer, condenser, combustion chamber, gas loops and turbines etc., Site selection of Steam power plant, Principles of Electric Power station. General lay out. Instrumentation and control.

UNIT III

6L

Gas Turbine Power Plant: Types, Open and close cycle gas turbines; Components of the plant, Plant lay out, Combined cycle power plant.

UNIT IV

8L

Hydropower Plant: Mass curve and storage capacity; Classification; Components; Turbines- Characteristics and their selection; Governor; Plant layout and design; Auxiliaries; Underground, automatic, remote controlled, and pumped storage plants.

UNIT V

6L

Nuclear Power Plant: Basic principles, Elements of Nuclear power plant, Nuclear reactor and fuels, Hazards due to Nuclear power plants, Nuclear Instrumentation.

UNIT VI

6L

Diesel-electric Power Plant

Working principle, Elements of the plant, Starting and stopping; Efficiency and Heat balance; Plant layout

Energy Scenario - Basics of Energy and its various forms - Energy Management and -Audit -Material and Energy Balance -Energy Action Planning-Financial Management –Project Management -Energy Monitoring and Targeting -Global Environmental Concerns

UNIT – II

Energy Efficiency in Thermal Utilities - Fuels and Combustion-Boilers-Steam System-Furnaces - Insulation and Refractory -FBC Boilers -Cogeneration -Waste heat recovery

UNIT – III

Energy Efficiency in Electrical Utilities-Electrical Systems-Electric Motors-Compressed Air System-HVAC and Refrigeration System-Fans and Blowers-Pumps and Pumping System- Cooling Tower-Lighting System-Diesel Generating System-Energy Efficient Technologies in Electrical Systems

UNIT – IV

Energy Performance Assessment for Equipment and Utility systems -Boilers-Furnaces- Cogeneration, Turbines (Gas, Steam)- Heat Exchangers-Electric Motors and Variable Speed Drives-Fans and Blowers-Water Pumps-Compressors

UNIT – V

HVAC Systems-Lighting Systems-Performing Financial Analysis-Applications of Non- Conventional and Renewable Energy Sources-Waste Minimization and Resource Conservation

Department of Mechanical Engineering
Detailed Syllabus for M.Tech. (Energy Engg.)
Batch: 2013-15

Course Title: Energy Systems Modeling and Simulation	Course Code: E106		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: II		

UNIT – 1

Primary energy analysis - dead states and energy components - energy balance for closed and control volume systems - applications of energy analysis for selected energy system design - modeling overview - levels and steps in model development - examples of models – curve fitting and regression analysis.

UNIT – 2

Modelling and system simulation: Modeling of energy systems – heat exchanger - solar collectors – distillation - rectification turbo machinery components - refrigeration systems - information flow diagram - solution of set of non- linear algebraic equations - successive substitution - Newton Raphson method- examples of energy systems simulation.

UNIT – 3

Optimization techniques: Objectives - constraints, problem formulation - unconstrained problems - necessary and sufficiency conditions. Constrained optimization - lagrange multipliers, constrained variations, Linear Programming - Simplex tableau, pivoting, sensitivity analysis.

UNIT – 4

Energy economy models: Multiplier Analysis - Energy and Environmental Input / Output Analysis - Energy Aggregation –Econometric Energy Demand Modeling - Overview of Econometric Methods - Dynamic programming - Search Techniques - Univariate / Multivariate.

UNIT – 5

Applications and case studies: Case studies of optimization in Energy systems problems- Dealing with uncertainty probabilistic techniques – Trade-offs between capital and energy using Pinch analysis.

Suggested Books:

1. Eastop T.D & Croft D.R, Energy Efficiency for Engineers and Technologists.
2. Logman Scientific & Technical, ISBN-0-582-03184, 1990.
3. Reay D.A, Industrial Energy Conservation, 1st edition, Pergamon Press, 1977.
4. Larry C Whitetal, Industrial Energy Management & Utilization.
5. Power System Engineering 2nd Ed. D P Kothari, I J Nagrath, Tata McGraw-Hill Co 2008.

Department of Mechanical Engineering
Detailed Syllabus for M.Tech. (Energy Engg.)
Batch: 2013-15

Course Title: Energy Solar Systems	Course Code: E107		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: II		

UNIT I

Introduction: Energy demand and supply, energy crisis, conventional and non-conventional energy resources, solar energy applications.

Solar Radiation: Sun, solar radiation, attenuation by atmosphere, solar radiation on earth, measurement, presentation and utilization of data.

UNIT II

Heat Transfer Concepts: Radiation characteristics of surface and bodies, absorbance, reflectance and transmittance, selective surface, sky radiation and wind convection.

Flat Plate Collectors: General description of flat plate collectors, general characteristics, performance, short term and long term performance, design.

UNIT III

Focusing Collectors: General description of focusing solar collectors, concentrators, receivers and orienting systems, general characteristics, performance, materials, design

Energy Storage: Energy storage in solar process system, different types of storages, characteristics and capacity of storage medium, solar pond.

UNIT IV

Solar Heating and Cooling: Passive heating and cooling, nocturnal radiations, green house concept, ponds, active heating and cooling, solar water heaters, absorption cooling, combined solar heating and cooling systems, performance, economics of solar heating and cooling.

UNIT V

Solar Process Modeling: Solar process systems and components, component models, system models.

Solar Photovoltaics: Description and principle of working, performance characteristics, efficiency of solar cells, module design, PV systems, applications.

TEXT BOOKS

1. Artur V. Kilian, "Solar Collectors: Energy Conservation, Design and Applications", Nova Science Publishers Incorporated, 2009.
2. Soteris A. Kalogiru, "Solar Energy Engineering: Processes and systems", 1st edition, Academic press, 2009.
3. K.Sukhatme, SuhasP.Sukhatme, "Solar energy: Principles of thermal collection and storage", Tata McGraw Hill, 8th edition, 2008.
4. Duffie, J. A. & W.A. Beckman, "Solar Engineering of Thermal Processes", 3rd edition, John Wiley & Sons, Inc., 2006.
5. H.P. Garg, J.Prakash, "Solar energy fundamentals and applications", Tata McGraw Hill, 2006.
6. D.Yogi Goswami, Frank Kreith, Jan F.Kreider, "Principle of Solar Engineering", 2nd edition, Taylor and Francis, 2003.
7. G.N. Tiwari, "Solar energy: Fundamentals, Design, Modeling and Applications", CRC Press Inc., 2002.

Department of Mechanical Engineering
Detailed Syllabus for M.Tech. (Energy Engg.)
Batch: 2013-15

Course Title: Design of HV AC System (<i>Elective</i>)	Course Code: E115		
Credit: 4	L	T	P
	4	0	0
Year: 1st	Semester: II		

UNIT – 1

Scope of HVAC, Basics of HVAC Design., Heating & cooling load calculations.

UNIT – 2

Moist air properties and conditioning processes, Indoor & out door design conditions, Space air diffusion.

UNIT – 3

Heat transmission in building structures

UNIT – 4

Duct design & layouts,

UNIT – 5

System selection, Piping system, Distribution principles and refrigeration Piping & Systems

Department of Mechanical Engineering
Detailed Syllabus for M.Tech. (Energy Engg.)

Batch: 2013-15

Course Title: Gas Turbines and Compressors (<i>Elective</i>)	Course Code: E118		
Credit: 4	L	T	P
	4	0	0
Year: 1st	Semester: I		

UNIT I

Gas Turbines: Introduction, Thermodynamics of Axial Flow Turbine, Degree of Reaction, Preliminary Design Procedure for Turbine Stage.

UNIT II

Determination of Turbine Stage Efficiency, Axial Flow Turbine Performance, Compressor, Turbine Matching, Radial Inflow Gas Turbine, Thermodynamic Processes in Radial Inflow Gas Turbine

UNIT III

Centrifugal Fans Blowers and Compressors: Classification Performance Parameters and Characteristics, Change of Performance, Polytropic Efficiency, Preliminary Design of Centrifugal Compressors.

UNIT IV

Axial Flow Compressors: Introduction. Basic Theory, Preliminary Design of Compressor Stage, Determination of Stage Efficiency, Axial Flow Compressor Performance, Surge and Stall in Compressor and the Remedies.

UNIT V

Gas Turbine Power Plants: Fuel and fuel feed systems; combustion systems-design considerations and flame stabilization; regenerator types and design; gas turbine power; plant performance and matching; applications.

1. Ganesan, V., "Gas Turbines", Tata McGraw Hill, Publishing Company Ltd, 4th Reprint, 2002.
2. Saravanamuttoo, H.H., Rogers, GFC, Cohen, H., "Gas Turbine Theory", Pearson Education Ltd, 5th Edition, 2001.
3. Yahya, S.M., "Turbines Compressors and Fans", Tata McGraw Hill, Publishing Company Ltd, Second Edition, 2002.

Department of Mechanical Engineering
Detailed Syllabus for M.Tech. (Energy Engg.)
Batch: 2013-15

Course Title: Computational Heat Transfer	Course Code: E108		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: II		

UNIT – 1

Physical Phenomena Governing Differential Equation - Energy Equation – Momentum Equation - Nature of Co-ordinates -Discretization Methods

UNIT – 2

Parabolic Equations - Explicit, Implicit and Crank Nicholson Methods. Cartesian and Polar Co-ordinates - Mixed Boundary Condition -Jacobi - Gauss-siedel and SOR Methods.

UNIT – 3

Heat Condition And Convection Control Volume Approach - Steady and Unsteady One Dimensional Conduction - Two and Three Dimensional -Power Law Scheme – Simpler Algorithm.

UNIT – 4

General Applicability of the Method - Approximate Analytical Solution - Raleigh's Method. Galerikin Method, Solution Methods.

UNIT – 5

Isoparametric Element Formulations Conduction and Diffusion Equations.

Department of Mechanical Engineering
Detailed Syllabus for M.Tech. (Energy Engg.)
Batch: 2013-15

Course Title: Computational Fluid Dynamics	Course Code: E109		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: II		

UNIT – 1

Governing Equations of Fluid Flow, Finite Difference, Finite Volume, Finite Element Methods, Laplace Equation, Diffusion Equation or Wave Equation

UNIT – 2

Application of Finite Volume Method to Fluid Flow problems - Pressure Correction Techniques-Gauss Siedel, Gauss Jordan, Introduction to Multi grid Methods, Boundary Conditions

UNIT – 3

Structured and Unstructured Mesh- Introduction to CAD systems and Different Standards used for DATA Exchange

UNIT – 4

Governing Equations for Turbulent Flow, Rotating Machinery, Combusting Flow, Multi-phase Flow.

UNIT – 5

Simple Internal Flows: T-Junction, Driven Cavity, Manifold, Valves, External Flows: Flow Over Ahmed Body, Car-Reacting Flow in a Gas Burner, Multiphase Flow in an Air Lift Reactor.

Department of Mechanical Engineering
Detailed Syllabus for M.Tech. (Energy Engg.)
Batch: 2013-15

Course Title: Wind Energy Engineering	Course Code: E110		
Credit: 4	L	T	P
	4	0	0
Year: 1st	Semester: II		

UNIT I

Wind Energy Fundamentals: Wind Energy Basics, Wind Speeds and scales, Terrain, Roughness, Wind Mechanics, Power Content, Class of wind turbines, Atmospheric Boundary Layers, Turbulence.

UNIT II

Wind Measurements, Analysis and Energy Estimates: Instrumentation for wind measurements, Wind data analysis, tabulation, Wind resource estimation, Betz's Limit, Turbulence Analysis,
Aerodynamics Theory: Airfoil terminology, Blade element theory, Blade design, Rotor performance and dynamics, Balancing technique (Rotor & Blade), Types of loads; **Sources of loads.**

UNIT III

Wind Turbines Technology & Components : Wind turbines types:
Vertical Axis Type, Horizontal Axis, Constant Speed Constant Frequency, Variable speed Variable Frequency, Up Wind, Down Wind, Stall Control , Pitch Control, Gear Coupled Generator type, Direct Generator Drive ,PMG,Rotor Excited Sync Generator

UNIT IV

Wind Turbine Control & Monitoring System: Details of Pitch System & Control Algorithms, Protections used & Safety Consideration in Wind turbines, Wind Turbine Monitoring with Error codes, SCADA & Databases

UNIT V

Concept of Wind Farms and project cycle: Project planning, Site selection, Project execution, Operation and maintenance. Environmental concerns & Cost Economics

REFERENCE BOOKS

Detailed Syllabus for M.Tech. (Energy Engg.)
Batch: 2013-15

Course Title: Fuel and Combustion Technology (<i>Elective</i>)	Course Code: E111		
Credit: 4	L	T	P
	4	0	0
Year: 1st	Semester: II		

UNIT I

Fuels & Fuel Analysis: Combustion Stoichiometry, theoretical & actual combustion processes, Air fuel ratio.

UNIT II

Combustion Thermodynamics calculation of heat of formation & heat of combustion – First law analysis of reacting systems.

UNIT III

Heat Treatment Furnaces: Industrial furnaces – process furnaces – Kilns – Batch & continuous furnaces.

UNIT IV

Flame, Flame Structure, Ignition and Igniters : flame propagation – deflagration – detonations- flame front – Ignition – self & forced ignition – Ignition temperature.

UNIT V

Combustion Appliances: Gas burners- Functional requirement of burners – Gas burner Classification – Stoker firing –pulverized system of firing.

REFERENCE BOOKS

8. Combustion Engineering, Gary L.Berman & Kenneth W.Ragland, McGraw Hill International Edition.

Department of Mechanical Engineering
Detailed Syllabus for M.Tech. (Energy Engg.)
Batch: 2013-15

Course Title: Bio Energy Engineering	Course Code: E113		
Credit: 4	L	T	P
	4	0	0
Year: 1st	Semester: II		

UNIT – 1

Sources and Classification. Chemical composition, properties of biomass. Energy plantations. Size reduction, Briquetting, Drying, Storage and handling of biomass.

UNIT – 2

Feedstock for biogas, Microbial and biochemical aspects- operating parameters for biogas production. Kinetics and mechanism- High rate digesters for industrial waste water treatment.

UNIT – 3

Thermo chemical conversion of lignocelluloses biomass. Incineration, Processing for liquid fuel production. Pyrolysis -Effect of particle size, temperature, and products obtained.

UNIT – 4

Thermo chemical Principles: Effect of pressure, temperature , steam and oxygen. Fixed and fluidized bed Gasifiers- Partial gasification of biomass by CFB.

UNIT – 5

Combustion of woody biomass-Design of equipment. Cogeneration using bagasse- Case studies: Combustion of rice husk.

Department of Mechanical Engineering
Detailed Syllabus for M.Tech. (Energy Engg.)
Batch: 2013-15

Course Title: Energy Efficient Buildings (<i>Elective</i>)	Course Code: E114		
Credit: 4	L	T	P
	4	0	0
Year: 1st	Semester: I		

UNIT I

Architecture- Building Science and its significance, Indoor Environment, Components of Indoor Environment, Quality of Indoor Environment

UNIT II

Human Comfort-Thermal, Visual, Acoustical and Olfactory comfort. Concept of Sol-air temperature and its significance, Ventilation and its significance

UNIT III

Cooling and heating concepts, Passive concepts appropriate for the various climatic zones in India. Classification of building materials based on energy intensity.

UNIT IV

Energy Management of Buildings and Energy Audit of Buildings - Energy management matrix monitoring and targeting.

UNIT V

Energy Efficient Landscape Design -Modification of microclimate through landscape elements for energy conservation.

Course Title: I.C. Engine Combustion Process & Modeling (<i>Elective</i>)	Course Code: E116		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I		

UNIT I

Combustion process in CI and SI engines, flame structure and speed, spray structure

UNIT II

Engine combustion modeling-overview, Modeling of flame propagation and heat release, burning speed, flame propagation relation.

UNIT III

Knock fundamentals, auto ignition, knock models.

UNIT IV

Modeling spray, spray equation, droplet kinematics, fuel vaporization.

UNIT V

Modeling pollutant and soot formation in engines

Batch: 2013-15

Course Title: Instrumentation in Energy Systems (<i>Elective</i>)	Course Code: E117		
Credit: 4	L	T	P
	4	0	0
Year: 1st	Semester: I		

UNIT – 1

Measurement Errors - Materials, radiant storage- Transducer classification- Static and dynamic characteristics of transducers, Transient analysis of a control system

UNIT – 2

Temperature Measurement - Bimaterials, Pressure thermometers, Thermocouples, RTD, Thermistors, and Pyrometry, pyrometers- Calibration of Pressure measuring equipment.

UNIT – 3

Flow Measurement- Variable head flow meters- Rota meters, Electromagnetic flow meters, Hot wire anemometers, hot film transducers, Ultrasonic flow meters.

UNIT – 4

Air pollution and Miscellaneous Measurements- Particulate sampling techniques, SO₂, Combustion Products, Opacity , odour measurements - Measurement of liquid level, Humidity, O₂, CO₂ in flue gases- pH measurement.

UNIT – 5

Moving Iron/coil, Energy measurement, power factor meter-Analog signal conditioning, Amplifiers, Instrumentation amplifier, A/D and D/A converters, Digital data processing and Data acquisition system

Department of Mechanical Engineering
Detailed Syllabus for M.Tech. (Energy Engg.)
Batch: 2013-15

Course Title: Design of Heat Transfer Equipment (<i>Elective</i>)	Course Code: E119		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I		

UNIT I

Classification of heat transfer equipment's, Specifications for heat exchangers, Standards of heat exchangers, design methodology, LMTD and NTU methods.

UNIT II

Design of double pipe heat exchanger-study and performance- Design of shell and tube heat exchanger

UNIT III

Plate and spiral plate heat exchanger – plate heat exchanger for Dairy industry – Heat Pipes.

UNIT IV

Thermal design of heat exchange equipments such as Air pre-heaters, Economizer – Super heater and condensers

UNIT V

Compact heat exchangers, Analysis and design of cooling towers

Course Title: Energy Generation from Waste	Course Code: E120		
Credit: 4	L	T	P
	4	0	0
Year: 1st	Semester: II		

UNIT I

Sources, Types, Compositions, Properties Physical, Chemical and Biological - Collection - Transfer Stations – Waste minimization and recycling of Municipal Waste

UNIT II

Size Reduction - Aerobic Composting - Incineration for Medical /Pharmaceutical Waste -Environmental Impacts -Environmental Effects due to Incineration.

UNIT III

Land Fill Method- Types, Methods & Siting Consideration - Composition, Characteristics, generation, Control of Landfill Leachate & Gases – Environmental monitoring System for Land Fill Gases

UNIT IV

Sources and Nature of Hazardous Waste - Impact on Environment - Hazardous Waste - Disposal of Hazardous Waste, Underground Storage Tanks Construction, Installation & Closure.

UNIT V

Biochemical Conversion - Industrial , Agro Residues - Anaerobic Digestion – Biogas Production - Types of Biogas Plant-Thermochemical Conversion -Gasification - Types - Briquetting - Industrial Applications of Gasifiers - Environment Benefits

Unit I (12L)

Objects and classes, links and association, generalization and inheritance, aggregation, abstract class, multiple inheritance, meta data, candidate keys, constraints, Events and states, operations, nested state diagrams and concurrency, advanced dynamic modeling concepts, a sample dynamic model, Data flow diagram, specifying operations, constraints, a sample functional model. OMT (object modeling techniques) methodologies.

Unit II (10L)

The Rumbaugh OMT, The Booch methodology. c. Jacobson's OOSE methodologies, Unified Process. Introduction to UML, Important views & diagram to be modeled for system by UML. Use case diagram, Activity diagram, Object diagram, Class diagram, State diagram, Sequence diagram, Collaboration diagram.

Unit III (10L)

Java Programming: Introduction, Migrating from C++ to java, Operator, Data types, Variables, Methods & Classes, Multithread Programming, I/O, Java Applet.

Java Library: String Handling, Input/output exploring Java.io, Networking, Applets classes,

Event Handling, Introduction to AWT, Working with window, Graphics, AWT Controls, Layout

Manager and Menus, Images, Additional packages.

Unit IV (10L)

Database Connectivity: Overview of Database Driver Architecture, Introduction to JDBC Standard Extension API (javax.sql), Connection Pooling, JDBC Programming with ORACLE, MYSQL, etc., Batch Processing, Connecting to non-conventional databases, Use of Excel API, caching (case study with HSDB,CSQL), Working with Multiple Databases, Handling SQL escape syntax, Calling SQL functions, Database stored procedures.

Text Books:

1. James Rumbaugh etal, "Object Oriented Modeling and Design", PHI
2. Herbert Schildt, "The Complete Reference: Java", TMH.

Year: 1 st	Semester: I						

UNIT 1

8L

Introduction to Information Security Policies: About Policies – why policies are important – When policies should be developed – How Policy should be developed - Policy needs – Identify what and from whom it is being protected – Data security consideration – Backups, Archival storage and disposal of data - Intellectual Property rights and Policies

UNIT 2

8L

Policy Definitions: Standards – Guidelines - Procedures with examples - Policy Key elements - Policy format and Basic Policy Components - Policy content considerations - Program Policy Examples - Business Goal Vs Security Goals - Mission statement Format – Examples - Key roles in Organization - Business Objectives - Standards – International Standards.

UNIT 3

8L

Writing The Security Policies: Computer location and Facility construction - Contingency Planning - Periodic System and Network Configuration Audits - Authentication and Network Security – Addressing and Architecture – Access Control – Login Security – Passwords – User Interface – Telecommuting and Remote Access – Internet Security Policies – Administrative and User Responsibilities – WWW Policies – Application Responsibilities – E-mail Security Policies.

UNIT 4

8L

Maintaining the Policies: Writing the AUP - User Login Responsibilities - Organization’s responsibilities and Disclosures- Compliance and Enforcement – Testing and Effectiveness of Policies - Publishing and Notification Requirements of the Policies- Monitoring, Controls and Remedies - Administrator Responsibility - Login Considerations.

UNIT 5

8L

Security Management: Computer Security Objectives , Incident Response and Forensics - Management Responsibilities – Role of Information Security Department - Security Management and Law Enforcement – Security awareness training and support, Reporting of security Problems - Policy Review Process - The Review Committee-Sample Corporate Policies – Sample Security Policies

SUGGESTED BOOKS:

1. SCOTT BARMAN; Writing Information Security Policies, Sams Publishing, 2002
2. THOMAS.R.PELTIER; Information Policies , Procedures and Standards, CRC Press, 2004

Year: 1 st	Semester: I

UNIT 1

8L

Network Layer design Issues, IPv4, IPv6, Shortest Path Routing, Distance Vector Routing, Flooding, Hierarchical Routing, Broadcast Routing, Multicast Routing

UNIT 2

8L

Wireless Networks, GSM Architecture, CDMA, Mobility in networks, Handoffs. Mobile IP- IP Packet Delivery, Agent Discovery, Registration, Tunneling and Encapsulation.

UNIT 3

8L

Mobile TCP- Traditional TCP (Congestion Control, Slow Start, Fast Retransmit/Fast Recovery), Indirect TCP, Snooping TCP, Mobile TCP, Selective Retransmission, Transaction Oriented TCP

UNIT 4

8L

Wireless LAN- Infrared Vs Radio Transmission, Infrastructure and Ad-hoc Network, IEEE 802.11- System Architecture, Protocol Architecture, Physical Layer, Bluetooth.

UNIT 5

8L

IP Security: Architecture, Authentication header, Encapsulating security payloads, combining security associations, key management, SSL.

UNIT 1

8L

Overview of computer Forensics Technology: Introduction to computer forensics, Types of computer forensics i.e. Media Forensics, Network forensics (internet forensics), Machine forensic, Email forensic (e-mail tracing and investigations), Types of Vendor and Computer Forensics Services. Computer Forensics evidence and capture: Data recovery, evidence collection and data seizure, duplication and preservation of digital evidence, computer image verification and authentication.

UNIT 2

8L

Computer Forensics Analysis: Discovery of electronic evidence - electronic document discovery, identification of data- Time keeping, forensic identification and analysis of technical surveillance devices, reconstructing fast events

UNIT 3

8L

Performing Network Surveillance: Network forensics: Setting up the system, advanced network surveillance. Attackers goals: ICMP covert channelling, TCP covert channelling, HTTP. Establishing identity in cyberspace: Investigating IP address-MAC address-Tracing E-mails-E-mail address-Usernames-Nicknames and host names

UNIT 4

8L

Forensic tools and report generation: Recovery of Deleted files in windows and Unix, Analyzing network traffic, sniffers, Ethical Hacking, Hardware forensic tools like Port scanning and vulnerability assessment tools like *Nmap* , *Netscan* etc . Password recovery (tools like *John the ripper*, *L0phtcrack*, and *THC-Hydra*), Mobile forensic tools and analysis of called data record Template for computer forensic reports.

UNIT 5

8L

Prevention and detection of cybercrime – Cyber Policing Current statutes in India: Penalties & Offences under the Information Technology Act, Offences under the Indian Penal Code, Issues relating to investigation and adjudication of cybercrimes in India Digital evidence IT act 2000 and other legal provisions, Copyright law & Cyberspace, Trademark law & Cyberspace.

Text Books:

1. *Incident Response & Computer Forensics*. Mandia, k., Prosser, c., Pepe, m. 2nd edition. Tata-McGraw Hill, 2003.
2. *Guide to Computer Forensics and Investigations*, 2nd edition, Bill Nelson, Amelia Phillips, Frank Einfinger, and Chris Steuart , Thomson Learning
3. John R. Vacca, “Computer Forensics”, Firewall Media, 2004.

References:

1. *Digital Evidence and Computer Crime*, 2nd Edition , Eoghan Casey , academic Press File System Forensic Analysis by Brian Carrier , addition Wesley
2. *Windows Forensic Analysis DVD Toolkit (Book with DVD-ROM)*, Harlan Carvey, syngress Publication
3. *EnCE: The Official EnCase Certified Examiner Study Guide*, 2nd Edition , Steve Bunting , sybex Publication
4. Chad Steel, “Windows Forensics”, Wiley India, 2006.

6. Robert M Slade, “Software Forensics”, Tata McGrawHill, 2004.
7. *Cybercrime and intellectual property rights*, Harishchander, PHI, New Delhi.

Department of Information Technology

Course Structure for M.Tech Program in ISM

Batch: 2013-15

Course Title: Advanced Data Warehousing & Mining (<i>Elective-I/II</i>)	Course Code: CSE128
Credit: 3	L T P 3 0 0
Year: 1 st	Semester: I

UNIT-1

8L

Evolution of Database System Technology, Architecture of Data Mining System, Data Warehouse, Advanced Data and Information Systems and Advanced Applications, Data Mining Functionalities, Data Mining Task Primitives

UNIT-2

8L

Data Preprocessing, Descriptive Data Summarization, Data Cleaning, Data Integration and Transformation, Data Reduction, Data Discretization and Concept Hierarchy Generation

UNIT-3

8L

Data Warehouse Architecture, Data Warehouse Schemas, Multidimensional Data Model, OLTP, OLAP, OLAP operations, ROLAP, MOLAP, HOLAP

UNIT-4

8L

Market Basket Analysis, Apriori Algorithm, Mining Multilevel Association Rules, Classification and Prediction, Classification by Decision Tree Induction, Bayesian Classification, Classification by Back propagation

UNIT-5

8L

Cluster Analysis, Types of Data in Cluster Analysis, Partitioning Methods, K-Means Method, K-Medoids Method, DBSCAN, OPTICS

Mining Sequence pattern in Biological Data, Mining Multidimensional, Multilevel Sequential Pattern

SUGGESTED BOOKS:

1. Jiawei Han and Micheline Kamber, "Data Mining: Concepts and Techniques"

Department of Information Technology

Course Structure for M.Tech Program in ISM

Batch: 2013-15

Course Title: Soft Computing (<i>Elective-I/II</i>)	Course Code: CSE124						
Credit: 3	<table style="width: 100%; border: none;"> <tr> <td style="width: 33%; text-align: center;">L</td> <td style="width: 33%; text-align: center;">T</td> <td style="width: 33%; text-align: center;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1 st	Semester: I						

UNIT-1: INTRODUCTION TO SOFT COMPUTING 8L

Evolution of Computing, Intelligent Computing, Introduction to Soft Computing- Techniques and Structure, Constituents of Soft Computing- Historical Sketch and traditional AI, Features of Soft Computing, Hard Computing Vs Soft Computing, , Applications of Soft Computing, Machine Learning Basics.

UNIT-2: ARTIFICIAL NEURAL NETWORK 8L

Functions of a Biological Neuron, Introduction to Artificial Neural Network, Architecture of an ANN, Various models of ANN-Feed forward, Feed backward, Recurrent, Back Propagation, Perceptron, Radial Basis Function, Adaptive Resonance architectures, Machine Learning using Neural Network- Supervised learning, Unsupervised learning, Reinforcement learning.

UNIT-3: GENETIC ALGORITHM 8L

Introduction to Genetic Algorithms, Genetic representations, Difference between Genetic Algorithms and Traditional Methods, Application of GA in Machine Learning- Knowledge Acquisition, Importance and Goal of Traditional Optimization Methods, Classification of Search Techniques, Introduction to Hill climbing Simulated annealing, Decision Tree, Genetic operators, Mutation, Genetic Modeling- Offspring, Encoding, Fitness Function, Reproduction, Crossover, Inverse and Deletion, Generational Cycle, Convergences.

UNIT-4: FUZZY LOGIC 8L

Introduction to Fuzzy Logic, Crisp set and Fuzzy set, Basic concepts of Fuzzy sets, Membership Functions. Basic operations on Fuzzy sets, Properties of Fuzzy sets, Fuzzy relations, Propositional logic and Predicate logic, Fuzzy If – Then rules, Fuzzy mapping rules and Fuzzy implication functions, Fuzzyfications & Defuzzificataions, Fuzzy Controller, Applications of Fuzzy Logic.

UNIT-5: HYBRID SYSTEMS 8L

Integration of neural networks- fuzzy logic-genetic algorithms, Neuro-Fuzzy Modeling- Approaches of Neuro-Fuzzy Systems, Framework of Adaptive Neuro-Fuzzy Inference Systems(ANFIS), Hybrid Learning Algorithm, Neuro-Fuzzy Control, Other Hybrid System- Genetic–Fuzzy Systems, Neuro-Genetic Systems, Genetic-Fuzzy-Neural Network.

SUGGESTED BOOKS:

1. "Neural Network, Fuzzy Logic, and Genetic Algorithms - Synthesis and Applications", by S. Rajasekaran and G.A. Vijayalaksmi Pai, Prentice Hall.
2. "Soft Computing and Intelligent Systems - Theory and Application", by Naresh K. Sinha and Madan M. Gupta, Academic Press.
3. "Neural Networks: A Comprehensive Foundation", by Simon S. Haykin, Prentice Hall.
4. "Introduction To Fuzzy Sets And Fuzzy Logic", by M Ganesh, Prentice-Hall.
5. "Genetic Algorithms in Search, Optimization, and Machine Learning", by David E. Goldberg, Addison-Wesley.

Department of Information Technology

Course Structure for M.Tech Program in ISM

Batch: 2013-15

Course Title: Distributed Computing (<i>Elective-I/II</i>)	Course Code: CSE125		
Credit: 3	L 3	T 0	P 0
Year: 1 st	Semester: I		

UNIT 1 (8L)

Fundamentals of Distributed Computing: Architectural models for distributed computing systems, Issues and challenges in Distributed systems, Basic concepts in distributed computing such as clocks, message ordering, consistent global states.

Distributed Environments

Current systems and developments (DCE, CORBA, JAVA).

UNIT 2 (8L)

Coordination & Synchronization: Introduction, Distributed Mutual Exclusion, Elections, Multicast Communication, Atomic transactions, Deadlocks in Distributed systems.

Message Passing & Remote Procedure Calls : Features of a good message-passing system,

RPC model. Implementing RPC mechanism, Stub Generation, RPC Messages, Marshaling Arguments and Results, Server Management, Communication protocols for RPCs.

UNIT 3 (8L)

Distributed File Systems : Features of Good DFS, File Models, File-Accessing models, File

Service Architecture, File-sharing semantics, File Caching schemes, File replications.

UNIT 4 (8L)

Distributed Shared Memory: Shared memory consistency models, Page based distributed shared memory, Shared variable distributed shared memory, Object based distributed shared memory.

Replication: Introduction, System Model & Group Communication, Fault Tolerant Services, Transactions with Replicated Data.

UNIT 5 (8L)

Advanced Topics in Distributed Computing: High Performance Computing-HPF, Distributed and mobile multimedia systems. Adaptability in Mobile Computing. Grid Computing and applications. Fault tolerant Computing Systems.

SUGGESTED BOOKS:

1. Tannenbaum, A, Van Steen. Distributed Systems, Principles and Paradigm, Prentice Hall India, 2002
2. Tannenbaum, A. Distributed Operating Systems, Pearson Education. 2006
3. Attiya, Welch, "Distributed Computing", Wiley India, 2006
4. Singhal and Shivaratri, "Advanced Concepts in Operating Systems", McGraw Hill, 1994
5. Cameron Hughes, Tracey Hughes, "Parallel and distributed programming using C++", Pearson Education, 2005

Department of Information Technology

Course Structure for M.Tech Program in ISM

Batch: 2013-15

Course Title: INFORMATION THEORY & CODING (<i>Elective-I/II</i>)	Course Code: CSE123						
Credit: 3	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1 st	Semester: I						

UNIT 1

8L

INFORMATION THEORY: Information-Entropy, Information rate, classification of codes, Kraft McMillan inequality, Source coding theorem, Shannon-Fano coding, Huffman coding, Extended Huffman coding -Joint and conditional entropies, Mutual information - Discrete memoryless channels – BSC,BEC – Channel capacity, Shannon limit.

UNIT 2

8L

SOURCE CODING: TEXT, AUDIO AND SPEECH: Text- Adaptive Huffman Coding, Arithmetic Coding, LZW algorithm **Audio:** Perceptual coding, Masking techniques, Psychoacoustic model, MEG Audio layers I,II,III, Dolby AC3 **Speech:** Channel Vocoder, Linear Predictive Coding

UNIT 3

8L

SOURCE CODING: IMAGE AND VIDEO: Image and Video Formats – GIF, TIFF, SIF, CIF, QCIF **Image compression:** READ, JPEG **Video Compression:** Principles-I,B,P frames, Motion estimation, Motion compensation,H.261, MPEG standard

UNIT 4

8L

ERROR CONTROL CODING: BLOCK CODES: Definitions and Principles: Hamming weight, Hamming distance, Minimum distance decoding - Single parity codes, Hamming codes, Repetition codes - Linear block codes, Cyclic codes - Syndrome calculation, Encoder and decoder - CRC

UNIT 5

8L

ERROR CONTROL CODING: CONVOLUTIONAL CODES: Convolutional codes – code tree, trellis, state diagram - Encoding – Decoding: Sequential search and Viterbi algorithm – Principle of Turbo coding

TEXT BOOKS:

1. R Bose, “Information Theory, Coding and Cryptography”, TMH 2007
2. Fred Halsall, “Multimedia Communications: Applications, Networks, Protocols and Standards”, Perason Education Asia, 2002

REFERENC BOOKS:

Course Title: Theory of Computation (<i>Elective-I/II</i>)	Course Code: CSE127						
Credit: 3	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1 st	Semester: I						

UNIT 1 **(7L)**

Mathematical preliminaries, alphabets, strings, languages, states, transition, transition graph, generalized transition graph, Deterministic Finite Automata, Non-Deterministic Finite Automata, Non-Deterministic Finite Automata with ϵ transitions, minimization of DFA.

UNIT 2 **(8L)**

Conversions and Equivalence: Equivalence between NFA with and without ϵ transitions. NFA to DFA conversion; Equivalence between two DFA's, Limitations of FSM; Application of finite automata, Finite Automata with output- Moore & Melay machine and its conversion.

UNIT 3 **(10L)**

Regular Languages: Regular sets; Regular expressions, Arden's theorem, Construction of finite Automata for a given regular expression, Pumping lemma for regular sets. Closure properties of regular sets. Grammar Formalism: right linear and left linear grammars; Equivalence between regular linear grammar and FA,

Context free grammar; Derivation trees, sentential forms. Ambiguity in context free grammars; Normal forms: Chomsky normal form and Greibach normal form; Pumping Lemma for Context Free Languages, Closure property of CFL.

UNIT 4 **(7L)**

Push Down Automata: Push down automata, definition; Acceptance of CFL, Acceptance by final state and acceptance by empty state and its equivalence; Equivalence of CFL and PDA; Introduction to DCFL and DPDA.

UNIT 5 **(8L)**

Turing Machine: Turing Machine, definition, model, Design of TM, Computable functions Church's hypothesis, Types of Turing machines: Universal Turing Machine, Halting problem, Properties of recursive and recursively enumerable languages, unsolvable decision problem, undecidability of Post correspondence problem, Church turing Thesis.

SUGGESTED BOOKS

Text Books:

1. "Introduction to Automata Theory Language and Computation", Hopcroft H.E. and Ullman J. D., Pearson Education.
2. "Introduction to Languages and the Theory of Computation", J. C. Martin, 3rd edition, Tata McGraw-Hill.
3. "Formal Languages and Automata Theory", C.K.Nagpal, Oxford.

Reference Books:

1. Cohen, "Introduction to Computer theory", Wiley India.
2. "Elements of Theory of Computation", Lewis H.P. & Papadimitrou C.H. Pearson, PHI.

Department of Information Technology

Course Structure for M.Tech Program in ISM

Batch: 2013-15

Course Title: <u>Object Oriented Modeling & Design Lab</u>	Course Code: CSE-101		
Credit: 1	L 0	T 0	P 2
Year: 1st	Semester: I		

1. Design an object oriented model for a simple ATM (automatic teller machine).
2. Write a Java Program to define a class, define instance methods and overload them and use them for dynamic method invocation.
3. To successfully write program that involves Conditional Statements and control structure and a parameterized constructor.
4. Write a Java program to practice using String Buffer class and its methods.
5. Write a program to implement Exception Handling.
6. Write a program to implement multithreading (three threads using single run method).
7. Write a program for a calculator using Applet.
8. Write a Java program to demonstrate keyboard event.
9. Construct a JDBC connection using different Databases (Oracle, MySql, SqlServer etc).
10. Write a program for using Graphics class to display basic shapes and fill them, draw different items using basic shapes and set background and foreground colors.
11. Develop a GUI application of your choice with proper object oriented modeling.

Department of Information Technology

Course Structure for M.Tech Program in ISM

Batch: 2013-15

Course Title: <u>Modern Web Programming</u>	Course Code: CSE-201						
Credit: 3	<table style="width: 100%; border: none;"> <tr> <td style="width: 33%; text-align: center;">L</td> <td style="width: 33%; text-align: center;">T</td> <td style="width: 33%; text-align: center;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1 st	Semester: II						

Unit I

(8L)

An Introduction to **HTML**, History-Versions-Basic XHTML Syntax and Semantics-Some Fundamental HTML Elements-Relative URLs-Lists-tables-Frames-Forms-XML Creating HTML Documents Case Study, HTML5, New features of HTML5, SVG. The DOM- Introduction to the Document Object Model DOM History and Levels-Intrinsic Event Handling-Modifying Element Style-The Document Tree-DOM

Unit II

(8L)

Style Sheets: CSS-Introduction to Cascading Style Sheets-Features-Core Syntax Style Sheets and HTML, Type of style sheets, new features of CSS3, XML, Representing web data using XML, XML processing Event-oriented Parsing: SAX-Transforming XML Documents-Selecting XMLData: XPATH-Template based Transformations: XSLT-Displaying XML Documents.

Unit III

(8L)

Introduction to **JavaScript**, HTML and scripting languages, Where to insert JavaScript in HTML, The <script> tag, JavaScript variables and data types, Basic JavaScript programming concepts, Defining functions, Passing parameters and receiving data from functions, Variable scope and the **var** statement, The Document object, The Image object, Creating an image rollover effect, The Form object, The elements Input object, Common properties and methods, The Select and option objects, Interacting with HTML form elements, Validating data entered in a form

Unit IV

(10L)

Java Servlet: Servlet overview–the Java web server–your first servlet–servlet chaining–server side includes-Session management–security–HTML forms–using JDBC in servlets–applet to servlet communication, Session.

JSP: Introduction to JSP, JSP processing, JSP Application Design, Tomcat Server, Implicit JSP objects, Conditional Processing, Declaring variables and methods, Error Handling and Debugging, Sharing data between JSP pages- Sharing Session and Application Data. Accessing a database from a JSP page

Unit IV

(8L)

PHP-Introduction to PHP, History, Webserver, Xampp, Installation and Configuration files, Syntax, Operators, Variables, Constants, Control, Structure, Language construct and functions, Function – Syntax, Arguments, Variables, References, Returns and Variable Scope, Ajax Basics, Sending data to PHP with Ajax.

Course Title: <u>ETHICAL HACKING</u>	Course Code: ISM-201						
Credit: 3	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1 st	Semester: II						

UNIT 1

8L

Ethical hacking, Foot Printing- information gathering methodology, Hacking Tools, Scanning- Definition, Types of Scanning, Objectives of Scanning, Scanning Methodology, Counter measures; Enumeration- NetBios Null Sessions, Hacking tools - Enumerating User Accounts, Active Directory Enumeration and Countermeasures; System Hacking- Administrator password guessing, Password Cracking Algorithm, Automated Password Cracking, Types of Password Attacks, Hacking tools;

UNIT 2

8L

Trojans and Backdoors- Overt and Covert Channels, Indications of a Trojan Attack, Reverse Engineering Trojans, Backdoor Countermeasures; Sniffers- Working of Sniffer, Passive Sniffing, Active Sniffing, Hacking tools, Sniffing Countermeasures; Denial of Service- Goal of DoS, Impact and Modes of Attack, DoS Attack Classification, Countermeasures for Reflected DoS, Tools for Detecting DDoS Attacks;

UNIT 3

8L

Session Hijacking- Spoofing vs Hijacking, Steps in Session Hijacking, Types of Session Hijacking, Hacking Tools, Protection against Session Hijacking, IP Security; Hacking Web Servers- Popular Web Servers and Common Security Threats, Apache Vulnerability, Attack against IIS Console, Hacking Tools, Countermeasures, Increasing Web Server Security; Web Application Vulnerabilities- Web Application Hacking, Anatomy of an Attack, Web Application Threats, Carnivore, Google Hacking, Countermeasures;

UNIT 4

8L

Web Based Password Cracking Techniques- Authentication mechanisms, Password Guessing, Cookies, Password Crackers Available, Hacking Tools, Countermeasures; SQL Injection- Attacking SQL Servers, SQL Server Resolution Service (SSRS), Osq-L Probing, SQL Server Talks, Preventive Measures; Hacking Wireless Networks – Rouge Access Points, Scanning Tools, Sniffing Tools, Securing Wireless Networks;

UNIT 5

8L

Linux Hacking – Linux Vulnerabilities, Scanning Tools, Scanning Tools, Linux Security Tools, Advanced Intrusion Detection System, Linux Security Auditing Tool; Evading Firewalls, Intrusion Detection Systems, Intrusion Detection Tools, Penetration Testing – Penetration Test vs Vulnerability Test, Reliance on Checklists and Templates, Phases of Penetration Testing, Risk Analysis, Active Reconnaissance.

Department of Information Technology

Course Structure for M.Tech Program in ISM

Batch: 2013-15

Course Title: <u>Cryptography & Network Security</u>	Course Code: CSE-226		
Credit: 3	L 3	T 0	P 0
Year: 1 st	Semester: II		

UNIT 1

8L

Introduction to security attacks, services and mechanism, introduction to cryptography; classical encryption techniques; substitution ciphers and transposition ciphers, cryptanalysis, stream and block

ciphers; Modern Block Ciphers: Block Cipher Design Principles and Modes of Operation ;Shannon's theory of confusion and diffusion, fiestal structure, data encryption standard(DES), strength of DES, differential and linear crypt analysis of DES, triple DES, IDEA encryption and decryption, strength of IDEA, Evaluation criteria for AES; AES Cipher ; Placement of Encryption Function – Traffic Confidentiality

UNIT 2

8L

Introduction to Number Theory ;Modular arithmetic ; Fermat's and Euler's theorem ; prime and relative prime numbers, primarily testing; Principals of public key crypto systems, RSA algorithm, security of RSA, key management, Diffe-Hellman key exchange algorithm, introductory idea of Elliptic curve cryptography.

UNIT 3

8L

Message Authentication and Hash Function: Authentication requirements, authentication functions, message authentication code, MDC; hash functions, security of hash functions and MACS: Random Oracle Model; MD5 message digest algorithm, Secure hash algorithm(SHA). Whirlpool Algorithm; RIPEMD – HMAC, NMAC; Digital Signatures: authentication protocols, digital signature standards (DSS), proof of digital signature algorithm.

UNIT 4

8L

Authentication Applications: KDC, KDC Requirements; Kerberos – X.509; Revocation; Trust Model; Authentication Service – Electronic Mail Security –PGP – S/MIME. IP Security: Architecture, Authentication header, Encapsulating security payloads, combining security associations.

UNIT 5

8L

Intrusion detection – password management – Viruses and related Threats – Virus Counter measures – Firewall Design Principles – Trusted Systems; Web Security: Secure socket layer and transport layer security, secure electronic transaction (SET).

3	0	0					
Year: 1 st	Semester: II						

UNIT 1

8L

Introduction: Introduction to UNIX, Linux, GNU and Linux distributions, **Duties of the System Administrator,** The Linux System Administrator, Installing and Configuring Servers, Installing and Configuring Application Software, Creating and Maintaining User Accounts, Backing Up and Restoring Files, Monitoring and Tuning Performance, Configuring a Secure System, Using Tools to Monitor Security. **Booting and shutting down:** Boot loaders-GRUB, LILO, Bootstrapping, Init process, rc scripts, Enabling and disabling services, **The File System:** Understanding the File System Structure, Working with Linux- Supported File Systems, Memory and Virtual File Systems, Linux Disk Management Network Configuration Files.

UNIT 2

8L

System Configuration Files: System wide Shell Configuration Scripts, System Environmental Settings, Network Configuration Files, Managing the init Scripts, Configuration Tool, Editing Your Network Configuration **TCP/IP Networking:** Understanding Network Classes, Setting Up a Network Interface Card (NIC), Understanding Subnetting, Working with Gateways and Routers, Configuring Dynamic Host Configuration Protocol, Configuring the Network Using the Network, **The Network File System:** NFS Overview, Planning an NFS Installation, Configuring an NFS Server, Configuring an NFS Client, Using Automount Services, Examining NFS Security.

UNIT 3

8L

Connecting to Microsoft Networks: Installing Samba, Configuring the Samba Server, Creating Samba Users 3, Starting the Samba Server, Connecting to a Samba Client, Connecting from a Windows PC to the Samba Server **Additional Network Services:** Configuring a Time Server, Providing a Caching Proxy Server, Optimizing Network Services **Internet Services:** Secure Services, SSH, scp, sftp Less Secure Services (Telnet ,FTP, sync, rsh, rlogin, finger, talk and ntalk), Linux Machine as a Server, Configuring the xinetd Server, Comparing xinetd and Standalone, Configuring Linux Firewall Packages.

UNIT 4

8L

Domain Name System: Understanding DNS, Understanding Types of Domain Servers, Examining Server Configuration Files, Configuring a Caching DNS Server, Configuring a Secondary Master DNS Server, Configuring a Primary Master Server, Checking Configuration **Configuring Mail Services:** Tracing the Email Delivery Process, Mail User Agent (MUA), Introducing SMTP, Configuring Sendmail, Using the Postfix Mail Server, Serving Email with POP3 and IMAP, Maintaining Email Security **Configuring FTP Services:** Introducing vsftpd, Configuring vsftpd, Advanced FTP Server Configuration, Using SFTP

UNIT 5

8L

Configuring a Web Server: Introducing Apache, Configuring Apache, Implementing SSI, Enabling CGI, Enabling PHP, Creating a Secure Server with SSL **Providing Web Services:** Creating Mailing Lists, Setting Up Web-Based Email, Configuring an RSS Feed, Adding Search Functionality, **Optimizing Internet Services:** Optimizing LDAP Services, Optimizing DNS Services, Optimizing Mail Services, Optimizing FTP Services, Optimizing Web Services **System Administration:** updating system, upgrading and customizing kernel, Administering Users and Groups Installing and Upgrading Software Packages **Books:** 1. Beginning Linux by Neil Mathew 4th Edition 2. Red hat Linux Networking and System Administration by Terry Collings.

Course Title: MOBILE & WIRELESS SECURITY (<i>Elective III/IV</i>)	Course Code: IBB620
Credit: 3	L T P 3 0 0
Year: 1 st	Semester: II

Unit 1

8L

Research Directions in Security and Privacy for Mobile and Wireless Networks

Introduction , The State of the Art, Challenges for standard wireless networks, 802.11 Wireless Networks (Wi-Fi), 3G Wireless Networks , Challenges for sensor networks, Challenges for mesh and ad hoc networks , Challenges related to mobility , Security for new/emerging wireless technologies ,

Unit 2

6L

Pervasive Systems: Enhancing Trust Negotiation with Privacy Support, Introduction. Trust Negotiation. Weaknesses of Trust Negotiation., Extending Trust Negotiation to Support Privacy, Proposed Trust Protocol Extended to Support Privacy , Privacy Agreement.

Unit 3

8L

Applying Trust in Mobile and Wireless Networks: Introduction, Attack Analysis for MANETs , Passive attacks , Active attacks , Existing Trust Models, The PGP trust model, Decentralized trust mode, Distributed trust model., Distributed public-key trust model, Subjective logic trust model., Recent Trust Models, Ant-based trust algorithm, Using cooperative games and distributed trust ,computation in MANETs , Using semi rings to evaluate trust in MANETs

Unit 4:

10L

Routing Protocols in Mobile Ad Hoc Networks: Introduction, Mobile sensor networks, On-demand routing, Overview. Anonymous Routing Revisited. Anonymous routing not based on the on-demand approach, ANODR, SDAR

On Performance Cost of On-demand Anonymous Routing Protocols in Mobile Ad Hoc Networks: Introduction, Mobile sensor networks ,On-demand routing, Overview. Anonymous Performance Evaluation, Cryptoprocessing performance measurement, Simulation model, Routing performance measurement.

Unit 5

8L

Hardware/Software Solution to Improve Security in Mobile Ad-hoc Networks Detection, identification, and isolation of malicious nodes. Secure and QoS-aware routing Comprehensive Software/Hardware Schemes for Security in Ad-hoc Networks.

Managing Software Projects Project Management and the CMM, Project Management and CMMi, Project Management Process Framework Process Reference Models Capability Maturity Model (CMM), CMMi, PCMM, PSP, TSP, IDEAL, Process Definition Techniques.

UNIT 4

8L

Project Tracking and Control Defect Tracking, Issue Tracking, Status Reports, Milestone Analysis, Defect Analysis and Prevention Methods, Process monitoring and audit, Reviews, Inspections and Walkthroughs, Seven Core Metrics, Management indicators, Quality Indicators

UNIT 5

8L

Project Closure Analysis, Role of Closure Analysis in a project, Performing Closure Analysis, Closure Analysis Report , CCPDSR Case Study and Future Software Project Management Practices Modern Project Profiles, Next Generation software Economics, Modern Process Transitions

Books

1. Managing the Software Process by Watts S. Humphrey, published by Pearson Education
2. Software Project Management, by Walker Royce, published by Pearson Education

Department of Information Technology

Course Structure for M.Tech Program in ISM

Batch: 2013-15

Course Title: SOFTWARE TESTING (<i>Elective III/IV</i>)	Course Code: DCB660						
Credit: 3	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1 st	Semester: II						

UNIT 1

8L

Introduction: Terminology, evolving nature of area, Errors, Faults and Failures, Correctness and reliability, Testing and debugging, Static and dynamic testing, Exhaustive testing: Theoretical foundations: impracticality of testing all data, impracticality of testing all paths, no absolute proof of correctness.

UNIT 2

8L

Software V & V Approaches and their Applicability: Software technical reviews; Testing techniques and their applicability-functional testing and analysis, structural testing and analysis, error-oriented testing and analysis, hybrid approaches, integration strategies, transaction flow analysis, stress analysis, failure analysis, concurrency analysis, performance analysis; Proof of correctness; simulation and prototyping; Requirement tracing.

UNIT 3

8L

Software Testing: Levels of Testing, Functional Testing, Structural Testing, Test Plan, Test Case Specification, Software Testing Strategies, Verification & Validation, Unit, Integration Testing, Top Down and Bottom Up Integration Testing, Regression and Stress Testing, Alpha & Beta Testing, White box and black box testing techniques, System Testing and Debugging.

UNIT 4

8L

Test Generation: Test generations from requirements, Test generation pats, Data flow analysis, Finite State Machines models for flow analysis, Regular expressions based testing, Test Selection, Minimizations and Prioritization, Regression Testing.

UNIT 5

8L

Program Mutation Testing: Introduction, Mutation and mutants, Mutation operators, Equivalent mutants, Fault detection using mutants, Types of mutants, Mutation operators for C and Java.

Recommended Books

- 4 Glenford J. Myers, The Art of Software Testing, Wiley India Pvt. Ltd 2nd edition (2006)
- 5 Roger S. Pressman, Software Engineering, A Practitioner's Approach, McGrawHill International Edition (2009) 7th edition.
- 6 Ian Sommerville, Software Engineering, Addison-Wesley Publishing Company, (2006) 8th ed.

Department of Information Technology

Course Structure for M.Tech Program in ISM

Batch: 2013-15

Course Title: <u>Modern Web Programming Lab</u>	Course Code: CSE201		
Credit: 1	L	T	P
	0	0	2
Year: 1 st	Semester: II		

1. Create a simple HTML page for the home page of any website using HTML5.
2. Use CSS3 in the page developed in practical 1 to make it more attractive and add some animation to it using CSS3.
3. Creation of a XML document of 20 students of any university. Add their roll numbers, marks obtained in 5 subjects, total and percentage and save this XML document at the server.
4. Write a program that takes students' roll number as an input and returns the student's marks, total and percentage by taking the students' information from the XML document.
5. Write a program in java script to warn user if he enters numerical input greater than 4 digits.
6. Write a program in Java script to add element to the DOM.
7. Write a java servlet program to demonstrate session management.
8. Design a login, Registration and forgot password page using JSP.
9. Design a website using JSP and servlet.
10. Write a program in PHP to validate user.
11. Write a program in PHP demonstrate the session management in PHP.
12. Create a registration form using PHP.

Department of Information Technology

Course Structure for M.Tech Program in ISM

Batch: 2013-15

Course Title: <u>ETHICAL HACKING LAB</u>	Course Code: <u>ISM-251</u>						
Credit: 1	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	0	0	2
L	T	P					
0	0	2					
Year: 1st	Semester: II						

1. Find-out user account information using phishing technique.
2. Use the window registry to secure your PC.
3. Show trace-route on the following systems: www.hackingmobilephones.com, 203.94.11.12 and 203.94.12.11. You may use any of the available tools or your own tools.
4. Show WHOIS on www.hackingmobilephones.com. Then determine the various steps required to carry out *DNS spoofing* on a victim computer.
(In other words, normally when a user types www.hotmail.com in the browser, then the Hotmail website displays on the screen. However, if you want to show up the Yahoo website each time www.hotmail.com is typed on the victim's system, then what are the steps that you need to carry out on the victim's computer. You may use any of the available tools or your own tools.)
5. Carry out port scanning of ALL ports on the systems www.relianceinfo.com, www.hackingmobilephones.com and 203.94.11.12. You may use any of the tools or your own tools.
6. Using the tools and ICMP Scanning techniques, determine the operating system running on the following systems:
www.relianceinfo.com, www.hackingmobilephones.com and 203.94.11.12.
You may use any of the available tools or your own tools
7. Analyze email headers of absolutely any email that you have received. You may use any of the available tools or your own tools
8. Install a Trojan on a remote victim's system. You may use any of the available tools or your own tools
9. Install any of the sniffers on your system and use it to sniff all data packets exchanged while you use your browser to carry out a Google search query. Analyze the first twenty data packets recorded by the sniffer and recreate the Internet session i.e. describe what the first twenty data packets represent or what is going on.
10. Using the password cracking techniques, you need to crack the password of the ZIP file named XYZ.zip which has been stored in computer or uploaded to the website.
You may use any tools that are available on the Internet or your own scripts.
HINT: Make sure you try any password cracking techniques like password guessing, dictionary based attacks, brute force and so on.

Department of Information Technology

Course Structure for M.Tech Program in ISM

Batch: 2013-15

Course Title: <u>Cryptography & Network Security Lab</u>	Course Code: <u>ISM-256</u>		
Credit: 1	L	T	P
	0	0	2
Year: 1 st	Semester: II		

List of Experiments:

1. Implementation of DES using c or c++ with Linux or UNIX platform.
2. Implement Linear Congruential Algorithm for generating 5 pseudo-random number using C or C++.
3. Scanning for vulnerabilities using (Angry IP, HPing2, IPScanner, Global Network Inventory Scanner, Net Tools Suite Pack.)
4. Steganography using tools: Tool: Merge Streams, Image Hide, Stealth Files, Blindside, STools, Steghide, Steganos, Pretty Good Envelop, Stegdetect,.
5. Implement the Euclid algorithm to generate the GCD of an array of 10 integers in C or C++ with UNIX or Linux.
6. Lan Scanner using look@LAN, wireshark.
7. Understanding DoS Attack Tools- Jolt2, Bubonic.c, Land and LaTierra, Targa, Nemesy Blast, Panther2, Crazy Pinger, Some Trouble, UDP Flood, FSMax.
8. Footprinting using footprinting tools (Open Source & Free)(ex-nslookup, ARIN, Whois, Google Earth etc..)
9. Study of Kerberos authentication service.
10. Implement RSA algorithm using C or C++.
11. Study Secure electronic transaction (SET).

Batch: 2013-15

Course Title: Advanced Mathematics	Course Code: PED101		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT-I

Linear Programming: Formulation, Graphical method, Simplex method, Two-Phase simplex method, Duality, Primal-dual relationship, Dual-simplex method.

UNIT-II

Matrices and Linear System of Equations:

Solution of linear system of equation by Gaussian elimination method and its modification, Crout's method, Iterative methods – Jacobian method, Gauss-Siedel method.

UNIT-III

System of Ordinary Differential Equations:

Matrix Theory, Solution of linear system of differential equations, Eigenvalues and Eigenvectors, Unitary, Hermitian and Normal matrices.

UNIT-IV

Z-Transform:

Definition of Z-transform, Linear property of Z-transform, Z-transform of elementary functions, Shifting theorem, Initial and final value theorem, Convolution theorems, Inverse of Z-transform.

UNIT-V

Fourier Transform:

Introduction, Fourier integral theorem, Fourier sine and cosine integral, Complex form of Fourier integrals, Fourier transform, Inverse Fourier transform, Properties, Modulation theorem, Convolution theorem for Fourier transform.

Reference Books:

5. R. Bronson – Matrix Methods: An Introduction, Elsevier.

Department of Electrical Engineering
Detailed Syllabus for M.Tech. (PED)
Batch: 2013-15

Course Title: Power Converters	Course Code: PED102		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

ANALYSIS OF SWITCHED CIRCUITS Ideal models of power switches – analysis of the thyristor controlled half wave rectifier – R, L, RL, RC load circuits – load circuit with electromotive force – thyristor specifications – heat sink calculations – Surge currents – limitation on di/dt, dv/dt, classification and analysis of commutation.

IMPROVED P.F. CONVERTERS Fully controlled and half controlled converters, Controlled freewheeling, sequence control of converters, simultaneous control of converters, PWM converters, power factor improvement techniques

DC-DC SWITCH MODE CONVERTERS DC-DC converter systems – control of DC-DC converters, Buck converters – Continuous and discontinuous modes – Boost converters – continuous and discontinuous modes – Buck boost converters – continuous and discontinuous and discontinuous modes. Cuck converters – continuous and discontinuous models – DC-DC converter comparison; ZVS and ZCS resonant converters.

CHOPPERS Classification of DC chopper circuits – analysis of type A chopper and type B chopper – voltage, current and load commutation of choppers – step up chopper – pulse width modulated AC choppers – Current topologies and Harmonic elimination methods.

INVERTERS Characteristics – output voltage and waveform control – bridge inverters – single phase and three phase versions – multilevel inverters: diode clamped MLI, flying capacitor MLI, cascade MLI,

Department of Electrical Engineering
Detailed Syllabus for M.Tech. (PED)
Batch: 2013-15

Course Title: Analysis of Machines	Course Code: PED103		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

INTRODUCTION – Unified approach to the analysis of electrical machine – basic two-pole machine – Kron’s primitive machine – voltage, power and torque equation – linear transformation from 3-phase to 2-phase - transformation from rotating axes to stationary axes – power invariance – park’s transformation for 3-phase synchronous and induction machines.

INDUCTION MACHINES – 3-phase induction machine- generalized model – voltage equation – electric transients in induction machines – applications in speed control of induction machine – induction motor modeling in arbitrary reference frame and in field oriented frame

POLYPHASE SYNCHRONOUS MACHINES – generalized machine equations – steady state analysis of salient pole and non salient pole machines – phasor diagrams – power angle characteristics – reactive power – short circuit ratio – transient analysis – sudden 3-phase short circuit at generator terminals – reactance – time constants – transient power angle characteristics.

Detailed Syllabus for M.Tech. (PED)
Batch: 2013-15

Course Title: Electric Drives	Course Code: PED104		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

COMPONENTS OF ELECTRICAL DRIVES – electric machines, power converter, controllers - dynamics of electric drive - torque equation - equivalent values of drive parameters- components of load torques types of load - four quadrant operation of a motor — steady state stability - load equalization – classes of motor duty- determination of motor rating

DC MOTOR DRIVES – dc motors & their performance (shunt, series, compound, permanent magnet motor, universal motor, dc servomotor) – braking – regenerative, dynamic braking, plugging – Transient analysis of separately excited motor – converter control of dc motors – analysis of separately excited & series motor with 1-phase and 3-phase converters – dual converter – analysis of chopper controlled dc drives – converter ratings and closed loop control - transfer function of self, separately excited DC motors – linear transfer function model of power converters – sensing and feeds back elements – current and speed loops

INDUCTION MOTOR DRIVES – stator voltage control of induction motor – torque-slip characteristics –operation with different types of loads – operation with unbalanced source voltages and single phasing – analysis of induction motor fed from non-sinusoidal voltage supply – stator frequency control – variable frequency operation – V/F control, controlled current and controlled slip operation – effect of harmonics and control of harmonics – PWM inverter drives – multi-quadrant drives – rotor resistance control – slip torque characteristic – torque equations, constant torque operation – slip power recovery scheme – torque equation – torque slip characteristics – power factor – methods of improving power factor – limited sub synchronous speed operation – super synchronous speed operation, introduction to vector control

SYNCHRONOUS MOTOR DRIVES – speed control of synchronous motors – adjustable frequency operation of synchronous motors – principles of synchronous motor control – voltage source inverter drive with open loop control – self-controlled synchronous motor with electronic commutation – self-controlled synchronous motor drive using load commutated thyristor inverter.

Year: 1 st	Semester: I						

MATLAB FOR SIGNAL PROCESSING - Introduction, What Is MATLAB? Testing and Looping, Functions and Variables, Plotting and Graphing, Loading and Saving Data, Multidimensional Arrays, Bitwise Operators, Vectorizing Code, Using MATLAB for Processing Signals.

SAMPLED SIGNALS AND DIGITAL PROCESSING - Processing Signals Using Computer Algorithms, Digital Representation of Numbers, Sampling, Quantization, Image Display, Aliasing, Reconstruction, Block Diagrams and Difference Equations Linearity, Superposition, and Time Invariance, Practical Issues and Computational Efficiency.

RANDOM SIGNALS - Random and Deterministic Signals, Random Number Generation, Statistical Parameters, Probability Functions, Common Distributions, Continuous and Discrete Variables, Signal Characterization, Histogram Operators, Median Filters. **REPRESENTING SIGNALS AND SYSTEMS:** Discrete-Time Waveform Generation, The z Transform, Polynomial Approach, Poles, Zeros, and Stability, Transfer Functions and Frequency Response, Vector Interpretation of Frequency Response, Convolution.

TEMPORAL AND SPATIAL SIGNAL PROCESSING - Correlation, Linear Prediction, Noise Estimation and Optimal Filtering, Tomography. **FREQUENCY ANALYSIS OF SIGNALS:** Fourier series, Phase-Shifted Waveforms, The Fourier Transform, Aliasing in Discrete-Time Sampling, Time-Frequency Distributions, Buffering and Windowing, FFT, DCT.

DISCRETE-TIME FILTERS - Filter Specification, Design and Implementation, Filter Responses, Non-recursive Filter Design, Ideal Reconstruction Filter, Filters with Linear Phase, Fast Algorithms for Filtering, Convolution and Correlation, Recursive filters.

Note: Minimum 8 experiments are to be performed from the following out of which at least three should be simulation based.

List of Experiments

1. IGBT based three phase inverter
2. IGBT based single phase PWM inverter
3. Three phase half wave cycloconverter
4. Simulation of Three phase semi converter
5. Simulation of Three phase fully controlled converter
6. Simulation of single phase dual converter
7. To study speed control of three phase induction motor using three phase voltage source inverter.
8. Simulation of single phase semiconverter for R, RL and RLE load
9. Simulation of three phase semiconverter for R, RL and RLE load
10. Simulation of three phase full bridge inverter at (a) 180 degree mode operation (b) 120 degree mode operation

Department of Electrical Engineering
Detailed Syllabus for M.Tech. (PED)
Batch: 2013-15

Course Title: Advanced Control System	Course Code: PED202		
Credit: 3	L	T	P
	3	0	0
Year: 1st	Semester: II		

REVIEW OF MODELING AND ANALYSIS OF LTI SYSTEMS:

Modeling of physical Systems. Design specifications and performance indices, Motion control systems, Transportation lags. Approximation of time-delay functions, Sensitivity of control systems to parameter variations. Effects of disturbance of signals. Disturbance rejection.

ANALYSIS IN STATE-SPACE:

A perspective on state-space design, State variables, State models for physical systems, SISO and MIMO systems, Solution of state equations. Transfer function, Eigenvalues and eigenvectors, Jacobian linearization technique, State transformations and diagonalisation, Transformation to phase-variable canonical form, Controllability and observability, Duality property, Stability.

INTRODUCTION TO DISCRETE-TIME SYSTEMS:

Basic elements of discrete-time control system, Z-transform and properties, Inverse Z-transform, Difference equation and its solution by Z-transform method, Z-transfer function, State diagram of digital systems, Time delay, Direct, cascade and parallel decomposition of Z-transfer functions.

FEEDBACK CONTROL DESIGN:

Continuous control design, Proportional, derivative and integral control action, PID controller tuning rules, Ziegler-Nichols method, Two degree of freedom control systems, Compensator design using Bode diagram in frequency response approach, Lag, Lead, Lag-lead compensator, Control law design for full state feedback by pole placement, Full order observer system, Observer based state feedback, Separation principal.

NON LINEAR SYSTEM:

Classification and types of non-linearity, Phenomena peculiar to non-linear systems, Methods of analysis, Linearization based on Taylor's series expansion, Jacobian Linearization, Phase trajectory and its construction, Phase-plane analysis of linear and non-linear systems, Existence of limit cycles, Describing function of typical non-linearities, Stability analysis by DF method, Introduction to DIDF, Popov's circle criterion, Stability analysis by Lyapunov's indirect and direct methods, Lypunov's theorem.

3. Genetic Algorithms- David E Goldberg.
4. Neural Networks, Fuzzy logic, Genetic algorithms: synthesis and applications by Rajasekharan and Rai – PHI Publication.
5. Introduction to Artificial Neural Systems - Jacek M. Zurada, Jaico Publishing House, 1997.

Department of Electrical Engineering
Detailed Syllabus for M.Tech. (PED)
Batch: 2013-15

Course Title: Power Quality (<i>Elective</i>)	Course Code: PED221		
Credit: 3	L	T	P
	3	0	0
Year: 1st	Semester: II		

INTRODUCTION Characterisation of Electric Power Quality: Transients, short duration and long duration voltage variations, Voltage imbalance, waveform distortion, Voltage fluctuations, Power frequency variation, Power acceptability curves – power quality problems: poor load power factor, Non linear and unbalanced loads, DC offset in loads, Notching in load voltage, Disturbance in supply voltage – Power quality standards.

NON-LINEAR LOADS Single phase static and rotating AC/DC converters, Three phase static AC/DC converters, Battery chargers, Arc furnaces, Fluorescent lighting, pulse modulated devices, Adjustable speed drives.

MEASUREMENT AND ANALYSIS METHODS Voltage, Current, Power and Energy measurements, power factor measurements and definitions, event recorders, Measurement Error – Analysis: Analysis in the periodic steady state, Time domain methods, Frequency domain methods: Laplace's, Fourier and Hartley transform – The Walsh Transform – Wavelet Transform.

ANALYSIS AND CONVENTIONAL MITIGATION METHODS Analysis of power outages, Analysis of unbalance: Symmetrical components of phasor quantities, Instantaneous symmetrical components, Instantaneous real and reactive powers, Analysis of distortion: On-line extraction of fundamental sequence components from measured samples – Harmonic indices – Analysis of voltage sag: Detorit Edison sag score, Voltage sag energy, Voltage Sag Lost Energy Index (VSLEI)- Analysis of voltage flicker, Reduced duration and customer impact of outages, Classical load balancing problem: Open loop balancing, Closed loop balancing, current balancing, Harmonic reduction, Voltage sag reduction.

POWER QUALITY IMPROVEMENT Utility-Customer interface –Harmonic filters: passive, Active and hybrid filters – Custom power devices: Network reconfiguring Devices, Load compensation using DSTATCOM, Voltage regulation using DSTATCOM, protecting sensitive loads using DVR, UPQC – control strategies: P-Q theory, Synchronous detection method – Custom power park – Status of application of custom power devices.

Batch: 2013-15

Course Title: Power Electronics for Renewable Energy Systems (<i>Elective</i>)	Course Code: PED222		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

INTRODUCTION

Environmental aspects of electric energy conversion: impacts of renewable energy generation on environment (cost-GHG Emission) - Qualitative study of different renewable energy resources: Solar, wind, ocean, Biomass, Fuel cell, Hydrogen energy systems and hybrid renewable energy systems.

ELECTRICAL MACHINES FOR RENEWABLE ENERGY CONVERSION

Review of reference theory fundamentals-principle of operation and analysis: IG, PMSG, SCIG and DFIG.

POWER CONVERTERS Solar: Block diagram of solar photo voltaic system -Principle of operation: line commutated converters (inversion-mode) - Boost and buck-boost converters- selection of inverter, battery sizing, array sizing

Wind: three phase AC voltage controllers- AC-DC-AC converters: uncontrolled rectifiers, PWM Inverters, Grid Interactive Inverters-matrix converters.

ANALYSIS OF WIND AND PV SYSTEMS

Stand alone operation of fixed and variable speed wind energy conversion systems and solar system-Grid connection Issues -Grid integrated PMSG and SCIG Based WECS Grid Integrated solar system

HYBRID RENEWABLE ENERGY SYSTEMS

Need for Hybrid Systems- Range and type of Hybrid systems- Case studies of Wind-PV Maximum Power Point Tracking (MPPT).

Batch: 2013-15

Course Title: Energy Management & Audit (<i>Elective</i>)	Course Code: PED223		
Credit: 3	L	T	P
	3	0	0
Year: 1st	Semester: II		

ENERGY SCENARIO: Energy sources, security, conservation, strategy, Basics of Energy and its various forms, Regulatory mechanism in power system, Electricity safety rules and regulations.

ENERGY MANAGEMENT & AUDIT: Energy costs, Benchmarking, efficiency, audit instruments, Energy Action Planning: Role, motivation, training, information systems.

ENERGY MONITOR OF ELECTRICAL SYSTEM: Power supply, Electricity billing, Electrical load management and maximum demand control, Power factor improvement and its benefit, Selection and location of capacitors, Performance assessment of PF capacitors, Distribution and transformer losses.

ENERGY EFFICIENT MOTORS: losses, efficiency, selection, energy efficient motors, Factors affecting motor performance, Rewinding and motor replacement issues. Energy saving opportunities with Pumps, cooling towers, fans and blower.

LIGHTING SYSTEM: Light source, Choice of lighting, Luminance requirements, and Energy conservation avenues.

ENERGY EFFICIENT TECHNOLOGIES IN ELECTRICAL SYSTEMS: Maximum demand controllers, Automatic power factor controllers, Energy efficient motors, Soft starters with energy saver, Variable speed drives, Energy efficient transformers, Electronic ballast, Occupancy sensors, Energy efficient lighting controls.

Course Title: Distributed Generation (<i>Elective</i>)	Course Code: PED224		
Credit: 3	L	T	P
	3	0	0
Year: 1st	Semester: I		

PHOTO-VOLTAIC, FUEL CELLS AND MHD: Basic characteristics of sunlight- solar energy resource- photovoltaic cell – cell efficiency characteristics - equivalent circuit- photo voltaic for battery charging- charge regulators- PV modules- battery backup limitations - equipments and systems- types of fuel cells -losses in fuel cells- MHD generators- application of MHD generation.

WIND TURBINES AND EMBEDDED GENERATION: Wind Source-wind statistics- energy in the wind- aerodynamics- rotor types – forces developed by blades- aerodynamic models- braking systems- tower- control and monitoring system- power performance- Wind driven induction generators-power circle diagram-steady state performance-modelling-integration issues-impact on central generation-transmission and distribution systems-wind farm electrical design.

ISOLATED GENERATION: Wind -diesel systems-fuel savings- permanent magnet alternators-modelling-steady state equivalent circuit- self excited induction generators – integrated wind -solar systems.

OTHER RENEWABLE SOURCES AND BIO FUELS: Micro- hydel electric systems-power potential -scheme layout-generation efficiency and turbine part flow isolated and parallel operation of generators-geothermal-tidal and OTEC systems-classification of bio fuels- Conversion process- applications.

Course Title: FACT Devices (<i>Elective</i>)	Course Code: PED226		
Credit: 3	L	T	P
	3	0	0
Year: 1st	Semester: II		

FACTS AND PRELIMINARIES: FACTS concept and general system considerations - power flow in AC system - definitions on FACTS - basic types of FACTS controllers. Converters for Static Compensation - Three phase converters and standard modulation strategies (Programmed Harmonic Elimination and SPWM) - GTO Inverters - Multi-Pulse Converters and Interface Magnetics - Transformer Connections for 12, 24 and 48 pulse operation - Multi-Level Inverters of Diode Clamped Type and Flying Capacitor Type and suitable modulation strategies (includes SVM) - Multi-level inverters of Cascade Type and their modulation - Current Control of Inverters.

STATIC SHUNT AND SERIES COMPENSATORS: Static Shunt Compensators - SVC and STATCOM - operation and control of TSC, TCR, STATCOM - Compensator Control - Comparison between SVC and STATCOM - STATCOM for transient and dynamic stability enhancement. Static Series Compensation - GCSC, TSSC, TCSC and SSSC - operation and control – external system control for series compensators - SSR and its damping - static voltage and phase angle regulators - TCVR and TCPAR - operation and control

UPFC AND IPFC: The Unified Power Flow Controller - operation, comparison with other FACTS devices - control of P and Q - dynamic performance - Special Purpose FACTS Controllers - Interline Power Flow Controller - operation and control.

POWER QUALITY AND INTRODUCTION TO CUSTOM POWER DEVICES: Power Quality issues related to distribution systems – custom power devices – Distribution STATCOM – Dynamic Voltage restorer – Unified Power Quality Conditioner – Application of D-STATCOM, DVR and UPQC for improving power quality in distribution systems.

Course Title: Digital Simulation of Power Electronic System (<i>Elective</i>)	Course Code: PED227		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

PRINCIPLES OF MODELING POWER SEMICONDUCTOR DEVICES - Macro models versus Micro models - Thyristor model - Semiconductor Device modelled as Resistance, Resistance-Inductance and Inductance-Resistance-Capacitance combination - Modelling of Electrical Machines.

MODELING OF CONTROL CIRCUITS FOR POWER ELECTRONIC SWITCHES. Computer Formulation of Equations for Power Electronic Systems –Review of graph theory as applied to Electric networks- Systematic method of Formulating State Equations - Computer Solution of State Equations – Explicit Integration method - Implicit Integration method. AC equivalent circuit modelling: Basic AC modelling approach-State space averaging-circuit averaging and averaged switch modelling - Modelling the PWM.

ANALYSIS USING SOFTWARE TOOLS Circuit Analysis Software ORCAD- PSpice - Simulation Overview - Creating and Preparing a Circuit for Simulation - Simulating a Circuit with PSpice - Simple Multi-run Analyses - Statistical Analyses - Simulation Examples of Power Electronic systems- Creating Symbols - Creating - Models - Analog Behavioral Modeling - Setting Up and Running analyses – Viewing Results - Examples of Power Electronic Systems.

DYNAMIC MODELLING OF CONVERTERS - Dynamic modelling and simulation of DC-DC converters using MATLAB - Simulation of State Space Models - Modeling and simulation of inverters using MATLAB

Course Title: Special Electric Machines (<i>Elective</i>)	Course Code: PED228		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

STEPPER MOTOR: Introduction, Types, Hybrid stepper motor- construction, principle of operation, two phases energized at a time, conditions for operation, different configurations, VR Stepper motor- single stack and multi stack, Drive systems and circuit for open loop and Closed loop control of stepping motor. Dynamic characteristics. Single phase stepper Motor, Expression of voltage , current and torque for stepper motor and criteria for synchronization.

SWITCHED RELUCTANCE MOTOR: Constructional features, principle of operation, Design Aspects and profile of the SRM, Torque equation, Power converters and rotor sensing mechanism, expression of torque and torque-speed characteristics,

PERMANENT MAGNET MATERIALS: Permanent magnet materials, properties, minor hysteresis loop and recoil line, equivalent circuit, stator frames with permanent magnets,

BRUSHLESS DC MOTOR: Construction, operation, sensing and switching logic scheme, Drive and power circuit, Theoretical analysis and performance prediction, transient Analysis.

LINEAR INDUCTION MOTOR: Construction and principle of operation of Linear Induction Motor, Approximate calculation of the force on rotor.

Course Title: High Voltage Direct Current Transmission (<i>Elective</i>)	Course Code: PED229		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

INTRODUCTION: Introduction to AC and DC Transmission – application of DC Transmission – description of DC transmission – DC system components and their functions – modern trends in DC Transmission

CONVERTER: Pulse Number – Converter configuration – analysis of Graetz circuit – converter bridge characteristics – characteristics of 12 Pulse converter

HVDC CONTROLLERS: General principle of DC link control – converter control characteristics – system control hierarchy – firing angle control – current and extinction angle control – Dc link power control – high level controllers

FILTERS: Introduction to harmonics – generation of harmonics – design of AC filters – DC filters – carrier frequency and RI noise

PROTECTION: Basics of protection – DC reactors – voltage and current oscillations – circuit breakers – over voltage protection – switching surges – lightning surges – lightning arresters for DC systems

Course Title: Electric Drives Lab	Course Code: PED251		
Credit: 1	L	T	P
	0	0	2
Year: 1st	Semester: II		

Note: Minimum 8 experiments are to be performed from the following

List of Experiments

1. Analysis of dual converter fed DC motor drive
2. Chopper fed DC motor drive
3. Performance study of stator voltage controlled induction motor drive
4. Simulation of Automatic voltage regulation of three phase synchronous generator
5. Modeling and simulation of electric drives using MATLAB
6. Speed control of DC motor using three phase fully controlled converter
7. To study transient response of separately excited dc motor.
8. To study speed control of separately excited dc motor using single phase fully / half controlled bridge converter in discontinuous and continuous current modes.
9. To study starting transient response of three phase induction motor
10. To study speed control of three phase induction motor using (a) constant V/f control (b) constant C and f control
11. Simulation of single phase AC voltage controller for (a) lamp load (b) motor load
12. Simulation of three phase AC voltage controller for (a) lamp load (b) motor load
13. Simulation of PWM inverter for (a) sinusoidal PWM and (b) square PWM
14. Speed control of three phase induction motor using three phase current source inverter
15. To study closed loop control of dc shunt motor
16. To study closed loop control of dc separately excited motor

Department of Electrical Engineering
Detailed Syllabus for M.Tech. (PED)
Batch: 2013-15

Course Title: Seminar	Course Code: E13B10		
Credit: 4	L	T	P
	0	0	8
Year: 2nd	Semester: III		

Objective:

To assess the debating capability of the student to present a technical topic. Also to impart training to a student to face audience and present his ideas and thus creating in him self esteem and courage that are essential for an engineer.

Individual students are required to choose a topic of their interest from power electronics and drives related topics preferably from outside the M.Tech syllabus and give a seminar on that topic about 30 minutes. A committee consisting of at least three faculty members (preferably specialized in power electronics) shall assess the presentation of the seminar and award marks to the students. Each student shall submit two copies of a write up of his seminar topic. One copy shall be returned to the student after duly certifying it by the chairman of the assessing committee and the other will be kept in the departmental library. Internal continuous assessment marks are awarded based on the relevance of the topic, presentation skill, quality of the report and participation.

Department of Electrical Engineering
Detailed Syllabus for M.Tech. (PED)
Batch: 2013-15

Course Title: Dissertation Phase-I	Course Code: E13C10		
Credit: 12	L	T	P
	0	0	24
Year: 2nd	Semester: III		

Course Title: Dissertation Phase-II	Course Code: E14C10		
Credit: 16	L	T	P
	0	0	32
Year: 2nd	Semester: IV		

Objective:

To improve the professional competency and research aptitude by touching the areas which otherwise not covered by theory or laboratory classes. The project work aims to develop the work practice in students to apply theoretical and practical tools/techniques to solve real life problems related to industry and current research.

The project work can be a design project/experimental project and/or computer simulation project on any of the topics in power electronics/drives related topics. The project work is allotted individually on different topics. The students shall be encouraged to do their project work in the parent institute itself. If found essential, they may be permitted to continue their project outside the parent institute. Department will constitute an Evaluation Committee to review the project work. The Evaluation committee will consist of at least three faculty members of which internal guide and another expert in the specified area of the project shall be two essential members.

The student is required to undertake the master research project phase 1 during the third semester and the same is continued in the 4th semester (Phase 2). Phase 1 consist of preliminary thesis work, two reviews of the work and the submission of preliminary report. First review would highlight the topic, objectives, methodology and expected results. Second review evaluates the progress of the work, preliminary report and scope of the work which is to be completed in the 4th semester. The Evaluation committee consists of at least three faculty members of which internal guide and another expert in the specified area of the project shall be two essential members.

Detailed Syllabus for M.Tech. (WMC)
Batch: 2013-15

Course Title: Spread Spectrum Communication	Course Code: WMC101		
Credit: 3.5	L 3	T 1	P 0
Year: 1st	Semester: I		

UNIT 1: BASICS OF SPREAD SPECTRUM SYSTEMS:

Origin and Forms of spread spectrum (SS) – Communication, advantage of spectrum spreading, Processing gains, Jamming margin and Jamming threshold and other fundamentals parameter , liner feedback shift register sequence generation, M sequences and their statistical properties ,correlation properties, Composite sequences- gold sequence.

UNIT 2: DIRECT SEQUENCE SPREAD SPECTRUM TECHNIQUE:

Coherent direct sequence system model of DS / BPSK system coded Different types of jammer wave forms, chern of bound ,performance and analysis under constant power broad band noise jammer, pulse jammer, partial band jammer, multi tone jammer coded DS / BPSK system. Case studies on performance analysis of various communication systems with reference to different Jammers.

UNIT 3: FREQUENCY HOPPING SPREAD SPECTRUM SYSTEM:

Non coherent FH system model ,coherent FH system frequency Synthesis, Synchronization of receiver, Case study on use of latest techniques in achieving synchronization and tracking in Spread spectrum Communication systems

UNIT 4: TRACKING& ACQUISITION:

Acquisition and tracking in DS and receiver sequentially estimation and use of match filter techniques of acquisition and tracking, delay locked loop Tau – Dither loop.

UNIT 5: APPLICATION :

Code division multiple access in satellite communication, anti-jam military communication low, probability of Intercept in communication, mobile communication. Case studies on application of CDMA in defense and commercial applications

Detailed Syllabus for M.Tech. (WMC)
Batch: 2013-15

Course Title: Digital Wireless Systems	Course Code: WMC102		
Credit: 3.5	L 3	T 1	P 0
Year: 1st	Semester: I		

UNIT 1: TRANSMISSION IN WIRELESS SYSTEMS

Layered view of digital communication, Quantization, High rate quantizers and waveform encoding, Fourier series, and Fourier transforms Discrete-time Fourier transforms and sampling theorem, Power Spectra of Digital PAM, Spectral Shaping by Precoding, Transmission Limitations of Digital PAM, M-array Error Probabilities, Design of Matched Filters of Digital PAM, Nyquist Pulse Shaping, Optimum Terminal Filters, Equalization, Correlative Coding, Synchronization techniques in digital transmission.

UNIT 2: DIGITIZATION TECHNIQUES FOR ANALOG MESSAGES AND NETWORKS

PCM versus Analog Modulation, Delta-Sigma Modulation, Adaptive Delta Modulation, Differential PCM, LPC Speech Synthesis, Digital Multiplexers (ISDN, Optical SDH/SONET). Case studies related to Digitalization Techniques in communication Networks.

UNIT 3: CODING AND ENCRYPTION

Error Detection and Correction, Code Vectors, FEC Systems, ARQ Systems, Matrix Representation of Block Codes, Syndrome Decoding, Cyclic Codes, M-ary Codes, Convolution Codes, Convolution Encoding, Distance and Coding Gain, Decoding Methods , Turbo Codes, Data Encryption Standard, Rivest-Shamir-Adleman System, Discrete source encoding, Memory-less sources, prefix free codes, and entropy, Entropy and asymptotic equi partition property ,Markov sources and Lempel-Ziv universal codes Case studies based on use of Channel coding techniques for optimization.

UNIT 4: RANDOM PROCESS & BANDPASS DIGITAL TRANSMISSION

Coherent and non-coherent binary systems (OOK, BPSK, CPFSK, MSK), Quadrature-Carrier Systems , M-array PSK Systems, M-array QAM Systems ,Comparison of Digital Modulation Systems, Trellis-Coded Modulation, Hard Versus Soft Decisions, Case studies on Comparison of Digital Modulation Systems Random processes, Jointly Gaussian random vectors and processes and white Gaussian noise (WGN),Linear functional and filtering of random processes Theorem of irrelevance, M-ary detection, and coding, Baseband detection and complex Gaussian processes

UNIT 5: WIRELESS & TERRESTERIAL COMMUNICATION

Introduction of wireless communication Doppler spread, time spread, coherence time, and coherence frequency discrete-time baseband models for wireless channels, Detection for flat Rayleigh fading and incoherent channels, and rake receivers, Terrestrial based wireless communication using smart antenna, Butler matrix, side lobe canceller in smart antenna application, look at switched beam smart antenna. Deterministic signals, random noise and coherent noise (pseudo) combining in an array antenna. Case study on code division multiple access (CDMA)

Batch: 2013-15

Course Title: Signal Processing for Wireless Communication	Course Code: WMC103		
Credit: 3.5	L 3	T 1	P 0
Year: 1st	Semester: I		

UNIT 1: WIRELESS PROCESSING AND MULTIPATH CHANNEL:

Wireless Standards, Reason behind convergence of wireless services, Stochastic & Signal processing review, Representing Band pass signals and subsystems, receiver sensitivity definitions, AWGN, Rayleigh, Rician Multipath fading phenomenon, Frequency selective fading, Pathloss models, and Shadowing discussion.

UNIT 2: REVIEW OF MODULATION DETECTION AND PERFORMANCE IMPROVEMENT TECHNIQUES:

Review of coherent detection, Non-Coherent detection of DQPSK & MSK, BER performance Comparison, FEC, Receive & Transmit spatial antenna diversity, combining technique using signal processing, Link budget discussion.

UNIT 3: RECEIVER DIGITAL SIGNAL PROCESSING:

Temporal Equalization, Space time Equalization, Frequency domain Equalization, Symbol timing recovery, Channel Quality Estimation, Automatic Frequency Control, Overall Receiver Blok Diagram.

UNIT 4: MULTIRATE DIGITAL SIGNAL PROCESSING:

Introduction. Down sampling, Decimation. Up sampling, Interpolation, Sampling Rate Conversion, conversion of band pass signals. Concept of re-sampling. Case study on Applications of multi rate signal processing

UNIT 5: COMPUTER SIMULATION & ESTIMATION TECHNIQUE:

Introduction to simulation, Monte Carlo Method, Modified Monte Carlo or Importance sampling method, improved importance sampling method, Tail Extrapolation Method (TEM), Semi Analytic Method.

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (WMC)
Batch: 2013-15

Course Title: Data and Communication Networks	Course Code: WMC104		
Credit: 3.5	L 3	T 1	P 0
Year: 1st	Semester: I		

UNIT 1: INTRODUCTION

Introduction of data networks: network elements, protocols, and applications, Protocols: OSI reference model, Physical Layer and Access Network Technologies: SONET, DSL, cable, PON ATM Protocols and Services, Physical, ATM, and AAL layers: functions and PDU formats ATM services. Local Area Networks: Ethernet, Fast Ethernet, Switched Ethernet, Gigabit Ethernet, Access control protocol, Performance analysis

UNIT 2: FRAME RELAY

Frame Relay: Frame format and functions, congestion control Point-to-Point Protocol: PPP format and operations, Packet over SONET Multi-Protocol Label switching: MPLS protocol, forwarding and control components, MPLS fast-reroute, Pseudo-wire emulation

UNIT 3: NETWORK LAYER

Internet Protocol Suite, Protocol model, Network layer protocols: IPv4, IPv6, ICMP, Transport layer protocols: TCP, UDP, RTP, Application protocols: Telnet, DNS, FTP, RTSP, HTTP, SNMP
Internet Routing: Unicast routing protocols: RIP, OSPF, IS-IS, BGP, Multicast routing protocols: DVMRP, MOSPF, CBT, PIM,

UNIT 4: TRANSPORT AND HIGHER LAYERS

Router/Switch Design: Architectures: single stage, multi-interconnect network, Performance analysis: queuing delay and cell loss ratio

UNIT 5: QOS AND TRAFFIC MANAGEMENT

QOS: QOS Protocols: IntServ/RSVP, DiffServ, MPLS, SBM, Queuing and scheduling disciplines, Congestion control techniques
Traffic Management: Network dimensioning, Call admission control, Usage parameter control/ Network parameter control, MPLS- Traffic engineering
Voice over IP: Codecs, Network architecture & protocols.

TEXT BOOKS:

1. ComputerNetworks: A. S. Tanenbaum, 4th Edution, PHI (For I, II and III)

REFERENCE BOOKS:

1. An engineering Approach to Computer Networking, S. Keshav, Person Edition.
2. Computer Networking a top – Down Approach Featuring the Internet, J. F. Kurose, K. W. Ross, Pearson Education.
3. Data Communication and Networking, A. S. Godbole, TMH.

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (WMC)
Batch: 2013-15

Course Title: Wireless Communication Technology	Course Code: WMC201		
Credit: 3	L	T	P
	3	0	0
Year: 1st	Semester: II		

UNIT 1: RADIO FREQUENCY PLANNING FOR MOBILE NETWORK:

RF Design Requirements, Capacity and Coverage Thresholds, Propagation Models, Link Budgets, ATOL- RF Planning Tool, Optimization Principle, Drive Test Tool.

UNIT 2: OFDM PRINCIPLES:

Motivation for Multi Carrier Vs. Single Carrier, Sub Carrier Symbol Structure, Generation of OFDM symbols using the IFFT, Cyclic prefix (guard interval), OFDM signal bandwidth, Multipath interference on an OFDM symbol, Protecting against multipath using cyclic prefix, Reducing bandwidth (windowing vs filtering), Peak-to-average power ratio (PAPR), Minimising / reducing PAPR, SC-FDMA

UNIT 3: 3G WIDEBAND CDMA

Rake Receiver Principle, 2G IS-95 CDMA discussion, Rake finger architecture and performance, PN Code properties, WCDMA Physical Layer overview, High speed downlink packet access (HSDPA), High speed uplink packet access (HSUPA) overview, Capacity improvement in multipath environment.

UNIT 4: MIMO BASICS:

Motivation, Types of multi-antenna systems, MIMO vs. multi-antenna systems, Spectral efficiency and capacity, Transmitting independent streams in parallel, The generic MIMO problem, Singular Value Decomposition, Predistortion in MIMO systems, Disadvantages of predistortion in MIMO systems, Precoding and combining in MIMO systems, Advantages of precoding and combining, Disadvantages of precoding and combining, Beamforming Analog and Digital Networks, Case study: MIMO in LTE.

UNIT 5: LTE vs. WI-MAX:

3GPP evolution towards LTE/LTE-Advanced standardization, LTE/LTE-Advanced Radio Resource Management, Radio network deployment and frequency planning, Spectrum management, Satellite wireless mobile Communication, 4G Mobile WiMAX (IEEE 802.16m-2011), Femto cells in advanced WiMAX systems, WiMAX Interworking with LTE/LTE-Advanced networks, Mobile IP, IEEE 802.21 for seamless, Mobility, 4G regulation: Mobile WiMAX and LTE/LTE-Advanced

TEXT BOOK:

1. Mitola III, J., "Cognitive Radio Architecture: The Engineering Foundation of Radio XML", Wiley-Interscience. 2006
2. Pietrzyk, S., "OFDMA for Broadband Wireless Access", Artech House. 2006
3. Gilsic, S.G., "Advanced Wireless Networks: 4G Technology", John Wiley & Sons. 2006

Detailed Syllabus for M.Tech. (WMC)
Batch: 2013-15

Course Title: Random Variable, Stochastic Process & Queuing Theory	Course Code: WMC202						
Credit: 3	<table style="margin: auto; border: none;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="padding: 0 10px;">3</td> <td style="padding: 0 10px;">0</td> <td style="padding: 0 10px;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 1st	Semester: II						

UNIT 1:

THEORY OF PROBABILITY: Axioms of probability: set theory, probability space, conditional probability.

CONCEPT OF RANDOM VARIABLE: Introduction, distribution and density functions, specific random variables, conditional distributions.

UNIT 2:

MULTIPLE RANDOM VARIABLES: Bivariate distributions, one function of two random variables, two functions of two random variables, joint moments, joint characteristic functions, conditional distributions Multiple random variables, sequences of random variables

UNIT 3 :

CONCEPT OF STOCHASTIC PROCESSES: Definition, systems with stochastic inputs, power spectrum, discrete-time processes.

RANDOM WALKS AND OTHER APPLICATIONS: random walks, Poisson points and shot noise, cyclo-stationary Processes, band-limited processes and sampling theory, deterministic signals in noise.

UNIT 4:

SPECTRAL REPRESENTATION AND ESTIMATION:

Factorization and innovations, finite-order systems and state variables, spectral representation of random processes, ergodicity, spectrum estimation.

MEAN SQUARE ESTIMATION: prediction, filtering and prediction, Kalman filters. Entropy: Basic concepts, random variables and stochastic processes, MEM.

UNIT 5:

MARKOV CHAIN: Introduction, higher transition probabilities and the Chapman-Kolmogorov equation, classification of states, stationary distributions and limiting probabilities, transient states and absorption probabilities, branching processes. Markov processes.

QUEUEING THEORY: Characteristics of Queueing Theory, Queueing Models, Birth & Death Process, Little's Theorem.

TEXT BOOKS:

1. Probability, Random Variables and Stochastic Processes/A. Papoulis & S. U. Pillai / 4th ed. /TMH
2. Probability, Random Variables & Random Signal Principles/Peyton Z. Peebles, Jr. / TMH
3. Probability& Queueing Theory, R. H. Chitale, Technical Publication Pune

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (WMC)
Batch: 2013-15

Course Title: Mobile Ad-hoc Networks	Course Code: WMC203		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT 1. INTRODUCTION TO ADHOC NETWORKS:

Need for ad-hoc networks, Applications, variations- Fully symmetric, Asymmetric environment, Asymmetric responsibility, Traffic variations, Mobility Patterns, Challenges, Hidden terminal problem, Exposed terminal problem, Routing in Ad-hoc.

UNIT 2. UNICAST, MULTICAST ROUTING:

Types of routing protocols- proactive, reactive and Hybrid protocol, Flooding of Data, Advantages & disadvantages, Dynamic source Routing (DSR), Location Aided Routing (LAR), and Distance Routing Effect Algorithm for Mobility (DREAM), Geographic Distance Routing (GEDIR), Query Localization, Broadcast Storm Problem, Ad Hoc On-Demand Distance Vector Routing (AODV), Link Reversal Algorithm, Partial Reversal Method.

UNIT 3. PARTITION, GEOCAST ROUTING, POWER AWARE ROUTING:

Temporally-Ordered Routing Algorithm (TORA), Core-Extraction Distributed Ad Hoc Routing (CEDAR), Link State Routing, Optimized Link State Routing (OLSR), Destination-Sequenced Distance-Vector (DSDV), Zone Routing Protocol (ZRP), Power-Aware Routing.

UNIT 4. MEDIUM ACCESS CONTROL:

Security Issues, Implementation Issues, Introduction, Background, Fundamentals of MAC Protocols.

UNIT 5. DISTRIBUTED ALGORITHMS, STANDARDS ACTIVITIES, OPEN PROBLEMS:

Vulnerabilities of Mobile Adhoc Networks, Potential Attacks, Attack Prevention Techniques. Intrusion Detection Techniques. Introduction, Background, Range of Applications, Examples of Category 2 WSN Applications, Examples of Category I WSN applications, Another Taxonomy of VSN Technology.

TEXT BOOKS:

1. Prasant Mohapatra and Srihanamurthy, "Ad Hoc Networks Technologies and Protocols", Springer, Springer International Edition, 2009.

SUGGESTED READING:

1. Kazem Sohraby, Daniel Minoli, Taieb Znati, "Wireless Sensor Networks", A John Wiley & Sons, Inc., Publication-2007.

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (WMC)
Batch: 2013-15

Course Title: Satellite Communication (<i>Elective-1</i>)	Course Code: DCT112
Credit: 3.5	L T P 3 1 0
Year: 1st	Semester: I

UNIT 1: SATELLITE ORBITS

Elements of Satellite Communication. Orbital mechanics, look angle and orbit determination, launches & launch vehicle, orbital effects, Geostationary Orbit, Comparison of LEO, MEO and GEO.

UNIT 2: SPACE SEGMENT AND SATELLITE LINK DESIGN

Introduction; attitude and orbit control system; telemetry, tracking and command; power systems, communication subsystems, antenna subsystem, equipment reliability and space qualification.

UNIT 3: SATELLITE ACCESS

Modulation and multiplexing techniques for satellite links Introduction, space segment access methods, TDMA, FDMA, CDMA, SDMA, assignment methods. Case study on capacity analysis.

UNIT 4: SATELLITE LINK DESIGN

Introduction, general link design equation, system noise temperature, uplink design, downlink design, complete link design, effects of rain. Case Study on satellite link design.

UNIT 5: EARTH SEGMENT AND RELATED APPLICATION OF SATELLITES

Earth Station Technology-- Terrestrial Interface, Transmitter and Receiver, Types of earth stations, Earth Station architecture and design considerations, Introduction to communication satellites, satellite telephony, satellite television, satellite radio, satellite data communication services. Case study on QoS analysis of mobile satellite systems.

TEXT BOOKS:

1. Dennis Roddy, 'Satellite Communication', McGraw Hill International, 4th Edition, 2006.
2. Wilbur L. Pritchard, Hendri G. Suyderhoud, Robert A. Nelson, 'Satellite Communication Systems Engineering', Prentice Hall/Pearson, 2007.

Detailed Syllabus for M.Tech. (WMC)
Batch: 2013-15

Course Title: Wireless Mobile and Smart Antenna <i>(Elective-1)</i>	Course Code: WMC111		
Credit: 3.5	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT 1. PLANNER ANTENNAS

Planner antennas for mobile phone, two separate patches with dual feed design. Different patch micro strip type, patch with LC resonators, triple frequency PIFA type.

UNIT 2. MONOPOLE ANTENNA

Very low profile monopoles for internal mobile phone antenna. Branch line planner monopole, Branch patch monopole, Printed inverted F – type.

UNIT 3. BASE STATION ANTENNA FOR CELLULAR COMMUNICATION SYSTEMS :

Antenna for single band operations and for multi band operations. Antennas for dual polarized operations using different feeds.

UNIT 4. ANTENNAS FOR WLAN APPLICATIONS :

– WLAN access point antennas, surface mountable antenna, printed monopole antennas for dual band operations. Dielectric resonator antenna.

UNIT 5. INTEGRATION OF ANTENNAS:

Different operating bands, DCS and WLAN, DCS and GPS antennas.

TEXT BOOKS:

Kin. Lu. Wong “Planar antennas for wireless communications,” WILEY inter Science

Detailed Syllabus for M.Tech. (WMC)
Batch: 2013-15

Course Title: Speech Processing (<i>Elective-1</i>)	Course Code: WMC113		
Credit: 3.5	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT 1.DIGITAL MODELS FOR THE SPEECH SIGNAL :

The process of speech production – Acoustic theory of speech production – Lossless tube digital models for speech signals.

UNIT 2. TIME DOMAIN MODELS FOR SPEECH PROCESSING:

Time dependent processing of speech short time energy & average magnitude, zero crossing rate, pitch period estimation short time auto correlation function, median smoothing and speech processing. Digital representation of speech waveform quantization – instantaneous and adaptive delta modulation, DPCM, Comparison of system.

UNIT 3.SHORT TIME FOURIER ANALYSIS :

Basic model short time analysis and synthesis of speech, implementation of filter bank summation methods using FFT, pitch detection, analysis – by – synthesis. Analysis – synthesis systems. Homomorphic speech processing complex cepstrum approach, pitch detection format detection, Homomorphic vocoder.

UNIT 4. LINER PREDICTIVE CODING OF SPEECH.

Principles of linear predictive analysis, solution of LPC Equation; prediction error signal, frequency DOMAIN REPRESENTATION OF lpc ANALYSIS, Relation between the various speech parameter Synthesis of speech from LP parameters and applications.

UNIT 5. SPEECH CODING:

Sub – band coding, transform coding channel Vocoder, format Vocoder, cepstral Vocoder, LP Vocoders. Vector quantizer coders.

TEXT BOOKS:

1. L. R. Rabiner & R. W. Schafer: Digital Processing of Speech Signals, PH.
2. Papamichalis, Practical approach to speech coding, PHI 1987.
3. OWENS, Signal Processing of Speech.
4. DEKKAR & PROAKIS, Digital Speech Processing.

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (WMC)
Batch: 2013-15

Course Title: Optoelectronic Devices (Elective-1)	Course Code: WMC114		
Credit: 3.5	L	T	P
	3	0	0
Year: 1 st	Semester: I		

UNIT 1. INTRODUCTION TO OPTICAL WAVE GUIDES:

Integrated optic – Substrate materials for optical integrated circuits – Optical wave guide modes – theory of planer wave guides – symmetric and symmetric slab wave guides – channel waveguides – strip loaded waveguides – losses in optical waveguides. Transverse couplers – prism couplers – Grating Tapered couplers – Fiber to waveguides couplers

UNIT2. ELECTRO OPTIC MODULATORS:

Characteristics of switches and modulators – Electro optic effect – Single and dual channel wave guides – electro – optic modulator – Mach Zehnder type electro – optic modulator – Comparison of waveguides modulators.

UNIT 3. ACOUSTO – OPTIC MODULATOR:

Principle of acousto – optic effect – Raman – Nath type modulator – Bragg type deflectors and switches acousto – optic frequency shifters

UNIT 4. MAGNETO OPTIC DEVICES:

Characteristics of magneto Optic effect – Non – reciprocal waveguides – Interaction between magnetic spin wave and Optic wave – Optical isolator – Optical isolator – Optical filter

UNIT 5. NON LINEAR FIBER OPTICS AND APPLICATIONS:

Fiber non linear ties – Optical solutions – Nonlinear birefringence effects – Optical pulse compression – RF spectrum analyzer – Analog to digital converter – integrated optic Doppler velcimeter Opto electronic integrated circuits – Opto microwave applications.

Course Title: Principles of Secure Communication (<i>Elective</i>)	Course Code: WMC211		
Credit: 3	L	T	P
	3	0	0
Year: 1st	Semester: II		

UNIT 1 DIRECT SEQUENCE SPREAD SPECTRUM SYSTEMS:

Model of SS digital communication system, direct sequence spread spectrum signal, error rate performance of the decoder, processing gain and jamming margin, uncoded DSSS signals, applications of DSSS signals in anti-jamming, low detectability signal transmission, code division multiple access and multipath channels, effect of pulsed interference on DSSS systems, Generation of PN sequences using m sequence and Gold sequences, excision of narrowband interference in DSSS systems, acquisition and tracking of DSSS system.

UNIT 2 FREQUENCY HOPPED SPREAD SPECTRUM SYSTEMS:

Basic concepts, slow and fast frequency hopping, performance of FHSS in AW GN and partial band interference, FHSS in CDMA system, Time hopping and hybrid SS system, acquisition and tracking of FH SS systems.

UNIT 3 CRYPTOGRAPHIC TECHNIQUES:

Classical encryption technique, Symmetric cipher model, cryptography and cryptanalysts, Substitution techniques, transposition techniques

UNIT 4 BLOCK CIPHER AND DATA ENCRYPTION STANDARD:

Block cipher principle, data encryption standard (DES) strength of DES, differential and linear cryptanalysts, block cipher design principles, simplified advanced encryption standard (S-AES), multiple encryption and triple DES, Block cipher modes of operation, stream ciphers and RC4 algorithm

UNIT 5 PUBLIC KEY CRYPTOGRAPHY:

Prime numbers, Fermat and Euler's theorem, Chinese remainder theorem, discrete algorithms, principles of public key cryptosystems, RSA algorithm, key management Diffie-Hellman key exchange, message authentication requirements and functions.

TEXT BOOKS:

1. Digital Communication by J.G. Proakis McGraw Hill 2nd Ed.
2. Cryptography and Network Security by W. Stallivgs 4th Ed., PHI
3. Digital Communication by Simon Haykin, Wiley.
4. Principle of Communication systems by Taub & Schilling TMH.
5. Cryptography and secure Communications by M.Y. Rhee, McGraw Hill

Detailed Syllabus for M.Tech. (WMC)
Batch: 2013-15

Course Title: Coding for Reliable Communication	Course Code: EDC111		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT 1: INFORMATION AND CHANNELS CAPACITY:

Measure of information – information content of message – average information content of symbol m log independent sequence – Markov statistical model for information source – Entropy and information rate Markov channel capacity theorem some properties.

UNIT 2: SOURCE ENCODING:

Shannon's first fundamental theory – Noiseless coding – source with finite memory Shannon's second fundamental theorem on coding for memory less noise channels Shannon's encoding algorithm.

UNIT 3: DISCRETE COMMUNICATION CHANNELS:

Discrete communication channel's – rate of information transmission over a discrete channels – capacity of discrete memory less channel – discrete channel with memory – discrete channel with continuous noise – discrete channel with discrete noise.

UNIT 4: CONTINUOUS COMMUNICATION CHANNELS:

Continuous channels – Shannon – Hartley Theorem implication – continuous channels with continuous noise – Efficiencies of different communication system.

UNIT 5: ERROR CORRECTING CODES:

Galois field, Vector spaces and Matrices – block codes, binary cycle code – multiples Error correcting codes – Majority logic coding – Burst error correcting code – Tow dimensional Codes – ARQ – performance of coeds.

TEXT BOOKS:

1. J. Das, S. K. Mulick, P. K. Chatterjee, principles of Digital Communication, Wiley Estate limited 1986.

REFERNCE BOOKS:

Course Title: Detection and Estimation Theory (<i>Elective</i>)	Course Code: EDC311		
Credit: 3	L	T	P
	3	0	0
Year: 1st	Semester: II		

UNIT 1.

Stochastic Signal: Stochastic signal / orthogonal representation of signal random process, Markov process. Correlation. Function, power spectral density, Tcheloycheffi Inequality

UNIT 2.

Detection: Detection, presences of noise, correlator, optimum filter, matched filter.

UNIT 3

Hypothesis Testing: Weighed probabilities and hypothesis testing, Composite hypothesis, likelihood ratio detection, Sequential detection.

UNIT 4

Estimation:

Principles of estimation, properties of estimator, Comar – Rao bound, Bye's maximum likelihood and current trends.

UNIT 5.

Adaptive Array:

Compensation of a Adaptive Array, current Trends in Adaptive Array.

TEXT BOOKS:

1. Robert A. Monzngo and Thomas W. Miller; Introduction to Adaptive Array; John Willey and Sons 1980

REFERENCE BOOKS:

1. L. E. Hudson; Adaptive Principal Paragons Ltd.; 1981

Batch: 2013-15

Course Title: Wireless Network Security	Course Code: WMC213		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT 1. INTRODUCTION& REVIEW

Wireless Communications vs. Networking, 802.11 Framing, Mobility & Roaming

UNIT 2. SECURITY MODELS

Wireless Network Vulnerabilities and IDS/IPS Security Context, Security Architecture, WarDriving, WarRiding, WarWalking, & WarChalking, Scanning, Denial of Service, Man-in-the-Middle, “Evil Twin” Access Points

UNIT 3. PREVIOUS 802.11 SECURITY

MAC Address Filtering, 64, 128, and 256-bit WEP, SSID-Based Attempts, VPN-Based Solutions, IPsec, Issues & Weaknesses

UNIT 4. WPA COMPONENTS

802.1x & 802.1aa, Extensible Authentication Protocol, TKIP, WPA-PSK

UNIT 5. 802.11I (WPA2)

Transitional Secure Network, Robust Secure Network, EAP, LEAP, PEAP, EAP-FAST, TLS & TTLS, AES , CCMP , Authentication Servers- RADIUS , Kerberos

Course Title: DSP Processors and Architectures (<i>Elective</i>)	Course Code: WMC214		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT I: INTRODUCTION TO DIGITAL SIGNAL PROCESSING:

Introduction, A Digital signal – processing system, the sampling process, discrete time sequences Discrete Fourier Transform (DFT) and Fast Fourier Transform (FFT), linear time – invariant systems, Digital filters, Decimation and interpolation, Analysis and Design tool for DSP Systems MATLAB, DSP using MATLAB.

UNIT 2: COMPUTATIONAL ACCURACY IN DSP IMPLEMENTATIONS:

Number formats for signals and coefficients in DSP systems, Dynamic Range and Precision, Sources of error in DSP implementations, A/D Conversion errors, DSP Computational error, D/A Conversion Errors, Compensating filter.

UNIT 3: ARCHITECTURES FOR PROGRAMMABLE DSP DEVICES

Basic Architectural features, DSP Computational Building Blocks, Bus Architecture and Memory, Data Addressing Capabilities, Address Generation Unit, Programmability and Program Execution, Speed Issues, Features for External interfacing.

UNIV 4: EXECUTION CONTROL AND PIPELING

Hardware looping, Interrupts, Stacks, Relative Branch support, Pipelining and Performance, Pipeline Depth, Interlocking, Branching effects, Interrupts effects, Pipeline Programming models.

UNIT 5: PROGRAMMABLE DIGITAL SIGNAL PROCESSORS

Commercial Digital signal – processing Devices, Data Addressing modes of TMS320C54XXDSPs, Data Addressing modes of TMS320C54XX Processors, memory space of TMS320C54XX Processors, Program Control TMS320C54XX instructions and Programming, On – Chip Peripherals, Interrupts of TMS320C54XX processors, Pipeline Operation of TMS320C54XX Processors.

Course Title: Digital Image Processing (<i>Elective</i>)	Course Code: WMC312		
Credit: 3	L	T	P
	3	0	0
Year: 1st	Semester: II		

UNIT 1. INTRODUCTION:

Fundamental steps in DIP, elements of DIP, Simple image model, Sampling & quantization, basic relationships between Pixels, Color image model.

UNIT 2.

Image Transforms: One-dimensional & Two-dimensional DFT, Cosine, Sine, Hadamard, Haar, and Slant & KL transforms.

Image Enhancement: Introduction, Point operations, Histogram modeling, spatial operations, Transform operations

UNIT 3.

Image Restoration: Introduction, Image observation models, Inverse & Wiener filtering, difference between enhancement & restoration Restoration-spatial filtering, Noise reduction in frequency domain.

UNIT 4.

Image Compression: Introduction, Pixel coding, Predictive coding, Transform coding, Inter-frame coding.

UNIT 5.

Image Segmentation: Introduction, Spatial feature extraction, Transforms features, Edge detection, Boundary extraction, Segmentation techniques.

• **Minor Project:** submission of 15 pages of MATLAB Program on above.

SUGGESTED BOOKS:

1. Digital Image Processing, Rafael C. Conzalez Richard E Woods, 2nd Ed.TMH
2. Pratt "Digital Image Processing" 4th Edition, John Wiley (India)

Course Title: Advanced Microwave Communication (<i>Elective</i>)	Course Code: WMC313		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT 1

Microwave and Millimeter Wave Devices:

Overview of microwave and millimeter wave vacuum tube devices, limitations of microwave vacuum tubes, gyration vacuum tube devices

Advances in microwave and millimeter wave solid state devices, Gunn devices, oscillator using Gunn diode, and injection locked oscillators, IMPATT devices, and microwave and mm wave performance of IMPATT. Other solid state devices like Tunnel diode, BARITT and TRAPAT.

UNIT 2

Microwave and MM Wave Circuits:

Review of scattering matrix concept in the light of vector network analyzer, impedance matching network, couplers, power dividers, resonators and filters.

Detectors, mixers, attenuators, phase shifters, amplifier and oscillator, Ferrite based circuits

UNIT 3

Antennas:

Hertzian dipole, loop antenna, helical antenna, frequency independent antenna: Du-Hamel principle, log spiral and log periodic dipole antenna array.

Babinet principle, waveguide slot antenna, microstrip antenna, horn antenna, parabolic reflector

Antenna arrays and phased array antenna, Antenna measurement

UNIT 4

Microwave and MM Wave Propagation:

Overview of basic radio wave propagation mechanisms, Friis transmission formula, plane earth propagation model, troposcatter systems, ionosphere propagation, duct propagation, microwave radio link and calculation of link budget

UNIT 5

Effect on radio wave propagation due to rain, fog, snow, ice, atmospheric gases, Earth's magnetic field

TEXT BOOK:

Batch: 2013-15

Course Title: Artificial Neural Networks	Course Code: WMC314		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT 1

Fundamentals Concepts and Models of Artificial Neural Systems:

Biological Neuron, Biological Neural Models and their artificial models, McCulloch – Pitts Neuron Model, Neuron Modeling for Artificial Neuron Models Neuron Systems. Models of Artificial Neural Networks: Feed forward network and feedback Network. Neural Processing, learning and adaptation; Supervised and Unsupervised learning.

UNIT 2

Natural Network Learning Rules:

Hebbian Learning Rule, Perception Learning Rule, Delta Learning Rule Widrow – Hoff Rule, Correlation Learning Rule, Winner – Take – All Learning rule, Out Star Learning Rule, Summary of Learning rules.

UNIT 3

Single Layer Perception Classifiers:

Classification Model, Features and Decision Regions, Discriminant Functions, linear Machine and Minimum Distance Classification, Nonparametric training concept Training and classification using the discrete perceptron: algorithm and example. Single Layer Continuous Perceptron's Network.

UNIT 4

Multilayer Feed Forward Networks:

Linearly nonseparable pattern classification Delta Learning rule for Multiperceptron layer. Generalized Delta Learning rule. Feed forward Recall and Error Back Propagation Training: Examples of Error Back-Propagation. Training errors : Learning Factors; Internal weights, Cumulative Weight Adjustment versus Incremental Updating, Steepness of activation function, learning consent, momentum method, Network architecture Versus Data Representation, Necessary number of Hidden Neurons. Application of Back propagation Networks in pattern recognition & Image processing, Madalena: Architecture & Algorithms.

UNIT 5

Single – Layer Feedback Networks :

Basic concepts of Dynamical systems. Mathematical Foundation of Discrete – Time Hop field Networks. Mathematical Foundation of Gradient – Type Hopfield Networks. Transient response of Continuous time Networks. Example Solution of Optimization Problems: Summing networks with digital outputs, Minimization of the Travelling salesman tour length, Solving Simultaneous Linear Equations.

Detailed Syllabus for M.Tech. (WMC)
Batch: 2013-15

Course Title: Seminar	Course Code: F2C110		
Credit: 4	L 0	T 0	P 8
Year: 2nd	Semester: III		

Objective:

To assess the debating capability of the student to present a technical topic. Also to impart training to a student to face audience and present his ideas and thus creating in him self esteem and courage that are essential for an engineer.

Individual students are required to choose a topic of their interest from power electronics and drives related topics preferably from outside the M.Tech syllabus and give a seminar on that topic about 30 minutes. A committee consisting of at least three faculty members (preferably specialized in power electronics) shall assess the presentation of the seminar and award marks to the students. Each student shall submit two copies of a write up of his seminar topic. One copy shall be returned to the student after duly certifying it by the chairman of the assessing committee and the other will be kept in the departmental library. Internal continuous assessment marks are awarded based on the relevance of the topic, presentation skill, quality of the report and participation.

Course Title: Pre Dissertation	Course Code: F2C120		
Credit: 12	L 0	T 0	P 24
Year: 2nd	Semester: III		

Department of Electronics & Communication Engineering
Detailed Syllabus for M.Tech. (WMC)
Batch: 2013-15

Course Title: Dissertation Phase-II	Course Code: F2D120		
Credit: 16	L	T	P
	0	0	32
Year: 2nd	Semester: IV		

Objective:

To improve the professional competency and research aptitude by touching the areas which otherwise not covered by theory or laboratory classes. The project work aims to develop the work practice in students to apply theoretical and practical tools/techniques to solve real life problems related to industry and current research.

The project work can be a design project/experimental project and/or computer simulation project on any of the topics in power electronics/drives related topics. The project work is allotted individually on different topics. The students shall be encouraged to do their project work in the parent institute itself. If found essential, they may be permitted to continue their project outside the parent institute. Department will constitute an Evaluation Committee to review the project work. The Evaluation committee will consist of at least three faculty members of which internal guide and another expert in the specified area of the project shall be two essential members.

The student is required to undertake the master research project phase 1 during the third semester and the same is continued in the 4th semester (Phase 2). Phase 1 consist of preliminary thesis work, two reviews of the work and the submission of preliminary report. First review would highlight the topic, objectives, methodology and expected results. Second review evaluates the progress of the work, preliminary report and scope of the work which is to be completed in the 4th semester. The Evaluation committee consists of at least three faculty members of which internal guide and another expert in the specified area of the project shall be two essential members.

Batch: 2013-15

Course Title: Financial Accounting and Analysis	Course Code: MBT102		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT-1

Introduction to Accounting: Definition, Nature, Objectives, Scope, Accounting Cycle, types of accounting and Limitations of Accounting, Accounting concepts, conventions and principles; accounting equation, systems of book keeping IFRS.

UNIT-2

Mechanics of Accounting: Double entry system of accounting, journalizing of transactions; Posting Transactions into Ledger, Sub-division of Journals, Preparations of Trial Balance, Preparation of final accounts with adjustments.

UNIT-3

Financial Statement Analysis: Financial Statements - Meaning, Nature and Limitations. Reconstruction of Income Statement and Position Statement. Meaning of Financial Analysis. Significance of Financial Analysis to Different Parties. Vertical Vs. Horizontal Analysis. Internal Vs. External Analysis

UNIT-4

Techniques of Financial Analysis: Accounting Ratios - Meaning, Significance and Limitations. Classification of Accounting Ratio. Computation and interpretation of Liquidity Ratios. Leverage Ratios. Activity/ turnover Ratios and Profitability Ratios. Funds Flow Statement - Meaning and Need. Preparation and Interpretation of schedule of working capital changes and Funds Flow Statement. Cash Flow Statement - Meaning, Need, Preparation and Interpretation(AS3)

UNIT-5

Budgetary Control and Decision Making: Concept of Budget and Budgetary Control; Types of Budget: Cash Budget and Flexible Budgets. Cost Volume Profit Making Analysis, Concept of Marginal Costing, Differential Costing and Absorption Costing

Text Books:

1. Robert n Anthony, Hawkins and Merchant, Accounting TMH
2. Maheshwari S.N & Maheshwari S K – An Introduction to Accountancy (Vikas, 9th Edition)
3. Tulsian PC “Financial Accounting, Pearson Education
4. Khan, M.Y., and P.K. Jain, Management Accounting, 6th ed., Tata McGraw Hill, New Delhi, 2009
5. Ashish Bhattacharyya, Essentials of Financial Accounting, PHI
6. Chandan Sengupta, Financial Analysis and Modeling using Excel and VBA, 2nd Edition, Wiley India Pvt. Ltd., New Delhi, 2011.

Course Title: Statistics for Business Decisions	Course Code: MBT103		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: I		

UNIT-1

Introduction to the Practice of Statistics, Measures of Central Tendency- mean, median, mode, Properties and applications, Measures of Dispersion: Range, Mean deviation, Standard deviation, Coefficient of Variation, Skewness, Kurtosis.

UNIT-2

The Concept of Probability. Sample space and Events, The addition rule and complements Conditional Probability & the General Multiplication Rule. Random variable (discrete and continuous) and probability distribution, Properties of the Normal Distribution, The Binomial Probability Distribution, The Poisson Probability Distribution

UNIT-3

Hypothesis in Business Decisions (Basic Concepts), Estimation Theory and Hypothesis Testing: Sampling theory; Formulation of Hypotheses; Application of Z test, t-test, F-test and Chi-Square test.

UNIT-4

Concept of Correlation and Regression and its types, Karl Pearson correlation, Linear regression defined, An overview on regression, testing the Significance of the Least-Squares Regression Model, Multiple and partial correlation and regression.

UNIT-5

Time Series Analysis: Concept and applications in business decision-making, Additive and Multiplicative models, Components of time series, Trend analysis: Least Square method - Linear equations

Text Books:

1. Robert n Anthony, Hawkins and Merchant, Accounting TMH
2. Ghosh T P - Accounting and Finance for Managers (Taxman, 1st Edition).
3. Maheshwari S.N & Maheshwari S K – An Introduction to Accountancy (Vikas, 9th Edition)
4. Tulsian PC “Financial Accounting, Pearson Education

Course Title: Managerial Decision Modeling with Spreadsheet	Course Code: MBT202		
Credit: 3	L 3	T 0	P 0
Year: 1st	Semester: II		

UNIT-1:

Overview on decision modelling, types of models, steps involved in decision modelling, problems in developing decision models, modelling through spreadsheet- hands on examples.

UNIT-2:

Linear programming models- concept, assumptions and applications, Formulating a linear programming model, graphical solution to LPP with two variables, Simplex algorithm

UNIT-3:

An introduction to transportation models, VAM and MODI methods, Unbalanced transportation models, Overview of assignment models

UNIT-4:

Overview on decision analysis, steps involved in decision analysis, Decision Tree Analysis, Forecasting models

UNIT-5:

Queuing models, characteristics of a queuing system, types of queuing systems, An overview on simulation modeling, Monte Carlo simulation, role of computers in simulation,.

Text Books:

1. Wayne L. Winston, Practical Management Science: spreadsheet modeling and applications
2. Taha, Hamdy, Operations Research, 7th edition, (USA: Macmillan Publishing Company), 2003
3. Vohra; Quantitative Techniques in Management (Tata McGraw-Hill, 2nd edition), 2003.
4. J K Sharma; Operations Research (Pearson)

Reference Books:

1. Managerial Decision Modelling with Spreadsheets; Nagraj Balakrishnan et al, Pearson Publication

Course Title: Business Simulation	Course Code: MBP251
Credit: 2	L T P 0 0 4
Year: 1st	Semester: II

About MikesBikes-Intro (MB-I)

It is an Online Business Simulation that will give you the opportunity to run your own company that deals in Bicycle Manufacturing. Students shall be managing all the key functional areas of a Firm involving critical price, marketing, operations, product development, and financial decisions.

Week wise Course Delivery Plan

Week -1	Introduction to Mike Bikes and Learning Plans through team based decisions
Week -2	First Interface with simulation on Single player Version(Practice)
Week -3	Practice Rollover 1 on Multi-player Version
Week -4	Practice Rollover 2 on Multi-player Version
Week -5	Start of Competition – Rollover1 (Year1 decisions to be taken)
Week -6	Competition – Rollover2 (Year2 decisions to be taken)
Week -7	Competition – Rollover3 (Year3 decisions to be taken)
Week -8	Competition – Rollover4 (Year4 decisions to be taken)

Pedagogy

This course shall be delivered through a competition based format where in class is divided into 20 teams having 3-4 members in each team. Simultaneously, 5 teams will be in direct competition i.e. shall be competition with each other and hence shall form WORLD1. In total there will be 4 Worlds having 5 teams in each. Each team shall analyze various reports and take certain decisions so that overall shareholders' value for their respective firm is increased. After every Rollover i.e. submitting their decisions for a given year, the performance of each team shall be analyzed and evaluated.

Faculty of Management Studies

Course Structure for MBA Program

Batch: 2013-15

Course Title: Performance Management (<i>Elective-3</i>)	Course Code: GAD6280		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: III / IV		

Unit-1: Performance Management (PM) Conceptual Frame Work- Introduction to Performance Management, nature, scope, importance, process of Performance Management, Job role and competency analysis, Goal setting process, Organizational, functional and individual Key result areas, Key performance indicators.

Unit-2: Performance Appraisal- Methods and approaches to performance appraisal-Traditional & modern - BO,BSC,BOS, assessment centers, Multirater assessment , Potential appraisal, Documentation and appraisal communication, appraisal interview,feedback , Performance coaching .Obstacles in appraisal, Performance Appraisal Interview, Potential Appraisal. 360⁰ feedback.

Unit-3: Performance Management in Manufacturing, Services and IT Sector with special reference to NALCO, State Bank of India, Infosys and ITC, Strategies for improving performance. Performance Management and development Analyzing Performance problems. Performance Counseling Concept, Principles and Skills competency based Performance Management.

Unit-4: Performance Management Application & Improvement- Performance Management linked Reward Systems Reward Management, Linkage of Performance Management to Reward and Compensation Systems “Do only what you get paid for” Syndrome, Types of pay for Performance Plans – Individual based, Team Based, Plant Wide Plans and Corporate Wide Plans.

Unit-5: Performance communication – formal & informal methods. Competency mapping – concept, competency mapping process & models, competency assessment personal competency framework, Core competencies PCMM – concept, benefits, HR score card.

Text books:

1. Performance Management, Aquinis - Pearson
2. Performance Management, Chadha, Macmillan
3. Performance Management, Armstrong, Michael, Baron, Jaico
4. Performance Management, Cardy – PHI
5. Arup Verma, Pawan S. Bhudwar & Angelo D. Nisi, Performance Management Systems-A Global Perspective, First Edition, Taylor & Francis, 2008,USA.
6. T.V Rao, Performance Management & Appraisal System, Sage Publication, 2004, New Delhi.

Reference Books:

1. Elizebeth Houldsworth & Dilum Jirasinghe, Managing & Measuring Employee Performance, 1st Edition, Kogan Page Publication, 2006,USA.
2. Michael Armstrong, A Handbook of Performance Management, Fourth Edition, Kogan Page Publication, 2009, USA.

Faculty of Management Studies

Course Structure for MBA Program

Batch: 2013-15

Course Title: Training and Development (<i>Elective-3</i>)	Course Code: GAD6290		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: III / IV		

Unit-1: The Role of Training and Development

Purpose of training and development. Types of training. Selecting training staff, the relationship of training and development to other functions: performance appraisal, staffing and compensation. Aligning training with strategy, Repositioning Training- Knowledge Competence, Training Learning, Models of training process.

Unit-2: Development and designing of a Training Programme

Systematic approaches to training programmes: conducting needs assessment, ensuring employees' readiness for training, creating a learning environment, ensuring transfer of training, establishing training objectives and preparing the partners, developing an evaluation plan, select training methods, monitor and evaluate the program.

Unit-3: Trainers and Training Styles

Traditional and contemporary training styles- E-Learning, Personal Needs of Trainers, Power and Influence: Two Modes, Trainers Role and Functions, Trainers Dilemmas, Ethical issues in the development of a training programme- such as fair selection of participants, Train the trainers, Managers as Partners at different stages of training

Unit-4: Employee Development and Evaluation

Favorable training climate, current trends in formal education for development, Managerial skills. Choosing resources appropriately and fairly. Mentoring relationship, Difference between coaching, mentoring, counselling and training, Redressing common imbalances in training programs, supporting innovation at work, Issues in evaluation, relevance of feedback.

Unit-5: The Future Trend of Human Resource Development

Contingency factors: internal and external environment. The future workplace. New technology. Training and Development as Source of Competitive Advantage, Impediments to Effective Training, cultural diversity and the role of training, Change management through training

TEXT BOOKS:

1. Rolf. P. Lynton and Uday Pareek, **Training for Development**, 3rd Ed., Sage Publication, New Delhi.
2. Rolf P Lynton and Udai Pareek, **Training for organizational transformation**, Part 1, Sage.

REFERENCE BOOKS:

- Ron Stone, **The real value of training**, 1st Edition, McGraw Hills,
- Raymond. A. Noe, **Employee Training and Development**, 5th Edition, McGraw Hill .
- Raymond.A.Noel and Colin Winker, **Employee Training and Development**, 1st Edition, McGraw Hill
- R.K. Sahu, **Training for Development**, 1st Edition, Excel Books, New Delhi.
- Steeven.A. Beebe, Timothy.P.Mottet, and K.David. Roach, **Training and Development**, 1st Edition, Allyn and Bacon, 2004.

Faculty of Management Studies

Course Structure for MBA Program

Batch: 2013-15

Course Title: Business Intelligence and Data Warehousing (Elective-4)	Course Code: GAC6610						
Credit: 3	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	0	0
L	T	P					
3	0	0					
Year: 2 nd	Semester: III / IV						

Unit 1 : Introduction to BI and Data Warehousing

Brief History of Accessing, Reporting And Analyzing Data, Data to Information Lifecycle, Definition of Business Intelligence (BI), Definition of Data Warehousing, Definition of Corporate Performance Management (CPM), Evolution of BI, Role of DSS, EIS, MIS and dashboards, Data Warehouse and BI, Business Drivers For BI, Business and IT Drivers For DW, Applications that use BI And DW ,Data Shadow Systems, BI Applications to Business, Business Analytics versus BI , BI component Framework, Business Layer, Administrative and Operational Layer, Implementation Layer Business Intelligence and Data Warehousing - The Architectures.

Unit 2: Digital Data

Structured data, Unstructured Data, Managing and storing unstructured data, Storage Challenges of Unstructured Data, Extraction of information from unstructured data, UIM Architecture for unstructured data. Semi-Structured Data, Sources of Semi structured Data. Managing, Storing and extracting information from semi-structured data, XML as a solution for Semi-structured data.

Unit 3 : OLAP and OLTP

OLTP, Advantages, challenges, Shortcomings of OLTP, OLAP, One Dimensional Data, Two Dimensional Data, Three Dimensional Data, Beyond Third Dimension, Advantages and Features of OLAP, OLAP Architectures, MOLAP, ROLAP, HOLAP, OLAP versus OLTP, Data Models for OLAP and OLTP, OLAP Operations on multi dimensional data: Slicing, Dicing, Roll Up, Drill Down, Drill Across, Drill Through

Unit 4 : Data Integration

Need for Warehouse, Data Mart, ODS, Kimball’s approach versus Inmon’s approach to Data warehousing, Goals of Data Warehouse, Data Sources for Data Warehouse, ETL, Data mapping, data staging, Approaches to Data integration, needs and advantages, Data Integration Technologies, Data Quality, maintaining data quality, Data Profiling.

Unit 5: Multi-Dimensional Data Modeling

Data Modeling Basics: Entity, Attribute, Cardinality, Types of Data Models: Conceptual data model, Logical data model, Physical model, Normalization modelling, Dimensional modeling, Fact Table, Dimension Table, Hierarchies and Types, Star and Snowflake Schema, Designing a dimensional model. MS Excel 2010 Based Activity

Unit 6: Performance Management& Enterprise Reporting

Measures, Metrics, KPIs and Performance Management - Measurement system Terminology, Role of Metrics, KPI and their usage, Sources of data for KPI and Metrics, Reporting Perspectives common to all levels, Common report layout types, Dashboards, Types of Dashboards, How to create dashboards?, BI Road Ahead - BI and mobility, BI and Cloud, BI and ERP, BI and CRM

Text Books:

1. David Loshin, Business Intelligence, Morgan Kaufmann Publishers.
2. Mike Biere, Business intelligence for the enterprise, IBM Press
3. Hoffer Jeffrey, Prescott Mary, Modern Database Management, Pearson.
4. Larissa Terpeluk Moss, ShakuAtre, Business Intelligence Roadmap, Addison-Wesley Information Technology Series.

Reference Books:

1. Cindi Howson, Successful Business Intelligence: Secrets to making Killer BI Applications, TMH
2. Stephen Few, Information dashboard design: The Effective Visual Communication of Data, O'Reilly Media.

Faculty of Management Studies

Course Structure for MBA Program

Batch: 2013-15

Course Title: Data Analytics Fundamentals (<i>Elective-4</i>)	Course Code: GAC6620		
Credit: 3	L 3	T 0	P 0
Year: 2 nd	Semester: III / IV		

Unit 1: Overview of Analytics

What is analytics?, Types of problems in analytics, Case studies of application of analytics in business, When analytics does not work, Analytics vs. data warehousing, OLAP, Statistics, Widely used analytic software, Companies using analytics, Day in the life of a business analyst, Career path in analytics, Qualities of a business analyst.

Unit 2: Statistics

Introduction to statistics, Summary statistics (Mean, Median, Mode, Variance), Probability, Probability distribution (Binomial, Poisson, Normal), Hypothesis testing, T-test, Chi-square test, ANOVA, Non parametric testing

Unit 3: Models and Algorithms

Modelling Terminology, Linear Regression, Logistics Regression, Decision Trees, MARS, Rule Induction, K-nearest, Neural Network, Genetic Algorithm

Unit 4: Analytic Methodology

Problem definition, Data selection, Data exploration, Data partition, Data cleansing, Data transformation, Modelling, Validation, Deployment, Assessment, re-start

Unit 5: Data Preparation

Why data preparation, Outlier treatment, Missing values treatment, Categorical variables, Dummy variables, Derived variables, Lag variables, Interaction variables, Variable transformation, Quadratic variables, Date, time variables, Sampling and partitioning, Preliminaries.

Unit 6: Data Analysis Techniques

Correlations, **Regression** (Basics of Regression, Linear Regression, Logistic Regression, Interpretation of modeling results, Violation of regression assumptions, **Decision Trees** (What are decision trees, Examples of trees, Terminology in decision trees, Data preparation for trees, How to create a tree? Measure of effectiveness (Gini, Chi-square, Information gain, Reduction in variance, Use of decision trees, When to use Decision trees? Widely used software for Decision trees, **Clustering** (What is clustering? types of clustering, K-means clustering, Measures of homogeneity, Data preparation, Hierarchical clustering, Cluster evaluation, Cluster profiling, When to use, Important considerations, **Pitfalls to avoid while modeling** (Misleading patterns, Biased population, Data at wrong level

Text Books:

1. R N Prasad and Seema Acharya, Fundamentals of Business Analytics, Wiley India.

Reference Books:

1. Minelli (2013), Big Data, Big Analytics: Emerging Business Intelligence and Analytic trends for today's business, 2nd Edition, Wiley India.
2. Levin and Rubin, (2013), Statistics for Management, 7th edition, Pearson Publication
3. Hair and Anderson (2013), Multivariate Data Analysis, 6th edition, Pearson Publication

Faculty of Management Studies

Course Structure for MBA Program

Batch: 2013-15

Course Title: Financial Analytics (<i>Elective-4</i>)	Course Code: GAD6630		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: III / IV		

Unit-1: Introduction to Accounting, Basic Accounting Principles, Income Statement, Balance Sheet, Cash Flow Statement, Financial Ratio Analysis, Reading the Annual Report, Relevance of Economics, Microeconomics, Macroeconomics, Time value of money, Long term financing, Cost of capital, Risk and return, Capital Structure, Dividend Policy, Working Capital Requirements, Equity and Industry Analysis

Unit-2: Formatting of Excel Sheets, Use of Excel Formulae Function, Advanced Modeling Techniques, Data Filter and Sort, Charts and Graphs, Table formula and Scenario building, Lookups, pivot tables, Macros, Recording of Macros, understanding Visual Basic Environment (VBE)

Unit-3: Project evaluation, Stage of project, Construction & development phase, Prepare an Income Statement, Balance sheet, Cash Flow Statement, Geographic Revenue Sheet, Segment Revenue Sheet, Cost Statement, Debt Sheet, Analyze Revenue Drivers, Prepare Cash Flow Statements, Discounted Cash Flow Valuation, Pro-Forma Statements

Unit-4: Advanced macros & VBA, Recording Macros, Understanding the Basics of Macro Coding, Applications of Macros to Financial Modeling, Developing Sensitivity Table, Developing Scenario Analysis, Developing Simulation

Unit-5: Investment Banking – Merger & Acquisitions, Types of M&A: Merger, Acquisition, Consolidation, Spin-off, Developing M&A Models: Integration of Financial Statements between (Target and Acquirer), Developing Merger Model, Developing Synergies.

Text Books & Reference Books :

1. Day Alastair, Mastering Financial Modeling in Microsoft Excel, 2nd Edition, Pearson Publishers (2009)

Course Structure for MBA Program

Batch: 2013-15

Course Title: Human Resource Analytics (<i>Elective-4</i>)	Course Code: GAD6640		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: III / IV		

Unit 1: Introduction to Human resource Analytics, The Era/evolution of HR Analytics, Current State of HR Analytics.

Unit 2: Why analytics is important, The Strategic workforce framework, workforce analytics. Competency Mapping, Balance Scorecard, HR Matrix, Right Sizing and Emotional Intelligence.

Unit 3: Introduction to Human Capital Management: Purpose of HCM, Concept and methodologies, Issues and challenges, HCM data used for measurement, Approaches to measurement, Human and intellectual capital and ROI.

Unit 4: Reporting and data visualization: Data exploration, visualization, correlation and reporting. Predictive analysis-Trend analysis, Ratio analysis.

Unit 5- Markov Analysis, Probability Technique, Work Load Analysis, Work Study Analysis, Modeliing or Multiple productive Techniques, Multi variate analysis, HR analytics and Business Intelligence, Contemporary Practices in HR analytics- Cases.

Text Books & Reference Books:

1. The New HR Analytics By Jac-Fitz-Enz, Amacom (1 June 2010)
2. HR Analytics: Driving Return on Human Capital Investment- An Oracle White Paper September 2011.
3. Strategic Human Capital Management Jon Ingham, Elsevier Publication

Faculty of Management Studies

Course Structure for MBA Program

Batch: 2013-15

Course Title: Marketing Analytics (<i>Elective-4</i>)	Course Code: GAC6650
Credit: 3	L T P 3 0 0
Year: 2nd	Semester: III / IV

UNIT-1:

An Introduction to marketing analytics, need and importance, Overview on based on experimental design, application of multiple regression models.

UNIT-2:

Developing marketing strategies, profiling customers based on Discriminant and logit analysis). Analysis exercises.

UNIT-3:

Developing marketing strategies, Segmentation & Targeting (Cluster analysis). Analysis exercises.

UNIT-4:

Positioning (MDS), Developing marketing programs, New Product Decisions, Design Process (conjoint analysis), Sales force and Channel Decisions

UNIT-5:

Price & Sales Promotion Decisions, Advertising and Communication Decisions, Project Proposal Presentations, Data analysis exercises. Future of Marketing Analytic

Batch: 2013-15

Course Title: Unix and Shell Programming	Course Code: CAT301		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: III		

Objectives: Objective of this course is to acquaint the students with the basics of unix operating system and shell programming. This course makes aware the students that how the operating system works. It also gives an idea about system administration.

Prerequisites: Operating System

UNIT-I

Introduction to UNIX operating system : History, characteristics of UNIX operating system, System structure – user perspective, Operating system services, kernel architecture, UNIX Shell, types of shell, utilities in UNIX, Notation of UNIX command, general purpose commands, commands for file system, process management and administrations, UNIX directory hierarchy.

UNIT-II

UNIX Shell Programming: Shell types and Shell features: standard streams, redirection, pipes, Command execution process.

Shell variables: predefined variables and user defined variable, environmental variables Writing scripts: basic concept, expression, decision and repetition, Special parameters, variables and argument processing Filter utilities: head, tail, cut, paste, tr, sort, uniq, wc, comm, diff, grep and awk utilities.

UNIT-III

The UNIX file system: The file system structure, type of files, Internal representation of files: inodes, structure of a regular file. Directories, conversion of path name to an inode, inode assignment to new file, allocation of disk blocks, System calls for the file system: open, read, write, adjusting, position of the file I/O, close, file creation, creation of special files, change directory, change root, change owner and change mode, stat and fstat etc.

UNIT-IV

The UNIX Process Management: The structure of processes, process states and transition, Layout of system memory, the context of process, manipulation of process address spaces, Process control: process creation, process termination, Awaiting process termination, Invoking other programs, User id of a process, System boot and init process, Login process and the shell process.

UNIT-V

Introduction to System Administration: Define system Administration, Booting the system, Maintaining User Accounts, File System, and special files, Backup and Restoration, introduction to Linux platform

Text Books:

1. Sumitabh Das, “**Unix Concepts and applications**”, 4/e, Tata Mc-Graw Hills, INDIA, 2008.
2. Yashwant Kanitkar, “**Unix Shell Programming**”, 2/e, BPB, INDIA, 2009.

References Books

1. Saurabh, “**UNIX Programming: The First Drive**”, 3rd edition Wiley India, 2010.
2. Johnson, **Beginning Shell scripting**, 1/e, Wiley, India 2010.
3. Mike Joy, Stephen Jarvis, Michael Luck, “**Introducing Unix and Linux**”, 1/e, Palgrave Macmillan, 2010.

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Course Title: Design and Analysis of Algorithms	Course Code: CAT302		
Credit: 3	L 3	T 0	P 0
Year: 2 nd	Semester: III		

Objectives: Objective of this course is to study and analyse the algorithms. It provides us with the mathematical and technical approaches of solving problems in various ways. This course enables the students to design the algorithm to solve the problems and to find out the complexity of the program. It enables the students to check how the worst case complexity of an algorithm is defined.

Prerequisites: Data Structures

UNIT-I

Introduction: Algorithms, Pseudo code for expressing algorithms, Space complexity, Time complexity, Asymptotic Notation- Big oh notation, Omega notation, Theta notation and Little oh notation, Introduction of Recurrences: Substitution, recursion tree and master method.

Divide and conquer: General method, applications-Binary search, Quick sort, Merge sort Analysis of Insertion Sort, Trees: Binary Search Trees ,Insertion, Deletion

UNIT-II

Dynamic Programming: Matrix Chain multiplication, Longest Common subsequence,0/1 knapsack problem, optimal binary search trees.

Greedy Algorithm: Activity Selection problem, Theoretical foundation of greedy algorithm, Task Scheduling problem, Comparison of dynamic programming and Greedy algorithm with Knapsack as case study.

UNIT-II

Branch and Bound: Traveling sales man problem, Linear programming.

Backtracking: General method, applications-n-queen problem, sum of subset problem.

UNIT-IV

Introduction to Graph Algorithm: BFS, DFS, Kruskal, Prim, Single source shortest path : Bellman Ford, Dijkstra's algorithm, All Pair Shortest Path, Floyd Warshall, Flow Networks, Residual Network, Augmenting Path, Ford Fulkerson method

UNIT-V

Introduction to Computational Geometry: Convex Hull, Graham Scan, Overview of NP Completeness, Introduction to various NP Complete problems-Vertex Cover Problem, Traveling Salesman Problem

Text Books:

1. T.H.Cormen, C.E.Leiserson, R.L.Rivest,and C.Stein, **Introduction to Algorithms**, 2/e, PHI Pvt.Ltd./ Pearson Education,India,2001
2. Ellis Horowitz, Satraj Sahni and Rajasekharam, **Fundamentals of Computer Algorithms**, 2/e,Galgotia publications pvt. Ltd,New Delhi India,2007

Reference Books:

2. Allen Weiss,**Data structures and Algorithm Analysis in C++**, 2/e , Addison Wesley,USA,1997
3. Aho, Ullman and Hopcroft **Design and Analysis of algorithms**, 4/e,Pearson education,India,2009
4. Richard Johnson baugh and Marcus Schaefer **Algorithms** , 3/e,Pearson Education,India,2006

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Course Title: Data Base Management Systems	Course Code: CAT303		
Credit: 3	L 3	T 0	P 0
Year: 2 nd	Semester: III		

Objectives: Objective of this course is to introduce the data base management system. To introduce the server query language and designing the database for the system. It enable the students to generate the query and to the transaction of data to perform various task of the different management system, to deal with the transaction failure and concurrency control.

Prerequisite: None

UNIT-I

Introduction: History of Data base Systems, Database System Vs File System, Database System concepts and architecture, data models schema and instances, data independence, interfaces, Database Languages, DDL, DML, Overall Database Structure, data base Users and Administrator. ER model concepts, notation for ER diagram, Mapping constraints, keys, Concepts of Super Key, candidate key, primary key, Generalization, aggregation, reduction of An ER diagrams to tables, extended ER model, relationships of higher degree.

UNIT-II

Introduction to the Relational Model: Relational data model concepts, integrity constraints: entity integrity, Referential integrity, Keys constraints, Domain constraints, relational algebra, relational calculus, tuple and domain calculus **Introduction to SQL:** Characteristics of SQL, Advantages of SQL, SQL data types and literals, Types of SQL Commands, SQL operators and their procedure, Tables, views and indexes, Queries and sub queries, Aggregate Functions, Insert, update and delete operations, Joins, Unions, Intersection, Minus, Cursors in SQL.PL/SQL, Triggers and clusters

UNIT-III

Data Base Design & Normalization: Role of Normalization, Schema refinement, Problems Caused by redundancy, Functional dependencies, normal forms, first, second, third normal Forms, BCNF, inclusion dependencies, loss less join decompositions, normalization using FD, MVD, and JDs, Alternative approaches to database design

UNIT-IV

Transaction Processing Concepts: Transaction system, Transaction concepts : Transaction execution and Problems, Transaction execution and control with SQL, Transaction properties, Transaction log, testing of serializability, Serializability of schedules, Conflict & view serializable schedule, recoverability, Recovery from transaction failures, log based recovery, Checkpoints, Deadlock handling– detection and resolution.

UNIT-V

Concurrency Control Techniques: Concurrency control, locking Techniques for concurrency control, Time stamping protocols for concurrency control, validation based protocol, multiple granularity, Multiversion Schemes, Need of Database backup, Database backup techniques, Types of Database failures, Recovery with concurrent transaction.

Text Books:

1. Silberschatz, Korth, **Data base System Concepts**, 6/e, McGraw hill, USA, 2011.
2. Elmasri Navate, **Fundamentals of Database Systems**, 6/e, Pearson Education, India, 2010

Reference Book:

1. C.J.Date, **Introduction to Database Systems**, 8/e, Pearson Education, India, 2003.

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Course Title: Computer Organization and Architecture	Course Code: CAT304		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: III		

Objectives: The objective of this course is to study the design options in computer architecture and organization. This course also includes functional units of the PC, basic working of CPU, memory organization and I/O device etc.

Prerequisites: Fundamental of Computers Systems and Digital Electronics

UNIT-I

Register Transfer Language, Bus and Memory Transfers, Bus Architecture, Bus Arbitration, Arithmetic Logic, Shift Microoperation, Arithmetic Logic Shift Unit, Design of Fast address, Arithmetic Algorithms (addition, subtraction, Booth Multiplication), IEEE standard for Floating point numbers.

UNIT-II

Control Design: Hardwired & Micro Programmed (Control Unit): Fundamental Concepts (Register Transfers, Performing of arithmetic or logical operations, Fetching a word from memory, storing a word in memory), Execution of a complete instruction, Multiple-Bus organization, Hardwired Control, Micro programmed control (Microinstruction, Microprogram sequencing, Wide-Branch addressing, Microinstruction with Next-address field, Prefetching Microinstruction).

UNIT-III

Processor Design: Processor Organization: General register organization, Stack organization, Addressing mode, Instruction format, Data transfer & manipulations, Program Control, Reduced Instruction Set Computer.

Input-Output Organization: I/O Interface, Modes of transfer, Interrupts & Interrupt handling, Direct Memory access, Input-Output processor, Serial Communication.

UNIT -IV

Memory Organization: Memory Hierarchy, Main Memory (RAM and ROM Chips), organization of 2D and 21/2D, Auxiliary memory, Cache memory, Virtual Memory, Memory management hardware.

UNIT-V

Introduction to parallel processing– Pipelining, , Architectural classification schemes. Principles of pipelining & Vector processing – Principles of Linear pipelining, Classification of pipeline processors, General pipelines and reservation tables, interleaved memory Organizations, Instruction and Arithmetic pipelines, Principles of designing pipelined processors, Vector processing Requirements. Structures for array processors: SIMD Array processor, SIMD Interconnection networks.

Course Structure for MCA Program

Batch: 2013-15

Course Title: Combinatorics and Graph Theory	Course Code: CAT305		
Credit: 2	L 2	T 0	P 0
Year: 2 nd	Semester: III		

UNIT-I

Fundamental principles of counting - permutations and combinations - binomial theorem -combinations with repetition - combinatorial numbers - principle of inclusion and exclusion -derangements - arrangements with forbidden positions - Generating functions - partitions of integers -the exponential generating function - the summation operator - recurrence relations - first order and second order – non homogeneous recurrence relations - method of generating functions

UNIT-II

Graphs, sub-graphs, some basic properties, Walks, Path & circuits, Connected graphs, Disconnected graphs and component, Euler and Hamiltonian graphs, The traveling sales man problem, Various operation on graphs.

UNIT-III

Cut-sets and cut vertices, some properties, All cut sets in a graph, Fundamental circuit and cut sets, Connectivity and seperatability, Network flows, mincut theorem, Planar graphs, Combinatorial and geometric dual, Kuratowski to graph detection of planarity, Geometric dual, Some more criterion of planarity, Thickness and Crossings.

UNIT-IV

Vector space of a graph and vectors, basis vector, cut set vector, circuit vector, circuit and cut set verses subspaces, orthogonal vectors and subspaces, incidence matrix of graph, sub matrices of $A(G)$, circuit matrix, cut set matrix, path matrix and relationships among A_f , B_f , and C_f , fundamental circuit matrix and rank of B , adjacency matrices, rank- nullity theorem .

UNIT-V

Coloring and covering partitioning of graph, Chromatic number, Chromatic partitioning, Chromatic polynomials, Matching, covering, Four color problem.

Batch: 2013-15

Course Title: Object Oriented Concepts with JAVA	Course Code: CAT306		
Credit: 3	L 3	T 0	P 0
Year: 2 nd	Semester: III		

Objectives: Java plays a predominant role in software development it is felt that the following objectives can be achieved after studying this subject. Understand the concepts of Object oriented Programming which enables the student to write simple applications using Java and compare and contrast features of Java.

Prerequisites: Fundamental programming knowledge in C.

UNIT- I

Introduction and Evolution of Java: Concepts of class, objects, encapsulation, polymorphism, abstraction, inheritance. Evolution of Java, Byte Code, JDK, JVM, JRE, Data types, Variables, Arrays, Operators, Operator precedence, associativity, object equality and reference equality, Command line arguments.

Control Statements: switch with Strings, for each loop.

Classes & Objects - Constructor, super() and this() constructor calls, constructor call hierarchy, Methods, this, super keyword, Inheritance, static blocks, multiple static block, instance initializer block, variable arity method.

UNIT-II

Packages: Defining Packages, Using Packages, import and static import, jar utility, classes modifiers: abstract, final; member modifiers.

Interface: Defining Interfaces, abstract methods declarations, implementing interfaces, extended Interfaces, interface references and constants in interfaces

Fundamental Classes: Object class, Wrapper classes, String class, immutability, String Buffer

UNIT-III

Exception handling: Exception Types, Exception class, Runtime Exception Class, Error Class, Defining new exceptions; Handling exceptions.

Thread: Overview of threads, thread Creation; implementing the runnable interfaces, extending the thread class, Thread States. Synchronized and static synchronized threads. Synchronized blocks.

UNIT-IV

The File class, Filename Filter, Byte Streams: Input and Output streams, Character streams: readers and writers; object serialization

Applet: Applet Life cycle; Event Handling: Event handling mechanisms, the Delegation Event Model, event classes, sources of events, Event Listener Interfaces, Adapter classes

AWT: AWT Controls, Layout Managers, Frame, Images, Graphics, Fonts, Cursors, Colors, File Dialog box, Menus

Swing- Introduction, Advantages over AWT, Swing applications.

UNIT-V

Networking: Networking Basics, Java and the Net, TCP/IP Client sockets, URL, URL Connection, TCP/IP Server sockets, Datagram

Introduction to Generic Classes and Collection (List, Set, Map)

Text Books:

1. Herbert Schieldt, “**The Complete Reference: Java**”,8/e, TMH,India,2006
2. E. Balagurusamy, “**Programming in JAVA:A Primer**”, 4/e, TMH,India,2009

Reference Book:

1. Khalid A. Mughal – Rolf W Rasmussen, **A Programmer’s guide to Java SCJP certification**, 3/e, Addison-Wesley,USA,2009

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Course Title: Unix Lab	Course Code: CAP351		
Credit: 1	L 0	T 0	P 2
Year: 2nd	Semester: III		

1. use of general purpose commands: mkdir, cd, pwd, ls, cat, less, cp, mv, rm, man, input and output redirection(< and >), pipe (|), grep, chmod, passwd, ps, kill, gzip, tar, find.
2. Use Vi editor to create a file which contain some text. Correct typing errors during creation, Save the file & Logout of the file.
3. Open the file created in Exp 1, Add, Change, delete & Save the changes.
4. Use the cat command to create a file containing the following data. Call it mutable use tabs to separate the fields 1425 ravi 15.65, 4320 ramu 26.27, 6830 sita 36.15, 1450 raju 21.86.
5. Use the cat command to display the content of file, use vi command to correct any errors in the file, use the sort command to sort the file according to the first field. Call the sorted file & print the file
6. Use the cut & paste commands to swap columns of file.
7. Use the date and who commands in sequence? (in one line) such that the output of date will display on the screen and the output of who will be redirected to a file .Use the more command to check the contents of file.
8. Develop an interactive grep script that asks for a word and a file name and then tells how many lines contain that word.
9. Write A shell script that takes a command –line argument and reports on whether it is directory, a file,or something else.
10. Write a shell script that accepts one or more file name as a arguments and converts all of them to uppercase, provided they exists in the current directory.
11. Write a shell script that determines the period for which a specified user is working on the system

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Course Title: DBMS Lab	Course Code: CAP352		
Credit: 1	L	T	P
	0	0	2
Year: 2nd	Semester: III		

1. To implement Data Definition language
2. To implement Data Manipulation language
3. To implement Constraints
4. To implement Insert, Select commands, update and delete commands.
5. To implement SET OPERATORS (Union, Intersect, Minus).
6. To implement Nested Queries & Join Queries.
7. To implement GROUP functions (avg, count, max, min, Sum).
8. Write programme by the use of PL/SQL
9. To implement Views
10. To implement Triggers
11. To implement Cursors
12. Create FORMS and REPORTS

Course Title: JAVA Lab	Course Code: CAP353		
Credit: 1	L	T	P
	0	0	2
Year: 2nd	Semester: III		

1. Write a program in JAVA to be familiar with class, object, instance, reference, methods and fields.
2. Write a program in JAVA to show working of overloaded constructors and methods
3. Write a program in JAVA to show how to pass arrays to methods, also show that array are passed as references.
4. Write a program in JAVA to illustrate the working of for each loop, labeled break and labeled continue
5. Write a program in JAVA to illustrate exception handling. Show how exceptions can be caught and thrown, show the handling of checked and unchecked exceptions
6. Write a program in JAVA to show the significance of inheritance, this, super and overriding
7. Write a program in JAVA to illustrate the methods of String and StringBuffer
8. Write a program in JAVA to execute two loop simultaneously using threads
9. Write a program in JAVA using command line arguments to copy the contents of one file into another. Handle exceptions wherever necessary.
10. Using Applets or Frames develop the “Paint Brush” tool in Java. Compare with Paint Brush and exactly develop the same working only for free form sketching using a brush.
11. Develop a client server application using TCP/IP according to the following requirements.
 - a. A client logs in by issuing a command **LOGIN@** followed by his/her name.
 - b. As soon as a client logs in, server presents him/her with a list of all other clients which are online.
 - c. A client logs out by issuing a command **LOGOUT**
 - d. As soon as a client logs out, server presents an updated list of clients to all others which are online.

Course Structure for MCA Program

Batch: 2013-15

Course Title: Value Added Training – I (Advanced Web Applications-I)	Course Code: CAV354						
Credit: 1	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> <td style="text-align: center;">2</td> </tr> </table>	L	T	P	0	0	2
L	T	P					
0	0	2					
Year: 2nd	Semester: III						

HTML: Basic HTML structure, Basic HTML formatting tags, Links and site structure, Tables, Forms

CSS: Style Sheet basics. Working with CSS files, Style Selectors. Formatting with Styles

XML: XML Basics, element, attributes, CDATA, XSL and DTD, XSL transformations and programming, XML parsers, XML in Content management, XML in Web Services, XML in data transfer, RSS feed

DOM parsing using Javascript: HTML & XML DOM, Node, Element, inner HTML, Node attributes and values

AJAX: XML Http Request Object, GET and POST request, Function for handling the response, AJAX libraries, AJAX applications

Comet (Reverse AJAX): Introduction, Problems with HTTP protocol, Two way web (persistent connection), Long polling, Application in chatting and others

JQuery: Cross browser javascript compatibility issue, Introduction to JQuery, JQuery selectors, DOM, Events, JQuery and AJAX, UI, Animation and Effects using JQuery

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Course Title: Advance Java	Course Code: CAT401		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: IV		

Objectives: To develop proficiency in object oriented methodology. To get a good understanding of professional programming applications and to develop a base for advanced computer science study.

Prerequisites: Any programming language like C, C++

UNIT-I

JDBC: Concept of JDBC, JDBC Driver Types, JDBC Packages, Database Connection, Associating the JDBC/ODBC Bridge with the Database, JDBC URL, Statement Objects, ResultSet, Transaction Processing, commit, savepoint, rollback, ResultSetMetadata, DatabaseMetadata, Data Types, SQLException, Prepared Statement, CallableStatement, Batch updates. Storing and Retrieving images via JDBC. Connection pooling.

Establishing connection with **Oracle, MySQL, MSSQL, MS Access and MS Excel**

UNIT-II

Servlets: Advantages of Servlets over CGI, Installing Servlets, The Servlet's Life Cycle, Servlet API, Handling HTTP GET and POST Request, ServletConfig, ServletContext, Requests and Responses, GenericServlet, HttpServlet, HttpServletRequest, HttpServletResponse, Deployment Descriptor, Request Dispatcher

UNIT-III

Session: Cookies, Session Tracking, Filter API, Multi-tier Applications Using Database Connectivity **Java Server**

Pages (JSP): Problems with Servlets and Advantages of JSP, JSP Scripting Elements- (Directives, Declaratives, Scriptlets, Expressions, Implicit Variables), Page Directives, Standard Action, expression language (EL), JSTL in detail, introduction to Custom Tags. **Java Beans:** Java Bean, Advantages, usebean and other tags, scope of beans.

A servlet/JSP based download/upload application.

UNIT-IV

Enterprise Java Beans: EJB, benefits, EJB Architecture, EJB Roles, Types of EJB, Building small session bean application, Home Interface, Remote Interface, Session bean: stateless, stateful session bean. **Struts:** Struts Architecture, Benefits of struts, MVC, control flow, Struts- Config.xml, web.xml, Action Forward, Action Form, Action Mapping, ActionServlets, validation framework in detail, Building a small Struts application.

UNIT-V:

XML parsing through Java: SAX parser and DOM parser

Ant: What are Build Tools? Advantages of ANT, Installation and usage

Hibernate: Object Relational Mapping, Advantages over JDBC, Mapping from Java classes to database tables (and from Java data types to SQL data types), Data query, retrieval and manipulation.

Text Books:

1. Jassica Burdman, **Collaborative Web Development**, 1st Edition, Addison Wesley, UK, 1999.
2. Allamaraju and Buest, **Professional JAVA Server Programming**, Latest Edition, SPD Publication, India,
3. Ivor Horton, **Beginning J2EE 1.4**, Latest Edition, SPD Publication.

2. Austin and Pawlan, **Advanced Programming for JAVA 2 Platform**, Latest Edition, Pearson Publication.
3. Chris Bates, **Web Programming Building Internet Applications**, 2nd Edition, WILEY Dreamtech publication, India, 2006.

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Course Title: Microprocessor and System Design	Course Code: CAT402		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: IV		

UNIT-I

Introduction to Microprocessors, microcomputers and Assembly language, Microprocessor architecture and microcomputer systems. 8085 architecture and memory interfacing, Interfacing I/O devices.

UNIT-II

Programming 8085: Introduction to 8085 Instructions: Programming Techniques, Counters and Time Delays, Stacks and Subroutines, Interrupts, General purpose programmable peripheral devices

UNIT-III

Introduction to system software: definition, feature of system programming, system programming vs. application programming and type of system programmes. Assembler: single pass assembler, two-pass assembler, and general design procedure of an assembler.

UNIT-IV

Macro processor: macro language and its features, macro instructions, features of macro facility, implementation, one pass macro processor, two pass macro processor, Implementation.

Loaders and linkers: simple linker vs. loaders, and design and implementation of direct linking loader, subroutine linkage & other loader schemes

UNIT-V

Compilers: overview of compilation process, lexical analysis, syntax analysis, semantic analysis and intermediate code generation and code optimization techniques, compiler vs. interpreter. Introduction to device driver, functions and structure of text editor.

Text Books:

1. John J Donovan ,”Systems Programming”, 10/e,McGraw-Hill Edition ,USA,2010,

Reference Books:

1. R.S Goankar, “Microprocessor architecture, programming and application with the 8085”,5/e, PenRam International,India,2011

Batch: 2013-15

Course Title: Computer Graphics and Animation	Course Code: CAT403		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: IV		

UNIT-I

Introduction and Line Generation: Types of Computer graphics, Graphic Displays- Random scan displays, Raster scan displays, Frame buffer and video controller, Points and lines, Line drawing algorithms, Circle generating algorithms, Mid-point circle generating algorithm, and parallel version of these algorithms.

UNIT-II

Transformations: Basic transformation, Matrix representations and homogenous coordinates, Composite transformations, Reflections and shearing. Windowing and Clipping: Viewing pipeline, Viewing transformations, 2-D Clipping algorithms- Line clipping algorithms such as Cohen Sutherland line clipping algorithm, Liang Barsky algorithm, Line clipping against non-rectangular clip windows; Polygon clipping Sutherland Hodgeman polygon clipping, Weiler and Atherton polygon clipping, Curve clipping, Text clipping.

UNIT-III

Three Dimensional: 3-D geometric primitives, 3-D Object representation, 3-D Transformation, 3-D viewing, projections, 3-D Clipping.

UNIT-IV

Curves and Surfaces: Quadric surfaces, Spheres, Ellipsoid, Blobby objects, Introductory concepts of Spline, B-spline and Bezier curves and surfaces. Hidden Lines and Surfaces: Back Face Detection algorithm, Depth buffer method, A- buffer method, Scan line method, basic illumination models – Ambient light, Diffuse reflection, Specular reflection and Phong model, Combined approach, Warn model, Intensity Attenuation, Color consideration, Transparency and Shadows.

UNIT-V

Computer Animations : Conventional and computer assisted animation, design of animation sequences, interpolation, simple animation effects, animation languages (Key Frame System, Parameterized systems), motion specifications, methods of controlling animation.

Text Book:

Batch: 2013-15

Course Title: Theory of Computation	Course Code: CAT404		
Credit: 2	L 2	T 0	P 0
Year: 2 nd	Semester: IV		

UNIT-I

Introduction to defining language, Kleene Closure, Arithmetic expressions, Chomsky Hierarchy, Regular expressions, Generalized Transition graph. Finite Boolean algebra, functions of Boolean algebra. Conversion of regular expression to Finite Automata, NFA, DFA, Conversion of NFA to DFA, Optimizing DFA, FA with our Moore machine, Mealy machine, Conversions.

UNIT-II

Regular expressions and finite Automata: Regular languages, Finite automata, Union, Intersections & complements. Non deterministic Finite automata, Kleene's theorem. Regular & Non regular languages: Criterion for regularity, minimal Finite Automata, Pumping lemma, Decision problems, languages & computers.

UNIT-III

Context-free grammars: Derivation Trees & Ambiguity, An Unambiguous CFG for algebraic expressions, simplified forms and normal forms. Pushdown Automata: Definition, Deterministic pushdown automata, A PDA corresponding to a given context-free grammar, context-free grammar corresponding to a given PDA, parsing.

UNIT-IV

Context-free and Non-Context-free languages: The pumping lemma for context-free languages, Intersections & complements of context-free languages, decision problems involving context-free languages.

UNIT-V

Turing Machines: Definitions, computing partial functions, combining Turing machine, variation of Turing machines, Non-Deterministic Turing Machines, Universal Turing Machine

Text Books:

1. John C Martin, Introduction to languages & the theory of computation by, 3rd edition, Tata McGraw Hill publication, 2004.
2. John E Hopcroft and Jeffrey D Ullman, Introduction to Automata theory, Languages and Computation, Narosa Publication House, 2004.

Batch: 2013-15

Course Title: Advance Database Management Systems (<i>Elective-I</i>)	Course Code: CAT421		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: IV		

UNIT-I

Distributed DBMS Concepts and design: Introduction, functions and architecture of a DDBMS, distributed relational database design, Transparencies in a DDBMS, Twelve rules for a DBMS. Advanced concepts: Distributed transaction management, distributed concurrency control, distributed deadlock management, distributed database recovery, X/open distributed Transaction processing model, Replication servers, Distributed query optimization, Mobile databases.

UNIT-II

Object-Oriented DBMS Introduction, advanced database applications, weakness of RDBMS, storing objects in a relational database, next-generation database systems. Concepts and design: OODBMS perspectives, persistence, issues in OODBMS, advantages and disadvantages of OODBMS, Object-oriented database design.

UNIT-III

Standards and systems: object management group, object database standard ODMG 3.0 1999, Object store. Object relational DBMS: Introduction, third generation database manifestos, SQL8, Object oriented extensions in Oracle, Comparison of ORDBMS and OODBMS.

UNIT-IV

Web technology and DBMS, Web as a database Application Platform: Requirements for web-DBMS integration, web-DBMS architecture, advantages and disadvantages of web-DBMS approach, approaches to integrating the web and DBMS, Oracle Internet Application Server (IAS).

Text Books:

1. Shio Kumar Singh, Database Systems: Concept Design and Applications, 1/e, Pearson Education, India, 2011

Batch: 2013-15

Course Title: Data Compression and Encryption (<i>Elective-I</i>)	Course Code: CAT422		
Credit: 3	L 3	T 0	P 0
Year: 2 nd	Semester: IV		

UNIT-I

Need for Data Compression, Lossy/ lossless compression, symmetrical compression and compression ratio, run length encoding (RLE) for text and image compression, relative encoding and its applications in facsimile data: compression and telemetry, scalar quantization .Statistical modeling of information source, coding redundancy, variable size codes prefix codes, Shannon-Fano coding, Huffman coding, adaptive Huffman coding, arithmetic coding an adaptive arithmetic coding, text compression using PPM method.

UNIT-II

String compression, sliding window compression, LZ77, LZ78 and LZW algorithms and applications in text compression, Zip and Gzip, ARC and Redundancy code. Loss less techniques of image compression, gray codes, two dimensional image transform, discrete cosine transform and its application in lossy image compression, quantization, zig-zag " coding sequences, JPEG and JPEG-LS compression standards, pulse code modulation and differential pulse code modulation methods of image compression, video compression and MPEG industry standard.

UNIT-III

Digital Audio, Lossy sound compression, M-law and A-law compounding, DPCM and ADPCM audio compression, MPEG audio standard, frequency domain coding, format of compressed data.

UNIT-IV

Security of information, security attacks, classical techniques, Caesar cipher, block cipher principles, data encryption standard, key generation for DES, block cipher principle, design and modes of operation, S-box design, triple DES with two three keys, introduction to international data encryption algorithm, key distribution.

UNIT -V

Number Theory and public encryption: Modular arithmetic, Fermat's and Euler's theorems, Chinese remainder theorem, discrete logarithm, principles of public key cryptosystems, RSA algorithm, key management, Diffie-Hellman key exchange, elliptic curve cryptography.

Text Books:

1. Khalid Sayood, Introduction to Data Compression, 3/e, Morgan Kaufmann Publication, USA, 2005

Reference Books:

Course Title: Data Warehousing and Data Mining (<i>Elective-I</i>)	Course Code: CAT423		
Credit: 3	L	T	P
	3	0	0
Year: 2nd	Semester: IV		

UNIT-I

Dss-Uses, definition, Operational Database. Introduction to Data Warehousing. Data-Mart, Concept of Data-Warehousing, Multi Dimensional Database Structures. Client/Server Computing Model & Data Warehousing. Parallel Processors & Cluster Systems. Distributed DBMS implementations.

UNIT-II

DATA Warehousing. Data Warehousing Components. Building a Data Warehouse. Warehouse Database. Mapping the Data Warehouse to a Multiprocessor Architecture. DBMS Schemas for Decision Support. Data Extraction, Cleanup & Transformation Tools. Metadata.

UNIT-III

Business Analysis. Reporting & Query Tools & Applications. On line Analytical Processing(OLAP). Patterns & Models. Statistics. Artificial Intelligence.

UNIT-IV

Knowledge Discovery, Data Mining. Introduction to Data-Mining. Techniques of Data-Mining. Decision Trees. Neural Networks. Nearest Neighbor & Clustering. Genetic Algorithms. Rule Introduction. Selecting & Using the Right Technique.

UNIT-V

Multimedia Data-Mining, Multimedia-Databases, Mining Multimedia Data, Data-Mining and the World Wide Web, Web Data-Mining, Mining and Meta-Data. Data Visualization & Overall Perspective. Data Visualization. Applications of Data-Mining.

Text Books:

1. Alex Berson, Data Warehousing, Data Mining & OLAP, 13(Reprint), TMH, India, 2008

Reference Books:

Course Title: Distributed Database Systems (<i>Elective-I</i>)	Course Code: CAT424		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: IV		

UNIT-I

Distributed Databases Distributed Databases: What and Why? ; the Distributed Database Management Systems. The Distributed Transparency - - the Reference Architecture for Distributed Databases, Data Fragmentation, Distributed Transparency for Read-Only and Applications, Distributed Database Access Primitives, Integrity Constraints in Distributed Databases.

UNIT-II

Distributed Database Design Framework for Distributed Database Design, the Database Fragmentation Design, Allocation of Fragments. Translation of Global Queries to Fragment Queries The Equivalence Transformation for Queries, Transforming Global Queries into Fragment Queries, Distributed Grouping and Aggregate Function Evaluation, Parametric Queries.

UNIT-III

Optimization Of Access Strategies Framework for Query Optimization, Join Queries - - use of Semi-Join Programs for Join Queries, the SDD-1 Algorithm, the AHY approach, Use of Join as Query Processing Tactic; General Queries - - Effect of Commuting Joins and Unions, Methods for the Optimization of General Queries. The Management of Distributed Transactions The Framework for Transaction Management; Atomicity of Distributed Transactions; Concurrency Control for Distributed

Transactions; Architectural Aspects of Distributed Transactions.

UNIT-IV

Concurrency Control Foundations of Distributed Concurrency Control; Distributed Deadlocks; Concurrency Control based on Timestamps; Optimistic Methods for Concurrency Control. Distributed Database Administration Catalog Management in Distributed Databases, Authorization and Protection. The System R * The Architecture of System R*; Compilation, Execution and Recompilation of Queries; Protocols for Data Definition and Authorization in R*, Transaction and Terminal Management.

UNIT-V

The Object Oriented Databases Object Oriented Databases - What and Why? , the Object Oriented Database Management Systems; Evolution of Object Oriented Concepts; Characteristics of an Object Oriented Data Model; Object Schema; Inter- object Relationships; Late and Early Binding; Similarities and differences between Object Oriented Database Models and other Data models. Object Oriented DBMS Architectural Approaches The Extended Relational Model Approach; Semantic Database Approach; Object Oriented Programming Language Extension Approach; DBMS Generator Approach; the Object Definition Language and the Object Query Language.

Text Books:

1. Distributed Databases - Principles and Systems; Stefano Ceri, Guiseppe Pelagatti; Tata McGraw Hill; 1985.
2. Database Systems- Design, Implementation and Management; Peter Rob, Carlos Coronnel; Course Technology; 2000.

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Course Title: Artificial Intelligence (Elective-II)	Course Code: CAT425		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: IV		

Objectives: The course will cover basic ideas and techniques underlying the design of intelligent computer systems. Students will be able to develop the intelligent systems to reduce the human effort, and how the intelligence can be provided to a machine.

Prerequisites: None

UNIT-I

Introduction: History of AI, Intelligent agents and its functions, Problem spaces and search - Heuristic Search techniques – Best-first search, Problem reduction - Constraint satisfaction - Means Ends Analysis.

UNIT-II

Knowledge Representation: Approaches and issues in knowledge representation, Propositional Logic, Predicate logic – clause form conversion – Unification – Resolution, Semantic Nets, Partitioned Nets, Minsky frames, scripts.

UNIT-III

Reasoning under uncertainty: Logics of non-monotonic reasoning, Implementation, Basic probability notation, Bayes rule, Certainty factors and rule based systems, Bayesian networks, Introduction to Fuzzy Logic.

UNIT-IV

Planning and Learning: Planning with state space search, conditional planning, continuous planning, Multi-Agent planning. Forms of learning - inductive learning – Reinforcement Learning - learning decision trees - Neural Net learning and Genetic learning

UNIT-V

Expert System: Representation - Expert System shells - Knowledge Acquisition, domain exploration meta knowledge, inference engine, self explaining system, Application and Working of Ant Colony System. case study of MYCIN and DENDRAL

Text Books:

1. Elaine Rich, Kevin Knight and Shivashankar B.Nair, “Artificial Intelligence”, Tata McGraw-Hill, Third edition, 2009. (UNITs I, II, III & V)
2. Stuart J. Russell and Peter Norvig, "Artificial Intelligence: A Modern Approach", Pearson Education Asia, Second edition, 2003. (UNIT IV)
3. N. P. Padhy, “Artificial Intelligence and Intelligent System”, Oxford University Press, Second edition, 2005. (UNIT V)

Reference Books:

1. Rajendra Akerkar, “Introduction to Artificial Intelligence”, Prentice-Hall of India, 2005.
2. Patrick Henry Winston, “Artificial Intelligence”, Pearson Education Inc., Third edition, 2001.
3. Eugene Charniak and Drew Mc Dermott, “Introduction to Artificial Intelligence", Addison-Wesley, ISE Reprint, 1998.
4. Nils J.Nilsson, “Artificial Intelligence - A New Synthesis", Harcourt Asia Pvt. Ltd., Morgan Kaufmann, 1988.

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Course Title: Advance Computer Networks (Elective-II)	Course Code: CAT426		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: IV		

Prerequisite: Computer Networks

UNIT-I

Internetworking: IP Addressing, Sub netting, Address Resolution Protocols, Routing Protocols- Interior Router Protocols & Exterior Router Protocols, Congestion Control at Network layer, Next Generation IP protocol, ICMPv6. IP Multicasting, Multicasting Routing Protocols, Multicast Congestion Control

UNIT-II

Wireless Internet: IP Limitations, Mobile IP & its working, Issues in Mobile IP. TCP over Wireless-Mobile TCP. TCP extensions for high speed network, Security related issues, Transaction-oriented application, TCP Congestion Control. Network Performance Analysis, High Performance Networks, Overlay Network, Peer-to-Peer,

UNIT-III

Wireless Networks: WLANs & WLLs IP Security: Architecture, Authentication header, Encapsulating security payloads, combining security associations, key management.

UNIT-IV

Network Security at Various Layers. Secure-HTTP, SSL, ESP, Authentication header, Key distribution protocols. Digital signatures, Digital certificates.

UNIT-V

Issues of Network Programming, BSD Sockets, TCP/IP programming, Network performance analysis using NS2

Text Books:

1. J Schiller, Mobile Communication,2/e, Pearson Education Ltd.,India,2003
2. Andrew S. Tanenbaum, Computer Network,5/e, Pearson Education Ltd.,India,2010
3. W. Stallings, Computer Networking with Internet Protocols and Technology, 1/e, Pearson Education Ltd.,India,2004

Reference Books:

1. Charles E. Perkins, Adhoc Networking,1/e, Addison-Wesley, USA, 2001
2. Behrouz Forouzan, TCP/IP Protocol Suite,4/e, TMH, India, 2009
3. Douglas E. Comer, Internetworking with TCP/IP Volume One, 6/e, Addison-Wesley, USA, 2013
4. C.E. Perkins, B. Woolf and S.R. Alpert, "Mobile IP, Design Principles and Practices",1/e, Addison Wesley, USA, 1997

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Course Title: Cryptography and Network Security (<i>Elective-II</i>)	Course Code: CAT427		
Credit: 3	L	T	P
	3	0	0
Year: 2nd	Semester: IV		

UNIT-I

Introduction to Cryptography: Introduction To Security: Attacks, Services & Mechanisms, Security, Attacks, Security Services. Conventional Encryption: Classical Techniques, Conventional Encryption Model, And Steganography, Classical Encryption Techniques. Modern Techniques: Simplified DES, Block Cipher Principles, DES Standard, DES Strength, Differential & Linear Cryptanalysis, Block Cipher Design Principles, Block Cipher Modes Of Operation.

UNIT-II

Conventional Encryption Algorithms: Triples DES, Blowfish, International Data Encryption Algorithm, RCS, CAST-128, RC2 Placement & Encryption Function, Key Distribution, Random Number Generation, Placement Of Encryption Function.

UNIT-III

Public Key Encryption: Public-Key Cryptography: Principles Of Public-Key Cryptosystems, RSA Algorithm, Key Management, Fermat's & Euler's Theorem, Primality, The Chinese Remainder Theorem.

UNIT-IV

Hash Functions: Message Authentication & Hash Functions: Authentication Requirements, Authentication Functions, Message Authentication Codes, Hash Functions, Birthday Attacks, Security Of Hash Function & MACS, MD5 Message Digest Algorithm, Secure Hash Algorithm (SHA), Digital Signatures: Digital Signatures, Authentication Protocol, Digital Signature Standard (DSS), Proof Of Digital Signature Algorithm.

UNIT-V

Network & System Security: Authentication Applications: Kerberos X.509, Directory Authentication Service, Electronic Mail Security, Pretty Good Privacy (PGP), S / Mime, Security: Architecture, Authentication Header, Encapsulating Security Payloads, Combining Security Associations, Key Management, Web Security: Secure Socket Layer & Transport Layer Security, Secure Electronic Transaction (Set), System Security: Intruders, Viruses, Firewall Design Principles, Trusted Systems.

Text Books:

1. Behrouz A Forouzan, Cryptography and Network Security, Special Edition, TMH, India, 2008

Reference Books:

1. Johannes A. Buchmann, "Introduction to cryptography", 2/e, Springer- Verlag, USA, 2004
2. Atul Kahate, "Cryptography and Network Security", 2/e, TMH, New Delhi, 2005

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Course Title: Parallel Computing (<i>Elective-II</i>)	Course Code: CAT428		
Credit: 3	L 3	T 0	P 0
Year: 2nd	Semester: IV		

UNIT-I

Principles of parallel algorithm design: decomposition techniques, mapping & scheduling computation, templates, Programming shared-address space systems: Cilk Plus, Open MP, Pthreads, Parallel computer architectures: shared memory systems and cache coherence, distributed-memory systems, interconnection networks and routing

UNIT-II

Computational demands, advantages of parallel systems. Flynn's classification, controlled parallelism and scalability. Topologies: Mesh, binary tree, Hyper tree, Cube Connected cycles, shuffle-Connected Exchange; Uniform Memory Access (UMA & Non uniform Memory Access (NUMA) Multi processor System.

UNIT-III

PARAM Model of Parallel Computation, PARAM Algorithms; Parallel Reductions, Prefix sum, List Ranking, Merging of Two Sorted List.

UNIT-IV

Mapping and Scheduling; mapping of Data from Topology to other (Ring to 2-D Mesh, Binomial trees to 2-D mesh, Rings & mesh into 2-D Mesh, Ring & Mesh into Hypercubes), Load balancing,

UNIT-V

Static scheduling on UMA multi-processor systems. Applications of parallel computing: Matrix Multiplication, Sorting (bitonic Merge sort, parallel quick sort, hyper quick sort), Searching a Graph (P-depth search, Breadth-Depth Search, Breath firstsearch), parallel branch and bound algorithms.

Text Books:

1. Ananth Grama, Introduction to Parallel Computing, 2/e, Pearson Education, England, 2003

Reference Books:

1. Michel J. Quinn, **Parallel Computing: Theory and Practice**, 2/e, TMH, India, 2002
2. Kai Hwang, **Advanced Computer Architecture**, 2/e, TMH, India, 2011
3. Peter Pacheco, **An Introduction to Parallel Programming**, 1/e, Morgan Kaufmann, USA, 2011

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Course Title: Advance Java Lab	Course Code: CAP451		
Credit: 1	L 0	T 0	P 2
Year: 2nd	Semester: IV		

1. Establish connection to your local MySQL Database, create a table and insert few records.
2. Try creating a connection to a variety of databases – MySQL, Oracle, Microsoft SQL Server, MS Access, MS Excel e.t.c
3. Using **execute()** method execute a SELECT statement and traverse the rows by obtaining **ResultSet** from the **getResultSet()** method
4. A table “Employee” contains a field “children”, if an employee has no children the getInt() method returns zero (0), it also returns zero (0) when the field contains NULL. Write a program to show how to distinguish between 0 and NULL
5. Write a program to implement two methods which depict the working of inbuilt methods **absolute()** and **relative()**
6. Write a program to show the working of following methods next(), previous(), first(), last(), beforeFirst(), afterLast(), absolute(), relative(), isFirst(), isLast(), isBeforeFirst(), isAfterLast(), getRow()
7. Execute a SELECT statement which retrieves all columns e.g. SELECT * FROM <table-name>, write a program to print the total number of rows, columns and name of each column in the **ResultSet**
8. Create a connection to database and print all tables in it.
9. Oracle and MS Access are not compatible with each other. Write an application which create connection to Oracle and export data from a database then imports that data into a MS Access database.
10. Implement the Servlet interface and present user a form to enter roll number of a student. The form should be submitted to another Servlet where it establishes connection to a database and retrieves the marks and name of the student. Show error message if roll number is invalid.
11. Create a Servlet by extending the HttpServlet class and solve the above problem definition using only one Servlet i.e. present the form in the doGET method and display name and marks in the doPOST method.
12. Write a JSP to show the working of all four scripting tags.
13. Write a JSP to show the working of **errorPage** and **isErrorPage** i.e. exceptions generated in a JSP must be handled by specified error page JSP.
14. Write a JSP to show the working of **jsp: forward**, **jsp: include** and **include** directive.
15. Using **jspInit** method and implicit objects write a JSP to prompt user to enter last name of a student and display a list of students matching that last name, each name should be a hyperlink which should display the detail of student. **Note:** Connection should be established only once.
16. Segregate the presentation logic and business logic by using beans along with JSP and solve the same roll number and marks problem as in Q.14. Connection should be established in bean and only once. JSP should be not contain any business logic.
17. Develop an application like picassa using servlets/jsp which have a feature of login (using session and cookies) and user can upload and download pictures. Use JSTL and expression language where ever necessary.
18. Develop a struts and hibernate chat server application where chat history are stored and can be retrieved.
19. Develop a struts based application to demonstrate the working of validation framework.

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Course Title: Computer Graphics Lab	Course Code: CAP452		
Credit: 1	L 0	T 0	P 2
Year: 2nd	Semester: IV		

1. Implementation of line generation using slope's method, DDA and Bresenham's algorithms.
2. Implementation of circle generation using Mid-point method and Bresenham's algorithm.
3. Implementation of ellipse generation using Mid-point method.
4. Implementation of polygon filling using Flood-fill, Boundary-fill and Scan-line algorithms.
5. Implementation of 2D transformation: Translation, Scaling, Rotation, Mirror Reflection and Shearing (write a menu driven program).
6. Implementation of Line Clipping using Cohen-Sutherland algorithm and Bisection Method.
7. Implementation of Polygon Clipping using Sutherland-Hodgman algorithm.
8. Implementation of 3D geometric transformations: Translation, Scaling and rotation.
9. Implementation of Curve generation using Interpolation methods.
10. Implementation of Curve generation using B-spline and Bezier curves.
11. Implementation of any one of Back face removal algorithms such as

Course Structure for MCA Program

Batch: 2013-15

Course Title: Comprehensive Viva	Course Code: CAP453		
Credit: 1	L 0	T 0	P 2
Year: 2nd	Semester: IV		

- Two panels each of three members will be evaluating all the students.
- Only one student is evaluated at a time.
- Each student is evaluated for 15 minutes.
- The subjects in the comprehensive viva are as follows:
 - Programming Languages – C, Object Oriented Language
 - DBMS, OS, DC&CN, OOAD, Unix and Shell Programming, SE.
- Viva may include board work too.
- The questionnaire will not be random; one subject after the other will be evaluated.

Recommended Books:

1. Java; the complete reference, 7th edition, Herbert schildt, TMH.
2. Object Oriented Programming With C++ 4/E by Balagurusamy
3. Computer science, a structured programming approach using C, B.A. Forouzan and R.F. Gilberg, 3rd edition, Thomson.
4. Database Management Systems, Raghurama Krishnan, Johannes Gehrke, TATA McGrawHill 3rd Edition
5. Operating System Concepts- Abraham Silberchatz, Peter B. Galvin, Greg Gagne 7th Edition, John Wiley.
6. Software Engineering, A practitioner's Approach- Roger S. Pressman, 6th edition. McGraw Hill International
7. Grady Booch, James Rumbaugh, Ivar Jacobson: The Unified Modeling Language User Guide, Pearson Education.
8. Computer Networks — Andrew S Tanenbaum, 4th Edition. Pearson Education/PHI
9. Data Communications and Networking , 4th Edition by Behrouza A. Forouzan, TMH
10. Your Unix the ultimate guide, Sumitabha Das, TMH. 2nd Edition
11. Unix Concepts and Applications, Sumitabha Das, TMH. 4th Edition.

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Course Title: Value Added Training – II	Course Code: CAV454		
Credit: 1	L 0	T 0	P 2
Year: 2nd	Semester: IV		

Advance Web Applications-II

UNIT I

PHP: Introduction to PHP, History, Web Browser and Web Server, Xampp Installation and Configuration files, Language Syntax, Operators, Variables, Constants, Control, Structure, Language construct and functions, Arrays, Strings, Web: Sessions, Forms, GET and POST data, Cookies, HTTP Headers, Database Programming, Streams and Network Programming: File reading and writing, File uploading and downloading, Reading URLs.

UNIT II

Joomla: Introduction to Joomla, Installation, PHP and Joomla, Admin Settings and user management, Setting up and organizing menus and navigation, Managing content articles – (CMS), Working with Joomla components, Using Joomla modules and plugins, Choosing and configuring Joomla templates, Building and managing Joomla websites

UNIT III

Drupal: Introduction to Drupal, installation and interface, Drupal administration and user management, Security and permissions, Menus and Navigation, Managing site contents – blog, poll, forums, Themes, Modules, Building and managing Drupal websites

UNIT IV

Ruby on Rails: Introduction to Ruby on Rails, Installation, MVC, Database Connection, Building forms, Form Validation, AJAX integration

OR

Developing Mobile Applications using Android

UNIT I- What is Android: Brief History of Embedded Device Programming, Introduction to Android, Downloading and Installing Eclipse, Downloading and Installing the Android SDK.

UNIT II- What Is in the Android SDK? Application Life Cycle: Standard ASP Application Life Cycle, Android Application Life Cycle, Creating Your First Android Project in Eclipse, Examining the Android-Created Files: Android Manifest.xml, Referenced Libraries, Directories, Hello World! XML-Based UI, Hello World! CODE-Based UI

UNIT III- Using Intents and the Phone Dialer, What Are Intents?, Using the Dialer, Placing a Call from Your Activity, Adding the Intent to Your Activity, Modifying the AndroidPhoneDialer, Adding a Button, Implementing an EditText View

UNIT IV- Lists, Menus, and Other Views, Building the Activities, Intent Code for the .xml File, Intent Code for the .java File, Using the Menu, Creating the Activity for AutoComplete, Button, CheckBox, EditText, RadioGroup

Course Structure for MCA Program

Batch: 2013-15

Course Title: .Net Framework and C# Programming	Course Code: KAE210		
Credit: 4	L 3	T 0	P 2
Year: 3rd	Semester: V		

UNIT-1

The .Net framework: Introduction, The Origin of .Net Technology, Common Language Runtime (CLR), Common Type System (CTS), Common Language Specification (CLS), Microsoft Intermediate Language (MSIL), Just-In – Time Compilation, Framework Base Classes.

UNIT-II

C -Sharp Language (C#): Introduction, Data Types, Identifiers, Variables, Constants, Literals, Array and Strings, Object and Classes, Inheritance and Polymorphism, Operator Overloading, Interfaces, Delegates and Events. Type conversion

UNIT-III

C# Using Libraries: Namespace- System, Input-Output, Multi-Threading, Networking and sockets, Managing Console I/O Operations, Windows Forms, Error Handling.

UNIT-IV

Advanced Features Using C#: Web Services(WSDL,UDDI,SOAP),Asp.net Web Form Controls: Server Control, HTML controls, **ADO.Net:** Connection (OleDb Connection and SqlConnection), Command, Data Readers, Data Adapters and DataSet , Unsafe Mode

UNIT-V

.Net Assemblies and Attribute: .Net Assemblies features and structure, private and share assemblies, Built-In attribute and custom attribute. Introduction about generic

List of Experiments

1. First Console Application (Hello World) in C#
2. Program to demonstrate Convert function
3. Program to demonstrate Boolean Operators
4. Write a program to take two numbers from user and determine the largest one?
5. Write a program to calculate simple interest
6. Draw Mandelbrot sets using for loop and switch case
7. Write a program using enum
8. Write a program using struts
9. Write a program using string arrays
10. Write a program using properties
11. Write a program for single level inheritance
12. Write a program for polymorphism
13. Write a program for method overriding
14. Write a program of single cast delegate
15. Write a program of multicast delegate
16. Write a program of using event
17. Write a program of exception handling
18. Write a program of multithreading
19. Write a program of indexers
20. Write a program of creating a assembly
21. Write a program of unsafe code
22. Write a program of boxing
23. Write a program of unboxing
24. Write a program of Arraylist Collection
25. Write a program of HashTable collection
26. Write a program of reading and writing to a data file

Batch: 2013-15

Course Title: Mobile and Ad-hoc Computing	Course Code: KAE010		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: V		

UNIT-I

Issues in Mobile Computing, Wireless Telephony: Frequency Reuse, Cell Design, Cellular Architecture. Digital Cellular Standards, GSM: air-interface, channel structure, location management: HLR-VLR, Handoffs, Channel allocation in cellular systems, CDMA, GPRS, Overview of 3G Cellular Networks

UNIT-II

Wireless Networking, WLAN Overview, Infrared LAN, Spread-Spectrum LAN, Narrowband Microwave LAN, MAC issues, MACA & MACAW, IEEE 802.11, IEEE 802.16, Bluetooth, Wireless Metropolitan Area Networks (Wireless Local Loop), Wireless Multiple Access.

UNIT-III

Wireless Internet: IP Limitations, Mobile IP & its working, Issues in Mobile IP. TCP over Wireless, Wireless Access Protocol (WAP): Architecture & Protocol Stack. Security in Wireless Systems, Mobile Agents Computing, Transaction Processing in Mobile Computing Environment

UNIT-IV

Ad Hoc Networks: Ad Hoc Networks vs. Cellular Networks, Issues in Ad Hoc Wireless Networks, MAC Protocols, Routing Protocols for Ad Hoc Wireless Networks-Design Issues and Classification, Proactive Routing Protocols, Reactive Routing Protocols, Hybrid Routing Protocols.

UNIT-V

Wireless Sensor Networks: Overview, Application Areas, Sensor Nodes' Architecture, Data Aggregation, Routing, and Query Processing in WSN.

Text Books:

1. J Schiller, Mobile Communication,2/e,Pearson Education Ltd.,India,2003
2. Charles E. Perkins,Adhoc Networking,1/e, Addison-Wesley,USA,2001

Reference Books:

Course Structure for MCA Program

Batch: 2013-15

Course Title: Cloud Computing	Course Code: KAE020		
Credit: 3	L 3	T 0	P 0
Year: 3rd	Semester: V		

UNIT-I

Understanding Cloud Computing: Cloud Computing – History of Cloud Computing – Cloud Architecture – Cloud Storage – Why Cloud Computing Matters – Advantages of Cloud Computing – Disadvantages of Cloud Computing – Companies in the Cloud Today – Cloud Services

UNIT-II

Developing Cloud Services: Web-Based Application – Pros and Cons of Cloud Service Development – Types of Cloud Service Development – Software as a Service – Platform as a Service – Web Services – On-Demand Computing – Discovering Cloud Services Development Services and Tools – Amazon Ec2 – Google App Engine – IBM Clouds

UNIT-III

Cloud Computing For Everyone: Centralizing Email Communications – Collaborating on Schedules – Collaborating on To-Do Lists – Collaborating Contact Lists – Cloud Computing for the Community – Collaborating on Group Projects and Events – Cloud Computing for the Corporation

UNIT-IV

Using Cloud Services 10: Collaborating on Calendars, Schedules and Task Management – Exploring Online Scheduling Applications – Exploring Online Planning and Task Management – Collaborating on Event Management – Collaborating on Contact Management – Collaborating on Project Management – Collaborating on Word Processing - Collaborating on Databases – Storing and Sharing Files

UNIT-V

Other Ways to Collaborate: Collaborating via Web-Based Communication Tools – Evaluating Web Mail Services – Evaluating Web Conference Tools – Collaborating via Social Networks and Groupware – Collaborating via Blogs and Wikis

Text Books:

1. Furht, Borko, Escalante, Armando, Handbook of Cloud Computing, 1/e, Springer, USA, 2010
2. Thomas Erl et al, Cloud Computing: Concepts, Technology & Architecture, 1/e, Prentice Hall, USA, 2013

Course Structure for MCA Program

Batch: 2013-15

Course Title: Principles of Compiler Design (Elective-III)	Course Code: KAE610		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: V		

UNIT-I

Introduction: Review of Languages & Grammar, Compiler and Interpreter- Basic Concepts, Phases and Passes, Finite State Machines & Regular Expressions and their application to Lexical Analysis, Design Issues using Finite State Machines, Scanner Generator- LEX, Formal Grammar and their application to Syntax Analysis, Ambiguous Grammar, The Syntactic specification of Languages: CFG, Derivation and Parse Trees, Capabilities of CFG, BNF Notation.

UNIT-II

Basic Parsing Techniques: Parsing-Top Down and Bottom-Up Strategies: General Consideration.

Top Down Parsing: Brute-Force Method, Recursive Descent, & Predictive Parsing, Bottom-Up Parsing: Shift Reduce Parsing, Operator Precedence Parsing. LR Grammars-LR(0), SLR(1), Canonical LR(1) & LALR(1) Parser, Comparison of parsing methods.

UNIT-III

Semantic Analysis: Basic Concepts, Syntax Directed Definitions-Inherited & Synthesized Attributes, Evaluation Orders of SDDs. Syntax directed Translation Schemes; Intermediate Codes, Postfix notation, Parse Trees and Syntax Trees, Directed Acyclic Graphs, Three address Codes: Quadruple & Triples, Translation of Assignment Statements, Boolean expressions, Control Statements, Postfix Translation, Translation with a Top Down Parser, Array references in Arithmetic expressions, Procedure Calls, Declarations and Case statements Translations.

UNIT-IV

Symbol Tables: Organization of Non-Block Structured Language (Unordered/Ordered/Tree/Hash) and Block Structured Language (Stack Tables & Stack Implementation), Runtime Storage Management: Static Allocation, Dynamic Allocation- Activation Records and their usage, Recursive Procedure. Heap Allocation-Storage Registers and Release Strategies.

UNIT-V

Error detection and Recovery: Code Optimization- Basic Blocks and Optimization, Loop Optimizaton, Flow Graph Analysis, Machine Dependent Optimization.

Error Handling: Detection, Reporting, Recovery and Maintenance, Compiler-Compiler—YACC, Code Generation, Concept of Compiler Design for Object-Oriented Language. -

Text Books:

1. Aho, Ullman & Sethi, “**Compiler Design: Principles, Techniques & Tools**”, 2/e, Addison Wesley, USA, 2006

Course Title: Real Time and Embedded Systems (Elective-III)	Course Code: KAE620		
Credit: 3.5	L	T	P
	3	1	0
Year: 3rd	Semester: V		

UNIT-I

Introduction: Concept of Real Time System, Issues in real time computing, Performance measures of Real Time System, Issues in Real Time Computing, Performance measures of Real time Systems, Real Time Application.

Task Assignment and Scheduling: Different task model, Scheduling hierarchy, offline vs Online scheduling, Clock Drives.

UNIT-II

Model of Real Time System: Processor, resources, temporal parameter, Periodic Task Model, Sporadic Task Model, Precedence Constraints and Data Dependencies, Scheduling hierarchy, **Scheduling of Periodic Task:** Assumptions, fixed versus dynamic priority algorithms, schedulability test for fixed priority task with arbitrary deadlines. **Scheduling of Aperiodic and Sporadic Tasks:** Assumptions and approaches, deferrable, sporadic servers, slack stealing in deadline driven and fixed priority systems. Two level schemes for integrated scheduling, Scheduling for applications having flexible constrains.

UNIT-III

Resources and Resource Access Control: Assumptions on resources and their usage, resource contention, resource access control (Priority Ceiling Protocol, Priority Inheritance protocol, Slack Based Priority Ceiling Protocol, Preemption Ceiling Protocol).

UNIT-IV

Multi Processor Scheduling: Model of multi processor and distributed systems, scheduling algorithms for end to end periodic tasks in homogeneous/heterogeneous systems, Predictability and validation of dynamic multiprocessor system.

UNIT-V

Real time Communication: Model of real time Communication, Priority base service for switched network, Weighted Round Robin Service, Medium access Control Protocol, Real Time Protocol.

Text Books:

1. Jane .W. S. Liu “**Real Time Systems**”,1/e, Pearson Higher Education,USA,2000.

Course Structure for MCA Program

Batch: 2013-15

Course Title: Operations Research (<i>Elective-III</i>)	Course Code: KAE630		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: VI		

UNIT-I

Linear programming : graphical methods for two dimensional problems – central problem of linear programming – various definitions – statements of basic theorems and properties – phase i and phase ii of the simplex method – revised simplex method – primal and dual – dual simplex method – sensitivity analysis – transportation problem and its solution – assignment problem and its solution by Hungarian method.

UNIT-II

Integer programming: Gomory cutting plane methods – branch and bound method. Queuing theory: characteristics of queuing systems – steady state m/m/1, m/m/1/k and m/m/c queuing models. Replacement theory: replacement of items that deteriorate – replacement of items that fail group replacement and individual replacement.

UNIT-III

Inventory theory : costs involved in inventory problems – single item deterministic models – economic lot size models without shortages and with shortages having partition rate infinite and finite.

UNIT-IV

Pert and CP/M : arrow network- time estimates – earliest expected time, latest allowable occurrence time, latest allowable occurrence time and slack – critical path – probability of meeting scheduled date of completion of project – calculation of CP/M network – various floats for activities – critical path – updating project – operation time cost trade off curve – selection of schedule based on cost analysis

UNIT-V

Game Theory: The formation of Twoperson, Zerosum games, solving simple games, games with mixed strategies, Graphical solution Procedure, Solving by LP.

Text Book:

Course Title: Modeling and Simulation (<i>Elective-III</i>)	Course Code: KAE640		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: V		

UNIT-I

Introduction to Modeling and Simulation: Nature of Simulation. Systems, Models and Simulation, Continuous and Discrete Systems, system modeling, concept of simulation, Components of a simulation study, Principles used in modeling, Static and Dynamic physical models, Static and Dynamic Mathematical models Introduction to Static and Dynamic System simulation, Advantages, Disadvantages and pitfalls of Simulation.

UNIT-II

System Simulation and Continuous System Simulation: Types of System Simulation, Monte Carlo Method, Comparison of analytical and Simulation methods, Numerical Computation techniques for Continuous and Discrete Models, Distributed Lag Models, Cobweb Model. Continuous System models, Analog and Hybrid computers, Digital- Analog Simulators, Continuous system simulation languages, Hybrid simulation, Real Time simulations.

UNIT-III

System Dynamics & Probability concepts in Simulation: Exponential growth and decay models, logistic curves, Generalization of growth models, System dynamics diagrams, Multi segment models, Representation of Time Delays. Discrete and Continuous probability functions, Continuous Uniformly Distributed Random Numbers, Generation of a Random numbers, Generating Discrete distributions, Non-Uniform Continuously Distributed Random Numbers, Rejection Method.

UNIT-IV

Simulation of Queuing Systems and Discrete System Simulation: Poisson arrival patterns, Exponential distribution, Service times, Normal Distribution Queuing Disciplines, Simulation of single and two server queue. Application of queuing theory in computer system. Discrete Events, Generation of arrival patterns, Simulation programming tasks, Gathering statistics, Measuring occupancy and Utilization , Recording Distributions and Transit times .

UNIT-V

Introduction to Simulation languages and Analysis of Simulation output GPSS: Action times, Succession of events, Choice of paths, Conditional transfers, program control statements. SIMSCRIPT: Organization of SIMSCRIPT Program, Names & Labels, SIMSCRIPT statements. Estimation methods, Relocation of Runs, Batch Means, Regenerative techniques , Time Series Analysis, Spectral Analysis and Autoregressive Processes.

Course Structure for MCA Program

Batch: 2013-15

Course Title: Wireless Sensor Networks (Elective-IV)	Course Code: KAE650		
Credit: 3.5	L 3	T 1	P 0
Year: 3 rd	Semester: V		

UNIT- I

Introduction: Introduction to Sensor Networks, unique constraints and challenges, Advantage of Sensor Networks, Applications of Sensor Networks, Mobile Adhoc NETWORKS (MANETs) and Wireless Sensor Networks, Enabling technologies for Wireless Sensor Networks Sensor Node Hardware and Network Architecture: Single-node architecture, Hardware components & design constraints, Operating systems and execution environments, introduction to TinyOS and nesC, Network architecture, Optimization goals and figures of merit, Design principles for WSNs, Service interfaces of WSNs, Gateway concepts.

UNIT-II

Deployment and Configuration: Localization and positioning, Coverage and connectivity, Single-hop and multihop localization, self-configuring localization systems, sensor management

UNIT-III

Network Protocols: Issues in designing MAC protocol for WSNs, Classification of MAC Protocols, S-MAC Protocol, B-MAC protocol, IEEE 802.15.4 standard and Zig Bee, Dissemination protocol for large sensor network.

UNIT-IV

Routing protocols: Issues in designing routing protocols, Classification of routing protocols, Energy-efficient routing, Unicast, Broadcast and multicast, Geographic routing.

UNIT-V

Data Storage and Manipulation: Data centric and content based routing, storage and retrieval in network, compression technologies for WSN, Data aggregation technique.

Applications: Detecting unauthorized activity using a sensor network, WSN for Habitat Monitoring.

Text Books:

1. Waltenege Dargie, Christian Poellabauer, Fundamentals of Wireless Sensor Networks: Theory and Practice, 1/e, Wiley, India, 2010

Course Title: Fault Tolerance Computing (<i>Elective-IV</i>)	Course Code: KAE660		
Credit: 3.5	L 3	T 1	P 0
Year: 3 rd	Semester: V		

UNIT-I

Definitions of fault tolerance, fault classification, fault tolerant attributes and system structure. Information redundancy, hardware redundancy, and time redundancy.

UNIT-II

Fault Tolerant Design :Basic concepts on dynamic, hybrid and self purging ,software redundancy, fail-soft operation, Network Redundancy and Fault Tolerance , Software and Hardware Checkpointing, examples of practical fault tolerant systems.

UNIT-III

Basic concepts of Reliability: Failures and faults, Reliability and failure rate, Relation between reliability & mean time between failure, Maintainability & Availability, reliability of series and parallel systems. Modeling of faults. Test generation for combinational logic circuits: conventional methods (path sensitisation, Boolean difference), Random testing, transition count testing and signature analysis.

UNIT-IV

Fault tolerant networks for Shared bus and Shared memory Architecture. Security, fault tolerance in wireless/mobile networks and Internet.

UNIT-V

System level diagnosis, Error correcting codes: Hamming codes, SED-DED codes, SEC-SBD codes, cyclic codes, Watchdog techniques, check pointing and error recovery, Software Fault Tolerance.

Course Title: Big Data Analysis (<i>Elective-IV</i>)	Course Code: KAE670		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: V		

UNIT I

What is Big Data, Hadoop Architecture, Hadoop ecosystem components, Hadoop Storage: HDFS, Hadoop Processing: MapReduce Framework, Hadoop Server Roles: NameNode, Secondary NameNode, and DataNode, Anatomy of File Write and Read.

Hadoop Cluster Architecture, Hadoop Cluster Configuration files, Hadoop Cluster Modes, Multi-Node Hadoop Cluster, A Typical Production Hadoop Cluster, MapReduce Job execution, Common Hadoop Shell commands, Data Loading Techniques: FLUME, SQOOP, Hadoop Copy Commands, Hadoop Project: Data Loading

UNIT II

Hadoop Data Types, Hadoop MapReduce paradigm, Map and Reduce tasks, MapReduce Execution Framework, Partitioners and Combiners, Input Formats (Input Splits and Records, Text Input, Binary Input, Multiple Inputs), Output Formats (TextOutput, BinaryOutPut, Multiple Output), Hadoop Project: MapReduce Programming

UNIT III

Counters, Custom Writables, Unit Testing: JUnit and MRUnit testing framework, Error Handling, Tuning, Advance MapReduce, Hadoop Project: Advance MapReduce programming and error handling.

Installing and Running Pig, Grunt, Pig's Data Model, Pig Latin, Developing & Testing Pig Latin Scripts, Writing Evaluation, Filter, Load & Store Functions, Hadoop Project: Pig Scripting

UNIT IV

Hive Architecture and Installation, Comparison with Traditional Database, HiveQL: Data Types, Operators and Functions, Hive Tables(Managed Tables and External Tables, Partitions and Buckets, Storage Formats, Importing Data, Altering Tables, Dropping Tables), Querying Data (Sorting And Aggregating, Map Reduce Scripts, Joins & Sub queries, Views, Map and Reduce side Joins to optimize Query)

UNIT V

Hive: Data manipulation with Hive, User Defined Functions, Appending Data into existing Hive Table, Custom Map/Reduce in Hive, Hadoop Project: Hive Scripting, HBase: Introduction to HBase, Client API's and their features, Available Client, HBase Architecture, MapReduce Integration.

Text Books:

Credit: 3.5	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding: 0 10px;">L</td> <td style="padding: 0 10px;">T</td> <td style="padding: 0 10px;">P</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">1</td> <td style="text-align: center;">0</td> </tr> </table>	L	T	P	3	1	0
L	T	P					
3	1	0					
Year: 3 rd	Semester: V						

UNIT-I

Introduction and Fundamentals : Motivation and Perspective, Applications, Components of Image Processing System, Element of Visual Perception, A Simple Image Model, Sampling and Quantization. Introduction of image standard JPG, GIF, TIFF, PNG.

Image Enhancement in Spatial Domain: Introduction; Basic Gray Level Functions – Piecewise- Linear Transformation Functions: Contrast Stretching; Histogram Specification; Histogram Equalization; Local Enhancement; Enhancement using Arithmetic/Logic Operations, Image Subtraction, Image Averaging; Basics of Spatial Filtering; Smoothing - Mean filter, Ordered Statistic Filter; Sharpening – The Laplacian.

UNIT-II

Image Enhancement in Frequency Domain: Fourier Transform and the Frequency Domain, Basis of Filtering in Frequency Domain, Filters – Low-pass, High-pass; Correspondence Between Filtering in Spatial and Frequency Domain; Smoothing Frequency Domain Filters – Gaussian Lowpass Filters; Sharpening Frequency Domain Filters – Gaussian Highpass Filters; Homomorphic Filtering. **Image Restoration:** A Model of Restoration Process, Noise Models, Restoration in the presence of Noise only-Spatial Filtering – Mean Filters: Arithmetic Mean filter, Geometric Mean Filter, Order Statistic Filters – Median Filter, Max and Min filters; Periodic Noise Reduction by Frequency Domain Filtering – Bandpass Filters; Minimum Mean-square Error Restoration.

UNIT-III

Color Image Processing: Color Fundamentals, Color Models, Converting Colors to different models, Color Transformation, Smoothing and Sharpening, Color Segmentation.

Morphological Image Processing: Introduction, Logic Operations involving Binary Images, Dilation and Erosion, Opening and Closing, Morphological Algorithms – Boundary Extraction, Region Filling, Extraction of Connected Components, Convex Hull, Thinning, Thickening

UNIT-IV

Registration: Introduction, Geometric Transformation – Plane to Plane transformation, Mapping, Stereo Imaging – Algorithms to Establish Correspondence, Algorithms to Recover Depth.

UNIT-V

Segmentation: Introduction, Region Extraction, Pixel-Based Approach, Multi-level Thresholding, Local Thresholding, Region-based Approach, Edge and Line Detection: Edge Detection, Edge Operators, Pattern Fitting Approach, Edge Linking and Edge Following, Edge Elements Extraction by Thresholding, Edge Detector Performance, Line Detection, Corner Detection.

Course Title: Multimedia Systems (<i>Elective-V</i>)	Course Code: KAE690		
Credit: 3.5	L	T	P
	3	1	0
Year: 3rd	Semester: V		

Objectives: objective of this subject is to introduce the students with the multimedia devices and its applications. It will enable the students to combine the different media to deliver the information to the user so that it can be represented in the effective and efficient manner.

Prerequisites: None

UNIT-I

Evolution of Multimedia and its objects, Scope of multimedia in business & work, Production and planning of Multimedia applications. Multimedia hardware, Memory & Storage Devices, Communication Devices, Multimedia Software, Presentation and object generation tools, Video, sound, Image capturing, Authoring Tools, Card based, Page Based, and time based Authoring Tools.

UNIT-II

Production and Planning of Multimedia building blocks, Text, sound (MIDI), Digital Audio, Audio File Formats, Video File Formats, Audio & Video Capture.

UNI-IV

Digital Audio Concepts(digitization of audio signals), Sampling variables, Lossless compression of audio, lossy compression of audio.

UNIT-V

Multimedia monitor bitmaps, Vector drawing, Lossy graphic compression, Image file formatic animations Image standards, J P E G compression, Zig Zag coding, Video representation, colors, video compression, MPEG standards, MHEG standard.

UNIT-V

Multimedia Application Planning, Costing, Proposal preparation, and Financing-Case study of a typical industry.

Text Book:

1. Halsall F.; Multimedia Communications: Applications, Networks, Protocols and Standards, 4/e, Pearson Education, India, 2009.

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Course Title: Ethical Hacking	Course Code: KAE600		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: V		

UNIT-I

Casing the Establishment - What is footprinting- Internet Footprinting. -Scanning-Enumeration - basic banner grabbing, Enumerating Common Network services. Case study- Network Security Monitoring

UNIT-II

Securing permission - Securing file and folder permission. Using the encrypting file system. Securing registry permissions. Securing service- Managing service permission. Default services in windows 2000 and windows XP. Unix - The Quest for Root. Remote Access vs Local access. Remote access. Local access. After hacking root.

UNIT-III

Dial-up, PBX, Voicemail, and VPN hacking - Preparing to dial up. War-Dialing. Brute-Force Scripting PBX hacking. Voice mail hacking. VPN hacking. Network Devices – Discovery, Autonomous System Lookup. Public Newsgroups. Service Detection. Network Vulnerability. Detecting Layer 2 Media.

UNIT-IV

Wireless Hacking - Wireless Footprinting. Wireless Scanning and Enumeration. Gaining Access. Tools that exploiting WEP Weakness. Denial of Services Attacks. Firewalls- Firewalls landscape- Firewall Identification- Scanning Through firewalls- packet Filtering- Application Proxy Vulnerabilities. Denial of Service Attacks - Motivation of Dos Attackers. Types of DoS attacks. Generic Dos Attacks. Unix and Windows DoS

UNIT-V

Remote Control Insecurities - Discovering Remote Control Software. Connection. Weakness. VNC. Microsoft Terminal Server and Citrix ICA .Advanced Techniques Session Hijacking. Back Doors. Trojans. Cryptography. Subverting the systems Environment. Social Engineering. Web Hacking. Web server hacking web application hacking. Hacking the internet User - Malicious Mobile code, SSL fraud, E-mail Hacking, IRC hacking, Global countermeasures to Internet User Hacking.

Course Title: Genetic Algorithm and Neural Networks (<i>Elective-V</i>)	Course Code: KAE6A0		
Credit: 3.5	L 3	T 1	P 0
Year: 3rd	Semester: V		

UNIT-I

Basic concepts, working principle, procedures of GA, flow chart of GA, Genetic representations, (encoding) Initialization and selection.

UNIT-II

Genetic operators, Mutation, Generational Cycle, Applications. An Overview of Combinatorial Optimization. Theoretical Foundations of Genetic Algorithms.

UNIT-III

Genetic Algorithms in Engineering and Optimization, Genetic Algorithms in Natural Evolution, Simulated Annealing and Tabu Search.

UNIT-IV

Artificial Neural Networks, Evolving Neural Networks, feed forward n/w, Threshold units, linear units, nonlinear units, stochastic units, capacity of simple perceptron, Reinforcement learning.
Learning: Supervised, Unsupervised (Hebbian/Competitive), Adaptive resonance theory, Travelling salesman problem

UNIT-V

Implementing Genetic Algorithms: GALib, Genetic Algorithm Optimization Toolbox (GAOT) under Matlab.

Text Books:

1. Goldberg, "Genetic Algorithms in search ,optimization & Machine Learning",4(Reprint), Pearson Education, Indi, 2009
2. Mitchell, "An Introduction to Genetic Algorithms," 1/e, MIT Press, London England, 1998

Course Title: Fuzzy Systems (<i>Elective-V</i>)	Course Code: KAE6B0		
Credit: 3.5	L	T	P
	3	1	0
Year: 3rd	Semester: V		

Objectives: At the end of this course, students will be able to: Describe and compute vague concepts using fuzzy sets and fuzzy logic, Construct fuzzy rules and perform fuzzy reasoning on them, Design, some common fuzzy systems and fuzzy controllers, Illustrate the organization, design and operation of some common fuzzy systems.

UNIT-I

Fuzzy Systems: Probabilistic reasoning, Crisp set and Fuzzy set, Basic concepts of fuzzy sets, membership functions. Basic operations on fuzzy sets, Fuzzy Relations, Fuzzy Graphs, and Fuzzy, Arithmetic,. Fuzzy If-Then Rules, Fuzzy Implications and Approximate Reasoning

UNIT -II

Fuzzy Logic: Fuzzy Logic, Fuzzy Logic and Artificial Intelligence, Fuzzy Logic in Database and Information Systems.

UNIT -III

Fuzzy Logic in Pattern Recognition, Fuzzy Logic Control, Fuzzy Discrete Event Systems

UNIT-IV

Hybrid systems: Neuro- fuzzy and fuzzy genetic systems, applications to engineering problems.

UNIT- V

Application of FLC: Fuzzy logic control – Inverted pendulum – Image processing – Home heating system – Blood pressure during anesthesia – Introduction to neuro fuzzy controller.

Text Books:

1. George J. Klir, Bo Yuan, **Fuzzy Sets And Fuzzy Logic Theory And Applications**, 1/e, PHI, India, 2009

Credit: 1	L 0	T 0	P 2
Year: 3rd	Semester: V		

Guidelines for submission of MCA Project (Project-II)

All the candidates of MCA project are required to submit a project report based on the work done by him/her during the project period.

PROJECT TIME / MAN-HOURS

The MCA Projects would be approximately 25 man-hours and carries a total of 25/50 marks.

Number of students in a project group will not be more than two.

Technology / Programming Language to be used:

Project –I : C, Datastructures

Project- II : Java, .Net

Project Evaluation Guidelines:

The project is evaluated on the basis of following heads :

Presentation	-	15% of total marks.
Viva	-	15% of total marks.
Thesis/Project report	-	30% of total marks.

Software Coding

i)	Documentation	-	15% of total marks.
ii)	Software	-	25% of total marks.

SUMMARY/ABSTRACT

All students must submit a summary/abstract separately with the project report. Summary, preferably, should be of about 3-4 pages. The content should be as brief as is sufficient enough to explain the objective and implementation of the project that the candidate is going to take up. The write up must adhere to the guidelines and should include the following

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

1. Name / Title of the Project
2. Statement about the Problem
3. Why is the particular topic chosen?
4. Objective and scope of the Project
5. Methodology (including a summary of the project)
6. Hardware & Software to be used
7. What contribution would the project make?

Also any other important feature that makes the system stands out from the rest.

The following suggested guidelines must be followed in preparing the Final project Report:

Good quality white executive bond paper A4 size should be used for typing and duplication. Care should be taken to avoid smudging while duplicating the copies.

Page Specification: (Written paper and source code)

Left margin - 3.0 cms

Right margin- 1.0 cms

Top margin 2.5 cms

Bottom margin 2.5 cms

Page numbers - All text pages as well as program source code listing should be numbered at the bottom center of the pages.

Normal Body Text: Font Size: 12, Times New Roman, Double Spacing, Justified.

Paragraph Heading Font Size: 14, Times New Roman, Underlined, Left Aligned.

Chapter Heading Font Size: 20, Times New Roman, Centre Aligned.

Coding Font size: 10, Courier New, Normal

Submission of Project Report to the University: The student will submit his/her project report in the prescribed format. The Project Report should include:

1. One copy of the summary/abstract.
 2. One hard Copy of the Project Report.
 3. Soft copy of project on Floppy/CD in a thick envelope pasted inside of the back cover of the project report.
- The Project Report may be about 50 pages (excluding coding).

FORMAT OF THE PROJECT REPORT

1. Cover Page with university logo, Student Name and Roll Number, Project Title and Guide's name.
2. Acknowledgement
3. Main Report
 - Objective & Scope of the Project

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

- Theoretical Background
- Definition of Problem
- System Analysis & Design vis-a-vis User Requirements
- Details of Hardware & Software requirements

- Detailed Life Cycle of the Project
 - o ERD, DFD

 - o Input and Output Screen Design process involved
 - o Methodology used for testing:
 - o Test Report, Printout of the Reports, Printout of the Code Sheet
- Conclusion
- Future Scope of Project.
- **Annexure:**
Data Dictionary (This should give a catalogue of the data elements used in the system / sub system developed. The following are the details required. Write NA if NOT applicable.
 - Data Name , Aliases, if any Length (Size) Type, Numeric, Alpha, Binary etc.
 - List of abbreviations, Figures, Tables
- References
- Bibliography Website
- Soft copy of the project on CD/Floppy

ACKNOWLEDGEMENTS

In the “Acknowledgement” page, the writer recognises his indebtedness for guidance and assistance of the thesis adviser and other members of the faculty. Courtesy demands that he also recognise specific contributions by other persons or institutions such as libraries and research foundations. Acknowledgements should be expressed simply, tastefully, and tactfully.

Course Title: MAT LAB	Course Code: KAE120		
Credit: 1	L 0	T 0	P 2
Year: 3rd	Semester: V		

Course Objectives

- understanding the MATLAB environment;
- being able to do simple calculations using MATLAB;
- being able to carry out simple numerical computations and analyses using MATLAB.

Knowledge and understanding

- understand the main features of the MATLAB development environment;
- use the MATLAB GUI effectively;
- design simple algorithms to solve problems;
- write simple programs in MATLAB to solve scientific and mathematical problems;
- know where to find help.

Contents

- Matlab fundamentals, Matrix Operations, Data Types, Data Analysis and Statistics, Equation systems, Curve Fitting, Programming in Matlab, Graphics, Graphical User Interface (GUI), System commands, Symbolic Math toolbox, Simulink

Reference Book:

Hanselman, Duane. Littlefield, Bruce. Mastering Matlab7 (international edition). Pearson/Prentice Hall.

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Course Title: Industrial Project	Course Code: KAF810		
Credit: 16	L	T	P
	--	--	--
Year: 3rd	Semester: VI		

THINKING UP A PROJECT: You are expected to come up with your own idea for a Project. A wide range of topics is acceptable so long as there is substantial computing content and project is predominantly of a practical, problem-solving nature.

Start thinking about your project right in the beginning of Vth semester of MCA. If you want to do the project in industrial environment start your correspondence fairly early to find an organization, which is ready to accept you. By the end of Vth semester, you must submit your synopsis in the prescribed format given at the end of these guidelines (at least five or seven pages) along with copy of resume, willingness and proof of working of the supervisor to the MCA Vth semester coordinator DIT University. This must include the Title, Objectives, Methodology (main steps to carry out a project), expected output and organization where you intend to carry out the project. The work on the project/ thesis should be started only after approval of synopsis by the University.

PROJECT REPORT: The main purpose of the report is to explain what you did in your project. The reader should be able to see clearly what you set out to do and what you achieved. It should describe the problem addressed and explain why you tackled it in the way you did. It should include your own assessment of how successful the project was.

The length of the text is generally about 8000-10000 words, but the length should be dictated by what you have to say. A shorter report is also acceptable if content is good. Resist temptation to include pages of padding.

The work that is presented for examiners should be your own. The presentation of another person's work, design or program as though they are your own is a serious examination offence. Direct quotation from the work of others published or unpublished) must always be clearly identified as such by being placed in quotation marks, and a full reference to the source must be provided. Students are advised to pay attention to the quality of their English. Sometimes a project containing good work is marred by a report, which is turgid, obscure and simply ungrammatical

SOME IMPORTANT POINTS FOR CARRYING OUT A PROJECT: The organizations or companies offer you a placement for project work out of good will or to get some useful work done. Usually the companies do not provide you everything required by you. You must settle this right in the beginning of your project with the business that what will you get from them and what you will have to arrange yourself.

Sometimes a complication arises due to the fact that the company considers some aspect of your project work confidential. If this is so, it is your responsibility to get whatever clearance is necessary from the organization right in the beginning as essential parts like system analysis & design, flowcharts etc. cannot be missing from a project report.

Project Evaluation Guidelines.

The project is evaluated on the basis of following heads:

Presentation: 25% of total Marks

Viva: 20 % of total Marks

Thesis/Project Report: 30% of total Marks

Software Coding

Documentation: 10% of total Marks

Software: 15 % of total Marks

Department of Computer Applications

Course Structure for MCA Program

The following suggested guidelines must be followed in preparing the Final project Report:

Good quality white executive bond paper A4 size should be used for typing and duplication. Care should be taken to avoid smudging while duplicating the copies.

Page Specification: (Written paper and source code)

Left margin - 3.0 cms

Right margin- 2.0 cms Top

margin 2.54 cms Bottom

margin 2.54 cms

Page numbers - All text pages as well as Program source code listing should be numbered at the bottom center of the pages.

Normal Body Text: Font Size: 12, Times New Roman, Double Spacing, Justified. 6 point above and below para spacing

Paragraph Heading Font Size: 14, Times New Roman, Underlined, Left Aligned. 12 point above & below spacing.

Chapter Heading Font Size: 20, Times New Roman, Centre Aligned, 30 point above and below spacing.

Coding Font Size: 10, Courier New, Normal

PROJECT REPORT FORMAT

1. Title Cover
2. Certificate from organization about your stay (Project Duration) at that place and about submission of work done under external guide at the place of training.
3. Certificate from your guide about the submission of work done under his/her guidance, Internal Supervisor.
4. Table of Contents, abstract of the project (abstract of actual work done).
5. A brief overview of the organization (regarding function area, location, division in which you are working, turnover)
6. Profile of problems assigned.
7. Study of existing system, if any.
8. System requirements
 - a. Function to be Provided
 - b. Product Definition
 - c. Problem Statement
 - d. Processing Environment: H/W, S/W.

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

- e. Solution Strategy
- f. Acceptance Criteria

9. Feasibility Analysis

10. Project Plan

- a. Team Structure
- b. Development Schedule
- c. Programming Languages And Development Tools

11. System Requirement Specifications

- a. Developing / Operating / Maintenance Environments
- b. External Interface And Data Flows
- c. User display and report format, user command summary
- d. High level DFD and data dictionary
- e. Functional and performance specifications

12. Design Phase

- a. Detailed DFD's and structure diagrams
- b. Data structures, database and file specifications
- c. Pseudo Code

13. Test Plan

- a. Functional, Performance, Stress tests etc.

14. Implementation / Conversion Plan

- a. Project Legacy
- b. Current status of project
- c. Remaining areas of concern
- d. Technical and managerial lessons learnt
- e. Future recommendations

15. Bibliography

16. Source Code

Note: - The above is meant to serve as a guideline for preparation of the project report. The students may add to, modify or omit some of the above-mentioned points depending upon their relevance to the project and with the consultation of the project guide for the same. Joint project will be allowed and joint project report will be also being accepted. In case of Joint Project the team should not consist of more than 3 members. Individual project will be recognized and the student should highlight their contribution in a joint project report.

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

ACKNOWLEDGEMENTS

In the “Acknowledgement” page, the writer recognises his indebtedness for guidance and assistance of the thesis adviser and other members of the faculty. Courtesy demands that he also recognise specific contributions by other persons or institutions such as libraries and research foundations. Acknowledgements should be expressed simply, tastefully, and tactfully.

ANNEXURE

1. Brief background of the organisation where the student has developed the project.
2. Data Dictionary (This should give a catalogue of the data elements used in the system / sub system developed. The following are the details required. Write NA if NOT applicable :
Data Name, Aliases, if any Length (Size) Type,

Numeric, Alpha, Binary etc.

List of abbreviations, Figures, Tables
3. References
4. Bibliography Website
5. Soft copy of the project on CD/Floppy

BINDING & COLOR CODE OF THE REPORT/THESIS

For MCA – VI Semester (Dissertation/Major Project work)

Hard Bound Report

Background of the cover page – Black with letters in Golden

CERTIFICATE

This is to certify that this project entitled “ _____ ” submitted in partial fulfillment of the degree of **MCA (Master Of Computer Applications)** to DIT University, Dehradun ,done by Mr./Ms. _____, Roll No. _____ is an authentic work carried out by him/her at _____ under my guidance. The matter embodied in this project work has not been submitted earlier for award of any degree or diploma to the best of my knowledge and belief.

Department of Computer Applications

Course Structure for MCA Program

Batch: 2013-15

Name & Signature of the Guide

SELF CERTIFICATE

This is to certify that the dissertation/ project report entitled “_____” is done by me is an authentic work carried out for the partial fulfillment of the requirements for the award of the degree of **MCA (Master of Computer Applications)** under the guidance of _____. The matter embodied in this project work has not been submitted earlier for award of any degree or diploma to the best of my knowledge and belief.

Signature of the student

Name of the Student

Roll No.

Pre Ph.D. (English) Course Work
Session: 2013-14**

Pre Ph.D (English)

Sr. No.	Course Code	Course Title	L	T	P	Credit
1	DRC001	Research Methodology	4	0	0	4
2	DRC002	Literary Criticism and Literary Theory	4	0	0	4
3	DRC003	New Research Areas in English Literature	4	0	0	4
4	DRC100	Seminar	0	0	2	1
		Total Credits				13

Pre Ph.D (English)

Course Title: Research Methodology	Course Code: DRC001		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I/II		

UNIT 1: RESEARCH: MEANING AND SCOPE

(5 Hrs)

Philosophy and Meaning of Research, Nature and Scope of Research, Nature of inquiry in Physical Science and Social Sciences, Difference between writing a popular article and research paper, Difference between writing a book and a dissertation

UNIT 2: RESEARCH-METHODOLOGY AND APPROACHES

(10 Hrs)

Selection of Research Topic, Plan of Work, Thesis Statement and its Feasibility, Survey of different critical approaches, Selection of a particular approach, Micro and Macro analysis, The identification of the Research Problem, Problem of plagiarism, Material Collection: Primary and Secondary Sources, Reliability of Sources

UNIT 3: PREPARATORY STEPS

(7 Hrs)

Writing the Synopsis, Literature Survey, The search for facts; the verification of facts, the analysis of evidence, trusty and causation, sources if prejudice and bias, Collection, Listing and Organization of Material, Library references; note- making, Use of Note-Cards and Reference Cards.

UNIT 4: ESSENTIALS OF THESIS-WRITING

(13 Hrs)

Format and the Structure of a thesis, Single and Multi-Tier Division of Chapters, Writing of the Main Chapters, Preparation and Presentation of Conclusions, Foot Notes, Bibliography, Index, Quotation & Translation, Style: Paragraphing: Mechanics of Writing, The stylistics of thesis writing, Preparation of Manuscript and References, Proof reading, Documentation, Use of MLA Style Sheet

TEXT BOOK

1. The Art of Literary Research, R.D. Altick and J.J. Fenstermaker. The University of Michigan, 1963.
2. The MLA Style Sheet- recent edition.

REFERENCE BOOKS

1. The Craft of Research, Booth and Colomb. Chicago Guides to Writing, Editing, and Publishing.
2. Methodology and Methods of Linguistic Research, I.P. Ranspopov.
3. Literary Research Guide, J.L.Harner.2nd edn. New York Press, 1993.
4. Handbook of Literary Research, R.H. Miller. The Scarecrow Press, 1995.
5. G. Watson- The Literary Thesis
6. Jaeques Barzun and Henry F. Graft. The Modern Researcher, New York, Harcorurt, Brace & World, 1962.

Pre Ph.D (English)

Course Title: Literary Criticism and Literary Theory	Course Code: DRC002		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I/II		

Objectives

1. To make the scholars know and appreciate the finer sensibilities of literature.
2. To equip them with the critical nuance to evaluate various genre for in-depth research.
3. To nourish the philosophical faculty of the scholar.

Unit 1 Conceptual Background

(9Hrs.)

1. Appreciation of Literature
2. Literary Sensibility
3. Literature, Life and Society
4. Truth and Morality in Literature

Unit 2 Theories of Literary Appreciation

(9Hrs)

1. Art for Art's sake
2. Psychological Appreciation of Literature: Freud and Jung
3. Archetypal Criticism
4. New Criticism and Structuralism
5. Reader-Response Theory

Unit 3 Recent Trends in Literary Appreciation

(8Hrs)

1. The Post-War Scenario and Social Changes
2. Feminist Readings of the Texts
3. Post Structuralism
4. Deconstruction
5. Postmodernism
6. Post colonialism

Suggested Books:

1. Theory of Literature, Wellek and Warren, 1999
2. Literary Theory: An Introduction, Terry Eagleton, 1983
3. Contemporary Literary Criticism, Davis and Schleifer, 1989
4. A Glossary of Literary Terms, M.H.Abrams, 2000
5. Modern Literary Theory: A Reader, Rice, Philip & Wagh, Patricia, 1989

Pre Ph.D (English)

Course Title: New Research Areas in English Literature	Course Code: DRC003		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I/II		

Unit 1 - Indian English Literature

- Diasporic literature
- Dalit Literature
- Emerging Indian Writers

Unit 2 – Contemporary Writers

- British Literature
- American Literature
- Australian Literature
- Canadian Literature
- South African Literature

Unit 3 - Linguistics

- Impact of Technology on English Literature
- Teaching of English as a Second Language, English for Speakers of Other Languages(ESOL)
- CALL – Computer Aided Language Learning

Pre Ph.D (Mechanical Engineering)

Course Title: Advanced Mathematics	Course Code: THE111		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I/II		

Numerical Techniques

Zeros of Transcendental and Polynomial equation using bisection method, Newton-Raphson method, Rate of convergence of above methods. Interpolation: Finite differences, difference tables, Newton's Forward and Newton's Backward Interpolation, Lagrange's and Newton divided difference formula for unequal intervals. Solution of system of Linear equations, Gauss-Seidal method, Crout method. Numerical Integration: Trapezoidal rule, Simpson's one-third rule, Simpson's three-eighth rule, Solution of ordinary differential (first order, second order and simultaneous) equations by Picard's and Fourth order Runga - Kutta methods

Partial Differential Equations (PDE)

Formation and Classification of PDE, Solution of One Dimension Wave Equation, and Heat Equation, Two Dimension Heat and Laplace Equation by Separation of variables Method.

Special Functions

Series solution of ODE of 2nd order with variable coefficient with special emphasis to Legendre and Bessel differential equation, Legendre polynomial of first kind, Bessel Function of first kind and their properties.

Statistics:

Elements of statistics, frequency distribution: concept of mean, median, mode, Standard deviation, variance and different types of distribution: Binomial, Poisson and Normal distribution, curve fitting by least square method, Correlation and Regression, Concept of Hypothesis Testing.

Optimization:

Formulation, Graphical method, Simplex method, Two-Phase simplex method, Duality, Primaldual relationship, Dual-simplex method.

Text Books:

- R. K. Jain & S. R. K. Iyenger: Advanced Engineering Mathematics, Narosa publication, 2014.
- Jain, Iyenger & Jain: Numerical methods for scientific & Engg. Computation, New age, 2003.
- Gupta S. C., Kapoor V. K.: Fundamentals of Statistics, Sultan Chand & Sons, Eleventh Edition (Reprint) 2014.

Reference Books:

- E. Kreyszig: Advanced Engineering Mathematics, Wiley publication.
- B.S. Grewal: Higher Engineering Mathematics, 42nd Edition, Khanna Publication, India, 2012.

Pre Ph.D (Mechanical Engineering)

Course Title: Advanced Optimisation Techniques	Course Code: TCC131		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I/II		

Linear Programming: Geometry of linear programming, Graphical method, Linear programming (LP) in standard form, Solution of LP by simplex and revised simplex methods, Exceptional cases in LP, Duality theory, Dual Simple method, Sensitivity analysis.

(08)

Network Analysis: Transportation problem (with transshipment), Assignment problem, Traveling-salesman problem, Shortest route problem, Minimal spanning tree, Maximum flow problem.

(08)

Integer Programming: Branch and bound algorithm, Traveling salesman problem.

(06)

Dynamic programming: Forward recursions, General problem, Reliability problem, Capital budgeting problem, Cargo-loading problem.

(06)

CPM and PERT: Drawing of networks, Removal of redundancy, Network computations, Free slack, Total slack, Crashing, Resource allocation.

(08)

Non-Linear Programming: Characteristics, Concepts of convexity, maxima and minima of functions of n-variables using Lagrange multipliers and Kuhn-Tucker conditions, One dimensional search methods, Fibonacci, golden section method and gradient methods for unconstrained problems.

(08)

Text Books:

1. Taha, H.A., Operations Research: An Introduction, Prentice Hall of India (2007) 8th ed.
2. Kasana, H.S., Introductory Operation Research: Theory and Applications, Springer Verlag
3. Rardin, Ronald L., Optimization in Operations research, Pearson Education
4. Ravindran A, Phillips D.T. and Solberg J.J. Operation Research: Principles and Practice, John Wiley

Pre Ph.D (Mechanical Engineering)

Course Title: Composite Materials	Course Code: TCC132		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I/II		

Introduction – classifications, terminologies, manufacturing processes (in brief).

(08)

Macromechanical analysis of lamina – Hooke's law for anisotropic, monoclinic, orthotropic, transversely isotropic and isotropic materials–2D Unidirectional and angle ply lamina – Strength theories of lamina.

(10)

Micromechanical analysis of lamina –Volume and mass fraction, density and void content – Evaluation of Elastic moduli, Ultimate strength of unidirectional lamina.

(08)

Macromechanical analysis of laminates – Laminate code, Stress strain relations – In-plane and Flexural modulus,Hygrothermal effects.

(10)

Failure Analysis and Design – Special cases of laminates, symmetric, cross ply, angle ply and antisymmetric laminates, failure criteria and failure modes

(08)

Recommended Books:

Pre Ph.D (Pharmacy)

Course Title: Advanced Pharmaceutics	Course Code: DRA001		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I/II		

UNIT – I

- i) Basic Concepts of Solubility and Dissolution of Pharmaceutical Solids
- ii) Theoretical Estimation of Solubility
- iii) Thermodynamics of Solutions; Solubility by Combination of Approaches
- iv) Various Techniques for Solubilization, Experimental Methods of Determination of Solubility and its Conditions

UNIT – II

- i) Polymorphism and Transformation of Solids, Amorphous Drugs and Solid Dispersion; Analytical Techniques for Solid State Characterization; Salts Screening and Selection; Excipient Compatibility
- ii) Theory of Diffusion and Pharmaceutical Applications

UNIT – III

Polymers, Biopolymers and its properties, characterization and its applications

UNIT – IV

- i) Oral Drug Absorption, Evaluation and Prediction
- ii) Biopharmaceutical and Pharmacokinetic Evaluation of Drug molecules and Dosage Form

UNIT – V

- i) FDA Guidelines for Bioequivalence Study for NDDS
- ii) Developing predictive in-vitro test and in-vivo Evaluation for Oral Dosage Forms, Performance and In-Vitro/In-Vivo Correlation techniques and Approaches

Books Recommended:

1. Developing Oral Solid Dosage Forms; Pharmaceutical Theory and Practice- Yihokiu, Academic Press
2. Foundation of Pharmacokinetic ACDO RESCIGNO Kulwer Academic Publishers
3. Handbook of Pharmaceutical Manufacturing Formulation (Volumes I, II, III, IV, V,VI); Sarfaraz K. Niazi, CRC Press.
4. Handbook of Stability Testing in Pharmaceutical Development, Springer Publisher, Kim Huynh-Ba
5. Handbook of Preformulation Sarfaraz K. Niazi, Informa Health Care
6. Pharmaceutical Preformulation and Formulation; Mark Gibson, HIS Health Gr
7. Pharmaceutical Product Development IVIVC, Dueshina Murthy Chilukasi Informa Health Care
8. Pharmaceutical Dissolution Testing, Jennifer Dressman, Taylor and Francis
9. Physical Pharmacy; David Attwood, PhP Pharmaceutical Press
10. Spectroscopy of Pharmaceutical Solid; Janes S Warbrick, Taylor and Francis Group
11. Pharmaceutical Excipients Characterization by IR, Raman, NMR; David Ei Bugey and W. Paul Findlay
12. Polymorphism in Pharmaceutical Solid; Harry G Brittain
13. Bioadhesive Drug Delivery: Fundamental, Novel approaches and development: Mathioneitzes
14. Drug Delivery to Oral Cavity Molecules to Market; Tapash. K. Ghosh and Willian R. Pfister

Pre Ph.D (Pharmacy)

Course Title: Drug Regulatory Affairs	Course Code: DRA002		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I/II		

UNIT – I

- i) Indian Patent Act
- ii) Indian Patent Filing, Drafting, Writing Claims and various Forms for Filing.

UNIT – II

- i) Regulatory Regulations for MHRA, USFDA, CDSCO

UNIT – III

Good Laboratory Practices (GLP), Schedule M, Inter Regulatory Prospects on Bioavailability and Bioequivalence

UNIT – IV

- i) Clinical Ethical Regulatory Issues of Nanotechnology and Nanoparticles
- ii) Regulatory Issues on Pharmaceutical Excipient Techniques

UNIT – V

U.S. Patent Act

Books Recommended:

1. GLP Regulations, 2nd Edition, Revised and Expanded by Sandy Weingberg.
2. GMP Practices in Pharmaceuticals, Sidney H. Willig and Janes R Stokes
3. Preparing for FDA preapproval Inspection: Martin D. Hynes
4. Drugs and Cosmetic Act (Schedule M)
5. Gennaro A.R., Remington- The science and practice of pharmacy, Lippincott, Williams & Wilkins.
6. Banker G.S., Rhodes C.T., Modern Pharmaceutics, Marcel Dekker.
7. Malik Vijay, Drug & Cosmetics Act, 1940, Eastern Book Company, Lucknow.
8. Guarino R.A., New Drug Approval Process, Marcel Dekker.
9. Sharma P.P., How to practice GMP, Vandana Prakashan, New Delhi.
10. Sharma P.P., how to practice GLP, Vandana Prakashan, New Delhi,
11. World Health Organization, quality assurance of Pharmaceuticals I & I, Pharma Book Syndicate, Hyderabad.
12. Weinlerg S., Good Laboratory Practices, Marcel Dekker.
13. The Patent Act, 1970
14. The Trade Marks Act, 1999.
15. The Copyright Act, 1958.
16. Potdar M.A., Current Good Manufacturing Practices for Pharmaceuticals, Pharma Med Press, Hyderabad.
17. Rick N.G., Drug from Discovery to Approval, Wiley Black Well.
18. Swarlerick J., Boylan J., Encyclopedia / Pharmaceutical Technology Relevant Websites of Regulatory Authority of different countries.
19. Introduction to the pharmaceutical regulatory process. Ira R. Berry

Pre Ph.D (Pharmacy)

Course Title: Targeted Drug Delivery Systems	Course Code: DRA003		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I/II		

UNIT – I

An overview on DSS & Targeted DDS: Approaches, Approval, Mechanism & Research Updates

- i) Drug Targeting to Brain: Concepts, Approaches, Approval, Mechanism & Research Updates
- ii) Recent Brain Targeting Concept: Nose to Brain; Ear to Brain

UNIT – II

- i) Cell Specific Delivery: Concepts, Various Approaches and Recent Advances
- ii) Strategies for Specific Drug Targeting to Tumour Cells and Tumour Vasculature
- iii) Drug Delivery Applications of Nanoparticles and Nanotoxicology

UNIT – III

- i) Recent advances in Transmucosal Drug Delivery; Buccal; Soft Palatal, Trans-Labial
- ii) Ocular Drug Delivery

UNIT – IV

Targeted GI Delivery and Colon Targeting Specific Drug Delivery and Trans-Ungual

UNIT – V

- i) Self Emulsifying Drug Delivery System (SEDDS): Improving Absorption of poorly soluble drugs using SEDDS and Nano Self Emulsifying Drug Delivery System(NSEDDS)
- ii) Case Study On:
 - a) Development and Evaluation of SEDDS
 - b) Modified Release Solid Oral Dosage Forms

Books Recommended:

1. Sterile Product facility design and Project Management; 2nd Edition, Jeffene Nodum, CRC Press
2. Modified Release Drug Delivery Techniques; Michael J. Rathbone (Marcel Dekker Inc.)
3. Pharmaceutical Skin Permeation Enhancement; Kenneth A. Waters and Jonathan Hadgrats
4. Physical Characterization of Pharmaceutical Solids; Harry G. Oritam
5. Pharmaceutical Experimental Design; Gareth A. Lewis.
6. Surfactants polymer in drug delivery; Martin Malmsten
7. Drug delivery Nanoparticles formulation and characterization; Yashwant Pathak, Informa Publication
8. Dermatokinetics: S.N Murthy
9. Pharmaceutical Gene Delivery System; Alian Rolland
10. Pharmaceutical Extrusion technology edited by Isaach Ghebre Sellossie
11. Compliance Handbook of pharmaceuticals, medical devices and biologics. Edited by Carmen Medina
12. Liposome technology (vol 1,2,3); Gregory Gregoriadis
13. Pharmaceutical Manufacturing Encyclopedia; Marshall Sittig
14. Pharmaceutical technology controlled drug release(vol:1,2,3) M. Rubinstein
15. Prodrug topical and ocular delivery; Kenneth B.Sloan
16. Microencapsulation method and industrial application; Simon Benita
17. Oral mucosal drug delivery system. Michail,J.rathbone

Pre Ph.D (Physics)

Course Title: Advanced Mathematics	Course Code: THE111		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I/II		

Numerical Techniques

Zeros of Transcendental and Polynomial equation using bisection method, Newton-Raphson method, Rate of convergence of above methods. Interpolation: Finite differences, difference tables, Newton's Forward and Newton's Backward Interpolation, Lagrange's and Newton divided difference formula for unequal intervals. Solution of system of Linear equations, Gauss-Seidal method, Crout method. Numerical Integration: Trapezoidal rule, Simpson's one-third rule, Simpson's three-eighth rule, Solution of ordinary differential (first order, second order and simultaneous) equations by Picard's and Fourth order Runga - Kutta methods

Partial Differential Equations (PDE)

Formation and Classification of PDE, Solution of One Dimension Wave Equation, and Heat Equation, Two Dimension Heat and Laplace Equation by Separation of variables Method.

Special Functions

Series solution of ODE of 2nd order with variable coefficient with special emphasis to Legendre and Bessel differential equation, Legendre polynomial of first kind, Bessel Function of first kind and their properties.

Statistics:

Elements of statistics, frequency distribution: concept of mean, median, mode, Standard deviation, variance and different types of distribution: Binomial, Poisson and Normal distribution, curve fitting by least square method, Correlation and Regression, Concept of Hypothesis Testing.

Optimization:

Formulation, Graphical method, Simplex method, Two-Phase simplex method, Duality, Primaldual relationship, Dual-simplex method.

Pre Ph.D (Physics)

Course Title: Photonics Technology	Course Code: DRB001		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I/II		

Unit I: Integrated Optics

Step-index and graded-index waveguides, guided and radiation modes. Strip and channel waveguides, electro-optic and acoustooptic waveguide devices. Directional couplers, optical switch; phase and amplitude modulators, filters, etc. Y-junction, power splitters, Arrayed waveguide devices, fiber pigtailling, Fabrication of integrated optical waveguides and devices. Waveguide characterisation, end-fire and prism coupling; grating and tapered couplers, nonlinear effects in integrated optical waveguides.

Unit II: Fiber Optics

Introduction, The optical fiber, The numerical aperture, Step and graded index multimode fibers, Pulse dispersion in step index fibers, Scalar wave equation and modes of a fiber, Modal analysis of parabolic index medium, Multimode fibers, Single mode fibers, Gaussian Approximation, Splice loss etc.

Unit III: Nonlinear Optics

Introduction, Self focusing phenomenon, simple SHG, Nonlinear frequency upconversion, Single-pass SHG and SFG, Resonator-enhanced SHG, parametric amplification and SFG, Intracavity SHG and SFG, Guided-wave SHG etc.

Unit IV: Fabrication of Photonic Devices

Material selection for various applications, Fabrication techniques for various kinds of Photonic structures, such as Waveguide structures, Nonlinear Optical structures and Microstructures

Recommended Books:

- A.K.Ghatak & K.Thyagarajan, "Introduction to Fiber Optics", Cambridge University Press.
- M. J. Adams, "An Introduction to Optical Wave guides", John Wiley & Sons.
- Hiroshi Nishihara, Masamitsu Haruna, "Optical Integrated Circuits", McGraw Hill Professional.
- William P Risk, Timothy R. Gishell, "Compact Blue-Green Lasers", Cambridge Univ. Press.
- Saleh & Tiech, "Fundamentals Of Photonics", (2012), John Wiley, New York.

Pre Ph.D (Physics)

Course Title: Optical Communication Networks	Course Code: EDC104		
Credit: 4	L 4	T 0	P 0
Year: 1st	Semester: I/II		

UNIT 1: OPTICAL FIBER:

Optical fiber modes and configuration, Mode theory of circular waveguide, Single mode fiber, Attenuation and distortion in optical waveguide, Design optimization of single mode fiber.

UNIT 2: OPTICAL SOURCES AND DETECTORS:

LED: structure, materials, efficiency, and modulation. LASER: lasing action, threshold condition, rate equation, efficiency, modulation. Light source linearity, noises. PHOTODIODES: structure and principle of working, Photodetector noise, SNR.

UNIT 3: OPTICAL RECEIVER AND TRANSMISSION SYSTEMS:

Fundamental receiver operation and detailed performance calculations. Point to point link analysis, Noise effects on system performance. Carrier to noise ratio evaluation for analog link

UNIT 4: WDM CONCEPTS AND COMPONENTS:

Operational principle of WDM, Passive components: Couplers, Multiplexers & Filters, Tunable sources. Semiconductor Optical Amplifier: pumping and amplifier gain, EDFA, Wavelength converters.

UNIT 5: OPTICAL NETWORKS:

Basic networks, network topologies. SONET / SDH: transmission formats and speed, optical interface, SONET/SDH rings. Broadcast-and-select WDM networks, Wavelength routed networks: optical cross connect, nonlinear effects on network performance.

TEXT BOOKS:

1. Gerd Keiser, "Optical Fiber Communication", McGraw Hill, Third Edition,
2. G.P Agrawal, "Fiber Optic Communication Systems", John Wiley and Sons, Fourth Edition, 2010.
